1563, March 27. A bill was brought into the House of Commons, that the bible, and the divine service, may be translated into the Welsh or British tongue, and used in the churches of Wales.\* The first part of the Welsh Scriptures which was printed after the passing of the act, was the New Testament, printed in 1567, by Henry Denham, who had a privilege granted him for printing the New Testament in Welsh. It was a small quarto, printed with the gothic or black-letter type, containing 399 pages, divided into books and chapters, but not into verses, except towards the conclusion.

\* See Journals of the House of Commons at that time.

1563. MICHAEL LOBLEY was one of the original members of the stationers' company; he was a printer, stationer, bookseller, and book-binder, and resided at the sign of St. Michael, in St. Paul's church-yard. Ames states that he had been a servant to Henry Pepwell. Michael Loble appears to have been somewhat inimical to popery, since in 1531 he was questioned for speaking against images, purgatory, and for buying inhibited books at Antwerp, such as *The Obedience of a Christian Man*, *The Wicked Mammon*, and *Frith against Purgatory*. His subscription at the institution of his company was xs; and he appears to have been thrice fined, once for his late attendance on a court day; another time for his non-attendance on the lord mayor, upon Christmas day, when he was thereunto cited; and thirdly, for his keeping open shop upon St. Luke's day. In 1558, when Elizabeth confirmed the charter of the stationers' company, Michael Loble was upper warden, which office he again served in 1562; and at the expiration of each wardenship, he gave the customary gift of "a spoynel alle gylte, with his name at the ende of yt." In August, 1560, soon after the termination of his first wardenship, he was committed to the counter with Mr. Judson, the new under warden, and although on what account does not appear. The company paid their charges at that time. In the latter part of his life, Loble appears to have been so much reduced as not to have been able to discharge his note for £7, which he stood indebted to the company; for having paid £3 of it, "the rest was forgyven him by the hole table." His name appears as a bookseller to *Wayland's Primer*, 1539, and his *Manuall of Prayer*, of the same year, and *A good and Godly Prayer*, 1563, 8vo. bear his imprint.

1563. THOMAS DEWYXSELL, gave by his will one fourth of the residue of his property to the company of stationers, for the use of the poor of the said company.

1563. *Eglogs, epytaphes, and sonnetes, newly written by Barnabe Googe, 15 Marche, printed by Thomas Coluwell, for Raue Newbery, dwelling in Flete-strete, a little above the Conduit, in the late shop of Thomas Barthelet.* Barnabe Googe was a celebrated author and translator.

1563, Sept. 18. Died, RICHARD WATERSON, an early member of the stationers' company, and an eminent bookseller at the corner of St. Paul's church-yard, was thus noticed on a tablet placed by his son in St. Faith's church:—"Neer to this pillar lyeth the body of Richard Waterson, citizen and stationer of London, who died the xxiii of September, 1563. Simon Waterson, his son, placed this heer the 1st of January, 1599."

1563. JOHN TISDALL, or TISDALE, was an original member of the stationers' company, dwelt in Knight Riders'-street, and had a shop in All-Hollows church-yard, Lombard-street, at the sign of the Eagle's foot. Herbert's manuscript mentions that he printed with John Charlewood, at Holborn conduit. In his *Abridgement of Polydore Virgil*, printed without date, there

occurs a cut of Abraham's sacrifice of Isaac, which seems to have been his device. Nineteen works bear his imprint.

1563. NICHOLAS EPISCOPIUS, or rather Bischop, a celebrated printer at Basil. His acquaintance with Greek and Latin gave him very superior advantages when he began the business of printing. John Froben bestowed his daughter on him in marriage; and on his death, in 1527, Bischop went into partnership with his son Jerome. All writers on the subject of printing, bestow high praise on the talents of Bischop, who was also much respected by the learned of his time, particularly Erasmus, who had so much regard for him as to leave him and his partners executors of his will. Bischop died Sept. 27, 1563, leaving a son of the same name and profession, who died two years after, in the flower of youth. They were a protestant family, and had fled from France during the persecutions.

1563. Queen Elizabeth granted a patent to Thomas Cooper,\* of Oxford, for twelve years, for the sole printing of *Thesaurus Lingua Romanae et Britannicae*, in folio. This work was an improvement of the *Bibliotheca Eliota*, and was the second Latin Dictionary in the English tongue. It was printed by Richard Grafton in 1542, 1552, 1559. See Rymer's *Foedera*, vol. xv.

1563. GOA, a city of Hindostan, received the art of printing, probably through the activity of the jesuits from Portugal, who by degrees obtained considerable establishments in this city. The earliest Goa book which had fallen under the notice of Dr. Cotton, was entitled *Cologuios dos simples, e drogas he cosas medicinaes da India &c. Impresso em Goa, por Joannes de endem as x. dias de Abril de 1563. annos*. The work consists of 217 leaves in quarto. Messrs. Payne and Foss, booksellers, London, possessed a copy in the year 1826.

1564. JOHN TORNASIUS, the first of a family of eminent printers and booksellers, called in French DETOURNES, was born at Lyons, in 1504, and learned printing in the house of Sebastian Gryphius. He appears to have established a printing office about 1540, and printed many books in the name and on account of Gryphius; but from 1544, we find his own name to a number of very correct editions. Most of his editions have Latin prefaces or dedications from his pen. His talents procured him the honour of being appointed King's printer. He died of the plague in 1564. His device was two vipers, forming a circle, the female devouring the head of the male, while she herself is devoured by her young, with the inscription, "*Quod tibi fieri*

\* Thomas Cooper was first bishop of London, and afterwards translated to Winchester. The publication of his Dictionary was the cause of his ecclesiastical preferments. He was not only eminent as a divine, but as a scholar; and was considered one of the most learned men of his time. He died April 29, 1594. Dr. White Kennett, in his *Life of William Somner*, addressed to Mr. Brome, Oxford, 1693, 8vo., ranks Cooper's Dictionary as a complete plagiarism from the *Dictionary Latino-Gallicum*, by Charles Stephens, at Paris, 1553, with this only difference, that those phrases are rendered in French by Stephens, and in English by Cooper.

*non vis, alteri ne faceria.*" He was succeeded by his son John, who was also king's printer, and carried on the business until 1585. His editions did not yield in elegance or correctness to those of his father, but being obliged, at the date above-mentioned, to quit his country, upon account of his religion, for he was a Protestant, he settled at Geneva, where he had every encouragement, and in 1604 became a member of the council of two hundred. Like the Geneva printers, however, he deteriorated what he printed here, by employing bad paper. He died in 1615. His descendants continued the printing and book selling business at Geneva, where in 1726, John James and James Detournes purchased the stock of Arrison and Posnel, famous booksellers of Lyons, and obtained permission, notwithstanding their religion, to settle there; and as they also continued their houses at Geneva, greatly extended their trade. In 1740, the learned John Christian Wolf dedicated to them his *Monumenta Typographica*, as to the oldest printing and bookselling family in Europe. In 1780, their sons, who had amassed a plentiful fortune, sold off the whole of their stock, and retired from a business which had been carried on in their family with great reputation, for nearly two hundred and forty years.

1564, March 1. Printing was introduced into Moscow in the reign of John Basilowitz, about the year 1553; but the city being shortly afterwards burnt in an irruption by the Poles, the printing-office was consumed, together with all its materials, and a large stock of paper. The only specimen from this early press now known to be remaining is part of a *Slavonic New Testament*, executed by Ivan Fedor, and P. Timoféev Matislanzow, of the above date; the unique copy of which is preserved in the library of the imperial academy of sciences at St. Petersburg. Chevallier reports, on the authority of Andrew Thevet's Travels, that the types and materials of the first printing establishment in this century, were purposely consumed by the Russians themselves. Thevet's account is as follows: "They had no printing until the year 1560, when it was discovered to them by a Russian merchant, who made use of types with which for some time afterwards they executed very handsome books. All at once, for they are scrupulous, and fond of making difficulties where there is not the least appearance of them, some persons by stratagem found means to burn their types, from a fear that printing would introduce some changes or disturbances in their religion." He adds, that neither the prince nor his subjects took any notice of this extraordinary proceeding. The above particulars Thevet affirms that he received in 1576, from an Englishman who had been ambassador to the Russian court seven years.

After all, perhaps the best account of the first Moscow book and printing is that furnished to us by Bachmeister, chiefly from the volume itself, which he describes as being called *Apostol*, i. e. *the acts and epistles of the Apostles*, a book of the very highest rarity, being the first printed

in Moscow, in the year 1564, in the time of the czar Ivan Wasilowitsch, a prince whose exertions were earnestly devoted to the civilization of his people, who introduced amongst them an acquaintance with the sciences and arts, and amongst others, that of printing.

The volume of the *Apostol*, having been accidentally picked up in the year 1730, was deposited by the finder in the library of the academy of St. Petersburg. The type and paper of it are represented as good, the latter Bachmeister judges to have been brought by the merchants from England. At the end of the volume is a long "mandement" or ordinance.

Bachmeister remarks, that after the *Apostol* no Moscow book appears for thirty-two years; but is not inclined to give entire credence to the story of the press, &c. having been utterly destroyed by the Poles, and all printing being lost until the erection of a new press by the Czar Michael Federowitsch, in 1644; since he had himself seen and handled Moscow books of the dates 1606, 1614, 1616, 1618, 1619, &c. He informs us that in the year 1707 a fount of new and improved Russian types, cast at Amsterdam, was introduced into the Moscow printing-office. Also that in 1709 an individual of that city established a press of his own. About thirty years afterwards a Georgian printing-office was opened in Moscow by Andrew Johnson, in the suburb called Suesenzcha; and Georgian types were cast by order of prince Vakusset, under whose auspices an edition of the *Georgian Bible* was printed here in 1743. Le Long cites an edition of *St. Matthew's Gospel*, in eight languages, which was printed here in 1712.

1564, March 24. At the council of Trent, on this day, pope Pius IV.\* was presented with a catalogue of books, which the council denounced ought to be forbidden: this bull not only confirmed this list of the condemned books, but added rules how books should be judged.

In the history of literature, and perhaps in that of the human mind, says D'Israeli, the institution of the licensers of the press, and censors of books, was a bold invention, designed to counteract that of the press itself; and even to convert this newly-discovered instrument of human freedom into one which might serve to perpetuate that system of passive obedience which had so long enabled modern Rome to dictate her laws to the universe. It was thought possible in the subtlety of Italian *astutia* and Spanish monachism, to place a sentinel on the very thoughts as well as on the persons of authors; and in extreme cases, that books might be condemned to the flames as well as heretics.

Of this institution, the beginnings are obscure, for it originated in caution and fear; but as the work betrays the workman, and the national physiognomy the native, it is evident that so inquisitorial an act could only have originated in the Inquisition itself. Feeble or partial attempts

\* John Angelo de Medici, was born in 1599, died Dec. 9, 1606, in the 67th year of his age, and sixth of his reign. He was a man of great munificence and splendour.

might previously have existed, for we learn that the monks had a part of their libraries called the *inferno*, which was not the part which they least visited, for it contained, or hid, all the prohibited books which they could smuggle into it. But this inquisitorial power assumed its most formidable shape in the council of Trent, when some gloomy spirits from Rome and Madrid foresaw the revolution of this new age of books.

Inquisitors of books were appointed; at Rome they consisted of certain cardinals and "the master of the holy palace;" and literary inquisitors were elected at Madrid, at Lisbon, at Naples and for the Low Countries; they were watching the ubiquity of the human mind. These catalogues of prohibited books were called *Indexes*; and at Rome a body of these literary despots are still called "the Congregation of the Index." The simple *Index* is a list of condemned books which are never to be opened; but the *Expurgatory Index* indicates those only prohibited till they have undergone a purification. No book was to be allowed on any subject, or in any language, which contained a single position, an ambiguous sentence, even a word, which, in the most distant sense, could be construed opposite to the doctrines of the supreme authority of this council of Trent; where it seems to have been enacted, that all men, literate and illiterate, prince and peasant, the Italian, the Spaniard and the Netherlander, should take the mint-stamp of their thoughts from the council of Trent, and millions of souls be struck off at one blow, out of the same used mould.

The sages who compiled these indexes, indeed, long had reason to imagine that passive obedience was attached to the human character; and therefore they considered, that the publications of their adversaries required no other notice than a convenient insertion in their indexes. But the heretics diligently reprinted them with ample prefaces and useful annotations.

The results of these indexes were somewhat curious. As they were formed in different countries, the opinions were often diametrically opposite to each other. The learned Arias Montanus, who was a chief inquisitor in the Netherlands, and concerned in the Antwerp index, lived to see his own works placed in the Roman index; while the inquisitor of Naples was so displeased with the Spanish index, that he persisted to assert that it had never been printed at Madrid! Men who began by insisting that all the world should not differ from their opinions, ended by not agreeing with themselves. A civil war raged among the index makers; and if one criminated, the other retaliated. If one discovered ten places necessary to be expurgated, another found thirty, and a third inclined to place the whole work in the condemned list. The inquisitors at length became so doubtful of their own opinions, that they sometimes expressed in their license for printing, that "they tolerated the reading, after the book had been corrected by themselves, till such time as the work should be

considered worthy of some farther correction." The expurgatory indexes excited louder complaints than those which simply condemned books; because the purgers or castrators, as they were termed, or, as Milton calls them, "the executioners of books," by omitting, or interpolating passages, made an author say, or unsay, what the inquisitors chose; and their editions, after the death of the authors, were compared to the erasures or forgeries in records: for the books which an author leaves behind him, with his last corrections, are like his last will and testament, and the public are the legitimate heirs of an author's opinions.

1564, May 27. Died, JOHN CALVIN, an eminent reformer. He was born at Noyon, in Picardy, July 10, 1509, and educated at Paris, under Corderius, with a view to the church. He became dissatisfied with the tenets of the church of Rome, and altered his mind with respect to the ecclesiastical state. This change in his opinions induced him to study the law, in which he made a considerable progress; but his open avowal of the Protestant faith, rendered his stay in France dangerous, and he retired to Basil, where he published, in 1536, his *Institutions of the Christian Religion*, to which he prefixed an elegant dedication to Francis I. This work rendered his name famous among all the reformed, and was translated into several languages. The year following he settled at Geneva, as minister and professor of divinity, having Farel for his colleague. But soon after he was obliged to leave Geneva, together with Farel, for refusing the sacrament indiscriminately to the people. Calvin then went to Strasburg, where he officiated in a French church of his own establishment, and was also chosen professor of divinity. The divines of Strasburg appointed Calvin to be their deputy at the diet of worms. In the mean time the citizens of Geneva requested his return to the city, and after repeated solicitations he consented, and arrived there in 1541. His first undertaking was to set on foot a system of ecclesiastical discipline, strictly presbyterian, and as rigorous and assuming as that of Rome itself. The inconsistency between pretensions and practice, which Calvin evinced, when himself in possession of power; and that spirit of intolerance and persecution which writers, both catholic and protestant, have attributed to him, but which in the preface to his own *Institutes*, he deprecates. The burning of Servetus; the beheading of Perrin, a distinguished citizen of Geneva, with whom he had political or private dissensions; the unrelenting persecution of Castellio, and the imprisonment of Bolsec, both of whom had ventured to controvert his favourite doctrine of predestination; these are facts which history has placed on record, and from the stains of which, his most ardent admirers have found it difficult to redeem his character. He continued in that city actively employed as a preacher and a writer till his death, which happened in 1564. The moral character of Calvin was irreproachable, and he appears to have

acted from conscientious motives; but he was proud and overbearing. He left a widow, by whom he had a son, who died an infant. Calvin's works make 9 vols. folio.

1564, *Died*, CHARLES STEPHENS. He was third son of Henry, the founder of the family, and brother of Robert and of Francis, the latter of whom we have noticed in page 300. Ricciolius says, that he had begun to attract public notice by his learning and talents, so early as in the year 1520. He became preceptor of Antoine, son of Lazare de Bayf; and attended the latter in an embassy to Germany, in 1540. Charles Stephens himself travelled much, particularly in Italy. At Venice he formed an intimacy with the celebrated Paul Manutius. He was a great admirer of the remains of ancient art, and took a singular pleasure in antiquarian researches. He afterwards turned his thoughts and studies to medical science, which he professed at Paris with reputation. In this quality of a physician, he is honourably mentioned by Buchanan,\* in his elegy on the gout.

On subjects connected with the medical profession, he produced several considerable works. The celebrated naturalist, Pierre Belon, received great assistance from him in his work on Water Fowls, which was printed by Charles Stephens himself, in 1553. It was not until 1551 that he began the business of printing. He is represented as an avaricious man, jealous of his brethren and even of his nephews, whom he endeavoured to injure on every occasion. He was, however, unsuccessful in business, and was imprisoned for debt in the Chatelet, and died there in 1564. Maittaire says that the fine editions of Charles Stephens have never been surpassed; that in point of erudition and an author, he evinced himself not inferior to the other eminent members of his family, or of the most learned printers of his time, and that in his short space, few of them printed more books. On account of his great personal merit and learning, he was also decorated with the title of Typographus Regius; and with that designation his impressions are distinguished from 1551 to 1561. Besides the works connected with his profession

as a physician and naturalist, Charles Stephens composed several of a miscellaneous description, and others for the promotion of critical and grammatical studies, and the advancement of general learning.

1564. WILLIAM MAY gave to the stationers' company, a cup all gilt, with a cover, called a "maudelen cuppe, weighing eleven ounces," and at the same time "a sponne all gilt, with the arms of the house," the gift of Richard Jugge; and another the gift of Mr. Ireland.

1564, *Sunday, August 6.* Queen Elizabeth, during her visit to Cambridge, witnessed the play of *Aulularia Plauto*, which was got up at her cost, in the body of King's college church.

During the reign of Elizabeth, there was a prevailing laxity of morals, especially with respect to the sabbath, that a strict attention to the solemnity of that day was considered as the stigma of a Puritan.\* In Hearne's manuscript *Collectanea*, there is a license from the queen, of 1571, directed to the officers of Middlesex, permitting one John Swinton Powlter, to have and use some playes and games at or upon nine severall sondayes," within the said county. And because "greate resorte of people is lyke to come thereunto," he is required, for the preservation of the peace, and for the sake of good order, to take with him four or five discreet and substantial men of those places "where the games shall be put in practice," to superintend "during the continuance of the games or playes." Some of the exhibitions are then specified, such as, "shoting with brode arrow, the lepping for men, the pytchyng of the barre," and the like; after which follows this very general clause, "with all suche other games, as have at anye time heretofore, or now be lycensed, used, or played."

1565. Printing introduced into the city of NORWICH. It appears that about this period, many strangers from the Low Countries,† came and settled in Norwich, and amongst them was Anthony de Solempne, a printer, and who was so well approved of, that the freedom of the city was presented to him. Strype, in his *Life of archbishop Grindal*,‡ under the year 1568, states, that "Corranus of late had caused a table, entitled, *De Operibus Dei*, wrote by him in French, to be printed in Norwich." In the library of

\* George Buchanan was born in Dumbartonshire, in Scotland, in 1506, educated first at St. Andrew's, and then at Paris, where he embraced the doctrines of the reformation. James V. employed him as a tutor to his natural son, the Earl of Moray; and at the same king's command he attacked the Franciscans in a satirical poem, for which his life being threatened, he fled to England, and thence to France, where he wrote four tragedies in Latin. He next went to Portugal, and became a teacher of philosophy in the university of Coimbra, but expressing some free opinions, he was confined in a monastery, in which he translated David's Psalms into Latin. In 1551 he obtained his liberty, and after residing some time in France and England, returned to his native country, where he was appointed principal of the college of St. Leonard's, in St. Andrew's. This favour he obtained from queen Mary, which he ill requited, by writing a book called *A Detection of her Doings*, designed to prejudice the minds of her subjects against her. He was nominated tutor to James VI., and being afterwards reproached with making him a pedant, he replied that "it was the best he could make of him." He died at Edinburgh, February 28, 1552. Besides what is above mentioned, he wrote Latin poems, some of which are beautiful. His *History of Scotland* is also elegantly written.

\* The name of Puritan arose from the dissensions of the English refugees at Frankfort, in the reign of queen Mary. They adopted the rigid tenets of Calvin, and first appeared in England about 1566. See the *Life of Richard Cox*, D.D. in *Chalmers's Gen. Biog. Diet.* v. x. pp. 436-434. Dr. Cox died July 22, 1581, in the 82d year of his age, and was buried in Ely cathedral, of which see he had been appointed bishop by queen Elizabeth, in 1569. See also, Neal's *Hist. of the Puritans*; Brook's *Lives of the Puritans*; Scott's *Hist. of the Reformers*, &c.

† To the number of 8923 masters, workmen, and servants, and who established all sorts of woollen manufacture. The mayor and sheriffs waited on Thomas, duke of Norfolk, at his palace there, and got the freedom and liberty of the city granted to them.

‡ Edmund Grindal, archbishop of Canterbury, was born at Kensington, in Cumberland, in 1519. In 1559, he was chosen master of Pembroke Hall, Cambridge; same year, bishop of London; in 1570, to the see of York; and in 1575, to the archbishopric of Canterbury. He died at Croymdn, in Surrey, July 6, 1563. He contributed to Fox's *Acts and Monuments*.

Trinity college, Dublin, there are three early Norwich specimens, of which the following brief description is taken from Dr. Cotton's *Typographical Gazetteer* :—

The first, which is a well printed volume in 12mo, contains a Dutch metrical version of the Psalms, and is entitled, *De CL Psalmen Davids. Wi den Franchoychen Dichte in Nederlantschen overghesett door Petrum Dathenum. Mitgaders den Christelicken Catechismo, Ceremonien, en Gebeden. Tot Noorwiltz. Gheprint by Antho-nium de Solemne anno M.D.LXVIII.* The title is followed by the author's preface, dated *Frankenthal, 25 Marche, 1566*; a register both of the psalms and tunes; a short introduction relative to the musical tunes, dated *Norwich, 9 October 1568*; the text, containing both a prose and metrical version, with the notes, and a collect attached to each psalm. Then succeeds the Catechism, with other matters mentioned in the title, on a fresh set of signatures, and forty-eight numbered leaves; the whole ending with, *Ghedruet int Jaer ons Heeren 1568.*

The second is a curious Calendar, consisting of eight leaves only, printed in red and black, which bears for title, *Eenen Calendier Historiael, ewelick gheduerende. Waer in ghy vinden sult den Opganck ende onyerganck der Sonnen, in alle Maenden, met den Jaermercken van diversche Landen, steden ende ruheden.* [A wood cut of the royal arms encircled by the garter.] *Ghedruet tot Noorwiltz, ten huysse van Antyonium de Solemne, anno M.D.LXX. Godt bewaer de coninginne Elizabeth.* Among the historical notices scattered through the calendar is one of the opening of a Dutch church at Norwich, under the authority of the queen, on the 24th of December, 1565.

The third of these volumes is a Dutch version of the *New Testament*, with the annotations of Marloratus; the title of which is, *Het Nieuwe Testament, &c. in Nederduytse na der Griechen waarheyt overgeset. Met de annotation August. Marlorati, &c.* (Beneath is a very neat oval wood cut, representing a man in the act of felling a tree, while a second near him is kindling a fire for its consumption, round which is a Dutch legend, *Every tree which bringeth not forth good fruit is hewn down and cast into the fire.*) *Ghedruet int Jaer 1568.* The editor's preface, dated *29 Octobris 1568*: the text, fol. 1—436; a register of fifteen leaves, and one blank. It is observable that in this work, the printer's name or place does not appear: but when it is stated that it is printed with the same types as those of the *Psalms*, bears the same date, is of the same size, and bound up in the same volume, there cannot be the slightest doubt that this as well as the other two is the production of Anthony Solemne's press.

Another specimen of this early Norwich press bears the date of 1578, which like the former ones, adorns the Dublin college library. This also is a 12mo, in black letter, bearing for title, *Het tweede boeck vande sermoenen des wel vermaerden Predicants B. Cornelis Adriaenssen van*

*Dordrecht, Minrebroeder tot Brugge. Waer van d'inhouden begrepen staet int navolgende blad.* Beneath is a wood cut of the author in his pulpit, below which we read *Nueerstmael in Druck vuytgegeven buyten Noirdsitz. 1578.* No printer's name appears throughout the volume, which consists of 762 pages, besides prefatory matter; but from the similarity both of type and general appearance, there can be no hesitation in adjudging it to the press of Anthony Solemne.

There is, however, preserved in the Bodleian library, a curiosity, the production of this Norwich press, which, Dr. Cotton observes, is probably unique; it is a broadside, containing *Certayne versis writtene by Thomas Brooke gentleman, in the tyme of his imprysment, the daye before his deathe, who suffered at Norwich, the 30 of August, 1570.* At the end of the verses is, *Scene and allowyd accordynge to the Quenes Maiestyes Iniusction. God save the Quene. Imprynted at Norwich, in the paryshe of Saynt Andrewe, by Anthony de Solemne, 1570.* The verses were reprinted by T. Herne, in his edition of *Leland's Collectanea*. No further notice is taken of any Norwich typography until the year 1701.

1565. *Ovid's Metamorphosis* translated out of Latin into English metre, by Arthur Golding, gent. A worke very pleasaut and delectable; 4to. London, 1565. Printed by William Seres. It has the following remarkable distich.

With skill, heed, and judgment, thyss worke must be red,  
For eis too the reader it stands in small stead.

1565. WILLIAM GRIFFITH resided at the sign of the Faulcon, in Fleet-street, and kept shop in St. Dunstan's church-yard, in the west of London. He used a rebus of a Griffin sitting, holding an escutcheon with his mark, or cypher, and the flower called Sweet William in its mouth. He printed only six works, amongst which were *A detection of heresie, or why hereticks bee brent*, 8vo. and the tragedy of *Gorboduc*, 4to.

1565. HENRY SUTTON was an original member of the stationers' company. He had a shop in St. Paul's church-yard, and dwelt at the sign of the Black Boy, in Paternoster-row, and other places. During the reign of queen Mary, he printed chiefly with John Kingston, especially the Romish church books.

1565. LEONARD ASKELL, was originally the apprentice of William Powell, from whom he was turned over to Thomas Marsh, and became free on the 4th of October, 1557, though it does not appear that he ever came upon the livery. During the years 1560 and 1565, he took four apprentices, but his only work is the following. *Plague of the Pestilence.* Without date, 8vo.

1565, *Died*, ADRIAN TURNEBUS,\* one of the most celebrated scholars which France produced

\* Moeh has been said concerning the origin of his name, though perhaps with little certainty. It is written (Gallice) "Tournneuf," and "Turnebe." M. de la Monnoye, referring to various authorities, seems inclined to believe that he was a descendant of the English family of the name of Turnbull, whence the French *Tournebeuf*; and adds, that the descendants of Adrian wrote their name *Tournebu*.

in this century, and also conspicuous as a printer. He was a native of Audely, in Normandy, born in the year 1512. At nine years of age, we are told, he came to Paris; where his proficiency in the learned languages was such, that he speedily surpassed not only his fellow-students, but his preceptors themselves. Nature had bestowed upon him a sound and penetrating judgment, a wonderfully retentive memory, and other extraordinary mental powers: all which he improved to the utmost advantage by incessant and persevering application. Consequently, few scholars ever attained so high a character, or were regarded with so much deference. Many eloquent prefaces, orations, and ancient authors remain, abiding monuments of his erudition. His extraordinary exertions and powers in critical learning are particularly demonstrated by his *Commentaries* on various works of Cicero, and of several other classic authors: and still more, by his elaborate *Adversaria*, a treasure of criticism which De Thou pronounced worthy of immortality. They were first printed in 3 vols. fol. *Parisii*: tom. I. 1564. tom. II. 1565. tom. III. 1573. Iterum, *ibidem*, (entire) 1580, fol. 1583, fol. Basileæ, 1581, Argent. 1599, Aurel. 1604, fol.

Pasquier declares, on testimony which he deems satisfactory, that many of the German professors of his day, when in their public lectures they cited the authority of Turnebus and Cujas, touched their hats ("mettoient la main au bonnet") in token of respect, and honour of their memory. De Thou in his own life relates, that having in his youth been once only in the presence of Turnebus, the image of that celebrated man became so strongly impressed upon his mind, that it often recurred to him, even when asleep, and could never be effaced. Montaigne has also borne particular testimony to his unequalled erudition, in which, he assures us, no mixture of pedantry could be discerned. He speaks with great admiration of his polite and unaffected manners, his lively apprehension, solidity of judgment, and promptness of reply; adding that he had often purposely thrown out queries or observations of an uncommon kind, with a view to elicit his remarks; and that he considered him as one of those more fortunate children of nature,

quels arte benigna,  
Et meliore luto finxit præcordia Titan.  
*Essais*, lib. I. chap. 24.

Adrian Turnebus for a time occupied a professor's chair at Thoulouse. After the death of Tusanus he became Greek professor at Paris; whither the fame of his learning and eloquence attracted numerous hearers from all parts. Henry Stephens enjoyed the advantage of his lectures. We are told that heat length exchanged the Greek chair for that of philosophy.

Maittaire cites an observation of M. de Marolles: that three of the most learned men in existence professed humanity at the same time, in the college Le Moine, at Paris: Turnebus, who presided over the first class; Buchanan, over the second; and Muret, over the third.

His earnest desire for the promotion of learning, induced him, as we have seen, to accept for a time the appointment of "Typographus Regius:" in which office he engaged William Morel as his associate; and after the space of about four years, resigned wholly to him this honourable distinction and occupation. The Greek impressions of Turnebus, which though not numerous, they are of singular beauty, and held by the curious in high estimation. Large paper copies of the *Æschylus* are particularly valued.

Turnebus died at the age of fifty-three years. Some writers assert strenuously that he entertained the reformed opinions. Maittaire has cited his epitaph, as a specimen of his Latin poetry, and various testimonies of the learned in praise of his works, and "Elogia," in honour of his memory. Passeratius contributed the following:

Non que Nile pater, superba cernis  
Altis marmora nubibus minari,  
Sculptum aut Phidiaca manus sepulchrum:  
Turnebi placet oasibusque et umbræ  
Mæsarum tumulus politus arte.

1565, Dec. 13. Died, Conrad Gesner, an eminent physician and naturalist, whose fame was circulated over Europe, and he maintained a correspondence with learned men of all countries. The emperor Charles V. made him a present of plate and jewels, which are noticed in his will as efficacious encouragements to learning. When he thought his end was approaching, he chose to be led at midnight out of his bed room into his book room, and placed in the chair at his writing table; where, laying his elbow on a folio, he said, he would await his end; Death should find him at his darling occupation, and in this attitude he soon after expired. He was born at Zurich, in Switzerland, in the year 1513, which was also the place of his death.

1566, June 29. JOHN AUDELEY or AWDELEY, who dwelt in Little Britain-street, without Aldersgate-street, printed the following ordinances decreed by the court of Star-chamber, high commission court, for the reformation of divers disorders in printing and uttering of books.

I. "That no person should print, or cause to be printed, or bring, or procure to be brought into the realm printed, any book against the force and meaning of any ordinance, prohibition, and commandment, contained or to be contained, in any the statutes or laws of this realm, or in any injunctions, letters, patents, or ordinances, past or set forth, or to be past or set forth, by the queen's grant, commission, or authority.

II. "That whoever shall offend against the said ordinances, should forfeit all such books and copies; and from thenceforth should never use, or exercise, or take benefit by any using or exercising, the feat of printing; and to sustain three months' imprisonment without bail or mainprize.

III. "That no person should sell, or put to sale, bind, stitch, or sew, any such books or copies; upon pain to forfeit all such books and copies, and for every book 20s.

IV. "That all books so forfeited should be brought into stationers' hall, and there one moiety of the money forfeited to be reserved to the queen's use, and the other moiety to be delivered to him, or them, that should first seize the books, or make complaint thereof to the warden of the said company; and all the books so to be forfeited, to be destroyed or made waste paper.

V. "That it should be lawful for the wardens of the company for the time being, or any two of the said company, thereto deputed by the said wardens, as well in any ports, or other suspected places, to open and view all packs, dryfats, maunds, and other things, wherein books or paper shall be contained, brought into this realm, and make search in all workhouses, shops, warehouses, and other places of printers, booksellers, and such as bring books into the realm to be sold, or where they have reasonable cause of suspicion. And all books to be found against the said ordinances, to seize and carry to the hall, to the uses abovesaid; and to bring the persons offending before the queen's commissioners in causes ecclesiastical.

VI. "Every stationer, printer, bookseller, or merchant, using any trade of book-printing, binding, selling, or bringing into the realm, should before the commissioners, or before any other persons thereto to be assigned by the queen's privy-council, enter into several recognizances of reasonable sums of money to her majesty, with sureties, or without, as to the commissioners shall be thought expedient, that he should truly observe all the said ordinances, well and truly yield and pay all such forfeitures, and in no point be resisting, but in all things aiding to the said wardens, and their deputies, for the true execution of the premises." And this was thus subscribed: "Upon the consideration before expressed, and upon the motion of the commissioners, we of the privy-council have agreed this to be observed, and kept, upon the pains therein contained.—At the Star-chamber, the 29 June, anno 1566, and the eighth year of the queen's majesties reign.

"N. Bacon, C. S.	E. Rogers,
E. Clynton,	W. Cecyl,
Ambr. Cave,	R. Leicester,
Winchester,	F. Knollys."

To which the commissioners for ecclesiastical causes also underwrit. "We underwrit think these ordinances meet and necessary to be decreed, and observed:

"Matthue Cantuar,	Tho. Yale,
Edm. London,	Rob. Weston,
Ambr. Cave,	T. Huycke."
David Lewis,	

1566. An Irish *Liturgy* is said to have been printed for the use of the Highlanders of Scotland; but where it was executed, or in what character, are now equally unknown.—Ware.

1566. ALEXANDER LACY, dwelt in Little Britain, where he printed the *poor man's benevolence*

to afflicted church, 29 Jan. 12mo. A copy of verses, on one side of a sheet, containing six stanzas of fourteen lines each, by W. Birch; entitled, *complaint of a sinner, vexed with paine, desiring the joye, that ever shall remain*. Printed for Richard Applow, dwelling in Paternoster-row, hard by the Castle tavern.

1566. DAVID MOPTID and JOHN MATHER, seem to have been partners together, and dwelt in Red-cross-street, adjoining to St. Giles church, without Cripplegate. Ames records only one book by these printers.

1566. RICHARD SERLL dwelt at the sign of the Half Eagle and Key, in Fleet-lane, where he printed a new almanack and prognostication servynge for the year of Christ our Lorde M<sup>o</sup>XLVI, diligently calculated for the longitude of London, and pole artticle of the same, by William Cunningham, doctour in phisicke. Printed for W. Jhones. 12mo. *A brief and pithie summe of the christian faith, &c.* From the French of Theodore Beza, by Fyll, and dedicated to lord Hastings, earl of Huntingdon, with a short preface and table, written by Serll.

1566. *The History of the Church of England*, Compiled by venerable Bede, Englishman. Translated out of Latin into English by Thomas Stapleton, student in Divinity. Imprinted at Antwerpe, by John Laet, at the sign of the rape. With privilege. 4to. This John Laet, or Latus, for he spelled his name both ways, appears to have been much employed in printing English catholic works at Antwerp.

1566. There is in the British Museum a French bible, printed at Lyons in this year, which was once the property of queen Elizabeth, and by the date 1567, on the binding, appears to have been purposely executed for her. The book is seventeen inches long, and near eleven wide. The edges are gilt upon red, with minute dotted scroll work added. It has been rebound, but the whole, or greater part of the ornament on the sides, ingeniously cut out, and fixed to those of the new cover. The original binding was in calf, and the outline of the design strongly impressed, worked with gold, and coloured with white, scarlet, purple, and green, something like the illuminated bindings of the present day. The general outline is of a most elaborate nature, scrolls and ornamental detail being worked in a uniform manner round an oval in the centre, and terminating in elegant corners, &c. The oval in the front, which measures three inches long, contains a miniature portrait of Elizabeth, with a sceptre, but now much defaced. Round it, on the garter, is impressed in gilt letters

ELIZABETH. DEI. GRATIA. ANG. FRANCE. ET.  
HIB. REGINA.

The other side is equally ornamented, but having in the centre the royal arms, and inscribed round.

POSVI. DEVM. ADIVTOREM. MEVM.

One of the compartments, under the portrait of the queen, is filled up with the design of a cherub, worked in gold.

1566. An ordinance was decreed for the reformation of divers disorders in printing, and uttering of books. Printed on a sheet by Henry Denham, at the sign of the Sun, in Paternoster-row.

1566. *The Byble in Englyshe, of the largest and greatest volume, that is to saye, the contentes of all the Holy Scripture, booth of the Oulde and Newe Testament, according to the translation apoynted by the Queenes Majesties Injunctions, to be read in all churches within her Majesties Realme. At Rouen, of the coste and chargis of Richard Carmarden, 1566.* Folio. This is called the ROUEN BIBLE, from its being printed at that place.

1567. From a letter of the high commissioners to queen Elizabeth, concerning superstitious books belonging to All Soul's college, Oxford, some light is derived relative to the materials used for the covers of books during this period. They are described as—"A *Psalter* covered with skin; a *pricksong* book, covered with a hart's skin; five other of paper bound in parchment; and the founder's *Mass* book in parchment, bound in boards."—Nichol's *Progresses*, &c.

1567. ANTHONY KYTSON dwelt, or kept a shop in St. Paul's church-yard, at the sign of the Sun. Ames says that he had seen but few books printed by him, one of which seemed very old, and has this title. *A little book whych he hat to name, Why came ye not to court? compyled by mayster Skelton, poet laureate; and another called, Clout compiled by master Skelton, poete laureate.*

He put up a monument for his wife in the north aisle of St. Faith's, on which were these lines:

Here lyeth the bodie taken from lyfe  
Of Margaret, Anthony Kytson's wyf;  
Whose vertues every where were such,  
As his great want bewayleth much.  
Ten fair babes she brought to byis,  
And of th' eleventh now departed she ys.  
She ys gone before, he is yet behinde,  
And hopes in heaven his wyfe to fynde:  
Whose lookes on earth, for his degree,  
He never lookes alive to see.

Obit xxi November, 1567.

The last mention of Kytson is in the year 1573, when William Williamson printed an almanack for him, and Legat at Cambridge in the same year.

1567, Aug. 27. Died, WILLIAM RASTELL, who was, according to Ames, the son of John Rastell, the printer, *vide* page 262, *ante*, and Elizabeth, the sister of Sir Thomas More. He was born, and entered into the rudiments of grammar, in the city of London; and about 1525, at the age of seventeen, he was sent to Oxford, where he studied logic and philosophy, and which he left without taking a degree, for Lincoln's Inn. He there made a considerable progress in the knowledge of the English law, and in 1546, he became the summer or autumn reader of that house; but on the changes in the religion of England, he left the country with his ingenious and learned wife, Winifred, daughter of John Clement, Esq. and retired to the university of Louvain, in the duchy of Brabant.

He did not return until queen Mary ascended the throne, but on October the 16th, 1554, he was made a serjeant at law; on the 8th of July, 1555-56, a commissioner for a severe way of proceeding against heretics; and a short time before the queen's death, one of the justices in the court of common pleas. When Elizabeth came to the crown, and Protestantism again became the established religion of England, although she renewed his patent as a justice of the queen's bench, on November the 18th, 1559, Rastell once more returned to Louvain, and died there. As William Rastell was certainly a literary man, there are several works attributed to him, of which, however it is doubtful whether he were the author. There is ascribed to him a life of his maternal grandfather, Sir Thomas More, but it is without any extant authority. Herbert imagined that William Rastell did not print much beyond the year 1534, when Protestantism was spreading rapidly throughout England, and his zeal for Popery was well known; but it is perhaps more probable, that on his being advanced into the high law offices which he afterwards occupied, that he resigned his occupation of printing. It is not requisite to suppose that there were two families named Rastell, to reconcile the opposite employments of the judge and the printer, since an instance has been already mentioned in the cause of John Butler, *vide* page 229, *ante*, of a person in whom the duties of both were united. Fifteen works bear his imprint.

1567. Mr. Bacon gave to the stationers' company "a bowle parcell gylt." In the same year, Mr. Jugges and Mr. Daye gave each "a spoone all gylt."\*

1567. WILLIAM POWELL was an original member of the stationers' company, and had license to print as follows: Feb. 6, 1559-60, the *boke of fortune*, in folio. Nov. 30, 1561, *Raynolde the Foxe*. Oct. 27, 1564, *A cronical table*. 1565, *Ludlowes prayers*. 1566, *A petyous Lamentation of the miserable estate of the church of christe*. A warning for wydows that aged be, how lusty yonge yough and age can agree. Herbert's manuscript memoranda state, that Powell was fined for printing *Nostradamus's Prognostication*, the copy of John Waley. His residence

\* Such bowls and spoons were at that period the usual gift of the master and wardens; and were subscribed either with their names, their arms, or a posy; and so continued till 1581, when it was agreed that every master, on quitting his office, should give a piece of plate, weighing 14 ounces at least; and every upper or under warden, on election, to give a piece of plate of at least three ounces. In 1604, Mr. East was excused from serving offices, on giving a piece of plate weighing 31 ounces. In 1605, a silver salt, with a cover gilt, weighing 11 ounces, was presented by Mr. Dawson and Mr. Harris; and a silver salt, with a cover gilt, by Mr. Edward Bishop. In 1607, two gilt bowls were given by Mr. White and Mr. Leake, late wardens. In 1617, three silver cups were given by Mr. Mann, Mr. Adams, and Mr. Matthew Lane, late master and wardens, weighing 26 ounces wanting 12 grains. —Nichols's *Lit. Anec.* vol. iii. p. 589.

Shakespeare, referring to these cups, makes the hostess say to sir John Falstaff, "Thou didst swear to me upon a parcel-gilt goblet, sitting in my Dolphin chamber, at the round table, by a sea coal fire, and upon Wednesday in Wheatsun week," &c. —*Henry IV.* part II. act 2, scene 1.

was the sign of the George next to St. Dunstan's church, in the house formerly occupied by Rich. Pinson, Rob. Redman, and William Middleton. Richard Watkins and Thomas Cadwell were his apprentices. Twenty-four works bear his imprint.

1567. William Lambe, cloth-worker, gave to the stationers' company an annuity of £6 13s. 4d. for the perpetual relief of the poor in the parish of St. Faith, under Paul's. Out of the annuity, the company undertook to pay 6s. 8d. for a sermon at St. Faith's, on the 6th of May, and also to give weekly to twelve poor men or women of that parish, one penny in money, and one penny in bread; leaving to the company £1 2s. 8d. towards a dinner. The sermon is still preached, agreeably to the will of Mr. Lambe, on the 6th of May, when the twelve pensioners are regularly required to attend. Mr. Lambe died between the 1st of April and the beginning of June, 1580, and was buried in the church of St. Faith; and near his grave a brass plate on a pillar was thus inscribed:

As I was, so are ye;  
As I am, you shall be;  
That I had, that I gave;  
That I gave, that I have;  
Thus I end all my cost;  
That I left, that I lost.

William Lambe, so sometime was my name,  
Whiles alive dyd run my mortal race,  
Serving a prince of most immortal fame  
Henry the Eight, who, of his princely grace,  
In his chappell allowed me a place.  
By whose favour, from gentleman to esquire  
I was preferred, with worship for my hire.  
With wives three I joynd wedlock band,  
Which (all alive) true lovers were to me,  
Joane, Alice, and Joane; for so they came to hand,  
What needeth praise, regarding thy degree,  
In wisely truth none steidfast more could be,  
Who though in earth Death's force did once dis sever,  
Heaven yet, I trust, shall joyn us altogether.  
O Lambes of God, which sinne didst take away;  
And as a lambe was offered up for sinne,  
Where I (poor Lambe) went from thy flock astray,  
Yet thou, good Lord, wofulsafte thy Lambe to winne  
Home to thy folde, and hoide thy Lambe therein;  
That at the day, when Lambes and Goates shall sever,  
Of thy choise lambes, Lambe may be one for ever.

Under which remembrance two lines are added, containing both a petition, and an injunction of duty to the poor, who weekly receive their allowance at the hands or appointment of the company of stationers; the which Mr. Lambe, bearing great affection, and having also a reasonable assurance in them, made them his disposers and stewards in that behalf.

I pray yon all that receive bread and pence,  
To say the Lord's Prayer before ye go hence.

1567. The first Saxon types that were cut in England was by John Daye, under the patronage of archbishop Parker, for his editions of *Alexius Menecensis, Ælfric's Easter Homily*, and the *Saxon Gospels*. Mr. Asple prefers the shape of these early Saxon types to any which have since been cast.

1568. Mr. ARTHUR PEPPWELL, son of Henry Pepwell, noticed at page 270, ante, gave £100 for the use of the poor of the stationers' company.

1567-8, Jan. 14, Robert Lekprevik was empowered, by writ of privy seal, to print exclusively, the "buiques callit *Donatus pro Pueris, Rudimentis of Pelissio*, togedder with the gramer to be set furth callit the general gramer to be usid within scolis of this realme for eruditoun of the youth." Such were the popular school-books at that epoch in Scotland.

In the records of the town council of the city of Edinburgh, under the date of Jan. 10, 1519, occurs the following notice: "The quhilk day, the provost, baillies, and counsall, statuts and ordains for reasonable cause moving thaim that na maner of neighbour nor indweller w'in this burth [burgh] put their bairnis till ony pticulare scule\* within this toun but to the principal grammer scule of the samyn to be teichit in ony science bot alawerlie grace buke, prymar, and plane donat, under the panc of X sh: to be tane of ilk ny'bo' [neighbour] thet breke, or dois in the contrair heirol." The *Prymar*, and the *Plane Donat*, were the grammars, it appears, which were first used in the greater schools of Scotland, as they had equally been in England.

1568, May 20. *Died*, MILES COVERDALE, bishop of Exeter, a man universally esteemed for his piety, his scriptural knowledge, his diligence in preaching, and above all for his eminent services in the cause of biblical literature, by his translation of the scriptures. He was born in Yorkshire about the year 1486, and became an Augustine monk. He was an exile for the sake of religion, having embraced the principles of the reformation. Being permitted to return to England, he was made almoner to Catherine Par, the last wife of Henry VIII. During the reign of Edward VI. he was promoted to the bishopric of Exeter; but on the change of religion in queen Mary's reign, he was deprived of his see, and thrown into prison, out of which he was released at the earnest request of Christian III., king of Denmark, and as a very great favour, was permitted to depart out of the kingdom. Soon after Elizabeth's accession to the throne, he returned from his exile, but would not accept of his bishopric. The cause of his refusal was his attachment to the principles of the Puritans. Grindal, bishop of London, gave him the small living of St.

\* The *Donat*, which is mentioned in this record, was a grammar: from Donatus, a celebrated grammarian, who was the preceptor of St. Jerome, and lived at Rome, in the year of the Christian era 354. By an easy transition, the *Donat* came to signify the elements of any art.—"Then drave I me among drapers, my *Donat* to lerne," said Chaucer. Wintown, who may be considered as the contemporary of Chaucer, has the following passage, (in his *Cronykil*, b. v. c. x. l. 794.) with regard to the use of the *Donat*, in the seminaries of Scotland, during his time.

Donat than was in his state,  
And in that tyme hys libell wrate  
That now Barnys oysys to lere  
At thaire begynnynge of gramere:  
And Saynet Jerome in thal yherie  
The best was callid of his scolieris.

† In 1596, the principal master of the high school at Edinburgh, was allowed an annual salary of £1 13s. 4d. sterling. In 1709, his salary was settled at £16 13s. 4d.; such was the intermediate progress, both in the depreciation of money, and the difficulty of subsistence.

Magnus, near London Bridge; but not complying with the terms of conformity then required, he was deprived of his living, became obnoxious to government, and died in indigence. He was buried under the communion table, in the parish church of St. Bartholomew, by the exchange, as appears by the register in that church.

1568. In the course of this year, a corrected and magnificent edition of the English Bible, was printed at London, by Richard Jugge, in Paul's church-yard, large folio, on royal paper, with a beautiful English type, embellished with various cuts and maps, some of them engraved on wood, and others on copper. This celebrated edition, which has obtained the name of the *Bishops' Bible* from several bishops being employed in revising it, is said to have been undertaken by royal command. It was conducted under the auspices and active direction of Matthew Parker, archbishop of Canterbury. It is often designated by the appellation of the *Leda Bible*; for strange to say, at the commencement of the epistle to the Hebrews, the story of Leda and Jupiter is engraved on wood. This bible is further remarkable for these particulars; at the beginning is the head of queen Elizabeth; at the end of the second part is the head of the earl of Leicester; and at the end of the third part is the head of Lord Burleigh.

1568, July 6. Died, JOHN OPORINUS,\* the most eminent of the early German printers. He was born at Basil, of poor parents, January 25, 1507, and became well versed in Latin and Greek, and spoke and wrote the former with purity and fluency. He was employed by the celebrated Frobin in transcribing the works of the Greek authors. He was in partnership with Robert Winter; and though eminent in their profession, they however met with considerable losses, inasmuch as Winter died insolvent, and Oporinus was not able to support himself without the assistance of his friends, in which condition he died, at the time above stated. He had six presses constantly at work, usually employed about fifty men, and published no book which he had not concerted himself. Notwithstanding his great business, he died above 1500 livres in debt. He wrote notes in Cicero and Demosthenes. In 1569, was printed *Andree Jociaci Oratio de ortu, vita, et obitu Johannis Oporini Basileensis, typographorum Germanicæ principis. Accedit catalogus librorum ab Oporino excusorum. Argentorati, 8vo.*

1568. HENRY WYKES dwelt at the sign of the Black Elephant, in Fleet-street; this sign he put under a compartment of a man carrying a

sheep on his back, and motto *Periit et inventa est*, about it; as was done for Ralph Newberry. Ten works bear his imprint from 1565 to 1568.

1568. At page 286, ante, it was shewn that an act was passed on the 19th of March, 1543, during the government of the regent Arran, for making it lawful to read the *scriptures in the vulgar tongue*, notwithstanding the protest of the bishop of Glasgow, who was then chancellor of Scotland. There is reason to believe, that this act was restricted to "the having of the *New Testament* in the vulgar tongue." Yet at this epoch they had not the *scriptures* in Scotland: and the zeal of the regent induced him to apply to sir Ralph Sadler, the English ambassador, "to write into England for some bibles in English." Whatever may have been the progress of the reformation in Scotland, during the infancy of Mary Stuart, more than thirty years elapsed, before any bible was printed within her kingdom. In this year Thomas Bassandyn, printed at Edinburgh, a *Palme Buik*, in the end whereof was found ane *lewd song*, called, *Welcome Fortunes*. This buik gave great offence to the general assembly, which met at Edinburgh in the same year; and they ordered the printer to call in *those buiks*: but there is good reason to believe, that the *lewd song* at the end of this book, did not give such offence, as what appeared at the beginning of it, "The fall of the Romain's kirk, naming our King and Sovereigne supream head of the primitive Kirk." The printer was not deterred, however, from printing a *Palme Buik*, of a different kind. See 1575, post.

1569. *The Traveled Pygrim, bringing Neues from all Parts of the World, such like scarce herd of before, scene and allowed according to the order appointed.* By Stephen Bateman. This writer is introduced by Ritson in his collection of English poets, but Beloe knew of no other copy than the above, which is in the British museum.

1569. Mr. Dibdin had in his possession a book which was bound in this year, on one side of it the full-length portrait of Martin Luther, and on the reverse a similar one of John Calvin. These portraits are described in the *Bibliomania*, as being executed with great spirit and accuracy, and surrounded with ornamental borders of much taste and richness.

1569. ABRAHAM USQUE, sometimes erroneously called Oskt, or USKI, a learned Jew, and celebrated printer at Ferrara, in Italy, where he printed many works, not only in Hebrew, but also in Spanish and Portuguese, was descended of a reputable Jewish family, who fled from Portugal to Ferrara, during the severe persecutions which raged against the Jews in that kingdom. He was educated in the principles of the Talmud by his parents. The time of this learned printer's death is not known.

SOLOMON USQUE was of the same family as the above; he was the editor of a Spanish translation of Petrach's *Sonnets*, the biblical tragedy of *Esther*, and other works. He went to Constantinople, where he established a printing office,

\* Oporinus, a Greek word, signifies Autumn.

† The royal exchange was founded June 7, 1566, by sir Thomas Gresham, an eminent merchant of London, on the model of, and as a substitute for, the mart of Antwerp, then the centre of commerce. It was endowed by deed the royal exchange, May 31, 1574. Sir Thomas Gresham died Nov. 31, 1579, aged 60. His crest was a grasshopper.— Besides building the exchange at his own expense, he founded a college in London for lectures in divinity, law, physic, astronomy, geography, music, and rhetoric; and endowed many public charities. The Gresham lectures are read in a room over the royal Exchange.

and printed the book of *Ruth* in Hebrew, with the commentary of R. Solomon Alkabetz, 1561, 4to. No further account is known of him.

1560, Sept. 5. *Died*, EDMUND BONNER, an English prelate, was a peasant's son in Worcestershire, and educated at Oxford. He afterwards entered into the service of Wolsey, who bestowed upon him several benefices. Henry VIII. to whom he was chaplain, sent him to Rome to get the sentence of divorce from Catherine of Arragon confirmed, and his behaviour was so bold, that the pope threatened to throw him into a caldron of boiling lead. In 1538 he was nominated bishop of Hereford, being then ambassador at Paris; but before his consecration he was translated to London. In the reign of Edward VI. he scrupled to take the oath of supremacy, for which he was sent to prison, but on making his submission obtained his discharge. His negligence, however, in complying with the laws, occasioned him a second imprisonment, and the loss of his bishopric. On the accession of Mary he was restored to his episcopal function, and through the whole of her reign, showed a most sanguinary spirit, by bringing numbers of protestants to the stake.

When persecuting zeal made royal sport  
With royal innocence in Mary's court,  
Then Bonner, blythe as shepherd at a wake,  
Enjoy'd the show, and danced about the stake.

When queen Elizabeth came to the throne, he was sent to the marshalsea prison, where he died. His body was interred in St. George's church-yard, Southwark. Bonner was a man of furious disposition, but well versed in the common law.\*

1570, May 5. HUGH MORRIS, a journeyman to John Alde, who resided at the long shop adjoining to St. Mildred's church in the Poultry, died of the plague, in a room called the *stocks*, as appears by the register book of that parish.

1570. *Epitaphs, epigrams, songs, and sonets, with a discourse of the friendly affections of Tymetes to Pyndara his ladie. Newly corrected, with additions, and set out by George Turbervile, gentleman. Printed by Henry Denham, at the sign of the Star, in Pater noster row.*

1571. The printers of Paris were authorised to wear swords by a royal ordinance of king Charles IX.

\* In 1569, John Alde printed the following work, in 12mo. "A commemoration or dirge of bastarde Edmonde Boner, alias Savage, usurped bishoppe of London. Compiled by Lemcke Avale. *Episcopatum eius accipiet alter*, 1569. Imprinted by P. O. 12mo. John Alde. *Very cutting: part of it is thus*: Here after do follow a linnal pedigree of Boners kindred, by the minde and judgment of many doct. a man of a great house, long before the captivite of Babilon. Bastarde Edmonde Savage, beyng a great lobbberly scholar, was supposed to be the sone of one Boner, which was the son of a juggler, or wild roge, which was the son of a villaine lagrosse, which was the son of a cutpurse, which was the son of Tom of Bedlam, &c.—Antichrist the son of the Devil, of iniquitie, and perdition, the cause of all ignorance, infidelitie, simonie, treason, idoltrie, persecution, rebellion, wicked assemblie, and finally, everlasting damnation. Then. A prayer to the holy Trinitie against ignorance of Goddes worde and wolves."

1571. In this year a printing press, with a fount of *Irish types*, was provided at the expense of queen Elizabeth, and sent over to Dublin, under the care of John Kerney\* and Nicholas Walsh,† and the first book printed in Ireland in that character, was a catechism written by John Kerney, and printed about this time, "A copy of this rare and curious little volume is in the Bodleian library."—*Cotton*.

1571. About this time, HENRY STEPHENS the Second, published the second impression of his *Thesaurus Græcus*, upon which occasion several epigrams were composed; the following one by Theodore Beza, makes special allusion to those two kindred works, by which Robert and Henry Stephens were respectively distinguished.

#### THESAURUS GRÆCÆ ET LATINÆ.

The Ausonian Muses, shelterless before,  
With ROBERT found a refuge kind of yore.  
Lo! HENRY now the pious act renew,  
And entertains each wandering Grecian muse.  
They for a race by benefact'or edac'd,  
An everlasting edifice have rear'd.  
Enjoy then STRAPHANE! the boon they give,  
In fame's imperishable records live!  
Ye Muses too of Greece and Latium, join  
Your praise with theirs—your home with theirs combine;  
And you, the Muses' votaries, court their smile  
Henceforth, in that united domicile.

1571. The art of printing was introduced into the town of STIRLING, or Strivling, by Robert Lekprevik, whom we have already noticed as a printer, at Edinburgh: while resident at that place he printed several works, and from thence removed to St. Andrews; and from thence returned to Edinburgh.

1572, June 1. *Ovid's Elegies*, in three parts, was burnt at stationers' hall, by an order from the archbishop of Canterbury, and the bishop of London.

\* John Kerney was treasurer of St. Patrick's church, Dublin, and was educated at Cambridge. He died about 1600, and was buried in St. Patrick's.

† Nicholas Walsh, chancellor of St. Patrick's, Dublin, was first bishop of Waterford and Lismore, and in 1577, was translated to Ossory. He was stabbed with a skene, or short sword, in his house, at Dublin, by a man named James Dullard, whom the bishop had cited for adultery, December 14, 1555. He was buried in the cathedral of Kilkenny. Dullard was afterwards executed for the crime.

‡ The Muses are certain fabulous deities among the pagans, supposed to preside over the arts and sciences; for this reason it is usual for the poets, at the beginning of a poem, to invoke these goddesses to their aid. Sir Isaac Newton tells us that the singing women of Osiris were celebrated in Thrace by the name of the muses; and that the daughters of Pieros, a Thracian, imitating them, were celebrated by the same name. It has been asserted by some ancient writers, that at first they were only three in number; but Homer, Hesiod, and other profound mythologists, admit of nine. In his *Hymn to Apollo*, Homer says,

—“By turns the nice delight to sing.”

The following passage, translated from Callimachus, expresses the attribute of the muses in as many lines:—

“Callio the deeds of heroes sings;  
Great Clio sweeps to history the strings;  
Euterpe teaches mimics their silent show;  
Melpomene presides o'er scenes of woe;  
Terpsichore the flute's power displays,  
And Erato gives hymns the gods to praise;  
Polyhymnia's skill inspires melodious strains;  
Urania wies, the starry course explains;  
And gay Thalia's glass points out where folly reigns.

1572, **RICHARD GRAFTON**. Of the memoirs of this typographer, who was one of the most eminent of his time, there is somewhat more to be recovered than there is of the greater part of the early professors of the art of printing. He was a citizen and grocer of London, was descended of a good family, and appears to have been brought up as a merchant, as were also his partners, Edward Whitchurch and John Butler. The two last mentioned persons are said to have exchanged their commercial for a typographical employment, from the circumstances already noticed at pages 266, *ante*. As Grafton was a scholar, so he was likewise an author. In 1548, he printed a magnificent edition of Edward Halle's *Chronicle*, the greater part of which, he states, he wrote himself. In 1562, was printed Grafton's *Abridgement of the Chronicles*, of which also new editions appeared in 1563, 1564, and 1572. In 1569, Grafton published his *Chronicles* at large, some parts of which were rather unfairly censured by Buchanan. Soon after the execution of Thomas Cromwell, earl of Essex, which took place on the 28th of July, 1549, Grafton was imprisoned for six weeks in the Fleet, for printing Matthew's Bible, and the Great Bible without notes; and before his release, he was bound in a penalty of £100 that he should neither sell nor imprint, nor cause to be imprinted, any more bibles until the king and clergy should agree upon a translation. He was also summoned before the council upon the charge of printing a ballad in favour of lord Cromwell, which bishop Bonner, with something of negligence, and more of ingratitude, endeavoured to aggravate; but Audley, the lord chancellor, changed the discourse, and Grafton escaped. He was also presented with Whitchurch, for an infringement of the Six Articles, but here again they were fortunate; and at various times they received royal patents for the printing of the church service books and primer, both in Latin and English.

Grafton was soon appointed printer to prince Edward, and on the 23d of April, 1546, after he became king, he had a special patent granted to him for the printing of all the statute books. Another patent, dated the 18th of December, 1548, was also granted to him and Whitchurch, by which they were authorized to take up and provide for one year, printers, compositors, &c., together with paper, ink, presses, &c., at reasonable rates and prices. Ames supposes, that the Richard Grafton, grocer, who in 1553, 1554, 1556, and 1557, sat in parliament for the city of London, was the printer; but Herbert doubts this, on the ground that he was excepted in the general pardon issued when queen Mary was crowned, in 1553. Of Grafton's sickness, death, or burial, there are not any particulars extant, nor indeed is there any notice of him after 1572, when he broke his leg in two places by a fall, which made him lame until his decease. It cannot be imagined that Grafton died in indigence, since Richard Cooke, Esq., Clarenceux King of Arms, confirmed armorial ensigns to

Richard his third son, in 1584, with the addition of a crest. This person, however, was of some eminence in the law, and was about the above period, retained as counsel for the stationers' company.

The residence of Richard Grafton was in a part of the dissolved house of the Grey Friars, which was afterwards granted by king Edward VI. for a hospital for the maintenance and education of orphans, called Christ's Hospital. Grafton's typographical labours were sixty-two different productions, and as a printer his publications are distinguished both for their utility and their beauty.

The device of Richard Grafton was a rebus or pun upon his name, a tree, with a fruit tree passing out at the centre, with the motto in Latin, "By their fruits ye shall know them."

1572. *Hyloets dictionarie, newely corrected, amended, set in order and enlarged, with many names of men, townes, beastes, foules, fishes, trees, shrubbes, herbes, fruites, instruments, &c. by which you may finde the Latin or Frenche of any Englishe worde you will. By John Higgins, late student in Oxeford.* Over the title are these lines printed.

To write, and many please, is'much,  
To please, not write, is paine:  
Then rather write, and please the good,  
Than spend thy time in vain.

Printed by Thomas Marshe, at the sign of the Prince's Arms, near St. Dunstan's church, Fleet-street.

1572. *Died, JOHN CRISPIN, or CRESPIEN, an ingenious printer of this century, and a native of Arras, in France* He was advocate to the parliament of Paris; but afterwards, forming a friendship with Beza, he embraced the reformed religion, and retired to Geneva, where he gained great reputation by his printing, and, according to Bayle, died of the plague. He is allowed to be a man of great learning, and an useful and accurate printer. Crispin was the author of a Greek Lexicon. Geneva, 1762, 4to, and reprinted in folio.

1572. Of the labour and expense incurred in the binding of books at this period, we have an illustration in the copy of archbishop Parker's *De Antiquitate Ecclesie Britannica*, in the royal library in the British museum, presented to

queen Elizabeth by the archbishop. It is a small folio of this date, covered with green velvet, and the front or first side embroidered with coloured silks and silk thread, in deep relief. It is conjectured that archbishop Parker intended the design on the sides, as a reference to her name. It represents a park inclosed by railings, having in the centre a large rose tree, and deer in various positions. The reverse of the binding has a similar design, but the interior occupied by five deer, one in the centre reposing, the other four like those described, being transposed; two snakes and various small shrubs are disposed in the space between. The back is divided into five compartments, by embroidered lines, having a red rose with buds and branches between each, except the second from the head, on which has, at some subsequent period, been placed the title on a piece of leather, thus:—

PARKERUS  
DE ANT  
EC. BRIT.  
LOND. 1572.

The bottom one bears on a small piece of leather, fixed on the embroidery—

EL.

R.

The book has been rebound in green morocco, but the sides and back as above described, placed over the morocco in a very creditable manner. It is now properly preserved in a red basil cover, and further protected by being placed in a box.

Another book of queen Elizabeth's, also in the British museum, merits particular notice from its binding. It is the *Historia Ecclesia*, printed at Louvain, in 1569, bound in green velvet, with the shield of the royal arms embroidered with coloured silks, and silver and gold thread on crimson silk, in the centre of each side. The remaining spaces are filled up with roses, foliage, &c. formed of the same materials, and some of the flowers composed of small pearls, many of which are lost. The back is similar to the last described, and bears the queen's initials. Every thing tends to show that Elizabeth was profuse in the embellishment of the bindings of her books; and this doubtless influenced many persons to present her works in a costume she would be likely to approve. Among the new year's gifts, sent her in the year 1595, was a *Bible* from Absolon, master of the Savoy, bound in cloth of gold, garnished with silver and gilt, with two plates of the royal arms.

In 1578, queen Elizabeth, on her visit to Cambridge, was presented by the vice-chancellor with "a *Neue Testament* in Greek, of Robertus Stephanus, his first printing in folio, bound in redd velvett, and lymed with gould; the armes of England sett upon eche side of the booke, vearay faire."

In the Bodleian library, at Oxford, is an Eng-

lish translation of St. Paul's Epistles, in a tambour binding, executed by the princess Elizabeth, afterwards queen, while imprisoned at Woodstock, during the reign of her sister queen Mary. The cover is of black silk, curiously embroidered with mottoes and devices. Round the extreme border of the upper side is worked

"CÆLUM PATRIÆ. SCOPUS VITÆ XPVS. CHRISTO VIVE."

In the centre a heart, and about it,

"ELEVÅ COR SURSUM ISI UBI E. C.\*

On the other side

"BEATUS QUI DIVITIIS SCRIPTURÆ LEGENS VERBA VERTIT IN OPERA."

And in the centre, round a star,

"VICIT OMNIA PERTINAX VIRTUS E. C.†

A volume of prayers bound in crimson velvet, among the royal MSS. in the British Museum, claims the same distinction as the preceding work. On each side is embroidered with silver thread a monogram, apparently composed of the letters R. H. K. N. A. and E. in high relief, with the letter H. above and below, and a rose at the four corners.

A custom of perfuming† books at this period is shown in the instructions relative to presents to the queen, sent by the lord treasurer Burghley to the vice-chancellor of the university on this occasion. He says "Present a book well bound," and charges them "to regard that the book had no savour of spike, which commonly bookbinders did seek to add, to make their books savour well."

From what has been stated, it is evident that Elizabeth was a great lover of books, and a munificent patron of all concerned in their embellishment. But she displayed her taste in this particular further than we have shown, by causing the binding to be composed entirely of silver or of gold. In the inventory of her jewels, plate, &c., made in the sixteenth year of her reign, several ornamental books are also described: amongst others, "Oone Gospell book, covered with tissue, and garnished on th' outside with the crucifix and the queenes badges of silver guilt, poiz with wodde, leaves, and all, cxij. oz." And "Oone booke of the Gospelles plated with silver, and guilt upon bourdes with the image of the crucifix ther upon, and iijj evangelists in iijj places, with two greate claspes of silver and guilt, poiz lii oz. gr. and weing with the bourdes, leaves, and binding, and the covering of red vellat, cxxj. oz." The *Golden Manuel of Prayers* formerly in the possession of queen Elizabeth, deserves to be particularly mentioned: it is bound in solid gold, and (it is said) was usually worn by her

\* Est Christus.

† Elizabethæ Captivæ, or Elizabethæ Captivæ.

‡ Edward Vere, earl of Oxford, first brought from Italy the whole mystery and craft of perfumery, and costly washes; and among other pleasant things, a perfumed jerkin, and a pair of perfumed gloves trimmed with roses, which he presented to the queen, and she had her portrait drawn with them on her hands.

hanging by a solid gold chain at her side. On one of the covers is represented the judgment of Solomon, whose sentence appears in a line round the four sides of the cover; on the other side is delineated the brazen serpent, with the wounded Israelites looking at it; the motto round the sides is the divine command given to Moses, relative to the making of this serpent. This book was the composition of queen Catherine Par and lady Tirwit. A late possessor valued this costly gem at £150.

1572. *A brief discourse of the lyfe and death of the late right high and honorable Sir William Paulet, knight, lord Saint John, earl of Wiltshire, marquis of Winchester, knight of the honorable order of the garter, one of the queenes majesties privie counsell, and lorde high treasurer of England. Which deceased the tenth of Marche, anno 1572, and was buried at Basing the 28 day of Aprill. Printed at London by Richard Jhones.* This poem was the production of Rowlande Broughton, of whom Mr. Beloe could find no account, and yet he was the author of other productions. From a specimen of this poem, the talents of Broughton were of no mean order.

I am content to bend my pee,  
In rurall ryme to paynte  
The tale that thou haste toulde to me,  
And of thy hevvy playnt;

And wyll denie in harmonie  
Contentioo for to make;  
I bet the playne songe, no whit els  
To pricke do undertake.

To set in partes the learned must,  
That art can rightly use,  
And let them decaunt who so list,  
That my good wyll refuse.

Thou toldest me of his vertuous lyfe  
A tale both long and wyse,  
And how that God preserved hym  
In many an enterprise.

How styll by friendship he dyd seeke  
His foes his freinds to make;  
And their redoubled shames came on,  
As they did brew to bake. &c. &c.

1572, April 1. Died, JOHN CAWOOD, printer, an original member of the stationers' company, and who served the office of master in 1561, 1562, and 1566. He was a bountiful benefactor, to the company, for he gave them six yards of wainscote in their council chamber; and two new glazed windows in the hall; a portrait of himself, and another of his master, John Reynes, who had instructed him in the art of printing; "a bearse clothe, of clothe of gold, ponderyd with blew velvet, and borderyd abought with blacke velvet, embroidered and steyned with blew, yellow, red green." He also gave a salt and cover, weighing six ounces and a half, double gilt, with the stationers' arms on it; another salt, without a cover, weight nine ounces; "a sponne, all gylt;" the arms of England gravyn on stone, and set in a frame at the upper end of the hall; and "a box with a patent given by Harolds to the company of stacyoners, concerninge their arms, with charges." John Cawood was descended of an ancient family in the county

of York, who were once lords of the manor of Cawood, near the city of York, although the castle had anciently been the archbishop's see. In the time of king John one of his ancestors did knight's service. In a book at the herald's office, London, are the following words: "Cawood *Typographus Regius Regina Mariae*." He had exercised the art three or four years, when Richard Grafton, was deprived of his patent by queen Mary, and it was given to Cawood. On the accession of Elizabeth, he was, jointly with Richard Jugge, appointed printer to the queen, by patent dated March 24, 1560, with the usual allowance of £6 13s. 4d. to print all statutes, &c. and for their joint concern they rented a room in stationers' hall, at xxs. per annum. Cawood resided in St. Paul's church yard, at the sign of the Holy Ghost. He was buried in St. Faith's under St. Paul's, London, with the following inscription.

John Cawood, citizen and stationer of London, printer to the most renowned queen's majesty, Elizabeth, married three wives, and had issue by Joane his first wife onely, as followeth, three sons and four daughters; John his eldest son being bachelor of law, and fellow in New College, in Oxenford, died 1570. Mary married to George Bischope, stationer; Isabell married to Thomas Woodcock, stationer. Gabriel,\* his second son, bestowed this dutiful remembrance of his deare parents, 1591, then churchwarden; Susanna married to Robert Bullock; Barbara married to Mark Norton; Edmund, third son, died 1 of April, he being of age then 58.

Thirty-nine works were imprinted by Cawood, to which he affixed the annexed monogram.

1572. *The Works of Henry Nicholas relating to the Family of Love, and other subjects, translated out of Bace-Almayne into English, 10 vols. 16mo.* The works of Henry Nicholas were, by royal proclamation, ordered to be burnt, and all persons declared punishable for having them in their possession. The tenets of the sect called the *Family of Love*, may be found in Blount. Neal's *History of the Puritans*, and Strype's *Annals*.

1572. *The Benefit of the ancient bathes of Buckstones, which cureth most greivous sicknesses, never before published, compiled by John Jones, phisition, of the King's mede, nigh Darby.* Printed by Thomas East and Henry Middleton, London. 32 leaves, 4to.

1572, May 8. In the parliament of queen Elizabeth, which assembled on this day, dame Dorothy Packington, as lady of the town of

\* Gabriel Cawood was master of the stationers' company in 1593 and 1599.

Aylesbury, in the county of Buckingham, sent by her nomination, the *trusty and well-beloved Thomas Lichfield and George Borden, to be her burgesses*, and whatever they should do in the service of the queen's highness in that present parliament, the lady thereby approved, as if she herself were present.

1572, Sept. 29, in the 14th of Elizabeth, "a license was granted to Thomas Marshe, to print *Catonis disticha de moribus, Marci Tull. epist. familiares, Esopi fabule*, and other classic authors for 12 years; and none to print any of his copies, with privilege to enter any house, or warehouse, to search for, and seize any books printed and brought into the realm, contrary to the tenour of these our letters patent, and the same to seize to the use of us, and our heirs and successors."

1572. The royal or Spanish *Polyglott* was printed at Antwerp, by Christopher Plantin, in 1569—by authority of Philip II. king of Spain, in Hebrew, Greek, Latin, and Chaldee, under the direction of Arias Montanus, in eight vols. folio; containing, besides the whole of the Complutensian edition, a Chaldee paraphrase on part of the old testament, which cardinal Ximenes had deposited in the theological library at Complutum, having particular reasons for not publishing it. The new testament had the Syriac version, and the Latin translation of Santes Pagninus as reformed by Arias Montanus. This work was also enriched with various grammars and dictionaries of the several languages it consists of. Of this *Polyglott*, which received the approbation of pope Gregory XIII. only five hundred copies were printed, a large part of which were lost by the vessel being wrecked which was conveying them to Spain. The price of the copies, according to *Scaliger*, was forty pistoles each set.\*

1572, Nov. 24. Died, JOHN KNOX, the lustre of whose name has obscured the reputation of those who were his fellow-labourers in the cause of the reformation.† Such persons as entirely approve of the religious establishment of Scotland, which was almost wholly the result of his zeal and activity, must entertain the highest respect for his memory. He was undoubtedly a man of distinguished abilities, and had a rough and bold eloquence, which was admirably calculated to produce all its effects among the people

\* A copy of this valuable *Polyglott*, with the exception of the second volume of the "Apparatus" is in the *Collegiate*, or Cheetham's library at Manchester. A most magnificent copy, upon vellum, in the original binding, in ten volumes, but wanting the three latter volumes (now in the royal library at Paris), which contain the philological and lexicographical appendix, was brought to England in May, 1816, by Mr. Wurtz, and offered to sale at one thousand guineas.

† In the cemetery, near to the cathedral, in the city of Glasgow, is a beautiful pillar, with a statue of Knox, and on the four sides of the pedestal are inscriptions commemorating the reformation.

A sermon preached by John Knox, minister of Christ Jesus, in the publique audience of the church of Edinburgh, within the realme of Scotland, upon Sunday the 19th of August, 1565. For the which the said John Knox was inhibited preaching for a season, &c. No place, nor printer.

to whom it was addressed. In learning, he stood upon a level with some of the most celebrated of his cotemporaries; but it is impossible to speak with admiration of his spirit and temper. There was a harshness in his manners, that in this age at least, must appear exceedingly disgusting. Nevertheless, when every deduction is made from his merit, it must be acknowledged that his talents were fitted in an extraordinary degree for the execution of the business in which he was engaged. The praise of sincerity and piety cannot be denied him, while it is to be regretted that these virtues were accompanied with so narrow and bigotted a turn of mind. In the time of John Knox, the having suffered persecution did not hinder men from exercising persecution when it was in their power. In Scotland, the protestant reformation was settled by parliament in 1560, the year after its final establishment in England, where the reformation was carried on much more temperately than in Scotland. In both countries the monasteries were dispersed. In England, the wealth of the secular clergy, the bishoprics, cathedrals, and parochial churches, were left untouched. In Scotland, where it must be owned, the proportion of ecclesiastical to lay wealth had come to be much greater, the church was far more severely assailed; the sees and cathedrals in particular, were pillaged by the too powerful nobility of this small country, to an extent that ever after must have rendered it almost impossible to maintain any proper episcopal establishment in reformed Scotland. And this circumstance certainly contributed in no trivial degree to the ultimate triumph of the anti-episcopal party within her church. John Knox was the principal agent in the business, who brought with him from Geneva, where he had resided for a time, and officiated to an English congregation, a violent aversion to the episcopal form of ecclesiastical government; and he had sufficient influence to prevail upon his countrymen to adopt the plan of Calvin, in all parts of its discipline, as well as of its doctrine. Thus presbyterianism became the public religion of Scotland.

1572, Dec. 7. JOHN BARRET had a patent to print a *Dictionary, in English and Latin*.

1572, Dec. 15. FRANCIS FLOWER, a gentleman being none of the company of stationers, had privilege of printing the grammar and other things; and farmed it out to some of the company for £100, by the year, which was raised by enhancing the prices above the accustomed order. He assigned Thomas Vatroliier and others to print for him. Some of them are only said to be the assigns of Francis Flower, without naming the person.

1573, Aug. 6. Lionel Ducket, lord mayor of London, transmits to lord Burleigh an act of the common council, forbidding the venison feasts in the halls of the city, which we understand to have been offensive to her majesty. In consequence of this order, the feast of the stationers' were restrained.

1573. *A new Enterlude, no less wittie than pleasant, entitled, New Custom*, was written to vindicate and promote the reformation against *Old Custom*. The characters are allegorical, and discuss the comparative merits of the doctrine held by the two churches with more earnestness than temper:

*Light of the Gospel*—(a Minister.)

O tyme of Antechrist, and seed of the devyll!  
Borne to all wickednesse, and nused in all evil.

*Perverse Doctrine*—(an old Popish Priest.)

Nay, thou stinking heretike, art thou there in deed?  
According to thy naughtines thou must look for speed.

*New Custome*—(another Minister.)

Godde's holle woorde in no wise can be heresie,  
Though so you terme it never so falsly.

*Perverse Doctrine.*

Yee precious whoreson, art thou there too?  
I thinke you have pretended some harme men to doo.  
Helpe, Helpe, I say, let mee be gone at once,  
Else I will smite thee in the face by Godde's bones.

*New Custome.*

You must be contented a litle season to stay, [say,  
Light of the Gospel, for your profite, hath some thing to

1573. *The art of reason, rightly termed, witcraft, teaching a perfect way to argue and dispute. Made by Raphe Lever.*

The forespeache of the book, which is dedicated to Walter, earl of Essex, is as follows. To prove that the arte of reasoning may be taught in Englishe, I reason thus: first, we Englishmen have wits, as well as men of other nations have; whereby we conceyve what standeth with reason, and is well doone, and what seemeth to be so in his reign, and is not. For artes are like to oaks, which by litle and litle grow a long time, afore they come to their full bigness. That one man beginneth, another oft time furthereth and mendeth; and yet more praise to be given to the beginner, then to the furtherer or mender, if the first did find more good things, then the follower did adde. Experience teacheth, that each thing which is invented by man, hath a beginning, hath an increase, and hath also in time a full ripeness. Now, although each work is most commendable, when it is brought to its full perfection, yet, where the workmen are many, there is oftimes more praise to be given to him that doeth a good work, then to him that endeth it. For if ye consider the bookes, that are now printed, and compare them with the bookes that were printed at the first, Lord, what a diversity is there, and how much do the last exceed the

first! Yet if you will compare the first and the last printer together, and seek whether deserveth more praise and commendation, ye shall find that the first did farre exceed the last. For the last had help of manye, and the first had help of none. So that the first lighteth the candle of knowledge (as it were) and the second doth but snuff it.

1573. RICHARD WATKINS and JAMES ROBERTS had a patent for printing the sheet almanacks.

1573. *Johannis Parkhursti Ludicra sive Epigrammata Juvenilia*. 4to. Apud Johannem Dayum Typographum.

This work was the production of John Parkhurst, bishop of Norwich, who was one of the earliest epigrammatists in England. The following brief notice is taken from Beloe's *Anecdotes of Scarce Books*, who remarks that this work is so scarce that there is no copy of it in the British museum.

John Parkhurst was born at Guildford, in Surrey, and was sent, at a very early age, to Oxford. In 1529, he was a probationary fellow of Merton college. He was in due time rector of Cleve in Gloucestershire, which, on account of its great value, was usually denominated Bishops Cleve. After the death of Edward VI., actuated by conscientious motives, he left his preferment, and retired to Zurich, where he continued till the decease of queen Mary. At the accession of Elizabeth he returned to his native country, and was made bishop of Norwich.

He wrote and published the following works: *Epigrammata in mortem duorum fratrum Suffolkensium Caroli et Henrici Brandon*. \* 4to. 1552.

*Ludicra sive Epigrammata Juvenilia*.

John Shepoves *Distichs on the New Testament*.

*Epigrammata Seria*. 8vo. 1560.

Parkhurst also, at the command of queen Elizabeth, translated the Apocrypha, from the Book of Wisdom to the end. He died February 2, 1574, and was buried in the cathedral church of Norwich, where there is a monument erected, with a Latin inscription to his memory.

1673. THOMAS GUARIN a worthy printer of the city of Basil, where he printed an anonymous *Spanish* version, both of the *Old* and *New Testaments*, without the printer's name, or that of the place where printed, with the title, *La Biblia, que es, los Sacros Libros del Viejo y Nuevo Testamento, Tradladada en Espannol*. M. D. LXIX. 4to. The preface, in Latin, was addressed to the *Kings, Electors, Princes, Counts, Barons, Knights, and Magistrates of all Europe*. The printer's device on the title page represents a large tree, in which an opening in the trunk serves for a hive of bees, and a bear is seen endeavouring to reach the opening, in order to suck the honey, which distils from the hive. A hammer, supposed to have been used in forming the opening in the tree, is suspended on a branch. The whole is surrounded with flowers, and amongst them a book lying open, with the name

\* One of the earliest writers against stage plays was Stephen Gosson, who, in 1579, published the *School of Abuse, or a pleasant Insectee against Poets, Players, Jeesters, and such like Caterpillars*. Yet this Gosson dedicated his work to sir Philip Sidney, a great lover of plays, and one who has vindicated their morality in his *Defence of Poesy*. The same puritanic spirit soon reached the university; for when Dr. Gager had a play performed at Christ church, Dr. Reynolds, of Queen's college, terrified at the Satanic novelty, published the *Overthrow of Stage Plays*, 1599; a tedious invective of texts, with quotations and authorities; for that was the age when authority was stronger than opinion, and the slightest could awe the readers.

\* These brothers were the sons of Charles Brandon, duke of Suffolk, who died of the sweating sickness.

of ~~the~~ on it. From the bear represented in this device, some have erroneously supposed the work to have been printed at Berne, which has a bear in the city arms. The senate of Francfort conferred upon Guarin the privileges of a citizen of their city, for his present of a copy of the above bible. Nic. Antonio, in his *Bibliotheca Hispanica*, gives no account of him, but it is probable he had embraced the principles of the reformation, though some expressions in his preface, and the prefixing the rules of the index, to his version, have appearance of attachment to the church of Rome. The number of copies printed was 2600. The translator of this version was Cassiodorus, a Spaniard, born at Seville. He was engaged ten years in the translation.

1573. *Died*, REYNOLD WOLFE, king's printer, whose office was in St. Paul's church yard, at the sign of the Brazen Serpent, which emblem he used as a device; and Stow imagined that he built his dwelling "from the ground, out of the old chapel which he purchased of the king at the dissolution of the monasteries; on the same ground he had also several other tenements, and afterwards purchased several leases of the dean and chapter of St. Paul's." He followed the typographical occupation for several years with great reputation; he printed most of archbishop Cranmer's pieces, and was so employed by other eminent men; and Ames states that he was the first person who enjoyed a patent for being printer to the king in Latin, Greek, and Hebrew, by which instrument he was authorized to be his bookseller and stationer, with an annuity of 26s. 8d. during life; all other booksellers and printers being prohibited from printing or selling any of his books. During queen Mary's reign, Ames supposes that Wolfe was employed in preparing the materials which compose *Holinshed's Chronicles*; but in the first of Elizabeth he became master of the stationers' chartered company, and one of the original members. In 1572, he gave to his company, besides the usual silver bowl and spoons, "the stayoners armes staudyng in a faire compartment."

There were at this period several printers of the name of Wolfe; as GEORGE WOLFE of Baden, who printed at Paris from 1491, and 1499; NICHOLAS WOLFE at Lyons, in 1498, and 1499; NICHOLAS WOLFE a German, in 1502; and THOMAS WOLFE at Basil, in 1527. It is probable that Reynold Wolfe was related to one or more of them, and of foreign extraction. It is, however, certain that he was a learned man, a good antiquary, a great promoter of the reformation, and that he enjoyed the favour of king Henry VIII. Cromwell earl of Essex, archbishop Cranmer, and other eminent characters. John Bagford relates of Wolfe, that he knew Leland the antiquary;\* who, he adds, died

at Wolfe's house in St. Michael's parish. Stow has recorded of Wolfe, that in 1549, he paid for the removal of more than a thousand cart loads of bones of the dead from the charnel house of St. Paul's, in Finsbury Fields. He spent five-and-twenty years in collecting materials for an *Universal Cosmogony*, which, though left unarranged at his decease, formed the foundation of *Holinshed's Chronicles*.

Reynold Wolfe printed his first work in the year 1542, and sixty-two books bear his imprint. He used two devices, the larger one of which is exhibited in the above wood cut. He seems to have adopted the serpent from some foreign printer, as it was usually introduced in their devices. There appears to have been some tangible figure of this device, probably a carved sign, since in the will of his widow, the brazen serpent is a part of the goods bequeathed to her son Robert. Wolfe's other device, of which there are two sizes, consisted of an elegant cartouche German shield, on which is represented a fruit tree and two boys; one of whom is drawing down the fruit with a stick, whilst the other is taking it up off the ground. A large scroll of two folds passes between the upper branches of the tree, containing the word *Charitas*, in small Roman capitals, whence this device is called by Ames and Herbert, the *Tree of Charity*.

JOAN WOLFE was the widow of the foregoing, to whom in his will he bequeathed "the chapel house that I purchased of the king, that Luke Harrison now dwelleth in, and that house which Mrs. Cradocke dwelleth in, and all that thereto belongeth, and all my leases and all the rest of my goods, and to my children according to the custome of London." He also made her his sole executrix. She continued his typographical occupation for a considerable time, using his device of the Brazen Serpent; and her will is dated on the first of July, 1574. It consists of three leaves and a half, and in it she desires to be buried by the side of her husband in the church of St. Faith, and bequeaths all her property to her son Robert Wolfe. Three works bear her imprint from 1574 to 1580.

1573. Richard Jugge printed an edition of the *Great Bible*, in 4to, divided into verses: and in 1576, he printed another edition, 4to, with cuts.

1574. WILLIAM WILLIAMSON had a shop at the sign of the Sun, in St. Paul's church yard, where he printed ten works during the years 1571 and 1574.

1574. In this year so great a dearth prevailed in England, that wheat sold for six shillings a bushel.

1574. A manuscript office of the virgin, in the public library at Munich, bears witness to

\* John Leland, the first and last antiquary royal, in England, died in 1552. One of his contemporaries boldly affirms, that "England never saw, and he believes never would see, a man to him in all things to be compared with regard to his skill in the antiquities of Britain." Upon the whole, he may not unjustly be styled the father of English antiquities.

the custom of binding books in silver, with coloured inlaid ornaments up to this year. This library contained four splendid folio volumes, the text of the *seven penitential psalms*, which exhibit extraordinary proof of the skill of the writer, musician, painter, and bookbinder. Of each of these artists there is a portrait, the name of the binder is Caspar Ritter. The books are bound in red morocco, variegated with colours, and secured with clasps; every thing about them is square, firm and complete, and stamps Gaspar Riffer as one of the most skillful artists of the sixteenth century.—*Dibdin's Bib. Tour.*

During this century, the superiority of the bookbinders of France, over those of England or any other country, may be chiefly attributed to the steady and continued support of her kings and wealthy men; their excellence was so generally acknowledged that they were sent to most parts of Europe; in the libraries of which, many of their works still remain to prove the judgment of their employers and the skill of the workmen. Of these early French artists, Gascon, Desseuil, Pasdeloup, and Derome, occupy the first rank.

Gascon is considered to have been the workman who bound the greater part of the libraries of Henry II. already mentioned at page 326 *ante*. Desseuil equally excelled in the fineness of his binding, and the elegance of his finishing. Pasdeloup and Derome were contemporaries, and fully bore out the reputation of their predecessors. The estimation the bindings of the above artists are held in, is fully shown by the prices given for many works of small value, for their being coated by them. Of the latter, may be cited the notice upon Goutard, wherein the editor explains himself thus, "the books described in this catalogue are in part bound by the celebrated Derome, the *phantom of binders*."

1574, April 6. Died, PAUL MANUTIUS, the third son of the elder Aldus, born at Venice, in 1512, was in no respect inferior to his father in learning and typographic skill. We have already noticed, (page 218, *ante*.) that upon the death of Andrea d'Asola, his two sons, Francesco and Frederico, were in partnership with Paul Manutius. Their works are dated in *adibus heredam Aldi Manutii Romani et Andrea Asolani Soceri*. The direction was confided to Paul Manutius. The productions of this firm were very numerous till 1536, when misunderstandings arose which terminated in a dissolution of partnership in 1540, from which time Paul Manutius conducted the printing alone for himself and his brothers. The works executed after 1540, are usually subscribed *Apud Aldi Filium, or Apud Paulum Manutium Aldi Filium*. The reputation and skill thus acquired, gained for him, in 1556, the direction of the printing office of the Venetian academy, and in 1562 he was invited to Rome, to direct the printing office of the Vatican.—During his residence at Rome, the presses he had left at Venice were not inactive; though his two brothers, Manutio and Antonio, by no means cordially co-operated with his labours, and caused him much anxiety, especially Antonio. Having

been a second time banished from Venice, Antonio erected, by Paul's assistance, a printing office at Bologna, with the Aldine device, whence a few works issued in the years 1556 and 1557. Paul Manutius died at Rome, leaving one son, Aldus the Younger, who died in 1597, and a daughter, who was married. Notwithstanding the variety and extent of his typographical concerns, Paul Manutius found leisure to compose numerous works, particularly valuable commentaries on Cicero, and four treatises on Roman antiquities; all of which are distinguished by the purity and elegance of their style; and so studious was he of Ciceronian elegance, that (as Scioppius is said by Morhoff to report) he sometimes spent whole months in revising and finishing a single letter.

1574, May 10. Queen Elizabeth issues on this day her royal theatrical licence under seal, for the performance of stage plays.\*

So late as this year the Chester Mysteries continued to be performed. The old English Mysteries and Moralities, the first produce of our national dramatic genius, were long destitute of any division either into scenes or acts. In Parfre's Mystery entitled *Candlemas Day, or the Killing of the Children of Israel*, written in 1512,† there are neither scenes, acts, or even stage directions. The Morality of *Hycke Scorne*, printed in the reign of Henry VIII. is, in like manner, without either stage directions, or any division into acts or scenes. In the Morality of *Lusty Juventus*, published in the reign of Edward VI. there are stage directions, but still no mention of acts or scenes. The earliest of the Moralities which assume the regular dramatic shape are not more ancient than the

\* As this is the first establishment of a regular company of players in England, we will, therefore, introduce the license entire: "Elizabeth, by the grace of God, queen of England, &c. To all justices, mayors, sheriffs, bailiffs, head constables, under constables, and all other our officers and ministers, greeting. Know ye, that we of our especial grace, certain knowledge, and mere motion, have licensed and authorized, and by these presents do license and authorize our loving subjects, James Burbage, John Perkyne, John Lankum, William Johnson, and Robert Wilson, servants to our trusty and well-beloved cousin and councillor, the Earl of Leicester, to use, exercise, and occupy the art and faculty of playing comedies, tragedies, Interludes, stage-plays, and such other like as they have already used and studied, or hereafter shall use and study, as well for the recreation of our loving subjects, as for our solace and pleasure, when we shall think good to see them; as also to use and occupy all such instruments as they already practised, or hereafter shall practice, for and during our pleasure; and the said comedies, tragedies, Interludes, and stage-plays, together with their music, to show, publish, exercise, and occupy to their best commodity, during all the term aforesaid, as well within the liberties and freedoms of any our cities, towns, boroughs, &c. whatsoever, as without the same, throughout our realm of England. Willing and commanding you, and every of you, as ye tender our pleasure, to permit and suffer them herein without any lets, hindrance, or molestation, during the time aforesaid, any act, statute, or proclamation, or commandment, heretofore made, or hereafter to be made, notwithstanding; provided that the said comedies, tragedies, Interludes, and stage-plays be, by the Master of our Revels for the time being, before seen and allowed; and that the same be not published or shown in the time of common prayer, or in the time of great and common plague in our said city of London."

† First printed in Hawkins's *Origin of the English Drama*.

beginning of the reign of Elizabeth. Moralities continued to be both printed and acted in the reign of James I. and they are enumerated under the name of *Morals* in the licence granted to the company of which Shakspeare was a member in 1603. Several of our early tragedies and comedies, down to an era subsequent to this, were without any division into scenes or acts; even so late as 1623, in the comedy of the *Wily Beguiled*, there are neither one or the other.\*

1574, May 30. Died, Charles IX. of France,† not having fully attained the age of twenty-four. Notwithstanding the ferocity of his disposition, he is said to have possessed good abilities, and to have been favourably inclined towards the fine arts and literature. To the cultivation of such a taste he had been diligently incited by his preceptor Amyot, the admired translator of Plutarch; whom he constituted bishop of Auxerre, and his grand almoner. Poetry is said to have been the study which he peculiarly favoured. He gave some indications of a personal proficiency in that art; and distinguished D'Aurat, Ronsard, and Jean Antoine de Baif, by special remunerations. It was, however, a jocular remark of this monarch, that if poets were placed in circumstances of complete independence, they would cease to labour; like spirited horses, there-

fore, they ought to be well fed, but not to be pampered. French writers consider some of their wisest laws to have been enacted in this reign; the merit of which is mainly attributed to the celebrated chancellor de l'Hospital; to whose invention also, is ascribed a royal device then adopted; with which Frederick Morel, and other considerable printers of a subsequent period, occasionally decorated their impressions: "Two columns, with these words, PIETATE et JUSTITIA." What a device, it has been said, for the author of the massacre of St. Bartholomew.\*

1575, Jan. 22. Queen Elizabeth granted a patent to Thomas Tallis† and William Birde; for the printing of music, for twenty-one years, of which the following is a copy:

"Elizabeth by the grace of God, queene of Englande, Fraunce, and Ireland, defender of the faith, &c. to all printers, bookesellers, and other officers, ministers, and subjects, greeting. Know ye, that we for the especiall effectiō, and good will, that we haue and bare to the science of musick, and for the advancement thereof, by our letters patents, dated the xxii of January, in the xvii yere of our raigne, have granted full privilege and licence unto our wellbelovēd servants, Thomas Tallis, and William Birde, gent. of our chappell, and to the ouerliuer of them, and to the assignes of them, and of the suruiuer of them, for xxi yeares next ensuing, to imprint any, and so many, as they will, of set songe, or songes in partes, either in English, Latine, French, Italian, or ether tongues, that may serve for musick, either in church or chamber, or otherwise to be either plaid, or soonge. And that they may rule, and cause to be ruled, by impression, any paper to serue for printing or pricking of any songe or songes, and may sell and vtter any printed bookes, or papers of any songe, or songes, or any bookes, or quieres of such ruled paper imprinted. Also we straightly by the same forbid all printers, booksellers, sub-

\* In the Greek drama there were no acts; although in some modern editions, such as Burton's *Penthesilea*, we find Greek plays thus divided. For an exact copy of the form of a Greek drama, the English reader is referred to the *Saxpsons Agonistes* of Milton. In that play there is no division into acts; nor is there any such division in Buchanan's two Latin tragedies, entitled *Jephthas* and *Baculus*, which are also professedly composed upon the Greek model. On the Roman stage there was no chorus, and the play was divided into acts, as our own. By modern dramatists, however, the practice of dividing a play into acts has generally been taken advantage of to extend the time of the story greatly beyond the space to which it was necessary to confine it on the Greek stage. Dr. Johnson has observed, in modern plays, "The time required by the fable elapses, for the most part, between the acts, for so much of the action as is represented, the real and poetical duration is the same."—*Preface to Shakspeare*. In Shakspeare's play of the *Winter's Tale*, Perdita, who was a new-born infant at the end of the third act, is grown up a young woman at the beginning of the fourth. In this instance, indeed, the dramatist introduces Time to explain and apologize for the license he had taken.

Slide

O'er sixteen years, and leave the growth untried  
Of that wide gap.

Time is here said to appear "as Chorus;" and in the beginning of *Henry V.* Chorus is also brought forward to request the audience to allow their thoughts in the course of the representation to pass from one place to another—

Jumping o'er times,

Turning the accomplishment of many years  
Into an hour-glass.

Neither of these personages, however, perform exactly the office of the ancient chorus. Shakspeare rarely interrupts the action for any considerable space, except during the interval between two acts; but here he does not hesitate to pass over any length of time he may find convenient.

† In 1566, the crown of France devolved on Charles IX., who being then a mere boy, the executive power was shared between the queen mother, Catherine de Medicis, and the two brothers of the house of Guise. The great cause of national division, in his reign, lay in the state of religious feelings. The protestants were too independent to be reduced to servile acquiescence, and the catholics were too conscious of a superior strength to tolerate the idea of admitting them to a state of equality.

\* The 24th of August, 1573, was signalized by the massacre of St. Bartholomew, in Paris, an event no less remarkable for its almost unparalleled atrocity, than for that extraordinary secrecy with which it had long been premeditated, and deliberately matured. The signal was given by the midnight tocsin; and the slaughter commenced with the veteran admiral Coligny, who was stabbed by La Besme, a servant of the duke of Guise. Sir Philip Sidney, and sir Walter Raleigh, who were then in Paris, are supposed to have escaped under the protection of Walsingham, the English ambassador in that city. The total number of the victims, at the minimum, is computed at 70,000. Pope Gregory thanked God for this public break-fast of twelve days. The English court went into mourning.

The fanatical part of the Catholics formed themselves into a body, under the name of "The League," which proved during many years the scourge of their country. The members of this association were extremely numerous, including princes, noblemen, generals, prelates, in short, all who were actuated by the blind superstition of the age. The main support of the League was the bigoted Philip II. of Spain; and its executive head, Henry, duke of Guise. De Thou has detailed the history of this horrid massacre; and the same scene is painted in glowing, though in faithful colours, by Voltaire, in the *Henriade*.

† Died at Greenwich, November 23, 1585.

‡ Was a pupil of Tallis's, organist of Lincoln cathedral, and in 1589, succeeded Parsons in the royal chapel. The grace *Non Nobis Domini* was composed by Bird, and first sung on November 5, 1607, on the second anniversary of the gunpowder plot. He died July 4, 1623.—See 1607, post.

jects, and strangers, other then as is aforesaid, to do any the premisses, or to bring, or cause to be brought, of any forren realmes into any our dominions, any songe, or songes, made and printed in any forren cuntrye, to sell, or put to sale uppon paine of our displeasure; and the offender in any of the premisses, for every time to forfeit to us, our heires, and successors, fortie shillings, and to the said Thomas Tallis, and William Birde, or to their assignes, and to the assignees of the suruiuer of them, all, and euery the said bookes, papers, songe, or songes. We have also by the same willed and commaunded our printers, maisters, and wardens of the misterie of stationers, to assist the said Thomas Tallis, and William Birde, and their assignees, for the dew execting of the premisses."

1575, March 7. The general assembly constituted at Edinburgh, enacted, that "no comedies, nor tragedies, or such plays, shall be made on any history of canonical scriptures, nor on the sabbath day. If any minister be the writer of such a play, he shall be deprived of his ministry. As for plays of another kind, they also shall be examined before they be pronounced publicly." In 1576, the assembly refused its permission to the baillie of Dunfermline, to represent on *Sunday afternoon*, a certain play which was not founded on the canonical part of scriptures. And in 1577, it was ordered by the assembly, "that the plays of Robin Hood, king of May, and such others on the *Sabbath day*, be discharged." Two years afterwards, it was resolved, that "such individuals as after due admonition persisted in frequenting May-plays, should not be admitted to the communion of the church, without yielding satisfaction for the specified offence."

1575. Thomas Bassendyne published the *CL. Psalms of David, in English metre. With the forme of prayers, and ministrations of the Sacraments, used in the church of Scotland. Whereunto, beydes that was in the former bookes, are also added sundrie other prayers, with a new exact kalender, for xvi yeres next to come. Printed at Edinburgh, by Thomas Bassendyne, dwelling at the Nether Bow, 1575, cum privilegio.*

1575. *A godly sermon, no less fruitfull than famous, made in the yeare of our Lord God, 1338, and found out, being hyd in a wall, which sermon is here set forth by the old copy, without adding or diminishing, save the old and rude English here and there amended.* London: printed by John Audeley, in Little Britain-street without Aldersgate-street.

1575. *A right pithy, pleasant, and merie comedie, intituled Gammer Gurton's Needle. Played on the stage not long ago, in Christ's college, in Cambridge. Made by Mr. S.\* master of arts, London: printed by Thomas Colwell, Fleet-street. 4to.*

\* John Still, afterwards bishop of Bath and Wells. This is a piece of low rustic humour, the whole jest turning upon the loss and recovery of the needle with which Gammer Gurton was mending a certain piece of attire belonging to her spouse. A copy was sold by Mr. Evans, in London, January, 1836, for £6 10s.

1575. *The Mariners boke, containing godly and necessary orders and prayers, to be observed in every ship, both for the mariners, and all other whatsoever they be that shall trauaile on the sea, for their voyage. By Thomas Mors. Printed by Henry Bynnenman, dwelling at the sign of the Mermaid, in Knight Rider's-street, London.\**

A very rare dramatic piece, which is known to be unique, and which has particularly attracted the attention of collectors, is first noticed in the books of the stationers' company, where, of July 26, 1576, John Hunter enters, *A new and pleasant Comedie or Plaie, after the manner of Common Condycions.* The original entry of it is perhaps earlier than any register at stationers' hall now remaining. See the *Prolegomena* to Reed's *Shakspeare*, 1785.

Only a mutilated copy† is known to exist of this great literary curiosity, which contains the following

#### SONG BY MARINERS.

Lustely, lustely, lustely let us sail forth,  
The winde trim doth serve us, it blows at the North

All things we have ready, and nothing we want  
To furnishe our ship that rideth hereby,  
Vitals and weapons, ther be nothing skant,  
Like worthe mariners ourselves we will trie.  
Lustely, lustely, &c.

Her flagges be newe trimmed set faunting alofte,  
Our ship, for swift swimming, oh she doeth excell,  
Wee feare no enemies wee have escaped them oft,  
Of all ships that swimmeth, she heareth the bell.  
Lustely, lustely, &c.

And here is a maister excellith in skill,  
And our maisters mate he is not to seeke,  
And here is a boteswaine will doe his good will,  
And here is a ship boye wee never had to leake.  
Lustely, lustely, &c.

If fortune then falle not, and our next voiage prove,  
Wee will returne merly and make good cheare,  
And holde al together as freends linkt in love,  
The cannes shall be filled with wine, ale, and beere.  
Lustely, lustely, &c.

1575. Some certain persons endeavoured to obtain from the queen a privilege for the sole printing of all ballads, dmask paper, and books in prose or metre, from the quantity of one sheet of paper to four and twenty. The company of stationers made a petition to the lord treasurer, for the stay of this; setting forth, that it would be the overthrow of a multitude of families, and cited the various privileges which had already been granted by the queen. Another grievance which the company stated, was, that their number in the city amounted to one hundred and

\* The first printed work relative to nautical affairs was executed at Barcelona, in the year 1502.

The common and statute law of sea matters, handed down by tradition, and by the Rhodian code from the ancients, was gradually modified into that system of regulations known by the name of *Il Consolato del Mare*, which received the papal sanction in the year 1075: was re-enacted in most sea ports of the Mediterranean, but not at Marseilles until 1162. It has been translated into most European languages. The Dutch version of 1704, is the best. It was one of the maritime laws of Richard I. that the homicide should be tied to the dead body and cast into the sea. Richard reigned from July, 1189, to April, 1199.

† Purchased at the sale of Dr. Wright's books, 1787, for £5 5s. And the duke of Roxburgh gave £6 10s. for this rare tract at the sale of Mr. Steevens's books.

seventy-five : and of these one hundred and forty came to their freedom since the queen's access to the crown. So much did printing and learning come into request under the reformation.

1575. THOMAS COLWELL succeeded Robert Wyer in business ; he kept the sign of St. John the Evangelist, in St. Martin's parish, near Charing Cross ; and the same sign in Fleet-street, near the conduit ; and continued in business from 1558 to 1575. In 1570, he printed the *End and confession of John Felton, the rank traitor, who set up the traitorous bull on the bishop of London's gate.*\* 4to. In 1575, *A ballad against marriage, by William Elderton, ballad maker.* 12mo. This is the *myrrour, or glass of health.* In 1574, he printed a book with wooden cuts of the shapes of the *quarter of wheat, farthyng wastell, farthyng symnell, farthyng whyte lofe, a halfpenny whyte lofe, a halfpenny wheten lofe, a penny wheten lofe, and a halfpenny householde lofe.*

1575. WILLIAM HOSKINS resided in Fleet-street, at the Temple Gate. He also printed with John Danter. Hoskins printed two works.

1575, May 17. Died, MATTHEW PARKER, the patron and director of the *Bishops' Bible*, and the second protestant archbishop of Canterbury. He was born at Norwich, August 6, 1504, and educated at Corpus Christi, or Benet's College, Cambridge, where he became a fellow in 1527. In 1533, archbishop Cranmer granted him a licence to preach through the provinces, as the king did a patent for the same throughout the kingdom ; and in the same year he was made chaplain to queen Anne Boleyn. In July 1535, he was preferred by the queen to the deanery of the college of Stoke Clare, in Suffolk. On the death of the queen, in 1537, he was appointed chaplain to Henry VIII. In 1544, he was chosen master of Corpus Christi college, by the recommendation of the king, and in the following year vice-chancellor of the university. In 1547, he married Margaret, daughter of Robert Harlstone, gent., of Mattishall, in Norfolk, to whom he had been attached for about seven years, but had been prevented from marrying by a statute of king Henry VIII., which made the marriage of the clergy felony.† In 1552, Edward VI. presented him to the canonry and prebend of Lavingham, in the church of Lincoln, where he was soon after elected dean. During queen Mary's reign, he was stripped of all his ecclesiastical honours, and obliged to seek safety in privacy. One cause was that he refused to separate from his virtuous and excellent wife. During his seclusion, he applied himself in biblical and antiquarian studies, and in particular versified the *Psalter*, which was afterwards printed by Day, the archbishop's printer, in 4to., but in what year is uncertain.

This rare book is divided into three *quinguenes*, or parts, of fifty psalms each, with the argument of each psalm in metre, placed before it, and a suitable collect, full of devotion and piety, at the end. Some copies of verses, and transcripts from the fathers and others, on the use of the psalms, are prefixed to it, with a table dividing them into *Propheticis, Eruditoris, Consolatoris*, &c.; and at the end are added eight several tunes, with alphabetical tables to the whole. He thus characterizes

#### THE NATURE OF THE EYGT TUNES.

The first is meke devout to see,  
The second sad, in malesty :  
The third doth rage, and roughly brayth,  
The fourth doth fawne, and flattery playth.  
The fifth deligth, and laugheth the more,  
The sixth bewyleth, it wepeth full sore.  
The seventh treadeth stoutly in stoward race,  
The eyght goeth mildly in modest pace.

The following versification of part of the 23rd Psalm, may serve as a specimen of the whole version :

To feede my neede, he will me leade  
To pastures greene and fat ;  
He forth brought me : in libertie,  
To waters delicate.

My soule and hart : he did conuert,  
To me he shewth the path :  
Of right wisnes : in holiness,  
His name soch vertue hath.

Yea though I go : through death his wo,  
His vale and shadow wyde :  
I fear no dart : with me thou art,  
With rod and staffe to guide.

Thou shalt proryde : a table wyde,  
For me against theyr spite :  
With oyle my head : thou hast bespred,  
My cup is fully dight.

On the death of queen Mary, 1558, he was presented to the see of Canterbury, an honour which he neither solicited nor desired, but to which he was entitled by his talents and his virtues. He was consecrated December 17, 1559, in Lambeth chapel. Of his erudition and zeal for the promotion of learning, there is but one opinion ; and all parties are agreed in granting him the meed of praise, of being a diligent and laborious antiquary, and the liberal friend of literature in general. The following tribute to the memory of this virtuous and learned character is from the pen of Gibbon, whose splendid talents were never subservient to episcopal flattery :—"Far different from such reformers was the learned and pious Matthew Parker, the first protestant archbishop of Canterbury in the reign of queen Elizabeth. His apostolical virtues were not incompatible with his love of learning, and while he exercised the arduous office, not of governing, but of founding the church of England, he strenuously applied himself to the study of the Saxon tongue, and of English antiquities." The revision and republication of the bible was a favourite object with the archbishop. To the university of Cambridge, and particularly to Corpus Christi and Benet's colleges, he was a munificent benefactor, founding at his own expense many fellowships and scholarships ; and

\* John Felton was hanged, drawn, and quartered, for the above crime, before the bishop of London's palace gate, August 8, 1570.

† The chief publication of the archbishop, as a theological writer, was a *Defence of Priest's Marriage*, printed by John Day, in 1569.

for the convenience and benefit of the scholars, allotted them chambers in the college, and procured certain books for them, which were ordered to be chained in the chambers. The greater part of his books and manuscripts he bequeathed to the university, forming a collection, which Fuller says was the *Sun of English Antiquity*, before it was eclipsed by that of sir Robert Cotton.

Stephen Bateman, in a work entitled the *Doom*, informs us, that by his grace's commission, he "gathered within four years, of divinity, astronomy, history, physic, and others of sundry arts and sciences, six thousand seven hundred books." By the queen's permission, the archbishop, or his deputies, were allowed to peruse all the records of the suppressed religious houses.

The archbishop was also the founder of the first *Society of Antiquaries*, over which he presided during his life, and in this office was succeeded by archbishop Whitgift. The domestic habits and personal appearance of archbishop Parker, were simple and grave. After a long and active life, he died in his 71st year, and was buried in his own chapel, at Lambeth; but during the usurpation, his bones were taken up, and thrown into a dunghill, from whence they were removed in archbishop Sancroft's time, and replaced in the midst of the area of the chapel. The following epitaph upon archbishop Parker, which was affixed to a libel against him, is highly creditable to him, when considered as written by an adversary :\*

MATTHEW PARKER, lived sober and wise  
Learned by studie, and continual practice,  
Louinge, true, off life encontriold  
The court did foster him, both young and old  
Orderly he delt, the ryght he did defend,  
He lyved unto God, to God he mad ende.

Lord Orford says, "so congenial an art as engraving, when once discovered, could not fail to spread in an age of literature. That accomplished prelate, archbishop Parker, who thought that whatever tended to enlighten and cultivate the human mind, was within his province, seems to have been the most conspicuous patron of the arts of engraving and printing in the reign of Elizabeth. He employed in his palace, at Lambeth, engravers, wood cutters, drawers, limners, and other artists. Of these engravers, Regimius Hogenberg, was the chief, who twice engraved the archbishop's head, which, if *Vertue* be right, was the first portrait printed in England from an engraving in copper:"† another of his engravers was named Lyne; and amongst them was an artist named Lyle, an excellent penman, who could counterfeit any antique writing, and was usually employed by the archbishop in making old books complete, by transcriptions from others.

He was also the particular friend and patron

of the famous printer, John Day, whose success and patronage excited the envy of the rest of his fraternity, who adopted illiberal methods to prevent the sale of his books, so that at one time he had two or three thousand pounds worth on hand, a great sum in those days.

With respect to the learned prelates of the established church during the reign of Elizabeth, archbishop Parker must be placed at the head of his contemporaries; though there is one circumstance that reflects honour on the queen and her administration, which is, that the greater number of those who were raised to the episcopal dignity, or rewarded with ecclesiastical preferments, were men whose literature was an ornament to her reign. "Indeed," says Dr. Kippis, "the exertions of learning were then so necessary and so useful, amid the conflicts of opposition, that there was a peculiar propriety in calling the first theological scholars of the age to the highest ecclesiastical stations." A brief notice of the most eminent prelates of the Elizabethan era, may not be obtrusive on the reader's patience.

John Jewel, bishop of Salisbury, has rendered his name immortal by his *Apology for the Church of England*,\* which was written in Latin; but for more general use it was translated into English, with remarkable accuracy, by lady Bacon, the second of the four learned daughters of sir Anthony Cooke.† It was also translated into Greek; and such was the esteem in which it was held, that there was a design of its being joined to the *thirty-nine articles*, and of causing it to be deposited not only in all cathedrals and collegiate churches, but also in private houses. Bishop Burnet gives the following character of the *Apology*. "As it was one of the first books published in this (queen Elizabeth's) reign, so it was written with that strength and clearness, that it, together with the *Defence* of it, is still to this day reckoned one of our best books." It is worthy of being mentioned, as an example of the literary diligence of bishop Jewel, that, when he was at the university of Oxford, he rose at four o'clock in the morning, and studied till twelve at night. With such industry, it is not surprising that he acquired a large stock of learning; and his piety and virtue were equal to his knowledge. He was born 1522, and died 1571.

Edmund Grindal, successor to Parker, in the see of Canterbury, has already been mentioned at page 340, *ante*; and it only remains to add, that he gave Elizabeth much uneasiness for the mildness of his conduct towards the puritans, whose opinions he is thought to have imbibed.

If Elizabeth was dissatisfied with the tenderness of Grindal towards the puritans, she was amply compensated by the unchristian violence of John Whitgift, the next archbishop of Canterbury, who was translated from the see of Wor-

\* From a work entitled, the life of the 79 archbishops of Canterbury, presenitive sitting; Englished, and to be added to the 69 lately sett forth in Latin. This number of seventy is so complete a number, as it is a great pity ther should be any more; but that as Augustin was the first, so Matthew might be the last. 1574. 12mo. There is a sheet folded up in the book, with the names and sees of the then set of bishops.

\* A detection of errors and lies in Mr. Jewels book called a defence of the apologic, &c. at Louvain, printed by J. Foulter. 1579.

† She was born at Giddy hall, in Essex, about 1528, and became the wife of sir Nicholas Bacon, the lord keeper, and mother of the illustrious Francis Bacon. Lady Anne Bacon died about 1603, and was buried at St. Albans.

cester, on the death of Grindal, in 1583. So far was he from excelling his predecessor in learning, that perhaps he might have been omitted in a literary history of his country, had he not made a striking figure in the theological transactions of the period. His bold and ardent spirit fully qualified him for seconding the views of her majesty against those who refused to conform to the established church. Such was his zeal in this respect, that he obtained an ecclesiastical commission with the most inquisitorial powers, and under virtue of which he contrived to lay every possible restriction on the liberty of the press. He was born in 1530, and died Feb. 28, 1604. He left no work deserving of particular notice.\*

Edwyn Sandys was one of the commissioners for revising the *Liturgy*, and had a share in the translation of the *Bishops' Bible*. He was appointed bishop of Worcester; in 1576 was translated to London, and in 1587 to York, where a wicked conspiracy was formed to fix on him the imputation of adultery, which was discovered, and the authors punished. He was born at Hawkshead, in Lancashire, in 1519, and died August 8, 1588. His sermons and letters have been printed.†

John Aylmer was born in Norfolk, about 1521, was educated at Cambridge, and afterwards tutor to lady Jane Grey. In 1553, he was made archdeacon of Stow, in Lincolnshire, and strenuously exerted himself against the catholics. During Mary's reign he retired to Zurich, in Switzerland, but returned on the accession of Elizabeth, and in 1576 was appointed to the see of London. Like Whitgift, he was more noted for his severity against the puritans than for his learning; though Strype says, that he was not only a learned, but a humble and pious bishop. The work by which he distinguished himself in the literary world was his answer to John Knox's *First Blast against the Monstrous Regiment and Empire of Women*. He died at Fulham, June 3, 1594.

Thomas Bilson, bishop of Winchester, to which he had been translated from Worcester, was of very considerable eminence among the divines of the age. He was afterwards one of the two final correctors of the present translation of the bible. He died June 18, 1616.

Gervase Babington was successively bishop of Landaff, Exeter, and Worcester, was unquestionably a man of abilities and learning. He was born in Devonshire, and educated at Trinity college, Cambridge. He died May 17, 1610, leaving some esteemed works, as *Notes on the Pentateuch*, &c. Buried at Winchester.

\* In November, 1572, a Presbytery of dissenters was first established at Wandsworth, near London; and in 1595, Whitgift, assisted by the divines of Cambridge, forms the *Lambeth Articles*.

† Sir Edwin Sandys, his second son, was born about 1561, and educated at Oxford under the learned Hooker. He then went on his travels, and the result of his observations he published under the title of *Europa Speculum*, &c. He was knighted by James I. and died 1629. He left £1500 to the university of Oxford, for the endowment of a metaphysical lecture.

Bernard Gilpin, generally called the *apostle of the North*, demands an applause to which mere literature, unaccompanied by such virtues, as he was endowed with, can never be entitled. He was possessed of learning; but his chief praise arises from having devoted his whole life to preaching, to hospitality, to the erection of schools, to the care of the poor, and providing for the destitute churches. By these means he diffused the most important knowledge, in an ignorant and comparatively uncivilized country, far more extensively than he could have done by the publication of books. He was born at Kentmire, in Westmoreland, in 1517, and educated at Queen's college, Oxford, of which he became fellow; and by reading the works of Erasmus, he secretly embraced the principles of the reformation. In 1556 he was presented by his uncle to the archdeaconry of Durham, and the rectory of Easington, where he laboured with truly apostolical zeal; and in his capacity of archdeacon made strict visitation, being a great enemy to non-residence and pluralities. He was next presented to the rectory of Houghton le Spring, where his labours were so remarkable, that Bonner gave orders for him to be arrested, and sent to London. Gilpin dressed himself for the stake, but before he reached London news arrived of the queen's death, on which he returned to his parish to the great joy of the people. Elizabeth offered him the bishopric of Carlisle, which he refused. He died universally regretted by his parishioners at Houghton le Spring, March 4, 1583.

Thomas Bentham, bishop of Lichfield and Coventry, was particularly celebrated for his knowledge of the Hebrew and Chaldee tongues. He died Feb. 19, 1597.

Alexander Nowell, dean of St. Paul's, who died Feb. 13, 1602; Laurence Humphreys, dean of Winchester; and Peter Baro, a native of France, were conspicuous for their theological attainments.

Among the writers of the puritanic party, Thomas Cartwright was the most eminent both as a scholar and a divine; he was, indeed, the head of the party, and qualified to sustain that character by his abilities, his zeal, his literature, and his writings. He was sometime lady Margaret professor at Cambridge. For his attachment to the principles he had embraced, he went through a variety of sufferings; being harassed by suspensions, deprivations, and a long imprisonment. Archbishop Whitgift pursued him with unrelenting rancour, charging him with want of learning, but Theodore Beza, who was, undoubtedly, a competent judge, said of him, that there was not a more learned man under the sun. After various labours and conflicts, Cartwright obtained a peaceful asylum, by the favour of Robert earl of Leicester, who made him governor of his hospital at Warwick, where he ended his days, in much esteem for his moderation, prudence, and piety.

Thomas Sampson, dean of Christ church, Oxford, of which he was deprived, and imprisoned

for nonconformity. Sampson is understood to have possessed a very considerable portion of the learning that was then cultivated, and next to Cartwright, the most active and determined of his party. He is said to have been born at Playford, in Suffolk, in 1517, and was educated at Oxford, though Strype says he was a fellow of Pembroke hall, Cambridge. He imbibed the principles of the reformation at an early period. In 1551, he was preferred to the rectory of All-hallows, Bread-street, London; and afterwards to the deanery of Chichester. During the reign of Mary he went to Strasburg, where he became intimate with the famous Tremillius. He next removed to Geneva, and there engaged in the translation of the *Genevan Bible*. He returned to England on the accession of Elizabeth, and was offered the bishopric of Norwich, which he refused. In September, 1560, he was made a prebendary of Durham. In 1561, he was installed dean of Christ church, Oxford. In 1562, he resigned his prebendary of Durham; and, in 1564, was deprived of the deanery, for refusing to wear the clerical habits. In 1568, he was presented to the mastership of Wigston Hospital, in Leicester,\* where he died April 9, 1589. A monument was erected to his memory, in the chapel of the hospital, by his two sons, John and Nathaniel.

David Whitehead was a profound scholar, and was also deemed an excellent professor of theology, had been chaplain to Anne Boleyn, and was intended by Crammer for a bishopric in Ireland. Elizabeth even offered him the archbishopric of Canterbury, which he not only declined, but refused to accept of any preferment in the church as it then stood. He seems to have been a quiet and moderate man, who declined to enter into the angry contests of the times, but endeavoured to do as much good as he was able by private preaching.

Many other names belonging to the puritanic party might be enumerated, and in justice to them it must be admitted that several of their leading men were eminently possessed of the learning of the times; though in point of numbers, or extent of literature, they cannot be compared with their antagonists; nor had they any pretensions to the merit of elegant composition. To the refinements of taste, and to the love of the fine arts, they appear to have been perfect strangers. The books that were printed upon the occasion, are now consigned to oblivion; for though a vast number of publications were issued on both sides, the disputants displayed a greater portion of zeal and bigotry than of candour and judgment.

John Fox, the martyrologist, was born at Boston, in Lincolnshire, in 1517, and educated at Brazenose college, Oxford, where he acquired a character for extensive learning and meekness of deportment. He was chamber-fellow with Alexander Nowell, afterwards dean of St.

Paul's, a friendship which was no doubt advantageous to both parties. In 1537, he took the degree of bachelor of arts, and shortly after entered into holy orders, and was chosen a fellow of Magdalen. In 1545 he was expelled on a charge of heresy, and shortly afterwards found an asylum in the house of sir Thomas Lucy, at Charlecote, near Stratford-upon-Avon, in Warwickshire, as a tutor to his children; and while there, married the daughter of a citizen of Coventry, and went to live with her family. He afterwards was engaged by the duchess of Richmond, as tutor to the earl of Surry's children, in whose family he resided, at Riegate, during the latter part of the reign of Henry VIII. the whole of Edward VIth's, and a part of that of Mary, when his life being in danger on account of his principles, he withdrew with his wife to the continent; first to Antwerp, then to Frankfurt, and from thence to Basil, where he became a corrector of the press to John Oporinus, the celebrated printer. At Basil he conceived the plan of his *Acts and Monuments*, which took him eleven years to complete. Fox is not, indeed, always a safe guide in the ecclesiastical antiquities of the primitive church, but we have the testimony of Burnet, Strype, and others, to his fidelity with regard to our domestic transactions. On the accession of Elizabeth he returned to England, and, through the interest of secretary Cecil, he was presented with a stall in Durham cathedral, which he did not long retain; but by the kindness of the duke of Norfolk, he obtained a prebendal stall in the cathedral of Salisbury. He refused to subscribe to the canons, and though a nonconformist, was a moderate one. In 1563 he published his *Acts and Monuments of the Church*, better known by the name of Fox's *Book of Martyrs*.\* John Fox died in London, April, 1587, and was buried in the church of St. Giles, Cripplegate,† where a white marble tablet, with a Latin inscription to his memory, erected by his son, may still be seen. The following is an extract from the original register of burials, preserved in the vestry, April, 1587. *John ffox houshoulder preacher ..... the 20th.*

1575. *The first part of Churchyard's Chippes, containing twelve severall labours, divided and published only by Thomas Churchyard, gent.*

\* The following is the original title:—*Acts and monuments of these latter and perillous dayes, touching matters of the church, wherein are comprehended and described the great persecutions, and horrible troubles, that have been wrought and practised by the Romish prelates, specialllye, in this realme of England and Scotland, from the yeare of our Lords a thousande unto the tyme nowe present. Gathered and collected according to the true copies and writings certifiicatorie, as well of the parties themselves that suffered, as also out of the bishops registers, which were the doers thereof, by John Fox. Dedicated to the queen. 741 leaves, besides preface and index. March 30. Cum privilegio. reg. majest. Folio. 1563.*

Many theological tracts were written by John Fox, but what above all others is entitled to our notice, is a Latin letter which he addressed to the queen, in behalf of two anabaptists, who were condemned to be burnt; but it is to be regretted, that his efforts in their favour were in vain.

† This church escaped the great fire of London, and contains the monuments of John Milton and John Speed, who were buried there. Oliver Cromwell was married in this church.

\* A Warning to take heed of Fowler's Psalter, (sent lately from Louvain) given by Iame Thomas Sampson. Dated at Leicester 10th Oct. 1577. Printed in 1578, 1590.

The contents are, 1. *The seige of Leeth.* 2. *A farewell to the world.* 3. *A fayned fancie of a spider and the gonote.* 4. *A dolefull discourse of a lady and a knight.* 5. *The rode into Scotland, by sir William Drury, knight.* 6. *Sir Simond Burleis tragedie.* 7. *A tragicall discourse of the unhappie mans life.* 8. *A discourse of vertue.* 9. *Churchyards dream.* 10. *A tale of a frier and a shumakers wief.* 11. *The siege of Edenborough castle.* 12. *The whole order of the receiving of the quenes majestie into Bristowe.* Printed by Thomas Marthe. 4to.

1575. *A letter, whearin part of the entertainment untoo the quenez majesty, at Killingworth castle, in Warwickshere, in this soomerz progress, 1575, is signified; from a freend, officer, attendant in court, unto his freend a citizen, and merchant of London.* At the end, *Par me, R. L., gent. mercer, merchant, adventurer, and clerk of the conncell chamber door, and also keeper of the same.* At page 44 he calls himself Laneham. His real name was Robert Laneham, and brother to John Laneham the actor.

The princely entertainment at Kenilworth castle, in Warwickshire, was given by Robert Dudley earl of Leicester, in July, 1575. It continued with unflagging invention, variety, and spirit, fourteen days. The following introductory passage, which will convey some notion of the entire pageant, is taken from the high-minded and gallant George Gascoigne: "Her majesty passing on to the first gate, there stood on the leads and battlements thereof six trumpeters hugely advanced, much exceeding the common stature of men in this age, and who had likewise huge and monstrous trumpets counterfeited, wherein they seem'd to sound; and behind them were placed certain trumpeters, who sounded indeed at her majesty's entry. And by this dumb show it was meant, that in the days and reign of king Arthur men were of that stature. So that the castle of Kenilworth would seem still to be kept by Arthur's heirs and their servants. And when her majesty entered the gate, there stood Hercules for porter, who seeming to be amazed at such a presence, upon such a sudden, proffered to stay them. But yet at last, being overcome by view of the rare beauty and princely countenance of her majesty, yielded himself and his charge, presenting the keys unto her highness."\*

1575. A map of Bristowe, engraved by George Hoefnagle. A sheet.

1575. *Ane Treatise, callit the Court of Venus, derivit into four Buikes, newlie compylit by John Roland, in Dalkeith.* Imprinted at Edinburgh by John Ros, M. D. LXXV. Cum Privilegio Regali.

1575. *The actis of king James the Sixth, with this motto, VINCET TANDEM VERITAS.* Imprintit at Edinburgh by John Ros, MDLXXV. Cum privilegio regali. Folio.

\* The reader scarce need be reminded, that Sir Walter Scott has revived the princely pastimes of Kenilworth, in his celebrated novel of that name, and caused thousands of persons to visit the still stately ruins, which was the scene of so much festivity in the olden time.

1576. Thomas Bassendyne has the honour of being the printer of the first edition of the Scriptures known to have been printed in Scotland. It comprehended the *Old Testament*, the *Apocrypha*, and the *New Testament*; and was printed at Edinburgh, by Thomas Bassendyne, M. D. LXXVI. cum privilegio, in folio. It is dedicated in the Scottish dialect to king James. The title page is embellished with the royal arms, and God save the king; notwithstanding the late reproof of the general assembly for considering the sovereign as the head of the kirk. It is, perhaps, the first edition of the Geneva version, printed in Britain, though some earlier have been sometimes mentioned; and the first bible in Roman letter.

1576. Henry Bynneman printed *Hours of Recreation, or After Dinners*, by John Sandford, gent. 12mo. The following lines are on the title.

Since we survive in death by nothing else but fame,  
I wish long life, with praise in death, may raise your  
name.

1576. JOHN SHEPARD printed John Wolton, bishop of Exeter, his *armour of prooffe*; and concerning the *immortality of the soul*.

1576. MICHAEL VASCOSAN, a very celebrated Parisian Greek printer. He was a native of Amiens. He received a liberal education, became the son-in-law of Jocodus Badius, and having been appointed a *libraire jure* of the university of Paris, commenced his typographical career about the year 1532. From 1566, to 1576, he was *Typographus Regius*. The Greek impressions of Vascosan were not many, but his Latin ones numerous. Of the beauty of his Latin characters, and the elegance and correctness of his impressions, no scholar, says Maittaire, can be ignorant. He specifies, in particular, his numerous and pleasing impressions of the different works of Cicero, printed as separate tracts in 4to, and generally illustrated with valuable commentaries. His Greek types, says Mr. Greswell, were not always of that minute description which Maittaire's account of them might lead us to suppose. He probably had overlooked those fine specimens, *Oppianus de Venatione, Græce*, 4to.; and the *Rhetorica Aristotelis, Græce*, 8vo. both of the 1549. His impression *P. Bembi rerum Venetarum historia, Lutet.* 1551, 4to, as one of those specimens by which the warmest eulogy is justified: and whilst the beauty of his fine Latin characters can scarce be excelled by modern skill, the paper used by him, and by other eminent printers of this century, will generally be found to exhibit a superiority of texture and quality, which under modern encouragement, the manufacturer would find it too expensive to imitate. The correctness also of Vascosan's press may be exemplified by his impression of Budæus *de asse & ejus partibus*, fol. in which three errors only have been recorded. In every department, Vascosan is assuredly entitled to a very distinguished place among the improvers of Parisian typography. The device most frequently used by him was a Fountain, delineated with superb and appropriate ornaments, and surrounded by

this motto: *iv βυβλίου πλε η σοφίας πηγη*. Maittaire has given other used by him occasionally; but many of the impressions of Vascosan, both Greek and Latin, are found without any device. The first Frederic Morel was Vascosan's son-in-law, and was employed by him; the second illustrious typographer of that name was his grandson. He composed his epitaph, recorded by Maittaire, *His. Typographorum Parisiensium*.

1576. The first book printed in the island of Sardinia is a Spanish work of Don Juan Coloma, which was published at Cagliari, or Caller, the capital of the island, by Vincentio Sembenino. A copy of this rare and curious volume was in the Spanish collection of D. J. A. Conde, sold in London, in 1824.—*Cotton*.

1576. The city of Evora, in Portugal, had, at this period, a large printing establishment. In the years 1553—1576, Andreas de Burgos was settled at Evora, as a printer; and was followed by Martin de Burgos and Manuel de Lyra, before the close of this century. An exceedingly rare book on China, written by Gaspar de Cruz, is noticed as having been executed here in 1570.

1577. WILLIAM SERES appears to have been a general assistant to the whole typographical profession, for he was concerned with John Day, Anthony Scoloker, Richard Kele, and William Hill; and some of Day's works are stated to have been printed purposely on his account; but their names do not occur together after the year 1550. Seres appears to have enjoyed more than one licence for the imprinting of certain books, since Strype relates that "Sir William Cecil, principal secretary of state to king Edward, procured for him, being his servant, a licence to print all manner of private prayers called *Primers*, as should be agreeable to the *Common Prayer*, established in the court of parliament; and that none else should print the same. Provided, that before the said Seres, or his assigns, did begin to print off the same, he or they should present a copy thereof, to be allowed by the lords of the privy council, or by the lord chancellor for the time being, or by the king's four ordinary chaplains, or two of them. And when the same was or should be from time to time printed, that by the said lords, and other of the said privy council, or by the lord chancellor, or with the advice of the wardens of the occupation, the reasonable price thereof by sett, as well in the leaves, as being bound in paste or board, in like manner as was expressed in the end of the book of *Common Prayer*." He farther states, that "Seres had a privilege for the printing of all *Psalters*; all manner of *Primers*, *English* and *Latin*, and all manner of *Prayer Books*; that as this privilege was taken away by queen Mary, so it was restored again by queen Elizabeth, by means of lord Cecil, with the addition of the grant to him and his son, during the life of the longest liver, and that this gave occasion to a great cause; for Seres, the father, in his latter years, not being able to follow his business, assigned his privilege, with all his presses, letters, stock in trade, and copies to one Henry Denham, for a yearly rent.

Denham took seven young men of the company of stationers to join him in the same; but certain inferior persons of the company, setting up presses, more than England might bear, did print other men's copies forbidden to them, and privileged to others by the queen's letters patents. These endeavoured for their own gain to have their privilege taken away, preferring a petition to the privy council, wherein they pretended that in justice it stood with the best policy of this realm, that the printing of all good and useful books should be at the liberty of every man to do, without granting or allowing any privilege by the prince to the contrary. And they said it was against the law, and that the queen ought not to grant any such. Seres upon this, in a petition to the lord treasurer, urged against these men, that privilege for special books was ever granted by the prince; for that for the most part in all ancient books we read these words, *Cum privilegio ad imprimendum solum*; and that many records might be found the same; whereby it appeared that the prince or magistrate, had ever care to commit the printing of all good books, especially of the best sort, to some especial men well known and tried for their fidelity, skill, and ability. Examples whereof might be shewed as well in England, as other christian countries. And that the reason hereof was, that printing of itself was most dangerous and pernicious, if it were not straitened and restrained by politic order of the prince or magistrate. This affair at last was made up by friendly agreement. The expedient was this, that those who had privileges, were to grant some allowances unto the company of stationers for the maintenance of charge and their poor. This was about 1583."

William Seres used the above monogram to the books he printed, which amounted to more than one hundred. His earliest residence is imagined to have been near the house of John Day, on Snow hill; but in 1548, when he became connected with Anthony Scoloker, he lived in Savoury Rents and in Ely Rents, without Aldergate, whence we find him, in 1539, removed to Peter college, which, from the researches of Herbert, is shewn to have been by the side of dean's court, in St. Paul's church yard. His next residence was the sign of the Hedge hog, but a short distance from the same building, since it became converted into the stationers' hall; and Seres, who was one of the most ancient members of the livery of that company, after

having served the office of warden, was elected master of it in 1570, 1571, 1575, 1576, and 1577.

1577, John Sieninius, palatine of Podolia, in Poland, erected a town which he called *Racow*, or *Rakow*, for the reception of a sect of Unitarians, and established a printing press for the dissemination of the gospel. The first person who carried on printing at this place was Alexis Rodecki, who had formerly printed at Cracow; his earliest known book is a *Polish New Testament*, dated 1577. Rodecki was succeeded by Sebastian Sternacius, under whom the press flourished exceedingly. From this press a vast multitude of books, composed chiefly by Unitarians, were issued until the year 1638, when, by a decree of the state, the society was entirely broken up, the professors and scholars were ejected, and the school and printing office, with all its materials, destroyed. Almost all the books executed at this place, are from the nature of their contents, and other circumstances, of a very high degree of rarity. The town was erected in the year 1560, and named *Racow*, the Polish word for a *crab*, from the armorial bearings of his wife. Prior to its destruction, his son James had enlarged the town, and increased the printing establishment.

1577. July 1. In the records of the weekly assembly of Perth, in Scotland, there is the following entry:—"The weekly assembly regret that certain inhabitants of this town, against the express command of the civil magistrate, and the prohibition delivered by the minister from the pulpit, have played *Corpus Christi play*, upon the sixth day of June last, which day was wont to be called *Corpus Christi day*: whereby they have offended the church of God, and dishonoured this hail (whole) town; the said play being idolatrous and superstitious." The assembly ordained that the guilty persons should receive no benefit from the church till they had showed evidence of their repentance. A similar offence occurred soon afterwards. On the 10th of December, in the same year, usually called *Sanctoberti's eve*, a very great number of persons passed through the town in disguised dresses, with piping and dancing, and striking a drum. They carried in their hands burning torches. One of the actors was clad in the devil's coat; another rode upon a horse, which went in man's shoes. It is probably the horse and its rider represented a part of the history of the saint, who seems to have been the patron saint made choice of by the bakers incorporation, as the offenders were of that trade.

1577. August 6. Queen Elizabeth grants a license to John Day, and Richard Day his son, during their lives, and that of the longest liver, to print the *Psalms of David*, in metre, &c.

1577. HENRY BAMFORD printed a *profitable treatise of the anatomy of mans body*; compiled by that excellent chirurgeon, M. Thomas Vicary, esquire, serjeant to the queen, and chief chirurgeon to St. Bartholomew's hospital, &c. 12mo.

Pocket watches were first brought into England, from Germany.

1577. *The Paradise of Daynty Devises. Conteyning sundry paltry precepts, learned counsels, and excellent inventions, right pleasant and profitable for all estates. Devised and written for the most part by M. Edwards, formerly of her Majesties Chapell: the rest by sundry learned gentlemen both of honour and worship. Imprinted at London by Henry Diale, dwelling in Paules Church Yard, at the south west door of Saint Pauls Church Yard, and are there to be sold.*

Of this book, notwithstanding its extraordinary rarity, there were no less than eight editions from 1577 to 1600. "When it is considered," says Mr. Beloe, "how very popular this work was, and through what a variety of editions the work passed, it seems astonishing that it should be so exceedingly scarce, that a perfect copy is hardly known." At the death of Henry Diale, which took place in July, 1582, the copy of this book was granted to Timothe Rider, by the court of assistants.

1577, Oct. 7. Died, George Gascoigne, an English poet, who in harmony of diction moved without a peer. The brave, the handsome, and the gay, but dissipated genius Gascoigne, wrote the first English comedy in prose; his tragedy of *Jocasta*, which was acted at Grey's Inn, in 1566, is the second theatrical piece in blank verse; he also published a poem in blank verse, entitled *Steel Glass*, 1576. His works were published in 1575, with this title, the *Poesies of George Gascoigne, Esq. corrected and augmented by the author. Tam Marti quam Mercurio. Printed at London, for Richard Smith, and are to be sold at the North West Doore of Paul's church.* The first notice concerning poetry in this country is seen at the end of Gascoigne's poems published in 1575; and again with his works in 1587, was printed *Certaine Notes of Instruction concerning the making of Verse or Ryme.* In the British museum there exists an unpublished poem by Gascoigne, entitled the *Grief of Joy, Certaine Elegies, wherein the doubtful Delights of Manes Lyfe are displayed.—Written to the queenes mooste excellent majestie. Tam Marti quam Mercurio.* 1576.

1577, Nov. 18. NICASIVS YETSWERT, was clerk of the privy seal, and secretary to queen Elizabeth for the French tongue. By virtue of a license, of this date, granted him for printing

\* The first Poetical Miscellany published in England was printed by Richard Tottell in 1557, which was followed by a second in 1558. Warton is of opinion that this Miscellany gave occasion for the *Paradise of Daynty Devises*, and *Esciope's Helicon*, published in 1560, second edition, 1614. Our poetical historian, Warton, speaks of a Miscellany printed in 1567 or 1568, entitled *New Sonnettes*, and *Pretty Pamphlettes*, &c.

The *Gorgeous Gallery of Gallant Inventions*, a poetical miscellany, succeeded the *Paradise of Daynty Devises*, and was printed in 1588, followed by a *Headfull of Pleasant Delights*, in 1594.

\* The whole woorkes of George Gascoigne, esquire, newlie compiled into one volume, that is say, his flouris, herbes, weedes, the fruit of warre, the comedy called *Suppooes*, the tragedie of *Jocasta*, the *Steel Glass*, the complaint of *Phylomine*, the story of *Ferdinandes Jernemi*, and the pleasure of *Kenilworth castle*. London. Imprinted by Abel Jeffe, dwelling in the Forestrete without Cripplegate neere unto Grubetrete, 1587. 4to.

all manner of books, concerning the common law of this realm, for thirty years, all books therefore, bearing his name, were printed for him by others. He left a son, Charles, who succeeded him.

1578. *The Bible translated according to the Hebrew and Greeke, and conferred with the best translations in divers languages. Imprinted at London, by Christopher Barker, printer to the queenes majestie, 1578. Folio.*

This is a reprint of the Genevan edition,\* and usually denominated the "BEECHES BIBLE." The Bishops' bible translates Gen. iii. 7, *aprons*.

The confounding of these editions has been productive of very dangerous errors.

\* In 1550, the whole Bible was printed at Geneva, in 4to. by Rowland Hall, with an epistle to the queen, (Elizabeth) and another to the reader; both of which were left out in subsequent editions. Of this translation, above thirty editions were printed from the year 1540, to 1616, chiefly by the queen's, and king's printers. Editions of it were likewise printed at Geneva, Edinburgh, and Amsterdam.

The translators of the *Genevan Bible* were Miles Coverdale, afterwards bishop of Exeter; Anthony Gilby, afterwards vicar of Ashby-de-la-Zouch, in Leicestershire, died about 1584, at a very great age; William Whittingham, was born in the city of Chester, in 1524, and educated at Oxford, where he became a fellow of All Souls, and afterwards a senior student of Christ Church. In 1550 he went to France, and settled at Orleans, where he married the sister of John Calvin. In 1563, he was promoted to the deanery of Durham, which he enjoyed for sixteen years. His zeal against popery was so violent, that he destroyed some of the antiquities and monuments in Durham cathedral, and took up the stone coffins of the priors of Durham, and ordered them to be used as troughs for horses to drink in. During his residence at Geneva, he translated into metre, five of the *Psalms*, of which the 119th was one, together with the *Ten Commandments*, and a *Prayer*, distinguished in the collection of Sternhold and Hopkins, by the initials of his name, W. W. He died July 16, 1579, in the 55th year of his age. Christopher Goodman was also a native of Chester, born about 1519, and educated at Oxford, where he became Margaret professor of divinity. During the reign of Mary, he retired to the continent, and settled at Geneva, where he and John Knox were chosen pastors of the English church. On the accession of Elizabeth, he went to Scotland, and was appointed minister of St. Andrew's. In 1568, he left Scotland, and came to England, and about 1569, he went to Ireland as chaplain to sir Henry Sidney. In 1571, he was cited to appear at Lambeth, before archbishop Parker, and other high commissioners, to answer for opinions contained in a work published during his exile, in which he had spoken against the government of women, but by subscribing a recantation, acknowledging that good and godly women might lawfully govern whole realms and nations,\* and avowing his submission to the queen, he was released. In 1584, he retired to his native county, probably alienated for nonconformity, for Fuller denominates him a leader of the fierce nonconformists. He died in 1602, aged 83 years; and was buried in St. Werburg's church, in the city of Chester. Thomas Cole was one of the English refugees, who settled at Geneva, during the reign of Mary. He returned when Elizabeth came to the crown, and in 1559 was collated to the archdeaconry of Essex, and rector of High Ongar, in the county of Essex. He died in 1600, at an advanced age. William Cole, brother to the preceding, was also an exile, but was afterwards made president of Corpus Christi college, Oxford, in which office he continued for about thirty years; and dean of Lincoln. John Pullain, was born in Yorkshire, in the year 1517, and educated at Oxford. He became rector of St. Peter's, Cornhill, London, in 1559, but was deprived in 1555. He withdrew to Geneva, to avoid being condemned to death. On Mary's decease he returned to his native land, but was soon imprisoned, for preaching contrary to the prohibition of queen Elizabeth. In 1559, he was presented to the rectory of Capford, in Essex; and about the latter end of the year was made archdeacon of Colchester. Brook, in his *Life of the Puritans*, calls him "a truly pious man, a constant preacher, a learned divine, a thorough puritan, and an admired English and Latin poet. He died July, 1563. Of John Knox, we have already spoken, and of John Bodleigh no account has been obtained.

"Certain questions and answers touching the doctrine of predestination, the use of God's word and sacraments," were not drawn up by our reformers, as asserted in the Bishops' bible, in the preface to which archbishop Parker maintains universal redemption.—*Beloe*.

This translation was recommended by archbishop Parker, while preparing his edition of the *Bishops' Bible*. It was frequently reprinted.

The Calvinist *Catechism* is bound up with some editions of the Geneva bible.

1578. EDWARD WEBSTER printed the second part of the *Mirror for Magistrates*, containing the *fall of the unfortunate princes of this land. From the conquest of Cæsar, unto the commynge of William the conqueror*, with this motto, "Goe straight, and fear not." 4to.

1578. MARTIN MARCHANT, a printer at Luxembourg, in the Netherlands, printed a tract on the side of Philip II. king of Spain, against the Netherlands, a copy of which is in Trinity college library, Dublin.

1578. The states of Carniola, Styria, and Carinthia, came to the resolution to have the scriptures printed in the Vandalic or vernacular tongues;\* and for that purpose ordered John Mannel, or Manlius, a printer of Laybach, to provide what was necessary for completing the impression; but the archduke Charles, of Austria, having been informed of the design, forbade Mannel to publish the bible, under severe penalties. The states did not, however, abandon their design, but deputed a certain number of divines, who assembled at Laybach, on the 24th of August, 1581, to examine and revise the trans-

\* Under this denomination are included those dialects of the Slavonian language, which are spoken in Carniola, Carinthia, Styria, Croatia, and Istria. The first version of the Vandalic scriptures was made by Primus Truber, a Lutheran minister. The design of forming it appears to have originated with John Ugnad, baron of Sonneck, of the noble family of the counts of Weissenfelswoolf. For the more successful promotion of his plans, he established a press, in 1561, at Tübingen, for the express purpose of printing works in the Cyrillican or Glagolitic, and Latin characters. He was aided in this undertaking by the munificence of Maximilian, king of Bohemia, the electors of Saxony, Brandenburg, and the Palatinate, the landgrave of Hesse, and the duke of Wurtemberg. The principal works which issued from this press, were chiefly translations of the scriptures. This printing office was comparatively of short duration, for the Austrian government seized and suppressed the books it issued. Baron Ugnad died at an advanced age, in 1565, leaving a worthy example of piety and the true use of riches. Primus Truber was the conductor of the Vandalic printing office at Tübingen. He was born at Ronterlic, in Carniola, in 1508. He received his education at Vienna, where he obtained support during his studies by soliciting alms, according to the custom of that country, and those times. In 1527, he entered the ministry, but the manner with which he supported the doctrine of Luther, subjected him to violent persecutions; and his library, valued at more than four hundred florins, to be destroyed. He invented a mode of writing the *Vandalic dialects* (which had never before been written or printed) in the Latin or Roman character: he was engaged by baron Ugnad, aided by the munificence of the duke of Wurtemberg, to undertake the institution of a Vandalic printing office at Tübingen. This labour he accomplished, and afterwards printed there his *Vandalic New Testament*, in two parts; the first containing the *Gospels and Acts of the Apostles*, in 1562, of which 2000 copies were printed; the second, comprising the *Epistles and the Revelation*, in 1563, 4to. and only 1000 copies were struck off. Truber died revered and honoured June, 29, 1596.

lation. A deputation went to Wittenberg, and entered into an engagement with Samuel Seelisch, a bookseller, for an impression of fifteen hundred copies, each to contain two hundred and eighty sheets of the largest paper, to be printed with a fine type, and ornamented with wood cuts, for which the states of Carniola were to pay after the rate of twenty florins for every bale of five hundred sheets. The expense of the whole impression was about eight thousand florins. They began to print the bible May 28, 1583, and completed it in the space of seven months. The publication of the *Vandalic Bible* was accompanied by an orthographical and grammatical work, by Adam Bohoritz, regent of the college of Laybach, to facilitate the reading the Vandalic scriptures among the neighbouring states. It was also printed at Wittenberg, 1583, in 8vo. It is only a pamphlet of about twenty leaves, but is rarely to be purchased, and sells at exceedingly high prices.

1578. Masch, in his Appendix to the *Bibliotheca sacra* of Le Long, mentions an edition of the *Book of Daniel*, in Hebrew, 1563; likewise an *Ecclerastes*, 1578, both executed at Saphet, or Safad, a small village of Palestine, situate in the pachalic of Acre. In the year 1759, Safad was almost destroyed by an earthquake, since which time its institutions have languished, and it has become a poor miserable village.

1578. *The Serin Seages, translatit out of Prois in Scottis Metre, be Johne Rolland, in Dalkeith; with ane Moralitie after everie Doctouris tale, and siclike efter the Emprice tale, togidder with ane loving and laude to everie Doctour after his awin tale, and an exclamation and outcrying when the Emprour is wife after hir fals contrivis tale. Imprintit at Edinburgh be John Ros, for Henrie Chateries. M.D.LXXVIII. Cum privilegio regali.* At the end is, *Quod Rolland, in Dalkeith.*

1578. An edition of *Æsop's Fables*, in French, was printed at Antwerp, by Philip Galle, under the following quaint title, *Esbatement Morel des Animaux.* The embellishments were executed by Peter Heyns, who addresses a copy of verses to the reader, immediately after the dedication. Who the poet was does not appear, but the verses are said by Heyns, to have been begun in London.

1578. *A moral and pitiful Comedie, entituled All for Money. Plainly representing the manners of Men and Fashion of the World nowe adaites. Compiled by T. Lupton. At London, printed by Roger Warde and Richard Mundee, dwelling at Temple Barre, anno 1578.\**

Thomas Lupton wrote only one play. It is remarkably scarce; it is in rhyme, black letter, and written in a very peculiar style. The interlocutors are figurative characters, as All for Money, Wit without Money, Money without Wit, &c. &c.

1579, Jan. 1. *A New Year's Gift, dedicated to the Pope's Holiness.*† Gregory XIII.

Books were not only sent as presents on this day, but the practice occasioned numbers of publications without their contents at all referring to the subject. Royal *New Year's Gifts* and *Presents*, were common in the time of queen Elizabeth.\*

In Beloe's *Anecdotes of Scarce Books*, there is a fragment of a poem to lord Warwick, with a running title, *A Nue Yeares Gift, to my Lorde of Warwicke.* This poem is of considerable length, and concludes with the following verses:

The learned hath a mortall foe,  
of him that knothing knoes:  
The foure is mallit by a weede,  
that for no purpose groes.

Well: where that noble nature dwells,  
and perfit honour is:  
Thear vertoe habreth in the hart,  
and rests the God of hills.

Take we in worth my nueyeares gift,  
for whichis your vertues line:  
And I maye write, I mind like verse  
to you or yours to give.

Finis q goodwill.

It is in black letter, and forms two fly leaves to Neville de *furoribus Norfolciensium Ketto duce.* In the possession of the Rev. Mr. White, of Lichfield.

1579, Feb. 13. Died, JOHN FOWLER an eminent printer at Louvain. He was born in the city of Bristol, and educated in the tenets of the Romish church, at Winchester school, whence he removed, on the foundation, to New college, Oxford, in 1555, and obtained a fellowship which he resigned in 1559, and left England for Antwerp, in which city and at Louvain, he set up a press, from whence issued, from himself and others, various controversial treatises levelled against protestantism. Wood says that John Fowler was well skilled in Greek and Latin, a tolerable poet and orator, a theologist not to be

\* In the Bodleian library, Oxford, there is a manuscript copy of a sermon, translated into Latin by the princess (Elizabeth) from the Italian by Occhini. It is written on vellum, with uncommon elegance, with her own hand, and dedicated to her brother, king Edward VI., to whom she sent it as a new year's gift. The dedication is dated Enfield, Dec. 30, but the year is not mentioned: it must have been between the years 1546 and 1552.

In 1765, bishop Littleton showed the society of Antiquaries a large parchment roll, containing a list of new-year's gifts presented to queen Elizabeth, at Greenwich, on the 1st of January, 1585, signed by the queen, and counter signed by John Astley, esq. master and treasurer of the jewels, by which it appears, that the greatest part, if not all the peers and peeresses of the realm, all the bishops, chief officers of state, and several of the queen's household servants, even down to her apothecaries, master cook, serjeant of the pastry, &c. gave new-year's gifts to her majesty, consisting either of a sum of money, or jewels, trinkets, wearing apparel, &c. Most of the peeresses gave rich gowns, petticoats, kirtles, doublets, mantles, some embroidered with pearls, garnets, &c. bracelets, caskets studded with precious stones, and other toys. The queen's physician presented her with a box of foreign sweetmeats; her apothecary with a box of fozengens, and a pot of conserves; her master cook with "a fayre marchepayne," a macaroon then in fashion; her serjeant of the pastry "a fayre pye origined," &c. On the back of this roll was a list of the gifts presented by the queen in return, the whole of which consisted of gilt plate:—"To the earl of Leicester one hundred and thirty two ounces."—"To the earl of Warwick one hundred and six ounces." &c. the sum total being four thousand eight hundred and nine ounces.

\* A copy is in the Garrick collection. Langbaine had never seen it, and John Kemble did not possess it. Mr. Beloe gives the title page at length.

† From a copy in the British museum.

contemned; and so versed in criticism and other polite literature, that he might have passed for another Robert or Henry Stephens. He died at Namur, and was buried in the church there.

JOHN BOGARD was also a printer of catholic works at Louvain, and lived at the sign of the Golden Bible. His works, like those of Fowler, were numerous distributed in England.

1579, March 11. HUMPHREY TOY was made free of the stationers' company, by his father's copy. He lived at the sign of the Helmet, in St. Paul's church yard; he printed little, but Henry Binneman printed for him. William Jones, who had been an apprentice to Mrs. Toy, was also made free of the company on the above day.

1579. ALEXANDER ABBUTHNETT was king's printer for Scotland, and resided at the kirk in the field, Edinburgh, where he printed an edition of the Bible in folio, for the use of Scotland, by the commissioners of the kirk.

1579. An ordinance of Henry III. king of France, forbade all almanack makers to prophecy, directly or indirectly, concerning the affairs of the state, or of individuals.

1579, Aug. *The Discovery of a Gaping Gulf whereinunto England is like to be swallowed by another French marriage, if the Lord forbid not the banes, by letting her maiestie see the sin & punishment thereof.... Mense Augusti. Anno 1579.*

John Stubbs, of Lincoln's Inn, the author, William Page, the publisher, and Hugh Singleton, the printer, were tried on the statute 1 and 2 of Philip and Mary, against the authors, dispersers or printers of seditious words, or rumours; in consequence whereof Stubbs and Page had their right hands cut off with a butcher's knife and a mallet, in the year 1581.\* Hugh Singleton was pardoned.

The following is the order of council addressed to the lord mayor of London, for the apprehension of the offenders who were concerned in the above work:

"To the Lord Mayor of London.

"After our right hearty commendations, Whereas there hath been of late printed and published within that city a certain libel, intituled, *A Discoveringe of the gaping gulphes*, &c. wherein the

author has not only very contemptuously intermeddled in matters of state touching her majesty's person, but also uttered certain things to the dishonour of the duke of Anjou, brother to the French king. Forasmuch as divers of the said books have been very seditiously cast abroad, and secretly dispersed into the hands of sundry of her majesty's subjects, as well the inhabitants of that city, as in other parts of this realm; with an intention, as much as in them lay, to alter the mind of her highness's good and dutiful subjects, and to draw them into a suspicion and misliking of her majesty's actions, as though the same tended to the prejudice of this realm, and subversion of the estate of true religion, (now a long time, by the goodness of Almighty God, and her highness's authority, as God's minister, established and continued among us.) Albeit her majesty hath received such an assured opinion of the loyalty of her said subjects, and specially of the inhabitants of that her city of London, that they will not so easily give credit to any such secret sinister devices tending to the impairing and defacing of her highness's good proceedings, especially in the point of religion, where she hath willed us to assure you, that she desireth no longer life than she shall be a maintainer and upholder of the same; yet forasmuch on the one part it behoveth her majesty in honour to have so notorious an injury done to so great a prince, her neighbour, who in such kind and confident sort (all respect of peril and danger laid apart) vouchsafed to do her majesty that honour to come and visit her, repaired by all the ways and means that any way can be devised: so on the other side, her highness is very desirous, that as hitherto she hath been very careful (as by her doings hath well appeared) to maintain and continue this realm, both in matters of policy and religion, in such quiet and peaceable estate as hitherto she hath done, and which never any prince did more careful before; so at this present it should be known unto her subjects what her meaning is; not by any treating or dealing with the said duke of Anjou, who, neither by himself nor his ministers, did at any time press her to do any thing to the prejudice of this state, to innovate or infringe any thing in the government which she hath both established, and hitherto by God's goodness and assistance maintained against sundry designs and complots of many enemies, of whom the Lord be thanked, there is at present no such great doubt as was heretofore to be conceived; For these and other good considerations, to the intent that her said subjects give not any credit to such untrue and vain suspicions, her highness hath at this present caused a proclamation to be made in her name, to be printed and directed thither to be published, at the publishing whereof within that city and liberties in place accustomed, her majesty's pleasure is, that you the lord mayor, accompanied with some good number of the aldermen your brethren, and the shirives now, as in like cases has been accustomed, should be present; and further, for the better confirming of the inhabitants of the said city on

\* John Stubbs was a hot-headed Puritan, whose sister was married to Thomas Cartwright, the head of that faction. This execution took place upon a scaffold, in the market-place at Westminster. After Stubbs had his right hand cut off, with his left he pulled off his hat, and cried with a loud voice, "God save the queen!" the multitude standing deeply silent, either out of horror at this new and unthought kind of punishment, or else out of commiseration of the undaunted man, whose character was unblemished. Camden, a witness to this transaction, has related it. The author, the printer, and the publisher, were condemned to this barbarous punishment, on an act of Philip and Mary, against the authors and publishers of seditious writings. Some lawyers were honest enough to assert that the sentence was erroneous, for that act was only a temporary one, and died with queen Mary; but, of these honest lawyers, one was sent to the Tower, and another was so sharply reprimanded, that he resigned his place as a Judge in the Common Pleas. Other lawyers, as the Lord Chief Justice, who favoured on the prerogative far more than than afterwards in the Stuart reigns, asserted that queen Mary was a king; and that an act made by any king, unless repealed, must always exist, because the king of England never dies.—*Curios. of Lit. vol. 2.*

her majesty's sincere meaning towards them, and the whole realm, it is also thought convenient, and so we require your lordship to call the masters, governors, and wardens of the company of the city before you, and, in her highness's name, to command them, that, appointing some day as soon as convenient may be, for the assemblies in their several halls of their companies, they do cause the said proclamation and contents of these our letters to be openly read and published, charging all and every person, upon the penalty contained in the said proclamation, to bring unto the said master, governor, and wardens, all such the said books, printed or written, as they or any of them may have. And both now, and from time to time hereafter, to signify what persons, to their knowledge, have, or may have had any of the said books; which books ye shall charge the said master, governor, and wardens to bring unto you, with the names of the parties and manner how they came by them, except in cases where any person shall willingly bring the same themselves to light, to be destroyed according to the contents of the said proclamation. And thereupon shall, with as much speed as you conveniently may, particularly certify us thereof, to the intent if any person shall be found culpable, we may take such further order as shall be thought expedient. And so, earnestly charging you that hereof there be no default, and you tender her majesty's favour, and will, upon your peril, answer the contrary, we bid you right heartily farewell. From Gydde-Hall, the 27 of September, 1579.

"Your lordship's very loving friends,

BROMLEY, CARC.  
ROB. LEYCESTER.  
CHRIS HATTON.

W. BUREHLEY.  
W. HUNDON.  
H. SYDNEY.  
FRA. WALSINGHAM."

During the reign of Elizabeth, the freedom of the press was rather circumvented, than openly attacked; she dreaded the Roman Catholics, who were at once disputing her right to the throne, and the religion of the state. Foreign publications, or "books from any parts beyond the sea," were therefore prohibited.\* Although the press had then no restrictions, an author was always at the mercy of the government. Elizabeth too had a keen scent after what she called treason, which she allowed to take in a large compass.

\* The consequence of this prohibition was, that our own men of learning were at a loss to know what arms the enemies of England and of her religion, were fabricating against us. This knowledge was absolutely necessary, as appears by a curious fact in *Strype's Life of Whitgift*. A licence for the importation of foreign books was granted to Ascanius de Reualme, an Italian merchant bookseller, with orders to collect abroad this sort of libels; but he was to deposit them with the archbishops and the privy council. A few, no doubt, were obtained, says Strype, by the curious Catholic or Protestant. This singular document was "Yoven at Lambeth, the — day of Octobre, 1585, anno regine Elizabethæ, æ. xiviii. Endorsed, Ascanius license to bring over popish bookes, granted by archbishop Whitgift, xiv." The presses employed in printing Catholic works on the continent, were established at Antwerp, Louvain, Doway, and Rheims.

She condemned the author, printer, and publisher of *The Gaping Gulph*, to have their right hands cut off, and hanged William Carter.\* It was sir Francis Bacon, or his father, who once pleasantly turned aside the keen edge of her royal vindictiveness; for when she was enquiring whether an author, whose book she had given him to examine, was not guilty of treason, he replied, "Not of treason, madam; but of robbery, if you please; for he has taken all that is worth noticing from Tacitus and Sallust." It is also related of Elizabeth, that once, when she could not be persuaded that a book, containing treasonable matter, was really written by the person whose name it bore, she said, with great indignation, that "she would have him racked, to produce his author." Lord Bacon replied, "Nay, madame, he is a doctor: never rack his person, rack his style; let him have pen, ink, and paper and help of books, and be enjoined to continue his story, and I will undertake, by collating his styles, to judge whether he were the author." With the fear of Elizabeth before his eyes, Raphael Holinshed,† left out several sheets of the second edition of his *Chronicle*, as containing passages offensive to her government, but they have since been reprinted. When Giles Fletcher,‡ after his Russian embassy, congratulated himself with having escaped with his head, and on his return wrote a book, entitled, *Of the Russe Commonwealth*, which is a very curious description of that country, and of its tyranny, Elizabeth forbade the publishing of the work.

It was in this reign, says Mr. D'Israeli, that no book was allowed to be published without the permission of the *licensers of the press*, who were instructed, for the better protection of literary property, only to give one license for the same book. This does not, however, appear to have had the desired effect, since these persons were easily tampered with by the booksellers of those days, to furnish half a dozen authorities to different persons for the same work.

1579. *Died*, Luis de Camoens, a distinguished Portuguese poet, whose genius conferred so high a honour, and whose treatment reflects so deep a disgrace on his country. He was born in the

\* See an account of him under the year 1584.

† Raphael Holinshed was a native of Cheshire. His *Chronicles* were first published in 1577, in two vols. folio, and again in 1587, in three volumes. He died in 1581.

If the reader is curious to know the hours of meals in the reign of Elizabeth, he may learn them from Holinshed. "With us the nobility, gentry, and student, do ordinarily go to dinner at eleven before noon, and to supper at five, or between five and six at afternoon. The merchants dine and sup seldom before twelve at noon, and six at night, especially in London. The husbandmen dine also as high as noon as they call it, and sup at seven or eight; but out of term, in our universities, the scholars dine at ten." Probasart mentions waiting on the duke of Lancaster at five o'clock in the afternoon, when he had supped.

‡ Giles Fletcher received his education at Eton, and King's college, Cambridge, where he took his degree of L. L. D. His work on the Russian government appeared in 1591, 8vo. and in Hacklitt's *Voyages*. Amongst the Lansdowne manuscripts, there is a petition which was presented by the Russian merchants, then in London, with the offensive passages. Giles Fletcher died in 1591, leaving two sons, Phineas and Giles, who are both known in the republic of letters.

city of Lisbon, in the year 1527, and there received that education, which enabled him to display abilities, the magnitude and lustre of which procured him the appellation of "the Virgil of his country." After completing his academical studies, he entered into the army; and, in a battle against the Moors at Centa, had the misfortune to lose an eye. He then embarked for the East Indies, urged by the hope of mending his fortunes by commerce; but his wishes were disappointed, either from his own neglect, or that commerce was adverse to his efforts; however this might be, the leisure he obtained was devoted to the Muses, and the result was, his there commencing that production, universally known and admired, under the title of the *Lusiad*. On his return from India, he had the misfortune to be shipwrecked, and the only thing he could preserve was his poem. In 1571, this great work was published, with a dedication to Sebastian, king of Portugal.\* But, as if misfortune had "marked him for her own," his hopes of royal patronage were cruelly disappointed. The monarch, either insensible to the merits of the poem, or instigated to act coldly to the poet by his enemies, received with contempt what he ought to have considered as an honour done even to a crowned head, and rewarded the writer with a neglect which left him in all the wretchedness of indigent virtue, to expire in an alms-house, and left an everlasting stain on his king and country. The following epitaph was inscribed on his grave:—

HERE LIES LUIS DE CAMOENS,  
PRINCE OF THE POETS OF HIS TIME.  
HE LIVED POOR AND MISERABLE, AND DIED  
ANNO DOMINI 1579.

The people of Macao are still proud of shewing a cave where Camoens amused himself in writing his *Lusiad*. This excellent poem has been translated into English by sir Richard Fanshawe, and Mr. Mickle.†

1579. ANDREW SCHOUTENS, a printer at Leyden, in Holland, professes to be printing in *novæ academia Lugdun in Batavia*. William, prince of Orange, founded a university at Leyden, in 1575. This city, during the seventeenth and eighteenth centuries, produced some of the most splendid and beautiful specimens of the typographic art, from the Elzevir press, and also lays claim to the first use of stereotype printing.

1579. It is related by Balbinus, in his *Bohemia Docta*, that Henry of Waldstein, lord of Dambrowitz, in Bohemia, erected printing presses both at Dobrzech and at New Buntzlau, about the middle of this century. Some of his own compositions were printed at these presses. Henry is reported to have been the principal author of the Bohemian version of the Bible, (six hand-

some volumes in small folio) printed in *ursum fratrum Bohemicorum in Graticz Marchionatus Moravia*, in the years 1579, &c. Le Long mentions a *Bohemian Bible* edited by the Calvinists, printed at Castello Kralitz, in Moravia, in 6 vols. 4to. 1579-1593. It is observed by Crantz that the Bohemian brethren, to whom this press belonged, applied it to no other purpose than that of printing the Holy Scriptures in their vernacular language.

1579, Oct. 20. The parliament held at Edinburgh, forbade "all markets and fairs to be kept on the Sabbath-day, or in any church, or churchyard; so all handy-work on the Sabbath-day, all gaming, playing, passing to taverns and aile-houses, and willfull remaining from their parish church, in time of sermon or prayers; and a pecuniall mulct layd upon the transgressours respective, to be paid for the use of the poor of the parish." It was also decreed, that "Every householder having lands or goods worth 500 pounds, should be obliged to have a *Bible*," (which at this time was printed in folio) "and a *Psalm book*, in his house, for the better instruction of themselves, and their families, in the knowledge of God."

1579. *The Schoole of Abuse, containing a pleasaunt Invecitive against Poets, Pipers, Plaiers, Jesters, and such like Caterpillers, of a Commonwealth; setting up the Flagge of Defiance to their mischievous exercise, and overthrowing their Bulwarke by profane writers. naturall reason and common experience. A Discourse as pleasaunt for Gentlemen that favour learning, as profitable for all that wyll follow vertue. By Stephan Gosson, Stud. Oxon. Printed at London, by Thomas Woodcocke. 1579.*

1580. A document found by Mr. Thomson, of the record office, Edinburgh,\* gives the following bibliopegistic information, respecting the charges of a Scotch bookbinder of this date, which may be considered rather an interesting morceau of its kind; and which throws considerable light on the sort of bindings and prices paid in Scotland at this period. Among fifty-nine different books, the following items are selected:

JOHANNES GIBSONIUS BIBLIOPEGISTÆ PRÆCEPT.  
Æ17 4s. 4d. October, 1580.

xviij lijs liij d.

The value is given in Scotch money.

On the back of this account is an order upon the treasurer, subscribed by the king, and the

\* Published by the Bannatyne club.

\* Sebastian III. was killed near Tangiers, July 29, 1578.  
† William Julius Mickle, the translator of the *Lusiad* of Camoens, was born at Langholm, in Dumfriesshire, in 1734, and died October, 1798. Mr. Mickle was also the author of the *Concubine*, a poem in the manner of Spencer, republished under the title of *Sir Marlyn*, &c. and *Almada Hill*, a poem.

abbots of Dunfermline and Cambuskenneth, as follows :—

# REX.

Thesauraire we greit yow weill IT is our will and we charge yow that ye Incontinent efter the sycht heirof ansuer our louit Johnne gipsoun buikbinder of the sowme of sevintene pundis iiij s iij d within mentionat To be thankefullie allowit to yow in your comptis keeping this our precept together with the said Johnne his acquittance thairypoun for your warrand Subscriuit with our hand at Halyrudehouse the first day of October 1580. JAMES R.

R. Dunfermline, A. Cambuskenneth.

Here we have also further Gibson's receipt.

I Johnne Gipsoun be the tennor heirof grant me to haue ressaut fra Robert coluill of eleishe in name of my lord thesaurar the sowme of sevintene pundis iiij s iij d conforme to yis compt and precept within written off ye qlk sowme I hald me weill qtent and payit and discharge him hereof for euir Be thir p'nte subscit with my hand at Edr the xv day of november 1580.

Johnnegysone wt my hand.

In the following year we find that Gibson was appointed "king's bookbinder" under the privy seal, dated Dalkeith, July 29, 1581.

"Ane letter maid to Johnne Gipsoun bukebiuder, makand him Our Sovereane Lordis Buikbinder, and gevand to him the office thairof for all the dayis of his lyfetye, &c. &c. For using and exercising quhairof his heines gevis grantis and assignis to the said Johnne yeirle the sowme of twentie pundis uisual money of this realme, to be payit yerlie." He appears to have been an artist of some celebrity, as seen in the account of his work, and other particulars already referred to. Gibson had been employed by James, previous to his appointment, as shown by the following entries in the accounts of the high treasurer of Scotland :—

*Maii* 1580. Item be the Kingis Majesteis precept to Johnne Gipsoun buikbinder, for certane buikis furnist to his hienes, conforme to his particular compt, as the samyn with the said precept and his acquittance schewin upoun compt beris, xlj lib. vj s.

*October* 1580. Item be the Kingis Majesteis precept to Johnne Gipsoune buikbinder, for certane buikis maid be him to his hienes, conforme to the particular compt gevin in therupoun, as the samyn with the said precept and his acquittance schewin upoun compt beris, xx li.

*Januare* 1582. Item be his Majesties precept to Johnne Gipsoun buikbinder, for siudrie volumes bund to his hienes, as the precept with his acquittance productit upoun compt beris, v lj. xvj s. viij d.

*Marche* 1582. Item for binding of the *New Testament* to his Majestie be Johnne Gipsoun buikbinder, xiijs.

Whether Gibson came to England with James cannot be ascertained.

1580, Feb. 13. JOHN CHARLEWOOD, who lived at the sign of the Half Eagle and Key, in Barbican, was licensed on this day to print the romance of *Palmerin of England*, on consideration, that if any thing reprehensible was found in the book after publication, all the copies should be committed to the flames. Charlewood commenced printing in 1575, used many sorts of letter, and about the cut of his sign this motto, *Post tenebras lux*, and sometimes styles himself servant to the right honourable the earl of Arundel. He continued in business till 1593.

1580. John Le Preux, who exercised the art of printing at Morges, a town in Switzerland, styled himself *printer to the illustrious body of the pastors and professors of Berne*. Le Long mentions a Latin version of the book of *Genesis*, printed at Morges in 1568.

LE PÆUX, a printer of Paris, at this period, often suppressed the name of the town where he resided, giving merely his own.

1580. About this period much encouragement was given to the art of engraving and copperplate printing. Abraham Ortelius mentions in his *Geography*, several Englishmen who were eminent in the art of engraving. The following are those who flourished in this century.

William Cunyngham, a physician at Norwich, plates in his *Cosmographical Glass*, printed by John Day, London, 1559.

Anthony Jenkinson, *maps*, 1562.

Robert Leeth, a man skilful in taking a plot of a county, who was sent over to take the province of Ulster, in Ireland, in 1567.

Humphrey Lluyd, engraved a draft of the sea coast of Scotland, as appears by his letter to Abraham Ortelius, dated April 5, 1568. Ames, however, had not seen this map, nor any engraving in Scotland until 1576, if those in the folio bible were executed there.

Humphry Cole, a goldsmith, *map and frontispiece to Barker's Bible*, 1572.

Christopher Saxton, *the first set of maps of the counties of England and Wales*.

Richard Lyne, was employed by archbishop Parker in engraving *genealogies and maps*. 1574.

Cornelius Hogius, *maps* for Saxton, 1574.

John Bettes, a painter and engraver, *pedigree and vignettes in Hall's Chronicle*, died in 1578.

Nicholas Reynolds, *maps* for Saxton, 1577.

Remegius Hogenberg, besides being employed by archbishop Parker, engraved many of the *maps* for Saxton. 1574 to 1578.

William Borough, of Rome, *coast of Scotland* for Saxton, 1579. Ralph Aggas, surveyor, *maps*.

\* The first set of maps of England was collected by Christopher Saxton of Tingley, near Leeds, in Yorkshire, who spent nine years in travelling over the whole kingdom, of which he made a general survey, and separate ones of the counties, which he published under the title of *Atlas Anglicanus, in suis Comitatum Descriptis*, apud Christ. Saxton. London, 1574-9. Thomas Seckford, Master of the Requests to queen Elizabeth, was the promoter of this undertaking, procuring him a license to imprint maps for England, or any county therein, for ten years.

A copy of the above work, curiously coloured, and mounted upon drawing paper, russia, with joints, was lately offered for £12 12s.

Christopher Switzer, wood cuts for books, the broad seals of England from the conquest to James I.

William Rogers, title to *Linchoten's Voyages, cuts to Broughton,—Heads.*

Augustine Ryther, engraved the counties of Durham, Westmoreland, and Cumberland for Saxton; also some of the maps of the Spanish invasion, 1588, he kept a shop near Leadenhall, next the sign of the Tower, and got the discourse of Petrus Ūbadini translated into English; dedicated to the lord admiral Howard, in 1590.

Francis Hogenberg, 1555.

George Hoefnagle, of Antwerp, maps, a plate of *Noneruch*. Robert Adams, plans and charts. Reginald Elstracke, portraits, 1587.

1580. A brief discours containing certayne reasons, why catholiques refuse to goe to church. Written by a learned and vertuous man, to a friend of his in England, and dedicated by J. H. to the queenes most excellent majestie. Imprinted at Douay, by John Lyon, 12mo.

In the library of Trinity college, Dublin, there is a book bearing the date of 1564, being a work of Julianus, an archbishop of Toledo; it is in 12mo, having the following imprint, *Duaci, An, 1564. Typus Lodovici de Winde Typographi jurati*. The presswork is very tolerable; the editor's dedication is dated *Duaci Catuacorum*. This is the earliest Douay book noticed by Dr. Cotton in his *Typographical Gazetteer*. Le Long cites a metrical version of a psalm which was printed at Douay in 1565, and a *Harmony of the Bible*, in 1571. In 1589, Laurence Kellam is called *sworn printer to the English college at Douay*; and executed many works there.

In 1568, Dr. William Allen,\* with the assistance of many foreign noblemen and ecclesiastical bodies, established an English Roman Catholic college at Douay, for the purpose of supplying this country with priests to support their declin-

ing cause. This institution flourished so that in the five years nearly one hundred missionaries arrived, and exercised their functions in different parts of England.\* The English council became so irritated at these proceedings, that, in 1578, they had recourse to Requesens, the governor of the Netherlands, with whom they made an agreement to suppress the college; in return for which Elizabeth excluded the insurgent navy from entering her ports. Dr. Allen and his associates found an asylum at Rheims; but in the year 1581, the magistrates of Douay invited the fugitives to return to their old quarters, which was accomplished in 1593;† and this religious community occupied this place for exactly two centuries, namely, until the French revolution dissolved this and all other similar institutions in the year 1793.

In 1582, the first edition of the *Romish English version of the New Testament* was executed at the press of John Fogny, a printer of considerable note in Rheims, who lived at the sign of the Lion, under the superintendence of Dr. Allen, Gregory Martin, and Richard Bristow; the notes were written by Thomas Worthington.—In 1580, John Fogny printed some pieces written by Lesly, titular bishop of Ossory, in favour of Mary queen of Scots. John Fogny was succeeded by Simon Fogny, whom we find continuing the business in 1610. M. Van Praet informs us that the art of printing was in use at Rheims in the year 1557, by addeucing a book entitled *Coustumes generales du Bailliage de Vermandois*, printed by Jacques Bacquenois, printer to the cardinal of Lorraine, in this year.‡ In 1576, Jacques Martin printed a work entitled *La legende de Charles, Cardinal de Lorraine*.|| And some tracts executed at Rheims by Francois du Pré, in the years 1577 and 1578, may be seen in the library of Trinity college, Dublin.

\* By an act of parliament, it was decreed, that every priest of the catholic persuasion who was found in the realm within forty days from the passing of the act, was to be accounted guilty of treason. To harbour or receive a priest was felony; and such youth as were sent out of the kingdom to be educated in catholic seminaries, were rendered incapable of inheriting English property.

Cuthbert Maine, a priest, suffered as a traitor at Launceston, in Cornwall, for saying mass in the house of Mr. Tregian. The queen took possession of Tregian's lands, and he was left to languish till his death in a prison. Those who even defend the measures of Elizabeth against the Catholics, allow that in ten years fifty priests were executed, and fifty-five were banished. The fantastical proceedings of some of the Puritans, made them equally the subject of religious persecution. Three times, during this reign, did Elizabeth order their absence by proclamation; and of those who remained, several ended their lives at the stake, as heretics. However, the sufferings of the Puritans bore no comparison to those of the Catholics, as the wealth of the latter presented an alluring bait to the persecutors, so that many families sought refuge in foreign lands, and left their estates to be seized by the crown.—The last person who suffered for heterodox opinions was Francis Kett, in 1569.

† A proclamation was issued by Elizabeth, forbidding any book that was either written or printed at Douay, to be sold or read in England. The houses of Catholics were forcibly entered, and the inmates searched; where any vestments belonging to a priest, or books containing Catholic doctrine were found, the possessors were imprisoned, and frequently put to the torture.

‡ The earliest Rheims book which Dr. Cotton had seen.

|| A copy of this rare book, on vellum, is in the royal library at Paris.

\* William Allen, usually called the great English cardinal, and whose various treatises in defence of the doctrines and practices of the Romish church, made him esteemed as the champion of his party, but so obnoxious were his writings in England, he was reported an enemy to the state, all correspondence with him was deemed treason, and Thomas Aldfield was actually executed for bringing his *Defence of the Twelve Martyrs* into this country. He was born at Rossal, in Lancashire, in the year 1539. In 1547, he was entered at Oriel college, Oxford, and in 1565, he was chosen principal of St. Mary's hall, and canon of York. On the accession of Elizabeth, he retired to Louvain, where an English college was erected, of which he became the chief support, and where he wrote in defence of the Roman catholic religion. It was thought to be owing to the instigation of Dr. Allen, and some fugitive English noblemen, that Philip II. undertook to invade England. In April, 1586, Dr. Allen published a work against queen Elizabeth, exhorting the nobility and people of England to desert her, and take up arms in favour of the Spaniards. Many thousand copies were printed at Antwerp, to be put on board the armada, that they might be dispersed all over England; but on the failure of that enterprise, all these books were destroyed. One of them, as soon as printed, was transmitted by an emissary to the English council. Allen spent the latter part of his life at Rome, and is said to have altered his sentiments, and to have been extremely sorry for the pains he had taken to promote the invasion of England by the Spaniards. At his death, which is supposed to have been occasioned by poison, October 26, 1594, he was buried in the English college of Rome, where a monument is erected to his memory.

1581. *Died*, ANDREW WECHEL, the son of Christian Wechel, and likewise a very accurate printer of many valuable editions of the Greek and Roman classics. His commencement is dated from the year 1554, and he exercised the art twenty-seven years. At first, the types which he used were those of his father; but he afterwards procured others of a more elegant description. On comparison of the earlier and later impressions, it will appear, says Maittaire, how much the latter surpasses the former. Being a protestant, he went to Frankfort, after the massacre of St. Bartholomew, (1572) for the free exercise of his religion. He himself relates the great danger to which he was exposed on the night of that dreadful tumult; and in what manner he narrowly escaped assassination by the kind exertions of the learned Hubert de Languet, who lived in his house. Christian and Andrew Wechel are supposed to have had the greatest part of Henry Stephens's types. It was at the house of Andrew Wechel that our celebrated sir Philip Sidney lodged when at Frankfort. The impressions which the family of the Wechels executed at Frankfort are generally speaking, of superior value, on account of the excellent notes of Sylburgius.

1581. The first edition of the scriptures of the *Old and New Testament*, in the Slavonian language, was printed at Ostrog, by John Theodore, jun. in one volume folio, under the auspices, and executed at the expense of Constantine, duke of Ostrog, waywode of Kiof and palatine of Volhynia, who, excellent in piety, and valiant in arms, not only defended his country by his military prowess, but enlightened his countrymen, by the dissemination of the scriptures. The volume is a thick folio, handsomely printed in two columns, having the initial letters cut in wood. Part of the general title, as also those prefixed to the books of *Genesis*, the *Psalms*, and *St. Matthew's Gospel*, are printed in red ink. A calendar and table at the end consist of red and black intermixed. The third book of the *Maccabees* is found in this edition. The whole impression was finished in August.\* The *Psalms* were published separately, in 8vo, at Wilna, the same year.

\* For a minute and interesting account of this Ostrog edition, the reader is referred to the work of Mr. Henderson, entitled *Biblical Researches and Travels in Russia*, 8vo. 1825; and also to the magnificent work of Mr. Dibdin, the *Bibliotheca Spenceriana*. This work is so rare, that Kohler declares, that it is scarcely to be found in Russia itself. A copy of this impression, but imperfect, is said to be preserved in the famous convent of Troitzkoj, or the Holy Trinity, about forty miles from Moscow, and another is in the library of the imperial academy of sciences, at St. Petersburg. A perfect and fine copy of this work is likewise to be seen in the Bodleian library, Oxford, clad in a solid binding, which wears the appearance of having been put on at the time and place of the execution of the volume; and I cannot but remember, says Dr. Cotton, the feelings of surprise and pleasure with which, when it was my office, (as librarian,) to exhibit this copy to the emperor Alexander of Russia, on his visit to the Bodleian library, in company with the other sovereigns, in the summer of 1814, his imperial majesty regarded for the first time this valuable and interesting book.

1581. In the *Dooms Warning all men to the Judgment*, a black letter quarto volume, by Stephen Bateman; it is set down among the strange prodigies happened in the world, with divers figures of revelations tending man's stayed conversion towards God, whereof the work is composed, that in the year 1450, "the noble science of printing was about thys time founde in Germany at Magunce (a famous cite in Germanie called Mentz.)" Printed by Ralph Newbery.

1581. Jasper Heywood,\* who flourished at this time, translated three of Seneca's tragedies. *Thyestes*, *Hercules Furens*, and *Troas*. They are printed in a quarto volume, black letter, of Seneca's tragedies, translated by various hands, and published by Marsh.

1581. RICHARD BRADCOCKE, who dwelt in Aldermanbury, a little above the Conduit, at this time, printed "An excellent new Comedie, entituled the *Conflict of Conscience*, containing a most lamentable example of the doleful desperation of a miserable worlding, termed by the name of *Philologus*, who forsooke the truth of God's Gospel for feare of the lyfe and worldly goods. Compiled by Nathaniell Woodes,† Minister in Norwich. The actors' names are divided into six partes, most convenient for such as are disposed, either to shew this comedie in private houses or otherwise.

1581. *A true reporte of the death and martyrdom of M. Campian,† jesuite and prieste, and M. Sherwin, and M. Bryan, priests, at Tyborne, the first of December, 1581. Observed and written*

\* Jasper Heywood was the son of John Heywood, the epigrammatist, and was born in 1534. Besides the above plays, he contributed several poems and devices to the *Paradyce of Dainty Devises*. He died 1595.

† Nathaniel Woodes was a clergyman of Norwich, and wrote only this comedy. It is very rare in the original; but it has been reprinted. It is in the Garrick collection; but there is no copy of this play in the Pearson, Wright, Farmer, or Dodd's collection.—*Beloe*.

‡ Edmund Campian was born in London in 1540, and educated at Christ church, London, and St. John's college, Oxford. In 1563, he went to Ireland and wrote the history of that country, in two volumes, which was afterwards published by sir James Ware. He then went to the Low Countries, and entered into the body of the jesuits at Douay, and from thence passed to Rome. He wrote a tragedy called *Nectar and Ambrosia*, which was acted before the emperor at Vienna, and for six years he taught rhetoric and philosophy at Prague, when he was commissioned by pope Gregory XIII. to pass to England in 1580. He boldly and fearlessly advocated the Catholic cause, both by writing and preaching, and for twelve months eluded the pursuit of the emissaries of Walsingham, when he was taken at Lyfford, in Berkshire, and dragged to the tower, where he suffered the torture of the rack four times, and was admitted to a private audience with the queen at Leicester house; notwithstanding the answers he gave her majesty, he was found guilty of high treason, for adhering to the pope, and was hanged, drawn, and quartered, at Tyburn, December 1, 1581.

Thirteen other persons were indicted with Campian for a conspiracy to murder the queen, and change the government. Of these, Ralph Sherwin, Luke Kirby, and Alexander Briant, suffered at the same time as Campian.

A sermon preached upon Sunday, being the 15th of March, within the tower of London, in the hearing of such obstinate Papists, as then were prisoners there. By William Fulke, D. D. 1581. 12mo.

An advertisement and defence for truth against her backbiters, and especially against the whispering fawourers, and colourers of Campians, and the rest of his confederates traitors. Imprinted by Christopher and Robert Barker, printers to the queenes majestie, 1581. 8vo.

by a catholic priest, which was present therewith. Whereunto is annexed certayne verses, made by sundrie persons. 16mo.

1582. **DIED, HENRY DYSZELL, DISLEY, or DISLE**, for his name is thus variously spelled, resided at the north-west door of St. Paul's, and was a stationer by company, having served an apprenticeship of thirteen years to W. Jones, from the feast of St. John the Baptist, 1563, and was loose from his apprenticeship at Midsummer, 1576. On December 30, in the same year, he received from the master and wardens of the stationers' company a licence to print an *Epitaph vpon the death of Syr Edw. Sanders, Knight, late chief baron of the Exchequer*: but on June 20, 1577, he was fined 20s. "for printinge a booke vulawfullie and vnallowed." On January 26, 1579-80, Disle procured a license from the bishop of London, and the wardens of his company, to print the *Englishe skoolmaster, set forth by James Bellot for teaching of strangers to pronounce Englishe*. The only work to which this printer's name appears, is the *Paradyse of Daynty Devises*, already noticed at page 363. Disle must have died young, for the first of the licenses of his books granted to Thomas Rider, is dated July 26, 1582, and he is therein stated to be deceased.

**ROBERT REDBORNE** lived at the sign of the Cock in St. Paul's church yard, and printed an edition of the famous romance of *Arthur of Brytayne*, without date, in folio, with the rude types and worn wood cuts used by some of his predecessors, which is all that remains of this typographer.

1582. **RICHARD KEEL** printed at the long shop in the Poultry, under St. Mildred's church, and in Lombard-street, at the sign of the Eagle, near unto the Stock Market. He printed seven works from 1548 to 1582.

1582. *A view of the edititious Bul, sent into Englande from Pius Quintus,\* bishop of Rome, anno 1569. Taken by the reuerende father in God, John Jewel, late bishop of Salisburie. Whereunto is added, a short treatise of the holy scriptures. Both which hee delivered in diuers sermons in his cathedral church of Salisburie, anno 1570.* 12mo.

1582. **FRANCIS STEPHENS THE SECOND**, was the son of the first Robert, has by La Caille been erroneously considered as a son of the first Francis Stephens. Concerning him little more

is recorded, than that he was deeply skilled in the learned languages; and that having embraced the reformed religion, he practised the typographic art at Geneva from the year 1562, to 1582. He gave to the public various works of Calvin, several impressions of the *New Testament*, both in French and Latin, in the years 1567 and 1568; and if we may credit La Caille, *La saint Bible*, bearing those dates: *Histoire de Portugal*, folio, a translation from the Latin of Osorius, and *Grammatica Græca & Latina a Roberto Stephano scripta*. Perhaps, says Mr. Greswell, the latter work is dubious. Maittaire says he had never met with it. Francis Stephens doubtless printed various other works on his own account, or at the request and charge of others. According to La Caille, he finally settled in Normandy, married there, and became the father of a numerous family; amongst whom are mentioned Gervaise and Adrien Stephens, who were "libraires" at Paris, and a daughter, Adrienne. This second Francis Stephens generally used as his ensigne, a variety of the family device.— Sometimes he exhibited the olive, with its broken branches, in an oval, without the human figure. His impressions, recorded by Maittaire, are seven in number.

1582. Printing introduced in the island of Walcheren, at Middleburgh, the capital, when an English book entitled, *Robert Brown's\* Lines of all true Christians*, was printed by Richard Painter, in quarto.† Several other English works were printed at Middleburgh before the close of this century, among which are Dudley Fenner's *Song of Songs*, and some pieces of that eccentric character, Hugh Broughton. In 1584, R. Schilders, who styles himself printer to the states of Zealand, put forth at this place a Dutch translation of lord Burleigh's celebrated tract *On the Execution of Justice in England*, which was first printed at London, in 1578.

A History of France under Charles IX. in three volumes 13mo, bears for imprint, *Meidelbourg, par Henrich Wolff*. But whether Middleburgh is meant, cannot be ascertained.‡

\* Pope Pius V. finding that Elizabeth continued to be the professed adversary of the Catholic cause in Europe, prepared a bull, in which he pronounced "pretended" right to the crown of England, and absolved her subjects from their allegiance. But the pontiff delayed to sign this instrument until he was informed of the failure of the insurrection in favour of the queen of Scots, and that upwards of eight hundred of the northern Catholics had suffered under the hands of the executioners. He then ordered it to be published. "If the pontiff," observes Mr. Lingard, "promised himself any particular benefit from this measure, the result must have disappointed his expectations. The time was gone by when the thunders of the Vatican could shake the thrones of princes." It was for affixing this bull on the bishop of London's gate, that John Felton suffered as a traitor.—See page 357, ante. Pius V. died September 30, 1572, aged 66 years.

\* Robert Brown, though he was not particularly distinguished by his literary attainments, has acquired some degree of celebrity by his having been the founder of a sect, called after his own name, the *Brownists*, who were very rigid and narrow in point of discipline. What renders these separatists worthy of notice is, that they became, in time, the origin of the *Independents*, who attained such high power in the government of this country. Having formed, about 1580, a religious society at Norwich, he was imprisoned; but by means of treasurer Burleigh, to whom he was related, he obtained his liberty. Brown then went to Zealand, and set up a church of Independents, having no communion with any other Christians. In 1585 he was in England, and under some trouble for a book he had written against the church. At length, after all the contests in which R. Brown was engaged, he returned into the bosom of that church which he had pronounced to be popish and antichristian, and all the ordinances and sacraments of which he had declared to be invalid, and was preferred to a living in Northamptonshire, but never officiated, leaving the care of his church to a curate. He was sent to Northampton gaol for assaulting a constable, and insulting a magistrate, at the age of 50, and died there in the year 1598.

† This version may be seen in the library of Trinity college, Dublin.—*Cotton*.

‡ A copy of this work is in Marsh's library, Dublin.—48.

1583. MATTHIAS PALUDANUS printed at Bilbao, in Spain, the *Constitutions of Pius IV. and other popes*; also a Spanish version of the *Orlando Furioso*, in the same year, which is a very rare book.—It would appear that during this century, some of the well known and celebrated Giunta, or Junta family, transported themselves from Italy, and carried on the printing business in Spain. From books now in the Bodleian library, it appears that Juan de Junta printed at Burgos, in 1535; at Salamanca, in 1547; and Philip de Junta at Burgos in the years 1582 and 1593.

It was in the city of Florence, where literature and the fine arts have always flourished, that the Junta family first established their press, the first-fruit of which was an edition of *Zenobii Proverbia*, printed in 1497, and followed by a *Justin and Orpheus*, both dated 1500.

1583, Nov. 23. Edward Arderne\* was racked within the tower previous to his execution. Besides the rack, there was then in that dungeon for heretics, a circular machine of iron, called the *Scavenger's Daughter*,† from the name of its inventor.

1583. Died, HENRY BYNNEMAN an eminent printer, who dwelt in Thames-street, near unto Baynard's castle, and at Knight Rider's-street, at the sign of the Mermaid, with this motto

about it, *Omnia tempus habent*. He had been servant to Reynold Wolfe, and during the time he was in business met with great encouragement from archbishop Parker, who allowed him, to have a shop, or shed, at the north-west door of St. Paul's, at the sign of the Three Wells. He left Henry Denham and Ralph Newbery his assignees. Bynneman's first book is dated 1566, and he printed in the whole one hundred and twenty works. Some of his printing has already been inserted; and from among the rest the following may be noticed:—

*A large collection of novels, dedicated to sir George Howard, master of the armory*, 8vo, printed for Nicholas Englande, Nov. 8, 1567.

*A new, merry, and wittie comedie, or enterlude, newly imprinted, treating upon the history of Jacob and Esau, taken out of the First Book of Moses, entituled Genesis*, 1568, 4to.\*

*Of ghosts and spirites walkyng by night, and strange noyses, crackes, and sundry fore warnynges, whiche commonly happen before the death of men, great slaughters, and alterations of kyngdomes*. Written by Lewes Lauaterus of Tigrine. And translated by R. H. 1572, 4to.

*A new yeares gifte, dedicated to the pope's holiness*, 1579, 4to.—See page 365, ante.

In 1580, he printed a work written by John Welles, a scrivener, in Fleet-street, in which one Arthur Halle of Grantham, member of parliament, was of casting reflections on sir Robert Belle, the then speaker, and several of the members; it was dedicated to sir Henry Knyvett. One copy of this work was delivered to Henry Shurlande, in Friday-street, linen draper, to be sent to Mr. Halle. Bynneman received cloth of Mr. Shurlande to the amount of £6 13s. 4d. for printing the said book. Twelve months afterwards, Mr. Halle received six other copies from the printer, and his man a seventh. They were all cited to appear before the house of commons, when it appeared that Halle had given xx nobles to Welles for the copy. After expressing their deep contrition, they were all sequestered, and ordered to meet again three different times afterwards, when Halle was committed to the tower for six months, and until he made a retaliation to the satisfaction of the house, to pay 500 marks, to be severed from being a member of this house, and to choose another.†

*The first foure bookes of Virgils Æneis, translated into English heroical verse, by Richard Stanyhurst*. With other poetical devices thereto annexed. At the end, an epistle of the printer, relating to the work. Dedicated to his brother, the lord baron of Dunfayne, 150 pages, 1583, 12mo.

1583. WILLIAM BARTLET, or BARTHELET, as he spelt his name both ways, followed the profession at this period, and printed two works.

\* A copy of the above rare piece, sold at Major Pearson's sale, for £1 7s. At Mr. Dodd's sale it produced the sum of £3 5s. At Dr. Wright's sale, a manuscript copy, transcribed by Mr. Henderson, sold for £2 10s. A perfect copy was in the Kemble collection; and Mr. Beloe perfected the copy in the Garrick collection.—Beloe.

\* On the side of the papists, books against the queen and princes excommunicate, drew some which had the pope's power in great reverence for their obedience, and amongst others they so distracted one Somerville, a gentleman, that in haste he undertook a journey privily to the queen's court, and breathing nothing but blood against the Protestants, he furiously set upon one or two by the way, with his sword drawn. Being apprehended, he professed that he would have killed the queen with his own hands. Whereupon he, and by his impeachment, Arderne, his wife's father, a man of very ancient gentility, in the county of Warwick, Arderne's wife their daughter, Somerville, and Hall a priest, as accessories were arraigned. Three days after Somerville was found strangled; Arderne was hanged, and the woman and priest were pardoned.—Camden's *Annals*.

† The kinds of torture employed in the Tower were:—  
1. The rack, a large open frame of oak, raised three feet from the ground. The prisoner was laid under it, on his back, on the floor: his wrists and ancles were attached by cords by two rollers at the ends of the frame; these were moved by levers in opposite directions, till the body rose to a level with the frame. Questions were then put; and if the answers did not prove satisfactory, the sufferer was stretched more and more, till the bones started from their sockets.

2. The *scavenger's daughter* was a broad hoop of iron, so called, consisting of two parts, fastened to each other by a hinge. The prisoner was made to kneel on the pavement, and contract himself into as small a compass as he could. Then the executioner, kneeling on his shoulders, and having introduced the hoop under his legs, compressed the victim close together till he was able to fasten the extremities over the small of the back. The time allotted to this kind of torture was an hour and a half, during which time it commonly happened that, from excess of compression, the blood started from the nostrils; sometimes, it was believed, from the extremities of the hands and feet.

3. Iron *gawlets*, which could be contracted by the aid of a screw. They served to compress the wrists, and to suspend the prisoner in the air from two distant points of a beam. He was placed on three pieces of wood, piled one on the other, which, when his hands had been made fast, were successively withdrawn from under his feet.

4. A fourth kind of torture was a cell called *little ease*. It was of so small dimensions, and so constructed, that the prisoner could neither stand, walk, sit, or lie in it at full length. He was compelled to draw himself up in a squatting posture, and so remained during several days.—*Lingard, vol. viii.*

1583, Jan. 8. *Books delivered up by the richer Printers to the company, for the relief of the poor, from a manuscript indorsed: Decrees of the Lords in the Star-chamber, touching Printers, Stationers, &c. 23 Junii, Eliz. 28, 1585. Orders for them sent to Archbishop Whitgift.*

Whereas sundrie decrees and ordinances have, upon grave advice and deliberation, been made and published for the repressing of such great enormities and abuses as of late (most men in tyme past) have been commonly used and practised by diverse contemptuouse and disorderly persons, professing the arte or misterie of printing and selling of books; and yet, notwithstanding the said abuses and enormities are nothing abated, but (as is found by experience) doe rather more and more increase, to the wilful and manifest breach and contempt of the said ordinances and decrees, to the great displeasure and offence of the queen's moste excellent majestie; by reason whereof sundrie intolerable offences, troubles, and disturbances, have happued, as well in the church as in the civile government of the state and commonweale of this realme, which seem to have growen, because the paynes and penalties, conteyned and sett downe in the same ordinances and decrees, have been too light and small for the correction and punishment of so grievouse and heynouse offences, and so the offenders and malefactors in that behalfe, have not been so severely punished, as the qualitie of their offences have deserved: her majestie, therefore, of her moste godlie and gracious disposicion, being careful that speedie and due reformation be had of the abuses and disorders aforesaid, and that all persons using or professing the arte, trade, or misterie of printing, or selling of books, should from henceforth be ruled and directed therein by some certeyn and known rules, or ordinances, which should be inviolable kept and observed, and the breakers and offenders of the same to be severely and sharplie punished and corrected, hathe straitly charged and required the mostreverend father-in-God, the archbishop of Canterburie, and the right honourable the lordes, and others of her majesties privy council, to see her majesties said most gracious and godlie intention and purpose to be duly and effectually executed and accomplished. Whereupon the said most reverend father, and the whole present sitting in this honourable cowrte, this 23d day of June, in the twenty-eighth year of her majesties reign, upon grave and mature deliberation, have ordeyned and decreed that the ordinances and constitutions, rules and articles, hereafter following, shall, from henceforth, by all persons, be duly and inviolable kept and observed, according to the tenor, purporte, and true intent and meaning of the same, as they tender her majesties high displeasure, and as they wyl answere to the contrarie at their uttermost peril. Videlicet.

Imprimis, That every printer, and other person, or persons whatsoever, which at this tyme present hath erected, or set up, or hereafter shall erect, set up, keep, mainteyn, or have anye printing-presse, rowle, or other instrument, for

imprinting of bookes, chartes, ballades, pourtrayctures, paper called damask-paper, or any such matters, or things whatsoever, shall bring a true note, or certificate of the saide presses, or other printing instruments allreadie erected,\* within tenne days next coming, after the publication hereof; and of the saide presses, or other printing instruments hereafter to be erected, or set up, from time to tyme, within tenn days next after the erecting, or setting up thereof, unto the master and wardens of the companie of stationers, of the cittie of London, for the tyme being, upon payne that every person fayling, or offending herein, shall have all and averie the said presses, and other instruments, utterly defaced, and made unserviceable for imprinting for ever; and shall also suffer twelve moneths imprisonment without bayle or maynprise.

2. Item, That no printer of bookes, nor any other person or persons whatsoever shall set up, keepe, or mayntain, any presse or presses, or any other instrument, or instruments, for imprinting of bookes, ballades, charte, pourtrayctures, or any other thing or things whatsoever, but onely in the citie of London, or the suburbs thereof (except one presse in the universitie of Cambridge, and one other presse in the universitie of Oxforde, and no more) and that no person shall hereafter erect, sett up, or maynteyne in any secrett, or obscure corner, or place, any such presse or instrument before expressed; but that the same shall be in such open place or places, in his or their house or houses, as the wardeins of the said companie of stationers, for the tyme being, or suche other person, or persons, as by the saide wardeins shall be thereunto appointed, may from tyme to tyme have readie accesse unto, to searche for and view the same; and that no printer or other person, or persons, shall at any time hereafter withstande, or make resistance to, or in any such view or search, nor deny, or keepe secrett any such presse, or other instrument, for imprinting, upon payne that every person offending in any thing contrarie to this article, shall have all the said presses, and other printing instruments, defaced and made unserviceable for imprinting for ever; and shall also suffer imprisonment one whole year, without bayle, or maynprise, and to be disabled for ever to keepe anye printing presse, or other instrument for printing, or to be master of anye printing-houss, or to have any benefite thereby, other than onely to worke as a journeyman for wages.

3. Item, That no printer, nor other person or persons whatsoever, that hath sett up anye presse, or instrument, for imprinting within sixe moneths last past, shall hereafter use, or occupie the same, nor any person or persons shall hereafter erect, or sett up any presse, or other instrument of printing, till the excessive multitude of printers, having presses allreadie sett up, be abated, diminished, and by death given over, or other-

\* See act 39 Geo. III. c. 79, and the Six Acts, Dec. 1819.

wise brought to so small a number of masters, or owners of printing-houses, being of abilitie and good behaviour, as the archbishopp of Canterburie and bishopp of London, for the tyme being, shall thereupon think it requisite, and convenient, for the good service of the realme, to have some more presses, or instruments for printing erected, and sett up: and that when, and as often as the saide archbishopp and bishopp, for the tyme being, shall so thiuk it requisite and convenient, and shall signifie the same to the said master and wardeins of the saide companie of stationers, for the tyme being; that then, and so often, the saide master and wardeins, shall (within convenient tyme after) call the assistants of the said companie before them, and shall make choice of one, or more (as by the opinion of the saide archbishopp and bishopp, for the tyme being, need shall require) of suche persons being free stationers, as for theyr skill, abilitie, and good behaviour, shall be thought by the saide master, wardeins, and assistants, or the more parte of them, meet to have the charge and government of a presse, or printing-house; and that within fowerten dayes next after such election, and choice, the saide master, wardeins, and fower other at the least of the assistants of the saide companie, shall present before the high commissioners in causes ecclesiastical, or sixe or more of them, whereof the saide archbishopp, or bishopp, to be one, to allowe, and admitt everie suche person so chosen and presented, to be master and gouvernoure of a presse, and printing-house, according to the same election and presentment, upon payne that everie person offending contrarie to the intent of this article, shall have his presse, and instruments for printing, defaced, and made unserviceable, and allso suffer imprisonment, by the space of one whole yeare, without bayle, or maynprize. Provided allwayes, that this article, or any thing therein conteyned, shall not extend to the office of the queene's majesties priuter for the service of the realme; but that the said office, and offices, shall be, and continue at the pleasure and disposicion of her majestie, her heires, and successors, at all tymes, upon the death of her highnes's priuter, or otherwise.

4. Item, That no person, or persons, shall imprint, or cause to be imprinted, or suffer by any meanes to his knowledge, his presse, letters, or other instruments, to be occupied in printing of any booke, worke, coppie, matter, or thing whatsoever, except the same booke, work, coppie, matter, or any thing, hath bene heretofore allowed, or hereafter shall be allowed, before the imprinting thereof, according to the order appointed by the queene's majesties injunctions, and be first scene and perused by the archbishopp of Canterburie, and bishopp of London, for the tyme being, or one of them (the queene's majesties priuter for some special service by her majestie, or by some of her highnes privie counsell thereunto appoynted; and suche are, or shal be privileged to print the bookes of the common lawe of this realme, for suche of the same books,

as shal be allowed of by the two cheefe justices, and cheefe barons, for the tyme being, or any two of them, onely excepted) nor shall imprint, or cause to be imprinted, any booke, worke, or coppie, against the forme and meaning of any restraynte, or ordinance conteyned, or to be conteyned, in any statute, or lawes of this realme, or in any injunction made, or sett forthe by her majestie, or her highnes privie counsell, or against the true intent and meaning of any letters patents, commissions, or prohibicions, under the greate seale of Englande; or contrarie to any allowed ordinance, sett downe for the good governance of the company of stationers, within the cittie of London; upon payne to have all suche presses, letters, and instruments, as in or about the imprinting of any suche bookes, or copies, shall be employed or used, to be defaced, and made unserviceable for imprinting for ever; and upon payne also, that everye offender, and offenders, contrarie to this present article, or ordinance, shall be disabled (after any suche offence) to use, or exercise, or take benefite by using, or exercising of the arte, or feate of imprinting; and shall moreover susteyne six moneths imprisonment without bayle, or maynprize:

5. Item, That everie suche person, as shall sell, utter, or putt to sale wittingly, bynde, stitch, or sowe; or wittinglie canse to be solde, uttered, put to sale, bounde, stitched, or sowed, any bookes, or copies whatsoever, printed contrarie to the intent and true meaning of any ordinances or article aforesaid, shall suffer three moneths imprisonment for his, or their offence.

6. Item, That it shall be lawfull for the wardeins of the saide companie, for the tyme being, or any two of the saide companie thereto deputed, by the saide wardeins, to make searche in all work-houses, shoppes, ware-houses of printers, booke-sellers, booke-bynders, or where they shall have reasonable cause of suspition; and all books, copies, matters, and things printed, or to be printed, contrarie to the intent and meaning of these present ordinances, to seaze and take to her majesties use, and the same to carrie into the stationers-hall in London; and the partie, or parties, offending in printing, selling, uttering, bynding, stitching, or sowing any such bookes, copies, matters, or things, to arrest, bring, and present before the said highe commissioners in causes ecclesiastical, or some three, or more of them, whereof the said archbishop of Canterburie or bishopp of London, for the tyme being, to be one.

7. Item, That it shall be lawfull to and for the aforesaid wardeins, for the tyme being, or any two by them appoynted, without lett, or interruption of any person, or persons whatsoever, to enter into any howsse, work-howsse, ware-howsse, shopp, or other place, or places; and to seaze, take, and carrie away all presses, letters, and other printing instruments, set upp, used, or employed, contrarie to the true meaning hereof, to be defaced, and made unserviceable, as aforesaid; and that the saide wardeins shall so often as need shall require, call the assistants of their

saide companie, or the more parte of them into their said hall, and there take order for the defacing, burning, breaking, and destroying of all the saide letters, presses, and other printing instruments aforesaide; and thereupon shall cause all suche printing presses, or other printing instruments, to be defaced, melted, sawed in peeces, broken, or battered, at the smythes forge, or otherwise to be made unserviceable; and the stuff of the same so defaced, shall redylyver to the owners thereof agayne, within three moneths next after the taking, or seazing thereof, as aforesayde.

8. Item, That for the avoyding of the excessive number of printers within this realme, it shall not be lawfull for any person or persons, being free of the companie of stationers, on using the trade or mysterie of printing, bookeselling, or booke-bynding, to have, take, and keepe hereafter, at one tyme, any greater number of apprentizes, than shall be hereafter expressed; that is to say, every person that hath been or shall be master, or upper wardein of the companie, whereof he is free, to keepe three apprentizes at one tyme, and not above; and every person that is, or shall be under wardein, or of the liverie of the companie whereof he is free, to keepe two apprentizes, and not above; and every person that is, or shall be of the yeomanrie of the companie, whereof he is, or shall be free, to keepe one apprentice (if he himself be not a journeyman) and not above. Provided allwayes, that this ordinaunce shall not extend to the queen's majesties printer for the tyme being, for the service of her majestie, and the realme, but that he be at libertie to keepe and have apprentizes, to the number of sixe at any one tyme.

9. Item, That none of the printers in Cambridge, or Oxford, for the tyme being, shall be suffered to have any more apprentizes, than one at one tyme at the moste. But it is, and shall be lawfull, to, and for the saide printers, and either of them, and their successors, to have, and use the help of any journeyman, being freemen of the cittie of London, without contradiction; any lawe, statute, or commaundement, contrarie to the meaning and due execution of those ordinaunces, or any of them, in any wise notwithstanding.

On the 23rd of June, 1586, the lords of the star chamber affirmed and confirmed their former laws, empowering them to search into bookbinders' shops, as well as printing offices, for unlawful and heretical books, and imprison the offenders.

Many of the richer printers, who had licenses from the queen, granting them a propriety in the printing some copies, exclusively to all others, yielded divers of these copies to the company of stationers, for the benefit and relief of the poorer members thereof. A list of these books may be seen in Ames, Herbert, and Dibdin's *Typographical Antiquities*.

1583. *Died*, FREDERIC MOREL, (Champenois) was born about 1523, and denominated *l'ancien*, to distinguish him from his son of the same

name, was well skilled in the learned languages, having been a diligent hearer of Tusanus; the revision and impression of whose Greek *Lexicon* he superintended, as corrector of the press of Charlotte Guillard. As a typographer, he began to be conspicuous in the year 1557, having become the son-in-law of Michael Vascosan; and printed various works, first in conjunction with him, and afterwards distinctly. He continued to increase in celebrity; giving to the public at his own charge, and occasionally at that of other *libraires*, various works of importance. In 1571, he received a royal diploma, constituting him king's printer in ordinary for the learned languages; an honour which he afterwards held in conjunction with Vascosan his father-in-law; as appears from the letters patent cited by Maittaire. Yet the latter says he very seldom used the insigne which was common to the *impressores regii*, but generally in the beginning of his books his own mark, the Mulberry Tree; and at the end, the "Scutum," or arms of France, with the words *Pietate & Justitia*, and symbolical figures of those virtues. In 1578, he subscribes, *in vico Jacobæo ad insigne Fontis*, at first without, afterwards with the figure of a Fountain; but in 1580, in his very elegant impression of the *Batrachomyomachia*, he marks the title with the "insigne regium," and its usual motto, subscribing *apud Federicum Morellum Typographum Regium, via Jac. ad insigne fontis*. Du Verdier says, that Frederic Morel had the office of "Interprète du Roy pour les langues Grecque & Latin," and enumerates some translations by him. The mark which he adopted was the Mulberry Tree, in allusion to his own name. Sometimes his books, like many of Vascosan's, are found without any device; but where the "Morus" occurs he used this motto, generally winding round the trunk and through the branches

Πάν διέδρον ἀγαθὸν καρποὺς καλοὺς ποῦι.

Occasionally he appears to have varied his mottoes. Two years before his death, Maittaire says he relinquished the office of king's printer in favour of his son of the same name; yet believes he continued in the practice of the art, till the time of his decease.

WILLIAM MOREL,\* was an elder brother of the above, and born at Tailleul, in Normandy. After having matured his acquaintance with the Greek language, by performing for some time the office of corrector of the press of Joannes Lodoicus, he established himself about the year 1549, at Paris; and exercised the art with the highest reputation for fifteen years. Maittaire gives at length his *Index Librorum*, which (he says) were *multi & elegantes*. Morel was himself a person of great erudition; which he evinced by several valuable works of his own. He appears afterwards to have been associated with Adrianus Turnebus; at whose special re-

\* The Editor has to apologise for the notice of William Morel being inserted here, as at the proper time, (1564) the copy was mislaid.

commendation Morel succeeded in the office of Typographus Regus; and from about the year 1555, he used the device common to the royal printers. Henry Stephens seems to accuse him of having abandoned the reformed religion; perhaps to enable him to accept the office of king's printer. This charge is clearly implied in his

## GULIELMI MORELLI EPITAPHIUM.

Doctas et hic quondam, magni patiensque laboris:  
Auxilia hæc artis magna typographicæ.  
Sed quod non hujus respondent ultima primis,  
Ars bene fida prius, nec bene fida manet.  
Ne mirare, fidem quod et ars sua fregerit illi;  
Namque datam Christo fregerat ille fidem.

Maittaire mentions as the early mark of this printer, the Greek letter  $\Theta$ , *cum binis serpentibus circumtextis & Cupidine media lineæ incidente*. Beneath this hieroglyphic he placed the line from Martial: *Victurus gentium debet habere liber*: and sometimes the maxim, from Euripides: *Δεινὴται φρονιδὸς σοφώτεραι*. From the testimony of M. Falconet, it appears that the Greek impressions of William Morel were valuable both for their beauty and correction.

After all his meritorious labours, it appears that William Morel left his family in very embarrassed circumstances at his decease; and that in consequence of the civil wars and public troubles of that period, his pension was not duly paid. His widow for some time continued the establishment; which was afterwards vested in Stephen Prævostean, who espoused Jeanne, the daughter of William Morel, and adopted his mark. La Caille says that Stephen Prævostean distinguished himself by the impression of numerous and highly finished books. He seems to have exercised the profession till the commencement of the following century.

La Croix du Maine says, that William Morel had a brother John, who was burned at Paris, on account of his religion. Peignot relates that this John was indeed accused of heresy, and died in prison; but that his remains were disinterred and burned in 1559. Menage will have it, that this story applies to Frederic Morel, another brother.

1584. Jan. 10. WILLIAM CARTER was a daring printer, at London, but seldom put his name to the books he printed; the only one found with his name is the following; which is noticed in Strype's *Life of Bishop Aylmer*. One Carter, a printer, had divers times been put in prison for printing of lewd pamphlets, popish and others, against the government. The bishop by his diligence had found his press in the year 1579, and some appointed by him to search his house, among other papistical books, found one written in the French, intitled, *The innocency of the Scotch queen; who then was a prisoner for laying claim to the crown of England, and endeavouring to raise a rebellion*. A very dangerous book this was, the author called her the heir apparent of this crown, inveighed against the late execution of the duke of Norfolk, though he was executed for high treason; defended the rebellion

in the north, anno 1589,\* and made base and false reflections upon two of the queen's chiefest ministers of state, viz. the lord treasurer, and the late lord keeper Bacon.†

But William Carter's book, for which he suffered, was entituled, *Reasons that catholicks ought in any wise to abstain from heretical conventicles*, said to be printed at Douay, but really at London, 1580, in octavo, under the name of John Howlet, and dedicated to queen Elizabeth. The running title a *treatise of schism*. When this book was seized at his house, on Tower hill, near London, he confessed there had been printed 1250 copies. At that time the searchers found the original sent from Rheims, and allowed under Dr. William Allen's own hand to be truly catholic and fit to be published. See Wood's *Athenæ*.

On the 10th of January, 1584, at a sessions holden in justice hall, in the Old Bailey of London, for gaole delivery of Newgate, William Carter was there indicted, arraigned, and condemned of high treason, for printing a seditious and traitorous book in English, entituled, *A treatise of schisme*; and was for the same (according to sentence pronounced against him) on the next morrow drawn from Newgate to Tyborne, and there hanged, bowelled, and quartered.—See Hollingshead, p. 1357. And forthwith against slanderous reports spread abroad in seditious books, letters, and libels, thereby to inflame our countrymen, and her majesty's subjects, a book was published intitled, *A declaration of the favourable dealing of her majesties commissioners, &c.* which book also I have caused to be set downe in the continuation of the chronicle, first collected by Reigne Wolfe, and finished by Raphaell Hollenshead.—*Stow's Annals*.

Cardinal Allen, in his answer to the libel of *English Justice*, p. 10 and 11, says, "Carter, a poor innocent artisan, who was made away onlie for printing a catholique booke, *De Schisme*.—The said young man Carter, of whose martyrdom we last treated, was examined upon the rack, upon what gentlemen or catholique ladies he had bestowed, or intended to bestow certain bookes of prayers and spiritual exercises, and meditations, which he had in his custodie."

\* Thomas duke of Norfolk, who suffered June 2, 1573 was, without exception, the first subject in England; and the qualities of his mind corresponded with his high station. He closed his career, at length, the victim of love and ambition, in his attempt to marry the Scottish queen. He died with great courage and magnanimity amidst a vast crowd of sorrowful and weeping spectators.

† Sir Nicholas Bacon an eminent English lawyer, was born at Chislehurst, in Kent, in 1510. He studied at Bene't college, Cambridge, from whence he removed to Gray's Inn Henry VIII. appointed him attorney of the court of wards. On the accession of Elizabeth he was knighted, and in 1558 was made keeper of the great seal, and a member of the privy council. He was a man of great industry, prudent and cautious in his conduct, making it his study never to entangle himself with any party. When the queen came to visit him at his new house, at Redgrave, she observed, alluding to his corpulency, that he had built his house too little for him. "Not so, madam," answered he, "but your majesty has made me too big for my house." He died February 26, 1579, and was buried in St. Paul's. Sir Nicholas Bacon left behind him, in manuscript, several discourses on law and politics, and a commentary on the twelve minor prophets, none of which have been printed.

1584. RICHARD JUGGE was an eminent printer, who kept a shop at the sign of the Bible, at the north door of St. Paul's church, though his residence was in Newgate market, next to Christ church. The class of life in which this printer was situate, was of great respectability; since in 1531, he was elected from Eton, to King's college, Cambridge, whence he proceeded as a scholar. About the period of the Reformation, as he was zealous for the success of that great work, as well as for the promotion of learning in general, he studied the art of printing, and practised it with great success for many years. "He had a license from government to print the *New Testament* in English, dated Jan. 1550; and no printer ever equalled him in the richness of the initial letters, and general disposition of the text, which are displayed therein: being rightly called by Ames "very curious, in his editions of the *Old and New Testament*, bestowing not only a good letter, but many elegant initial letters, and fine wooden cuts, which may be seen in the hands of several gentlemen." He was one of the original members of the stationers' company, of which he was chosen warden in the years 1560, 1563, 1566; and master in 1568, 1569, 1573, and 1574. On the accession of queen Elizabeth to the throne, he printed the proclamation, 17 Nov. 1557, and some others afterwards; but the 7th Feb. following, John Cawood, who had been a printer to the late queen, was conjoined with him in printing a proclamation for eating flesh; and they appear to have continued printing jointly the state papers from that time, though I do not find they had a patent for so doing until 24th March, 1560; by which they were appointed printers to the queen's majesty, with a salary of £6 13s. 4d. the same as had been allowed to Cawood, by his patent from queen Mary, for his life; and that seems to have been the reason for his being joined with Juggé, in queen Elizabeth's patent. He had licence from his company to print the following books, viz. From July, 1557, to July 1558. *The booke of Palmestrye. The booke of Josephus. The Kynge of Ryghtuousness. The small psalter*, in xvi. *Englische. The shorte dictionary*. In 1561. *The oration of Beze. Orders taken by my Lorde of Canterburge with the rest of the Commissioners. 1566-67. A defence of preestes maryages. 1569-70. Directions for churchwardens and scorumen. Wether yt be mortall synne to transgresse Ciull lawes. Dr. Stories confession at his death.\** He survived

Cawood a few years, in which he enjoyed the privileges of the patent alone. The last proclamation he printed is dated 16th Feb. 19 Eliz. 1576-7. Herbert observes from some letter of T. Baker, that Juggé had a patent 5 May, 2nd and 3d of Philip and Mary (1556,) to print "all books of common law for seven years." The same authority also states that he was succeeded by his wife Joan. Considering the number of years in which he was engaged in his profession, and the reputation of his name, one is surprised that the list of books which have issued from his press is so limited. Seventy works bear his imprint. He printed many editions both of the *Old and New Testament*; and in 1575, the following curious book.\*

*The kalender of scripture; wherein the Hebrew, Calldian, Arabian, Phenician, Syrian, Perrian, Greek, and Latin names of nations, countreys, men, weemen, idols, cities, hills, rivers, and of other places in the holly bible mentioned, by order of letters ar set and turned into our English tong. Also lists of persons, and books, from whom he had the subject. Ato. By William Patten.*

Beneath the title of this curious book is a rebus: an angel holding the letter R in one corner, and in the other corner, a nightingale on a bush, and a label with 17000, to express the printer's name; with an epistle of his to the reader at the beginning.

Juggé's device, which is both elegantly designed, and freely cut, consisted of a massive architectural panel, adorned with wreaths of fruit, &c. and bearing in the centre an oval, within which is a pelican feeding her young, surrounded by the mottoes LOVE KEPYTH THE LAWE, OBEYETH THE KYNOGE, AND IS GOOD, TO THE COMMEN WELTHE, AND PRO REGE, LEGE, ET GREGE. On the left of the oval stands a female figure, having a serpent twined round her right arm, who is called on the tablet beneath her PRYDENCIA, and upon the left is another female figure with a balance and a sword, called JUSTICIA. In the bottom centre is a small cartouche panel bearing the annexed monogram.

JOHN JUGGE. Of this person Herbert remarks, that he succeeded Richard in his busi-

\* Dr. John Story was executed at Tyburn, June 1, 1571. During the reign of Mary, he was very severe against the Protestants, and on the accession of Elizabeth, fled to Flanders, where his exertions were used to injure the trade with England; he was at length inveigled away, and brought to London, and confined in the Tower. He was tried on a charge of high treason, in conspiring the death of the queen. On his way to execution, a person from the crowd sang out,—

Master doctor Story,  
For you they are right sorry,  
The court of Louvain and Rome;  
Your holy father the pope  
Cannot save you from the rope,  
The hangman must have your gown.

\* In 1575, Richard Juggé, besides the usual bowl and spoons, gave eight gylne cushions for the counsaill chambers for the company of stationers.

ness, and probably in his house; and though it does not positively appear what relation he was to him, it is highly probable that he was his son. We might perhaps have been satisfied in this particular, but that the register book, containing the company's transactions, from 1571 to 1576, is missing; in which period it is likely he took up his freedom, seeing he was brought on the livery in about 1574. May 20, 1577, he had license to print *Fullers farewell to Mr. Fourbousier and other gentlemen adventurers who labour to discover the right passage to Catay. The delectable and pleasant historie of Gerillon of Engellande.* It is said that he died before April 6, 1579, when one Myles Jennynge claimed the copy-right of "a book entitled *The historie of Gerillon of England*, which he affirmed that he bought of John Jugge." His only work is *The Advice and Answer of the Prince of Orange, &c.* 1577. Octavo.

JOAN JUOGE has been supposed to have been the widow of Richard Jugge, and mother of the preceding, from her not engaging in the business until his decease. Herbert supposed that her works were *Langham's Garden of Health*, Quarto; *Arte of Navigation*, 1579, and 1580, Quarto; and *Book of Common Prayer*, 1580. Folio. He also mentions certain Sermons appointed by the queen, printed in 1587, which bore Jugge's monogram, and which were probably executed by his widow.

1584. JOHN KINGSTON according to the usage of the times in which he lived, sometimes spelt his name John Kyngstone. He appears to have been connected with Henry Sutton during the whole of queen Mary's reign, especially in the printing of church books. His shop was at the west door of St. Paul's, in the church yard.—Forty-three works bear his imprint, among which may be noticed:—

*The seven first bookes of the encidos of Virgill, converted into Englishe meter by Thomas Phaer squire, sollicitour to the king and queens majesties, attending their honorable counsaile in the marches of Wales, 28 Maii. 1558, 4to.* Dedicated to queen Mary.

*The fardle of facions, containing the aunciente manners, customes, and lawes, of the peoples inhabiting the two partes of the earth, called Affricke, and Asie.* Printed with Henry Sutton, December 23, 1555.

*The workes of Geffery Chaucer, newly printed with divers additions, by John Stowe, with the seige of Thebes, &c. by John Lydgate, Monk of Bury.* Printed for John Wight. 1561, folio.

*An invective againste vices, taken for vertue :* by Richard Rice. With an epistle of Robert Crowley to the reader. Printed for Henry Kirkham. 1583, 12mo.

1584. The first edition of the *whole Bible* in the Icelandic tongue, was printed at Holum, under the direction of the celebrated and pious Gudbrand Thorlaksson, bishop of Holum. To accomplish this great work, the design of which he had formed on being raised to the see of Holum, he purchased the printing press which had

been established at Breidabolstad, by Jon Areson, the last Catholic bishop of Holum, and caused it to be removed, first to a farm granted by his Danish majesty, for a perpetual residence, to the printer and his successors in office, and at length to Holum, that it might be under his immediate inspection. Being a great mechanic, he introduced great improvements, which rendered the typographical productions of his press far superior to those which had formerly issued from it. The printer whom he had employed was Jon Johnson, who, at his request, visited Copenhagen, in order to perfect himself in his business. The printing of the bible was finished in June, 1584, in folio, under the auspices, and partly at the expense, of Frederic II. king of Denmark.\* The pages are numbered with capitals, after the manner of the German bible : and the chapters are divided into paragraphs, distinguished also by capitals in the margin. Bishop Gudbrand likewise ornamented the work with a number of cuts, chiefly designed and engraved by himself.

1584. *A discoverie of the treasons practised, and attempted against the queenes majestie, and the realme, by Francis Throckmorton,† who were for the same arraigned and condemned in Guild Hall, in the citie of London, the 21st of May past. London, printed by Christopher and Robert Barker.* 1584, 4to.

1584. *A true and plaine declaration of the horrible treasons, practised by William Parry,‡ traitor, against the queene's majestie. The manner of his arraignment, conviction, and execution, together with the copies of sundry letters, of his and others, tending to divers purposes, for the proofes of his treasons. Also an edition not impertinent thereunto, containing a collection of his birth, education, and course of life, &c.* Printed by Christopher and Robert Barker, 1584, 4to

1584. Notwithstanding the favourable licence for the encouragement of the press, granted to the university of Cambridge, July 20, 1534, it appears that no books were printed there, after the year 1522, to the year 1584, in the space of sixty-two years,|| when Thomas Thomas, M. A. and formerly of king's college, took up, and fol-

\* Frederic II., king of Denmark, was a munificent patron of literature: he died April 4, 1588. In August, 1576, Frederic founded the observatory on the island of Huen, (called Venusia, or the scarlet isle,) in the Baltic, as an inducement to fix Tycho Brahe under his immediate protection. See 1601. post.

† Francis Throckmorton submitted four times to the torture of the rack, and afterwards suffered on the scaffold, through the persecution of Leicester.

‡ William Parry was executed in Palace-yard, Westminster, Feb. 25th, 1584. He was a gentleman of Wales, and a member of the House of Commons. His zeal for the Catholics led him to oppose a measure of the ministry, which had been introduced against the Jesuits, for which he was committed to custody; but on making his submission was released, and admitted to his place in the house. The crime for which he suffered was for conspiring the death of the queen, upon the confession of Edmund Neville.

|| John Bagford, in his manuscript collections for a *History of Printing*, attributes the cessation observed in the Oxford, Cambridge, York, Tavistock, St Alban's, Canterbury, and Worcester presses, to the interference of cardinal Wolsey, during his legantine visitations of several parts of England; but does not state any authority.

lowed the business of printing, and was printer to this university, as well as a scholar and an author. He printed eight different works while in business, and Thomas Charde, who was afterwards an eminent printer in London, was for some time his assistant.

Thomas Thomas is thus noticed in one of Martin Marprelate's pieces, beginning, "Oh, read over D. John Bridges, for it is a worthy worke, p. 6, viz. As of the Helvetian, the Scottish, French, Bohemian, and the churches of the Low Countrys, the churches of Polonia, Denmarke, within the dominions of the county Palatine, of the churches in Saxonie, and Swevis, &c. which you shall see evidently proved, in the harmonie of the confessions of all those churches; section the eleventh. Which harmonie was translated, and printed, by that puritan Cambridge printer, Thomas Thomas. And although the booke came out by publicke authoritie, yet by your leave, the bishops have called them in, against their state. And trust me, his grace will owe that puritane printer as good a turne, as hee paide unto Robert Waldegrave for his sawcines, in printing my frend, and deare brother, Diotrephes his dialogue. Well frend Thomas, I warne you before hand, look to your selfe, &c."

THOMAS THOMAS, M.A. printer to the university of Cambridge, author of the *Dictionary*, which bears the name of *Thomas Thomasius*, died a married man 1588, and was buried in the church of St. Mary Major, August 9, 1588.

1584. *Of architecture the first and chiefeest grounds, used in all ancient and famous monuments, published by John Shute, printer and architect. Printed by Thomas Marshe, folio.* Ames found no books that bore the name of John Shute, as printer.

1584. *The temporisour, that is to say, the observer of time, or he that changeth with the time. Compyled in Latin by that excellent clarke, Wolfgangus Musculus, and translated into French by maister Valleran Pulleyn, and out of French into English by R. P. 1555. Imprinted at Edinburgh by Thomas Vautrollier. 1584, 12mo.*

1584. Died, Carolus Sigonius, the author of several esteemed works, was for some time one of the professors of the university of Padua, and obtained a pension from the republic of Venice. He published a spurious work attributed to Cicero. He would never marry; and gave for his reason, that *Minerva and Venus could not live together*. He was born at Modena, in the year 1524.

1584. *The Discoverie of Witchcraft, wherein the lewde dealings of Witches and Witchmongers is notable detected; the knaverie of Conjurors, the impietie of Inchanters, the follie of Sooth-sayers, the impudent falsehood of Couseners, the infidelitie of Atheists, the pestilent practices of Pythinists, the curiositie of Figure-casters, the vanitie of Dreamers, the beggarly art of Alcumystrie, &c. are deciphered.* By Reginald Scott, esq. London, imprinted by William Brome.

WILLIAM BROME carried on printing from 1576, to the year 1591, in which year a work was printed for Joane Brome, widow. She was in business for about five years.

1584. *Alexander and Campaspe. Played beefore the Queenes Majestie on New-yeares Day at Night, by her Majesties Children, and the Children of Paules. By John Lyllie,\* Maister of Artes. Imprinted at London, for Thomas Cadman. 1584.*

1584. *Sappho and Phaon. Played beefore the Queenes Majestie on Shrovetuesday, by her Majesties Children and the Boyes of Paules. By William Lillie, Maister of Arts. Imprinted at London, for Thomas Cadman. 1584.*

1584, July 23. Died JOHN DAY, the most eminent typographer of his time. He was born at Dunwich† in the parish of St. Peter's, in which town he bequeathed a charitable gift. It has been conjectured that he learned the art of printing from Thomas Gibson, because he frequently used one of that printer's devices. He first began business about 1546, "in St. Sepulchre's parishe, at the signe of the Resurrection, a little above Holborn Conduit;" and was for a few years a partner with Wm. Seres. In 1519 he removed to the old city gate called Aldersgate, of which Stow says, "John Daye, stationer, a late famous printer of many good bookes, in our time dwelled in this gate, and builded much upon the wall of the citie, towards the parish church of St. Anne."‡ In Sept. 1552, he had a license for printing the *Catechism*, with the brief of an *A B C*, or primer. On the commencement of queen Mary's persecutions, he for some time suffered imprisonment, in company with John Rogers, one of the first martyrs of that period; but afterwards fled beyond sea. However, he returned in 1556, when he was the first person admitted into the livery of the

\* John Lilly was born in Kent, about 1553, and died in 1600. He wrote a work entitled *Euphues, a Description of different Characters*, and nine dramatic pieces, all of which are scarce. They are entitled *Alexander and Campaspe*, *Endimion*, *Sappho and Phaon*, *Galatea*, *Mydas*, *Mother Bombie*, *Woman in the Moone*, *Maid her Metamorphosis*, and *Love her Metamorphosis*. Eight of these are in the Garrick collection.

† Campaspe sold at Wright's sale for a guinea. In the Garrick collection. *Sappho and Phaon* sold at Wright's sale for one guinea; and at Pearson's for £1 11s. 6d. In the Garrick collection.

‡ Misprinted Dulwich in Dibdin's edition of Ames's *Typographical Antiquities*; where (following Herbert, the former editor) it is also supposed that Day was "descended from a good family buried at Bradley-Parva;" but for "descended from" we should read merely "married into," as will be perceived by the account of his family given on the present occasion. With regard to Day's descent, it would rather seem that it was of foreign origin, if his son Richard had any better reason than caprice for writing his name D'Alje, as he did in the reign of James I.

§ Stow's *Survey*.—Though Day erected new buildings, his presses did not help to keep the old gate in repair; it was rebuilt in 1617.

¶ Fox's *Book of Martyrs*, p. 1356. Rogers detailed to Day his plan for providing the churches throughout the country with Protestant readers, so as wholly to exclude the Popish priests; and it was probably related to Fox by Day himself. The facts of Day's imprisonment and exile have been overlooked by all his biographers; though copied from Fox by Strype; Ames and his followers only saying, "It looks as if he forebore printing during the reign of queen Mary."

\* Wolfgang Musculus died at Berne, in Switzerland, August 30, 1563.

stationers' company after they had received their charter from Philip and Mary.

After the accession of Elizabeth, Day received a large share of the patronage of those labourers in the cause of the Reformation, with whom he had previously suffered; and became one of the principal publishers (to use the modern word,) trading in England, now so conspicuously and permanently Protestant. He was chosen warden of the stationers' company in the years 1564, 1566, 1571, and 1575, and master in 1580. In 1572 he erected a new shop in St. Paul's Church-yard; regarding which, and the important patronage he received from archbishop Parker, some interesting particulars will be found in a letter of that prelate to lord Burghley, dated on Dec. 13 that year, the substance of which is given below. The archbishop was then anxiously engaged in providing suitable replies to the great work of popish polemic, Nicholas Sanders,\* *De Viribili Monarchia Ecclesie*; and, in the same letter he informs his lordship that he had engaged Dr. Clercke, of Cambridge, to assist in that task.† It is well known that at the date of this epistle, and for many years after, English books were almost entirely printed in the type now called black letter; the Roman type was only occasionally used for quotations, &c. and the italic, was still more rarely employed, as may be perceived from the following statement of the archbishop: "To the better accomplishment of this worke and other that shall followe, I have spoken to Daie the printer to cast a new Italian letter, which he is doinge, and it will cost him xl marks; and loth he and other printers be to print anye latten booke, because they will not beare be uttered, and for that Bookes printed in Englande be in suspition abroade." It is noticed by Herbert that the only portion of Clercke's *Responsio* printed in italic, are the quotations; but it is very remarkable, with reference to the clause of Parker's letter "this worke and other

that shall followe," that about this time the archbishop's own work, *De Antiquitate Britannica Ecclesie*, was printed by Day in a type which Mr. Dibdin terms "a full-sized, close, but flowing italic letter." As that great work, however, is dated 1572, and the answers to Sanders appeared in 1573, and the size of the type employed in the former (a folio) may be larger than that of the latter, (which are in quarto) this circumstance may only show the archbishop's partiality for the "Italian" style of printing.\*

Strype, in his *Life of archbishop Parker*, thus speaks of John Day: "And with the archbishop's engravers, we may joyn his printer Day, who printed his *British Antiquities*, and divers other books by his order, and especially such as related to the injunctions and laws of the church, for whom the archbishop had a particular kindness. For as he was a promoter of learning, so, in order to that, of printing too. Day was more ingenious and industrious in his art, and probably richer too, than the rest, and so became envied too by the rest of his fraternity; who hindered what they could the sale of his books; and he had in the year 1572, upon his hands, to the value of two or three thousand pounds worth, a great sum in those days; but living under Aldersgate, an obscure corner of the city, he wanted a good vent for them. Whereupon his friends, who were the learned, procured from the dean and chapter of St. Paul's, a lease of a little shop to be set up in St. Paul's church-yard. Whereupon he got framed a neat handsome shop. It was but little and low, and flat-roofed and leaded like a terrace, railed and posted, fit for men to stand upon in any triumph or show; but could not in any wise hurt and deface the same.‡ This cost him forty or fifty pounds. But *ῥῆσιν δὲ ριζῶν ριζῶν*, his brethren the booksellers envied him, and by their interest got the mayor and aldermen to forbid the setting it up, though they had nothing to do there, but by

\* The writers in defence of the catholic religion, during the reign of Elizabeth, were numerous, among whom the principal were Nicholas Sanders, Thomas Stapleton, William Rainolds, Edmund Campian, Robert Turner, William Allen, Thomas Harding, and Robert Parsons. Nicholas Sanders rendered himself conspicuous on various occasions, by his oratorical abilities, and especially at the council of Trent, but whatever talents he was endowed with, he never can be considered as an impartial historian. Two of his works were more famous than the rest. The first was a treatise on the *Visible Monarchy of the Church*, and the other an account of the *Origin and Progress of Schism in England*, which was so popular that it went through many editions, and was translated into Italian and French.

† The history of this controversy, and of those engaged in it, will be found in Strype's *Life of Parker*, pp. 377 et seq. Such was the obnoxious superintendence of the great minister Burghley, that he received from the archbishop from time to time, portions of Dr. Clercke's book in quires, as they came from the press. In order to complete the printing, other works were laid aside; in particular, it is recorded that bishop Field's *Book of Epigrams* was delayed from February until after Easter. Dr. Clercke's essay was finally published without his name, under the title of *Fidelis cervi subdito infidelis Responso*; and was accompanied or shortly followed by another treatise by George Acworth, LL.D. which, in parody of Sanders's title, was called *De Viribili Reus' Asarchia*. (See the full titles given by Herbert and Dibdin, among Day's books of the year 1573.)

\* For a portion of the above notice of John Day, I am indebted to a very able article communicated to the *Gentleman's Magazine* by J. G. N. inserted in the number for November, 1831.—EDIR.

† This shop is mentioned in the imprints of four several books printed by Day in 1578, but not in any other year. The imprint of *The Governance of Vertue*, 1578, is thus minutely conceived: Printed at London by John Day, dwelling over Aldersgate, beneath Saint Martins; and are to be sold at his long shop at the North-west dore of Pauls. In the next year, however, whether the St. Paul's shop was given up or no, we read instead, "and sold at his shop under the gate." The imprints do not bear Herbert out in his assertion that Day "kept at the same time several shops in different parts of the town," for more than two cannot be traced at any one period.

‡ It will be readily imagined how much the erection of shops and small houses against St. Paul's, tended both to deface and dilapidate the edifice. A zealous promoter of the repairs in the reign of James I. had a painting made of the cathedral, stuck over with mottoes, one of which was

Viewe, O King, how my wall-creeper  
Have made mee worke for chimney-sweepers.

The same painting shows, also, how the shops were converted into stands for spectators on occasion of a procession. It is in the possession of the Society of Antiquaries; one portion of which is engraved in *Wilkinson's London Illustrated*, and another in Nichol's *Progresses of King James the First*.

power. Upon this the archbishop brought his business before the treasurer, and interceded for him, that he would move the queen to set her hand to certain letters, that he had drawn up in the queen's name to the city, in effect that Day might be permitted to go forward with his building. Whereby, he said, his honour would deserve well of Christ's church, and of the prince and state. "The archbishop also made another thing serve his turn as a seasonable argument, which was, that but lately the queen's privy council had wrote to him, and the other ecclesiastical commissioners, to help Day; perhaps in vending his books, and encouraging those of the clergy to buy them." In September, 1552, Day obtained a license to print king Edward the Sixth's Catechism in Latin and English; but as this militated against the privilege granted to Wolfe, *vide ante*, page 353, he seems to have applied for redress to Cecil, lord Burleigh, in whose papers occurs the following memorandum relative to this affair. "Item, that whereas one Day hath a privilege for the Catechisme, and one Reyne Wolfe, who hath a former privilege for Latin books, they may joyne in printing of the sayd Catechisme." The conclusion was, that Wolfe was entitled to print it in Latin, whilst Day was confined to the English translation, for which another confirmatory license was issued, bearing date the 25th of March, 1553, wherein he is allowed to print a brief A, B, C, annexed to the Catechisme. He also enjoyed the printing and reprinting of all the works of John Ponet, bishop of Winchester, and of the famous Thomas Becon, Professor of Theology; and a patent dated the 2nd of June, 1568, gives him the power of printing the *Psalms of David in Metre*. This was renewed on the 26th of August, 1579, to him and to his son Richard Day, for their joint and separate lives.

An honour of much greater importance in the annals of type-founding, belongs to the memory of John Day. He was the first, and in 1574, the only printer who had cut Saxon characters. This is recorded by archbishop Parker himself,\* in his preface to *Ælfredi Regis Res Gestæ*, printed in 1574 together with Walsingham's *Ypodigma Neustria*: but the types had then been used for three former works,—for a Saxon homily edited by the archbishop, under the title of *A Testimonie of Antiquitie*, &c. in 1567; for Lambard's *Archaionomia*, in 1568; and for the *Saxon Gospels* edited by Fox, under the patronage of Parker, in 1571.

The *Ælfredi Regis Res Gestæ*, [ab Asser.] is entitled to particular notice, since it is the earliest collection of our national history, printed in England; its contents, moreover are intrinsically

valuable and important to the antiquary. For if every other claim were waved, this work must be regarded as an object of peculiar interest, if only on the ground of that precedence to which it is entitled before any other collection of British historians. The following description is taken from the *Bibliographical and Retrospective Miscellany*. In the centre of a rich and elaborate wood-cut title, we read,

#### ÆLFREDI RE-GIS RES GESTÆ.

These words surmount a portrait, intended, we presume, to present king Alfred; the following lines are in a compartment beneath:

*Nobilitas innata tibi probitas honorem,  
Armipotens Ælfredi dedit, probitas laborem,  
Perpetuans labor nomen: cui misit dolori  
Gnadia semper erant; spes semper misto timori.*

The volume begins with four leaves; ¶ "Prefatio ad Lectorem," then one blank. The work, which is in the Saxon character,\* consisting of forty pages, immediately follows, after which are four other leaves, *This is the Preface how S. Gregory this book made*, in Saxon, with an interlineary English translation, and afterwards the same preface in Latin; it must be recollected, that the body of the work *alone* is pagged, the other leaves, both at the commencement and the termination, are *not* numbered. Dr. Dibdin observes, that this is one of the rarest and most important volumes which ever issued from the press of Day, and exhibits another splendid monument of the noble spirit of patronage of archbishop Parker; for there is every reason to think that he sustained the cost of the publication.

In addition to his Saxon and Italian types, Herbert states that Day brought the Greek to a very great perfection. "Day seems indeed," remarks Dr. Dibdin, while speaking of this subject, "to have been (if we except Grafton) the Platin of old English typographers; while his character and reputation scarcely suffer diminution from a comparison with those of his illustrious contemporary just mentioned." He made a multitude of mathematical schemes, maps, and other devices, both in wood and metal; his own head and arms, with other people's, and whatever tended to the usefulness and beauty of his works." When the Puritanic *Admonition to the Parliament* (in which the government of the English church, bishops, &c. were attacked with great severity) first appeared, a very close search was made for the printers of it, in which "Day the printer, and Toye the bookbinder," were engaged with a pursuivant and other officers by appointment of the bench of bishops. Several were found and examined, one of whom was

\* Jam vero cum Dayus typographus primus (et omnium certe quod sciam solus) has formas neri incididit, facile quæ Saxonice literis perscripta sunt, illisem typis divulgabantur."

† In the library of Trinity Hall, Cambridge, the three treatises of *Ælfredi Regis Res Gestæ*. *Historia Brevis Thomæ Walsingham*, and *Ypodigma Neustria Per Thomam De Walsingham*, are found bound together; and formerly the archbishop Parker's own copy.

\* Strype informs us that this work was printed from an original manuscript, "to a word," and that the archbishop delayed the publication, "of which there had been great expectation among the learned," owing to his care in correcting, printing, and having a few presentation copies bound, "wherein he was very curious."—*Life of Parker*, pp. 471, 529.

named Asplin, perhaps that Thomas Asplin,\* who became apprentice to Day, from the Annunciation of 1566, for eight years, since he was set at liberty, and was received into Day's house, where, however, he attempted to assassinate his benefactor, his wife, and some others of his family. On the 8th of January, 1583, he gave up to the disposal of the company and the benefit of the poor, his right to certain books and copies which were his property.

In "a note of the offices, and other special licences for printing, graunted by her Ma<sup>ty</sup> to diu'se p'sons, with coniecture of the valuation," written for lord Burghley by Christopher Barker, the queen's English printer, in December, 1582, is this account of†

Mr. Daye. In the priuiledge, or private licence graunted to Mr. Daye, are among other things the Psalmes in meeter, w<sup>ch</sup> notes to sing them in the churches, as well in foure p'ts, as in playne songe, w<sup>ch</sup> being a parcell of the church service, prop'ly belongeth to me. This booke being occupied of all sortes of men, women, and children, and requiring no great stock for the furnyshing thereof, is therefore gaynefull. The small catechisme alone, taught to all ltytle children of this realme, is taken oute of the Booke of Com'on Prayer, and belongeth to me also, w<sup>ch</sup> Mr. Jugege solde to Mr. Daye, and is likewise included in this patent procured by the right honorable the earl of Leicester, and therefore for duties sake I hold my self content therewith. This is also a profitable copie, for that it is generall, and not greatlie chargeable."

In a complaint from the printers and stationers in general of the "priviledges lately granted" to several persons enumerated, the date of which is either 1582 or 1583, occurs

"John Daye, the printinge of A B C and Catechismes, w<sup>ch</sup> the sole selling of them, by the collo, of a com'ission. These booke weare the onelie releif of the porest sort of that companie." We have before seen, however, that this property had been Day's from the time of Edward VI.

After having followed the profession with zeal, ability, and reputation, for forty years, he died at Walden, in Essex, and "was buried in the parish church of Bradley-Parva, in the county of Suffolk, where, against the north wall of the chancel, is a stone table, fixed to his memory, on which is inlaid in brass the effigies of a man and woman, kneeling against a table, before which are two children in swaddling clothes, and behind the man, six sons, and behind the woman, five daughters, all kneeling. On the top of the stone are three escutcheons on brass plates, under which is cut, in capital letters, MIHI VITA CŒLIVS. Under the two effigies of Day and

his wife, are the following verses, cut in the old English letter: from the fifth and sixth of which verses it should seem to be intimated (according to Granger) that Fox undertook the laborious work of *Acts and Monuments*, at his instance—

Here lyes the Daye, that darkness could not blind,  
When popple fogges had overcaste the sunne,  
This Daye the croell nighte did leave behind,  
To view, and shew what bloddi actes were donne.  
He set a Fox to wright how martyrs ranne,  
By death to lyfe. Fox ventured paynes and health,  
To give them light: Daye spent in print his wealth.  
But God with gayne returned his wealth agayne,  
And gave to him as he gave to the poore.  
Two wyves he had, pertakers of his payne,  
Each wyfe twelve babes, and each of them one more:  
Als (i.e. Alice) was the last increaser of his store,  
Who mourning long for being left alone,  
Set up this tombe, herself turn'd to a stone.\*  
Obilt 23 July, 1584.

John Fox, whose name is so prominently introduced into his epitaph, was evidently one of the principal purveyors for his press; his name occurring frequently as an editor. Of the *Acts and Monuments*, Day printed four folio editions, in 1562, 1570, 1576, and 1583; and his son Richard another in 1596. Of the first edition Dr. Dibdin has given a very full account, with several specimens of the ably executed cuts.

Anthony a Wood, in his *Life of Fox*, states that when at Basil he was "a most painful labourer at his pen in the house of Oporinus, a learned printer;" and that after his return to London, where he was very bountifully entertained in the duke of Norfolk's "manor place, called Christ Church," "from that house he travelled weekly, every Monday, to the house of John Day, the printer, to consummate his *Acts and Monuments of the Church*, and other works in English and Latin."† To the liberality of Day we are indebted for the first publication of Fox's *Book of Martyrs*, of which he himself printed many editions. It was published *Cum privilegio reg. majest.* 1562, and is alluded to in the 5th and 6th lines of the verses upon his monumental tablet.

The following contemporary "squib" against Day and Fox, was communicated to Dr. Dibdin by Dr. Bliss, from a blank leaf at the end of a manuscript of the *Pricke of Conscience*, in the Bodleian library:

The grave counsell of Gravesend barge  
Geveth Jhon Daye a priviledge large,  
To put this in prynt for his gaynes;  
Because in the *Legend of Lyes* he taketh paynes;  
Commandinge other upon payne of slavery  
That none prynt thys hist *Jhon Daye*  
the prynter of *Fore his Martyre*.

Dr. Dibdin has copied two of the portraits of Day, which occur in some of his works, and

\* Herbert has noted, from the books of the stationers' company, that one Thomas Asplin was bound apprentice to Mr. Day, from the Annunciation, 1566, for eight years; and that one Robert Asplin, apprentice to Edward Sutton, was made free, October 5th, 1579.

† From the Burghley manuscripts, (Lansdowne collection, British Museum,) xlviii. 88. A curious document, which Mr. Ellis some years ago introduced to the notice of the society of antiquaries.

\* Herbert presumes that she was remarried to a person named Stone.

† One of them is very finely executed; the orthography of the inscription proves it to be the work of a foreign artist: LIFE IS DEATH, and DEATH IS LIFE: ATATIS SUÆ XXX. 1562. I. D. The portrait of John Day, is perhaps the earliest of our ancient printers, which can be depended upon as genuine. The first appeared in the *Elements of Geometry* of the most ancient Philosopher *Euclide* of Megara, 1479, folio; but the original wood cut bears the date of 1562.

also his mark, the design of which is well conceived; the sun is represented rising, and a boy awakens his sleeping companions, saying, "ARISE, FOR IT IS DAY;" which is evidently a pun upon his name, a custom to which the ancient printers were much attached; but besides the mere play upon the word, it certainly alluded to the day of Protestant reformation, which had been rapidly brought forward by the aid of printing.

The sign of Day's first shop, in Sepulchre's parish,—the Resurrection,—has been supposed to have had a similar allusion.

Two hundred and forty-five works bear the imprint of this truly eminent typographer; and the long descriptive list of his productions occupies pp. 616-680 of Herbert's *Ames*, and pp. 48-177 of the fourth volume of Dibdin's edition.

The principal particulars known of Day's family history have been derived from the above epitaph. He married two wives, and had by each thirteen children. The name of his first wife is not recorded. The second was a gentleman of the name of Lehunt, entitled to bear six quarterings in her shield. He bore for his armorial ensign, ermine, on a fesse indented (azure) two eaglets displayed, (argent); and for a crest a demi-eagle displayed rising out of a ducal coronet.

Of John Day's twenty-six children the name of only four are known. The burial of one, and his own interment, are thus recorded in Bradley Parva register:

1551. Bartholomew the sonne of John Day, gent. buried the 6 of May.

1584. John's Day, gent. in ..... Waldenensis in Essex xliii July, sepultus tamen in ..... de Bradley, 2 Aug.

RICHARD DAY was elected from Eton college in the year 1571, to king's college, Cambridge, where he assumed the degree of M.A. and became Fellow. He was for some time engaged in the printing business, and was perhaps made free of the stationers' company by his father's copy, since he was called on the livery on the 30th of June, 1578; but he does not appear to have served any office, and an apprentice which he took in June, 1580, was rebound to Garrat Dewee for nine years, in July, 1581. His residence was at his father's house in Aldersgate, but he had also "the long shop" at the west end of St. Paul's church yard, bearing the sign of the three lilies growing from one stalk in the midst of thorns, with the motto *Sicut Lilium inter Spinæ*, i. e. as the Lily among thorns, taken from Can-

ticles, chap. ii. v. 2. according to the vulgate translation. This sign and motto he used as a device. There does not appear to have been any work printed by Richard Day after the year 1581; and Herbert imagines, that as he then turned over his apprentice, he left the business, and assigned his patent copies to others, and succeeded John Fox as minister at Riegate, in Surry. His literary works consist of the following:—A copy of Latin verses *Contra Papistas incendiarios*, attached to Fox's *Martyrology*, Edit. 1576: a translation of Fox's book *De Christo triumphante Comedia*, with a preface and two dedications of the volume, printed in different editions, one of which he signs "Rich: A'tje" a preface to, and perhaps the translations of the *Testaments of xii Patriarchs*; a Latin preface to Peter Baron's treatise *De Fide*, and he was probably the author of other similar works. As a printer his name appears to only three works; and twelve books were printed by various persons for the assigns of Richard Day. These works are all of a religious character.

John Day, another son, born "near or over Aldersgate," about 1568, was also a learned scholar and author, and Fellow of Oriel college, Oxford. He was presented by sir William Soame, to whom he was related, to the vicarage of Great Thurlow, where he died in 1627. See Wood's *Athene Oxoniensis*, (edit. Bliss) vol. ii. coll. 412.

A fourth brother was Lionel Day, fellow of Baliol college, and rector of Whichford, in Warwickshire, where he died 1640, aged 70. He published a *Concio ad Clerum*. Wood's *Fasti*, vol. i. coll. 376.)

1584. *The Arraygment of Paris. Presented before the Queenes Majesties, by the children of her chappell. Imprinted at London, by Henry March, anno 1584.* This piece has been attributed to Shakespeare; but its real author was George Peele.—*Below.*

1584. *A right excellent and Famous Comædy, called the Three Ladies of London. Wherein is notably declared and set forth how, by the means of lucre, Love and Conscience is so corrupted, that the one is married to Dissimulation, the other fraught with all abomination. A perfect patterne for all estates to look into, and a work right worthy to be marked. Written by W. R. As it hath been publicquely played. At London, printed by Royer Warde, dwelling neer Holburne Conduit, at the sign of the Talbot. 1584.*

1584. The following is a curious fact, regarding the state of the roads in England at this period; and that although officers were appointed, they could not effectually annihilate these "detestable malefacts," as they were called; for, amongst the records of the drapers' company, at Shrewsbury, there is the following minute: "25 Elizabeth, anno 1583. Ordered, That no draper set out for Oswestry market, on Mondays, before six o'clock in the morning, on forfeiture of 6s. 8d.; and that they wear their weapons all the way, and go in company. Not to go over the Welsh bridge before the bell toll six." It is further stated, that "William Jones, esq. left to

the said company £1 6s. 8d. to be paid annually to the vicar of St. Alkmunds, reading prayers on Monday mornings, before the drapers set out for Oswestry market."

1584, June. Died, HULDRIC FUGGER,\* an eminent patron of literary men, and a great promoter of the art of printing. He was born at Augsburg, in Germany, in the year 1526, and sprung from a family conspicuous both for its antiquity and wealth. For a time, he discharged the office of chamberlain to pope Paul III. but afterwards became a protestant; was himself learned, and expended extraordinary sums in the purchase of manuscripts of ancient authors, and causing them to be printed. In 1558, Henry Stephens the second, assumed the appellation of *Typographus illustris viri Huldrici Fuggeri, Domini in Kirchperg, & Weyassenhorn*.† It is highly probable that Henry Stephens was indebted for this distinction, on the recommendation of Henry Scrimger,‡ a Scotch professor, of considerable erudition, with whom he was connected by friendship and literary intercourse. Huldric Fugger assigned to Henry Stephens an annual gratuity, which some accounts have estimated at the sum of fifty gold crowns; but how long our printer had the good fortune to enjoy this pension, it does not distinctly appear. It is recorded that the family of Huldric, offended at

the excess to which he carried his passion for collecting manuscripts and books, and his patronage of letters, at length instituted a legal process, and caused him to be declared incapable of the administration of his own property. Some accounts have stated that this sentence produced a melancholy, which accelerated his death; but according to M. Bayle, his epitaph says that he was unshaken by this rude blow, and that he also recovered possession of his property, and inherited the succession of his brother. He had retired to Heidelberg, and there died at the age of fifty-eight years, bequeathing to the palatinate his fine library, and perpetuating his own memory by various literary and charitable foundations. He purchased the library of Achilles Gassarus, whom Melchior Adam describes as a *verus helluo librorum*. *Vit. Medicor.* page 234.

Huldric Fugger was not the first of his family who collected a magnificent library; for the author last cited relates, that Hieronymus Wolfius having gone to Augsburg, was there kindly received by Antonius Fugger, and that to his care was entrusted the celebrated "Bibliotheca" of Joannes Fugger, an elder brother of Huldric, who was also a distinguished votary of literature.

The learned Fregius, in the preface to his *Questiones Justinianae*, describes this library as abounding not only in elegantly printed works, but in manuscripts; Greek more especially; which were gratuitously permitted to the inspection of visitors: "but" he adds, "though every thing is admirable, yet nothing is more the subject of admiration than Wolfius himself, the host and very soul as it were of this repository, who like a kind of living library, has treasured up in his own memory the various erudition dispersed through the shelves of this noble edifice." He then describes the extraordinary magnificence of their city residence, its outward decorations, interior furniture and splendour, its delightful gardens, its pictures and works of art; its *mensa tessellata ex porphyretico marmore*, decorated with a profusion of gems of the most precious kind; its *Imperatorum primorum imagines trederim*, brought from Italy, and there purchased at a vast expense; exquisite statues, marbles, and other monuments of genuine antiquity, denoting opulence and a taste for magnificence, scarcely exceeded by the Medicean family of Florence. Such was the account of the Fuggers of Augsburg, given by Fregius in 1578. Charles V. when in 1548, he changed the government at Augsburg, highly distinguished this family, advancing them to the dignity of barons, and their descendants retained the same rank, and in subsequent times became connected by marriage with some of the most illustrious houses of Germany. No less than ten individuals of this munificent family are noticed by Freherus, in his *Theatrum Virorum clariorum*. Bayle mentions a German work, published in 1620, containing 110 portraits of the various members of it, male and female, with a short notice respecting each. The first therein mentioned is Jacques Fugger, "called the elder," who died in 1469.

\* The name appears greatly diversified: Murer terms them *Fouchers*; Rabelais, *les Fouchers d'Auxbourg*; his annotator, *la famille des Fouchers, ou Fuggers*. They were very distinguished merchants of Augsburg, says M. Bayle.

† The earliest work which exhibits Henry Stephens under the designation of *illustris viri Huldrici Fuggeri Typographus*, appeared in 1558, entitled *Imperatorum Justinianae, Justiniani, Leonis, Novellae Constitutiones; Justiniani Edicta, Graece*; fol. This work was prepared for the press by Henry Scrimger; who in his capacity of editor, inscribed it to his patron Ulrich or Huldric Fugger.

‡ Henry Scrimger was descended from one of the first families of Scotland. He was born at Dundee, in 1506, and was educated in the grammar school of his native town, and afterwards at St. Andrew's. He travelled through various parts of Europe, and formed acquaintances with the learned of every country. He settled at Geneva, where he taught philosophy; but was soon afterwards invited by Ulrich Fugger to reside with him at Augsburg, and continued for many years employed chiefly in collecting books and manuscripts under the patronage of his benefactor.

The only work which Scrimger appears to have published, besides the *History of Francisus Spira*, a notorious apostate, of whose extraordinary case he wrote a narrative, was an edition of the *Novellae Constitutiones* of Justinian, in Greek; a work which was highly prized by the first lawyers of the time.

The testimonies to Scrimger's worth and merits, by his contemporaries, are numerous. Thuanus, Casaubon, and Stephens, with many others, mention his name with the highest encomiums. Dempster says he was a man indefatigable in his reading, of a most exquisite judgment, and without the smallest particle of vain glory. And the great Cujanus was accustomed to say, that he never parted from the company of Henry Scrimger, without having learned something that he never knew before. Scrimger returned to Geneva, where he died, at the end of 1573 or the beginning of 1573.

His library, which was one of the most valuable in Europe, he left by testament to his nephew, Peter Young, who was Buchanan's assistant in the education of James VI., and it was brought over to Scotland by the testator's brother, Alexander Scrimger, in the year 1573. Besides many valuable books, this library contained manuscripts of great value; but Young was not a very enthusiastic scholar; and as he was more intent upon advancing his personal interests in the world, and aggrandizing his family, than forwarding the progress of knowledge, they probably came to but small account.

1585. EDMUND BOLLIFANT and JOHN JACKSON were in partnership, and dwelt in Eliot's court, in the Little Old Bailey; they used a print of Abraham and Isaac walking, with this motto, *deus providebit*, (Gen. xxii.) Their first book is dated 1585, in which year they printed an edition of *Aesop's fables in tru orthography, with grammer notz*. Her-unto ar also cooined the shorte sentences of the wyz Cato, imprinted with lyke form and order: both of which authorz ar translated out of Latin intoo English, by William Bulloker. 12mo. To which is added the following lines:—

Goe God the prais  
That teachen al walk.  
When truth trieth  
Error sleth.

In the following year appeared from the press of Bollifant and Jackson, William Bulloker's pamphlet for grammer, 12mo. And Levinus Lemnius his herball of the bible. 8vo.

1585. ROBERT ROBISON, ROBERTSON, or ROB-INSON, dwelt in Fleet lane, and as appears from a book in 8vo. called *An abridgment of the laws*, in Fewter lane, near Holbourn. In 1586, he printed the following, on a half sheet:—

*A proper newe sonet, declaring the lamentation of Beckles, a market towne in Suffolke, which was in the great winde, vpon S. Andrewes eve last past, most pittifully burned with fire, to the losse by estimation 20,000l. and upwarde, and the number of fourscore dwelling houses.* To Wilson's tune. In 14 eight line verses. For Nicholas Colm of Norwich in St. Andrew's.

Robert Robison continued in business from 1585 to 1597, and printed fifteen works.

1585. THOMAS LUST printed the *Treasury of Health*, &c. translated by Humphry Lloyd, 8vo.

1585. WALTER VENGE lived in Fleet-lane, opposite the Maiden-head, where he printed a very curious work, called the *Mathematical Jewel*, &c. by John Blagrave, of Reading, gent. and well willer to the mathematics, who hath cut all the prints, or pictures, of the whole work with his own hands. This book is printed in a neat roman type, contains 124 pages, and is dedicated to sir William Cecil, lord high treasurer of England. In an edition of this book, in Ashmole's museum, is written concerning Blagrave, the wood cutter, as follows:

Here stands Mr. Gray master of this house,  
And his poor cat, playing with a mouse.

John Blagrave married this Grayes widdow, (she was a Hungerford.) This John was symple, had yssue by this widdowe. 1. Anthony, who married Jane Borlass. 2. John, the author of this booke. 3. Alexander, the excellent chess player in England. Anthony had sir John Blagrave, knight, who caused his teeth to be all drawn out, and after had a sett of ivory teeth in agayne.—Ames.

1585. In the booke of accounts of the churchwardens of Arundel, in the county of Sussex, and diocese of Canterbury, is the following entry:—*Paid for lack of a bible, at Canterbury, 1s. 3d.*

1585. Robert Dudley, earl of Leicester, chancellor of the university of Oxford, erected at his own expence a new printing press, for the use of the university. The first book printed at it, was one written and published by John Case, fellow of St. John's college, with the following title:—*Speculum moralium quaestionum in universam ethicam Aristotelis*, 1585, 4to. which he dedicated to the chancellor. This work was executed by Joseph Barnes, who had been appointed printer to the university, and who continued to practice the art until the year 1617.

1585, July 29. King James VI. of Scotland, obtained an act of parliament on this day, against any books being imported into Scotland, containing doctrine, and also that the sellers, and dispersers of erroneous books, should be punished, and the books destroyed.

1585. The first publication on the subject of poetry, is found in a most rare volume, which contains tracts written by king James VI. of Scotland, entitled the *Essays of a prentise in the divine art of poeie*.\* printed at Edinburgh by Thomas Vautrollier, 1585, 4to. *Cum privilegio regali*. containing Q sheets.

In 1591, Robert Waldegrave, printed *His Majesties (King James of Scotland) Poeticall Exercises at vacant houres*.† Edinburgh. 4to.

1585, Oct. 29. The first of the annual exhibitions of the lord mayor of London, known to have been published, was written by George Peele, for the inauguration of sir Wolston Dixie, knight. The printed descriptions of these processions are usually entitled *triumpha*, though they are more commonly called the *London Pageants*. All of them are scarce, and some of them are of such extreme rarity as to bear a price at the rate of two or three guineas a leaf.

1586. Jan. Died, JOHN WALLY an eminent printer of London, whose dwelling was in Foster-lane, at the sign of the Hartshorn. All that has hitherto been collected of this printer is, that he was one of the original members of the stationers' company before they had their charter; and served renter, or collector of the quarterages, from 1534 to 1557, when he was chosen under-warden. He was upper warden in 1564, and again in 1569. He rented a chamber in the company's hall, for which he paid xij.s. iij.d. a year, in 1557; but in 1561, xx.s. In 1558, he was fined ij.s. viij.d. for keeping open shop, and selling books on a festival day. Again, in 1564, for keeping open shop on St. Luke's day, with 18 others, xvj.s. viii.d. On Jan. 28, 1582-3, he was fined 13s. 4d. for employing Jno. Charlewood, to print the *Book of Presidents* for him. He had license for printing: viz. from July, 1557, to July, 1558, *Welth and Helth, The Frere and the boye*. *Stans puer ad mensam*. Youghte,

\* King James VI. was born June 19, 1566, in the castle of Edinburgh, and consequently he was only nineteen years of age when he produced this work.

† King James's *Poeticall Exercises*, first edition, rare. Edinburgh: printed by Waldegrave, no date, 4to. was sold at archdeacon Nares's sale, 1821, for 2s.

*Charyte, and Humlyte. An a b c for cheldren, in Engleshe, with sylables. An hundreth mery tales:—the waye of God. The cronacle of yeres, in xvj.* 'Also sundry ballades with Mrs. Toy, vide ante, page 324, 1556-60. *'Esopes fables in Engleshe. The Shipman's Calendar.'* 1562-63. 'An almanacke and prognostication of John Securus, for the year 1563—of Nostradamus, for this year Anno 1562. *'The Latency in Welshe.'* 1564-65. 'An Almanacke for xliij years from 1565.' 1565-66. 'An Almanacke and prognostication of Mr. Buckmaster.' 1566-67. 'The seconde well a daye. The Lamentynge of a younge made, who by grace ys fully stayde.' 1567-68. 'Taverners postell upon the Gospelles. An almanacke and prognostication of Mychell Nostradamus for 1568.' Aug. 3, 1579. 'The second booke of Robyn Conscience.' Octo. 6, 1580, 'iij balads: The Lord of lorne and the false steward. Of going to market to buy the child shoes. Of this sillie poore man.' See other copies, declared to have been his, under his son Robert, to whom they were accordingly allowed. In 1568, his son John (as entered in the company's register) was made free by patrimony; but (adds Herbert,) as I find no farther mention of his name, I suppose it to be a mistake for his son Robert, of whom see hereafter. Mr. John Walley, for so he signed his name, died in the beginning of 1586, as appears by the following memorandum. '27 Janij. 1586.—this day there was distributed in the hall to the poore of the companie, of the gifte and legacie of John Walley, staconner deceased the some of Fyftie shillings by Agnes Walley executrix of his testament by thandes of Robert Walley his soune according to the said testator's testament.' This day of the distribution thereof being the first and next quarter day after the decease of the said John Walley.

John Walley printed the very entertaining romance of *Syr Eglamour of Artoys*. In the title page is a knight in complete armour, on horseback, and at full speed. His dog is running by his side. At the end is, Imprinted at London, in Foster-lane, at the sygne of the Harteshorne, by John Walley. In the Garrick collection.

ROBERT WALLEY, the son of the foregoing, whom Herbert observes, was made free by patrimony, in Aug. 1568, but entered in the company's register, by mistake, under the name of John. However that be, he bound an apprentice in 1576; and was brought on the livery in 1585. He served renter in 1592. In 1594 he was taken into the court of assistants; so that probably he was fined for warden. Next year he was one of the three members who were annually appointed to dine at the lord mayor's feast, in Guildhall. His father seems to have quitted the trade to him in 1576. In 1576. *The Roche of Regard, divided into foure partes*, 4to. by George Whetstone, gent. was printed for him. July 21, 1577, he had a reversionary license from the company for printing a book entitled, *An abstract of all the penall statutes, &c.* after the death of Raffe

Newberye, who was not to enjoy it till after the death of Richard Tottell. He had license also for printing solely the following books: Feb. 20, 1577-8. *Cometographia quædam Lucis Aciri Lampadis quæ 10 die Nouemb. apparuit anno a Vergineo partu 1577—exceudebat Robertus Walley* 1578, 4to. Mar. 6, 1580-1, *Articles to be enquired, with D. Squiers visitation.* May 4, *A true report of the strange conynge and breedinge of myse in the marshes of Dengie hundred, in Essex.* April 23, 1582, *A lat practise enterprised by a papist with a younge maide in Wales, taken amongst Catholikis for a prophetis.* Septemb. 14, *A booke of Engins for the destruction of vermyne, Crones, and Sparrowes, gouvernement of Oxen, kyen, Calues, horse, shepe, hogis, mowles, and doggis.* Decemb. 7, 1584, *The difference betwene the Auncient phisicke friste taughte by the godly fathers, consistinge in wite, peace and concord; And the latter phisicke proceeding from Idolatrie, &c.* Septemb. 4, 1586, jointly with John Charlewood. *A discourse of Englishe poetrye.* March 22, 1586-7. *The pathway to Militarie practise, with a kalender for the synbattelling of men, newly written by Barnabie Riche.* March 1, 1590-1. *Allowed unto him these copies which were his fathers, viz. The Shepherdis Calender. Calo: Eng. and Latyn. The proverbs of Solomon English. Salust, et bellum Jugurthium. Mr. Graftons computation. Esopes fables: Eng. Josephus, de bello Judico: Eng. Robyn Conscience.* The 12th of October following, he assigned all of his copies to Thomas Adams. It does not appear that he printed himself, seeing most of his copies that have been found were printed for him.

1586. A *Polyglott Bible* was published at Heidelberg, in two volumes, folio; printed in four columns, Hebrew, Greek, and two Latin versions, viz. St. Jerom's and those of Pagninus; with the notes of Vatablus; and in the margin are the idioms, and the radices of all the difficult words. Two other dates have been seen to this edition, viz. 1599 and 1616; but Le Long, after an attentive comparison, declares them to be only different copies of the same impression; but that some of them have the Greek Testament, with the addition of the Latin version of Arias Montanus.

1586. One of the scarcest books in the circle of English literature\* is entitled, *A Discourse of English Poetrie*, together with the author's judgment, touching the reformation of our English verse, by William Webbe, Graduate. Imprinted at London, by John Charlewood, for Robert Walley, 1586, 4to. black letter. Dedicated "to the right worshipfull, learned, and most gentle gentleman, my verie good master, Ma. Edward Sullard, Esq. W. W. wysbeth his harts desire."

\* Two copies are all that are known of this rare book; one was sold at major Pearson's sale to George Stevens, Esq. for £3 5s., and at Mr. Steven's sale it was purchased for the duke of Roxburgh for £8 8s., at whose sale it was sold for £64. At the sale of Craven Ord, Esq. 1830, a copy was sold for £10 15s.

1586. Printing introduced into the city of LIMA,\* in South America. Isaac Thomas, the historian of American typography, believes the art of printing to have been exercised here so early as the year 1590, probably introduced by the Jesuits, who possessed two establishments in Lima. If, however, the catalogue of the library of M. Langles be correct, a still earlier date may be assigned to the introduction of printing into this place; since it mentions a *Vocabulario en la lengua general del Peru llamada Quichua y en la lengua espanola: en los Reyes, Richardo*. 1686, 8vo. Vater, in his *Index linguarum*, cites the same book, so that probably the description is correct.

Antonio, in his *Bibliotheca Hispana* notices upwards of thirty works from the Lima presses, the earliest of which is dated 1603. Ribadeneira, in his *History of the Jesuit Writers*, mentions five or six Lima editions, the earliest of which bears the date of 1606. From 1603 down to 1666, the last year noticed by Antonio, the presses of this city appear to have been almost constantly at work. Some few Lima books are to be found in the Bodleian library.—*Cotton*.

This year was remarkable for the introduction of tobacco† into England by Master Ralph Lane, the commander of Raleigh's‡ Virginian colony; that which sir John Hawkins carried home in 1665, was considered a medicinal drug merely; and, as Stow observes, *all men wondered what it meant*.

\* The city of Lima was founded by Francis Pizarro, on the feast of the Epiphany, January, 1535; he also built the commercial town of Truxillo in the same year. In 1535, Pizarro discovered Peru, where he inhumanly massacred the Inca Atahualpa to be burnt alive, in 1533. "With a temper of mind no less daring than the constitution of his body was robust, he was foremost in every danger, patient under the greatest hardships, and unsubdued by any fatigue. Though so illiterate that he could not even read, he was soon considered as a man formed to command. Every operation committed to his conduct proved successful, as by a happy, but rare conjunction, he united perseverance with ardour, and was as cautious in executing, as he was bold in forming his plans. By engaging early in active life, without any resources but his own talents and industry, and by depending on himself alone in his struggles to emerge from obscurity, he acquired such a thorough knowledge of affairs, and of men, that he was fitted to assume a superior part in conducting the former and in governing the latter. He had acquired immense wealth during his voyages with Diego Almagro; but a difference arose between the conquerors, and Pizarro was assassinated by the friends of Almagro, on the 26th of June, 1541.

† Tobacco is the dried leaves of the Nicotiana tabacum, a plant indigenous to America, but extensively cultivated in the old world. In 1652 an act was passed prohibiting its growth in England, which was confirmed at the restoration in 1660. The duty in 1789 was 1s. 3d. per pound, the annual consumption being about 11,500,000 pounds; in 1806, the duty was 2s. 2d., the consumption about 17,500,000; in 1815 the duty increased to 3s. 2d.; and again, in 1819, to 4s. per pound; in 1825 it was reduced to 3s., the annual consumption being 18,670,604 pounds, yielding a revenue of £3,254,906 0s. 2d. The present amount of duty is, from British possessions in America, 2s. 9d., otherwise 3s.; cigars, 6s.; and snuff, 6s. per pound. In 1836, the quantity of tobacco entered for home consumption was 22,116,759 pounds, the duty on which amounted to £3,254,459 1s. 5d.

‡ To sir Walter Raleigh we have not been indebted solely for the luxury of the tobacco plant; but for that infinitely useful root, which forms a part of our daily meal, and often the entire meal of the poor man—the potato, which says D'Israeli, deserved to have been called a *Raleigh*. For an account of his death, see 1618, post.

In the two *Centuries of Epigrams*, written by John Heath, Bachelor of Arts, and Fellow of New college, Oxford, and printed at London by John Windet, 1610, is the following epigram,

#### TOBACCO.

We buy the driest wood that we can finde,  
And willingly would leave the smoke behinde;  
But in tobacco a thwart course we take,  
Buying the hearth onely for the smokes sake.

1586. The first Greek publication from the Oxford press appears to have been some Homilies of St. Chrysostom.

1586, Oct. 17. This day is memorable for the death of SIR PHILIP SIDNEY, who, owing to his singular accomplishments and amiable qualities, was the most admired and popular man of his times; he was equally celebrated as a poet, a patron of literature, as a soldier, and a gentleman. He was born at Penshurst, in Kent, Nov. 29, 1554, and at an early age introduced at the court of Elizabeth, who in 1576, appointed him ambassador to the emperor Rodolphus, and at that court he contracted an intimacy with the famous don John of Austria. On account of his declaring his sentiments too freely against the queen's marriage with the duke of Anjou, in 1580, he retired from court, and in his retreat wrote his celebrated allegorical prose romance called *Arcadia*, which though now held as dull and antiquated, was the favourite light reading of the ladies of Elizabeth's court. On Sunday, January 6, 1583, he received the honour of knighthood, and in 1585 was appointed governor of Flushing, and general of the horse sent to the assistance of the United Provinces. At the early age of thirty-two he received a shot a little above the left knee, at the battle of Zutphen, where he had acted with uncommon bravery. Becoming faint and thirsty from excess of bleeding, he asked for water, which he was about to drink, when observing the eye of a dying soldier fixed on the glass, he resigned it to him, saying, "thy necessity is yet greater than mine." Death seized his hand in the moment of bequeathing to two friends, "each a ring of ....." His remains were interred in St. Paul's cathedral, on the 16th of February following.

Sir Philip Sidney was so much attached to his sister, the countess of Pembroke, and so exceedingly pleased with her fine genius, and excellent improvement of it, that he consecrated his ingenious romance to her under the title of the *Countess of Pembroke's Arcadia*, beginning *Dear and most worthy to be dear lady*. Robert Walgrave printed an edition of this poem at Edinburgh, in 1599, in folio. Besides the *Arcadia*, sir Philip wrote an *Apology for Poetry*, which was not published till 1595; *Sonnets*; *Ourania*; a poem; and several other pieces.

1587. *A worke concerning the trewneesse of the christian religion, by Phelip Mornay, lord of Plesie Marlie. Begun to be translated by sir Philip Sidney, knight, and at his request finished by Arthur Golding*. 641 pages 4to. Printed by George Robinson, London.

1587. HENRY DENHAM dwelt at the sign of the Star, in Paternoster-row, with this motto about it, *o homini sublime dedit*, which he put at the end of several of his books. In 1580, he dwelt in Whitecross-street, and was assignee to William Seres, whose device of the Bear and Ragged Staff, within the garter, he sometimes used. In 1586, he removed into Aldersgate-street. The commencement of his typographical labours is dated 1564, when he printed a book entitled the *Pitiful estate of the time present*. 16mo. In 1667, he printed the *New Testament* in Welsh (see p. 336, ante.) with the following title:—*Testament newydd ein arglwydd Jeru Christ. Gwedy ei dynnu, yd y gadei yr ancy ffaith 'air yn ei gyllyd o Groec a'r Llatin, gan newidio ffurf wythyren gairiae-dodi. Eb law kyng y mae pop gair a dybiwyt y rot yn andeallus, ai o ran llediaith y' wlat, ai o ancynefindery deunydd, vedy ei noli ai eglurhau ar ledemyl y tu dalen gydrochiol.* This was printed at the cost of Humphrey Toy, and dedicated by William Salesbury to queen Elizabeth, with privilege. In the same year as this testament was printed, a book in Welsh was printed at Milan. In 1586, John Windet printed the *Common Prayer into the British tongue*; at the costes and charges of Thomas Chard. 4to.

The garland of godlie flowers, commonlie called *Twines praiers*, carefully collected, and beautifully adorned with the most fragrant blossoms that flourish in the comfortable garden of the right pure and sacred scriptures, &c. London, imprinted by Henry Denham, 1586. 16mo. Round the title is a very neat border.

*Foot path to felicity, guide to godliness, school of skill, swarm of bees, plant of pleasure, grove of graces.* By A. Flemish. London, imprinted by Henry Denham, 1586. 12mo.

1587. GERARD DEWES was a good printer, and kept shop at the sign of the Swan, in St. Paul's church yard, and practised the art from 1562, though only eight works bear his imprint.

Gerard Dewes used the annexed rebus, of which Camden observes, "And if you require more, I refer you to the witty inventions of some Londoners; but that for Garret Dewes is most remarkable, two in a garret casting Dewes at dice."

In 1578, Gerard Dewes printed *A nievre herball, or historie of plants*. First set forth in the Dutch or Almagne tongue, by Rembrand Dodanaus, phycition to the emperour; and now first translated out of French into English, by Henry

Lyte, esquire, dedicated to queen Elizabeth. At London by me Gerard Dewes, dwelling in Paul's churchyarde, at the signe of the Swanne. It contains 779 pages in folio, without the tables, but at the end, *emprinted at Antwerpe, by me Henry Loe, book printer, and are to be sold at London, in Powells church-yard, by Gerard Dewes.*

1587. Feb. 8. MARY STUART, queen of Scots, beheaded at Fotheringhay castle, in Northamptonshire, by order of Elizabeth, queen of England, to whom she had fled for protection in 1568, after having been obliged by the nobles to resign her crown, on the 15th of July, 1567, in favour of her infant son, James VI. of Scotland, who on the death of Elizabeth, ascended the throne of England, under the title of James I.

Mary Stuart was daughter and heir of James V.\* king of Scotland, by Mary, of Lorraine, his second queen, and was born at the castle of Linlithgow, December 8, 1542. When about six years old, she was conveyed to France, where she was with great care educated. Her study was chiefly directed to learning the modern languages; to these she added the Latin, in which she spoke an oration of her own composing in the guard room at the Louvre, before the royal family and nobility of France. She was naturally inclined to poetry, and so great a proficient in the art, that her compositions were much valued by M. Ronsard, who was himself esteemed an eminent poet, and thus eulogised her majesty:

I saw the Scottish queen, so fair and wise  
She seem'd some power descended from the skies;  
Near to her eyes I drew; two burning spheres  
They were; two suns of beauty, without peers.  
I saw them dimm'd with dewy moisture clear,  
And trembling on their lids a crystal tear;  
Remembering France, her sceptre, and the day  
When her first love pass'd like a dream away.

She had a good taste for music, and played well upon several instruments, was a fine dancer, and sat a horse gracefully, but her chief delight seemed to be when she was employed among her women at needlework.

On April 24, 1558, she was married to the Dauphin, afterwards Francis II. over whom her beauty and understanding gave her great influence. He dying, December 3, 1560, she returned to her native country, leaving the most refined and gay court in Europe, for the most turbulent and austere. She arrived at Leith, August 23, 1561, and was married to her cousin Henry lord Darnley, July 29, 1565, upon which he was proclaimed king of Scotland. The beauty of Darnley was his only merit, he was weak and cruel, and by his conduct made Mary bitterly repent the honour she had done him. Bursting into her apartment, with some lords devoted to his purpose, he seized and murdered Rizzio,† an Italian musician, whom he himself first distinguished, and then in a few days openly declared

\* Apoc. or Revel. v. 8. vials, φιάλας, Brit. Pholian. Bp. Morgan translates it *crystal*, crowds, which shows that he had not the original before him, but only the English; and that he did not distinguish between vials, and viols or violins.

\* Died at Falkland, December 13, 1542, leaving his infant daughter to the care of a nobility distracted by animosities against each other.

† David Rizzio was murdered in the presence of the queen, at Holyrood house, March 9, 1566.

he had no knowledge of the action. Darnley was murdered, by his apartment being blown up with gunpowder.\* Lord Bothwell, who was first accused for the murder of Darnley, had for his judges those who had instigated him to take part in the plot. Bothwell got the queen into his power, and after various indignities, she was requested by her nobles to marry him; she had no means to resist a step so fatal to her reputation and her future peace, which was solemnized on May 15, 1567. Factions and different interests prevailing among the great, every thing ran into disorder and confusion, loyalty and obedience to the royal authority were no longer regarded, but despised and abused. The earl of Bothwell was forced to save his life by flight,† and the queen sent prisoner to Lochleven, and treated on the road with the utmost scorn and contempt. After she had been imprisoned eleven months at Lochleven, and forced to comply with unreasonable terms, she made her escape,‡ and in a few days she got an army of at least six thousand men. The regent Murray on the other side, raised an army, and Mary was defeated at Langside, near Dunbarton, on the 13th of May, 1568; she was obliged to save herself by flight, travelling sixty miles in a day to the house of lord Herries. She landed in England, at Workington, in Cumberland, May 16, 1568,§ and was removed from one prison to another, for the space of about eighteen years, in which she had often struggled for liberty, and interested many in her cause; she was at length brought to a trial, condemned, and beheaded, for being concerned in a conspiracy against the life of Elizabeth; and suffered with great equanimity. She was interred in the cathedral church of Peterborough; but her remains were afterwards removed to a vault in Henry VIIIth's chapel, October 11, 1612, where a most magnificent monument was erected to her memory.

The misfortunes of the beautiful and accomplished queen of Scots, whatever were her virtues or her vices, not only interested all Europe in the age in which she lived and suffered, but continues to be a subject of discussion to the present time. Authors vary much in their sentiments concerning the character of this queen; but all agree that she was most cruelly and unjustly treated. Mary was the great hope of the Catholics; and Elizabeth's ministers aggravated the hate of their mistress by a sort of crusading zeal which has no pity or faith for a heretic. The letters pretending to be written by her to Bothwell, before the death of her husband, which

Mr. Whitaker, in his *History of Manchester*, has shown to contain many internal evidences of forgery, without seal or superscription, were never, even in copies, submitted to her perusal, or that of her friends, so that she had no opportunities of exposing their falsehood. She was of a height approaching to the majestic, with a beautiful and benevolent countenance, dark hair and eyes. Mary had a flexibility of mind which yielded to her feelings, even when her understanding should have taught her better—prone to confidence and generosity, she seemed to expect it, even where she had been frequently deceived, and, before confinement had subdued her feelings, was hysterical under the impression of misfortune or unkindness. Mary was one of those characters which we meet with very seldom in the world; and which, whenever they appear, are applauded for their generosity by a few, and condemned for their simplicity by the many. They have an easy affiance of soul, which loves to repose confidence, even when confidence is weakness. They thus go on, still confiding, and still confounded; unable to check the current of affiance that runs strong in their bosoms, and suffering themselves to be driven before it in their actions. A generous confidence in the virtue of others is the mark of a soul conscious of the energy of virtue in itself, buoyed up by its own vigour within, and not yet drawn down by the attraction of earth below. Mary's was of this kind. Time, if time had been allowed her, would have forced her to learn the necessary wisdom of the world. The great multitude of mankind learn it without the aid of time. They look into their own hearts, and read it there. They have no stubbornness of virtue to subdue; they have no forwardness of honour to restrain. Mary had. She was cast in a much superior mould. And she died at last a martyr to the sincerity of virtue in herself, and to a resistance upon it in others.\*

One great motive for the enmity of Elizabeth to Mary, was that the former could not be content with the great superiority which she had over the latter, in a hardy vigour of understanding, in a deep knowledge of the world, and in the mysterious refinements of policy, in the strength of her nation, and in the splendour of her government. She must arrogate a superiority too, in the very orb in which Mary shone so transcendently. She must triumph over her in beauty, in dancing, and in dress; in those very accomplishments which give the sex such an influence upon us, but in which we never think of rivalling them. Elizabeth was a man in most other respects. She would have been peculiarly one in this. But the womanly part of her predominated here over the manly. And she, who

\* This event took place at Kirkcaldy, a retired situation from Edinburgh, on the night of February 9, 1567.

James Douglas, earl of Morton, was guillotined at Edinburgh, June 2, 1581, for the supposed murder of lord Darnley.

† He retreated to the Orkneys, and driven from thence, committed some outrages on the trade of Denmark. He was finally taken and immured in the castle of Malmoe, in Norway, where he died, after ten years' confinement.

‡ She was aided in her escape from Lochleven, by the gallant George Douglas, in the night of the 24 of May, 1568.

§ See note page 316, ante.

\* The following very curious passage in *Meivill's Memoirs*, is pregnant with intelligence concerning this under part of Elizabeth's character:—"The queen, my mistress," says Meivill, "had instructed me to leave matters of gravity sometimes, and cast in merry purposes, lest otherwise I should be wearied; she being well informed of that queen's natural temper."

could box her generals upon occasion, could not bear to be surpassed in accomplishments purely feminine, by the most handsome, the most graceful, and the most improved princess of her age.

All united to make Elizabeth an enemy to Mary. As a queen, and as a woman; as actuated by political jealousies, as stimulated by personal humours; and as impelled by female vanities; she became at first a pretended friend to betray her, and at last she appeared an open enemy to destroy her. She lavished all her arts of deception upon her. She then found herself to be so entangled in the strings of her own nets, that she could not either retreat or advance: and she thought herself obliged in the end, for the sake of her own security, to terminate in desperation, what she had commenced in jealousy. She arraigned a queen of Scotland before a tribunal of English nobles; she thus set an example, infamous in itself, pernicious to society, and peculiarly pernicious and infamous to her own country, of having a sovereign condemned to the block by subjects: she urged her meaner dependents upon assassinating Mary,\* that she might not behold her, but she found even their consciences revolting at the villainous intimation. She then signed the bloody warrant with her own hand. She could be wantonly jocular at doing it. She could pretend to recall it, when it had been sent away. She could pretend to lay the guilt of it upon her secretary's head.† She could yet deny to Mary for ever, what was never denied to the meanest criminal before, the favour of having a clergyman of her own communion to attend her. She could point her persecution against the soul, as well as the body, of Mary. And at length she stained her conscience with one of the foulest murders that the annals of the earth can produce; then felt herself almost petrified with horror, at the related execution of what she had commanded; peculiarly haunted, at the close of life, with the frightful image of the deed which she had committed; and killed herself at last with a sullen bravery of melancholy, the most extraordinary that is to be met with in history.

Conspiracies were from time to time set on foot by the catholic party, in order to liberate Mary, and place her on the English throne; but that which appeals to our sympathy, and almost demands our admiration, is that of Anthony

Babington, a catholic; a youth of large fortune, the graces of whose person were only inferior to those of his mind. Some youths, worthy of ranking with the heroes, rather than with the traitors of England, had been practised on by the subtlety of Ballard, a disguised jesuit of great intrepidity and talents, whom Camden calls "a silken priest in a soldier's habit:" for this versatile intriguer changed into all shapes, and took up all names; yet, with all the arts of a political jesuit, he found himself entrapped in the nets of that more crafty one, the subdole Walsingham.\* Of the fourteen† persons implicated in this conspiracy, few were of the stamp of men ordinarily engaged in dark assassinations; and the greater number were surely more adapted for lovers than for politicians. The intimates of Babington were youths of congenial tempers and studies; and, in their exalted imaginations, they could only view in the imprisoned Mary of Scotland a sovereign, a saint, and a woman. But friendship, the most tender, if not the most sublime ever recorded, prevailed among this band of self-devoted victims; and the Damon and Pythias of antiquity were here surpassed. John Ballard himself commands our respect, although we refuse him our esteem; for he felt some compunction at the tragical executions which were to follow the trial, and "wished all the blame might rest on him, could the shedding of his blood be the saving of Babington's life!"

This extraordinary collection of personages must have occasioned many alarms to Elizabeth, at the approach of any stranger, till the conspiracy was sufficiently matured to be ended. Once she perceived in her walks a conspirator; and on that occasion erected her "lion port," reprimanding the captain of her guards, loud enough to meet the conspirator's ear, "that he had not a man in his company who wore a sword."—"Am not I fairly guarded?" exclaimed Elizabeth.

When the sentence of condemnation had passed, then broke forth among this noble band that

\* The spies of that singular statesman were the companions or the servants of the arch-conspirator Ballard; for the minister seems only to have humoured his taste in assisting him through this extravagant plot.—*D'Israeli*.

† John Ballard, Anthony Babington, John Savage, Robert Barnwell, Chidlock Titchburne, Charles Tilney, and Edward Abington, were executed in St. Giles's Fields, September 20, 1586. Ballard was first executed. He was cut down and bowelled, with great cruelty, while he was alive. Babington was taken from the gallows alive too, and ready to be cut up, he cried aloud several times in Latin *Parce mihi, Domine Jesu! Spare me, O Lord Jesus!* Savage broke the rope, and fell down from the gallows, and was presently seized on by the executioner, his privities cut off, and his bowels taken out while he was alive. Barnwell, Titchburne, Tilney, and Abington, were executed with equal cruelty. On the following day, Thomas Salisbury, Henry Dore, Edward Jones, John Charnock, John Travers, Robert Gage, and Jerome Bellamy, suffered at the same place. Elizabeth, an enlightened politician commanded, that on the second day the odious part of the sentence against traitors should not commence till after their deaths.—See *State Trials*, vol. i.

There is an interesting historical novel, entitled the *Jesuit*, whose story is founded on this conspiracy; remarkable for being the production of a lady, without, says Mr. D'Israeli, a single adventure of love. Hume has told the tale with his usual grace; but the fuller narrative may be found in Camden.

\* Elizabeth gave orders for a letter to be sent to Pawlet and Drury, the keepers of Mary, at Fotheringay, which stated, that "they might surely ease her of that burden." Pawlet's answer was that he refused to do any thing inconsistent with the principles of honour and justice: the queen burst into a violent rage, and called Pawlet "a precise and dainty fellow, who would promise much and perform nothing; but others," said she, "will be found who are less scrupulous."

† Sir Amias Pawlet, the keeper of Mary, reports June 3rd, 1666. The Scottish queen is getting a little strength, and has been out to her couch; and is sometimes carried in a chair to one of the adjoining ponds, to see the diversion of duck hunting; but she is not able to walk without support.

† William Davison, secretary to Elizabeth, was fined ten thousand pounds, which was most vigorously exacted; and though the queen survived the unfortunate Mary seventeen years, she was ever inexorable to every petition for his liberation. Died Dec. 23, 1606.

spirit of honour, which surely had never been witnessed at the bar among so many criminals, that even one of the judges could not refrain from being affected at the presence of such gallant men as those before him. These heroic yet affectionate youths had a trial intolerable to their social feelings. The terrific process of executing traitors was the remains of feudal barbarism, and has only been lately abolished.

One of these *generose adolescentuli*, youths of generous blood, was Chidock Titchburne of Southampton, a youth of ancient family, and the more intimate friend of Babington. He had refused to connect himself with the assassination of Elizabeth, but his reluctant consent was inferred from his silence. His address to the populace breathes all the carelessness of life, in one who knew all its value. How feelingly he passes into the domestic scene, amidst his wife, his child, and his sisters!—and even his servants. Well might he cry, more in tenderness than in reproach, “Friendship hath brought me to this.”

#### VERSES,

Made by CHIDOCK TITCHBURN of himself in the Tower, the night before he suffered death, who was executed for treason, September 20th. 1586.

My prime of youth is but a frost of cares,  
My feast of joy is but a dish of pain,  
My crop of corn is but a field of tares,  
And all my goodies is but vain hope of gain.  
The day is fled, and yet I saw no sun,  
And now I live, and now my life is done!

My spring is past, and yet it hath not sprung,  
The fruit is dead, and yet the leaves are green,  
My youth is past, and yet I am but young,  
I saw the world, and yet I was not seen;  
My thread is cut, and yet it is not spun,  
And now I live, and now my life is done!

I sought for death, and found it in the wombe,  
I lookt for life, and yet it was a shade,  
I trade the ground, and knew it was my tombe,  
And now I dye, and now I am but made.  
The glass is full, and yet my glass is run;  
And now I live, and now my life is done!\*

Previous to the arresting of the persons of the conspirators, Mary was confined in a chamber of the house of Tixal, where she was prohibited the use of pen and ink, whilst her drawers were ransacked by sir Amias Paulet, and all her papers seized. From that moment the proceeding against Mary excites pity for her untimely fate, and admiration at the magnanimity with which she met it. From the period of her landing in England, it had been the policy and aim of Walsingham, to see her bleed on the block; and it was owing entirely to his intrigues, that the crafty minister contrived that Mary should be so involved in the plot of Ballard, as to secure her for his victim.

The dedicatory verses prefixed by Buchanan to his paraphrastic Latin version of the Psalms, and addressed to the queen of Scots, are both from their collocation and elegance, a subject of interest.\*

Daughter of kings unnumber'd, whose fair hand  
Sways Scotia's sceptre now with empire bland,  
Passing in princely virtues regal place,  
Years, sex, in spirit—origin, in grace,  
Receive the songs of Israel's prophet king,  
(But kind) which cloth'd in Latian vest I bring.  
Those strains, in northern regions harp'd by me,  
Far from the clime and spring of Castalia,<sup>†</sup>  
Scarce worth recording might the minstrel deem,  
Yet may he not reject what you esteem.  
Transient the fame his feeble art can give,  
Yet sanction'd by your smile they long may live.

The *Missal* or *Prayer Book* which the unfortunate Mary made use of on the scaffold, is preserved in the monastery of Benedictines, at Bornhem, in Flanders. This book is said to have been a present to her from pope Pius V. It is a manuscript, on very fine vellum, beautifully illuminated, with pictures and burnished gold letters and flowers. It is an *Officium Marianum*, with a diurnal of the saints, each separately depicted. The book is covered with crimson velvet, and silver clasps and plates.‡

The following is a *fac simile* from this very curious work.||

Towards the middle :

“When yow got prayers doo rehers  
Remembre Henry Mawtrebers.”

Near the end :

“Myne owne good Kate, as oft as  
you can not se me bodily with your  
prayers I pray byspte me and wpth  
thys spercally because it is to the  
hole Trynpte wherin you shall doo  
a great pleasure unto me, wghche  
ame your lobpng mystres, and  
ever wpll be. Marpe.”

By this inscription it would seem that she gave it one of her faithful attendants, the moment before her execution: this conjecture is confirmed by the *History of Conjuringay*. She bequeathed 400 francs to Katherine.

Another *Missal* which belonged to the queen of Scots, is now in the Imperial library at St. Petersburg, and is described by Mr. Holman, in his *Travels through Russia and Siberia*. 1825.

\* This pathetic poem has been printed in one of the old editions of sir Walter Rawleigh's Poems, but could never have been written by him. In those times the collectors of the works of a celebrated writer would insert any fugitive pieces of merit, and pass them under a name which was certain of securing the reader's favour. The entire poem in every line echoes the feelings of Chidock Titchburne, who perished with all the blossoms of life and genius about him in the May-time of his existence.

For a very interesting account of Chidock Titchburne, see *Curiosities of Literature*, vol. iii.

\* It may not have occurred to scholars in general, that the Scottish poet selected as his model on this occasion the fine elegiacs by which Sannazarus inscribed to pope Clement VII. his celebrated poem *de Partu Virginis*.—*Greenwell*.

† For not to have been dipt in Lethe's lake  
Could save the soo of Thefts from to die;  
But that blind bard did him immortal make  
With verses dipt in dew of Castalie.—*Spencer*.

‡ *Gentleman's Magazine*, vol. lix. page 779.  
|| *Nichol's Literary Anecdotes*, vol. ix. page 678.

"This Missal, or Prayer-book, is bound in purple velvet; the leaves are of a rich vellum of a large 8vo. size; it is ten inches long, seven broad, and an inch and a half thick. The sheets are highly illuminated with pictures of saints, with Saxo-Latin inscriptions under them. In various parts were originally blank spaces that had been filled up with observations and lines of poetry in French, in the queen's own hand-writing, and with her signature: of which the following are translations.

On the first page—

This belongs to me, Mary.

Subsequently—

Bad fate! that renders life as drear,  
As useless, e'en as death could be,  
Whilst all, to add to my despair,  
Seems in its nature chang'd towards me.

No longer, as in times of old,  
The wings of fame are spread,  
With soaring flight, impartial, bold—  
Those times, alas! are fled.

Her pleasures now are all confin'd,  
And all her favours shine,  
On those whom fortune (faint and blind)  
Regards with smile benign.

Dull hours, which guided by my fate,  
In sad succession flow,  
The glorious sun in all its state,  
Seems but to mock my woe.

Mary queen of Scots wrote poems on various occasions, in Latin, Italian, French, and Scotch. *Advice to her Son*, in two books, the consolation of her long imprisonment. A great number of her original letters were preserved in the library of the king of France, and in the Royal, Cottonian, and Ashmolean libraries.

A catalogue has been preserved of the royal library,\* or rather of the remains of it; delivered over with the other chattels of queen Mary, by the regent Morton, to James VI. The following extract will show the nature of this collection;

\* \* \* \* \*  
The third volume of Titus Livius  
The eleventh book of St. Augustine  
The first book of sanct Augustin  
Ane parte of Plutarche in French  
The legend auree  
\* \* \* \* \*  
Essais in Greik and Hebreu be Munster  
The singular combat of David and Goliath  
The histories of the bible in figures  
The sectis of heresies in this tyme  
Clement Marot  
The Epistle of Ignatius  
Four homelies anent the Images in France  
The treatise of the sacrament be Petir Martir  
The answer to Johnne Calvinis epistle  
Sangis of the bible in French be Lancelote de la Carle  
The complaint of the universitie of Pareis contra the Jesuites.

\* A document found by Mr. Thomson, of the Record office, Edinburgh, and published by the Bannatyne club, *The Library of Mary queen of Scots and James VI.* 4to. In 1671, Morgan Phillips' *Defence of Mary queen of Scots, her right and title to the crown of England*, in three books, 8vo. was printed at Leige, a city of the Netherlands. A copy of this scarce volume is in Marsh's library, at Dublin, on the title page of which, a contemporaneous hand has written, *From wyne and women, good Lord deliver us!*

In taking a review of the state of literature in the reign of Elizabeth, we are struck with admiration at the rapid progress which was made in the arts and sciences in this kingdom. Some have carried their encomiums so far as to represent it as the golden age of English literature. The mode of cultivating the Greek and Roman learning became universal; and the literary character was no longer appointed to scholars by profession, but assumed by the nobility and gentry. The ecclesiastics had found it their interest to keep the languages of antiquity to themselves, and men were eager to know what had been so long injuriously concealed. Truth propagates truth, and the mantle of mystery was removed not only from religion but literature. The general curiosity for new discoveries, heightened either by just or imaginary ideas of the treasures contained in the Greek and Roman writers, excited all persons of leisure and fortune to study the classics. The books of antiquity being thus familiarised to the great, every thing was now tinctured with ancient history and mythology. The heathen gods, although discountenanced by the Calvinists, on a suspicion of their tending to revive and to cherish a spirit of idolatry, came into general vogue. When the queen paraded through a country town, almost every pageant was a pantheon. When she paid a visit to the house of any of her nobility, at entering the hall she was saluted by the Penates, and conducted to her privy-chamber by Mercury. The pages of the family were converted into wood-nymphs, who peeped from every bower; and the footmen gambolled over the lawns in the figure of satyrs. After sleeping in a room hung with tapestry of the voyage of Æneas, when her majesty hunted in the park, she was met by Diana, who pronouncing our royal bride to be the brightest paragon of unspotted chastity, invited her to groves free from the intrusions of Acteon. The truth is, she was so profusely flattered for this virtue, because it was the characteristic ornament of the heroines, as fantastic honour was of the champions, of the old barbarous romance. It was in conformity to the sentiments of chivalry which still continued in vogue, that she was celebrated for chastity: the compliment, however, was paid in a classical allusion.

Elizabeth sought all occasions of being extolled for her beauty, of which, indeed, in the prime of her youth she possessed but a small share, whatever might have been her pretensions to absolute virginity. No negotiation succeeded unless she was addressed as a goddess, which was totally inconsistent with her high station. Encomiastic harangues drawn from this topic, even on the supposition of youth and beauty, were surely superfluous, unsuitable, and unworthy; and were offered and received with an equal impropriety. Yet, when she rode through the streets of the city of Norwich, Cupid, at the command of the mayor and aldermen, advancing from a group of gods who had left Olympus to grace the procession, gave her a golden arrow, the most effective weapon of his well-furnished

quiver, which under the influence of such irresistible charms was sure to wound the most obdurate heart. 'A gift,' says honest Hollinshead, 'which her majesty, now verging to her fiftieth year, received very thankfully.' In one of the fulsome interludes at court, where she was present, the singing boys of her chapel presented the story of the three rival goddesses on Mount Ida, to which her majesty was ingeniously added as a fourth; and Paris was arraigned in form for adjudging the golden apple to Venus, which was due to the queen alone.

This inundation of classical pedantry soon infected our poetry. Our writers, already trained in the school of fancy, were suddenly dazzled with these novel imaginations, and the divinities and heroes of Pagan antiquity decorated every composition. The perpetual allusions to ancient fable were often introduced without the least regard to propriety. Shakspeare's Mrs. Page, who is not intended in any degree to be a learned or affected lady, laughing at the cumbersome courtship of her corpulent lover, Falstaff, says, "I had rather be a giantess, and lie under Mount Pelion." This familiarity with the Pagan story was not, however, so much owing to the study of the original authors, as to the numerous English versions of them, which were consequently made. The dissemination of the scriptures in the vulgar tongue, by means of the press, while it greatly affected the language and ideas of the people, was also of no small avail in giving new directions to the thoughts of literary men, to whom these antique Oriental compositions, presented numberless incidents, images, and sentiments, unknown before, and of the richest and most interesting kind.

Spencer, Sidney, Shakspeare, Jonson, Marlow, Green, and Peele, may be considered as the chief poetical names which adorn the reign of Elizabeth. Almost all the poets, and many of the other writers, were either courtiers themselves, or under the immediate protection of courtiers, and were constantly experiencing the smiles, and occasionally the solid benefactions of royalty. Not only the Greek and Roman writers, but those of modern Italy and France, where it has been shown that learning experienced an earlier revival, had been translated into English, and liberally diffused by means of the press, served to excite a taste for elegant reading amongst all classes of society. The study of the belles-lettres was in some measure identified with the courtly and arbitrary principles of the time, not so much from any enlightened spirit in those who supported such principles, as from a desire of opposing the puritans, whose ascetic spirit and narrow doctrines of religion led them to despise every department of elegant literature.

This reign also produced Hooker, Raleigh, and Francis Bacon, lord Verulam, who as a philosopher, deserves the highest praise; whose style is copious and correct, and whose wit is only surpassed by his learning and penetration. During this period the whole island seemed as if roused from her long habits of barbarity; arts,

commerce, and legislation, began to acquire new strength every day; and England which had hitherto been the object of every invasion, and a prey to every plunderer, now asserted her strength in turn, and became terrible to its invaders. The achievements of Drake, Hawkins, Davis, Forbisher, Raleigh, Howard, and other naval commanders, carried the British flag to every part of the world. If we look through history, and consider the rise of kingdoms, we shall scarcely find an instance of a people becoming, in so short a time, wise, powerful, and happy. Liberty, it is true, still continued to fluctuate; Elizabeth knew her own power, and very often stretched it to the very verge of despotism. We are not to imagine from the accounts of the religious and other controversies, which were carried on during this reign, that an entire freedom of debate and of writing, was then admitted. The true liberty of the press was by no means understood; and those who wrote or printed any thing against the established system, did it at great hazard; and the sufferings which in some cases were inflicted on the boldness of publication was, as we have shown, extremely severe, and often despotie. After every proper deduction has been made, enough remains to fix the seventy or eighty years that elapsed from the middle of the sixteenth century to the period of the restoration, as "by far the mightiest in the history of English literature, or indeed of human intellect and capacity."

Dr. Wotton, in his *Reflections on Ancient and Modern Learning*, assures us, that no age was so productive of learned women as the sixteenth century. Speaking of the flourishing condition learning was in at that time, he says, "it was so very modish, that the fair sex seemed to believe the Greek and Latin added to their charms; and that Plato and Aristotle, untranslated, were frequent ornaments of their closets." And Erasmus, speaking of the early part of this century, says, "the scene of human things is changed; the monks, famed in times past for learning, are become ignorant; and women love books."—Elizabeth herself was the most conspicuous of the learned ladies of her reign. The daughters of the duke of Somerset; \* lady Killegrew; †

\* Anne, Margaret, and Jane Seymour, were the daughters of Edward Seymour, duke of Somerset, and uncle to king Edward VI. by Anne his second wife, daughter of sir Edward Stanhope, knight, by whom he had six daughters, all learned; Anne, the eldest, was married, first to John Dudley, earl of Warwick, and afterwards to sir Edward Unton, knight of the Bath: she died about the end of the sixteenth century. Margaret died unmarried. Jane also died single, notwithstanding her father's endeavour to have married her to king Edward VI. She was maid of honour to queen Elizabeth, and in great favour; she died in 1564, in the twentieth year of her age, and was buried in Westminster abbey, with great solemnity. These three learned sisters wrote four hundred Latin distichs on the death of the queen of Navarre, Margaret de Valois, which were translated into Greek, French, and Italian, and printed at Paris in 1557, under the title of *Tombeau de Marguerite de Valois, Reine de Navarre*.

† The fourth daughter of sir Anthony Cooke, was born at Giddy hall, in 1530. She was married to sir Henry Killegrew, and died about 1576. Her death was lamented in various epitaphs, and on the monument erected to her memory, in the church of Thomas, in the Vintry ward,

Jane countess of Westmoreland; \* lady Elizabeth Russel; † lady Burleigh; ‡ Blanch Parry; § Joanna Lumley; ¶ lady Fane; ¶ Mary Sidney countess of Pembroke; \*\* and Elizabeth Jane Weston, were the chief ornaments of this reign.

The colleges founded in the reign of Elizabeth were three in number; and the first endowed by a Protestant was Jesus college, in the university of Oxford, by Hugh Ap Rice, or Price, who observing that his countrymen, who were natives of Wales, were much neglected in college endowments, petitioned queen Elizabeth to found a college more particularly for their benefit. She accordingly granted a charter, dated 1571; but the queen seems to have rendered no farther practical assistance than by giving a quantity of timber from the royal

forests to aid the building. The library contains a good collection of books, and some curiosities, among which is a silver bowl, weighing two hundred and seventy-eight ounces, and capable of holding ten gallons; a metal watch, given by Charles I.; and a huge stirrup, said to have been used by queen Elizabeth.

Emmanuel college, in the university of Cambridge, was founded by sir Henry Mildmay, of Chelmsford, in Essex, chancellor of the exchequer, and privy councillor to queen Elizabeth. In the library are many valuable and scarce books, among which is *Tully's Offices*, printed by Faust, in 1465; it appears to have belonged to prince Arthur, brother of Henry VIII. his arms being portrayed on the title-page.

Sidney Sussex college was endowed by Frances Sydney, countess of Sussex, and widow to Thomas Radcliffe, third earl of Sussex. For this purpose she bequeathed £5,000, and some other property. In the library are several objects, besides books, which have been thought worthy of preservation. Amongst these is a part of an incrustation of a child's skull, found in the isle of Crete, about ten feet beneath the soil, and brought to England in the year 1627. The teeth are white and sound, and remain unchanged; but the other parts resemble a hard sandstone. The skull, when first deposited in the college, was whole; but it was afterwards broken, and some parts lost. It was esteemed so great a curiosity, that king Charles I. was desirous of seeing it; and accordingly it was sent up to the famous Dr. Ward, then master of the college, for his majesty's inspection.

The following is a curious regulation respecting the library of Bene't college, in the university of Cambridge.\* The library is placed over the chapel, and so extremely difficult of access, that even a fellow of the college is not permitted to enter it unaccompanied by another fellow and a scholar, who must remain with him during the whole time of stay; for if a single book is missing, according to the will of the donor, they lose the whole; and for that reason they are examined every year, by two persons of another college. This library contains a valuable collection of manuscripts and printed books. Among the former, are many relating to ecclesiastical affairs, which had been collected by Leland at the dissolution of the monasteries under Henry VIII. and the original manuscript of the thirtynine articles. Of the latter, is one entitled *Rhetorica Nova, impressa Cant. 1478*, shewing the antiquity of printing in Cambridge.

Corpus Christi, or Bene't college, (founded in 1351) differs in its origin from all others in the universities of Oxford and Cambridge; those having been founded by the benevolence of one

London, is an inscription composed by herself. She was famous for her knowledge in the Hebrew, Greek, and Latin tongues, and for her skill in poetry.

\* Eldest daughter of Henry earl of Surry, who was beheaded January 15, 1547, (see page 294 *ante*.) She was married to Charles earl of Westmoreland, by whom she had four daughters. She was instructed under John Fox.

† Third daughter of sir Anthony Cooke, born 1529, was equal to her sisters, in having the advantages of a learned education, and in the skill of languages. She was married first to sir Thomas Hobby, ambassador to the French court. He died at Paris, in 1566. She next married lord John Russel, son and heir to the earl of Bedford. He died before his father in 1584. When lady Russel died is unknown, but it is supposed to have been about 1597; for in a letter to her nephew Cecil, without date, she complains much of bad health, and infirmities of age, and concludes, "your lordship's old aunt of compleat 68 years, that prays for your lordship's long life." Poetical inscriptions and epitaphs were a favourite kind of composition with lady Russel. She wrote epitaphs, in Greek, Latin, and English, for her husbands, son, daughter, brother, sister, &c.

‡ Eldest daughter of sir Anthony Cooke, born 1531. On the 31st of December, 1646, and in the 20th year of her age, she was married to sir William Cecil, afterwards created lord Burleigh, lord high treasurer of England, and privy councillor to queen Elizabeth, by whom he had many children, all of whom died young excepting two daughters. After a long and happy marriage of forty-two years, she died April 4, 1639, in the 63d year of her age. She was a woman of exemplary virtue and engaging qualities, and of an admirable understanding. She was buried in the abbey church of Westminster, where a magnificent monument is erected to her memory. Five days after her decease, lord Burleigh wrote what he calls, *A Meditation on the Death of his Lady*, written in sorrow, in which he praised her zeal for the maintenance of learning, by her many benefactions to Cambridge, Oxford, and Westminster, her widely extended benevolence, and the secrecy with which she did all these things—so that even he knew them not during her life.

§ She was daughter of Henry Parry, Esq. of Newcourt, Herefordshire, born 1508, a great lover of antiquities; and communicated to Dr. Powell, and sir Edward Stradling's manuscript history of the *Winning of Glamorgan*, or *Morgannwg out of the Welshman's hands*, &c., which is published by the doctor in his *History of Wales Princes*. She procured queen Elizabeth, to whom she was "chief gentlewoman, and keeper of her majesty's jewels," the grant of the mastership of St. Cross's for Dr. John Lee, when he was in distress. She drew up a pedigree of the Parry family, and the gentility of her descent. She died a maid, Feb. 13, 1589, in the eighty-second year of her age, and was buried in Westminster abbey, where a monument is erected to her memory, on the south side of the chancel. In her will, written by lord Burleigh's own hand, among other legacies, is £500, for an almshouse at Bacton.

¶ Joanna Lumley, eldest daughter and co-heiress of Henry Fitz-Allen, earl of Arundel, and wife of John, lord Lumley, by whom she had three sons, who died infants. She died about 1579, and was buried at Cheam, in Surry, where a monument was erected to her memory.

¶ The lady Elizabeth Fane's 21 *Psalm* and 102 *Proverbs*. London: printed by Robert Crowley, 1650. 8vo.

\*\* See Countess of Pembroke, under the year 1621, *post*.

\* On May 7, 1588, lord Burleigh, as chancellor of Cambridge, issues rules for reforming the apparel, and other disorders of the scholars; "and that the excess of coloured shirts and ruffs, exceeding one inch and a half, (saving for the sons of noblemen) be avoided presently; and that no scholar do wear any long locks of hair upon his head, but that he be polled after the manner of the gravest scholars, under the pain of 6s. 8d.

or two persons, while this was established by the union of two societies or gilds,\* in the town of Cambridge, and denominated *Collegium Corporis Christi et Beate Maria Virginis*, is usually called Bene's college, from its situation near St. Benedict's church, which is appropriated thereto, and was the last appropriation made in England.

During the period embraced by the reign of Elizabeth, poetry was cultivated in Scotland by a few individuals, who, if not so celebrated as Dunbar and Lindsay,† were at least worthy followers of the same school. The chief of these were Alexander Scot, sir Richard Maitland, and Alexander Montgomery. Their poems are chiefly short pieces of a moral, satirical, or descriptive kind; in which the versification is very correct, and the language in general very happy, though the style of the ideas seems a century behind that of the English poetry of the same age.

The *Cherry and the Slae*|| of Montgomery, is a beautiful poem, describing the various passions of the human soul, and which has retained its popularity longer than any other poetical composition of the reign of James VI. Montgomery appears from a passage in a memoir of Mure of Rowallen, his nephew, to have died between the years 1607 and 1611. During the reign of James VI. the admirable Crichton|| also adds a lustre on the Scottish name.

\* A gild was a company of persons associated for charitable, religious, or mercantile purposes, and is supposed to have been a Saxon institution.

† William Dunbar was born at Salton, in East Lothian, about 1456. He became a clergyman, and flourished at the Scottish court from about the year 1500 to 1550, in which year he is supposed to have died. Some of his poems are humorous, and refer to humble life; others are allegorical, and full of beautiful natural imagery; a third kind are moral and instructive; and he is equally happy in all. His chief poems are the *Thistle and the Rose*, in 1503; and the *Friars of Berwick*. His poems were published with notes, by sir David Dalrymple.

‡ The works of the famous and worthie knicht, schir David Lyndesay, of the mount, alias, Lyon king of armes. Newly correctit, and vindicated from the former erroris quair, with thay war befor corruptit, and augmentit with sinderle warke, quhilk was not befor imprentit, &c. Newlie imprentit by Johne Scot, at the expensis of Henrie Charteris, and are to be seid in his bult, on the north syde of the gait, above the throne. Cum privilegio regali. 1568. 4to. Henry Charteris printed another edition in 1588, with a print of justice and religion. And again in 1592.

§ The *Cherry and the Slae*. Complayt into Scottis metre, by Alexander Montgomery. Edinburgh, printed by R. Waldegrave, 1595. 8vo. In 1822, the poetical works of Montgomery appeared in a very handsome edition, under the superintendence of Mr. David Laing, with a biographical preface from the pen of Dr. Irving.

|| James Crichton, of whom so many wonderful things are related as to have procured him the name of "the admirable Crichton," was born in 1551, in the county of Perth, of a good family, and educated at St. Andrew's, where he made a rapid progress in the languages and sciences. At the age of twenty he visited Paris, and acquired uncommon reputation as a disputant, and for his skill and activity in games of all sorts, as well as martial exercises. He next went to Rome, and displayed his talents in the presence of the pope and cardinals. From thence he travelled to Venice, where he became intimate with the learned Aldus Manutius, printer, who dedicated to him the *Paradoxa of Cicero*, in a strain of panegyric which borders on the ridiculous. At Padua he held disputation with the most learned professors on a number of subjects, but particularly on the Aristotelian philosophy. We next find him at Mantua, where he is reported to have slain a famous master in a duel. The duke of Mantua was so pleased with Crichton as to appoint him tutor to his son, who was a very licentious young man. This appoint-

ment, however, proved fatal to him; for one night, as he was walking through the streets in carnival time, he was attacked by six assassins, and after a gallant defence lost his life. It is said that the person who gave him the fatal stroke was the prince his pupil. This eve it is placed in the year 1583. Four of his Latin poems are extant, but so very wretched as to stamp the marvellous character of him, given by some biographers, with the charge of imposture.

1587. THOMAS MARSH or MARSH, an original member of the stationers' company, entered on the livery 1562, and filled the various offices of the company: he appears to have been a disorderly character, and was frequently fined for disobedience of their ordinances. He dwelt in Fleet-street, at the Prince's Arms, near St. Dunstan's Church, according to some of his colophons,\* but in *Asham's Almanac* it is styled the 'King's arms.' Strype, in *Stow's Survey*, says that he had a great license to print Latin books used in the schools of England, against which the poor stationers complained to the lord treasurer, when a compromise took place between them.

1587. HENRY MARSH was a relation to the above, and with Gerard Dewes, assignee. He succeeded to the house and business, (after the death of T. Marsh, if not before) for the first book printed by Henry is dated 1584. In 1585, he printed *Francis Kett his epistle to divers papists in England, proving the pope to be the beast mentioned in the xiii Revelat. &c.* 8vo. The author of this work was the last person who suffered for heterodox opinions, which took place in 1589. In 1587, he printed the *Mirror for Magistrates*, 4to, in which he calls himself the assignee of Thomas Marsh. He likewise printed divers yearly almanacks, and prognostications, wrote by Henry Loece, doctor in physick.

1587. ABRAHAM VELE, or VEALE, was a member of the company of drapers, and afterwards admitted a member of the stationers' company, by whom he was several times fined. He appears to have been in business for the space of thirty-five years, and printed twenty-four works. His residence was at the sign of the Lamb, in St. Paul's church yard.

1587. HENRY MIDDLETON dwelt at the sign of the Falcon, in Fleet-street, and was in partnership with Thomas East, so early as 1569; but whether he was son of William Middleton, noticed at page 298, ante, is uncertain. He printed thirty-six works, many of which were in Latin. In 1587, he printed *A godlie garden, out of which most comfortable hearbes may be gathered for the wounded conscience of all penitent sinners*, Perused and allowed. 24mo.

ment, however, proved fatal to him; for one night, as he was walking through the streets in carnival time, he was attacked by six assassins, and after a gallant defence lost his life. It is said that the person who gave him the fatal stroke was the prince his pupil. This eve it is placed in the year 1583. Four of his Latin poems are extant, but so very wretched as to stamp the marvellous character of him, given by some biographers, with the charge of imposture.

\* Colophon is a word derived from a city of that name, in Asia, where the artists of all descriptions were exceedingly expert, inasmuch that Κολοφῶνα ἐκτίθειν became a proverb among the Greeks, signifying *to finish a man's impotence*, to put the finishing hand to any thing. The same idea was implied by the word Colophonem among the Romans, &c.—Thomas's *History of America*, vol. i. 1810.

1587, *Sept.* 13. As a proof of the popularity of the Italian language in England at this time, archbishop Whitgift permitted an edition of the *Decameron* of Boccace,\* to be printed by Wolfe; and the bishop of London allowed the *Amorous Fiametta*† of the same author, to be printed by John Charlewood. In the following year, several other Italian works received a privilege to be printed.

1587, *Oct.* In the company of stationers' book is an entry of a *license* to John Charlewood, by the whole consent of the assistants, that he shall have "the only imprinting of all manner of *bills for players*; provided that if any trouble arise hereby, then Charlewood to bear the charges."

1587. The first *Almanack* printed in Ireland, was by William Farmer, Dublin, 4to. Few books were as yet printed in Ireland; whatever was written there was sent to London, Douay, Paris, or Antwerp.

1588, *Feb.* 15. *Died*, JOHN BIENNE, of whose birth and origin no account has been discovered, distinguished himself not a little amongst the learned printers of Paris. Maittaire finds his Latin impressions first mentioned in 1566. He espoused the widow of William Morel, and was put in possession of his apparatus and establishment. There seems to be no proof extant of his possessing the title of "Typographus Regius," beyond his use of the mark hitherto peculiar to artists who enjoyed that honour. Maittaire does not attribute the distinction to him, but acknowledges that he deserved it. His name is frequently found in conjunction with those of other "libraires," who occasionally share in his literary speculations, or employed his press. Chevillier attributes to him, *Novum Testamentum Syriace et Græce, cum versione interlineari Latina*, 4to. 1584;" which was in fact a joint impression with Simon Prevosteau. But the *chef d'œuvre* of the press of Bienne, is doubtless *Demosthenes, Græce, cum scholiis Ulpiani*, fol. the impression of which had however been commenced by William Morel, twelve years before; but was interrupted partly by the civil wars, partly by the domestic embarrassments of that meritorious printer, and partly by his death. Bienne had the glory of resuming and perfecting this fine volume, under the inspection and revision of Lambinus; and the variations in the titular subscription of different copies prove, that Jacobus Dupuys, and Michael Somnius, both participated in the charge of the impression. Some copies exhibit

the names and marks of these respective "libraires." Reiske made this the basis of his edition. He has given a minute account of it, *Prefat. ad Demosth.* and says the part executed by Morel, namely, as far as the *Oratio de falsa legatione*, has greatly the superiority over the latter part edited by Lambinus: both with regard to the critical labour bestowed upon it, the correctness of the typography, and even the quality of the paper.

An epigram by Scævola Sammaranthus, seems to imply that he perished by the hands of an assassin. It is said he left a daughter, so accomplished in Greek and Hebrew as to be able to conduct the printing of works in those languages.

1588. JOHN WYONTE, or WYONT, was a member of the worshipful company of drapers; and although he was not a brother of the worshipful company of stationers, seems, on account of his profession, to have been under their jurisdiction. He was once fined by them for keeping open shop on St. Luke's day; another time, because that he had certain books, (which seem to have been *Primers*), illicitly printed, found in his custody, for this he was fined *iiii*l. His residence was at the sign of the Rose, at the north door of St. Paul's. He was accounted more of a bookseller than a printer; although twenty-three works bear his imprint, from the commencement of his typographical labours in 1551, and to which he fixed the annexed very handsome device.

In 1586, he printed *A booke of the arte and manner how to plant and graffe all sortes of trees, &c.* translated from the French by Leonard Mascall, and dedicated to sir John Paulet, knight, lorde St. John, in which are found the following old English rules for purchasing land.

Who so wil be wice in purchasing,  
Let him consider these points following.  
First see that the lande be cleare,  
In title of the seller,  
And that it stand in danger,  
Of no woman's dowrie.  
See whether the tenure be bond or free,  
And release of currie, fraffe.  
See that the seller be of age,  
And that it lie not in mortgage.  
Whether a taile be therof found,  
And whether it stand in statute bound.  
Consider what service lengtht thereto,  
And what quitrent therout must go.  
And if it be come of a wedded woman,  
Think thou then on covert baron.  
And if you may in any wice,  
Make thy charter with warrantise.  
To thee, thine heires, assignes also,  
Thus should a wice purchaser do.

\* Boccaccio's *Decameron* is a collection of one hundred novellettes, in which he gave a degree of polish to his country's language unknown before.

† *Amorous Fiametta*. Wherein is sette downe a catalogue of all and singular passions of love and ialousie, incident to an enamored young gentlewoman, with a noble counsel for all women to eschewe deceitfull and wicked love, by an apparent example of a Neapolitan lady, her approued and long miseries, and with many sound exhortations from the same. First wrytten in Italian, by master John Boccace, the learned Florentine, and Poet Laureate. And now done into English, by B. Giovano del M. Temp. Printed for Thomas Gubbin. 4to.

1588, Feb. 13. A proclamation against certaine seditious and schismatical bookes and libels, &c. was published, shewing that they were slanderous to the state, and to the ecclesiastical government, established by law, &c. That they should immediately be brought in and destroyed, and that no author, printer, or desperser, should dare to offend herein, under the pain of her majesties displeasure, and being prosecuted with severity. *A broadside. Printed by the deputies of Christopher Barker.*

1588. *Died, ROBERT CROWLEY, CROLEUS, or CROLE, a scholar, preacher, and printer of the city of London.* He was a native of Gloucestershire, was a student of the university of Oxford in 1534, and soon after became demy of Magdalen college. In 1553, being bachelor of arts, he was made probationary fellow of the said house, by the name of Robert Crole. In the reign of Edward VI. he lived in Ely Rents, Holborn, where he printed and sold books, and likewise preached in the city; on the accession of queen Mary, he fled to Frankfort, with several English protestants. He returned at her decease, and had several benefices bestowed on him, among which was St. Giles's, Cripplegate, of which he wrote himself vicar in 1566. He was admitted a member of the stationers' company (*gratis*) in 1578. Having lived to a good old age, he was buried in the above church, and the following inscription was engraven on a brass plate on his tombstone:

HERE LIETH THE BODY OF ROBERT CROWLEY, CLERKE,  
LATE VICAR OF THIS PARISH, WHO DEPARTED  
THIS LIFE THE 10TH OF JUNE, 1588.

The poverty of his widow, in 1592, induced the company of stationers to allow her a noble per quarter. Eighteen works bear his imprint, and many of his works were printed for him by others. In 1550, he printed a work in metre, with this title:—

*Pleasure and pain, Heaven and hell,  
Remember these four, and all shall be well.*

*A new yeres gyfte, wherein is taught the knowledge of ourself, and the fear of God; worthy to be given and thankfullie recyved of all christen men; M D XLIX, the last day of December.—* Autore eodem Roberto Croleo. 12mo.

*Robert Crowley's confutation of Nicholas Shaxton, bishop of Sarum; his recantation of thirteen articles, at the burning of Mrs. Anne Askew. London, imprinted by John Day, 1548. 8vo.*

1588, June. *Died, TIMOTHY RYDER, printer, and beadle to the stationers' company.* He was the son of John Ryder, of Wendenbet, in the county of Northampton; and was instructed in the typographic art by Richard Lynel, to whom he was bound apprentice in 1563, for the term of seven years from the Purification. He was made free on the 21st of March, 1570, but he is supposed to have been unsuccessful, as he received aid from his company, and was ultimately appointed their beadle; in which situation, in July, 1580, his salary was raised "from xls. to

vil." In July, 1582, the court of assistants gave him the copy of *The Paradyce of Daintie Deuyes*, which had belonged to Henry Disley; and in 1584, they granted him the copy of *The widowes treasurer*, which had likewise been the property of Disley; but he had not the power to dispose of this copy without the leave of the court, which also appointed that Ro. Walgrave should print for him *The booke that concerneth phisike and chirurgerie*. In Dec. 1586, he entered a ballad entitled *How make batis abused a man and hys wife*: but was excused the 4d. entrance money. The April following, by reason of his infirmities, which rendered him incapable to execute the business of his office, he was obliged to resign, and John Wolf was chosen to do the duty, 'to have xl. s. with the avails, and on his good behaviour to have the preference in case of death.' In July, Wolf was fully appointed, with the stipend of vi. l. s. year; Rider to continue in his dwelling, in the hall, till Midsummer next; and on his good behaviour to have iv. l. yearly, as a free gift. The poor man, however, died before the time limited him to quit his dwelling; for on the 25 June, 1588, it was agreed by the court that Mrs. Rider shall have xl. s. yerely during her widowhood, and that she shall avoid out of the hall at Michaelmas next, and then John Wolf to enter upon it. I have never (continues Herbert) seen either of the above-mentioned books printed by or for him; but an edition of the former is mentioned by Mr. Warton, (*Hist. Engl. Poet.* vol. iii. p. 285, note i.) as printed in 1583, which very probably was printed for him. I have not met with any account of the others. The only book of Ryder's now extant, is entitled *The Practise of the Diuell*, printed without date, in 4to.

1588, July. It is really very curious to trace back to their origin many of our laws, institutions and privileges. As little could it have been conjectured, at the period of the threatened invasion of England by the Spanish Armada, that that circumstance would lead to the introduction of newspapers into this country, and the subsequent freedom of the press and establishment of our civil liberties, as that the dispute between Henry VIII. and pope Clement VII. respecting a divorce, should be the cause of the reformation; yet such was the fact.

The history of newspapers is so interwoven with the historical annals of our country, and so truly exemplifies the progress of literature and science, that whatever tends to elucidate their origin and progress, must at least add something to our knowledge, and throw light upon the state of society, or the philosophy of the times in which they were published; for they appear to have represented the times when, and the people among whom they originated. It is curious to take a retrospective view from the time of their origin, and to observe the gradual development of the mind of the mass of the people, their desire for information, and the consequent improvement of newspapers, and their influence upon society. Englishmen may indeed

look back with pride to the period when the freedom of the press was first established, and each subject began to feel an individual political existence.

Mr. George Chalmers, in his *Life of Ruddiman*, discovers, in England, the first newspaper. It may gratify national pride, says he, to be told that mankind are indebted to the wisdom of Elizabeth and the prudence of Burleigh, for the first newspaper. It was a wise policy to prevent, during a moment of general anxiety, the danger of false reports, by publishing real information; and the queen therefore resolved to inform her people of the extent of the danger impending over them. She began to publish, at irregular intervals, a sheet bearing the following title:

### **The English Mercurie,**

Published by **AUTHORITIE,**

FOR THE PREVENTION OF FALSE REPORTS.—NO. 50.

Whitehall, July 23d, 1588.

There are four of these papers preserved in the British Museum among Sloane's manuscripts 4106; three are numbered 50, 51, and 54, and are printed in Roman characters; the first is dated from Whitehall, July 23, 1588. The first article, contains advices from sir Francis Walsingham, that the Armada\* was seen in the chops of the channel, making for the entrance with a favourable gale. An account is then given of her majesty's fleet, which consisted of eighty sail divided into four squadrons, commanded by the lord high admiral,† in the Ark-Royal, sir Francis Drake,‡ and admirals Hawkins and Frobisher. By the best computation, it is added, the enemy could not have numbered less than 150; but as soon as they were seen from the top masts of the English fleet, instead

of exciting any fear of the result, they were hailed by the sailors with acclamations of joy. Under the head London, the following account of an interview which the mayor, aldermen, and common council, had had the day before with her majesty, for the purpose of assuring her of their resolution to stand by her with their lives and fortunes to the last.

"London, July the 23d.

"The lord mayor, aldermen, common council, and lieutenancy, of this great citie, waited upon her majestie at Westminster, this afternoon, with assurances of their hearty and unanimous resolutions to stand by and support her majestie at the critical juncture with their lives and fortunes, when her invaluable life, the true Protestant religion, and all the privileges of free-born Englishmen, are threatened by an open attack from our bigotted and blood-thirsty adversaries, the Spaniards. The queen received them very graciously, and assured them she did not doubt their zealous endeavours to serve their countrie on the present very important occasion; that for her part she relied upon God's providence, and the goodness of her cause, and was resolved to run all risques with her faithfull subjects.—Imprinted at London, by Christ. Barker, her highness' printer."

Under the date of July 26, there is the following notice:

"Yesterday the Scots ambassador, being introduced to sir Francis Walsingham, had a private audience of her majesty, to whom he delivered a letter from the king his master; containing the most cordial assurances of his resolution to adhere to her majesty's interests, and to those of the protestant religion. And it may not here be improper to take notice of a wise and spiritual saying of this young prince (he was twenty-two) to the queen's minister at his court, viz. That all the favour he did expect from the Spaniards was the courtesy of Polypheme to Ulysses, to be the last devoured."

Mr. Chalmers defies the gazetteer of the present day to give a more decorous account of the introduction of a foreign minister.

These were, however, but extraordinary gazettes, not regularly published. In this obscure origin, they were skilfully directed by the policy of that great statesman Burleigh, who to inflame the national feeling, gives an extract of a letter from Madrid, which speaks of putting the queen to death, and the instruments of torture on board the Spanish fleet.

In these *Mercuries* some advertisements of books run like those of the present times, and exhibit a picture of the literature of those days. All these publications were *imprinted and sold* by the queen's printers, Field and Barker. It is probable that after the defeat of the Armada, no later number was published than 54. But the appetite for news thus created, never subsided in this country, and within a few years the metropolis had no lack of *Mercurios*, *Corantos*, *Gazettes*, and *Diurnals*. And we soon find packets of

\* Philip II. of Spain, husband of Mary, queen of England, had spent five years in preparing for this expedition. He concluded that, as Elizabeth was the chief bulwark of the Protestants, could he not subdue this princess, he should acquire the immortal fame of reducing the whole Christian world in the Catholic communion; he, therefore, raised the Spanish armament, known by the name of the INVINCIBLE ARMADA, which he placed under the command of the marquis of Santa Cruz; but the anxiety of that nobleman caused his death, and the duke of Medina was appointed to the command. On the 19th of May, 1588, the Spanish fleet sailed from the Tagus; and the English fleet left Plymouth harbour about the same time, under the command of Charles Howard, earl of Effingham. During this critical juncture, queen Elizabeth showed herself to be possessed of great courage. She anticipated certain success, and even spoke in positive terms of her intention to accompany her troops to battle. She appeared at Tilbury, mounted on a white palfrey, and rode along the ranks, while the soldiers filled the air with shouts of triumph. The once formidable Armada was then buffeting the adverse winds on its return to Spain; and the duke of Medina, when he reached the port of St. Andero, on the 1st September, had to lament the loss of thirty ships and ten thousand men. The king, his master, received the intelligence with fortitude and moderation, saying, "I sent my fleet to combat the English, not the elements." And he thanked God that the whole had not been destroyed. A particular account of the disastrous fate of this vast armament will be found by the reader in Lingard's *History of England*, vol. viii. p. 331, 8vo. edition.

† Charles Howard of Effingham, earl of Nottingham, was lord high admiral, and commander of the fleet which defeated the Spanish Armada. He died Dec. 14, 1624.

‡ For an account of sir Francis Drake, see 1598, post.

news published, in the shape of small quarto pamphlets, as they arrived. These were entitled, *News from Brest, or a Diurnal of sir John Norris, &c. printed by Richard Yardley, 1594, 4to. News from Flanders, 1599. News from Italy, Hungary, &c.* as they happened to refer to the transactions of their respective countries, and generally purported to be translated from the Low Dutch. It is, however, during the civil wars, when the minds of men were more at variance, when their tempers were inflamed to a greater fierceness, and gave a keener edge to the sharpness of civil discord, that we are to look for the dissemination of these *Weekly News Books*, as they were then called, and to which we refer the reader.\*

The three months following the defeat of the Armada, witnessed a fresh persecution of the Catholics in England, of whom about thirty suffered the punishment of traitors, for the practice of their religion only, without a single accusation of disloyalty.

1588, Oct. 5. *A true report of the inditement, arraignment, conviction, condemnation, execution, of John Weldon, William Hartley, and Robert Sutton, who suffered for high treason in several places about London, imprinted by Richard Jones, 1588. 4to.*

*A packe of Spanish lyes, sent abroad in the world; first printed in Spaine in the Spanish tongue, and translated out of the originall. Now ripped up, unfolded, and by just examination condemned, as conteyning false, corrupt, and detestable wares, worthy to be damned and burned. Printed by the deputies of Christopher Barker. 1588. 4to.*

1588. Queen Elizabeth grants a patent to JOHN SPILMAN, a German, to erect a paper-mill at Dartford, in Kent, which has generally been considered the first in England; but several instances have been given to the contrary. The following work was first printed in 1588.

*A sparke of friendship, and warm good will; with a poem concerning the commodity of sundry sciences; especially concerning paper, and a mill, lately set up neer Dartford by a high German, called Mr. Spilman, jeweller to the queen majesty. 1588, 4to. Dedicated to sir W. Raleigh. Begins, enforced by affection that, &c. where friendship finds good grownd to grow upon.*

John Spilman is said to have brought over in his portmantua the two first lime trees, which he planted at Dartford, and are still growing.

\* The Roman poet (Ovid) in the following lines, shows the desire of the Roman people for news. Publius Ovidius (Naso) was born B. C. 43, and died A. D. 18.

Hither in crowds the vulgar come and go;  
Millions of rumours here fly to and fro;  
Lies mixt with truth, reports that vary still.  
The itching ears of folks unguarded all:  
They tell the tale; the tale in telling grows,  
And each relater adds to what he knows;  
Rash error, light credulity are here,  
And causeless transport and ill-grounded fear;  
New-raised sedition, secret whispers blown  
By nameless authors and of things unknown.  
Fame, all that's done in heaven, earth, ocean views,  
And o'er the world still hunts around for news.

Garth's *Ovid*, b. xii.

1588. THOMAS VAUTROLLIER was a scholar and printer from Paris, or Roan, came into England about the beginning of queen Elizabeth's reign, and first commenced business in Black Friars. On June 19, 1574, he received a patent, or licence, from the queen, to print the *New Testament*, [which he often inserted at the end. In 1584, he printed *Jordanus Brumus*, for which he fled, and the next year being in Edinburgh, he first taught that nation the use of doing their work in a masterly manner; where he continued until, by the intercession of friends, he procured his pardon; as appears from a dedication of his to the right worshipful Thomas Randolph, esq. where he returns him thanks for his great favour, and for assisting him in his great distress. He married his daughter, Jakin, to Richard Field, printer, in Black Friars, January 13, 1588, and buried several children in that parish, as appears from their church books. Vautrollier was a very curious printer, as is evident from his productions, and commonly used an Anchor within a compartment, with this motto, ANCHORA SPEI. He printed seventy-eight works, most of which were in Latin. In 1588, he printed *Certain advertisements out of Ireland, concerning the losses and distresses happening to the Spanish navy, upon the west coasts of Ireland, in their voyage intended from the northern isles beyond Scotland towards Spain. 4to.*

1588. A translation of the Bible into the Pomeranian tongue, a dialect of the Lower Saxony, was printed at Bardt, a sea-port town of Pomerania, in 4to. by order, and at the expense of Bogislans XIII. duke of Pomerania. It is said to have been printed on good paper, with neat types, and accompanied with plates. In 1590, the *Juvenilia* of M. A. Muretus, was printed at Bardt, bearing for imprint. *Bardt Pomerana, ex officina Principis.* A copy of this latter work is in the Bodleian library.

1588. ROBERT WALDEGRAVE, was descended from a good family, and commenced the art of printing in the year 1578, in the Strand, near Somerset House; from thence he removed to Foster-lane; but afterwards, by being the printer of the Mar-prelate tracts, his press was seized and destroyed, by the earl of Derby, at Manchester, which involved him in troubles, and obliged him to retire to Wales; but by the assistance of his friends, overcame his difficulties, and went to Edinburgh, when James VI. granted him a patent for printing the *Confession of Faith*, which is dated, March 13, 1589.

Waldegrave used as his mark, a Swan in an oval, and about it this motto, GOD IS MY HELPER.

In page 34 of *Martin Mar Prelate*, &c. are the following lines: "There was the last summer, a little catechisme, made by M. Davison, and printed by Waldegrave; but before he coulde print it, it must be authorized by the bishop, either Canterbury or London. He went to Canterbury to have it licensed, his grace committed it to doctor Neuerbegood (Wood) he read it ouer in half a yere; the booke is a great one,

of two sheets of paper. In one place of the booke the means of saluation was attributed to the worde (preached) and what did he thinke you? he blotted out the worde (preached) and would not have that worde printed; so ascribing the way to work mens saluation to the word read."

1588. In this year mention is made of one knave THACKWELL, a printer, in Wales, who is mentioned in a book intitled, *Bridge's*, &c. by Martin Marprelate, p. 23. where he says, pitifully complayning, is there any reason, why knave Thackwell, the printer, which printed popish and traitorous Welsh books, in Wales, should have more favour at your gracelesse handes, then poore Waldegrave, who never printed any book against you, that containeth either treason or impiety. Thackwell is at liberty to walk where he will, and permitted to make the most he could of his press and letters; whereas Robert Waldegrave dares not shew his face, for the blood-thirstie desire you have for his life, only for printing of bookes, which toucheth the bishops myters. You know that Waldegrave's printing press and letters were taken away; his press being timber, was sawen and hewed in peices, the yron work being battered and made unserviceable, his letters melted, with cases, and other tooles, defaced (by John Woolfe, alias Machivill, beadle of the stationers, and most tormenting executioner of Waldegrave's goods) and he himself utterly deprived for ever printing againe, having a wife and sixe small children. Will this monstrous crueltie never be revenged think you? when Waldegrave's goods was to be spoiled and defaced, there were some printers, that rather than all the goods should be spoiled, offered money for it, towards the reliefe of the man's wife and children, but this could not be obtayned, and yet popishe Thackwell, though he printed popishe and trayterous bookes, may have the favour to make money of his presse and letters. And reason to. For Waldegrave's profession overthroweth the popedom of Lambeth; but Thackwell's popery maintayneth the same. And now that Walgrave hath neither presse nor letters, his grace may dine and sup the quieter. Waldegrave hath left house and home, by reason of your unnatural tyrannie; having left behind him a poor wife and sixe orphans, without any thing to relieve them. For, the husband you have bereaved both of his trade and goods. Be you assured, that the crye of these will one day prevail against you, unless you desist from persecuting.

And good your grace, I do now remember myself of another printer, that had presse and letter in a place called Charterhouse, in London (in anno 1587, neere about the time of the Scottish queen's death) intelligence was given unto your good grace of the same, by some of the stationers of London; it was made known unto you, what work was in hand, what letter the book was on, what volume, viz. in octavo, in half sheetes, what workmen wrought on the same; namely, I. C. the earle of Arundel's man, and three of his servants, with their several names,

what liberalitie was bestowed on those workmen, and by whom, &c. Your grace gave the stationers the hearing of this matter, but to this day the parties were never called in coram for it; but yet by your leave my lord, upon this information unto your honourable worship, the stationers had newes, that it was made known unto the printers, what was done unto your good grace, and presently instead of the work, which was in hand, there was other appointed, as they say, authorized, by your lordship. I will not say it was your owne doing; but by your sleeve, thought is free. And my good L. (nay, you shall be none of my L. but M. Whitgift and you will,) are you partiall or no in all your actions, tell me? yes you are? I will stand to it? Did you get a decree in the high court of starchamber only for Waldegrave? If it bee in generall (and you not partiall) why set you not that printing presse and letters out of Charterhouse, and destroy them, as you did Waldegrave's? Why did you not apprehend the parties, why? because it was popery at the least, that was printed in Charterhouse; and that maintayneth the crowne of Canterbury? And what is more tolerable than popery? Did not your grace of late erect a new printer contrary to the foresay'd decree? One Thomas Orwine (who sometimes wrought popish bookes in corners; namely, *Jenus psalter*, *our ladies psalter*, &c.) with condition he should print no such seditious books, as Waldegrave hath done? why, my lord, Waldegrave never printed against the state, but only, &c.

It has been sufficiently shown that the liberty of the press hardly subsisted in this reign, which was chiefly owing to the jealousy of the government towards the Catholics, and the inveterate enmity which archbishop Whitgift bore the Puritans. Proclamations were continually being issued against seditious writing and printing, thus closing the public press against those who were considered enemies either to the church or state; yet in spite of every precaution, libels abounded, a clear demonstration that nothing is really gained by these violent suppressions and expurgatory indexes, which power in its usurpation may enforce, but only with reluctance is obeyed. Nothing can be a greater check to the wantonness of power, than the privilege of unfolding private grievances at the bar of public opinion. Thus the cause of individuals is made a public concern, and the general indignation which wrongs excite forms at once the severest punishment which can be inflicted on the oppressor, and one of the strongest bulwarks that can be raised in defence of the unprotected. Helvetius\* justly remarks, that the magistrate who prevents the liberty of the press, opposes all improvement in morality and politics; he sins against his country, he chokes the very seeds of

\* Claude Adrian Helvetius was a celebrated Dutch physician, who settled at Paris, and by administering ipecacuanha, in the dysentery, which raged violently in that city, gained a pension, and the appointment of inspector-general of the military hospitals. He died at Paris, Jan. 1, 1757, aged 65. He wrote some medical treatises.

those happy ideas which the liberty of the press would produce. And who can estimate that loss? Wherever this liberty is withheld, ignorance, like a profound darkness, spreads over the minds of men. It is then that the lovers of truth, at the same time that they seek it, fear to find it; they are sensible that they must conceal it, basely disguise it, or expose themselves to persecution, which every man dreads.

During the years 1588 and 1589, a paper war, (the first of its kind in England) was carried on with outrageous virulence between the episcopalian and the Puritans. The latter being shut out from every public press, contrived, in spite of every obstacle, to obtain a private one of their own. Elizabeth was harassed by the two factions of the intriguing Catholic, and the disguised republican. The age abounded with libels. Many a *Benedicite* was handed to her from the Catholics; but a portentous personage, masked, stepped forth from a club of Puritans, and terrified the nation by continued visitations, yet was never visible till the instant of his adieu—"starting, like a guilty thief upon fearful summons." A continued stream of libels ran through the nation, under the portentous name of MARTIN MAR-PRELATE. Never did sedition travel so fast, or conceal itself so closely. This extraordinary personage, in his collective form, for he is splitted into more than one, long terrified Church and State. He walked about the kingdom invisibly, dropping here a libel, and there a proclamation for sedition; but wherever *Martinism* was found, *Martin* was not. He prided himself in what he calls "Pistling the bishops," a very ambiguous term; but according to his own vulgar orthodoxy, pretends it only meant "Episling them." Sometimes he hints to his pursuers how they may catch him, for he prints "within two furlongs of a bounding priest," or "in Europe;"\* while he acquaints his friends, who were so often uneasy for his safety, that "he has neither wife nor child," and prays "they may not be anxious for him, for he wishes that his head might not go to the grave in peace."—"I come, with the rope about my neck, to save you, howsoever it goeth with me."—His press is interrupted, he is silent,

\* Oh read over D. John Bridges, for it is a worthy worke; or an epitome of the first booke of that right worshipfull volume, written against the Puritanes, in the defence of the noble clergy, by as worshipfull a priest, John Bridges, presbyter, priest, or elder, doctor of divinity, and dean of Sarum. Whereas the arguments of the Puritane are wicely prevented, that when they come to answer M. Doctor, they must needs say something, that hath been spoken. Compiled for the behoofe and overthrow of the persons, Jcckers, and curates, that have learnt their catechisms, and are past grace, by the reverend and worthy Martin Marprelate, gentleman, and dedicated to the consolation house. The epitome is not yet published, but it shall be, when the bishops are at convenient leisure to view the same. In the mean time let them be content with this learned epistle. Printed over sea, in Europe, within two furlongs of a bounding priest, at the cost and charges of M. Marprelate, gentleman. This piece contains 34 pages quarto, is full of personal reflections, and ends thus: Given at my castle, between two waies, neither four dayes from penitence benche, nor yet at the west end of Shroffside; but the fourteenth yeare at the least of the age of Charing-crosse, within a year of Midsommer, betwene twelue and twelue of the clocke. Anna pontificatus vestri quinto, and I hope vitium of nil Englishe Popes. By your learned and worthe brother, Martin Marprelate.

and Lambeth seems to breathe in peace. But he has "a son, nay five hundred sons," and *Martin junior* starts up.\*

Such were the mysterious personages who for a long time haunted the palaces of the bishops, and the vicarages of the clergy, disappearing the moment they were suddenly perceived to be near. Their slanders were not only coarse buffooneries, but the hottest effusions of hatred, with an unparalleled invective of nicknames. The very defects, the personal infirmities, the domestic privacies of the bishops were the inexhaustible subjects of these popular invectives. These "pillars of the state" were now called "its caterpillars;" and the inferior clergy, who perhaps were not always friendly to their superiors, yet dreaded this new race of innovators, were distinguished as "halting neutrals." Such was the strain of ribaldry and malice which Martin Marprelate indulged, and by which he obtained full possession of the minds of the people for a considerable time. These invectives were well farced for the gross taste of the multitude; and even the dialect of the populace affected, and perhaps the coarse malignity of two cobblers, Cliffe and Newman, who were connected with the party, often enlivened the satirical page, and were the industrious purveyors of sedition through the kingdom. Among the Martin Marprelate books was one entitled *The Cobler's Book*†.

Most of the books under Martin's name were composed by John Penry, John Udall, John Field, and Job Throckmorton, who all concurred in making *Martin*. See *Answer to Throckmorton's Letter*, by Sutcliffe, page 70; *More Work for a Cooper*; and *Hey any Work for a Cooper*; and *Some layd open in his Colours*;

\* The iust censure and reproofe of Martin junior, &c. This piece introduces in the second page the archbishop (Whitgift) giving instructions to find out the authors, and publishers of these libels, thus: Have you been carefull of us and our places, to find us out the press and letters, where-with these editious Martins are printed? Or, have you diligently sought mee out Waldegrave the printer, Newman the cobbler, Sharpe the booke binder of Northampton, and that editious Welshman Penry, who you shall see, will prove the author of all these libels? Promises 40l. and bids them have an eye to the shop of master Boyle, at the rose in Pauls church-yard, at the churches, where such as he names do preach, and at the inns, to see what carriage do go from and too London, to search the packes, &c. for these sort of libels. 1589. 12mo.

Theses Martinianæ;—That is, certaine demonstrative conclusions, sette downe and collected (as it should seeme) by that famous and renowned clerke, the reverend Martin Marprelate the Great; serving us a manifest and sufficient confutation of that ever the college of Cuttecaps, with their whole band of clergie-priests, hane, or can bring, for the defence of their ambitious and antichristian prelacie. Published and set forth as an after-birth of the noble gentleman himself, by a pretty scripling of his, Martin Junior, and dedicated by him to his good neame and nunka, maister John Kankerbury: how the young man came by them, the reader shall understande sufficiently in the epilogue. In the mean time whosoever can bring me acquainted with my father, Ile be bounde hee shall not loose his labour. Printed by the assignes of Martin junior, without any priviledge of the Cuttecaps. 1589. 16 leaves, 12mo.

Cater caps were square caps, which the bishops wore.

† The *Cobler's Book*, which denies the church of England to be a true church, and charges her with maintaining idolatry under the name of decency, in the habits, fante, baptism by women, gang-days, saints eves, bishoping of children, organs, wasfer-cakes, &c. See *Life of Whitgift*, p. 296.

were composed by Job Throckmorton. *MS. Note by Thomas Baker.* Udall, indeed, denied having any concern in these invectives, and professed to disapprove of them. We see Cartwright, however, of quite a different opinion. In Udall's library, some manuscript notes had been seen by a person who considered them as materials for a Martin Marprelate work in embryo, which Udall confessed was written "by a friend." All the writers were silenced ministers; though it is not improbable that their scandalous tales, and much of the ribaldry, might have been contributed by their lowest retainers.

Of the puritans, the chief was Thomas Cartwright, of whom we have already made mention at page 359 *ante*, was a person of great learning, and doubtless of great ambition. Early in life a disappointed man, the progress was easy to that of a disaffected subject. For some offence which he had taken at Cambridge, he expatriated himself several years, and returned fierce with the republican spirit he had caught among the Calvinists, at Geneva, which aimed at the extirpation of the bishops. The whole hierarchy was to be exterminated for a republic of presbyters; till through the church, the republican, as we shall see, discovered a secret passage to the cabinet of his sovereign. But, Cartwright, chilled by an imprisonment, and witnessing some of his party condemned, and some executed, after having long sustained the most elevated and rigid tone, suddenly let his alp of ice dissolve in the gentlest thaw that ever occurred in political life. Ambitious he was, but not of martyrdom! His party appeared once formidable, and his protection sure. Cartwright well knew the concealed writers of the Marprelate tracts, and equally approved of them, for they frequently consulted him, as appears by sir G. Paul's *Life of Whitgift*, page 65.

Sir Francis Walsingham, with many others of the ministers of Elizabeth, was a favourite of the Puritans, till he detected their secret object to subvert the government. This letter is preserved in Collier's *Eccles. Hist.* vol. ii. 607. The Puritans had begun to divide the whole country into classes, provincial synods, &c. They kept registers, which recorded all the heads of their debates, to be finally transmitted to the secret head of the classes of Warwick, where Cartwright governed as the perpetual moderator. These violent advocates for the freedom of the press had, however, an evident intention to monopolise it, for they decreed that "no books should be put in print but by consent of the classes. The very star chamber they justly protested against they were for raising among themselves.

One of their chief objects of attack was Thomas Cooper, bishop of Lincoln, a labourious student, but married to a dissolute woman, whom the university of Oxford offered to separate from him; but he said he knew his infirmity, and could not live without his wife, and was tender on the point of divorce. He had a greater misfortune than even this loose woman about

him: his name could be punned on, and the bishop may be placed among that unlucky class of authors who have fallen victims to their names. Marprelate, besides many cruel hits at bishop Cooper's wife, was now always "making the Cooper's hoops to fly off, and the bishop's tubs to leak out." The author of the books against bishop Cooper, is said to have been Job Throckmorton.\*

Dr. John Aylmer, bishop of London, was another hero of the celebrated Martin Marprelate. "That bitter Puritan accompanied the bishop most pitilessly to his domestic amusements. 'He will cry to his bowle,' writes Martin, 'Rub! Rub! Rub!' And when it goeth too far, he will say, 'the devil goe with it!' And then the bishop will follow!"

Who could imagine that the writers of these satires were learned men, and that their patrons were men of rank. But it is the nature of rebellion to unite the two extremes; for *want* stirs the populace to rise, and *excess* the higher orders. This idea is admirably expressed by Aylmer one of our elder poets:

Want made them murmur; for the people, who  
To get their bread, do wrestle with their fate,  
Or those, who in superfluous riot flow,  
Soonest rebel. Convulsions in a State,  
Like those which natural bodies do oppress,  
Rise from repletion, or from emptiness.—*Henry VII.*

The writers of these Martin Marprelate books have been tolerably ascertained, considering the secrecy with which they were printed; sometimes at night; sometimes hid in cellars, and never long in one place; besides the artificers used in their dispersion, by the motley personages, held together by an invisible chain of confederacy. This perambulatory press was first set up at Mousely, near Kingston, in Surry, thence conveyed to Fawsley, in Northamptonshire, the seat of sir Richard Knightley, who was a great favourite of the Puritan party, and at whose expense these satires were printed. From Fawsley the press was removed to Norton, from there to an empty house belonging to Mr. Hales, cousin to sir Richard Knightley, situate in White Friars, in the city of Coventry, and which was

\* *Hay any work for Cooper; or a brieffe platte, directed by way of an addication to the reverende byshopps, counselling them, if they will needs be burrelled up, for feare of smelling in the nostrils of her Majestie and the state, that they would use the advice of reverend Martin, for the providing of their Cooper. Because the reverend T. C. (by which mistial letters, is understood, either the bousing parson of Eastmeane, or Tom Coakes, his chaplaine) to be an unskilful and deceptfull tubtrimmer. Wherein worthy Martin quitta himselfe like a man I warrant you, in the modest defence of his selfe and his learned pistles, and makes the Coopers hoops to flye off, and the bishops tubs to leake out of all crye. Penned and compiled by Martin the Metro-politane. Printed in Europe, not farre from some of the Bousing Priests. 1588. 46 pages 4to.*

A copy of this work was offered for £3 2s. An admonition to the people of England; wherein are answered, not only the slanderous untruths, reproachfully uttered by Martin the libeller, but also many other crimes by some of his broode, objected generally against all bishops, and the chief of the clergy, purposely to deface and discredit the present state of the church. By Thomas Cooper, afterwards bishop of Lincoln, and translated to Rochester. London, printed by the deputies of Christopher Barker, 1589. 4to.

lent to Waldegrave the printer, at the request of sir Richard. It appears that Hodgskins, one of the journeymen printers, refused to proceed any farther than Coventry, and would have made his submission, but he was told by sir Richard Knightley that the lords were so incensed that if he returned to London, they would have him hanged. The next step of this moveable press was to the house of sir — Wickstone, at Woolston, in Warwickshire, where it was erected in a parlour, and Mrs. Wickstone informed her husband that it was works of embroidery, and she willed him to will his servants not to peep or pry into the parlour; since it pertained not to them. Hodgskins and two others printed *Martin senior* and *Martin junior*. Hodgskins was desired to print more but he refused. From Woolston the press was conveyed to Warrington, in Lancashire, and at their departure Mrs. Wickstone gave them two shillings and sixpence, and her husband, two shillings. The labour of this press was brought to its final close at Manchester,\* where it was discovered by the earl of Derby, while printing *Ha' ye any more work for the Cooper.*† The press was destroyed, Waldegrave made his escape, but several others were taken and imprisoned. Hodgskins was admitted in evidence upon the trial, and made a full confession as to the route the press had travelled, and by whom entertained.

Sir Richard Knightley,‡ sir — Wickstone and

\* The press at Manchester was set up some where in Newton lane, which would at that time, no doubt, be some distance from the town.

Some of these works still bear evident marks that the "pursuivants" were hunting the printers. The printing and the orthography show all the imperfections of that haste in which they were forced to print the following work.

† *Protestation of Martin Marprelate: wherein, notwithstanding the surprising of the printer, he maketh it known unto the world, that he feareth neither proud priest, anti-christian pope, tyrannous prelate, nor Godless cater-cap, but defeth all the race of them by these presents, and offereth conditionally, as is fathers expressed herein by open disputation, to appear in the defence of his cause against them and theirs. Which challeng, if they dare not maintain against him, then doth he also publish that he never meaneth by the assistance of God to leave the assylum of them, and their generation, untill they be utterly extingulished out of the church. Published by the worthis gentleman D. Martin. Marprelate D. in all the faculties primat and Metro Politan. 1599. Twelves.*

‡ Sir Richard Knightley was several times member of parliament for the county of Northampton, in the reign of queen Elizabeth. Camden says, "that at this time several scurrilous pamphlets were published against the church of England, by the dissenters; the great patrons and abettors were sir Richard Knightley and Wickstone, persons in other respects sober and pious, drawn into the party by some instruments that were to make a private market of them. However, the knights had a pretty round fine laid on them in the Star Chamber; but the archbishop of Canterbury was so generously good natured, as to procure a remission of it at her majesty's hands. See Camden's *Eliz.* in the *Complete History of England*, vol. II. p. 550. It is stated in Bridge's *Northamptonshire*, by Jebb, folio, p. 65, that though sir Richard Knightley was zealous for the Puritan party, he joined with sir Francis Hastings in presenting a petition to the House of Commons, for granting a toleration to the Catholics.

At sir Richard Knightley's the *Epitome* was printed. He sent a ring to his man Jackson, by Penry, to receive a load of stuff into his house, which was the press and other necessaries for printing. Newman, the cobler, and dispenser of the books, wore his livery; and Wastel, his man, helped Waldegrave away from his house, to Mr. Hales, at Coventry; Fox, his schoolmaster, and Wastel his servant, commonly read the books in sir Richard's house, and scoff and scorn at John of Canterbury.—*State Trials*.

his wife, and Mr. Hales, were arraigned in the star chamber for maintaining seditious persons, books and libels, Feb. 31, 1588, and found guilty of harbouring an itinerant printing press. For punishment it was agreed by all the judges that sir Richard Knightley should be fined £2000; Mr. Hales, £1000; sir — Wickstone, for obeying his wife, and not discovering it, five hundred marks; Mrs. Wickstone, £1000; and all of them imprisoned during her majesty's pleasure.

Martin seems to have written little verse; but there is one Epigram worth preserving for its utter bitterness.

Martin Senior, in his *Reproove of Martin Junior*, complains that "his younger brother has not taken a little paines in ryming with Mar-Martin (one of their poetical antagonists) that the Cater-Caps may know how the meanest of my father's sons is able to answere them, both at blunt and sharpe." He then gives his younger brother a specimen of what he is hereafter to do. He attributes the satire of Mar-Martin to doctor Bridges, dean of Sarum, and John Whitgift, archbishop of Canterbury.

#### *The first rising, generation, and original of MAR-MARTIN.*

From Sarum came a Goose's egg,  
With specks and spots bepatched,  
A Priest of Lambeth cooht thereon,  
Thus was MAR-MARTIN hatched.

Whence bath MAR-MARTIN all his wit,  
But from that egge of Sarum;  
The rest come all from great sir John,  
Who rings up all this 'larum.

What can the Cockatrice hatche up  
But Serpents like himselfe?  
What sees the ape within the glasse  
By a deformed Elle?

Then must MAR-MARTIN have some smell  
Of forge, or else of fire;  
A soffe in wit, a beaste in minde,  
For so was Damme and Sire.

Of the heads of this party were John Penry and John Udall, two self-devoted victims to non-conformity. The most active was John Penry, or Ap Henry. He exulted that he was born and bred in the mountains of Wales: he had, however, studied at both our universities. He had all the heat of his soil, and of his party. He "wished that his head might not go down to the grave in peace," and was just the man to obtain his purpose. He was born in 1559, and studied at Cambridge, where he took the degree of A.B., in 1584; he afterwards removed to Oxford, and took the degree of A.M., and was ordained priest. According to Fuller, he was executed at St. Thomas, Watering, May 29, 1593. The papers upon which he was convicted, contained only an implied denial of the queen's absolute authority to make, enact, decree, and ordain laws. His sentence was both illegal and unjust,—state necessity claimed another victim; and this ardent young man, who, after condemnation, had his death unexpectedly postponed, was

suddenly hurried from his dinner to a temporary gallows; a circumstance marked by its cruelty, but designed to prevent an expected tumult. He left a wife and four infants to deplore his untimely fate.

The populace seems to have been divided in their opinions respecting the sanity of his politics, as appears by some ludicrous lines, made on Penry's death, by a Northern rhimer:

The Welshman is banged,  
Who at our Kirke flanged,  
And at the state banged,  
And brended are his buks.  
And though he be banged,  
Yet he is not wranged;  
The De'il has him flanged  
In his kraked klucks.

Wecce's *Funerall Monuments*, p. 86, Edit. 1651.

Few political conspiracies, wherever religion forms a pretext, is without a woman. The old women, and the coblers (Cliffe and Newman), connected with these Martin Marprelates, are noticed in the burlesque epitaphs on Martin's death, supposed to be made by his favourites, a humorous appendix to *Martin's Months mind*. One dame Lawson is thus noticed in the mock epitaphs on Martin's funeral.

Away with silk, for I will mourn in sacke;  
Martin is dead, our new coat goes to wrack.  
Come, gossip mine, put finger in the cle,  
He made us laugh, but now must make us cie.

DAME LAWSON.

Cliffe's epitaph, on his friend Martin, is not without humour:

Adieu, both naile and bristles now for ever;  
The shoe and sole—Ah, woe is me!—must sever.  
Bewalle, mine awle, thy sharpest point is gone!  
My bristle's broke, and I am left alone.  
Farewell old shoes, thumb-stall, and clouting-leather;  
Martin is gone, and we undone together.

Nor is Newman, the other cobbler, less mortified and pathetic:

My hope once was, my old shoes should be stitcht;  
My thumbs ygit, that were beight:  
Now Martin's gone, and laid full deep in ground,  
My gentry's lost, before it could be found.

Contrasted with this fiery Mar-prelate, was another, the learned and subtle John Udall. His was the spirit which dared to do all that Penry had dared, yet conducting himself in the heat of action with the tempered wariness of age: "If they silence me as a minister," said he, it "will allow me leisure to write; and then I will give the bishops such a blow as shall make their hearts ache." It was agreed among the party neither to deny, or to confess writing any of their books, lest among the suspected the real author might thus be discovered, or forced solemnly to deny his own work; and when the bishop of Rochester, to catch Udall by surprise, suddenly said, "Let me ask you a question concerning your book," the wary Udall replied, "It is not yet proved to be mine!" He adroitly explained away the offending passages the lawyers picked out of his book, and in a contest between him and the judge, not only repelled him with his own arms, but when his lordship would have wrestled on points of divinity, Udall expertly perplexed the lawyer,

by showing he had committed an anachronism of four hundred years! He was equally acute with the witnesses; for, when one deposed that he had seen a catalogue of Udall's library, in which was inserted *The Demonstration of Discipline*, the anonymous book for which Udall was prosecuted, with great ingenuity he observed that this was rather an argument that he was not the author, for "scholars use not to put their own books in the catalogue of those they have in their study." We observe with astonishment, the tyrannical decrees of our courts of justice which lasted till the happy revolution. The bench was as depraved in their notions of the rights of the subject in the reign of Elizabeth, as in those of Charles II. and James II. The court refused to hear Udall's witnesses, on this strange principle, that "Witnesses in favour of the prisoner were against the queen!" To which Udall replied, it is for the queen to hear all things, when the life of any of her subjects is in question.\* The criminal felt what was just, more than his judges.

The last stroke of Udall's character is the history of his condemnation. He suffered the cruel mockery of a pardon granted conditionally, at the request of the Scottish monarch, but never signed by the queen—and Udall mouldered away the remnant of his days in a rigid imprisonment.\* He died in the Marshalsea about the latter end of the year 1592.

The writers on the side of the church yield not to the *Martinists* in buffoonery and abuse; by their extraordinary effusions, prodigal of humour and invective almost unparalleled. This was the proper way to reply to such writers, by driving them out of the field with their own implements of warfare; and this author and his party more honourably triumphed than the government, who silenced *Martin Marprelate* by the cord. One of the most celebrated government pamphlets was entitled *Pappe with an hatchet*,† and was probably written after *Martin*

\* What different conclusions are drawn from different facts by different writers. Heylin, arguing that Udall had been justly condemned, adds, "the man remained a living monument of the archbishop's goodness to him, in the preserving of that life which by the law he had forfeited." But Neale, on the same point, considers him as one who died for his conscience, and stands upon record as a monument of the oppression of the government. All this opposition of feeling is of the nature of party spirit; but what is more curious in the history of human nature, is the change of opinion in the same family, in the course of the same generation. The son of this Udall was a great zealot for conformity, and as great a sufferer for it from his father's party, when they possessed political power. This son would not submit to their oaths and covenants, but, with his bed-ridden wife, was left unmercifully to perish in the streets.—Walker's *Sufferings of the Clergy*, part ii. p. 188.

† *Pappe with an hatchet*, alias, a *fig* for my godson; or, crack me this nut; or, a country cutie, that is, a sound box of the ear for the idiot Martin to hold his peace, seeing the patch will take no warning: Written by one, that dars call a dog a dog, and made to prevent Martin's dog dars. Imprinted by John Anoke, and John Asitie, for the baytaine of Withernam, Cum privilegio parantissatis, and are to be sold at the signe of the Crab-tree outdell, in Thowch-coad-lane. A sentence, Martin hangs fit for my moving. Dedicated to the father, and the two sonnes, Hufe, Ruffe, and Snaffe, the three tame ruffians of the church, which take pepper in the nose, because they cannot Marre Prelates: grating. 1599. Quarto.

had swallowed some of his own sauce, or taken his *pap* (offered to him) *with an hatchet*. In another rare pamphlet from the same school, *Pasquil of England*,\* he humourously threatens to write "the *Oule's Almanack*, wherein your night labours be set down;" and "some fruitful volumes of the *Lives of the Saints*, which, maugre your father's five hundred sons, shall be printed," with "hays, jiggs, and roundelays, and madrigals, serving for epitaphs for his father's hearse." The following extract may serve as a specimen of the language employed in this singular warfare. *Martin* once met with an adversary who openly declared, "I profess rayling, and think it as good a cudgell for a *Martin* as a stone for a dogge, or a whip for an ape, or poison for a rat. Who would curry an ass with an ivory comb? Give this beast thistle for provender. I doe but yet angle with a sinken flie, to see whether *Martins* will nibble, and if I see that, why then I have worms for the nounce, and will give them line enough, like a trowte, till they swallow both hook and line, and then, *Martin*, beware your gills, for I'll make you daunce at the pole's end. Fill thy answer as full of lies as of lines, swell like a toade, hiss like an adder, bite like a dog, and chatter like a monkey, my pen is prepared, and my mind; and if you chauce to find anie worse words than you broughte, let them be put in your Dad's dic-

\* *The Returne of the renowned Cavallero Pasquille of England, from the other side the seas, and his meeting with Marforius, at London, upon the Royal Exchange. Where they encounter with a little household talk of Martin and Martinism, discovering the scabbe that is bredde in England, and conferring together about the speedy dispersing of the "Golden Legend of the Lives of the Saints."*

Beneath this is a device cut in wood, of a caduceus, with mottoes; and below, these words.

If my breath be so hott as I burne my mouth, suppose I was printed by Pepper Allie, Anno Dom. 1589. 4to. 16 leaves.

The squibs affixed to the statue of *Pasquin*, are usually termed *Pasquills*; but here that name is given to him.

A counter-cuffe given to *Martin junior*, by the centurion, hardie, and renowned, *Pasquil of England, Cavallero*. Not of old *Martin's* making, which newly knighted the saints in heaven with "Uppe, Sir Peter, and Sir Poule!" but lately dubbed for his service at home, for the defence of his country, and for the cleane breaking of his staffe on *Martin's* face. Printed between the stile and the grونده, within a myle of an oke, and not many fields off from the unpri- vileged presse of the assignees of *Martin junior*. 1589. Quarto.

A whip for an ape; or *Martin displaced*. With a Latin distich. 1489. Quarto.

*Martin's Months minde, that is, a certain report and true description of the death and Funerall of olde Martin Marprelate the Great, Makebate of England, and father of the factions. Contayning the cause of his death, the manner of his buriall, and the right copies, both of his will, and such epitaphs, as by sundrie his discreet friends and other of his well wishers were framed for him.*

*Martin the ape, the drunke, and the madde, The thre Martins are, whose works we haue had. If Martin the fourth come after Marties so euill, Nor man nor beast comes, but Martin the Deuill.*

A copy of this work was offered at £s 8s.

An almond for a parrot; or, an alms for *Martin Marprelate*, &c. By Caliberti Curry-knave. 1589. Quarto. A mirror for Martinists, and all other schismaticks, and friendly admonition to *Martin Marprelate* and his males, both in 4to. printed by John Wolfe, in 1590.

The principal writer of the above tracts was Thomas Nash, for an account of whom see the year 1600. Poet.

tionarie. Farewell, and be hanged; and I pray God you fare no worse. Yours at an hour's warning."

If sedition has its progress, it has also its decline; and if it could not strike its blow when strongest, it only puled and made grimaces, prognostics of weakness and dissolution. This is admirably touched in *Pappe with an Hatchet*. "Now, old *Martin* appeared, with a wit worn into the socket, twinkling and pinking like the snuffe of a candle; *quantum mutatus ab illo*, how unlike the knave he was before, not for malice, but for sharpnesse! The hogshead was even come to the hauncing, and nothing could be drawne from him but dregs; yet the emptic caske sounds lowder than when it was full, and protests more in his waining than he could performe in his waxing. I drew neere the sillie soul, whom I found quivering in two sheets of protestation paper (alluding to the work mentioned in note, page 404.) O how meager and leane he looked, so crest false that his combe hung downe to his bill, and had I not been sure it was the picture of *Envie*, I should have sworn it had been the image of *Death*: so like the verie anatomic of mischief, that one might see through all the ribbes of his conscience."

Men echo the tone of their age, yet still the same unvarying human nature is at work; and the *Puritans*, who in the reign of Elizabeth imagined it was impossible to go too far in the business of reform, were the spirits called *Round-heads* under Charles, and who have got another nick-name in our own days. These wanted a reformation of a reformation; they aimed at reform, and designed revolution; they would not accept toleration, because they had determined on predominance. We know them by the name of *Puritans*, a nick-name obtained by their affecting superior sanctity; but they were often distinguished by the more humble appellation of *Precians*. A satirist of their day, in *Rythmes against Martin Marprelate*, melts their attributes in one verse:

The sacred sect, and perfect pure *precie*.

Warner, in his *Albion's England*, describes them:

If ever England will in aught prevent her own mishap,  
Against these Skomes (no term too gross) let England  
shut the gap;  
With giddie heads—

Their countrie's foes they helpt, and most their country  
harm'd,

If *Hypocrites* why *Puritaines* we term, be asked, in breefe,  
'Tis but an ironised terme: Good fellow so spells theefe.

Elizabeth herself only considered them as "a troublesome sort of people;" even that great politician could not detect the political monster in a mere chrysalis of reform. Their history exhibits the curious spectacle of a great religious body covering a political one; and though crushed in the reign of Elizabeth, and beaten down in that of James, so furiously triumphed under Charles.

Few of our native productions are so rare as the *Martin Marprelate* publications. They are not to be found in the public repositories of our

national literature. They have been probably rejected with indignity, though their answers have been preserved, yet even these are almost of equal rarity and price. They were rejected in times less enlightened than the present. In a national library every book deserves preservation. By the rejection of these satires, however absurd, we have lost a link in the great chain of our national literature and history.\*

1588. In the churchwardens' accounts of the church of Tavistock, in Devonshire, are the following items:

Item, paid for a chayne and settinge thereof, for the fastenynge of the *Dictionarie* in the schole howse, 1*xd*. Erasmus's *Paraphrase on the Gospels* remain at the present time thus secured in Tavistock church, the original cost of which, according to another item, was 15*s*.

Item, paid Thomas Watts for amendynge of the *Bible*, and the *bookes of Co'men Prayer*, beyng toren in dyvers places, 1*iii*. 1*ii*d.

1588. *The English Ape, the Italian Imitation, the Foote-steppe of Fraunce*. Wherein is explained the wilful Blindness of subtile Mischiefe, the striving of Starres, the catching of Moonshine, and the secreete Sound of many hollow hearts. By W. R. *Nulla Pietas Præiis*.

At London. Imprinted by Robert Robinson, and are to be sold by Richard Jones, dwelling at Holbourne Conduit, at the sign of the Rose and Crowne. 1588. This singular tract is in black letter, and inscribed "To the Right Hon. and my singular good Lord, Syr Christopher Hatton, Knight, Lord Chauncellor of England, Knight of the most noble Order of the Garter, and one of her Majesties most honorable Privie Counsell." This appears to be a severe satire on the manners of the times, particularly as they relate to dress. The author is very harsh indeed, when speaking of his countrywomen.

"It is a wonder more than ordinary to beholde theyr perewigs of sundry collours, theyr paynting potts of perlesse perfumes, theyr boxes of slobber sauce, the fleeking of theyr faces, there strayned modesty, and theyr counterfayte coyennesse. In so much that they rather seeme curtyzans of Venyce, than matrones of Englande, monsters of Ægypt, than modest maydens of Europe, inchaunting syrens of Syrtes, then diligent searchers of vertue: these inchantments charme away theyr modesty, and entrap fooles in folly. Bewitcheth them selves wyth wanton wyles, and be setteth other with these bitter smyles." The conclusion is an extravagant compliment to the queen, whom the author calls the "Phenix of the world."

1588. *Discourive Probleme concerning Prophecies, how far they are to be valued, or credited, according to the surest rules, in Diuinitie, Philo-*

*sophie, Astrologie, and other learning.* By John Harvey. London, imprinted by John Jackson

In a copy of this work formerly in the possession of Mr. Herbert, the editor of Ames's *Typographical Antiquities*, a manuscript note by Mr. Herbert states, "that this is the first instance where the word begun in one line, has been printed w<sup>a</sup> the same type in y<sup>e</sup> succeeding line, which is printed in a diff type."—Although not very distinctly expressed, it is yet intelligible.

1598. The whole of the Sacred Scriptures were published in Welsh, with the following title: *Y Bibl Cysegrlan, sef yr Hen Destament, a'r Newydd*, 2 Tim. iii. 14, 15, and *Testament Newydd ein Harglwydd Jesu Grist*, Rom. i. 16.

This edition was under the superintendence of Dr. William Morgan,\* vicar of Llanrhaidr yn Mochnant, in Denbighshire. The coadjutors of Dr. Morgan, in this important undertaking, were the Drs. William Hughes, Hugh Bellott, David Powell, Edmund Price, and Richard Vaughan; to whom Willis adds John Salisbury, bishop of Man. Dr. Whitgift liberally contributed to the expenses of the translation, in conjunction with Dr. Gabriel Goodman, dean of Westminster, a native of Ruthin, in the principality; and entertained Dr. Morgan, while he continued in London. It was printed by Christopher Barker, the queen's printer, in 310 pages folio, with a fine black letter, and the typographical execution elegant and correct. Mr. Hughes says, "It reflects great credit on the persons engaged in it. It is the Word of God faithfully rendered from the original tongues, for which the English version served as an excellent guide. The Welsh translators were men of the first respectability as scholars and divines, and their work bespeaks them to be such."

1589. Jan. 1. A precept from the lord mayor requiring the master, wardens, and of the comliest personages of the company of stationers, to attend him at the park corner above St. James's on horseback, in velvet coats, chains of gold, and with staff torches, to wait on the queen, "for recreating of her majesty" in her progress from Chelsea to Whitehall.

1589. *The arte of English poesie, contrived in three books; 1*st*, of poets and poesie; 2*ndly*, of proportion; 3*dly*, of ornament.* By Webster Puttenham. Imprinted by Richard Field, at the sign of the Anchor, in Black Friars, near Ludgate. 1589, 12mo. Containing a very good portrait of queen Elizabeth.†

Although the above work is dated 1589, it

\* William Morgan was born at Gwibesant, in Carnarvonshire, and educated at Cambridge. In 1595, he was preferred to the bishoprick of Llandaff; and in 1601 to the see of St. Asaph. He died Sept. 10, 1664, and was buried in his church.

† Puttenham records in this work an honourable anecdote of Elizabeth, and characteristic of that high majesty which was in her thoughts, as well as in her actions. When she came to the crown, a knight of the realm, who had insolently behaved to her when lady Elizabeth, fell upon his knees, and besought her pardon, expecting to be sent to the tower: she replied mildly, "Do you not know that we are descended of the lions, whose nature is not to harm or prey upon the mouse, or any other such small vermin?"

\* For many curious particulars concerning the press, and the authors of the tracts, the reader is referred to Dr. Isaac's *Quarrels of Authors*, vol. iii. Paul's *Life of Archbishop Whitgift*. Howell's *State Trials*, vol. i. Bridge's *Northamptonshire*, by Jebb. Neale's *History of the Puritans*, by Toumin. ed. 1822. Beloe's *Anecdotes of Source Books*, vols. iii. and vi. and Lowndes's *Bibliographical Manual*.

was manifestly written much earlier. Our author refers to sir Nicholas Bacon, who began to be high in the department of the law in queen Mary's time, and died in 1579. See page 116, where Puttenham tells a story, from his own knowledge, in the year 1553, of a ridiculous oration made in parliament by a new speaker of the house of commons, &c.

In a copy of this book, formerly belonging to Ben Jonson, is the following list of the works of Puttenham. The list is in the hand-writing of old Ben himself.

*Hierotechnini. A Briefe Romance of the Isle of G. Brittain. Triumphalles. Gynæcecratia. The Originals and Pedigree of the Engl. Tounge. The Enter-view of two great Princesses. Elphine, an Eclogue. Lustie London, an Enterlude. Epitaphs. Partheniades. The Wooer, an Enterlude. Minerva an Hymne. Philocalia. A Booke de Decore.*

Webster Puttenham was a travelled courtier, and has interspersed his curious work with many lively anecdotes of the times.

1589. Certaine articles collected, and (as it is thought) by the byshops out of a litle booke entituled, *An admonition to the parliament, wyth an answer to the same; containing a confirmation of the said booke in shorte notes.* Essay. v.

20. The prynter to the reader:

This worke is fynished thanks be to God,  
And he only wil keepe us from the searchers rod.  
And though master Day, and Toye, watch and war  
We hope the living God is our sauergarde.  
Let them seek, loke, and doe now what they can,  
It is but intentions, and pollices of man.  
But you will marvel where it was finished,  
And you shall know(perchance) when domesday is ended.  
Imprinted we know where, and when  
Judge you the place and you can.—J. T. J. B.\*

1589. *The Spanish Masquerado, wherein, under a pleasant Device, is discovered effectually in certaine briefe Sentences and Mottos, the pride and insolencie of the Spanish Estate; with the disgrace conceived by their losse, and the dismayed confusion of their troubled thoughts. Whereunto by the Author, for the better understanding of his device, is added a briefe Glosse.* By Robert Greene, in Artibus Magister.

Twelve articles of the state of Spaine.

*The Cardinalls sollicite all.  
The King graunteth all.  
The Nobles confirme all.  
The Pope determineth all.  
The Cleargie disposeth all.  
The Duke of Medina hopes for all.  
Alonso receiues all.  
The Indians minister all.  
The Souldiours eat all.  
The People paie all.  
The Monkes and Friers consume all.  
And the Devil at length will carry away all.*

This Tract is thus inscribed.

*To the right worshipful M. Hugh Osfey, Sheriffe of the Citie of London, Robert Greene wisheth increase of worship and vertue.*

\* This is one of the Marprelate Tracts.

1589, *Died*, CHRISTOPHER PLANTIN, the justly celebrated printer at Antwerp, the beauty and correctness of whose workmanship is attested by numerous publications in almost every branch of literature. He was born at Mont Louis, near Tours, in France, in the year 1514, and was instructed in the typographic art under Robert Macè, the king's printer at Caen, from whence he went to Antwerp, and formed by degrees one of the greatest establishments for printing in Europe, and said indeed to be unique. The earliest production of his press is a piece translated from the Italian, entitled, *La institutione di una fanciulla nota nobilmente*, bearing his imprint, with the date 1555. It is a small duodecimo of sixty pages, and is expressly named by Plantin, in the dedication, as the first-fruits of his press: *cestuy premier bourjon sortant du jardin de mon imprimerie.*

"I am well aware," says Scribanus, "that many illustrious men have flourished as printers; I have known the Alduses from Italy—the Frobens from Germany—and the Stephenses from France; but these are all eclipsed in the single name of PLANTIN! If they were the stars of their own hemispheres, you, Plantin, are the sun—not of Antwerp, nor of Belgium only—but of the world." His office was upon the most magnificent scale, and even the building was accounted one of the ornaments of the city of Antwerp, and was so amply furnished with presses, founts of letter of all sorts, and a foundery, as to have cost an immense sum of money. It is stated that Plantin's ideas were so magnificent, as that he cast some founts in silver, and considered himself as having in that respect done what no other printer had attempted; but this is a mistake, as Robert Stephens had before indulged himself in the luxury of silver types, although not so rich a man as Plantin. In its prosperous days, upwards of ONE HUNDRED GOLDEN CROWNS PER DAY were spent in the payment of correctors and pressmen. When the celebrated De Thou paid him a visit, in 1576, he had seventeen presses at work, and the wages of his workmen amounted to 200 florins (or £17 1s. 8d. sterling) a-day. But what redounds most to his credit, was the number of the men of learning whom he retained in his service, and rewarded with great liberality for their assistance in correcting them. Among these were Victor Giselin, Theodore Pulman, Antony Gesdal, Francis Hardouin, Cornelius Kilien, and Francis Rapheleleng, who became his son-in-law. Cornelius Kilien, one of the most learned and accurate of them, spent fifty years in this printing-house. It is added that he was so fastidious as not altogether to trust to the assistance he received, nor even to rely on his own skill and knowledge, both of which were great, but used also to hang up the proof sheets, often undergoing every possible degree of correction, in some conspicuous place, promising reward for the detection of errors. In this likewise, he followed the example of Robert Stephens. The king of Spain gave him the title of *archi-typographus*, and accom-

panied this title with a salary sufficient to support it and his printing office; and a kind of patent for the printing of certain works, particularly of the religious kind, with which, says Ballart, he almost exclusively served Europe and the Indies.

Besides his establishment at Antwerp, Plantin set up another at Leyden, and a third at Paris. The king of France would have fain persuaded him to return to his native country; but he preferred remaining at Antwerp. The printing-office at Leyden, he bestowed on his son-in-law, Francis Raphelengius, who had been one of his correctors; and took into partnership, at Antwerp, John Moret, who had married his second daughter. He gave likewise to Giles Beys, a Parisian, the office he had established at Paris, as a portion with his third daughter. After all this, and the constant expenses of his living and establishment, he was enabled to leave a considerable fortune to his daughters, for he had no son. He died in his seventy-fifth year, and was interred in the great church at Antwerp. His epitaph may be seen in Foppens, Maittaire, and others; it is terse, vigorous, and just—concluding with these lines:

*Christopherus situs hic Plantinus, Regis Iberi  
Typographus: sed Rex Typographum ipse fuit.*

His device was a pair of compasses, with the motto, *LABORE ET CONSTANTIA*. A motto, says Dr. Dibdin, which is the surest road to the very pinnacle of the temple of Fame; whether used by great statesmen, great generals, great scholars, great divines, great architects, or great mechanics. Thomas Sourbon, a printer at Lyons, in 1614, used Plantin's *Compasses* in a very elaborate border, with the motto *METRON ARISTON*; and Laurent Sonnius, at Paris, in 1619, introduced the same device, with a ship in the stride of the compasses, both upon copper and wood.

One William Pantin, (see Baillet, vol. i. pt. 1, p. 72) compares the office of Plantin "to the belly of the Trojan horse—adding, that many more heroes, (in the shape of Hebrew, Greek, and Latin books) issued from it, than there came Grecian warriors from the horse of Troy." A droll comparison, says Dr. Dibdin, and possibly *unique*. But of all these heroes, in the shape of a book, none was ever gifted with so colossal a stature, none ever achieved such stupendous deeds, and none received such unqualified eulogy, as the *Biblia Polyglotta, &c. Antwerpia*, 1561-1572, (see page 351, *ante*.) It has been called over and over again, the eighth wonder of the world.

Plantin's house at Antwerp stands in the *Friday market*, near the Scheldt. In the early half of the seventeenth century, it was visited by Goltzius, and from the description which he has given in his *Itinerary*, it seems that since his time, at least, it has not undergone any alteration. John Moretus, the husband of Plantin's second daughter, succeeded to the printing office after Plantin's death. M. Moretus, the proprietor in 1817, was his lineal descendant. Five

of Plantin's massy presses were then in the press room, in good repair; the others were destroyed by the French when they took possession of the town. At a later period the French authorities put the remaining presses under seal; the cause of this proceeding was not explained, but the seals had not been removed in 1815, notwithstanding that a change of government had taken place. Many relics are still preserved of this extraordinary printer; his *writing desk*—his *brass lamp*—his *high-backed smooth-worn arm-chair*—his *piles of ledgers*—the *matrices of his types*—and the *copper-plates* employed in the works he printed. Baillet says, that a catalogue of the books printed in Plantin's office was published at Antwerp, in 1608, 8vo.

In the *Bibliographical Decameron*, vol. ii. p. 157, there is a view of Plantin's house, and two portraits, and from them the physiognomy of this eminent man appears truly noble.

Many books executed by the celebrated family of the Plantins omit the name of the place where printed; they proceeded either from Antwerp or Leyden, at both which towns they had printing establishments.

A choice of emblemes, and other devices, for the most part gathered out of sundrie writers, Englished and moralized. And divers newly devised by Geoffrey Whitney. Imprinted at Leyden, in the house of Christopher Plantyn by Francis Raphelengius. This book is dedicated to Robert earl of Leycester, at London 28 November, 1585. Many of the very neat wooden cuts, and verses, are inscribed to the greatest men of the age, both here and abroad. It contains 230 pages besides dedication, &c. and as many, or more devices.

1589. Frederick II. king of Denmark, resolved that the Bible should be re-printed in the Danish language, according to the German bibles printed at Wittenberg, with the summaries of Vitus Theodorus, and Luther's marginal notes and concordances, yet so as that the Danish text should, in the principal places, be rendered agreeable to the Hebrew verity;—That such *scholia* as differed from the text, thus corrected, were to be omitted; but that such of Luther's notes as agreed with it were to be retained. In this year the bible was published at Copenhagen, in large folio. On the back of the title-page is the portrait of Frederick II., and on the opposite page, are the Danish arms. The paper is of the same quality with that used in the former edition, but the type is considerably larger. The wood-cuts are retained, and the first letter of every chapter is likewise struck with a wooden engraving. Each page is divided into two parallel columns, on both sides of which are Luther's notes and references. It is divided into three parts; and at the end of each, the date when it was finished; viz. the first in 1588, and the two last in 1589.

1589. The first edition entire of the whole Bible in the Hungarian language, was printed at Wysolyin, or Visoly, near Gönz, in 4to. Gaspard Caroli, or Karoli, pastor of the church

of Gönz, and dean of the brethren of the valley of Caschau, was the author of this version. He was a native of Hungary, and had studied at Wittenburg, where he probably imbibed the principles of the reformation. Animated by a desire to communicate the bible to his countrymen in their own language, he undertook the laborious task of translation, and employed Albert Molner then a young man, and afterwards regent of the college of Oppenheim, in correcting the press, and conveying the work to and from the printer. In order to facilitate the work, count Stephen Bathory invited VALENTINE MANSKOVITZ, a printer, from Germany, and established a printing office at Visoly, a town which belonged to the count, and was not far distant from the residence of the translator. A work of such magnitude and difficulty could not be supposed, however, to be perfected at the first attempt, and Albert Molner, the assistant of Caroli, subsequently revised and republished it.

1589. *The Rare Triumphes of Love and Fortune. Plaide before the Queenes Most Excellent Majestie. Wherein are many fine conceits, with great Delight.* At London: Printed by E. A., for Edward White, and are to be sold at the Little North Doore of S. Pauls Church, at the sign of the Gunne, 1589. 4to. Black letter. In five acts. Of this play only one copy is known to exist. It has excited the notice of all the commentators on Shakspeare, and writers on the drama; but no mention is made of it in Baker's *Biographia Dramatica*.

1589. *A brife discoverie of the false church.* By Henry Barrowe. 263 pages. 4to.

Henry Barrow was said to have been a dissipated young man, but by reading the productions of Cartwright, became serious, and was founder of a sect called the *Barrowists*.\* While he was in prison, he requested a conference with Cartwright, which he refused. The deluded man, after a deep sigh, said, "Shall I be thus forsaken by him? Was it not he that first brought me into these briars! and will he now leave me in the same? Was it not from him alone that I took my grounds? Or did I not, out of such premises as he pleased to give me, infer those propositions, and deduce those conclusions, for which I am now kept in these bonds?" He was soon after executed with others.†

1589, Nov. 12. The first notice which is found of a licenser for stage entertainments, is the following:—The council address the lord mayor, commanding him "to appoint a sufficient person, learned and of judgment, to join with the master

of the revels, and a divine to be named by the archbishop of Canterbury, for the reforming of the plays daily exercised and presented publicly about the city of London; wherein the players take upon themselves without judgment or decorum, to handle matters of divinity and state."

1589. RICHARD ROBINSON printed Dr. Thomas White, his sermon at Paul's crosse, on the queen's day. 8vo. He printed with Thomas Newman.

1590. WILLIAM HOW commenced business in 1569, by printing the following works:

*Proverbs or Adages out of Erasmus*, 8vo.

*The tragical comedie of Damon and Pithias: newly imprinted, as the same was playde before the queenes majestie, by the children of her graces chappelle.* Made by mayster Edwards, then being master of the children. Imprinted by Wm. How, dwelling in Fleet-street. 1570.

In 1590, he printed the *Hystory of two of the most noble Captaines of the World, Anniball and Scipio*, &c. by Anthony Cope, esquire. Fourteen works bear the imprint of William How.

1590. TOBY COOK dwelt at the Tiger's Head, in Paul's Church-yard, where he printed the following work: *A plaine declaration, that our Brownists be full Donatists, by comparing them together from point to point out of the writings of Augustine.* Also, *A replie to master Greenwood, touching read prayer, wherein his grosse ignorance is detected*, by George Gyffard, minister of God's word in Maldon. 4to.

JOHN COOK, in 1584; HUGH CORNE, about this time; and HENRY CARR, were more booksellers than printers, or servants to Christopher Barker.

1590. THOMAS HACKET dwelt in Lombard-street, at the sign of the Pope's head; and kept shop in the Royal Exchange, at the sign of the Green Dragon. The first work he printed was the following:

*The fable of Ovid tretting of Narcissus, translated out of Latin into English mytre with a moral thereunto, very pleasaunte to rede.* 4to. 1560.

*A touchstone for this present time, &c. Whereunto is annexed a perfect rule to be observed of all parents, and scholemasters, in the trayning up of there schollers, and children in learning.* Newly set forth by E. H. [Edward Hake.] 12mo. 1574. Nine works bear his imprint.

1590. ROGER WARD dwelt near Holborn conduit, at the Talbot, and as (Strype's edition of Stow says p. 223) Wolfe was one of those unruly printers, so Roger Ward was another, who would print any book, however forbidden by the queen's privilege, and made it his practice to print all kind of books at his pleasure. The master and wardens of the company going to search his printing-house, according to the power they had, were resisted by his wife and servants; of which a complaint was made by the said master and wardens to the court. And again, in the year 1583, the master and wardens preferred a petition against this man, to the lord treasurer, showing his contemptuous demeanour, doing contrary to all order and authority; and withall, his insuffi-

\* Under the deomination of *Barrowists* and *Brownists*, sir Walter Raleigh declared, in the house of commons, on a motion for reducing disloyal subjects, that "they were worthy to be rooted out of a commonwealth." He is alarmed at the danger; for it is to be feared that men not guilty will be included in the law about to be passed. "I am sorry for it. I am afraid there are near twenty thousand of them in England; and when they be gone, (that is, expelled,) who shall maintaine their wives and children?"—*Sir Simon D'Eves Journal*, p. 517.

† The examinations of Henry Barrowe, John Greenwood, and John Penrie, before the high commissioners, and lords of the council. Penned by the prisoners themselves before their deaths. 32 pages 4to. 1586.

elency to use the art of printing. The commissioners appointed by the council could bring him to nothing, but still he continued to print what he pleased without allowance, by his own authority, and such books as were warranted by her highness's letters patent to other men; and sold and uttered the same in city and country, to men of other arts: whereby the company sustained great loss, in taking the sale of them; and particularly to the decay of seven young men, who executed a privilege granted to Wm. Seres for a yearly rent. This man, notwithstanding, had given two several bonds to the queen, the one not to print any more disorderly, the other to bring in such books as he had so printed; but none performed. All this was laid open in the said petition; the signers of it were John Harrison, master; and Richard Watkins and Ralph Newbury, wardens; and besides them Christopher Barker, John Day, William Norton, George Bishop, John Judson, and Francis Coldock; all booksellers in these times of the chiefest reputation. His first work is dated 1582, and the last in 1593. Ten books bear his imprint.

In 1585, Roger Ward printed the *Choice of Change, containing the triplicia of divinitie, philosophy, and poetrie*, by J. R. student in Cambridge.

1590. *A table of the two swannes*. Wherein is comprehended the original and increase of the river Lee) commonly called Ware river; together with the antiquitie of sundrie places and townes seated upon the same. Pleasant to be read, and not unprofitable to be understood, by W. Vallans. *In this work mention is made of a paper mill at Hartford, belonging to John Tate, whose father was lord mayor of London* (perhaps the person mentioned at page 201, ante.) Printed by Roger Ward, for John Sheldrake. 24 pages 4to.

1590. Sabionetta, a populous town of Austrian Italy, famous for an Hebrew printing establishment, which was commenced in the year 1551, was in this year put down by authority, on account of the intemperate and improper language used in some of its productions; the types were carried to Venice, and there used for an edition of the *Bible* in 1615 and 1616.

From De Rossi, who has written a specific treatise on this establishment, we are informed, that it was carried on chiefly in the house of Tobias Foa, a wealthy Jew, who was assisted by Jacobus Tedesco Potavinus and several other persons: that Tedesco was corrector and editor, and Jacob ben Naphtali Cohen the printer: that it continued to work with some interruptions until this time. The same author also observes, that this press reached its height of perfection in the year 1553, while under the direction of a celebrated printer named Adel-kind, who had been sent for from Venice to undertake the management of the establishment at Sabionetta. He enumerates thirty-four editions which issued from it between the years 1551 and 1590, the earliest of which, the Sabionetta typography, is a *Commentary on Deuteronomy* by R. Isaac Abarbanel, consisting of one hundred and forty-

six leaves in folio. De Rossi states this edition to be one of the rarest books any where to be met with. [A copy of it is in the Oppenheimer collection, now deposited in the Bodleian library.] He gives to the productions of this press generally, the merit of being original and genuine editions, as well as that of great neatness of type and execution, declaring that almost all of them are scarce, and diligently sought for by collectors of books. Several of these Sabionetta volumes, some of them printed upon vellum, may be seen in the Bodleian library.—Cotton.

1590. Printing introduced into Angra, a seaport town, capital of Terceira, one of the Azores islands. "Perhaps," says Dr. Cotton, "there are few of us who would have expected to find the art of printing established in the Azores, and that at so early a period as nearly two centuries and a half ago; but it is a fact of which existing evidence will not allow us to doubt for a moment. The Bodleian library contains a very rare and curious specimen of typography from these islands, being a volume in folio, entitled, *Relacion de la iornada, expugnacion, y conquista de la isla Tercera, y las demas circunvezinas, q hizo don Alvaro de Bazan, marquez de Santacruz, &c.* It consists of twelve leaves only; at the end occurs the following colophon, *Fecha en la ciudad de Angra de la isla Tercera, a onze de Agosto, mil y quinientos y ochenta y tres*. I have never seen nor heard of either a second specimen or a second copy of the book here described.—Cotton.

1590. An edition of the bible was printed at Rome, in three vols. folio, with the following title, *Biblia sacra vulgata editionis, tribus toms distincta jussu Sixti V. pontificis maximi edita; ) Rome, ex typographia apostolica vaticana, in fol. red; and prefixed to the first volume is the bull of pope Sixtus V., which excommunicates all printers, editors, &c., who in reprinting the work shall make any alterations in the text*. Of all literary blunders, none equalled that of this edition of the Vulgate.\* His holiness carefully superintended every sheet as it passed through the press, and to the amazement of the world, the work remained without a rival—it swarmed with Errata! A multitude of scraps were printed to paste over the erroneous passages, in order to give the true text. The book makes a whimsical appearance with these patches; and the heretics exulted in the demonstration of papal infallibility! Gregory XIV., successor to Sixtus, caused it to be entirely suppressed. Clement VIII., who succeeded Gregory, caused a new edition to be made; and having made alterations in the text, he was to all intents and purposes excommunicated by the bull of Sixtus. But pope Clement VII. detected in this edition two thousand errors, and recalled all the copies, and in two years after published an amended edition, with another anathema.

\* A superb copy (the only one known in England, on large paper) was sold for 1,310 livres (£20 8s. 4d.) at the sale of Mr. de Limare. At M. Paris's sale it was purchased by the duke of Grafton for £64 1s.

Felix Peretti, pope Sixtus V. who is said to have "been born for great things," did not, if we may depend upon his biographer, confine his biblical labours to the publication of the *Vulgate* and *Septuagint*, but added to them an edition of the *Bible* in the vernacular Italian. A curious account of it, and of the event of its publication, is given by Gregorio Leti,\* an Italian, in his *Life of Pope Sixtus V.* written first in Latin, and translated into English by Ellis Farnsworth.† Sixtus V. was born December 13, 1521, and died August 27, 1590.

1591, *March*. DUBLIN UNIVERSITY SOUNDED. The lateness of the period assigned to the foundation of the University of Dublin, is not to be considered as indicative of the ignorance or apathy of the Irish. It arose, not from their want of zeal to obtain such an institution, or abilities to adorn it, but from the unhappy circumstances of the time. Clement V., in 1312, then in the seventh year of his pontificate, issued a bull upon the application of archbishop Lech, "for the foundation of a university in Dublin;" but the death of the archbishop prevented the fulfilment of the design. This was, however, effected in 1320, by Alexander de Bicknor, in St. Patrick's church; but it declined and fell from the deficiency of funds. Thus, at a period when literature, rich with the stores of time, unfolded her treasures to expectant nations, Ireland, predominant over every other in the desire for similar advantages, could only boast the memory of plans for their possession. But the ministers of Elizabeth were equal to the spirit and the wants of the time: their desire was to base the government upon the interests and affection of the people. There was, at that time, belonging to the corporation of the city, a piece of ground which had formed the *scite, ambit, and precinct*, of the Augustinian monastery of All Saints, a priory of Arasian Canons, founded in 1166, by Dermot M'Murrough, king of Leinster. These buildings were in ruins, but were apparently well calculated for the purpose. The archbishop immediately applied to the mayor and common council, and addressed them with an eloquence so "pathetic," as to obtain the monastery and lands for the purposes explained. The formality of petitioning the queen for "her charter was performed by Henry Usher, which was, of course, complied with; and on the 3d of March following, letters patent passed the great seal for the

erection of a university, called "*Collegium Sanctæ et Individuæ Trinitatis juxta Dublin—à Serenissima Regina Elizabetha fundatum.*"

By this instrument, one provost, three fellows, and three scholars, were appointed in the name of more. These were, Adam Loftus, the provost, Henry Usher, A.M., Luke Challoner, A.M., and Launcelot Moyne, A.B., for fellows, and Henry Lee, William Daniel, and Stephen White, as scholars. Lord Burleigh, lord high treasurer of England, was the first chancellor.

On March 11, 1591, Fitzwilliam, the lord deputy, and the privy council, issued circular letters for the furtherance of their views; but the amount received was apparently inconsiderable, as Robert Taaffe, its collector, complains of the unsuccessful results of his application. On the 13th of March, 1591, the first stone was laid by Thomas Smyth, then mayor, and on the 9th of January, 1593, the first students were admitted.

A correspondent in the *Dublin Penny Journal*, offers the following apposite remarks upon the founders of universities, and we cannot, in this place, refrain from giving them.

"It is difficult to analyse with accuracy the feelings which pervade the mind on the contemplation of those edifices which have been erected by the piety and munificence of our ancestors, for the improvement of the moral, the social, and political condition of mankind. The very barbarism from amid which they rose, tends to heighten the solemn feeling they invariably inspire. We consider them as the depositories of knowledge, when all around was sunk in the darkness of ignorance, and we respect them; we consider them, through the successive gradations of ages, still advancing moral science and philosophic truth, and we venerate them the more. There is, besides, a feeling in the heart, which connects us indissolubly with the past. What endears that past to a nation? The reputation of the great men it has produced.—What can excite a deeper interest for institutions such as these, than the reflection that it is to them we owe that fame which genius has won, or learning has acquired. Of what materials must his character be composed, who does not feel his best sensibilities awakened—his piety animated—his thoughts dignified, and his moral tendencies strengthened, by the consideration of structures erected for purposes so ennobling and so dignified as these. It is, however, asserted, that we reverence them less for their objects than their antiquity. Man is the creature of system and of habit, and as of that which is established the advantages are known, and as every age has given fresh authority for respect, institutions of this nature, it is said, exact esteem, not from our conviction of their present benefit, but from the hallowing influence of time. Antiquity—if antiquity be considered like "every other quality that attracts the notice of mankind," has undoubtedly votaries; but votaries that reverence her more from prejudice than reason. Her circle is, however, limited, and her worshippers are few; for admiration of this nature is rather the

\* Gregorio Leti was born at Milan, 1630. In 1657, he made a public profession of the Protestant religion, at Lausanne. He then settled at Geneva, where he resided for about twenty years, and was presented in 1674 with the freedom of the city, an honour never before granted to a stranger. He afterwards visited France, England, and Holland. He died suddenly, June 9, 1701, aged 71. His boast was, that he had been the father of a book, and the father of a child, for twenty years successively.

† Ellis Farnsworth, was born in Derbyshire, and educated at Cambridge. In 1762 he obtained the rectory of Carlington, in his native county, where he died on the 25th of March, in the following year. He translated the *Life of Pope Sixtus V.* from the Italian, 1754, folio; Davila's *History of the Civil Wars in France*, in 1757, 2 vols. 4to.; the *Works of Machiavel*, 1761, 3 vols. 4to.; and Fleury's *History of the Israelites*, 1760.

result of ignorance than of refinement, as antiquity can only be exalted from its connexion with the history, the interests, and improvement of mankind. Now, as colleges are the immediate promoters of these, when antiquity displays the influence they have exerted on the past, her claims are admitted, her influence is felt—she blends herself alike with our imagination and reason, and her power is at once venerated, acknowledged, and despotic. The establishment of colleges and halls may be traced to that devotional sentiment which induced the affluent to endeavour to propitiate heaven by the erection of edifices, where the sacred principles of religion might be inculcated, and its truths advanced. As the dark clouds of ignorance rolled away, they shed the light of revelation on mankind. They reclaimed him from an impure and mystical religion, and inculcated the Christian worship of his Creator. "They collected the learned, who were few; and made them a compact and honourable confederacy against the ignorant, who were powerful and many. They gave rise to the plan of collective exertion and emulative industry, which advanced the energies of the mind, and encouraged the progress of discovery, and they supplied a continued growth of cultivated talent for the demands of successive generations. They treasured the materials of knowledge, saved from the wreck of that moral world which had been passed over by a desolating ignorance, and arranged them as the basis of new acquisitions." Such were the advantages consequent upon the foundation of universities, advantages alone equalled by the benefits they have progressively conferred.

1591. A Greek and Russian Grammar was printed at Lemburg, in Poland. Backmeister informs us that typography was first practised in this city, five years earlier.

1591. In the accounts of the stationers' company are the following entries:

"Item, a little box of plate, and other things given by the masters and wardens, and divers other persons.

"Item, paid for charges of search dinners, ten times, at 3s. 4d., 33s. 4d.

1591. JOAN BROOME carried on printing after the death of her husband, and had many works printed for her, among which are the following:

*Endimion the Man in the Moone. Played before the Queenes Majestie at Greenwich, on Candlemas Day at Night, by the Chylidren of Paules. By John Lillie, Maister of Artes. At London, by J. Charlewood, for the Widdowse Broome. 1591.*

*A reforming glass, precious and profitable for all persons to the right disposing of their thoughts, words, and actions, to God, their neighbor, and themselves, by meditations and prayers. Compiled by John Norden. Printed for Joane Broome, widow. 1596.*

1591. ROBERT BOURNE and JOHN PORTER printed a book entitled, *An Exposition of the Lord's Prayer, by way of catechising*. And it is supposed others. 8vo.

1591. The following extracts from the churchwarden's accounts of the parish of St. Helen, in Abingdon, Berkshire, from 1555 to 1591, may throw some light on the value of books in those days; the original of which is now in the possession of the Rev. George Benson.

\* The monthes mind, the years and two years mind, and the obit of deceased persons, were masses performed at those seasons for the rest of their souls, the word mind, meaning the same as memorial or remembrance. And so it is used in a sermon yet extant of bishop Fisher, entitled *A morynge remembrance had at the monthes minde of the most noble prynces Margarete, countesse of Richmond and Darbye, &c.* As to the term obits, services of that kind seem to have been annually performed. The office of the mass for each of these solemnities may be seen in the *Roman Missal*, under the title of *Missal pro defunctis*. The expenses were suited to persons of all ranks, that none might be deprived of the benefit which was supposed to accrue from them. Masses for the dead continued to this time, (1550,) but here, instead of a monethes mynde, the expression is a monthes monument.

† This is a small vessel, in the form of a ship or boat, in which the Roman catholics burn frankincense to perfume their churches and images.

‡ This book seems to be that which was printed and sent over the kingdom by order of queen Mary, at the end of the year 1554, containing instructions to the bishops for visiting the clergy.

§ These bells, mentioned under the year 1556, as purchased by the parish, were used in their morrice dances, a diversion then practised at their festivals; in which the populace might be indulged from a political view, to keep them in good humour.

|| By roode was meant either a crucifix, or the image of some saint in Roman catholic churches. These images were set in shrines, or tabernacles, and the place where they stood was called the roode lofte, which was commonly over or near the passage out of the body of the church into the chancel. In 1548, the first of king Edward VI., all images and their shrines were ordered to be taken down, as bishop Burett informs us. But they were restored again on the accession of queen Mary.

1591. May 26. Queen Elizabeth grants a licence to Richard Wright, of Oxford, to print the <i>History of Cornelius Tacitus</i> . See <i>Rymer</i> , vol. xvi. p. 96.—This appears to be the first exclusive privilege for publishing.		
1591. <i>Died</i> , THOMAS BASSANDYNE, or BASSENDEN, who had the honour of being the printer of the first edition of the scriptures known to have been printed in Scotland.—(see page 361		

\* This, it is supposed, was the Geneva Bible, in 4to. both on account of its low price, and because that edition, having the division of verses, was best suited for public use. It was an English translation, which had been revised and corrected by the English exiles at Geneva, in queen Mary's reign, and printed there in 1560, with a dedication to queen Elizabeth. In the year 1576, another Bible was bought, which was called the *New Bible*, and is said to have cost forty shillings; usually called archbishop Parker's Bible, printed at London, in 1568, by Richard Jugge, the queen's printer. They had *prayer-books*, *psalters*, and *song-books*, for the churches in the beginning of this reign, as the whole bible was not easily to be procured.

† In 1563, there is a charge of sixpence for two common *prayer books* against invading the *Turke*. It was then thought the common cause of the Christian states in Europe to oppose the progress of the Turkish arms by all methods, both civil and religious. And this year the Turks made a descent upon the Isle of Malta, where they besieged the town and castle of St. Michael four months, when, on the approach of the Christian fleet, they broke up the siege, and suffered considerable loss in their flight. (*Thucydides*, lib. 8.) And as the war was afterwards carried on between them and the emperor Maximilian in Hungary, the like *prayer-books* were annually purchased for the parish till the year 1569 inclusive.—See *Pref. ad Camden*. "Elix." p. xxix. l. i. g.

‡ In 1573 charge is made of paper for four books of *Geneva psalms*. It is well known, that the vocal music in parochial churches received a great alteration under the reign of queen Elizabeth, being changed from *antiphones* into metrical psalmody, which is here called the *Geneva psalms*.

§ These *articles* were agreed to and subscribed for by both houses of convocation in 1562, and printed the year following. But in 1571, being again revised and ratified by act of parliament, they seem to have been placed in churches.

|| How early the custom was of using *hour glasses* in the pulpit, cannot be ascertained, but in the annals of Dunstable priory is this item: "In 1483, made a clock over the pulpit." In early times, the priest had sometimes a watch found him by the parish—Fosbrooke's *British Monachism*.

*ante*.) He was a native of Scotland, and educated at Antwerp; from whence he went to Paris, and afterwards to Leyden, where he learned the art of printing; and returned to Scotland in 1558, when he joined himself to the lords of the congregation, as the reformers were then called. Besides the edition of the scriptures, he printed several other works which are now become scarce. His dwelling was at the Nether Bow. The earliest edition of the rare Scotch poem, called *Syr Gray-Steill*, issued from the press of Bassendyne. An inventory of his goods, dated Oct. 18, 1577, contains an item of three hundred *Gray-Stellis*, valued at the "peece vid. summa viil. xs." On the 17th of April, 1497, when James IV. was at Stirling, there is an entry in the treasurer's accounts, "Item, that samyn day to twa sachelaris that sang *Gray-Steill* to the king, ixs." In manuscript collections made at Aberdeen, in 1627, called a *Booke for the Lute*, by Robert Gordon, is the air of *Gray-Steill*; and a satirical poem in Scottish rhyme on the marquis of Argyll, printed in 1686, is "appointed to be sung to the tune of old *Gray-Steill*." These evidences that the poem was sung, manifests its popularity. There are conjectures as to who the person denominated sir Gray Steel really was, but the point is undetermined. James Nicol, printer to the town and university of Aberdeen, printed an edition of this poem in 1711, which though of so recent a date, is at present unique.\*

1591. *The Shepheard's Calender. Containing twelve aeglogues proportionable to the twelve monthes. Entitled: To the noble and virtuous gentleman, most worthy of all titles, both of learning and chivalry, maister Philip Sidney. By Edmund Spenser. London, imprinted by John Windet, 1591. 4to.†*

In the argument to *October* of the above poem, Spencer speaking of "Poetrie," calls it "a divine gift, and heavenly instinct, not to be gotten by labour and learning, but adorned with both, and poured into the witte by a certain enthusiasmos and celestially inspiration."

Spencer wrote a treatise called the *English Poet*, which has unfortunately been lost, and must have contained specimens of the writings of his countrymen. See Mr. Todd's edition of *Spencer, the Life*, p. 7, and p. 158, where the author says, Spencer, in his book called the *English Poet*; which booke being lately come into my handes, I miunde also by God's grace, upon further advisement to publish."

1591. *Complaints; containing sundrie small poems of the world's vanity. By Edmund Spenser. London, imprinted by William Ponsonby, at the Bishop's Head, in Paul's church yard. 4to.‡*

1591. *The Countesse of Pembroke's Iry Church, containing the affectionate Life, and unfortunate Death of Phillis and Amyntas, that in a Pastoral, this in a Funerall, both in English hexameters,*

\* *Early Metrical Tales, including the History of Sir Egeir, Sir Gryme, and Sir Gray Steill. Edinburgh: 1826. 175 copies printed, small 8vo.*

† Sold at archdeacon Nare's sale, 1821, for £158 2s. 10d.

‡ Sold at archdeacon Nare's sale, 1821, 4to., for £23 10s.

by Abraham Fraunce. London. Printed by Thomas Orwyn, for William Ponsonby, dwelling in Paules Church Yard, at the signe of the Bishop's Head. 1591. This truly whimsical performance consists of a translation of Tasso's *Aminta*, which is interwoven in the body of a pastoral, and can scarcely be called a play.\*

1592. *Died, Sept. 2*, Robert Green, an English poet. He was a man of wit and talents, and one of the most facetious, profligate, and indefatigable of the Scribleri family. He laid the foundation of a new dynasty of literary emperors. The first act by which he proved his claim to the throne of Grub-street,† has served as a model to his numerous successors—it was, says Mr. D'Israeli, an ambidexterous trick! Green sold his *Orlando Furioso* to two different theatres, and is among the first authors in English literary history, who wrote as a *trader*; or as crabbed Anthony Wood phrases it, in the language of celibacy and cynicism, "he wrote to maintain his wife, and that high and loose course of living which poets generally follow." The hermit Anthony seems to have had a mortal antipathy against the Eves of literary men.

Immediately after his death, and whilst the public curiosity was alive concerning him, the following tract was published:—*The Repentance of Robert Greene, Maister of Artes. Wherein, by himselfe, is laid open his loose Life, with the Manner of his Death. At London, printed for Cuthbert Burbie. 1592.*

The first part of this tract exhibits, in strong colours and the quaint language of the time, his profligacy and subsequent contrition. It next gives us an interesting sketch of his life. From this it appears he was born at Norwich, here spelt *Norwiche*. His parents must have been respectable, for he was educated at Cambridge, from whence he tells us, "wags as lewd" as himself "drew him to march into Italy and Spaine." In which place he "saw and practised such villanie as is abhominable to declare."

On his return to England, "I ruffled," says he, "out in my silks, in the habit of Malcontent, and no place would please me to abide in." After he had taken his Masters degree at Cambridge, he left the universitie, "and away to London, where he became an author of playes, and a penner of love pamphlets, and who for

that trade growne so ordinary as Robin Greene." He then freely confesses that he led a life of unrestrained debauchery, once, and once only, feeling some compunction of the divine judgment. This inward compunction he felt "in Saint Andrews Church, in the cittie of Norwich, at a lecture or sermon then preached by a godly learned man." In the latter part of this tract, he breaks forth into a passionate apostrophe to his injured wife, from whose society he confesses he had estranged himself six years. He most pathetically implores her forgiveness. He concludes with warning young men against the example of his vicious life, assuring them, that God will visit sinfulness.

He appears to have been a thoughtless, good-natured man, and susceptible of the better feelings of the heart, for many of his works contain noble and generous expressions. Neither was he, by any means, to be despised as a poet. The short compositions scattered through his works, to say nothing of his dramatical pieces, indicate much poetical taste and feeling. Subjoined is one of them.

#### BY A MOTHER TO HER INFANT.

Weepe not, my Wanton, smile upon my knee,  
When thou art old theres griefe enough for thee.  
Mothers wagge, prettie boy,  
Fathers sorrow, fathers joy;  
When thy father first did see  
Such a boy by him and me,  
He was glad, I was woe,  
Fortune changd made him so,  
When he had left his prettie boy,  
Last his sorrow, first his joy.

Weepe not, my Wanton, smile upon my knee,  
When thou art old theres griefe enough for thee,  
Streamling teares that never stint,  
Like pearle drops from a flint,  
Fell by course from his eies,  
That one anothers place supplies.  
Thus he grieved in every part,  
Teares of bloud fell from his heart,  
When he left his prettie boy,  
Fathers sorrow, fathers joy.

Weepe not, my Wanton, smile upon my knee,  
When thou art old theres griefe enough for thee.  
The wanton smiled, father wept,  
Mother cried, babbie leapt,  
Now he crow'd more he cride,  
Nature could not sorrow hide;  
He must goe, he must kisse,  
Childe and mother, babbie blisse,  
For he left his prettie boy,  
Fathers sorrow, fathers joy.

Weepe not, my Wanton, smile upon my knee,  
When thou art old theres griefe enough for thee.

Green was exceedingly popular in his day, and his works are very voluminous; a beautiful edition of them has lately been published.\* Mr. Beloe, in his *Anecdotes of Scarce Poets*, enumerates, a great number of Green's productions, and at the conclusion, says, "I here take my leave of Robert Greene, and I confess, not without reluctance. I have been highly entertained with many of his performances, I feel a great respect for his talents, much disgust at his profligacy, but a sincere concern for his misfortunes."

\* *Green's Dramatic Works. to which is added his poems, with an account of his life.* By the Rev. Alexander Dyce, London: William Pickering. 1834. 2 vols. crown 8vo.

\* Sold at archbishop Nares's sale, 1821, 4to., for £4 4s.

† Mention is often made of *Grub-street writers* and *Grub-street publications*, but the terms are little understood; the following historical fact will explain them: during the usurpation, a prodigious number of seditious and libellous pamphlets and papers, tending to exasperate the people, and increase the confusion in which the nation was involved, were from time to time published. The authors of these were, for the most part, men whose indigent circumstances compelled them to live in the most obscure parts of the town. Grub street then abounded with mean and old houses, which were let out in lodgings, at low rents, to persons of this description, whose occupation was the publishing anonymous treason and slander. One of the original inhabitants of this street was Fox the martyrologist, who, during his abode there wrote his *Acts and Monuments*. It was also rendered famous by having been the residence of Mr. Henry Weib, a gentleman of whom it is related in a printed narrative, that he lived there forty years without being seen of any one.

1593. *Green's news, both from Heaven and Hell, prohibited the first for writing of bookes, and banished out of the last for displaying of conyatechers.* Commended to the presse by R. B. Londoner. 4to.

1592. PETRUS BLASTUS KMITA was settled at Lubiecz, a town of Lithuania, and printed principally for the Unitarians, the press was put down by authority in 1635 or 1636.

1592. JAMES MATTAYER, a printer at Tours, in France, styles himself ordinarie to the king, *Palere arti abstinere*, 1592, 4to.

1592. JOANNES AGRICOLA printed at Inspruck, capital of the Tyrol, a splendid volume of *Annals of the deeds of the Austrian Princes*.<sup>\*</sup> Catalogues sometimes announce a much earlier Inspruck book, namely, of the year 1569, viz. *Tertii Bergomatis imagines Austriacæ Gentis*; but this book, although a very good one, contains nothing besides engravings.

1592. *Conspiracie, for pretended reformation, viz. præbeteriell discipline. A treatise discovering the late designments and courses held for advancement thereof, by William Hackett yorman, Edmund Coppinger, and Henry Arthington, gent. out of others depositions and their owne letters, writings, and confessions upon examination; together with some part of the life and conditions, and the two enditements, arraignments, and execution of the sayd Hackett, &c.* At London: printed by Christopher and Robert Barker. 4to.

1592. WILLIAM KERNEY, or KEARNEY, dwelt in Adling-street, with in Cripplegate, and printed four books, dated 1591 and 1592.

1592. WILLIAM SAUNDERSON printed a book entitled, *The globes coelestiall and terrestiall, set forth in plaine*, by Emery Molineux. 12mo.

<sup>\*</sup> Copies of this work are found in the Pinelli catalogue; Bodleian, Oxford; and Trinity college, Dublin.

<sup>†</sup> William Hackett, a fanatic, after a very profligate life, turned prophet, and signified the desolation of England. He prophesied at York and Lincoln; where, for his boldness, he was whipped publicly, and condemned to be banished. He had an extraordinary fluency of speech, and much assurance in his prayers; for he said, that if all England should pray for rain, and he should pray to the contrary, it should not rain. Hackett had two brother prophets joined with him, Edward Coppinger, named the prophet of mercy, and Henry Arthington, the prophet of judgment. Coppinger, the merciful prophet, declared that Hackett was the sole monarch of Europe; and at length they proclaimed him, July 16, 1592. On the 28th of the same month, however, the monarch of the whole earth, who had also personated divinity, was hanged and quartered. Coppinger furnished himself in prison, and Arthington was pardoned. Fitz Simon relates, that in a quarrel Hackett had at Oundle, "He threw down his adversary, and bit off his nose; and, instead of returning it to the surgeon, who pretended to set it on again, while the wound was fresh, at it.—Camden. Hackett, on the scaffold, made a blasphemous prayer, which is recorded by Fitz Simon and Camden, too horrid to be repeated. He hated queen Elizabeth, and tried to deprive her of her crown; he confessed to the judges that he had stabbed the effigies of the princes to the heart, with an iron pin; and a little before he was hanged, being an accomplished swearer, he cursed her with all manner of imprecations.

The seduction of Arthington, by Hackett, especially with some tokens of his unfeigned repentance and submission. Written by the said Henrie Arthington, the third person in that wofull tragedy. London: imprinted by Robert Barker. 4to.

1593. Died, WILLIAM NORTON, an original member of the stationers' company, and one of the first six who came on the livery after the renewal of their charter; for several years he filled their various high offices, and died serving the office of master. By his will which is dated January 5, 1593, and was deposited with the company, in which he gave £6 13s. 4d. yearly to them, to be lent to young freemen; and the like sum to Christ's hospital, [of which he was sometime treasurer.\* His name stands second on the list of their benefactors.

He dwelt at the King's Arms, in St. Paul's church yard; was fined for keeping open shop on St. Luke's day, and also on Sundays.

On a tomb in the old church of St. Paul was this inscription concerning his family.—Preserved by Dugdale:—

William Norton, citizen and stationer of London, and treasurer of Christ's Hospital, died anno 1593, aged 66 years, and had issue one only son. His nephew, John Norton, esq. stationer, and some time alderman of this city, died without issue, anno 1612, aged 53 years. Also Bonham Norton, of Church-Stretton, in the county of Salop, esq. stationer, and some time alderman of this city, son of the aforesaid William, died April 5, anno 1635, aged 79 years. He had issue by Jane, daughter of Thomas Owen, esq. one of the Judges of the Common Pleas, nine sons and four daughters, whereof three sons were here buried; Thomas and George unmarried, and Arthur, who married the only child of George Norton, of Abbot's Leigh, in the county of Somerset, esq. and having by her issue two sons, died October 11, anno 1635, aged 38 years. Jane Norton, the said widow of Bonham aforesaid, caused this monument to be erected near the sepulchres of the deceased.

William Norton's device alluded to his name; it consisted of the un annexed figure, and represents a Sweet William growing through a tun, inscribed with the letters NOR.

1593. HUGH JACKSON dwelt in Fleet-street, a little beneath the Conduit, at the sign of St. John the Evangelist. In 1577, he printed the *Garden of Eloquence, containing the figures of grammar and rhetoric, &c.* by Henry Peacham, minister. 4to. Four works only bear his imprint.

1593. MRS. CHARLEWOOD, widow of John Charlewood, Printed *Spectacles for a blind Papiet*, 8vo. made by J. S. printed with Edward White. Mrs. Charlewood printed four works.

<sup>\*</sup> The above sum of £6 13s. 4d. is annually paid by Christ's Hospital to the company of stationers; who, in return, pay to the hospital, £6 annually, the gift of Mrs. Bishop, and £4 (in bibles) the gift of Mrs. Meredith.—Nichols.

1593. THOMAS WOODCOCK, printer, stationer, and bookseller, dwelt at the sign of the Black Bear, in St. Paul's Church-yard, married Isabel, second daughter of John Cawood, esq. commenced business about 1575; for among the books of the *Bodleian Catalogue*, vol. ii. page 645. *Virgils eclogues, translated into English verse (rhythmical) by Abraham Fleming.* Printed for Thomas Woodcock. He seems to have printed little himself; for most of his books, (eleven in number) appear to have been printed for him.

1593. RICHARD BOYLE dwelt at the Rose, in Paul's church-yard, a bookseller and a Puritan, as says bishop Tanner, in manuscript. He printed, *A dialogue concerning the unlawfulness of playing at cards.* Octavo.

1593. THOMAS SALISBURY published the following work:

*Grammatica Britannica in usum ejus lingue studiosorum succincta methodo, et perspicuate facili conscripta; et nunc primum in lucem edita; Henrico Salesburio, Denbighiensi, autore.* Sheets K, but not paged. 12mo.

This family seems to have been great promoters of the British tongue among us.

1593. WILLIAM HOSKINS dwelt at the Temple Gate, in Fleet-street. He printed only two books himself, in 1575 and 1593, but some with John Danter.

1593. RICHARD TOTTEL was a very considerable printer of law, and an original member of the stationers' company. He filled all their offices. His dwelling was at the Hand and Star, in Fleet-street, within Temple Bar. Herbert states that he spelt his name in various ways. A special licence to Richard Tothille, (supposed to be Tottle,) citizen, stationer, and printer of London, for him and his assigns, to imprint, for the space of seven years next ensuing the date hereof, all manner of books of the temporal law, called the common law; so as the copies be allowed, and adjudged meet to be printed by one of the justices of the law, or two serjeants, or three apprentices of the law; whereof the one to be a reader in court. And that none other shall imprint any book, which the said Richard Tottell shall first take and imprint, during the said term, upon pain of forfeiture of all such books. T. R. *apud* Westm. 12 April, 7 Edward VI. p. 3. A licence to Richard Tottle, stationer of London, to imprint, or cause to be imprinted, for the space of seven years next ensuing, all manner of books, which touch or concern the common law, whether already imprinted or not. T. R. *apud* Westm. 1 Maii. Pat. 2, and 3 Phil. and Mary, p. 1. Licence to Richard Tottell, citizen, printer, and stationer of London, to print all manner of books, touching the common laws of England, for his life. T. R. 12 Jan. Pat. 1 Eliz. p. 4.

There was a patent ready drawn for queen Elizabeth's signing for seven years, privileging Richard Tothill, stationer, to imprint all manner of books, or tables, whatsoever, which touched, or concerned cosmography, or any

part thereof; as geography, or topography, writ in the English tongue, or translated out of any other language into English, of whatsoever countries they treated, and whosoever was the author. But whether this was ever actually signed or not, is uncertain. At the decease of archbishop Parker, Strype says, there was due to him for books, £1 11s. 6d.

Richard Tottyl was master of the stationers' company in the year 1578, John Harrison, and George Bishop, being then wardens; William Seres, and John Day, assistants; and the 8th Jan. 1583, he yielded up to the stationers' company seven copies of books, for the relief of the poor of their company.

His health declining, he retired into the country, which his son carried on the business for him.

The principal feature of Tottell's device is shown in the above engraving; but in the original it is placed under an arch supported by columns ornamented in the Etruscan style. On each side of the circle is a scroll, containing between them the words "Cum Priui. legio:." and beneath are a shield bearing a very intricate monogram, with hills and flowers in the back ground. On a tablet which occupies the whole breadth of the cut, along the bottom is engraved RICHARD TOTTELL, in large Roman capitals. The cut was doubtless a perfect representation of his sign of the Hand and Star, and it is rather rudely engraven.

Richard Tottle was in business for the long space of forty years, and during that time printed seventy-eight works, chiefly on law. In 1562, he printed *Grafton's abridgement of the chronicles of England*. Three or four of these abridgements were printed before Stow published any thing of that kind. Printed again in 1563, 1564, 1570, and 1572. 12mo.

*The summarie of the chronicles of England, diligently abridged, and continued unto this present year of Christ 1579, by John Stowe.* Printed by R. Tottle and Henry Binneman. 16mo.

1593. *The Phanix Nest, built up with the most rare and refined Workes of Noblemen, woorthy Knights, gallant Gentlemen, Masters of Arts, and brave Scholars. Full of varietie, excellent Invention, singular delight. Never before this time published.* Set forth by R. S., of the Inner Temple, Gent. Imprinted at London, by John Jackson. 4to.

1593. *Died*, THOMAS ORWIN, a printer of considerable note, whose dwelling was in Paternoster-row, over against the chequer. His device, at the beginning of some of his books, of two hands clasping each other, and holding two cornucopias, with a caduceus upright between them, and T. O. beneath. About it, BY WISDOME, PEACE; BY PEACE, PLENTY. After his decease, his widow carried on the business, at the sign of the Bible, in St. Paul's church yard, for a few years.

In 1590, he printed the following work:—

*The writing schoolmaster, containing three books in one; the first teaching swift writing; the second true writing; the third fair writing.* Invented by Peter Bales,\* 1 January, 1590; and to be sold at the author's house, the upper end of the Old Bayley, where he teacheth the said art.

Mas. ORWIN, printed eight works. In 1595, she printed, *A short, yet true and faithful narration of the fearful fire, that fell in the town of Woodbourne, in the county of Bedford, the 13th of September.* 8vo. Printed for Thomas Man. Her last work was the *Arcadian rhetoricke*, by Abraham Fraunce, at London. 1597. 8vo.

1593, April 4. The three Samuels of Warboys, are condemned at Huntingdon, by Mr. Justice Fenner, upon this day, for bewitching, with the aid of nine familiars, one of whom was called *Pluck*, the children of Mr. Throgmorton. They were executed, and their goods escheated to sir Thomas Cromwell, as lord of the manor, an annual lecture was founded upon the subject of *Witchcraft*, to be preached in the presence of the corporation of Huntingdon every Lady-day,

\* Peter Bales was one of the earliest writing-masters who had his specimens engraved on copper-plates, and one of those occurs in Houdin's *Theatrum Artis Scribendi*. He, in 1595, had a great trial of skill with one Daniel Johnson, for a golden pen, of twenty pounds value, and won it, though his antagonist was a younger man by above eighteen years, and was therefore expected to have the advantage of a greater steadiness of hand. A contemporary author also says, that he had the arms of calligraphy given him, (which are azure, a pen or), at a prize, where solemn trial was made for mastery in this art, among the best penmen in London; which being a trial among more opponents than one, this, wherein the said arms were given to him, should seem different from that wherein he won the pen from Daniel Johnson, before-mentioned. This was the first contention met with for the golden pen, though other memorable ones have since occurred. In 1597, when he republished his *Writing Schoolmaster*, he was in such high reputation for it, that no less than eighteen copies of commendatory verses, composed by learned and ingenious men of that time, were printed before it. He also, by other exercises of his pen, recommended himself to many other persons of knowledge and distinction, particularly by making fair transcripts of the learned and ingenious compositions of some honourable authors, which they designed as presentation-books to the queen, or others their friends or patrons, of high dignity; some of which manuscripts have been, for the beauty of them as well as for their instructive contents, preserved as curiosities to these times. "Among the Harleian manuscripts, now in the British museum, there is a thin vellum book, in small etc., called *Archæos*. At the end of that treatise is a neat flourish, done by command of hand, wherein are the letters P. B., which shows, says a note in that book, that this copy was written by the hand of Peter Bales, the then famous writing-master of London."

A man presented to queen Elizabeth a bit of paper, of the size of a finger-nail, containing the ten commandments, the creed, and the Lord's prayer; together with her name, and the date of the year. The whole could be read with spectacles, which he had himself made.

by a doctor or bachelor of divinity, of Queen's college, Cambridge.\*

*Two Examples of God's Judgment upon a wicked swearing woman, and of one Strangeman, who gave himself up to the devil.* 8vo. 1583.

*A Dialogue concerning Witches and Witchcraft; in which is laid open how craftily the devil deceiveth not only the Witches, but many other, and so leadeth them away into many great errors; by George Giffard minister of God's word, in Maldon.* London: printed by John Windet, 1593. Quarto.

1593, April 18. Shakspeare's poem of *Venus and Adonis* is entered on the books of the stationers' company by Richard Field, an eminent printer, who was a native of Stratford-upon-Avon. This first heir of our poet's imagination, which it seems obtained the palm in the race with Marlow's *Hero and Leander*, was dedicated in a brief and elegant address to the earl of Southampton.† We find from a manuscript payment of 12d. for the *Survey of France*, and the present poem, that on the 12th of June it was in circulation. "As the soul of Euphorbus," sayth Meres, in 1598, "was thought to live in Pythagoras, so the sweet witty soul of Ovid lives in mellifluous and honey-tongued Shakspeare; witness his *Venus and Adonis*."

The following is a transcript of its title page:

"VENUS AND ADONIS.

Vilis miretur Vulgus, mihi favus Apollo,  
Pocula Castalia plena ministret aqua.

*London. By Richard Field, and are to be solde at the Signe of the Greyhound, in Pauls Church Yard. 1593.*" 27 leaves 4to.

Mr. Malone had long been in search of the original copy of this poem, and when he was about to give up all hopes of possessing it, he obtained a copy from a provincial catalogue. But he still did not procure it but after a long and tedious negotiation, and a most enormous price.† In this edition Mr. Malone discovered many curious readings.

\* The poem of the act in the 5th year of Elizabeth, 1563, against *enchantments*, &c. is as follows:—

"Where at this present there is no ordinary or condign punishment provided against the practices of the wicked offences of conjurations and invocations of evil spirits, and of sorceries, enchantments, charms, and witchcrafts, the which offences, by force of a statute made in the xxiii year of the reign of the late king Henry VIII., were made to be felony, and so continued until the said statute was repealed by the act and statute of repeal made in the first year of the reign of the late king Edward VI.: whereas the repeal whereof, many fantastical and devilish persons have devised and practised invocations and conjurations of evil and wicked spirits, and have used and practised witchcrafts, enchantments, charms, and sorceries, to the destruction of the persons and goods of their neighbours, and other subjects of this realm, and for lewd intents and purposes, contrary to the laws of Almighty God, to the perill of their own souls, and to the great infamy and disquietness of this realm."

† Henry Wrotesley, earl of Southampton, like his friend Essex, was the steady patron of men of learning and genius, the greatest proof of which was his munificent gift of one thousand pounds to Shakspeare, to enable the poet to make a purchase. He was born October 4, 1573, and died at Bergen-op-Zoom, in Holland, Nov. 10, 1594.

‡ There is a copy in the Malone collection at Oxford, for which that gentleman gave £75.

1593, April 19. Died, GILES BEYS, a celebrated Parisian printer, who was the first after those who printed the works of Ramus, that made a distinction in his printing between the consonants j and v, and the vowels i and u. Ramus was the inventor of this distinction, and employed it in his Latin Grammar of 1557, but we do not find it in any of his works printed after that time. Beys adopted it first in Claude Mignaut's *Latin Commentary on Horace*.

Giles Beys married Magdalen, the third and youngest daughter of Christopher Plantin, of Antwerp, by whom he had a son (Charles) who was perhaps that very clever French poet, who was born at Paris, and died September 26, 1659, by extravagance and folly. After the death of Giles Beys, his widow married Adrian Perrier, a printer of Paris. He was the son of Charles Perrier, a "libraire," who occasionally employed the Greek printers of Paris to print for him.

1593. Died, HUGH SHYNGLETON, or SINGLETON. He resided first in Tem-stre, over agaynst the Styliardes, at the sygne of the Dobbel-hood; 2dly, at the Golden Sun, in Creed-lane; 3dly, at the sygne of St. Augustine, in St. Paul's Church-yard; he kept a shop at the north door of Christ's Hospital, next the Cloister. He was free of the Old Stationers' Company, as he bound an apprentice in 1562. He wrote his name Shyngleton in the Hall book. He was unsettled in his habitation, and in 1562-3, was fined for speaking unseemly words before Mrs.

— In 1566-7, he was authorised, with Thos. Purfoot, to search for unlicensed and disorderly books. About two years afterwards he received from the company x.s. perhaps on the same account as the year after he received iij.s. viz. for taking up books at the water-side. He appears to have been but an indifferent economist, and his principles were rather loose. Sept. 17, 1577. Whereas Hu. Singleton is indebted to James Askell liij.s. It is ordered that he shall pay the same at v.s. a week. And if default be made in anie payment, then Askell hath libertie to seek his remedie by lawe. This money Mr. Daie to pay as long as Singleton workes with him, And after, Yt to be demanded at Singleton's house. 17. M'cij, 1577-8. Yt is ordered that Hu. Singleton shall redeliuer unto Wm. Dickens a pair of Shetis & a diaper towel at or before the 27th day of this instant M'che, upon pain to be committed to ward. Octo. 23, 1584, he borrowed of the Company 5l. on bond; and for which John Charlewood was security. In 1585-6, he had xx.s. given him by the company, but no mention for what. In 1581, he and John Charlewood supplicated the Lord Chancellor against a privilege to John Wolf, for printing books of less than six sheets of paper. In 1584, he was appointed printer to the city of London. He died between July, 1592 and July 1593, in which year Rob. Robinson discharged his bond for 5l. to the company.

In 1581-2, he had license to print, *An instruction full of heavenly consolation. The precious perle. How a christian man ought to behaue him-*

*self in the daunger of Deathe. Declarynge how God doth calle vs to Repentaunce.* In 1565-6, *A complaynte betwene nede and pouerte.* In 1566-7, *The commandementes & lesson of olde Cato as he lay upon his death bedd. A tretys which ys prouvyd that the soule of man doth leue & wake after the departure of this world. The Court of Venus moralized by Thomas Bryce.* In 1567-8, *An history of lyf & vertu, wherein ys toucht the Couurse of mans lyf.* In 1568-9, *The Justification of a christian Fayth. The Retorne of olde well spoken no body.* In 1579, *A necessarie instruction of the promises of God. Translated from the Latin by Urb. Regius. An aunswere to a Rebellious Libell. The Shepherds calender, conteynyng xij eclogues, &c.* In 1583, *xvii sermons of Hen. Bullenger upon the Oration of the prophet Jeremye, &c. Which book he is appointed to print by his deputye.* In 1586, *A thanksgyvinge for our deli'v from the intended tyrannye of the Antichristian Pharao.* In 1587, *To Wyn-det and him. A briefe instruction & manner how to keepe bookis of accomptis, &c.*

The device of this printer was of that kind called rebus, or an image of the name or ideas of the inventor, and hence as his name was Singleton, and he dwelt at the Golden Tun, in Creed-lane, he assumed the figure of a Single Tun, with a monogram mark above it, on an ancient shield, surrounded by a motto set in the above wood-cut.

1593, July 29. The privy council addresses letters to both universities, dated *Outlands*, prohibiting the common players from performing either in the universities, or at any place within the compass of five miles, and especially (at Cambridge,) in the village of *Chesterton*, on the water side.

1593. Macao, or Amacao, a seaport town of China, situate on an island in the bay of Canton. Peignot assigns this year as the period of the introduction of typography into this place; but Scheuchzer, in his introduction to Kämpfer's *History of Japan*, (fol. London, 1737) mentions a rare and curious book, containing an account of an embassy from the court of Japan to that of Rome, which was printed in Japanese and Latin, *In Macaensi portu Sinici regni, in domo Societatis Jesu, cum facultate ordinarii et superiorum, anno 1590, 4to.* A copy of this book is in the rich collection of Mr. W. Marsden. It is

certain that the jesuits had a early printing establishment in Macao. For an interesting account of the English missionary society press at Macao, see the year 1814, *post*.

1593. ALBERT HEYNDRIESZ, a printer at the Hague, styles himself printer to the states of Holland, and executed many classical volumes of great beauty.

1594. ROBERT AGGAS was a scholar, and a printer from the year 1558 to 1594, and dwelt at the west end of St. Paul's church. According to Maunsell's *catalogue*, he seems to have been more of a bookseller than a printer. He had a relation, named Ralph Aggas, a surveyor, who published maps of several towns in England.

1594. The office of typographer royal, instituted at Stockholm, the capital of Sweden, with certain privileges and a fixed salary from the government, the printing materials also being furnished by the king. The first printer who held this post was ANUNDERS OLAI.

1594. *Writing tables with a kalender for xxiiii years, with sundry necessarye rules. Made at London by Francis Adams, stationer or book-binder, dwelling in Distaffe lane, neare Olde Fishstrete, at the signe of the Aqua vite still, and are there to be sold.* In this work it is stated, "Printing was found out at Mentz, 1459, and first brought to London by William Caxton, mercer." Oblong sixteens.

1594. In Jerom Wierix's *Bible*, published in Holland, in this year, there is a plate by John Wierix, representing the Feast of Dives, with Lazarus at his door. In the rich man's banquetting room there is a dwarf to contribute to the merriment of the company, according to the custom in this century, of rich people keeping dwarfs for their amusement.\*

Jerom and John Wierix engraved a great number of plates, neat, but hard. Johu was born in 1555. There was also an Anthony Wierix, an engraver, whose mark was A. W. Jerom's was H. I. W.

1594, June 1. *Died*, Christopher Marlow, the best of English poets before Shakspeare, whom Philips calls "a kind of second Shakspeare." Thomas Heywood styles him "the best of poets;" and Drayton has bestowed a high panegyric on him, in the *Censure of the Poets*, in these lines:

Next Marlow, bath'd in Thespian springs,  
Had in him those translunary things,  
That your first poets had; his raptures were  
All air and fire, which made his verses clear,  
For that fine madness still he did retain,  
Which rightly should possess a poet's brain.

Ben Jonson also speaks of "Marlow's mighty line;" and Warton says that his tragedies manifest traces of a just dramatic conception, over

which it was left to Shakspeare's genius alone to triumph and predominate. He was born about 1562, though little is known of his family. He was educated at Bene't college, Cambridge, where he took the degree of B.A. 1583, and M.A. 1587; he then quitted the academic bower, and went on the stage, where he fell into a dissolute life, and practised the most epicurean indulgence, and at last, it is reported, came to an untimely end, in the following manner.

He fell deeply in love with a low girl, and had for his rival a fellow in livery, who looked more like a pimp than a lover. Marlow fired with jealousy, and having some reason to believe that his mistress granted the fellow favours, rushed upon him to stab him with his dagger; but the footman being quick, avoided the stroke, and catching hold of Marlow's wrist, stabbed him with his own weapon; and notwithstanding all the assistance of the surgery, he soon died of the wound. During his short life, he produced eight plays, besides miscellaneous poems, and wrought a great change in theatrical literature. He delighted in delineating the strong and turbulent passions. In the *Tragical History of the Life and Death of Dr. Faustus*,\* he writes with a force and freedom unknown previously to our infant drama; and calling in the aid of magic and supernatural agency, produces a work full of power, novelty, and variety: and was designed to depict ambition in its most outrageous form. In the *Famous Tragedy of the Rich Jew of Malta*,† he exhibits every good and humane feeling under subjection to the love of money.

The plays of Marlow are remarkably scarce, amounting to seven, six of which were in the Garrick collection. The play of Marlow's, which is not in the above collection, is called *Dido, Queen of Carthage*‡; a copy of which was in the Malone collection.

1595. *Died*, CHARLES YETSWEIRT, French secretary and clerk of the signet to queen Elizabeth. In lord Burghley's diary is the following notice, under the year 1594, "March 25, a privilege granted to Charles Yetzweirt, for printing all books of the common law."

In the Herald's office there is this memorandum of him.

"Charles Yetzweirt, esq; her majesty's secretary for the French tongue, and one of the

\* Written by Ch. M. London: printed by John Wright, and are to be sold at his shop, without Newgate, at the sign of the Blithe. 1616. It is in black letter. Some former possessor of this copy has filled up the initial M. and written *Marklin*. Sold at Wright's sale for £1 7s.

† As it was played before the king and queen, in his majesty's theatre, at Whitehall, by her majesty's servants, at the Cock Pit. Written by Christopher Marlow. London: printed by J. B. for Nicholas Vavasour, and are to be sold at his shop in the Inner Temple, near the church. 1633.

‡ Played by the children of her majesty's chapel. Written by Christopher Marlow and Thomas Nash, gent. London: printed by the widow Orwin, for Thomas Woodcock, and are to be sold at his shop in Paul's Churchyard, at the sign of the Black Boar. 1595.

There was no copy of this play in the collections of Farmer, Steevens, Pearson, or Dodd. There was one in the possession of Dr. Wright, which produced the enormous sum of sixteen guineas.

\* In Italy, fondness for dwarfs was carried to extravagance. "Being at Rome in the year 1566," says a French writer, "I was invited by cardinal Villelli to a feast, where we were served by no fewer than thirty-four dwarfs, most of them horribly distorted." The same author adds, that Francis I. and Henry II. Kings of France, had many dwarfs, and Charles II. of England had Jeffry Hudson.

clerks of the signet, died at his house at Sounburie, the 25th day of April, anno 1595; and was buried in the church of the same parish, the 5th day of May next following. He married Jane Elkin, and had issue Frances, who died February 1594. The funeral was solemnized by York Herald (deputy for Clarenceux king of arms) and Portcullis officer of arms.

Subscribed by { Thomas Shotholte.  
                                { Francis Galle."

1595. JANE YETSWERT, widow of the above, continued exercising the art of printing and selling, some time after the decease of her husband, but met with a great deal of trouble from the stationers' company, as appears from two or three letters found among the manuscripts of the late lord Oxford, complaining of her hard usage.

1595. ABEL JEFFS dwelt at the Golden Cup, in the Old Bailey, in 1561, and in 1584 at the sign of the Bell, in Philip-lane. He put his sign at the end of his books, and this motto, WITH HARP AND SONG PRAISE THE LORD.

Though the first work of Jeffs's printing is dated 1561, no other occurs with his name until 1584, which has raised a doubt if it was one and the same person. In 1589 he printed the third edition of Roger Ascham's *Toxophilus*, in 4to.\* and in the same year he reprinted Ascham's *Schoolmaster*.†

*Pierce Penitens his supplication to the Diuell.* Barbara grandis hahere nihil. Written by Thomas Nash, gent.‡ Printed by Abel Jeffs, 1595. 4to. In this very curious production may be seen the cause of the celebrated dispute between Nash and Gabriel Harvey.

\* *Toxophilus: the schoole, or partition of shooting, contained in two booke, written by Roger Ascham, 1544. And now newly perused. Pleasant for all gentlemen and yomen of England, for their pastime to reade, and profitable for their use to follow both in warre and peace.* By the consent of Henry Marsh. The first edition was published in 1545, the last in 1571.

† *The schole master, or plaine and perfitte way of teaching children to understand, write, and speak the Latin tongue but specially purposed for the private bringing up of youth, in gentlemen and noblemen houses, and commodious also for all such as forgot the Latin tongue, and would, by themselves, without a scholemaster, in short tyme, and with small paines, recover a sufficient habilitie to understande, write, and speake Latin.* By Roger Ascham. Dedicated to sir William Cecil, 4to. 1570.

The last day saving one of this year, (1562,) says Camden, was the last day of sir Roger Ascham's life. He was born in Yorkshire, and brought up at Cambridge; was one of the first of our countrymen that polished the Latin and Greek, and the puerility of his style not without commendations for eloquence. He was for a while schoolmaster to queen Elizabeth, and her secretary for the Latin tongue. Nevertheless, being too much given to dicing and cock-fighting, he lived and died a poor man, leaving behind him two most excellent books, as monuments of his wit in the English tongue, whereof he entitled the one *Toxophilus*, and the other *Scholarcha*.

Queen Elizabeth was taught to write by the celebrated Roger Ascham. Her writing is extremely beautiful and correct, as may be seen by examining a little manuscript book of prayers, preserved in the British Museum. Her first writing book is in the Bodleian library at Oxford. The gradual improvement of her majesty's hand, writing is very honourable to her diligence; but the most curious thing is the paper on which she tried her pens; this she usually did by writing the name of her beloved brother Edward, a proof of the early and ardent attachment she formed to that amiable prince.

‡ A copy of this work was lately offered at 26 6s.

The contests, squibs, and pamphlets, between Nash, and Greene, and Harvey, at one time occupied no small share of public attention and curiosity. They proceeded finally to such extremities that the arm of power interfered, and they were seized and prohibited.

1595. The first digested list of publications in the English language, was compiled by ANDREW MAUNSELL, printer and bookseller, under the following title:—

*The first part of the Catalogue of English printed Bookes. Which concerneth such matters of Divinitie as have bin either written in our tongue, or translated out of some other language; and have bin published to the glory of God, and edification of the Church of Christ in England. Gathered into Alphabet, and such method as it is, by Andrew Maunsell, bookseller.* London: printed by John Windet, for Andrew Maunsell, dwelling in Lothburie, 1595, in folio, with the device of a Pelican and its offspring rising out of the flames, round which is, "Pro lege, rege, et grege. Love kepyth the lawe, obeyeth the kyng, and is good to the commonwelthe."

*The seconde Parte of the Catalogue of English printed bookes; eithier written in our owne tongue, or translated out of any other language; which concerneth the sciences Mathematicall, as Arithmetick, Geometrie, Astronomie, Astrologie, Musick, the Arts of Warre, and Navigation; and also, of Phisicks and Surgerie.* At London: printed by James Roberts. 1595.

The third part of the catalogue, which he promised, and which to us would have been the most interesting of *Rhetoric, History, Poetry, and Policy*, never appeared. In the preface, such was the temper of the times, and of Elizabeth, we discover that he has deprived us of a catalogue of "the books written by the fugitive papists, as also those written against the present government, (meaning those of the Puritans.) I do not think meet for me to meddle withall."

In one part of his catalogue, however, he contrived to insert the following passage; the burthen of the song, seems to have been chorused by the ear of our cautious Maunsell. He is noticing a Pierce ploughman in prose. "I did not see the beginning of this booke, but it endeth thus:—

God save the King, and speed the Plough,  
And send the prelates cares inough,  
Inough, inough, inough.—Page 80."

An analysis of Maunsell's catalogue is given in the *Athenæum*, vol. i, pp. 43-45.

The progress of sale catalogues in England, is copiously treated of in Mr. Nichols's *Literary Anecdotes*, vol. iii. pp. 608, 693.

ANDREW MAUNSELL dwelt at the sign of the Parrot, in St. Paul's Church yard. He commenced business about 1570, and continued near thirty years. He printed but few books himself, four only bearing his imprint, but he was a great publisher.

1595. *The Old Wives Tale*. A pleasant conceited Comedie, played by the queenes majesties players. Written by George Peele.\* Printed at London by John Danter, and are to be sold by Ralph Hancocke and John Hardie.†

It appears very probable that Milton had seen this very curious and rare tract. The story is the same with that in *Comus*, namely, two brothers are represented as in search of a sister, confined by the power of a magician. In the *Old Wives Tale*, as in *Comus*, the brothers aloud call their sister by name, and Echo makes reply. See a long and interesting account of George Peele, the author of this dramatic piece, and the piece itself, in Todd's edition of *Comus*, published separately in 1798. See also Warton's edition of *Milton's Minor Poems*, page 126.

1595, Feb. 21. Robert Southwell, called the English jesuit, was executed at Tyburn, on this day. Among the bards of the Elizabethan era Southwell shone with no inferior lustre. With much of the general character of the period, fully participating in its peculiarities, often led away by antithesis, and sometimes concerted in the choice of words, there is an overflowing of mind, a richness of imagination, and a felicity of versification in this author which eminently entitle his productions to the regard of aftertimes. His melancholy life, and dreadful fate, would spread a deep interest over his works, even were they in themselves destitute of it, which is very far from being the case. Southwell was also an elegant and powerful prose writer, and a deep casuist. He was of a good family in Norfolk, educated at Douay, and at sixteen entered in the society of jesuits at Rome. In 1584, he came as a missionary to England, and was domestic chaplain to Anne, countess of Arundel, in which situation he remained till 1592; when he was apprehended at Uxenden, in Middlesex, and sent to the tower, where he remained three years, during which time, he was racked ten times,‡ with a view to extort from him a disclosure of certain

supposed conspiracies against the government. At the end of this period he sent a letter to lord Burleigh humbly intreating his lordship, that he might either be brought upon his trial to answer for himself, or at least that his friends might have leave to come and see him. Burleigh answered, "that if he was in such haste to be hanged, he should quickly have his desire." Shortly after he was removed to Newgate, tried at Westminster for remaining in England contrary to the statute, convicted, and condemned to death: when the unhappy sufferer was only in his thirty-fifth year.

It may be mentioned that this was the age when collections of fugitive and miscellaneous poetry first became common. Several volumes of this kind were published about this time, and contain some lyrical poetry of the greatest merit, without any author's name. The following poem, by Southwell, will be a good specimen of the forms of composition:—

#### THE IMAGE OF DEATH.

Before my face the picture hangs,  
That daily should put me in mind  
Of these cold names and bitter pangs  
That shortly I am like to find;  
But yet, alas! full little I  
Do think hereon, that I must die.

Continually at my bed's head  
A hearse doth hang, which doth me tell  
That I ere morning may be dead,  
Though now I feel myself full well:  
But yet, alas! for all this, I  
Have little mind that I must die!

The gown which I am used to wear,  
The knife wherewith I cut my meat;  
And eke that old and ancient chair,  
Which is my only usual seat;  
All these do tell me I must die,  
And yet my life amend not I.

My ancestors are turn'd to clay,  
And many of my mates are gone;  
My younger daily drop away,  
And can I think to 'scape alone?  
No, no; I know that I must die,  
And yet my life amend not I.

Not Solomon, for all his wit,  
Nor Samson, though he were so strong,  
No king nor power ever yet  
Could 'scape, but death laid him along.  
Wherefore I know that I must die,  
And yet my life amend not I.

If none can 'scape Death's dreadful dart,  
If rich and poor his beck obey;  
If strong, if wise, if all do smart,  
Then I to 'scape shall have no way:  
Then, grant me grace, O God! that I  
My life may mend, since I must die.

1596. *Davis's Worldes Hydographical Description*, wherein is proved that the world in all his places is inhabited, and the seas universally navigable. Mr. Beloe says that this tract is to be reckoned among the rarest of our English books. It was written by John Davis, the celebrated navigator, who gave his name to the straits so called. It consists of 24 leaves, 8vo., and a copy was sold by auction, by Mr. Evans, January, 1830, for £7 10s. Two copies are all that are known.

\* George Peele, the scholar, the poet, the wit, and, in every sense, the actor, after revelling in all the license of an age unparalleled in this country for the variety and extent of talent, as well as the vices it engendered, in the extremity of age, disease, remorse, and poverty, the scorn of those who, by report or experience, were familiar with his life, deserted by most of his friends and associates, and written down by the rivals of his quill, was in his old age reduced literally to want, and died at last, the bitter sport, both in his person and writings, of insolence, want, and revenge. He was born in Devonshire, and was a student of Christ church college, Oxford, when he took his degree of M.A., on the 6th of July, 1579, "at which time he was esteemed a most noted poet in the university," quoth Anthony a Wood. He was a good pastoral poet, and his plays, four in number, were acted with great applause in the university. He died, 1598.

† Sold at Wright's sale for £5 7s. 6d.

‡ Criminal process in those days was the mere application of physical torture, to extort an avowal of the crime imputed; for the law had humanely provided that no criminal could be convicted but upon his own confession. The rack was therefore termed the *question*; and was, in fact, the only form of interrogatory. Thus, if an accused was innocent, and had energy of soul to brave the torture, he must bear it till he died; but if nature was subdued by pain, he accused himself falsely, and was put to death on the scaffold. Such was the justice of man calling themselves Christian prelates.—*Madame Junot's Memoirs of Celebrated Women*, page 74.

Captain John Davis sailed from Dartmouth to discover a north-west passage to the East Indies. He returned on the 3d of September, 1585. He was killed near Malacca, December 27, 1605.

1596, Jan. 28. *Died*, Sir Francis Drake, who is distinguished as being the first man of his country who achieved the circumnavigation of the globe, which took up two years and ten months; on his return in 1580, the queen dined on board the ship, at Deptford, which had performed so memorable a voyage, and conferred the honour of knighthood on the commander. The following inscription is from a rare portrait in the Cracherode collection: \*

SIR FRANCIS DRAKE, KNIGHT.

Our ages Tiphys,† valours noble mirror,  
Englishmen's glory, and the Spaniard's terror,  
The sailors starre, sea-taming sail-winged Drake,  
Whose fame, tho' he be dead, lives fresh awake,  
Which with his corps whole oceans cannot drownd  
But shall endure so long as world is round,  
Which he encompass, one whose like I feare  
England will never see again but rare.

In the ever memorable service which terminated in the defeat of the Spanish armada, sir Francis Drake, whom Elizabeth had appointed vice admiral under lord Howard of Effingham, had the chief share, and the horrible vengeance experienced by the flying armada was inflicted principally by his division of the fleet. After this he went to the West Indies; with sir John Hawkins, but the two commanders disagreeing in their plans little was done by them. Drake died off Nombre de Dios. He was born at Tavistock, in Devonshire, in 1545, and was representative for the town of Plymouth, to which he was a great benefactor, by causing water to be conveyed to it from springs at eight miles distance.

1597, March 1. King James VI. of Scotland, grants a privilege to John Skene, clerk of the register, for the printing of all laws and acts of parliament, and Robert Waldegrave to be the printer.

1597, March 15. *The lawes and actes of parliament, maid be king James the first, and his successors, kings of Scotland, visited, collected, and extracted furth of the register.* Edinburgh be Robert Waldegrave, prenter to the kingis majestie. Folio.

\* The Rev. C. M. Cracherode, of celebrated book fame, was the son of Mordaunt Cracherode, who went out to make his fortune as a commander of the marines in Anson's ship. He returned in consequence of his share of prize money, a wealthy man. Hence the property of his son, and hence the *Bibliotheca Cracherodiana*, in the British Museum.—*Dibdin*.

† Tiphys was the pilot of the Argo, the first ship.

‡ A true discourse of sir Francis Drake's West Indian voyage, and taking of St. Jago, Santo Domingo, Cartagena, and St. Augustine. London: printed by Richard Field, 1599. 4to.

A Libel of Spanish Lies found at the Sack of Calce, discouraging the Fight in the West Indies between the English and the Spaniard, and of the Death of Sir Francis Drake, with an Answer confuting the said Spanish Lies, &c. London, 1596. 4to. By Captain Henry Navile. A copy is in the Bodleian Library. See Wood's *Athenæ Oxonienses*.

1596. *Died*, FRANCIS RAPHELENGIUS, the celebrated printer of the university of Leyden. This distinguished scholar was born of parents of low condition, and destined for trade. An invariable love of study directed his attention towards books; and during the civil wars in France, he came to England, and taught the learned languages some time at Cambridge. Going over to Antwerp, to purchase rare books there for the university, he fell, first, in love with the splendid apparatus of Plantin's printing office; and, secondly, with the not less attractive charms of Mademoiselle Margaret Plantin. He had by her three sons and a daughter. He died in his 58th year. His learning lay chiefly in the Hebrew and oriental languages, and that part of the Polyglott (the latter volumes) which embraces Hebraic lexicography, &c. was executed more particularly under the eye of Raphelengius. This able man, besides being printer to the university of Leyden, conducted the press of his father-in-law, who had established an office there. Thus, in the frontispiece of Whitney's *Emblems*, we read, Imprinted at Leyden, in the house of Christopher Plantin.

1596. At the national synod, held at Saumur, in France, Mousieur Adam D'Orval, minister of the church of Sancerre, was ordered "to write from the assembly, to the church of Geneva, to acquaint them with the frauds committed by their booksellers, who vended in these parts a number of *Psalms Books*, and *New Testaments* of the old translation, only prefixing a new title, as if it were a new translation." The same synod gave JEROM HAULTIN, of Rochelle, permission to print their *French Bibles*. "The province of Xaintonge craving leave," say they, "for Monsieur Haultin, of Rochelle, to print our *French Bibles*, he engaging his word, to do them on better paper, with a fairer character, and at a cheaper rate than those of Geneva, which are now become very rare and dear. This synod doth permit the said Haultin to print the *Bible*, and adviseth him to have a singular care that they be done most accurately and correctly." Le Long notices several impressions of the *New Testament*, printed by Haultin, and two of the whole *Bible*, by his heirs.

The first edition of the *New Testament in the Basque tongue* was printed at Rochelle in the year 1571, with the title of, *Jesus Christ Gure Taunaren Testamentu Berria, &c. Rochellan, Pierre Haultin Imprimiciale*, 1571. On the title are engraved the arms of the queen of Navarre, through whose zealous exertions in the cause of religion this translation into the Biscayan dialect was made, and who also caused the *catechism* and *prayers* used in the church of Geneva, to be translated and printed at Rochelle.

BARTHOLOMEW BERTON exercised the art of printing at Rochelle, in 1564 and 1566, in which latter year he printed the following work: *Le grand Routier pilotage, et encrage de mer*, written by Pierre Garcie; with rude but interesting wood cuts. A copy is in Trinity college, Dublin.

1506. JACOBUS LUCIUS printed a *Polyglott*, in Greek, Latin, and German, at Hamburg, in four volumes, folio, "Studio Davidis Wolderi;" the Greek from the Venice edition of 1518; the Latin versions those of St. Jerom and Pagninus. Mr. De Missy's copy of Wolderus was sold for no more than half a guinea; and is now in the royal library.

The learned author of the *Succinct Account of Polyglott Bibles*, has the following remarks:—

"The taste that prevailed early in the sixteenth century, for the cultivation of literature, was partly the cause of, and partly owing to the publication of the sacred writings in different languages. Certain men, in whom were providentially united a taste for sound learning, together with ecclesiastical influence, and secular opulence, determined to publish, first, parts, and then the whole of the sacred writings, in such languages as were esteemed the learned languages of the universe. These were, principally, Latin, Greek, Hebrew, Arabic, Chaldee, and Syriac; others of less importance were added to them. Such publications attracted general attention, and became greatly studied. Hence the taste, not only for sacred literature, but universal science, became widely diffused; and the different nations of Europe seemed to vie with each other in the publication of those works, which have since obtained the denomination of *Polyglotts*, that is, 'books in many languages.'"

1596. *The Thirteen Bookes of Aenidos. The first twelve being the worke of the divine Poet Virgil Maro, and the thirteenth, the supplement of Maphæus Vegius.* Translated into English verse to the first third part of the tenth booke, by Thomas Phaer, Esquire: and the residue finished, and now newly set forth for the delight of such as are studious in Poetry. By Thomas Twyne, Doctor in Physic. London, printed by Thomas Creed, in Thames-street. 4to.

1596. *The faerie queene, disposed into xii bookes, fashioning xii moral vertues.* By Edmund Spenser. London, printed by William Ponsonby. In two vols. 12mo.

The *Faery Queen*, says a modern critic, is a world of itself, formed out of the extraordinary fancy of the author. His invention was without limit. Giants and dwarfs, fairies, and knights, and queens, rose up at his call. He drew shape after shape, scene after scene, castle and lake, woods and lawns, monstrous anomalies and beautiful impossibilities, from the unfathomable depths of his mind; yet all of them intended to represent some shade or kind of emotion, passion, or faculty, or the things upon which these are continually operating. Only six of the original twelve books now remain, the rest having been lost by a servant on the passage from Ireland to England. Each of these is divided into twelve cantos, and the versification of the whole is in a peculiar stanza of nine lines, now commonly called the *Spenserian*, and remarkable for its elegance and harmony. Each book is devoted to the adventures of a particular knight, who personifies a certain virtue, as Holiness, Temper-

ance, Courtesy, &c., and who moves in the midst of a whole host of sentiments and ideas, personified in the same way, the whole bearing the appearance of a chivalrous tale. The work, though upon the whole too tedious for the generality of modern readers, is justly regarded as one of the greatest compositions in English poetry. Spenser formed his manner, in some degree, upon the model of the Italian poets; and yet he is not only unlike them in many respects, but he is like no other English writer.

Perhaps it is fortunate for the *Faery Queen* that one half of it was lost; and it might have even been improved in value by the want of a half of that which remains; for it is allowed that the strength of the work lies in the first three books.

After Spenser's *Faerie Queen* was published, the press overflowed with many mistaken imitations, in which faries were the chief actors,—this circumstance is humorously animadverted on by Marston, in his satires, as quoted by Warton: every scribe now falls asleep, and in his

— dreams, straight, tenne pound to one

Outsteps some fairy—

Awake, straight rubs his eyes, and PRINTS HIS TALE.

The following anecdote cannot be well omitted, though generally well known. It is the method Spenser took to introduce himself to sir Philip Sidney, which was by going to Leicester house, and sending in the ninth canto of the first book of his *Faery Queen*. Sir Philip was particularly pleased with the description of Despair, and "expressed unusual transport," says Mr. Hughes, "on the discovery of so new and uncommon a genius. After he had read some stanzas, he turned to his steward, and bid him give the person that brought these verses, fifty pounds; but upon reading the next stanza, he ordered the sum to be doubled. The steward was no less surprised than his master, and thought it his duty to make some delay in executing so sudden or lavish a bounty; but upon reading one stanza more, Mr. Sidney raised his gratuity to two hundred pounds, and commanded the steward to give it immediately, lest as he read further, he might be tempted to give away his whole estate. From this time he admitted the author to his acquaintance and conversation, and prepared the way for his being known and received at court."

1596. JOHN DANTER dwelt in Hosier-lane, near Holborn conduit, and printed some books with William Hoskins. His first book is dated in 1591. In 1593, he printed *Strange news of the intercepting certaine letters, and a convoy of verses, as they were going privily to victualle the Low Countrie.* Vudu imdellitur unda. By Thomas Nashe, gent. His last work was *Hare with you to Suffron Walden; or Gabriell Harvey's Hunt is up. Containing a full answer to the eldest sonne of the hatter moher; or Nashe his confutation of the sinful doctor.\** 1596. 4to.

\* A copy of this work, with an outline drawing of Nash, copied from Lichfield Trimming, and the title in manuscript, was lately offered at £16 16s.

1596. THOMAS SCARLET was a good printer, and carried on business from the year 1576 to 1596, though he printed but few books. In 1592 he printed the tragedy of *Tancred and Gismond*. Compiled by the Gentlemen of the Inner Temple, and by them presented before her majesty. Newly revived and polished according to the decorum of these daies. By R. W. In 1594 he printed *The unfortunate traveller: or the life of Jack Wilson*. By Thomas Nash. Printed for George Bushy. 4to.

1596. *A Book of Secrets; shewing diuers waies to make and prepare all sortes of Inke and Colors, &c. translated out of Dutch by W. P. London, 1596, 4to.* To which is annexed a little treatise, intituled *Instructions of ordering Wines, translated from the Italian, by W. P.* Sold at Bindley's sale for £3 10s.

1596. *A progress of pietie, or the harbour of heavenly harts ease, to recreate the afflicted souls of all such as are shut up in any inward, or outward affliction.* By John Norden. Printed for John Oxenbridge.

The rebus of JOHN OXENBRIDGE was an Ox, with the letter N on his back, as going over a bridge.

1596. *Sommons to doomes-daie, sent unto his beloved England, as a memorial of his deepe printed love and loyaltie.* By Henoch Claphan. Edinburgh: printed by R. Waldegrave. 12mo.

1596. *A New Discourse of a Stale Subject, called the Metamorphosis of Ajax.* Written by Miscamos to his friend and cousin Philostippos. London: printed by Richard Field, dwelling in the Blackfriars. At the bottom of the title page, sir John Harrington,\* the author, has written, in red ink,

"Seen and dissalowed."

The dedication is also in manuscript by the author, and is as follows:

"To the Right Worshipfull  
Thomes Markham,  
Esquire, this  
bee d. d."

This work is frequently alluded to by contemporary writers; as in Shakspeare's *Love's Labour Lost*, act v. scene 2, and the several writers quoted by Mr. Steevens in his note on that passage. It is remarkable, that for writing this pamphlet, sir John Harrington fell into disgrace with queen Elizabeth. Mr. Robert Markham writing to him two years after, in 1598, says, "Since your departure from hence you have been spoke of and with no ill will, both by the nobles and the queene herself. Your booke is almost forgiven, and I may say, forgotten, but not for its lacke of wit or satyr. Those whome you feared moste are now becoming themselves in the queene's grace; and tho' her highnesse signified displeasure in outwarde

sorte, yet she did like the marrow of your booke. Your great enemye sir James, did once mention the star chamber; but your good esteem in better mindes outdid his endeavours, and all is silente again. The queene is minded to take you to her favour; but she sweareth that she believes you will make epigrams, and write *Miscamos* again on her, and all the court. She hath been heard to say, 'That merry poet, her godson, must not come to Greenwich 'till he hath grown sober, and leaveth the ladies sportes and frolicks. She did conceive much disquiet, on being tolde you had a shafte at Leicester. I wishe you knew the author of that ill deed, I would not be in his best jerkin for a thousand markes.'"—*Nuga Antiqua*, vol. ii. p. 442.

1597. At this time the literary public received a high gratification, from the appearance of the first part of Francis Bacon's *Essays*;\* concerning which we need not say, that they opened a rich treasury of moral observation, and that they were worthy of the great and comprehensive mind from which they proceeded. The name of *Essays* were then new to the world, and perhaps had been derived from Montaigne.† Thus did Bacon introduce into England a species of writing which hath since been largely cultivated, and hath produced a vast number of beautiful compositions, which constitutes a fine part of modern literature, and the history of which, and its effects on the understanding and manners of men, will at all times afford matter of useful and interesting discussion.—*Kippis*.

Lord Bacon speaking of books says, read not to contradict and confute, but to weigh and consider." Some books are to be tasted, others to be swallowed, and some few to be digested; that is, some books are to be read only in parts; others to be read, but not curiously; and some few to be read wholly and with diligence and attention. Reading maketh a full man, conference a ready man, and writing an exact man.

1597. RICHARD JONES, JHONES, or JOHNES, printed in conjunction with Thomas Colwell, in 1570. He kept a shop at the south-west door of St. Paul's church, and lived at the sign of the Rose and Crown, near Saffron Hill, in Holborn; and at the upper end of Fleet-lane, over against St. Sepulchre's church, at the sign of the Spread Eagle. He printed several books in partnership

\* *Essays, religious meditations, places of perswasion and discusion.* Seen and allowed. Dedicated by Francis Bacon, esq., of Gray's Inn, to his brother Anthony, the 30th of January, 1597. This first edition of the *Essays*, contains only these ten:—Of study. Discourse. Ceremonies and respects. Of followers and friends. Sutors. Expense. Regiment of health. Honour and reputation. Faction and negotiation. In 18 leaves, or one sheet. 12mo. London: printed by John Windet, for Humphry Hooper, and are to be sold at the Black Bear, in Chancery-lane. Another edition appeared the following year.

† Michael de Montaigne, a celebrated French writer, was born at a seat of that name, in Perigord, Feb. 28, 1533, and died at the same place, in his 66th year, Sept. 13, 1592. His *Essays* show great knowledge of the human mind, and contain many valuable lessons of instruction. Cardinal de Perron emphatically called them the breviary of honest men. The best edition is that of Coste, with notes, in 1735 or 1739, 3 vols. 4to. The *Travels* of Montaigne were printed in 1773, 3 vols. 12mo.

\* Sir John Harrington published a translation of Ariosto's *Orlando Furioso*, to which was prefixed his *Apology of Poetry*. A collection of his works has been printed, under the title of *Nuga Antiqua*, in 3 vols. 12mo. He died in 1612, aged 51.

librarian, he says, "I pray you put as many to binding of the books as you shall think convenient, of which I would have some dozen of the better paper, to be trimmed with *gilding* and strings;" and sends, at another time, money for their bindings, chainings, placings, &c. Sir Thomas Bodley displays a perfect knowledge of every thing connected with the subject. In his various letters to Dr. James, he is continually giving directions relative to the bindings of the books in vellum and leather; ordering them to be rubbed by the keeper with clean cloths, as a precaution against moulds and worms; and making provision for a proper supply of bars, locks, hasps, grates, clasps, wires, chains, and gins of iron, "belonging to the fastening and rivetting of the books," the establishment of the Bodleian gave a stimulus to every thing connected with books in Oxford, which though in some repute as respected binding, still must have been limited in extent, as the libraries there were not previously remarkable for superiority; and according to sir Thomas Bodley, Cambridge was less so, as he remarks after his visit to that university, "the libraries are meanly stored, and Trinity college worst of all."—*Hearne*.

1597. The last Easter catalogue of George Willer, of Augsburg, (see page 320, *ante*.) is of this date, on the title *Plerique libri in edibus Elie et Georgii Willerii fratrum bibliopolarum Augustanorum habentur*. It is printed also by Bassens, at Frankfort. George and Elias Willer, were perhaps sons of the former. Reimann says, that after the death of George Willer, the catalogue was published by the Leipzig bookseller, Hearnig Grosse, and by his son and grandson. The council of Frankfort caused several regulations to be issued respecting catalogues, an account of which may be seen in D. Orth's *Treatise On the imperial fairs at Frankfort*. After the business of bookselling was drawn from Frankfort to Leipzig, occasioned principally by the restrictions to which it was subjected at the former by the censors, no more catalogues were printed there, and the shops in Book-street were generally converted into taverns.—See 1604, *post*.

1597, Oct. 10. *Died*, ALDUS MANUTIUS, THE YOUNGER, with whom terminated a family who have been justly called the glory of literature and typography; and whose reputation will continue so long as one single volume exists of the numerous and excellent works which they printed during the long period of one hundred and four years. He was the son of Paul, and grandson to the celebrated Aldus: was born in the year 1547, and gave extraordinary proofs of precocity of talent by publishing a work in his eleventh year. The success of this publication was not less extraordinary. In 1562, he accompanied his father to Rome. In the year 1566, he published his celebrated work, *De Veterum Notarum explanatione*, which the learned may consult with advantage. In 1572, he married into the Giunta family, by espousing Frances Lucretia, the daughter either of Bernard or Thomas

Giunta. Upon the death of his father in 1574, he became the sole proprietor and conductor of his press, and from this time he almost wholly abandoned the simple Dolphin and Anchor, as given by his progenitors, and assumed the arms which Maximilian had granted to his father. In 1585, he left Venice, and in the following year set up his press at Bologna; and though he had left Venice, his presses continued to work under the direction of Nicolao Manassi and other able superintendents. M. Renouard suspects, from the style of Manassi's prefaces, that he was not a manager of the Aldine printing-office, but became actual proprietor of it, on the departure of Aldus for Rome. On the death of pope Sixtus V. in 1590, Clement VII. ascended the papal throne, and conferred on our Aldus the direction of the Vatican printing-office; and hither he transported his press and large library, amounting to the almost incredible number of 80,000 volumes. He was professor of eloquence (though with little success) at Venice, Bologna, Pisa, and Rome. It appears that he cultivated literary pursuits more than the art of printing; he was, however, well skilled in the typographic art, and executed many valuable works. The editions, latterly executed by Paul Manutius and his son Aldus, are executed with far less beauty and correctness than the early printed editions of the Aldine press; and frequently betray evident marks of negligence. It is to be much regretted, that Aldus died deeply in debt, and that his presses and library were seized upon by his creditors, and broken up.

1597. JOHN ALDE dwelt at the long shop adjoining to St. Mildred's church, in the Poultry. In 1560 he printed his first work, being a *short treatise declaring the destitute wickedness of magical sciences; as, necromancie, conjurations, curious astrology, and such like, made by Fr. Cox*. 12mo.

1597. HENRY BALLARD, dwelt at the sign of the Bear without Temple-bar, over against St. Clement's church, where he printed two works in this year.

1697. JOHN DE BEAUCHESNE's name appears to one work of this year, though he is considered more of an ingenious schoolmaster, whose dwelling was in Black Friars. In 1602, he published a *copy book to teach writing*, done in wood, printed by Richard Field, his neighbour.

1598. RICHARD BRADCOCKE printed the two following works in 1598: *Virgidemiarum*, sixe books. First three books of toothlesse satyrs.—Poeticall.—Academicall.—Morall. Corrected and amended. Sixty-eight leaves, 12mo.

*Virgidemiarum*. The three last bookes of byting satyres. *With vinets at top and bottom*. 106 pages. 12mo.

1598. RALPH BLOWER, JOHN BOWEN, JOHN BUSBIE, HENRY KIRKHAM, WILLIAM BARLEY, THOMAS MANN, WILLIAM HOLME, RICHARD WALKER, H. HOOPER, R. DEXTER, THOMAS GARDINER, and JOHN BROWN, carried on the art of printing or employed others to work for them, about this time.

1598. RICHARD WATKINS lived in St. Paul's church yard, and had a shop adjoining to the little conduit, in Cheap. He had a patent with James Roberts, for printing *Almanacks*; and was warden of the stationers' company in 1583, and then gave up his right of the sheet or broad-side almanack, for the relief of the poor of the company. His first work is dated in 1561, and his last was entitled *A petite pallace of Pettie his pleasure*, 4to. Forty-eight works bear his imprint.

Richard Watkins used the annexed device, which is doubtless a pun upon his name, like those of many of his cotemporaries.

1598. *The Mercurius Gallo Belgicus*, which was long considered as the first newspaper, was composed by Mr. Jansen, a Friscan, and the first volume in 8vo. was printed at Cologne, in this year, and contained 650 pages. It was rather an annual register than a newspaper. It was ornamented with a wood engraving, representing Mercury standing on a globe, with his usual attributes: it was continued down to the seventeenth century, and many volumes are preserved in the British museum. May's comedy of *The Heir*, first acted in 1620, opens in the following manner:—

*Polymelus*.—Hast thou divulged the news,  
That my son died at Athens.

*Roscio*.—Yes, my lord,  
With every circumstance, the time, the place,  
And manner of his death; that 'tis believed  
And told for news, with as much confidence  
As if 'twere writ in *Gallo Belgicus*.

*Gallo Belgicus* was written in Latin, and had the following title: *Mercurij Gallo Belgici: sive, rerum in Gallia, et Belgio potissimum; Hispania quoque, Italia, Anglia, Germania, Polonia, Vicinisque locis ab anno 1588, ad Martium anni 1594, gestarum Nuncii*. It may be called the *State of Europe*; or, the *Annual Register*; or, it may be entitled more truly, the *History of his own Times*; but, it is not a newspaper.—See 1603, post.

1598. At a synod held at Montpellier, in France, it was advised, "cities and churches having printers in them to suffer no book to get into the press, till it had been first of all seen and approved by the church; divers provinces having complained of the licentiousness of printers, in publishing all sorts of books." The synod also enjoined, that "whereas Monsieur De Beza did, at the request of divers of our last synods, translate into metre the *Scripture-Songs*, they shall be received and sung in families, thereby to dispose and fit the people for the public usage of them, until the next national synod."—Quick's *Synodicon*.

1598. *Died*, HENRY STEPHENS THE SECOND, (eldest son of the first Robert,) who was one of the most learned men that ever lived, and so voluminous an author, that if he had spent his life in writing books, he would have left us enough to admire in the evidence of his industry and the fertility of his genius. But instead of this being the case, his days were passed partly amidst the toils of a laborious occupation, and partly under misfortune and penury, and in wandering about in quest of mere subsistence, owing to his adherence to the reformed religion. Poverty was his prevailing lot; and at the age of seventy, suffering under an entire decay of external fortune and mental powers, this supereminent indefatigable scholar and printer, finished his mortal career in an hospital at Lyons, in the above year. He was born at Paris, in the year 1528, and his education was such as might be expected from the solicitude of a parent, who was himself so distinguished for his personal erudition. The Greek language became the object of Henry's study in early years, and even before the Latin. His father inclined to the opinion of those who maintained that the Greek should be learned before the Latin. He therefore indulged the inclinations of his son, who applied to his Greek studies with incredible ardour; and his proficiency was such that he impressed, and almost indelibly, upon his memory, the *Medea* of Euripides. At seventeen, Henry was an attendant upon the public lectures of Jacobus Tusanus, who had succeeded to the Greek professor's chair in the royal college, founded by Francis I. After having successively profited by the instructions of Peter Danesius and Jacob Tusanus, Henry attended the official lectures of Adrian Turnebus, who was the successor of the latter in the Greek professorship.

In the year 1546, as Maittaire thinks, Henry was associated with his father in his typographical labours; and assisted in collating manuscripts for his father's impression of the historical works of Dionysius the Halicarnassian. About the nineteenth year of his age, (1547,) though but of a feeble bodily temperament, he determined upon exploring the literary treasures of other countries, and endeavouring to increase his personal erudition by the society of learned foreigners. This was about the period when Robert Stephens was deprived of the powerful protection of Francis I. by the premature decease of that monarch; and consequently was exposed in a manner defenceless to the malice of his inveterate persecutors. He spent three years and a half in visiting the different cities of Italy. The monuments of classical antiquity in which Rome abounds, were during many months the objects of his attentive curiosity. It appears that in the course of his peregrinations, he never lost sight of the main object, which was to provide materials for the illustration of his future typographical labours. For this end, sparing neither of expense nor time, he explored with unwearied diligence and zeal the repositories of literary lore, with which Italy abounded. From

his own testimony, it appears that he was resident in Florence, in the year 1547, and probably in 1553; and at Venice in 1556. Maittaire supposes he must have renewed his visits to Italy twice or thrice. In 1550, he visited England, and was honoured with the notice of Edward VI. who then reigned. It was his lot often to have access to royalty. He had interviews with Ferdinand and Maximilian, with Edward VI. and other sovereigns. But by no French monarch was he admitted to such familiarity as Henry III. He left England in 1551, with an intention of returning through Flanders and Brabant. His intercourse in Flanders and England, with persons of the Spanish nation, procured him an initiatory acquaintance with the Spanish language, which he afterwards eagerly and successfully improved by a diligent perusal of the best writers. On his return to Paris, at the close of the year 1551, it may be presumed that he found his father preparing to leave his native country. Maittaire imagines, though as he confesses, on no certain grounds, that Henry Stephens accompanied his father on his removal from Paris to Geneva. But if that really was the case, he soon returned, and established a printing office at Paris. We have no evidence that he found himself in any respect involved in the obloquy or disgrace of his father's clandestine retirement; or of any opposition experienced by him from the Sorbonne, or from any other quarter, either from his own account, or as resulting from the continuance of that enmity which had been exercised towards his parent. True it is, indeed, that he was not advanced to the dignity of "typographus regius;" but in the exercise of the typographic profession it can scarce be imagined that he experienced any impediment, forasmuch as we find him printing under the protection of a royal "privilegium," or licence, which he gave to the first work published in his name. In 1554, and in the twenty-sixth year of his age, he gave to the public, from his own press, *Anacreon*, Gr. Lat. 4to. the earliest, and one of the most finished and beautiful of all his impressions. It is executed in the larger royal Greek characters; having a Greek epistle of four pages, two Latin epigrams, and a Greek Anacreontic, by Henry, prefixed. To the work are added some fragments of Alceus, and of Sappho. At the close of this year he again visited Rome, probably embracing the same opportunity of paying his respects to his father at Geneva. From Rome he directed his course to Naples, where, by his skill in the Latin language, he was enabled to manage a political intrigue. In the same year he returned to Paris, and actively resumed his typographic labours on his own account, producing various impressions; to the titles of which he subscribed, "*Ex officina Henrici Stephani Parisiensis typographi*;" but seldom imitated his father's practice of subjoining any note of the month, or day; whence it becomes difficult to ascertain the precise order of their succession. This, however cannot be a matter of importance.

Of those works relating to Cicero, of which Henry was the author, and which in 1557 he gave from his own press, Maittaire says: "he constructed his *Lexicon Ciceronianum Græco-Latinum*; in which he brought together whatever Cicero had from philosophers, historians, poets, and prose writers, either interpreted or imitated: and to this lexicon he speedily added his own 'castigationes in plurimos Ciceronis locos,' partly from his own conjectures, and partly from an ancient and very accurate manuscript; subjoining specimens of the errors, and stating the causes of them: and moreover freely animadverting upon certain over scrupulous worshippers of Cicero, who carried their superstitious veneration so far, as to be tenacious even of the blunders of stupid scribes, and drowsy typographers." The *Lexicon Ciceronianum*, either for its extraordinary merit or excessive rarity, has usually been estimated by modern booksellers at a high price.

In 1558 he assumed the appellation of *Typographus illustris viri Huldrici Fuggeri*, already noticed at page 385 *ante*.

About 1560, he formed a matrimonial connexion with a woman whose ancestry he describes to have been noble, and of her mental excellencies, her temper, and domestic qualities and virtues, he speaks in the highest strain of praises. Who this extraordinary lady was, it is not satisfactorily known. Maittaire, on the authority of Isaac Casaubon, inclines to believe that she was of the family of the Greek professor, Henry Scrimger. The death of this lady happened, according to Nicéron, about the end of 1565; but according to Maittaire, in 1568. The children of the marriage who survived, were Paul Stephens, who afterwards established himself at Geneva, and two daughters, Florence and Denise. Upon the authority of a letter of Paul Melissus, it has been supposed that Henry formed a second matrimonial connexion at a much later period.

In 1569, he published two works, namely, *Artis Typographicæ Querimonia*, and the *Epistola de sua typographia statu*. The former of these is introduced by a prefatory address to the reader; in which our printer complains, in very indignant terms, that the noble typographic art had fallen into the hands of the most illiterate; of persons "*quibus nihil cum muris commune est*," who had no claim even to the lowest attainments of literature. What, he exclaims, would Aldus Manutius say, if he could return to life again, on beholding such a degradation of the art? or what would be the language of Marcus Musurus and of James Lascaris, those eminent restorers of Greek literature? Then, after adducing various instances of the gross ignorance and correspondent obstinacy of some printers and editors of his time, exemplified by their adulteration of particular passages of classical authors, Henry commences the poetical part of this tract, composed in Latin elegiacs. The other tract, namely, *Epistola de sua typographia statu*, is of a more elaborate and

diffuse character. It contains a detail of the state of his press, &c. To this *Epistola*, which Henry dates *ex typographeo suo*, 1569, *cal. Mart.* a short letter is subjoined, addressed to Jochimus Camerarius; with which it appears that Henry forwarded to that scholar the *index*, or printed catalogue of his editions: and for his amusement, and that of his readers in general, he had prepared the following:

I am harass'd by the crowd of those  
At Frankfort—who their wares expose;  
And ever ask'd: "What are you doing,  
" In prospect of the Fair ensuing!  
" New works you'll shew—impressions splendid,  
" Where Learning stands by Art commended."  
If I say "No;"—"Tis strange! what none?"  
"At least then promise—next but one."  
Still say I "No;"—expostulation  
Assumes the tone of indignation:  
That Frankfort mart's so strangely slighted;  
And broke the faith—I never plighted.  
Again these guidances set aside,  
With letters, ceaseless, I'm annoy'd;  
Italian, English, German, French,  
All on my studious hours entrench:  
"What last has been achiev'd, and ended!"  
"What are the impressions next intended!"  
Nor to such modest queries stinted,  
Of books in print, or to be printed—  
A thousand others they propound,  
Which even a prophet would confound.  
But still, our German billets doux  
The interminable theme renew;  
Remind me of the Fair—the Fair—  
And hold me constant debtor there.

Of what advantage all these letters?  
Not stimulants they are, but fetters.  
As though you'd spur a steed that's idle,  
Yet check his progress with the bridle.  
My press resents the condescension,  
That to such foppery gives attention:  
Stands still, and bids them longer stay  
All they suggest, desire, and pray for.

For this annoyance then—be sure  
Not small—intent to find a cure,  
Of books to former fairs I've given,  
Or now project, by leave of heaven,  
These pages few, as best may suit you,  
In form of "Catalogue" salute you:  
Which you'll my "Receipt" please to call,  
Address to none, and yet to all.  
Thus, "Walls I whiten"—"two," str: tush—  
A thousand—"with a single brush."

Of works impress, or held in view  
To imprint, deem you the number few?  
Reflect—the custom of the fair  
Deals not alike with every ware;  
But reckons some by count or tale.  
Whilst weight, of others rules the sale.

In 1572, and about the same year of his age, says Maittaire, at which his father Robert had printed his *Latin Thesaurus*, Henry enriched the republic of letters with the important fruit of his vigils and studies, the *Greek Thesaurus*, which he inscribed to the emperor Maximilian, Charles IX. of France, Elizabeth queen of England, and John George, marquis of Brandenburg; and to the academic institutions of their respective dominions. For the work he had obtained *Privilegium Diplomaticum*; that of the French king, in 1561, and that of the emperor, 1570. This great work very much impoverished his family; and to add to his misfortune, Scapula, his servant, treacherously extracted the most useful parts, and published an epitome, which destroyed the sale of the *Thesaurus*. Such were the ever active energies of

Henry's mind; and so unwearied was his zeal in the cause of learning, that immense labours achieved became incentives to further projects and exertions. He complains that great pecuniary difficulties were occasioned by the publication of the *Thesaurus*; though of absolute bankruptcy, which some writers have recorded, he says nothing. Certainly, as that was not "a subscribing age," few patriots of the great republic of letters ever ventured upon a more formidable outlay, or were more deserving of an ample remuneration. How far the sale of the first edition of this great work actually remunerated him, we are not informed. Fabricius adds probability to a conjecture, that the *Thesaurus Græcæ Linguae*, was executed at Geneva, as the date of the work coincided with the dreadful occurrence of the eve of St. Bartholomew. Had he been domesticated at Paris, when that horrible insurrection against all Huguenots took place, it can scarcely be imagined that either the kindness of individual friends, or any precautions of his own, could have preserved him or his family from the common vengeance. Whilst, however, the prominent outlines of this printer's professional life have been preserved, we remain in almost entire ignorance of his private history; and of the solicitudes or enjoyments, perils or escapes, with which it is probable his mortal career, like that of others, was diversified. In a word, speaking generally of Henry's unsettled way of life, Maittaire thus expresses himself. "How little stationery his residence was at various intervals, is shown by the epistles prefixed to many of his impressions. Sometimes he dates from Geneva, as in the years 1575, 1578, 1588; sometimes from Paris, 1579, 1581, 1585; sometimes Viriaci, 1575, 1578; sometimes ex villa Grieriana, near Geneva, 1576, 1579; sometimes Aurelius; sometimes Lugduni; *modo peregrinans apud ceteras modo aulicus apud suos*. It is sufficiently surprising that he was able to bring to an issue so many of his labours, inasmuch as the rumours of war frequently broke up his typographic establishment, in the midst of its operations." The same author justly adds, that the interruptions of his typographical labours might at all times more probably be attributed to any other cause than to indolence, which was little compatible with his disposition and character.

The most ardent and indefatigable exertions of human enthusiasm and industry must at length find a period; and, in this slight sketch of our distinguished typographer, all we can do is to shew his various peregrinations, and some little of his labours. Few ever experienced more vicissitudes in the literary walks of life, or more discouraging reverses of fortune. Perhaps no individual scholar ever rendered greater services to literature; yet none ever found his own erudition turn to less account. When we consider the interruptions, difficulties, and discouragements, with which he was almost constantly compelled to struggle, our admiration of his patience and perseverance, and our astonish-

ment at the number and magnitude of his literary achievements, must be proportionably increased. Maittaire considers, that both Robert and Henry united in their own persons two qualities rarely to be found in typographers, (at least of after times,) fidelity and erudition. They evinced equal skill and zeal in the profession. At length, constantly possessed with an attachment to his native country, he repaired to Lyons; where he died, as above stated.

Almeloveen\* had been informed, that the remains of Henry were interred in the cemetery of the chapel of St. Benedict, at Paris; and that some sepulchral memorial of him was to be seen there. But Maittaire believes that Lyons, the place of his decease, was also that of his sepulture.

Joannes Posthius, a physician of Wurtzburg, composed the following eulogy to his memory; which seems to partake as much of the ludicrous, as of the serious; but such as it is, it is given:

Tollens, the lore fraught volume to indite!  
And tedious, through the press, to bring to light!  
Senseless thy labours were in each vocation,  
HENRY! O man of wondrous application.

The concluding lines of a monody composed by Paul Stephens, on the death of his father, might furnish a more appropriate inscription to his memory:

PARENTI DULCISIMO, AC FIDE MEMORIE

HENRICO STEPHANO,

P. STEPHANUS MORETUS POSUIT.

Ye sacred bards, the offerings song can shed;  
Bring ye, if plaints are grateful to the dead.  
Not Hævæ, dying, Græcia saw unmoved,  
Nor felt she not the pangs of him beloved:  
Nor did the Letian muses check the tear  
Of sorrow, that bedewed their votary's bier.  
His praise, at least, though dillat efforts fall,  
To speak shall studious nights and days avail,  
And laud the man by tollsome vigils spent,  
O'er his cold grave a deathless monument.

Henry Stephens adopted the *mark* or *symbolum typographicum*, which was used by his father, namely, the OLIVE, with the inscription, *Noli altum sapere*, and occasionally perhaps, with the additional words, *sed time*. In his Homer of 1588, he exhibits, instead of the customary device, a cipher, or Maittaire terms it, "*nota compendiaria sui nominis*;" which is also affixed to the end of the fourth volume of his *Thesaurus Lingue Græcæ*.

The fullest list of publications executed by the illustrious family of the Stephenses, is by Michael Maittaire, *Stephanorum Historia, vitas ipsorum, ac libros complectens*. 8vo. Londini, 1709.† This esteemed work is now rare: at the end of the second part ought to be found an Appendix of four leaves. This was the first

specimen of Maittaire's great skill in typographical antiquities. The life of Robert Stephens, in Latin, revised and corrected by the author, with a new and complete list of his works, is prefixed to the improved edition of R. Stephens's *Thesaurus*, 1734, 4 vols. folio (*Lit. An.* of xviii. Cent. vol. iv. p. 560.)

The reader is also referred to a *View of the early Parisian Greek Press*. By the Rev. W. P. Gresswell, 2 vols. 8vo. 1833, for which the compiler is partly indebted for the above sketch.

Mr. Pettigrew (*Bibliotheca Suseziana*, vol. i. part ii, page 390) has said, that "the Stephenses printed no less than forty-five different editions of the bible in various languages, and at a time when great persecutions were raised against those who professed to give publicity to the genuine holy scriptures."

1599. Jacobus Stoer, a printer of Geneva, frequently omitted the name of the town where he resided. He printed the *Emblemata cum figuris*, a work which Henry Stephens had left unfinished at his death.

1699. The first authorised version of the *Catholic Bible* in Poland, was printed at Cracow, by Andrew Petricovius, in folio, under the auspices of Stanislaus Karnkowski, archbishop of Gnezn. This translation was made from the Latin Vulgate, and had been determined upon, and ordered to be made by pope Gregory XIII. and the publication was subsequently approved by pope Clement VIII. Jacob Wuyek was the translator. He was a native of Poland, born of honest pious parents, and from childhood inclined to study. In July, 1571, he took the oaths of the order of the jesuits. After filling several high religious and literary offices in Transylvania and Poland, he expired at Cracow, July 27, 1597, in the fifty-seventh year of his age, amid the sighs and tears of the brethren of his order.

1699. In this year the hall of the Stationers' company underwent as great a purgation as was carried on in Don Quixote's library. Marston's *Pygmalion*, Marlowe's *Ovid*, *The Satires of Hall and Marston*, the *Epigrams of Davis*, the *Shawdove of Truth*, in epigrams and satires, *Snarling Satyres*, *The Booke against Women*, *The xv. ioyes of Marriage*, and the *Caltha Pactarum*, were ordered for immediate conflagration, by the prelates Whitgift and Bancroft. By the same authority all the books of Nash and Gabriel Harvey were anathematised; and like thieves and outlaws were ordered to be taken *wheresoever they may be found*. It was decreed that no satires or epigrams should be printed for the future. No plays were to be printed without the inspection and permission of the archbishop of Canterbury and the bishop of London; nor any *Englishe Histories*, novels, and romances, without the permission of the privy council. Any pieces of this nature unlicensed, or now at large and wandering abroad, were to be diligently sought, recalled, and delivered over to the ecclesiastical arm at London House.—*Warton*.

\* Theodorici Jansen ab Almeloveen de Vitæ STEPHANORUM, celeberrimi typographorum, Dissertatio Epistolica; in qua de Stephanorum stirpe, indefessis laboribus, varia fortuna, atque libris, quos ubi erudito eorumdem officium emendatissime impressos unquam exhibuerunt, subjecto illorum indice, agitur. Et Amstel. 1683, 8vo.

† *Thesaurus Græcæ Lingue*. London: 1716-22, folio. 29 parts, published at 29 guineas, large paper published at 78 guineas.

1599. A special licence gave Thomas Wright, or Wight, the exclusive right of printing all law books for thirty years. T. R. apud Westm. 10 Martii, pat. 41st Eliz. p. 4. Dugdale's *Orig.* p. 61. [*Ames*, p. 307.]

1599. The printers of Scotland had no Hebrew or Greek types until this year, for all the places where these were to have been, were left blank, and filled up with the pen.

1598, Jan. 16. *Died*, EDMUND SPENCER, an eminent English poet, and author of the *Fairy Queen*. He was born in London, in 1553. His first production was the *Shepherd's Calender*, which he dedicated to sir Philip Sidney, who became his patron, and introduced him to court. In 1578, he was sent abroad on some mission by the earl of Leicester; and on the 27th of June, 1586, queen Elizabeth granted to Spencer Kilcolman castle, distant three English miles from Doneraile, in Ireland, where he attended Lord Grey, as secretary. Kilcolman castle, with 3,028 acres of land, at the rate of £17 3s. 6d. was granted to our poet, on the same condition with the other undertakers (as they were termed) between whom the forfeited Desmond estate was divided. These conditions implied a residence on the ground, and their chief object seems to have been the peopling Munster with English families; a favourite project of Elizabeth's for strengthening the English influence in Ireland, by creating the tie of consanguinity between the two countries.

It is supposed that this castle was the principal residence of Spencer for about ten years, during which time he composed the works that have chiefly contributed to his fame. But the turbulent and indignant spirit of the Irish regarded not the haunts of the muse as sacred, and wrapped the poet's dwelling in flames. An infant child of Spencer's, together with his most valuable property, were consumed, and he returned into England;—where, dejected, and broken-hearted, he died soon after, at an inn in King-street, Westminster.

The visits of sir Walter Raleigh to Spencer, at Kilcolman, increase the interest attached to the place, and are not in the slightest degree questionable. To the advice of Raleigh, the publication of the first book of the *Fairy Queen* has been ascribed; and the existence of a poetical intercourse between such minds and in such distracting scenes, is a delightful recollection that almost warms the heart into romance.

Raleigh, it will be recollected, became Spencer's patron upon the death of sir Philip Sidney, whom he celebrates under the title of *The Shepherd of the Ocean*. Raleigh also ensured Spencer the favour of Elizabeth, a pension of £50 per annum, and the distinction of her laureate.

Besides the *Shepherd's Calender* and the *Fairy Queen*, Spencer wrote several other poems of considerable extent, and also some works in prose, the chief of which was a *View of the State of Ireland*, in which he endeavoured to point out a way for the settlement of that country.

It is said lord Burleigh withheld the bounty Elizabeth intended for Spencer. But he is more stigmatized in these remarkable lines, where the misery of dependence on court favour is painted in fine colours:

Full little know'st thou, that has not tried,  
What hell it is, in suing long to bide;  
To lose good days, that might be better spent;  
To waste long nights in pensive discontent;  
To speed to-day, to be put back to-morrow,  
To feed on hope, to pine with fear and sorrow;  
To have thy princess' grace, yet want her peers;  
To fret thy asking, yet wait many years;  
To fret thy soul with crosses and with cares;  
To eat thy heart thro' comfortless despair;  
To law, to crouch, to wait, to ride, to run;  
To spend, to give, to want, to be undone.

*Mother Hubbard's Tale.*

These lines exasperated still more the inelegant, Burleigh. So true is the observation of Mr. Hughes, that even the sighs of a miserable man are sometimes resented as an affront by him who is the occasion of them.

Perhaps there never was a more panegyrical rhymist than Spencer, and yet so fine and ethereal is his incense, that the breath of morning is not more cool and salutary:

It falls me here to write of Chastity  
That fayrest virtue far above the rest,  
For which what needs me fetch from Faery,  
Porcelain examples it to have express,  
Sith it is shrined in my sovereign's breast,  
And form'd so lively on each perfect part,  
That to all ladies, who have it profess,  
Needs but behold the portrait of her part,  
If portraiture'd it might be by any living art;  
But living art may not least part expresse,  
Nor life-resembling pencil it can paint,  
All it were Zeuxis or Praxiteles—  
His daedale hand would fail and greatly faynt,  
And her perfections with his error taint;  
No poet's wit that passeth painter farre—  
In picturing the parts of beaury daynt, &c.

Mr. Todd, in his *Life of Spencer*,\* has made many ingenious remarks on the false taste of some of our poets of that period, and particularly on that absurd propensity which distinguished many of them, to accommodate the English language to the metres of the ancients. The absurdity, however, did not escape the animadversions of the critics and satirists of those times. Bishop Hall terms such effusions "rhymeless numbers." In his sixth *Satire* he thus speaks of them:

Whoever saw a colt wanton and wild,  
Yoked with a slow-foot steed on fallow field,  
Can right agree how handsomely besets  
Dull spongers with the English dactyle.  
If Jove speak English in a thund'ring cloud,  
Thwick, thwack, and rill rill roars he out aloud,  
Pie on the forged mint that did create  
New coin of words never articulate.

Strange as it may seem, there was not long since an attempt to revive this foolery; but the very happy ridicule of the writers of the poetry in the periodical work of the *Antijacobin*, extinguished it, it may be hoped for ever. Few can forget the humorous effusions of the *Needy Knife Grinder*.—*Beloe*.

\* The best edition of Spencer's works is that of Todd, with notes, of 1803, 8 vols. 8vo.  
Spencer's Poetical works, 5 vols. crown 8vo. William Pickering, London, 1834.

1599, Nov. 29. *Died*, CHRISTOPHER BARKER, printer to queen Elizabeth, in the 70th year of his age, and has erected to his memory, where he is buried, against the north wall of the chancel of St. Mary's church at Datchet, near Windsor, Bucks, a handsome altar monument of white and black marble, supported by two pillars of red veined marble at the top, on the dexter side these arms, or, on a fesse dancetty azure three fleur-de-lis, of the first being Barker's. On a sinister side, the arms also on another shield impaled per chevron or, and azure three mullets counterchanged, being the arms of Day, bishop of Winchester, whose daughter was wife to Robert Barker.

On a black marble tablet is this inscription:—

PIE MEMORIE  
CHRISTOPHERI BARKER ARMIGERI  
SERENISSIMÆ REGINÆ ELIZABETHE TYPOGRAPHI  
QUI TYPOGRAFIAM ANGLICANAM  
LATENTIAM INVENTIT MARMOREAM RELIQUIT  
PARENTIS OPTIMI  
ET  
RACHELIS BARKER DILECTISSIMÆ CONJUGIS  
QUÆ DVODENA PROLE AVSCIPTA  
VNDENA EFFERVESCENTE  
QUOQUOT ILLAM NOBISCUM CONTIGIT  
TRISTE AVUM DESIDERIVM RELIQUIT  
FORGI  
OBIIIT JULII 13 ANNO DOMINI 1607.  
ÆTATIS 67M 35.

Here Barker lies, once printer to the crown,  
Whose works of art acquir'd a vast renown.  
Time saw his worth, and spread around his fame,  
That future printers might imprint the same.  
But when his strength could work the press no more,  
And his last sheets were folded into store,—  
Pure faith, with hope, (the greatest treasures given,)  
Open'd their gates, and bade him pass to heaven.

CHRISTOPHER and ROBERT BARKER dwelt in Paternoster-row, at the sign of the Tyger's Head, and kept a shop in Paul's church-yard, at the sign of the Grasshopper. They came of an ancient family, being descended from Christopher Barker, knight, king at arms. Edward Barker, who probably might be father to Christopher the printer, was by a will dated Dec. 31, 1549, appointed heir to one William Barker, his cousin, who had a considerable estate of houses in London, but nothing in any county, and died the 2nd of January after he had made his will. Queen Elizabeth granted to our Christopher, and to Robert his only son, a patent, in consideration of the father's great improvement of the art of printing: king James I. May 10, 1603, in the first year of his reign, granted the same patent to Christopher, son of the said Robert, to hold the same after the death of his father, with a proviso, that if Christopher should die before his father, then his heirs, &c., should have it for four years after his father Robert's death.

July 19, 1603, a special license was granted to Robert for printing all the statutes during his life. James I. in consideration of the sum of three hundred pounds, and an annual rent of twenty pounds, demised to Robert Barker, Upton manor, for twenty-two years. The rent soon after was raised to forty pounds per annum.

William Ball, in his treatise concerning the *Regulating of Printing*, 1651, as quoted by Ames, v. ii. p. 1091, expressly states that Robert Barker had paid for amendment, or correcting the translation of the bible, the considerable sum of £3,500, therefore his heirs had the right of printing it. The magnitude of this sum seems to show, as Mr. Herbert has remarked in a note, that it must have been paid to the translators as the whole remuneration of their labours.

James I. Feb. 11, 1616, in the fourteenth of his reign, granted the same to Robert, son of the said Robert, for thirty years, to commence from the death of Robert the father. Charles I. July 20, 1627, in the third of his reign, having notice that the several interests of the Barkers were assigned over to Bonham Norton and John Bill, confirmed the said assignment to Norton and Bill. Charles I. Sept. 28, 1635, in the eleventh of his reign, granted the same to Charles and Matthew Barker, two other sons of Robert the father, after the expiration of the four years, to Christopher's heirs, and the thirty years to Robert their brother. Robert, to whom queen Elizabeth granted the office for life, 1589, died in the Queen's Bench, Jan. 10, 1645: so that Christopher's four years ended Jan. 10, 1689. Robert the son's, began Jan. 1649, and expired Jan. 10, 1679. Charles II. Dec. 24, 1675, in the 27th of his reign, grants the same to Thomas Newcomb and Henry Hills for thirty years, to commence after the expiration of the respective terms granted to the Barkers. Charles and Matthew Barker's began Jan. 10, 1679, and expired Jan. 10, 1709.

The Barkers, according to the custom of that period, used a cut of a man barking timber, consequently he was denominated a Barker. Quere; would not a barking dog have been equally applicable?

The above list of patents relates only to the *Barkers*, but the office of king's printer will be more fully treated on under the year 1662, *post*.

In the Burghley manuscripts\* is a memorial of the stationers' company, signed by Christopher Barker, stating, that pursuant to the orders of government, they had made search in every printing-house, to ascertain what works were in progress, and had met with resistance from Roger Ward.

1599. *The scourge of villainie, with additions of new satyres.* 12mo.

1599. GEORGE SHAW printed the following work: *Encomium illustri. Herois, D. Rob. Dumitis Euxetii, et alia poemata, autore Guil. Vaughanno Maridunensi.* 8vo.

\* The Burghley papers state from the diocesan's certificate, 1567, that there were then in London, and its immediate vicinity, 3,833 Dutchmen, 730 Frenchmen, 157 Italians, 10 Voetians, 56 Spaniards, 25 Portuguese, 2 Grecians, 2 Blackmores, 1 Dane, and but 58 Scots.

To show the value of money and the method of travelling, it is stated by lord Burleigh, (to follow the words of his diary,) about sixty-three days coming from Scotland to Greenwich having had £4 per diem; and for postage, with twenty-two horses from London to Edinburgh, and from thence back to London, £117.

1599. *The pleasant history of the two angry women of Abington, with the humorous mirth of Dicke Coomes, and Nicholas Prouerbes, two serving men. As it was lately playde by the right honorable the earle of Nottingham, lord high admiral, his servants.* By Henry Porter, gent. 4to. Imprinted at London, for William Ferbrand, and are to be solde at his shop, at the corner of Colman-streete, neere Lothbury. This writer produced only this piece, which is in the Garrick collection. Sold at Wright's sale for £1 12s.; at Pearson's, for £1 11s. 6d.

1599. *Died, WILLIAM LE BEE*, a celebrated letter-founder and engraver of Paris. He was born at Tours, in 1525; his father was a noble bourgeois, and supplied the famous Robert Stephens with paper, in whose house young Le Bée was brought up, and where he got an insight into the composition of the types of that celebrated printing-house. He afterwards, by order of Francis I. made those beautiful types which Robert Stephens used; and Philip II. of Spain,\* employed him to prepare the types for the Antwerp *Polyglott*. In 1545 Le Bée took a journey to Venice, where he was much employed. He returned to Paris, and practised his art with much success until his decease, which took place about the beginning of 1599.

HENRY LE BEE, son of the above, was a printer at Paris. His sons and grandsons signalled themselves in the typographic art. The last of them died in the year 1686.

1600. JOHN WOOLFE, city printer, a fishmonger, used the art of printing, and (as Stow says, in his *Survey of London*, p. 223) in a contest between the patentees and the stationers' company, taking upon him as a captain in this cause, was content with no agreement, but generally affirmed, that he might and would print any lawful book, notwithstanding any commandment of the queen. And to that end had incensed the popularity of London, as in a common cause, somewhat dangerously. And with him several of the rest changing their minds, were associated, and laboured to overthrow those privileges the queen had granted, or could grant. Whereupon the abovesaid committees of the stationers' company, finding them so disordered, would have bound them to appear before the queen's council, which they promised to do; but after conference with their abettors refused; and still prosecuted their complaints to her majesty, garnishing the same with pretences of the liberties of London, and the common wealth of the said company; and saying, the queen was deceived by those that were the means for obtaining such privileges. He afterwards was in such favour with the citizens, that he was made

printer to the honourable city of London. In Martin Marprelate's piece, p. 23, he is represented cruel, and called John Woolfe (*alias* Machivill), beadle of the stationers, and most tormenting executioner of Waldegrave's goods, &c. He dwelt at Paul's Chain, and in Distaff-lane, over against the sign of the Castle, and had a shop in Pope's-head alley, in Lombard-street, in 1598. He was city printer in 1581, and was succeeded by John Windet.

John Woolfe used the mark of a fleur-de-lis seeding, and sometimes about it, *Ubique florescit*.

*A woman's woorth defended against all the men in the world; proving them to be more perfect, excellent, and absolute in all vertuous actions than any man of what quality soever.* Written by one that hath heard much, seen much, but knows a great deal more. 1599. 4to.

*A quip for an upstart courtier; or a quaint dispute between velvet breeches, and cloth breeches. Wherein is plainly set downe the disorders in all estates and trades.* 1592. 4to.

In 1592, when the four or five first books of *Amadis de Gaul*\* in French, were delivered to John Woolfe to be translated and printed, the signature of bishop Aylmer† was affixed to every book of the original. Hence Dekker's familiarity of expression in the *Untrussing of the Humorous Poet*,

"Farewell, my sweet Amadis de Gaul."

1600, Feb. 17. Jordanus Brunus was burnt alive on this day, by the inquisition of Rome. He was born at Nole, in the kingdom of Naples; was at first a Dominican, then went to Geneva, and turned Calvinist; afterwards came to London, and wrote against all religions. Leaving

\* *Les Vingt Quatre Livres d'Amadis de Gaule, traduit par Nicholas de Herberay et autres, avec le Thresor.* 13 vols. in 12mo. and 3 vols. in 8vo. in all 26 vols. Lond. 1575.

This is esteemed the most celebrated and best of his romances. No book ever created a greater sensation on its first publication. Its popularity exceeded all bounds. All ranks of society were infatuated with the person. *Amadis* was in every body's hand, and formally quoted upon every occasion. The clergy became alarmed at its success, and the learned jesuit Possevin, even eighteen years after the publication, complains that the impression it produced was still unaltered. "It had warped the minds of the French nation from their ancient notions and studies, and introduced a neglect of the scriptures." He adds his solemn conviction, "that the Devil instigated Luther to procure the translation into French, for the purpose of facilitating his grand scheme of overthrowing the catholic religion." This rare book was disposed of at the sale of colonel Stanley, 1815, for £21 10s. This copy was formerly Madame Pompadour's.

† John Aylmer, bishop of London, died at Fulham, June 3, 1694: buried in St. Paul's.

\* Died September 15, 1596, in the 73rd year of his. "He was a monarch and a christian, and equally defective in both these characters: in the former case, because his intellectual eye constantly soared above, and never descended beneath the limits of his own sphere. His religious creed was gloomy and unmerciful, because his deity was a tremendous being: he had nothing to hope from his benevolence."—Schiller. He was buried in the Escorial, and was succeeded by his son Philip III.

London, he went to Wittenberg, embraced Lutheranism, and got liberty to teach his philosophy publicly. Here he made himself so many enemies, that he was obliged to decamp; and he desperately determined to revisit his native country. On his return he was seized by the inquisitors of Venice, and sent to Rome, where he lay in prison for the space of two years. He suffered death, which he might have averted eight days before, by a recantation, with fortitude. The philosophical writings of Bruno, which have become very rare, display a classical cultivation of mind, a deep insight into the spirit of ancient philosophy, wit, and satire, as well as a profound knowledge of mathematics and natural philosophy. Most of them were published between 1584 and 1591. The most eminent philosophers since his time have borrowed much from him. Among recent writers, Schelling resembles him the most in metaphysics and his philosophical views of nature, and has given his name to one of his philosophical writings.

1600. *News from Flauenders*. A new ballad of the great overthrow, that the valliant capitaine Graue Maurice, sir Francis Veere, and other of the queene of England's friends, gaue to the archduke, and his army of Spaniards, upon Sunday the 22d of June last past, 1600. To the tune of lusty gallant.

*It begins,*

You that be desirous, and therein take delight, &c.

*Ends,*

Thus have you heard the service  
Of these our English friends,  
That still with losse of life and limmes  
The Flemish state defends.  
God banish thence idolatrie,  
That Englishmen may say:  
That still we haue in spite of Spaine  
Some frendes beyond the sea.—*Finis.*

1600, June 22. An order of the privy council, inhibiting all public performances about the city, except in two houses, the Globe and the Bankside. It was also ordered that the two companies should play "twice a-week, and no oftener;" and especially they shall refrain to play on the sabbath day.

It was customary, at this time, to carry *table books*, (as they were called,) to the theatre, and either from curiosity, or enmity to the author, or some other motive, to write down passages of the play. There is reason to believe that some of Shakspeare's dramas underwent this fate, and that some of the old quartos were published from some of these imperfect copies.

The prices of admission to the theatres in the reign of queen Elizabeth, were considerably under the sums charged at the present day, even on reference to the relative value of money at both periods. The cost varied from the gallery at two-pence, to the lords' room, where the charge was one shilling. The lords' room, situated over the stage, answered to the present stage boxes. Ben Jonson in the prologue to *Every Man out of his Humour*, acted for the first time

at the Globe, on Bankside, in 1599, says, "Let me never live to look so high as the two-penny room again;" and in the same play mention is made of "the lords' room over the stage." Decker, in his *Belman of London*; bringing to *Light the most Notorious Villanies that are now practised in the Kingdom*, first printed in 1608, also says, "Pay you too-pence to a player, and you may sit in the gallery," while in a play from the pen of Middleton, "one of them is a nip: I took him once into the two-penny gallery at the Fortune." It appears that the price of admission to the lords' room over the stage, at the period above alluded to, was one shilling, for Decker, in his *Gul's Hornbook*, printed in 1609, says, "At a new play you take up the twelve penny room, next the stage, because the lords and you may seem to bee hail fellow well met."

The customary price of the copy of a play to the booksellers, at this time, appears to have been twenty nobles, or £6 13s. 4d. The usual present from the patron to whom it was dedicated, was 40s. Dramatic poets were in those times, as at present, admitted *gratis* into the theatre.

The ancient custom of concluding the play with a prayer for the health and prosperity of the king and queen, if it were acted in the public theatres, probably gave birth to the common addition to the modern playbills, *Vivant Rex et Regina*. If the play was acted in a private house, the patrons of it were prayed for.

1599. Angelus Roccha, in his appendix to the *Biblia Apostolica Vaticani*, speaking of the library of cardinal Launcelot, says, it was "celebrated as well on account of the books (for there are seven thousand volumes,) as for the beautiful binding, their admirable order, and magnificent ornaments."

1599. The number of master printers in the whole of London, were twenty-two; the journey-men amounted to about sixty. It must be recollected that there were not any other printers allowed in the kingdom, except in the universities of Oxford and Cambridge. The number of persons who exercised the art in England, from its introduction in 1474, to the end of this century, was about two hundred; in Scotland, eleven; in Ireland, two; and in Wales, one.

1600. *One Compendious Buike of Godly and Spiritual Sanges, collectit out of sundrye partes of the Scripture, with sundrye other Ballates, changeit out of prophaine languis in godly Sanges, for avoyding of Sin and Harlotry, with augmentation of syndrie gude and godly Ballates, not contentet in the first edition.*

Exactly correctit and newlie printed in Edinburgh be Robert Smith, dwelling at the Nether Bow. 1600.

Of the above curious book, Beloe never saw or heard of any copy but that which is in the Roxburgh collection.

1600. NINIAN NEWTON and ARNOLD HATFIELD printed some works in partnership, and others separately. Newton dwelt in Lothbury, and kept shop at the sign of the Brazen Serpent, in St. Paul's church yard.

1600, Jan. 13. Died, FRANCIS COLDOCK, stationer and printer, whose dwelling was at the sign of the Green Dragon, in St. Paul's church yard. He was master of the stationers' company in 1591, and again in 1595, and gave them "a silver college pot." On a pillar in St. Faith's church, under St. Paul's, was the following inscription :

Near to this place lieth buried the body of Francis Coldock, twice master of the company of stationers, who departed this life the xiiii day of January, 1600, being of the age of three score and twelve years; who married Alice, the widow of Richard Waterson; and had issue by her two daughters. Joane, married to William Ponsonby, stationer; and Anne, who died young. The said Alice was the daughter of Simon Burton, citizen and waxchandler of London.

1600. THOMAS PURFOOT was a printer and stationer, and had a shop in St. Paul's church yard, at the sign of the Lucretia, within the New Rents, in Newgate market; he likewise dwelt opposite St. Sepulchre's church, and other places. The first work with the imprint of Thomas Purfoot is dated 1584. In 1588 he printed as the assign of Richard Tottle. He printed sixty works, to which he affixed the annexed monogram as his device.

1600. GABRIEL SIMPSON printed a *consent of scripture*, by Hugh Broughton.\* Dedicated to queen Elizabeth. Finely printed, with many good engravings upon copper; also, a large map of the north part, from the equinoctial, with the ancient seats of the first families. 8vo. Printed with William White. His dwelling was at the White Horse, in Fleet-Jane.

1600. THOMAS CHARDE dwelt in Bishopsgate church-yard, and had carried on business from 1582, though few works bear his imprint.

\* No English biblical writer attracted so much notice during the latter part of this century, and the commencement of the next, as Hugh Broughton, whose skill in the Hebrew language occasioned a learned Jew to say to him, "O that you would set over all your *New Testaments* into such Hebrew as you speak to me, you should turn all our nation." He was born at Oldbury, in Shropshire, in 1549, and was indebted for his education to the excellent Bernard Gilpin, who sent him to Cambridge. He was afterwards a prebendary of Durham, and reader of divinity. In 1588, he published a work, entitled *The Consent of Scripture*. It was the fruit of immense labour, and is a kind of system of scripture chronology and genealogy, designed to show from the scriptures, the chronological order of events from Adam to Christ. It was dedicated to queen Elizabeth, to whom it was presented, by himself, on her inauguration day, Nov. 17th, 1599. He died August 4th, 1612, aged 63 years. His works were collected and printed in London, in 1662, with his life prefixed by Dr. Lightfoot, in one large volume folio. Several of his manuscripts are in the British Museum, bound in one vol. 4to., beside his manuscript *Harmony of the Bible*.

1600. *Belvidere; or the Garden of the Muses*, made by John Bodenham. This is a curious, and at the same time, a very whimsical poetical miscellany, as the author, in another edition, made it a rule, to give place to no more than a single quotation of single line, or a couplet of ten syllables. There was another edition in 1610, entitled the *Garden of the Muses*, without the previous title of *Belvidere*, but they are one and the same collection. An imperfect copy of this work produced at the sale of Mr. Allen's library, £1 11s. 6d.

In 1600 also was published *England's Parnassus, or the choicest Flowers of our modern Poets, with their poetical comparisons*, by R. A.

R. A. means Robert Allot, concerning whom the reader may consult Warton's *History of English Poetry*, vol. iii. p. 280.

Another poetical miscellany was also published in this year, entitled *England's Helicon*, in 4to.

A second edition was published in 1614.

1600. Died, THOMAS NASH, a writer of very considerable bearing, but of great severity of style. He is called by Dr. Lodge, in his *Wits Misery and Worlds Madness, discovering the Devil's Incarnate of the Age*, the true English Aretine. He was the writer against the *Martin Marprelates*. He wrote a great deal, both in prose and verse, particularly of the satirical kind. He obtained considerable reputation as an author, and was praised by many of his contemporaries. He is thus described by Michael Drayton :

And surely Nash, tho' he a proser were,  
A branch of laurel yet deserves to bear;  
Sharply satyrick was he, and that way  
He went; since that his being to this day,  
Few have attempted, and I surely think,  
These words shall hardly be set down in ink.  
Shall scorch and blast, so as his could when he  
Would indite vengeance.

In a very curious and scarce play, called the *Return from Parnassus; or, the Scourge of Simony*, acted by the students of St. John's college, Cambridge, 1606. After introducing Spencer, Constable, Lodge, Daniel, Watson, Drayton, Davis, Marston, Marlowe, Shakspeare, and Churchyard, the Interlocutors, Ingenioso and Judicio, thus proceed :

Thomas Nash  
Ingenioso

I here is a fellow, Judicio, that carried the deadly stocke in his pen, whose muse was armed with a jag tooth, and his pen possest with Hercules furies.

Judicio.

Let all his faults sleepe with his mournfull chest,  
And there for ever with his ashes rest;  
His stile was witty, though he had some gall;  
Something he might have mended, so may all.  
Yet this I say, that for a mother wit  
Few men have ever seen the like of it.

Nash was born at Leostoffe, in the county of Suffolk. His father was descended from the Nashes of Herefordshire, as he himself informs us in his whimsical production, called the *Praise*

of a *Red Herring*.\* He was educated at Cambridge, and was, for almost seven years a member of St. John's college. Mr. Gifford observes, that Nash had an inexhaustible vein of caustic rallery, never yet surpassed. In 1599 it was ordered "that all Nashes bookes and Dr. Harvey's bookes be taken wheresoever they may be found, and that none of the same bookes be ever printed hereafter."

1600, Nov. 2. Died, RICHARD HOOKER, an eminent English divine, author of an excellent work, entitled the *Laws of Ecclesiastical Polity*,† in eight books folio. Of Hooker and his work, pope Clement VII. said, "this man indeed deserves the name of an author. His books will get reverence by age; for there is in them such seeds of eternity, that they shall continue till the last fire shall devour all learning." Richard Hooker was some time master of the temple, but he voluntarily quitted that station for the sake of studious retirement, in which he wrote his famous *Ecclesiastical Polity*. The epithets he is usually distinguished by are those of the judicious and the learned; and they are epithets to which he has an undoubted title. There is reason to believe that it has been regarded as a model, by a Locke and a Hoadley. He was born in the year 1553.

1600. *Demonologie*, in form of a dialogue, divided into three books. By king James VI. Edinburgh.

James was at all times more desirous of stretching his kingly prerogative than to exercise it justly; and he evinced the same notions to literature, for he ordered all books to be burnt that were written against his opinions. Such was the fate of Scot's *Discovery*, &c.

The reign of James the Sixth of Scotland and First of England, may be said to have been the witchcraft age of Great Britain. Scotland had always been a sort of fairy land; but it remained for that sagacious prince, at a time when knowledge was beginning to dispel the mists of superstition, to contribute, by his authority and writings, to resolve a prejudice of education into an article of religious belief among the Scottish people. He wrote and published a *Treatise on Demonologie*; the purpose of which was, to "resolve the doubting hearts of many, as to the fearful abounding of those detestable slaves of the devil, witches or enchanters." The authority of scripture was perverted, to show not only the possibility, but certainty, that such "detestable slaves" do exist; and many most ridiculous stories of evil enchantment were adduced to establish their "fearful abounding." The treatise, which is in the form of a dialogue, then proceeds to treat of the punishment which such crimes deserve:

\* This pamphlet contains an account, perhaps the earliest, of Great Yarmouth, in Norfolk, the haven of which, he tells us, cost above £25,000 repairing in the last twenty-eight years. This was very scarce, even in the time of sir Hans Sloane.

† Hooker's *laws of ecclesiastical politie*. London: printed by John Windet. 1593. Folio. Another edition appeared by the same printer, 1604.

"P. Then to make an ende of our conference, sence I see it drawis leatt, what forme of punishment think ye merites this magiciens and witches? For I see that ye account them to be all alike gyltie.

E. (The king) *They ought to be put to deathe*. According to the law of God, the civil and imperial law and the muncipale law of all Christian nations.

P. But what kind of deathe I pray you?

E. It commonlie used to be fyre, but there is an indifferent thing to be used in every country, according to the law or custome thairof.

P. But aught no seze, age, or rank to be excused? E. None at all.

Such, in fact, was the cruel and barbarous law of James's native country; and such became the law also of England when he succeeded to the throne of Elizabeth. The absurdity of such a law, so long since consigned to universal execration, stands in need of no illustration; but it may furnish instruction, and show the state of society before the art of printing had cleared the mist of superstition from the eyes of ignorance.

1600. The house of commons took into consideration the following patents and monopolies: To Edward Darcy, a patent for cards.\*

To John Spilman, a patent to make paper.

To Richard Watkins and James Roberts, a license to print almanacks.

To Richard Wrighte, to print the *History of Cornelius Tacitus*.

To John Norden, to print *Speculum Britannie*.

To sir Henry Singer, touching the printing of school bookes.

To Thomas Morley, to print songs in three parts.

To Thomas Wight and Bonham Norton, to print law bookes.

The following curious recitation of charters, decrees, grants, and privileges, giving monopolies of the labours of the press to various bodies and individuals, with a curious note upon the subject, as given by Mr. Rowe Mores, copying all his quaintness of style and printing:—

Pleasant enough it is to contemplate the gradations by which the dispersion of knowledge amongst the people hath been effected, *en et ecce!*

By restraints on the *founders*—by restraints on the *printers*—by exclusive patents for making paper—by exclusive patents for printing *Bibles*, *testaments*, and *comm. pr. books*, *neque enim omnes libros quoscunq; quos in templis hujus regni uti mandavimus aut postea mandab.*—a lumping patent!—for the *Bible with annotations*—for the *N. Test.*—for *psalters*—for *primers*—for *catechisms*—for *prayer books*, and, to bring devotion to it's focus, for "*living-voice of metre-psalm*."

For the *Pandect*—for the *statutes*—for *statute*

\* On the mentioning of the monopoly of cards, sir Walter Rawleigh blushed. Upon reading of the patents, Mr. Hackwell, of Lincoln's Inn, stood up, and asked, is not bread there? Bread, quoth one; bread, quoth another; this voice seems strange, quoth another. No, quoth Mr. Hackett, if order be not taken herein, Bread will be there before the next parliament, &c.

books, acts, proclam. &c.—for all manner of books touching the comm. law.

For Lat. Greek and Hebr.—for dictionaries—for grammars—for accidences—for the *Cris-cross-row*—for school-books generally.

For maps and charts—for maps, charts, and plots of England and Wales—for all manner of books or tables, touching cosmography, geography, or topography.

For music—for ruled paper for music, for songs.

For almanacs—for almanacs and brief chronicles—for single books.

And lastly, when entires were all exhausted, by exclusive patents for things printed on one side of a sheet or of any part of a sheet of paper—By the charter to the Comp. of Stationers—by taxes upon the Universities; and, to close the whole, by a sweetener to authors of a lease for years of their own works.

Not but that indulgences of some sort were requisite in the infancy of the art “when there were but few books and few printers within this realm who could well exercise and occupy the science and art of printing; but these were granted upon good consideration, the encouragement of a newly-invented ‘feat,’ which opened the hidden mine of knowledge to a besotted world, yet were they few, and to endure but a short time.” Grafton’s patent was for three years only, for the printing of *Coverdale’s* bible, afterwards they became numerous as briefs for fire and water, high winds, hail storms, and thunder showers; tenants at rack-rent and burthened with numerous poor, and for any other sundries which packed *second. artem* may be strained to the dam. of £1000 and three-half-pence, and bring grist to the *Ch.* and *Staff.*

When the people began to emerge out of darkness into light, and to show a desire for instruction, they were soon taught to pay for their curiosity by these shameful patents, by which the most necessary books were monopolized, and first of all those which should first of all have been privileged.

But these patents and monopolies produced musitations and grumblings and a petition from the inferior printers to the privy council against them; setting forth that they were contrary to law, and that no such ought to be granted,—and they affirmed that they might and would, (and so indeed they did too) print any lawful book, notwithstanding any commandment of the queen. The house of commons took the matter into consideration, and the patentees, the richer printers, making a virtue of necessity, deemed it expedient to toss a cade to the whale, and to yield to the Comp. of Stat. in 1585 certain books towards the relief and maintenance of the poorer. Here’s a list of some:—

By Barker the queen’s printer,—*The N. Test.* the paraphr. of *Erasm.*—the 2 vols. of homilies—the articles of religion.

The Queen’s injunctions.—all *pro templis*, and to be purchased by every parish in the kingdom; but mark, it was the profit only of the *N. T.* which Barker relinquished, with a proviso that

he printed them himself; and with another proviso that he retained some for secret services. yet this was in the time of Q. Eliz. and these books the beginning of the reformation scarce then completed.

Tottel, the law printer, had more in him of the wisdom of the serpent; he kept his law books to himself, and yielded *Dr. Wilson* upon usurie, and the sonnets of *th’ earle of Surrey*.

The Warden,—an almanack to be stuck on walls. Another—*Calvin* upon *Daniel*, *The practice of prelates*, and *The image of God*. Another—*Agrippa* of the vanitie of sciences, and *Sententie pueriles*. Another,—*The art of rhetoric*, *The courtier*, *The flower of friendship*, and *The image of idleness*.

But most of them with restrictions and reservations yielded unwillingly the remainder in fee of a squeezed orange; for *HOMO HOMINI*; without a metaphor!

Many other examples might be given, but we content ourselves for the present, because we are all acquainted with the plunder, and take leave of the sixteenth century, a period comprising events, which, whether we regard their influence upon literature, arts, and policy, or their effects in the diffusion of truth, justly merits to be considered as the most important century which has elapsed since the era of christianity. During this century it will be perceived that the press had made rapid strides to the attainment of that liberty which is the inherent right of man; but much was left to be done, and though the abutment was but laid in the fifteenth century, the structure was left to be perfected in our own day. During the sixteenth century, both at home and abroad, despotism would not acknowledge the infant press: shackles and persecution, fines and confiscation were still the lot of those who dared to utter sentiments inimical to power; but, says a modern writer, “whoever has attentively meditated on the progress of the human race, cannot fail to discern that there is now a spirit of inquiry amongst men, which nothing can stop or even materially control. Reproach and obloquy, threats and persecution, will be in vain. They may embitter opposition and engender violence, but they cannot abate the keenness of research. There is a silent march of thought, which no power can arrest, and which is not difficult to foresee, will be marked by important events. Mankind were never before in the situation in which they now stand. The press has been operating upon them for several centuries, with an influence scarcely perceptible at its commencement, but by daily becoming more palpable, and acquiring accelerated force, it is rousing the intellect of nations; and happy will it be for them, if there be no rash interference with the natural progress of knowledge; and if by a judicious and gradual adaptation of their institutions to the inevitable changes of opinion, they are saved from those convulsions which the pride, prejudices, and obstinacy of a few may occasion to the whole.”—*Essays on the formation of Opinions.*

## SEVENTEENTH CENTURY.

"What numerous worthies whom with tyres high strung  
 In pompous strains frail manuscripts once sung,  
 To time's abyss are with their vouchers tost,  
 Nor one memorial of existence boast!  
 But living merit (still, alas! oppos'd)  
 Now sees the gulph of black oblivion closed;  
 Sees present envy impotently rave,  
 And pants for honest praise beyond the grave;  
 Firm and exalted o'er its wayward fate,  
 Sees the fair page for fame's impression wait,  
 And safe, in just posterity's reward,  
 Consigns its glory to the future bard.  
 The brave and good, prepared to live in death,  
 With unreluctant smiles shall yield their breath,  
 While latest times Newton entire shall boast,  
 Nor mourn a Bacon, Locke, or Milton lost."

THE influence of literature on the destiny of man is of unquestionable importance. Books are the best, the noblest monuments of all nations; and ages cannot transmit to ages any inheritance so valuable as the thoughts and productions of men of talent. Knowledge is that which, next to virtue, truly and essentially raises one man above another: it finishes one half of the human soul: it makes existence pleasant to us, and administers a perpetual series of gratification. It gives ease to solitude, and grace to retirement. Dr. Aiken says, "in books we have the choicest thoughts of the ablest men in their best dress. We can at pleasure exclude dulness and impertinence, and open our doors to wit and good sense alone." "In a polite age," says Goldsmith, "almost every person becomes a reader, and receives more instruction from the press than the pulpit."

"I acknowledge," says M. Wendeborn, "that abuses are sometimes committed in consequence of the unrestrained freedom of the press; but after the observation of many years, I am confident that the advantages infinitely preponderate. The public is the dread tribunal before which every cause is judged. Every man is heard, and is free to vindicate his conduct. Had all lands show heralds, whose loud voice might awaken shame and fear; were the common people of every country equally eager to read the public papers; then would discord, oppression, and bigotry, soon be banished from their borders, by a great majority of votes, and men that can read, and dare to write, would soon cease to be slaves."

Henry IV.\* of France, read every book with pleasure that was published concerning his

operations; for under his reign every person enjoyed free liberty of speaking, writing, and printing; and truth, which he sought after everywhere, came in her turn, even in her turn to seek him. *The greatest compliment which can be paid to kings, is to believe them worthy to attend to her voice.* Unhappy must that reign be where the history of it is obliged to conceal its author. L'Etoile relates that Henry having read the book called the *Anti-Soldier*, asked his secretary of state, Villeroy, if he had seen this work, and upon his replying in the negative, "It is right you should see it," said he, "for it is a book which takes me finely to task, but it is still more severe on you." He was desired to punish an author who had written some severe satires upon the court: "it would be against my conscience," said this good prince, "to trouble an honest man for having told the truth."

1601, Feb. 25. Robert Devereux, earl of Essex, beheaded. He was the son of Walter, earl of Essex, and born at Netherwood, November 10, 1567. He served in many important expeditions in different parts of Europe, and rose very high in the favour of queen Elizabeth. In 1597 he was made earl marshal of England, and on the death of lord Burleigh, chancellor of Cambridge. About this time he incurred the queen's displeasure in a remarkable manner. At a private council held respecting the appointment of a proper person to govern Ireland, he had the imprudence to oppose her majesty with rudeness, on which she gave him a box on the ear. The violent earl instantly laid his hand on his sword, and swore he would not have taken such treatment even from her father. At length a reconciliation took place, and he was sent to Ireland, where he met with bad success. His enemies in the meantime turned the mind of the queen against him, and he returned to England, and again fell into disgrace, and was imprisoned. In 1600 he regained his liberty, but did not make

\* Henry IV. was born at Pau, in Berne, December 13, 1553; ascended the French throne, August 3, 1590; formerly announced the Protestant faith, at St. Denys, July 25, 1563; published the memorable edict of toleration of Nantz, April 19, 1598, which was revoked by Louis XIV. in 1685; received his death from the hand of the fanatical assassin Ravaillac, who stabbed him, May 14, 1610.

a proper use of it, but began to arm in his own defence. Some blood was shed before he surrendered, on which he was made close prisoner, tried, and executed. He was buried in the Beachamp, or Lady chapel, at Warwick. Essex was the steady friend of learning and learned men.

1601, *March 30.* Henry Cusse, celebrated for his wit, learning, and misfortunes, was executed at Tyburn, with sir Gelly Merrick, on this day. He was born at Hinton St. George, in Somersetshire, about the year 1560, and was of Trinity college, Oxford, where his diligence was so great that he very soon distinguished himself from most of his cotemporaries, more especially in his knowledge of Greek, and his admirable faculty in disputing. He was afterwards promoted to the Greek professorship, and was chosen proctor of the university, April 10, 1594. The earl of Essex, who was fond of learning and encouraging those who possessed it, as a means of rewarding Mr. Cusse, appointed him his secretary when he became lord lieutenant of Ireland; and in that capacity obtained the entire confidence of his master, and shared with the earl his splendour and his disgrace. He was one of the persons who was forced to surrender at Essex house; and when the earl was condemned, he charged Mr. Cusse to his face with being the author of his misfortunes, and the person who principally persuaded him to pursue violent measures. He was brought to his trial on the 5th of March, and defended himself with great steadiness and spirit. He was convicted, and as he was looked upon as a dangerous person by those in power, executed accordingly, dying with great constancy and courage. The following epigram was written in Greek upon his death:

Thou wast, indeed, well read in Greek!  
Thy Alpha too, was crown'd with hope;  
But oh! though sad the truth I speak,  
Thy Omega proved but a rope.

Sir Gelly Merrick was executed for conniving at the advice given by Mr. Cusse to the earl, when in Ireland.

1601. *Died,* Tycho Brahe, a famous astronomer, was descended from a noble Swedish family, settled at Knudstorp, in Denmark, where he was born in 1546. He studied philosophy and rhetoric, with a view of making the law his profession, but the solar eclipse, which happened in 1560, turned his attention to astronomy, which he considered as a divine study, and he applied to it with the greatest avidity. In 1565, he returned home, and in a quarrel with a Danish noble lost his nose, which he supplied with an artificial one, so curiously made that the defect was hardly to be perceived. About this time he applied to the study of chemistry, in hopes of finding the philosopher's stone. After this he travelled for some years, and on his return to Denmark, resided with his uncle, who furnished him with the means of making celestial observations: and here it was, that in 1573 he discovered a new star in the constellation Cassiopeia.

But shortly afterwards he incurred the displeasure of his relations by an imprudent marriage, and the quarrel was so great that the king was obliged to interfere to effect a reconciliation. At the royal command he read lectures on astronomy at Copenhagen. The king also gave him the isle of Huen, where he erected on it the castle of Uranienburg in the year 1578; and at seventy paces distance another building for an observatory, to which he gave the name of Steltzburg, or Stierneburg. Feeling himself in want of a printing-press for the publication of the fruits of his astronomical researches, he introduced one into his castle, and published from it several learned pieces between the years 1596 and 1600. These generally bear the imprint *Uranibergi Danie*, and were to be had at the booksellers in Frankfort. The king added to the donation above-named, a pension, and some lucrative places. In this situation he resided about twenty years, but on the death of the king he lost his pension; in consequence of which he left Uranienburg, and went to Copenhagen, from whence he removed to Prague, where he died. He left a widow, two sons, and four daughters. He was a man of great genius, but excessively superstitious, being addicted to judicial astrology, and very attentive to omens. His temper was also uncommonly irritable, and his vanity disgusting. Of the last, no greater proof can be given than his inventing a system in opposition to the Copernican, and more absurd than that of Ptolemy. His works, however, show him to have been an accurate observer.

1601. MAMERT PATISON, a learned Greek printer of Paris, who married Dionysia Barbé, (Maittaire thinks about 1579,) widow of Robert Stephens, and by this connexion becomes entitled to a distinct place among the family of the Stephenses. He enjoyed the office of typographus regius, and was unquestionably a learned printer, and his "officina" appears to have been beautifully provided with Greek types. In 1578, he gives "*apud Mamertum Pattisonium Typographum Reginum, in officina Robertus Stephani*."

1601. According to Coxe, *Travels in Switzerland*, the first book printed in Romanesche (dialect of the Grey League) was executed at Lindau, in Bavaria, namely, a *Catechism*, composed by Daniel Bonifacius. In 1604, Ludovicus Bremenses, printed at *Insula del lacum Aeronium*, an island in the lake of Constance; probably the city of Lindau is meant by this expression.

1601. James VI. being at Edinburgh, he attended, upon one occasion, the worship of the high church, where a minister, of the name of Balcarguall, performed the service. In the course of the sermon, this preacher advanced something which was derogatory to the authority of bishops; upon which James rose from his seat, and interrupting the speaker, asked him what authority from scripture he had for that assertion? Balcarguall replied that he could bring sufficient proof from scripture for all that he had asserted. The king denied this, and pledged his

kingdom that he would prove the contrary; adding that it was the practice of the preachers to busy themselves about such causes in the pulpit; but he was aware of their intentions, and would look after them. This interlude continued upwards of a quarter of an hour, to the great edification of the audience; after which James resumed his seat and heard the sermon to the end.—*M'Crie.*

1601. RALPH NEWBERRY, printer and stationer, whose dwelling was in Fleet-street, a little above the Conduit. He was warden of the stationers' company in 1583, and master in 1598 and 1601, and gave a stock of books, and privilege of printing, to be sold for the benefit of Christ's hospital and Bridewell. He was assignee with Henry Denham. He was concerned with George Bishop and others, in printing. His first book is dated 1560. In 1590 he printed in Greek types, *Joannis Chrysostomi, &c., Homiliæ ad populum Antiochenum, viginti et duæ, opera et studio Joannis Harmari, collegii prope Winton magistri informatoris.*

1601. *Love's Martyr; or Rosalin's Complaint, allegorically shadowing the truth of Love, in the constant fate of the Phoenix and Turtle.* Such is the title of "a poem, interlarded with much variety and rariété, now first translated out of the venerable Italian of Torquato Coëliano, by R (obert) C (hester.) Lond. 1601. 4to." This is one of the rarest poetical *morceaux* in the English language, which produced at the Roxburgh sale £24 3s. and was purchased by sir M. M. Sykes, from the *Bibliotheca Anglo-Poetica*, at £50, and was knocked down at his sale, in 1821, at the enormous sum of £61 19s.

1601. *The fontaine of Self Love, or Cynthia's Revels.* As it hath been sundry times privately acted in the Black Friars, by the children of her Majesties chappell. Written by Ben Jonson.

Quod non dant Proceres dabit Histrio;  
Hand tamen invidas vultu quem Palpita pascunt.

Imprinted at London, for Walter Burre, and are to be sold at his shop in Paules Church Yard, at the signe of the Flower de Luce and Crowne. 1601.

1602, June 22. "Lent unto Benjamy Jonson at the apoyntment of E. Alleyn and William Birde, in earnest of a boocke [play] called Richard Crook-back, and for a new *adicyons* for *Jeromino*, the sum of x lb."—Henslowe *manuscripts*. That tragedy, "if ever acted," was speedily withdrawn.

1602. A political pageant, called *England's Joy*, was represented at the Swan theatre. It was the year of a fierce *histrionic* paper war.

1602. WILLIAM LEAKE, dwelling at the sign of the Holy Ghost, in St. Paul's churchyard, printed an edition of *Venus and Adonis*. 16mo. 27 leaves. Only two copies are known; one of which is in the Malone collection, now in the Bodleian library. A copy of this work was sold at Mr. Stevens' sale for £1 1s. 6d.; resold at Brindley's sale for £42; and again at Srettel's for £26 5s.

1602, *The Art of English Poesie*, by Thomas Campion, wherein it is demonstratively proved, and by example confirmed, that the English toong will receive eight severall kinds of numbers, proper to itselfe, which are all in this book set forth, and were never before this time by any man attempted. Printed by Richard Field, for Andrew Wise.

This tract is a formal attack upon rhyme. The author observes thus in his Preface:—"For this end have I studied to induce a true forme of versifying into our language, for the vulgar and unartificiall custome of riming hath, I know, deterred many excellent wits from the exercise of English poesie."

This tract roused the indignation of Samuel Daniel, who in the very following year published *A Defence of Rhyme*, against a pamphlet, entitled, *Observations in the Art of Poesie*, wherein is demonstratively proved that rhyme is the fittest harmonie of wordes that comports with our language.

Among other remarks in vindication of rhyme, Daniel has the following:—

"But had our adversary taught us by his owne proceeding, this way of perfection, and therein fram'd us a poeme of that excellencie as should put downe all, and been the maister-peece of these times, we should all have admired him. But to deprave the present forme of writing, and to bring us nothing but a few loose and uncharitable epigrammes, and yet would make us believe those numbers were come to raise the glory of our language, giveth us cause to suspect the performance, and to examine whether this new arte, *conetat sibi, or, aliquid sit dictum quod non sit dictum prius.*"

1602. The bishop of Origuella, a town in the province of Murcia, in Spain, possessed a printing-press within the walls of his own palace; as a little work which he caused to be printed for the use of his clergy, entitled *Synodus Oriolano secunda*, bears for imprint, *Oriole, in palatio episcopali per Didacum de la Torre, anno Domini 1602.* This book is in Trinity college, Dublin; as well as another of the next year, also by the bishop, who appears to have been the corrector of his own press. In this latter work he apologizes to the reader, for his want of Greek types, and for some inaccuracies which had crept in through his own ill health and the necessary care of his diocese. Antonio, in his *Bibliotheca Hispana*, mentions a book printed here in 1603.

1602. *The Booke of Common Prayer*, commonly called Queen Elizabeth's *Prayer Book*, with a portrait of the queen, and borders round each page, containing the *Dance of Death*.

1603, March 24. *Died*, ELIZABETH, queen of England, who has ever been acknowledged as one of the wisest, as well as the most fortunate of our English monarchs. She possessed many of those qualities which are eminently suited to the ruler of such a kingdom as that over which she presided. The solid judgment, immense capacity, and deep penetration which she discovered in the choice of her ministers, the

management of her finances, and the administration of justice, have deservedly acquired the praise and admiration of posterity; while her prudence and vigilance, her vigour, constancy, and magnanimity have never, perhaps, been surpassed by any monarch in ancient or modern history. But many instances are on record, which prove that she partook of the imperious spirit of her father, and sometimes degraded the amiable character of woman, by giving way to the violence of passion; nor was she over delicate in the choice of terms to express her displeasure. At the commencement of her reign she was moderate and humble; towards the end of it, haughty and severe; and to flatter her charms at the age of sixty-five, was the surest road to her favour and esteem. Her ministers\* could always bias her judgment by means of flattery, or by intimidating threats that her throne was in danger; but the strength of her reason opposed their opinions, and made her defer, as long as she could, a decision which she felt was inconsistent with her better part. But whatever were her defects as a woman, as a queen she is ever to be remembered by her subjects with gratitude.

From the time that the earl of Essex was beheaded, the days of Elizabeth were sorrowful and gloomy; and she never ceased to reproach herself for the cruel precipitancy with which she acted. Her godson, sir John Harrington, de-

scribes her majesty, in October, 1601, as altered in features, and reduced to a skeleton. He says, her food was only manchet food and succory pottage. Her taste for dress was gone. Nothing could please her; she was the torment of the ladies who waited on her person. She stamped with her feet, and swore violently at the objects of her anger. For her protection she had ordered a sword to be placed on the table, which she often took in her hand and thrust with violence into the tapestry of her chamber." After the death of her intimate friend, the countess of Nottingham, she spent her days and nights in tears, and only spoke to mention some irritating subject; and having experienced some hours of alarming stupor, she persisted, after her recovery from it, to remain seated on cushions, from which she could not be prevailed upon to remove during ten days; but sat with her finger generally on her mouth, and her eyes open and fixed upon the ground, for she had an absurd notion that if she lay down in bed she should not rise from it again. In her last illness she removed, on a stormy day in January, from her palace in Westminster to Richmond; and when her ailments increased, she was obstinate in refusing medical advice. Her secretary, with the other great ministers of state, having met at Richmond, the queen was put into bed, and listened to prayers and exhortations from the archbishop. Two days before her death, Cecil reminded the queen that she had once said to him, at Whitehall, that her throne was the throne of kings. To which she replied, "I will have no rascal to succeed me. Who should succeed me but a king?" On being asked to explain her meaning more fully, her majesty said, "that a king should succeed, and who could that be but her cousin of Scotland." The archbishop resumed his prayers: she became speechless, but twice beckoned him to continue. In the evening the same lords requested her to make a sign, if she continued in the same mind respecting the succession. The queen raised her arms in the air, and closed them over her head. In a few minutes she began to dose; and at three o'clock the next morning composedly breathed her last, on the 24th of March, 1603. Her remains were deposited, with great funeral pomp, in Henry VIIIth's chapel, Westminster abbey. She was the daughter of Anne Boleyn, and born at Greenwich, September 7, 1533.

This great queen passionately admired handsome persons, and he was already far advanced in her favour who approached her with beauty and grace. She had so unconquerable an aversion for men who had been treated unfortunately by nature, that she could scarcely endure their presence. She left no less than three thousand different habits in her wardrobe when she died. She was possessed of the dresses of all countries. "In that time," [Elizabeth] says honest John Stowe, "he was held the greatest gallant that had the *deepest ruff* and *longest rapier*. The offence to the eye of the one, and hurt unto the life of the subject that came by

\* The following brief notices of Elizabeth's ministers may not be inapplicable to our purpose:—

William Cecil, lord Burghley, was born at Bourn, in Lincolnshire, Sept. 13, 1520; received the honour of knighthood from Edward VI October 21, 1531; became chief minister to queen Elizabeth, and for a long time governed her councils. He was jealous of every man whose services were greater, and whose parts were better than his own. He died August 4, 1598.

Sir Francis Walsingham, one of the most eminent of Elizabeth's statesmen, her frequent representative at foreign courts, died April 6, 1590, buried in St. Paul's.

Sir Christopher Hatton was one of the handsomest and most accomplished men of his time, and to these accidental instances of good fortune he owed his advancement in Elizabeth's favour: certain it is, the same anomalous partiality which led her into the greatest extravagancies with Leicester and Essex she displayed towards Hatton, which eventually promoted him to the highest stations in the cabinet, and in his profession of a lawyer. He was appointed vice chamberlain of her household, lord high chancellor of England, and knight of the garter. He died November 26, 1591.

Robert Dudley, earl of Leicester, was born at Ulsoam, September 7, 1533, was ennobled in September, 1564. On June 4, 1550, he was married to Amy Robsart, in the presence of Edward VI., she met her death by violence, at Cumnor hall, near Oxford, September 28th, 1550. He is supposed to have been poisoned, and died September 4, 1586. For thirty years this nobleman had been the favourite of his royal mistress, over whose affections he had held such a firm ascendancy as to keep her ignorant of his dissipated manners. As her councillor, he abused her confidence; for in the advice he gave of the unfortunate queen of Scotland, during the period of his government in the Netherlands, and in all the affairs of state, in which her misplaced partiality led her to consult him, he ever considered the furthering of his own ambitious plans, and his personal gratification, before the honour of his mistress and the ends of justice. Leicester was too mean to be noble, and too vain to be great. Buried at Warwick.

Thomas Sackville, lord Buckhurst, first earl of Dorset, filled various important offices in the state; he was lord high treasurer to queen Elizabeth, chancellor of the university of Oxford, K.G., &c. and as an author maintains an eminent station among the poets of his country. He died at a very advanced age, loaded with wealth and honours, April 19, 1608.

the other—this caused her majesty to *make proclamation against them both*, and to *place selected grave citizens at every gate to cut the ruffs, and break the rapiers points of all passengers that exceeded a yard in length of the rapiers, and a nayle of a yard in depth of their ruffs.*\*

There is this singular and admirable in the conduct of Elizabeth that she made her pleasures subservient to her policy, and she maintained her affairs by what in general occasions the ruin of princes. So secret were her amours, that even to the present day their mysteries cannot be penetrated; but the utility she drew from them is public, and always operated for the good of her people. Her lovers were her ministers, and her ministers were her lovers. Love commanded, love was obeyed; and the reign of this princess was happy, because it was a reign of *Love*, in which its chains and its slavery are liked! Those who are well acquainted with the private anecdotes of those times, know what encouragement this royal coquette gave to most who were near her person. Dodd, in his Church History, says, that the earls of Arran and Arundel, and sir William Pickering, "were not out of hopes of gaining queen Elizabeth's affections in a matrimonial way."

She encouraged every person of eminence: she even went so far, on the anniversary of her coronation, as publicly to take a ring from her finger, and put it on the duke of Alençon's hand. She also ranked amongst her suitors Henry III. and Henry IV. of France.

She never forgave Buzenval for ridiculing her bad pronunciation of the French language; and when Henry IV. sent him over on an embassy, she would not receive him. So nice was the irritable pride of this great queen, that she made her private injuries matters of state.

"This queen," writes Du Maurier, in his *Mémoires pour servir à l'Histoire de l'Hollande*, "who displayed so many heroic accomplishments, had this foible, of wishing to be thought beautiful by all the world. I heard from my father, that at every audience he had with her majesty, she pulled off her gloves more than a hundred times to display her hands, which indeed were very beautiful and very white."

A not less curious anecdote relates to the duke

of Anjou and our Elizabeth; it is one more proof of her partiality for handsome men. The writer was Lewis Guyon, a cotemporary.

"Francis duke of Anjou, being desirous of marrying a crowned head, caused proposals of marriage to be made to Elizabeth queen of England. Letters passed betwixt them, and their portraits were exchanged. At length her majesty informed him, that she would never contract a marriage with any one who sought her, if she did not first *see his person*. If he would not come, nothing more should be said on the subject. This prince, over-pressed by his young friends, (who were as little able of judging as himself) paid no attention to the counsels of men of maturer judgment. He passed over to England without a splendid train. The said lady contemplated his *person*: she found him *ugly*, disfigured by deep scars of the *small-pox*, and that he also had an *ill-shaped nose*, with *swellings in the neck*! All these were so many reasons with her, that he could never be admitted into her good graces."

By the following extract from a letter from one of her gentlemen, we discover that her usual habits, though studious, were not of the gentlest kind, and that the service she exacted from her attendants was not borne without concealed murmurs. The writer groans in secrecy to his friend. Sir John Stanhope writes to Sir Robert Cecil in 1598: "I was all the afternoone with her majestie, at my booke; and then thinking to rest me, went in agayne with your letter. She was pleased with the Filosofer's stoue, and hath been *all this day reasonably quyet*. Mr. Grevell is absent, and I am tyed so as I cannot styrr, but shall be *at the wourse* for yt, these two dayes!"

The origin of Raleigh's advancement in the queen's graces was by an act of gallantry. Raleigh spoiled a new plush cloak, while the queen, stepping cautiously on this prodigal's footcloth, shot forth a smile, in which he read promotion. Captain Raleigh soon became sir Walter, and rapidly advanced in the queen's favour.

Hume has preserved in his notes a letter written by Raleigh. It is a perfect amorous composition. After having exerted his poetic talents to exalt *her charms* and *his affection*, he concludes, by comparing her majesty, who was then *sixty*, to Venus and Dianna. Sir Walter was not her only courtier who wrote in this style. Even in her old age she affected a strange fondness for music and dancing, with a kind of childish simplicity; her court seemed a court of love, and she the sovereign.

The education of Elizabeth had been severely classical; she thought and she wrote in all the spirit of the characters of antiquity; and her speeches and her letters are studded with apothegms, and a terseness of ideas and language, that give an exalted idea of her mind.\* In her

\* The following extract is taken from Stowe, which may amuse the reader:—"In the second yeere of Queen Elizabeth 1569, her *silke woman*, Mistris Montague, presented her majestie for a new yeere's gift, a *paire of black knit silk stockings*, the which, after a few dayes' wearing, pleased her highness so well, that she sent for Mistris Montague, and asked her where she had them, and if she could help her to any more: who answered, saying, 'I made them very carefully of purpose only for your majestie, and seeing these please you so well, I will presently set more in hand.' 'Do so' (quoth the queene), for indeed I like *silk stockings* so well, because they are *pleasant, fine, and delicate*, that henceforth I will wear no more *cotton stockings*—and from that time unto her death the queene never wore any more *cloth hose*, but only *silk stockings*."

The use of coaches was first introduced into England during her reign. In 1599, the earl of Arundel brought them into use; before which the queen, on public occasions rode on horseback behind her chamberlains.

\* *Supplications of Saints. A Booke of Prayers, wherein are three most excellent prayers, made by queen Elizabeth.* By Thomas Seacroft. London. 1612.

evasive answers to the commons, in reply to their petitions to her majesty to marry, she has employed an energetic word. "Were I to tell you that I do not mean to marry, I might say less than I did intend; and were I to tell you that I do mean to marry, I might say more than it is proper for you to know; therefore I give you an answer, ANSWERLESS!"

The following letter from Elizabeth to Heaton, bishop of Ely, is taken from the register of Ely, and gives a trait of the queen :

PAUD PRELATE,

I understand you are backward in complying with your agreement; but I would have you to know, that I, who made you what you are, can unmake you, and if you do not forthwith fulfil your engagement, by — I will immediately unfrock you.

Yours as you demean yourself,

ELIZABETH.\*

Heaton, it seems, had promised the queen to exchange some land belonging to the see for an equivalent, and did so, but it was in consequence of the above letter.

In a manuscript at the British museum, No. 4712, in Ayscough's catalogue, there are the following verses on the death of queen Elizabeth, which will be admired for their quaintness.

BRITANNIÆ LACRYMÆ.

Weep, little Isle! and for thy mistress death,  
Swim in a double sea of brackish water!  
Weep, little world! for great Elizabeth,  
Daughter of war, for Mars himself begat her!  
Mother of Peace, for she bore the latter.  
She was and is (what can there more be said?)  
On earth the first, in heaven the second maid.

On the funeral of the maiden queen, a poet of the day described the national grief in the following stanzas :

The queen was brought by water to Whitehall,  
At every stroke the oars did tears let fall;  
More clung about the barge : *ash under water*  
*Wept out their eyes of pearls, and swam blind after.*  
I think the bargemen might, with easier thighs,  
Have row'd her thither in her people's eyes;  
For, howsoever, thus much my thoughts have scan'd,  
Sh'ad come by water, had she come by land.

1603. *Atropoion Delion, or the death of Delia; with the Tears of her funeral. A poetical excursion discourse of our late Eliza.* By T. N. London. 4to. Reprinted in the third volume of Nichols's *Progresses of Queen Elizabeth*.

Thomas Newton, the author of this work, translated many other. Notices of him will be found in Wood's *Athen.* Oxon. Warton's *Hist. Eng. Poet.* and Ritson's *Bib. Poetica*.

*A pleasant new History; or a fragrant Posie made of three flowers, Rosa, Rosalind, and Rosemary.* By Thomas Newton. London, 1604. 4to.

1603, April 17. A petition, signed by a poor man upon this day, is presented to king James, at Theobalds, on his progress from Edinburgh

to London. "Good king, let there be an uniformity in true religion, without any disturbance of papist or puritan. Good king, let there not be such delay and crafty proceedings in the law, and let lawyers have moderate fees. Good king, let no man have more offices than one, especially touching the law. Good king, look to thy takers and officers of thy house, and to their exceeding fees that peel and pole thy princely allowance."

At his accession to the English throne, James was received with transports of joy, and all ranks of men made their court to him; a behaviour which he ought to have improved by suitable returns to captivate the good will and affections of a people so desirous to be pleased with their king. But this national behaviour, as a Scotchman had foretold, spoiled a good king, and made a bad king worse. Instead of uniting closely with the people in one common interest and love, fixing them by works of regard, he took much state, and, in his journey from Edinburgh to London, forbid, by proclamation, the concourse of the people to him; and when they could not be kept off, would often disperse them with frowns, and sometimes curses; and though he neglected so much to gain the public, even at the cheap rate of affability, he sunk into low familiarity with his favourites, and was profuse of riches and honours to particular men. The estates he gave impoverished his treasury, and was the cause of frequent complaints both from the parliament and the people.

Since the Gowrie conspiracy,\* James I. was always afraid of being murdered; he suspected the English generosity and loyalty, which displayed itself so particularly on his journey. This is the best excuse for his ill-timed prohibition; but some attribute it to a resolution then taken up, which was but too much confirmed by his future conduct to the English, to accustom them not to be too familiar with their sovereign.

As a proof of his determination to maintain the royal prerogative in a higher degree than any of his predecessors, he ordered a man to be hanged who had been caught in an act of robbery near Newark, by his sole warrant, without any trial, directly contrary to the privileges of the English nation, and beyond the lawful power of a king of England.

1603. It is a fact highly honourable to the military profession, that in this year, the patriotic English soldiers, who having defeated the Spaniards at the battle of Kinsale, were determined to commemorate their victory by some permanent monument. They subscribed the sum of eighteen hundred pounds towards the purchase of a library, for Trinity college, Dublin. The disposal of the money was confided to the illustrious archbishop Usher, who gave the first donation to the library of his own collection, consisting originally of 10,000 volumes.

\* "Yes," said queen Elizabeth, addressing herself to the prelates in full convocation, March 29, 1585, "if you, my lords of the clergy, do not amend, I mean to disperse you:—look you therefore well to your charges."

\* The Gowrie conspiracy took place on the 8th of August, 1600, at the house of John earl Gowrie, at Perth, on which occasion the earl was slain.

1603. *The Olive Leaf or Universall Abce*, wherein is set forth that creation, descent, and authoritie of letters, together with the estimation, profit, affinitie of declination of them, for the familiar use of all students, teachers and learners of what chirography soever most necessarie. By two tables, newly and briefly composed, charactericall and syllabicall, of Alexander Top, gent. Imprinted at London, by William White, for George Vincent, dwelling in Great Wood-street, at the sign of the Hand in Hand, where they are to be sold. 1603.

This is a curious tract on the subject of a universal alphabet. The author introduces his little volume with these lines :

## THE AUTHOR TO HIS BOOKE.

Farewell my little booke, and tell thy friends  
The deluge of the deepe confusion els;  
Then shew thy leade to all, but baile the best,  
And safely leave it in their holy hands,  
That will oproof thy language, cleere thy sense  
As matter but of meer preeminence.  
Yet as the starre that onward brings the sunne,  
Thou hast perfection where thy light begonne:  
This tell thy friendes, and little booke farewell.

1603. *The Batchellars Banquet; or a Banquet for Batchelars*: wherein is prepared sundrie dainties to furnish their table, curiously drest, and seriously served in pleasantly discouring the variable humours of women, their quicknesse of wittes and unsearchable deceipts.

View them well, but taste not;  
Regard them well, but waste not.

London, printed by Thomas Creed, and are to be sold by T. P.

1603. SIMON STRAFFORD OF STAFFORD dwelt on Addle-hill, near Carter-lane. In 1599 he printed the following work:

*The history of Henrie the fourth; with the battell of Shrewsburie, between the king and lord Henry Percy, surnamed Hotspur of the North. With the humorous conceits of sir John Falstaffe. Newley corrected by W. Shakespeare. London, imprinted by S. S. for Andrew Wise. 1599. 4to. The first part of this play was entered on the books of the stationers' company, February 25, 1598; and the second part is entered August 23, 1600.*

In 1603, Strafford printed, *Psalmes Ybrenkinol brophwuyd Dafydd, gwerdi i cyghanedhu meion mesurau cymreig. Gan Gwylen William Middleton, Yn nisaf y gallodh at fedhwl yr ypperyd glân Simon Stafford, a Thomas Salisbury at printtoddhyn Llunden.* In the epistle to the reader, which is in English, the printer says, he begun the printing of the psalms in the like kind of British metre, as they were sung in the church of England; and says, there are divers other good things ready for the press; as namely, the *British Testament*, lately corrected by the bishop of St. Asaph.

1603. RICHARD YARDLEY AND PETER SHORT were in partnership for many years, and dwelt in Bread-street-hill, at the sign of the Star. In 1603 Mr. Short gave 10s. a year for twenty-six

years to the poor of the company of stationers, charged on a tenement in Monkwell-street, held under St. Bartholomew's hospital. Twenty-six works bear their imprint; the last of which was the following:—*A newe, cheape, and delicate fire of cole-balles, wherein seacole is by the mixture of other combustible bodies, both sweetened and multiplied. Also, A speedie way for the winning of any breach; with some other new and serviceable inuentions annoverable to the Time.* 4to.

1603, October 29. The company of stationers obtained a patent from king James I. for the sole printing of *Primers, Psalmes, Almanacks, &c.*, in English, for the help and relief of them and their successors for ever.

1603. ADAM ISLIP practised the art from the year 1594 to 1603. In 1598 he printed *The works of our ancient and learned English poet, Geffery Chaucer.* This piece has a good copper print of Chaucer at length, with his pedigree and arms, as by Thomas Occleve is described, who lived in his time, and was his scholar. This print, with the mark engraved on it, and said to be at the charges of Bonham Norton, is also put to the folio edition in 1602, in the title page of which book these additions are said to be made. 1. In the life of Chaucer many things inserted. 2. The whole worke by old copies reformed. 3. Sentences and proverbs noted. 4. The signification of the old and obscure words pruned; also characters, shewing from what tongue or dialect they be derined. 5. The Latine and French, not Englished by Chaucer, translated. 6. The treatise called Jacke Vpland against friers; and Chaucer's A, B, C, called. *La Priere de nostre Dame*, at this impression added. Folio.

*Key to Unknown Knowledge, or a Shop of Five Windowes.*

Which if you do open, to cheapeen and copen,  
You will be unwilling, for many a shilling,  
To part with the profit that you shall have of it.

Consisting of fine necessarie treatises, namely, 1. The judgement of vrines. 2. Judiciall rules of physicke. 3. Questions of oyles. 4. Opinions for curing of harquebush shot. 5. A discourse of humane nature. Translated from Hippocrates, by M. John de Bourges, physician. Printed for Edward White. 1599. 4to.

1603. There were at this time at Oxford (where for many years was neither book nor student to be seen,) 2000 and above of excellent choice volumes set up and reduced into a catalogue. King James appointed sir Thomas Bodley (lately knighted by him) the *founder* thereof. So great was his zeal for obtaining books, and for furnishing of it, that among other means, persuaded the society of stationers in London to give a copy of every book that was printed, (since confirmed by the charters of kings,) but also searched for authors to do the like.

1603. The fourth volume of *Gallo-Belgicus* which was published in this year, was compiled by Gaspar Lorchan, for William Lutzenkirch. Success soon gave rise to rivalryship. The fifth

volume appears to have been collected by Gottard Arthus, for Sigismund Latom, and to have been printed at FRANKFORT, in 1605. This was plainly a rival work. *Gallo-Belgicus* was now published half yearly with a title-page and index to every volume; and was, for the first time, usefully ornamented with maps. It was written as late as the year 1605, by John Philip Abel, and was printed for the heirs of Latom, with the emperor's special privilege. The 15th volume carries *Gallo-Belgicus* down to the year 1630, but how long after cannot be now ascertained.

To stuff out a peculiar dialect;  
You must not hunt for wild outlandish terms  
But let your matter run before your words.  
And if at any time you chance to meet  
Some *Gallo Belgick* phrase, you shall not straight  
Rock your poor verse to give it entertainment,  
But let it pass; and do not think yourself  
Much damnsied, if you do leave it out  
When not the sense could well receive it.

1604. The general Easter catalogue of Frankfort was printed, with a permission from government, as appears by the following title:—*Catalogus universalis nundinis Francof. de anno 1604. A catalogue of all the new books, or books improved and republished, which will be exposed for sale in Book-street, Frankfort, during the Easter fair, 1604.* Francofurti permissu superiorum excudebat. Joh. Saur. To be had at the shop of Peter Kopff. The order of the book is the same as before.

After this the Leipsic booksellers began not only to reprint the Frankfort catalogues; but to enlarge them with many books which had not been brought to the fairs in that city. "I have seen," says Beckmann, "from professor Baldinger's library, *Catalogus universalis pro nundinis Francofurtensibus vernalisibus de anno, 1600*; or a catalogue of all the books on sale in Book-street, Frankfort; and also of the books published at Leipsic, which have not been brought to Frankfort, with the permission of his highness the elector of Saxony, to those new works which have appeared at Leipsic. Printed at Leipsic, by Abraham Lamberg, and to be had at his shop. On the September Catalogue of the same year, it is said that it is printed from the Frankfort copy, with additions. I find an imperial privilege, for the first time, on the Frankfort September Catalogue of 1616. *Cum gratia et privilegio specialis cæs. mag. prstat. apud. J. Krungerum Augustanum.* Some imperial provisions, however, may be of an earlier date, for I have not seen a complete series of these catalogues.—*History of Inventions.*

1504. ROBERT DEXTER dwelt, or kept shop, at the sign of the brazeu Serpent, in St. Paul's church yard, and had for his device, a right hand pointing with the forefinger to a star, about, DEVS IMPERAT ASTRIS. Mr. Dexter gave £20 to the poor of the stationers' company. Richard Field, and Robert Robinson, printed for him.

1604. HENRY BILLAGE of St. Martin's in the Vintry, dyer, gave £52 to pay 52s yearly to the churchwardens of that parish for bread, to be

given to the poor weekly. This sum continues to be regularly paid by the company of stationers, under the erroneous name of *Mr. Bellinger's gift*. [Mr. Bellinger was master in 1686 and 1693.]—*Nichols.*

1604. *Miscellanea,—Meditations,—Memoratives.* By Elizabeth Grymston.

*Non est rectum quod a Deo non est directum.*

London: printed by Melch. Bradwood, for Felice Norton.

This is a very rare and curious work. It is dedicated to the author's "Loving Sonne, Bernye Grymston," and is a miscellaneous composition of verse and prose.

The poetry is indifferent enough, but among the *Memoratives* at the end are some maxims, as good and judicious as any to be met with in Rochefoucault, or Bruyere. As for example:

"The darts of lust are the eyes, and therefore fix not thy eye on that which thou mayst not desire.

"There is no moment of time spent which thou art not countable for, and therefore, when thou hearest the clocke strike, think there is now another hour come, whereof thou art to yeeld a reckoning.

"The end of a dissolute life is a desperate death. There was never president to the contrary, but in the theefe in the Gospel: In one, lest any should despaire: in one alone, lest any should presume.

"Evil thoughts are the divels harbingers, for he lodgeth not but where they provide his entertainment.

"Indifferent equality is safest superiority.

"Where passions increase, complaints multiply.

"If thou givest a benefit, keepe it close; but if thou receivest one, publish it, for that invites another.

"Let thy will be thy friend, thy mind thy companion, thy tongue thy servant.

"Age may gaze at beantes blossoms; but youth climbs the tree and enjoyes the fruit.

"Time is the herald of Trueth, and Trueth the daughter of Time.

"The young man may die quickly; but the old man cannot live long.

"There be foure good mothers have foure bad daughters: trueth hath hatred, prosperity hath pride, security hath perill, and familiarity hath contempt.

"Wisdom is that olive that springeth from the heart, bloometh on the tongue, and beareth fruit in the actions.

"Happy is that mishap, whereby we passe to better perfection.

"The soule is the greatest thing in the least continent.

"Let the limits of thy power be the bounds of thy will.

"No greater comfort than to know much: no lesse labour than to say little.

"Give a lazie clerke a lean fee."

1604. *The Ant and the Nightingale, or Father Hubbard's Tales.* Printed by T. C. for Thomas

Bushell, and are to be solde by Jeffrey Charlton, at his Shop, at the North Doore of Paules. Small 4to.

The contents are tales, with poetry intermixed. The tales are related by an ant to a nightingale to save her life, the ant having crept up a tree, and got within reach of the nightingale's beak. The author thus introduces his book

## TO THE READER.

Shall I tell you what, reader? but first I should call you gentle, courteous, and wise, but tis no matter, theyre but foolish words of course, and better left out than printed; for if you be so, you need not be called so; and if you be not so, then were lawe against me for calling you out of your names; by John of Powles church yard I sweare, and that oath will be taken at any haberdashers, I never wisht this booke better fortune than to fall into the hands of a true spelling printer, and an honest stitching bookseller; and if honestie could be solde by the bushell, like oysters, I had rather have one bushell of honestie than three of monie.

Why I call these *Father Hubbard's Tales*, is not to have them called in againe, as the tales of *Mother Hubbard*; the worlde would shewe little judgment in that yfaith, and I should say then *plena stultorum omnia*; for I entreat here neither of rugged beares nor apes; no, nor the lamentable downfall of the olde wives platters, I deale with no such mettall. What is mirth in mee is harmlesse as the Quarter Jack in Powles,\* they are up with their elbows foure times an houre, and yet misuse no creature living. The verie bitterest in me, is but a physical frost, that nips the wicked blood a little, and so makes the whole bodie the more wholesomer, and none can justly except at me, but some riotous vaunting Kit, or some gentleman swallowing *Mal Kin*,† then to condemn these tales following, because Father Hubbard tells them in the small syze of an ant, is even as much as if these two wordes *God* and *Devil* were printed both in one line; to skip it over, and say that line were naught, because the *Devil* were in it; *Sat Sapienti*, and I hope there be many wise men in all the twelve companies.‡

Yours if you read without  
Spelling or hacking T. M.

\* It may be presumed from this passage, that formerly the quarters were struck at St. Paul's church clock by the figures of men, as they were in the old church of St. Dunstan's, Fleet-street.

† The diminution of Mary.—Shakespeare's *Coriolanus*.

The kitchen Malkin pins

Her richest lockram 'boot her reechy neck.

Some readers may require to be informed that lockram means some sort of coarse linen: reechy means greasy. See *Pericles Prince of Tyre*.

None would look on her,

But cast their gazes on Marina's face;

Whilst ours was blurted at, and held a Malkin

Not worth the time of day. Act IV. Sc. 4.

That is a mean wretch, not worth saluting with good day to you.

‡ Originally the chartered city companies were only twelve in number.

1604. King James VI. empowered the town council of Edinburgh to make such acts, statutes, and ordinances, for the good government of the town as they should deem expedient; and they exercised their jurisdiction in a manner that would not disgrace a court of star chamber. Printers were prohibited by them from printing unlicensed books or pamphlets, under the penalty of losing the freedom of the city, and being otherwise *fined and punished at the will of the magistrates*."

1604. A *Japanese Vocabulary* was printed in the Jesuit's college, at Nangasaky,\* a seaport of Japan, on the west coast of the island of Ximo. A copy of this vocabulary was sold in the collection of M. Langlès, of Paris, in 1825, for six hundred and forty francs; as also another edition, printed at the same place, in the preceding year, for six hundred and thirty-nine francs. Both volumes were of a small 4to. size. The jesuits had established a press at this place, in 1592. A copy is in the Bodleian.

A jesuit named Nicholas Trigault, who made Nan-king his residence for some time, about the year 1620, and printed a *Chinese Vocabulary*† in three volumes, which Sotuelius describes to be *excursum in Sinis*, probably at this place.

1605, April 5. Died, JOHN STOWE, the celebrated historian, who devoted his life and exhausted his patrimony in the study of English antiquities;‡ he travelled on foot throughout the kingdom, inspecting all the monuments of antiquity, and rescuing what he could from the dispersed libraries of the monasteries. His stupendous collection in his hand-writing still exists, to provoke the feeble industry of literary loiterers. He felt through life the enthusiasm of study: and seated in his monkish library, associating with the dead more than with the living, he was still a student of taste; for Spencer, the poet, visited the library of Stowe,

\* Between the years 1561 and 1581, one hundred and twenty-six jesuits were employed in the missions to China. All the information which the missionaries could acquire of the learning, the arts and sciences of China, they transmitted to Europe. In 1819 was published, at Paris, *Nouvelles Lettres édifiantes des Missions de la Chine et des Indes orientales*. Paris, 1819, 4 vols. 12mo.

† The honour of giving to Europe the first printed Dictionary of the Chinese language, was by M de Guignes, under the auspices of Napoleon Bonaparte, with the following title. *Dictionnaire chinois, français, et Latin, publié d'après l'ordre de sa Majesté l'Empereur et Roi, Napoleon le Grand*. Paris, 1813, 1 vol. fol. The more effectually to carry this work into execution, a grant of money was given from the imperial treasury.

‡ A *summary of English chronicles, containing the true account of yeres, wherein every kyng of this realme of England began their reygne, how long they reigned, and what notable thynges hath bene doome duringe their reygnes*. With also the names and yeares of all the boy-liffes, custos, maiors, and sherifes of the cite of London, sens the conquest; diligently collected by John Stow, citizen of London, in the yere of our Lord God 1565. Wherunto is added a table in the end, conteynyng all the principall matters of this booke. Perused and allowed according to the queenes majesties inunctions. 12mo. 1565.

Among the catalogue of such unlawful books, as were found in the study of John Stow, of London, February 24, 1568, No. xvii. in *Sirype's life of bishop Orindal*, you will find this book in M.S. 1563. So that Ames concluded this the first edition of it, which was afterwards printed almost annually as almanacks.

and the first good edition of Chancer was made so chiefly by the labours of our author. Late in life, worn out by study and the cares of poverty, neglected by that proud metropolis of which he had been the historian, his good humour did not desert him; for being afflicted with sharp pains in his aged feet, he observed that his affliction lay in that part which formerly he had made so much use of. Many a mile had he wandered—many a pound had he yielded for those treasures of antiquities which had exhausted his fortune, and with which he had formed works of great public utility. It was in his eightieth year that Stowe at length received a public acknowledgment of his services, which will appear to us of a very extraordinary nature. He was so reduced in his circumstances, that he petitioned to James I. for a license to collect alms for himself “as a recompense for his labour and travel of forty-five years, in setting forth the chronicle of England, and eight years taken up in the survey of the cities of London and Westminster, towards his relief now in his old age; having left his former means of living, and only employed himself for the service and good of his country.” Letters patent under the great seal were granted. After a penurious commendation of Stowe’s labours, he is permitted to “gather the benevolence of well-disposed people within this realm of England: to ask, gather, and take the alms of all our loving subjects.” These letters patent were to be published by the clergy from their pulpits. They produced so little, that they were renewed for another twelvemonth. One entire parish in the city contributed seven shillings and sixpence! Such, then, was the patronage received by Stowe to be a licensed beggar throughout the kingdom for one twelvemonth. Such was the public remuneration of a man who had been useful to his nation, but not to himself!

1605. Thomas Ram, who had been educated at King’s college, Cambridge, and afterwards bishop of Ferns, in Ireland, rebuilt his parsonage house, and over the door placed the following lines:—

This house Ram built for his succeeding brothers,  
So Sheep bear wool, not for themselves, but others.

1505. *Eastward Hoe*. As it was played in the Black-friers, by the Children of Her Majesties Revels. Made by Geo. Chapman, Ben Jonson, Joh. Marston. At London, printed for William Aspley. 1605.

King James was so displeased with this performance, on account of some sarcastical remarks upon the Scotch, that both the writers and printer were nigh being imprisoned.

1605, Nov. 5. The “unnatural conspiracy” of the GUNPOWDER PLOT was discovered on this day, which was appointed for the meeting of parliament. The Puritans, feeling themselves heavily aggrieved, accused the king of inclining too much in favor of the Catholics, a charge which he easily got rid of by an immediate order for the strict execution of all the penal laws

which had been enacted against the Catholics. The fine of £20 per lunar month had been for some months suspended; it was now levied for the whole period of the suspension, a circumstance which reduced many families to positive beggary. Among the sufferers was Robert Catesby, a descendant of an ancient family, residing at Ashby St. Leger’s, in Northamptonshire, who conceived the diabolical plan of involving the king, the lords, and the commons, in one common destruction, by blowing up the parliament-house with gunpowder, at the opening of the session.

After the execution of the conspirators,\* many cruel and oppressive enactments, detailed in *Lingard’s History*, vol. ix. Catholic recusants were forbidden to appear at court, or dwell within ten miles of the boundaries of the city. Every child sent for education beyond the sea, was, from that moment, debarred from taking any benefit by devise, descent, or gift, until he should return and conform to the established church; all such benefits being assigned by law to the Protestants next of kin. Every household, of whatever religion, receiving Catholic visitors, or keeping Catholic servants, was liable to pay for each individual £10 per lunar month.

1605. THOMAS EASTE, EST, or ESTE, if the same person, lived in Aldersgate-street, at the sign of the Black Horse, as the custom then was; which makes it difficult to assign whether it was the same person or not. He appears to have been employed by Bird and Tallis, to whom queen Elizabeth granted a patent. He, or they, printed music and other books from 1566 to about this period; and changed the name of Este to Snodham. His arms he printed at the end of some of his books, which were, on a field sable, a cheveron argent, between three horses’ heads erased, and a black horse passant, for the crest, a crescent for difference. The motto, MIEVLX. VAVLT. MOVAIR. EN. VERTV. QVE. VIVRE. EN. HONTE.

1606, June 17. THOMAS FINLAYSONE, a printer of Edinburgh, was empowered by writ of privy seal of Scotland, to print exclusively, The first and second *Rudimentis*, and Corderius’s *Colloquia*. The college of Edinburgh, while it was yet in its infancy, began to print its *Theses Philosophice*, in 1596.† Its earliest typographer was Henry Charteris, the king’s printer. He was succeeded by Thomas Finlaysone, who also succeeded Charteris, as royal printer. They were followed by various other printers, who

\* On the 30th of January, 1606, sir Everard Digby, Robert Winter, John Grant, and Thomas Bates were executed at the west end of St. Paul’s church: and the next day, Thomas Winter, Ambrose Rookwood, Robert Keyes, and Guy Fawkes suffered in Old Palace yard. Some time after, Henry Garnet, provincial of the English Jesuits, and two other Jesuits, named Desmond and Oldcorn, were also hanged.

† The first thesis was in large 8vo. These academical theses assumed a quarto form in 1613. And before the year 1641, their size settled into a large folio. There is a collection of these papers in the college library, which are valuable documents for the literary annals of the university of Edinburgh.

were probably employed without any specific authority.

1606. The following extract of a letter, written by a guest at the table of Robert Cecil, earl of Salisbury, at Theobald's, will shew, that at this time, ebriety was indulged in the highest circles: Cecil gave a grand entertainment to honour the presence of Christian IV. of Denmark, who was then on a visit to James VI. "Those whom I never could get to taste good liquor, now follow the fashion, and wallow in beastly delights. The ladies abandon sobriety, and are seen to roll about in intoxication. After dinner the representation of Solomon, his temple, and the coming of the queen of Sheba was made, or (as I may better say) was meant to have been made.....The lady who did play the queen's part, did carry most precious gifts to both their majesties; but forgetting a rising to the canopy, overset her caskets into his Danish majesty's lap, and fell at his feet, though I rather think it was in his face. Much was the hurry and confusion; cloths and napkins were at hand to make all clean. His majesty then got up, and would dance with the queen of Sheba; but he fell down and humbled himself before her, and was carried to an inner chamber, and laid on a bed of state, which was not a little defiled with the presents of the queen.....The entertainment and show went forward, and most of the presenters went backward or fell down; wine did so occupy their upper chambers. Now did appear in rich dress, Hope, Faith, and Charity. Hope did assay to speak, but wine did render her endeavours so feeble that she withdrew. Faith was then all alone, for I am certain she was not joined with good works, and left the court in a staggering condition. Charity came to the king's feet, and seemed to cover the multitude of sins her sisters had committed: in some sort she made obeisance, and brought gifts.....She then returned to Hope and Faith, who were both sick and spewing in the hall."—*Lingard*.

1606. A copy of a treatise by J. Cheironius, *On the distemper which visited the city and neighbourhood of Nismes*, a town in France, was printed at that place on *white silk*, in this year. In 1620, Joan Vaguenar, who calls himself printer to the town and university of Nismes, executed here a French account of the *Judgment of the Synod of Dort upon the five articles*.

1607. *Lingua, or the Combat of the Tongue and the five Senses for superiority*. A pleasant comedy. At London. Printed by George Eld, for Simon Waterson. This is a very memorable performance. Oliver Cromwell performed in it, and in the character of Tactus, which is said, though perhaps without sufficient reason, to have first inspired him with sentiments of ambition.—*Beloe*.

GEORGE ELD dwelt in Fleet Lane, at the sign of the Printers' Press.

1607. THOMAS CREEDE dwelt at the sign of the Catharine Wheel, near the old Swan, in Thames-street, and frequently put to his books

an emblem of Truth, with a hand issuing from the clouds striking on her back with a rod, and this motto round it, VERITAS VIRESCIT VULNERE. He appears to have been a considerable printer, and to have carried on business for about fifteen years. In 1597 he printed the following work in 4to. *The wit of wit, wits will, or wils wit, chuse you whether. Containing five discourses, the effects whereof follow. Reade and judge. Compiled by Nicholas Breton, gentleman.*

In 1607 he printed the *Ancient history of the destruction of Troy. Translated by William Caxton, and corrected by William Fiston. 4to.*

Nicholas Briton or Breton, here mentioned, was a celebrated writer at this period, and his works are now considered as objects of much curiosity and research, by the collectors of early English literature.—*Beloe*.

*Barly-breake, or a Warning for Wantons.* Written by W. N. Gent. London, 1607, 4to., pp. 32. Dedicated to "Mistris Eliz. C." This work is attributed to Nicholas Breton. *Bibl. Anglo-Poe.*, £10 10s.

1607. Printing introduced into the college of Eton, a town of Buckinghamshire. In John Bagford's manuscript papers, occurs the following account of the introduction of printing into this place: "Sir Henry Saville,\* meditating an edition of *St. Chrysostom*, prepared a fount of curious Greek letters, which in those days were called the *silver letter*, not being cast of silver, but for the beauty of the letter so called. He then made a provision of presses and other materials for the undertaking, and resolved to print in Eton college, and there set up his presses, and about 1607 he printed some small pieces in Greek before he went in hand with the great work of *St. Chrysostom*: and John Norton was the printer. These Greek letters came afterwards into the hands of one Turner, a printer at Oxford." See Wharton's *Life of Laud*, vol. ii. page 174. The earliest Eton specimens observed by Dr. Cotton are some pieces of *Gregory Nazianzen* in Greek and Latin, which were edited by R. Montague, and printed under sir Henry Saville's own care and inspection, in 1610.

\* Mr. afterwards sir Henry Saville, Knt., whose learning and liberal benefactions placed him among the most eminent characters of the seventeenth century, was born at Bradley, near Halifax, Yorkshire, November 30th, 1549; and educated at Oxford, where he was chosen fellow of Merton. In 1596, he was chosen provost of Eton college, and increased the fame of that society by filling it with the most learned men; though he incurred the dislike of some of the scholars, by his preference of diligence to wit: "Give me," he used to say, "the plodding student. If I would look for wits, I would go to Newgate, there be the wits." James I. upon his accession to the crown of England, expressed his great regard for him, and would have preferred him either in church or state, but he would only accept the honour of knighthood, which he received at Wind. or, September 21st, 1604. Beside giving various sums of money for the advancement of mathematical and other sciences, he contributed several rare books and manuscripts to the Bodleian library, and a number of Greek types and matrices to the printing press at Oxford. He also published many valuable works at great expense; and his beautiful edition of *Chrysostom's Works*, in Greek, of which one thousand copies were printed, in 1613, in 5 vols. folio, cost him no less than £3000. He died at Eton college, February 19, 1622; and was buried in the chapel there. He was one of the translators of king James's Bible.

1607, *June*. In the *Black Book* of Warwick is an order of council of this date, to that corporation, directing them to assist John Speed in his improvement on *Saxton's maps of Great Britain*. This book is in the possession of the corporation of Warwick, and relates to the history of the reigns of Elizabeth and James I.

John Speed, though originally brought up to the business of a tailor, became eminent as a chronologist, historian, and antiquary, was born in 1555. He wrote, in folio, the *History of Great Britain, from Julius Cæsar to James I.* and died at London, July 28, 1629.

1607. John Cowell, an English civilian, published in this year a work entitled the *Interpreter, or an Explanation of Law Terms*. The house of commons caused this book to be burnt, on account of its being too favourable to the regal prerogative. He was born in Devonshire, in 1554, and brought up at Cambridge, where he became a professor of civil law, and master of Trinity hall. In 1605 he wrote *Institutes of the Laws of England*. He died at Cambridge, October 11, 1611.

1607, *July 16*. King James, with the queen, prince Henry, and divers lords, is entertained by the company of merchant tailors. Master Benjamin Jonson, the poet, "for the reputation and credit of the company," was caterer-general of the music, speeches, and inventions; "by reason that the company doubt that their school-master and schollers be not acquainted with such kind of entertainments." Dr. John Bull,\* chamber musician to the king, was free of that company, says Stowe, "being in a citizen's gown, cap, and hood; and while his majesty was at table, the doctor played a most excellent melody upon a single pair of organs, placed there for that purpose only." It was upon this occasion, says Mr. Clark, that the national anthem of *God save the King*† was first performed for the purpose of celebrating the king's escape from the gunpowder plot.

\* John Bull was a celebrated musician, born about 1565, in Somersetshire. His master in music was William Blitheman, organist of the chapel royal of queen Elizabeth, in which capacity he was much distinguished. Bull, on the death of his master, in 1591, was appointed his successor. In 1592, he was created doctor in the university of Cambridge; and in 1596, at the recommendation of her majesty, he was made professor of music to Graham college, which situation he resigned in 1607. After the death of Elizabeth, Bull was appointed chamber musician to king James. In 1613, he finally quitted England, and entered into the service of the archduke, in the Netherlands. He afterwards seems to have settled at Lubec, from which many of his compositions are dated, and are as late as 1622, the supposed year of his decease. He seems to have been praised at home more than rewarded. It is a misfortune to Dr. Bull's fame, that he left little evidence of his great powers, except the transcendently magnificent anthem of *God save the King*.

This anthem has been attributed, but erroneously, to Henry Carey, a musical composer and poet, who was an illegitimate son of Saville, marquis of Halifax. He put an end to his existence in 1744.

† An account of the national anthem, entitled, *God save the King*, with authorities, taken from Blon College library, the entered records of the merchant tailors' company, the old cheque book of his majesty's chapel, &c. Selected, edited, and arranged by Richard Clark, gent. of his majesty's Chapel, &c. London. 1822, 8vo. with plates and music.

1607. JOHN WREITTOUN, a printer of Edinburgh, printed an edition of Shakspeare's *Venus and Adonis*, which must be considered as an indubitable proof, that at a very early period the Scotch knew and admired the genius of that great poet. The following is its title-page.

"VENUS AND ADONIS.

Vilia miretur vulgus, mihi flavus Apollo,  
Pocula Castalia plena ministret aqua."

Beneath is a Phoenix in the midst of flames.

"Edinburgh. Printed by John Wreittoun, and are to bee sold in his Shop, a little beneath the Salt Trone. 1607."

1607. *The commendation of Cocks and Cock-fighting. Wherein is shewn that Cockfighting was before the coming of Christ. London, printed for Henrie Tomes, and are to be sold at his shop, over against Graies Inne Gate, in Holburne.*

This is in black letter, and I do not remember to have seen an earlier publication than this on the subject of this barbarous sport.—*Below.*

1608. JOHN FRANCKTON is first noticed as a printer in the city of Dublin, where in this year he executed the *Common Prayer, in Irish character*, folio, translated and printed at the expense of William archbishop of Tuam,\* and dedicated to sir Arthur Chichester, knight, lord deputy general. Though the book is dated 1608, the dedication is dated October 20, 1609.

It is said in the dedication, "Though this kingdom were sometimes called *Scotia*, that is, in Greek *darkness*—and now may justly recover the ancient title of *Scotia major*, (being in greater darkness) &c."

In 1615, a work on the *Reports of the Courts in Ireland*, was printed in Dublin for sir John Davies,† attorney-general in Ireland.

In 1617 John Franckton was printer to the king for Ireland, and printed in this year *A compendious collection, and breefe abstract of all the auncient English statutes, &c. Cum gratia et privilegio*. How long he continued to exercise the art, or when he died is unknown.

Bonham Norton and John Bill, were also printers to the king for Ireland, in 1618.

Felix Kingston was deputy printer to the king at Dublin, in 1619 and 1620.

The company of stationers of London were printers to the king's most excellent majesty at Dublin, who set forth John Franckton's right to print all manner of *Books, Statutes, Grammars, Almanacks, Acts of Parliament, Proclamations, Injunctions, Bibles, and Books of the New Testament*, forbidding all others of what nation soever, but him, Felix Kingston, and Thomas Downs. The prices of books, as settled by the assignees and patentees for the stationers' com-

\* William Daniel, or ð Donel, was born at Kilkenny, and was one of the first fellows of Trinity college, Dublin. He was consecrated archbishop of Tuam, in August, 1609. He was well acquainted with the Hebrew and Greek tongues, from the latter of which he translated the *New Testament*. He also translated the *Liturgy* out of English into Irish. He died at Tuam, July 11, 1628, and was buried in his cathedral.

† For an account of sir John Davies, see 1626, *post*.

pany, were about 25 per cent. more at Dublin than at London, occasioned by the expense of conveyance.

1608. RICHARD FIELD was esteemed a good printer, and most probably served his apprenticeship with T. Vautrollier, whose daughter Jakin he married January 13, 1588. After the death of his father-in-law, in 1589, he succeeded to his business, on the same premises in Black friars, and adopted the same sign and marks of the Anchor. How many works he printed, or when he died is not known. He was a native of Straford-upon-Avon, in Warwickshire.

1608. *A World of Wonders; or an introduction to a treatise touching the conformitie of ancient and modern wonders; or a preparative treatise to the Apologie for Herodotus. The Argument whereof is taken from the Apologie for Herodotus. Written in Latine by Henry Stephen, and continued here by the author himselfe. Translated out of the best corrected French copie.* Edinburgh: imprinted by Andro Hart and Richard Lawson. Folio.

Beloe, in the sixth volume of his *Anecdotes of Literature and Scarce Books*, p. 231-41, gives the whole of the whimsical verses, from p. 169 of this curious volume, of which, he says, there are two editions, the one printed at Edinburgh, which is classed among English books of rarity; the other at London;—and, he adds, “I am not acquainted with many books which are more replete both with curious anecdote and entertaining information, than the translation of the *Apologie for Herodotus*.”

1608. The second edition of the *Hungarian Bible* was printed at Hanau, a large town of Germany, seated at the junction of the Kinzig and Maine.

1608. *The Contention between Three Brethren, the Whoremonger, the Drunkard, and the Dice Player.* To approve which of these three is the worst by reason that their deceased father had given his succession from the worst of them. London, printed by Robert Raworth, for Henry Gosson, and are to be sold at the Tunn, in Paternoster-row. 1608.

1608. Mr. Cuthbert Burby gave £20 to the poor of the stationers' company.

1609. PIERRE MARCIGAY, a printer of St. Maloes, in Bretagne, in France, executed a very curious book containing a *sacred drama* in the Breton poetry: and it is the earliest specimen of St. Maloes printing which Dr. Cotton had met with. A copy in the Bodleian.

1609. *Silenced Ministers, To the Right High and Mightie Prince James, by the Grace of God, King of Great Britaine, &c. An Humble Supplication for Toleration, and liberty to enjoy and observe the Ordinances of Christ Jesus, &c. &c. By some of the late silenced and deprived ministers and people, &c. 4to.*

In 1606 an act was passed to punish with perpetual imprisonment, those who refused to

take the oath of allegiance. Besides the Puritans and Catholics, a few Unitarians were added to the objects of religious malevolence; but when three of this persuasion had suffered at the stake, the king thought it better policy to limit the punishment to perpetual captivity. On March 13, 1614, Bartholomew Legat was burnt for professing Arianism in London.

It has been nobly observed, “that to put men in prison merely on account of their religious belief or persuasion, is a great oppression; and, properly speaking, false imprisonment: to fine them, or take away their estates for that cause, is robbery: to put them to death for not acting against their conscience, is murder. ‘Can any thing be more wicked? Is it not then hard to determine whether the folly and absurdity, or tyranny and wickedness of persecution on account of religion are greater? That good was to mankind, or their benefit in this world, or the next, are the real motives to so unjust and cruel a practice is the highest degree of impudence to pretend; and certainly must be too gross a deceit to obtain any credit but with bigots or enthusiasts, fools or madmen. It being evident, then, that these are no other than pretended motives, what are the real? An inhuman temper, with a combination of the worst of men’s passions, particularly malice, envy, covetousness, pride, ambition, a desire to domineer and tyrannize over others; to which are sometimes added bigotry and enthusiasm; these are the real incentives to persecution, and, when joined to a large measure of hypocrisy, complete the character of a persecutor.”\*

“Experience,” says Turgot,† teaches that the sword, the fagot, exile, and proscription, are better calculated to irritate than to heal a disease, which, having its source in the mind, cannot be relieved by remedies that act only on the body. The most efficacious means are sound doctrines and repeated instructions, which make a ready impression when inculcated with mildness.—Every thing else bows to the sovereign authority of the magistrates and the prince; but religion alone is not to be commanded.” And who can reflect upon the past, and not exultingly exclaim with the brightest luminary of modern times,‡ that “the great truth has finally gone forth to the ends of the earth, THAT MAN SHALL NO MORE RENDER ACCOUNT TO MAN FOR HIS BELIEF, OVER WHICH HE HIMSELF HAS NO CONTROL.” This has been accomplished by the Press, the liberty of which is the true measure of the liberty of the people. “The one cannot be attacked without injury to the other. Our thoughts ought to be perfectly free; to bridle them, or stifle them in their sanctuary, is the crime of leze humanity. What can I call my own, if my thoughts are not mine.”§

\* *Considerations on War, &c.*

† Anne Robert James Turgot, born at Paris, May 10 1737, died March 18, 1781.

‡ Lord Brougham’s *Isaagural Discourse* at Glasgow.

§ Bartholomew Mercier born at Lyons, April 1, 1734 died May 13, 1799.

\* A copy of this curious work is in the possession of F. R. Atkinson, Esq., of Oak House, near Manchester.

1610. *Died*, JOHN MORET, the son-in-law, and successor of Christopher Plantin, in his printing establishment at Antwerp, and whose insigne and motto he adopted. Paul Peter, (upon what authority does not appear) tells us that Moret kept *forty-eight presses* in constant motion. He left two sons, Balthazar and John, who succeeded to his business.

"Notwithstanding so much may be alledged in favour of books of a small size, yet the scholars of a former age regarded them with contempt. Scaliger, says Baillet, cavils with Drusius for the smallness of his books; and John Moret, who was one of the greatest printers of his time, complaining to the learned Puteanus, who was considered as the rival of Lipsius, that his books were too small for sale, and that purchasers turned away, frightened at their diminutive size; Puteanus referred him to Plutarch, whose works consist of small treatises; but the printer took fire at the comparison, and turned him out of his shop, for his vanity at pretending that he wrote in any manner like Plutarch! a specimen this of the politeness and reverence of the early printers for their learned authors."—*D'Israeli*.

1610. At this early period the art of printing had found its way even to the secluded recesses of MOUNT LEBANON, in Syria, as we have undoubted evidence remaining in a book which has with difficulty found its way to Europe. Its title is thus given by De Murr, in his *Memorabilia bibliothecæ Norimbergensis*, tom. i. p. 379. *Psalterium Arabico-Syrum in Monte Libano a fratribus Meronitis impressum*, 1610, folio.—Masch, in his edition of Le Long, part II. vol. i. p. 67, and 121, furnishes a more ample account, from which it appears that the editors were Paschalis Eli and Joseph Ibn Amima, and that the work was printed *In incito et religioso monasterio Vallis Kuzaa in Monte Libani*. What monastery this is, and in what particular part situated, has not been satisfactorily determined: possibly it may be Canobin, a convent of the monks of St. Anthony, distant about twenty miles from Tripoli, in which the patriarch of the Maronites resides; or rather, says Dr. Cotton, Chsaya, one of the dependant convents situated in the vicinity of Canobin, which is mentioned in the following terms by the ill-fated Burckhardt,\* in his *Travels in Syria*: "Three hours distant from Canobin, at the convent Kashaya, which is near the village of Ehden, is a printing office, where *prayer books* in the Syriac language are printed." De Murr, speaking of the Nuremberg copy of this Psalter, calls it a *Phanix in Germany*: a second copy is to be found in the public library at Hemstätt; and a third copy is noticed by Schnurrer, in the possession of J. P. Bruns. Masch gives the title of another edition professing to be printed by these monks in the year 1585, taken from Assemani's catalogue of the Mediceo-Laurentian library; but perhaps

this may be nothing more than the above edition incorrectly described. And this conjecture is confirmed by the fact, that Jerome Dandini, an Italian jesuit, who was sent by the pope as his nuncio to the Maronites on Mount Libanus, where he assisted at two synods holden in the year 1596, deems it a fortunate circumstance, not only for themselves, but for the whole of Christendom, that the Maronites at that time possessed not the art of printing. But the good nuncio's alarm for the spreading of heterodox and pernicious books is well met and refuted by his translator father Simon, for which the reader may consult a work entitled, *Voyage du Mont Liban, traduit de l'Italien du R. P. J. Dandini, par R. S. P.* 12mo. Paris, 1675, pp. 95-305.

1610, April 18. *Died*, ROBERT PARSONS, or PERSONS, a celebrated English jesuit, who by his learning, his zeal, his activity, and his boldness in supporting the doctrines of the church of Rome, was the most noted, and the most formidable antagonist of the Protestant church.

He was born at Netherstowey, in Somersetshire, and was educated in the protestant faith; this, however, he quitted, and, retiring abroad, entered into the order of the jesuits, and was the first Englishman of that order that was ever sent into this country. No man could be a more implacable enemy to the principles of the reformation, and being as hostile to the civil as he was to the religious constitution of his native country, he did not startle at the practice of rebellion and treason, but was ardent in promoting the Spanish invasion. His most celebrated work was his *Conference about the Succession of the Crown of England*, which was published under the name of Duleman, and the obvious intention of which, was to support the title of the infanta of Spain, against that of king James, on the death of queen Elizabeth. In pursuit of this point, the author assumed a bold and manly turn of sentiment and reasoning, which, however malignant in its ultimate design, was capable of being applied to the most valuable and useful purposes. He made it his chief business, says Dr. Kippis, to prove, that there are better titles to royalty and government than that of lineal descent; and that the people, in certain cases, have a right to depose their princes, and to change the order of succession. Thus was a jesuit the disseminator of the grand principles of political liberty; and the disseminator of those principles which have since been maintained by our best writers,\* and converted to the suppression of tyranny, and to the establishment of our free

\* "Liberty is to the collective body what health is to every individual body. Without health, no pleasure can be tasted by man: without liberty, no happiness can be enjoyed by society."—*St. John, lord Basingbroke*.

"The liberty of a people consists in being governed by laws which they have made themselves, under whatsoever form it be of government; the liberty of a private man, in being master of his own time and actions, as far as may consist with the laws of God and his country."—*Abraham Cowley*.

"As all human things have an end, so that beautiful system of liberty, the British constitution, will perish, when the legislative power shall be more corrupted than the executive."—*Montesquieu*.

\* John Louis Burckhardt was by birth a Swiss, and employed by the African company of London, to make discoveries in the East, particularly Africa. He died at Cairo, April 1817, and was buried with great pomp.

constitution. It is no dishonour to embrace truth from whatever quarter it comes, or with whatever view it may originally have been advanced. Robert Parsons died at Rome, in the sixty-fifth year of age.

1610. THE DOUAY BIBLE PRINTED BY LAWRENCE KELLAM, in two volumes 4to. with the following title: *The Holie Bible faithfully translated into English, out of the authentick Latin, diligently conferred with the Hebrew, Greek, and other editions, in divers Languages. With Arguments of the Bookes and Chapters, Annotations. Tables, and other Helps for better understanding of the Text, for discoverie of Corruptions in some late Translations, and for clearing Controversies in Religion. By the English College of Douay. Printed by Lawrence Kellam.*

This translation was made by and under the superintendence of the same translators as the New Testament at Rheims, in 1592 (see page 370, ante.) In 1617, a convent of English Franciscan Recollects was established at Douay.

1610. ANDRO HART a printer at Edinburgh, published an edition of the Bible, with the following title: *The Bible, that is, the Holy Scriptures contained in the Olde and New Testament. Translated according to the Ebrew and Greeke, and conferred with the best translations in diverse languages: with most profitable annotations upon all hard places, and other things of great importance.* "Feare yee not, stand still, and beholde the salvation of the Lord, which he will shew to you this day. EXOD. xiv. 15." Then follows an engraving, representing the passage of the Red Sea, which is encompassed by this text, "Great are the troubles of the righteous; but the Lord delivered them out of them all. PSALM xxxiv. 19." Under the sculpture is the following text, "The Lord shall fight for you; therefore hold you your peace." At Edinburgh, printed by Andro Hart, and are to be sold at his buith, at the north side of the gate, a litle beneath the cross. Anno Dom. 1610.

*Cum Privilegio Regie Majestatis.*

Hart's Bible seems to contain the same prefatory matter as that of Bassendyne; with the addition of *An Almanack and Table for forty yeeres to come: [1610-1659.]* The old testament is obviously the general translation, which seems to have been printed, rather from Bassendyne's edition, than the Geneva edition. And it has the same arguments and marginal references, with some additional annotations. Hart's edition has sculptures throughout, representing scriptural countries, events, and things.

At the end of the Apocrypha, follows: *The New Testament of our Lord Jesus Christ, translated out of Greeke, by Theod. Beza. Whereunto are adjoyned briefe Summaries of Doctrine upon the Evangelists and Acts of the Apostles, by the said Theod. Beza. And also short Expositions on the Phrases and hard Places, taken out of the large Annotations of the foresaid author, and Joach. Camerarius, and P. Los. Valerius. Engliſhed by L. Thomſon. Together with the Anno-*

*tations of Fr. Junius, upon the Revelation of St. John.* At the end are two tables: the first, of the Interpretation of the proper names which are chiefly found in the *old testament*: the second table is, of the principal things that are contained in the Bible, after the order of the alphabet. Such is the *Old and New Testament* of Andro Hart, which is praised by Watson, in his curious account of the Scottish Printers, as well printed.

There was an Andro Hart, a bookbinder, at Edinburgh, at this time, of whom nothing is known except his having bound some books for James VI. In the account of the *Library of Mary queen of Scots and James VI.* 4to. is the following entry:

April, 1602. Item payit to Andro Hart Buik binder, for certane buikis quhilkis wer gevin to Mr. Adam Newtown for the Prince his use, as the said Mr Adamis ressait thairof product testifieis, xxxj li. ix s.

1610. DIED, GEORGE BISHOP, deputy printer to queen Elizabeth, and an alderman of the city of London. He married Mary, the daughter of John Cawood. He was master of the company in 1590, 1592, a part of 1593, 1600, 1602, and 1608. He gave, by his last will, two tenements called Newton, with the lands thereto belonging in the parish of Milbornstoke, Salop, for five hundred years, at the quit rent of a pepper-corn, to pay £6 a-year to Christ's Hospital; £6 yearly to the company; and also to pay £10 yearly among such preachers as come to preach at Paul's Cross, and who, in the judgment of the mayor and commonalty of London, are not sufficiently provided for; remainder to Christ's Hospital. On failure of issue by his daughter Martha, he leaves all his freeholds, Newton before-mentioned excepted, to the mayor, commonalty, and citizens of London, governors of Christ's Hospital, on condition of applying the rents to the following purposes: £60 a year to the maintaining three poor students in divinity; the first three to be chosen by the mayor, commonalty, and citizens of London; and next by the master, warden, commonalty of the stationers' company, and so for ever. In particular, Christ's church, Oxford; where his son died and was buried, to be chosen rather than any other, as often as vacancies of scholarships permit; and any poor kindred of his family to have the preference. This allowance to cease as soon as any student is beneficed, or dismissed for misconduct. One moiety of the residue of such rents to be applied to the relief of the poor children of Christ's hospital and the other to be paid to the master and wardens of the company of stationers. Provided that if in the judgment of the master, wardens, and assistants of the company in writing under their common seal, the mayor, commonalty, and citizens should be found to be remiss or negligent, in bestowing such rents according to the testator's intention, the bequest to them to be utterly void.

MRS. MARY BISHOP, wife of the above, gave, in 1608, to the stationers' company a table-cloth,

towel, and two dozen of napkins, wrought with white laid work; and by her will, in 1613, gave £10, four arras wrought cushions, a cupboard cloth, and two long flaxen table cloths of her own spinning.

1610, July 19. The first stone of that unrivalled repository, THE BODLEIAN LIBRARY, at Oxford, founded by sir Thomas Bodley,\* is placed with all the formalities on this day. By founding this magnificent library, sir Thomas Bodley has immortalized his name; for it now exceeds that of any university in Europe, and even those of all the sovereigns of Europe, except the emperors, at Vienna, and the French one, both of which were established one hundred years before.

Within whose silent chambers treasure lies  
Preserved from age to age; more precious far  
Than that accumulated store of gold  
The sultan hides against a day of need,  
These hoards of sweets you can unlock at will,  
And music waits upon your skilful touch.

The first catalogue of the printed books of the Bodleian was published in 4to. in 1605, by Dr. Thomas James. It was dedicated to Henry

\* Sir Thomas Bodley, from whom the above library takes its name, was the eldest son of Mr. John Bodley of Exeter, by Joan, daughter and heiress of Robert Home, Esq., of Ottery St. Mary. By his father's side he was descended from the ancient family of the Bodleys or Bodleighs of Dunscombe, near Crediton. He was born at Exeter, March 2d, 1541. On the accession of queen Mary, his father removed with his family to Geneva. The university of that city having been then recently erected, young Bodley, about twelve years of age, applied himself with diligence to the study of the learned languages, under the most celebrated professors. On the accession of queen Elizabeth, his father returned to England, and settled in London, when Thomas was sent to Magdalen college, Oxford. In 1576, he went abroad, and spent four years in France, Germany, and Italy. Upon his return, he applied himself to the study of history and politics. In 1586 he was made gentleman usher to queen Elizabeth, and from that time until 1597 he was employed in several embassies; when, disgusted with the intrigues of the court, he retired from public life, and, to use his own words, resolved to "set up his staff at the library door."

Being in the prime of life, and eminently qualified both by his learning and experience, he engaged in an employment, which, as Camden justly remarks, would have added glory to the character of a crowned head,—the restoration of the public library. Having announced to the university his design, and receiving assurances of thankful acquiescence, and cordial co-operation, he began by presenting a collection of volumes which he had purchased abroad, and which were valued at £10,000. His example and solicitations operated so powerfully, that contributions flowed in from various quarters, with a rapidity that rendered it speedily necessary to enlarge the building. On the 8th of November, 1603, the library was first opened; and in 1605, the bust of sir Thomas Bodley was placed in the library, by the earl of Dorset, chancellor of the university.

Besides giving his books, which he had collected at a great expense, sir Thomas Bodley left an estate, for salaries to officers, and to keep the library in repair. For the government of it, he drew up some statutes, which were confirmed in convocation, and which are preserved in the archives of the library. By these, the vice-chancellor, proctors, and the regius professors of divinity, law, medicine, Hebrew, and Greek, are appointed visitors and censors.

In 1583, Bodley married Anne, daughter of Mr. Carew, of Bristol, and widow of Mr. Ball, a lady, as Wood informs us, of considerable fortune. He died January 28, 1612, and was buried in the chapel of Merton college.

An annual speech in praise of sir Thomas Bodley, was founded in 1681, by Dr. John Morris, canon of Christ Church; the speaker to be nominated by the dean of Christ Church, and confirmed by the vice-chancellor. These speeches are delivered at the visitation-day of the library, November the 8th.

Prince of Wales; and the books were classed in four faculties, divinity, medicine, jurisprudence, and arts, completed by an index of author's names. Dr. James\* published a more extensive catalogue, in an alphabetical form, in 4to. Oxford, 1625. The curators have for many years published, or rather printed and distributed, and continue to print and distribute, annual alphabetical catalogues of its acquisitions in the department of printed books, for the information of the university.†

For full and accurate information of this magnificent library, see the *Reliquiæ Bodleianæ*, 8vo. London, 1703; Wood's account of Bodley's Library, *Hist. and Antig. of the University of Oxford*, 4to. 1790, vol. ii. p. 920-953; Chalmers' *History of the Colleges, Halls, and Public Buildings attached to the University of Oxford*, vol. ii. p. 458-464; *Oxford University and City Guide*, 8vo.; and the *Oxford University Calendar* for 1835.

When James I. first saw this library, and perceived the little chains by which the books were fastened, he expressed a wish, that if ever it should be his fate to be a prisoner; this library might be his prison, those books his fellow-prisoners, and those chains his fetters.

1610, Nov. 14. "Received from Oxen, by the delivery of Mr. Doctor Kinge, dean of Christ Church, the vice-chancellor of Oxen, under the university's seal, of an indenture for one book of every copy to be given to the public library at Oxen—that they appoint sir Thomas Bodley to receive the same."

This, on the face of it, appears to have been a private transaction between sir Thomas Bodley and the company of stationers; who in return for some favour done to them by his interests at court, complimented him with a voluntary gift, towards the furnishing of his new library at Oxford. From this foundation, however, arose those oppressive enactments which have since pressed so heavily on literature.

1610, Nov. 10. Died, RICHARD BANCROFT, archbishop of Canterbury. He was born in the county of Lancaster, and educated at Jesus college, Cambridge. He distinguished himself with so much learning against the Puritans, that in 1597 he was made bishop of London. He bore a principal part in the famous conference at Hampton court; and on the death of archbishop Whitgift in 1604, he was translated to Canter-

\* Thomas James was a learned divine, and the first appointed librarian to the Bodleian. He was born at Newport, in the Isle of Wight, became dean of Wells, and died at Oxford, 1632. He wrote several learned books, the chief of which is a *Treatise of the Corruption of the Scriptures, Councils, and Fathers*, &c. 1611. 4to. Reprinted in 8vo. 1638.

† How many volumes this inestimable collection contains is not exactly known, but it is immense, and the library is continually increasing by donations, by copies of every work printed in this country (by Act 34 Geo. III. ch. 154.) as well as by books purchased from the fund left by its founder, assisted by fees received at matriculation, and by an annual payment from all who have a right of admission to the library.

‡ Sir Thomas Bodley's original draft for the statutes of his library will be found in the *Reliquiæ Bodleianæ*.

bury, where he exerted himself with great vigilance in behalf of the Anglican church.

1610. GEORGE BISHOP printed the first edition in English of Camden's *Britannia*, which was translated by the indefatigable Philemon Holland,\* who was supposed to have been assisted by Camden himself. "Therefore," observes Mr. Gough, "great regard has been paid to his additions and explanations." On the completion of the work, Holland boasted that he had written a large folio volume with one pen, on which he composed the following stanza :

With one sole pen I wrote this book,  
Made of a grey goose-quill;  
A pen it was when I it took,  
And a pen I leave it still.

To the curious collector of books the following list of the early editions of Camden's *Britannia* may be acceptable, and depended upon as accurate :

1. 1566, printed by R. Newbery, 12mo.
2. 1567, " " R. Newbery, 12mo.
3. 1590, " " G. Bishop, 8vo.
4. 1594, " " G. Bishop, 4to.
5. 1600, " " G. Bishop, 4to.

This is the first edition of Camden which was published with maps.

6. 1607, printed by G. Bishop, folio.
7. 1610, " " G. Bishop, folio.

In 1617, a Latin abridgement by Lirizæus† was published in 12mo.; and a second edition appeared in 1639, in 12mo.

1611. THE PRESENT TRANSLATION OF THE BIBLE, published with the following title:—*The Holy Bible, conteyning the Old Testament and the New, newly translated out of the Originall Tongues, and with the former Translations diligently compared and revised by his Majesties speciall Commandement.*

Imprinted at London, by Robert Barker, Printer to the King's most excellent Majestie. 1611. Folio.

"The light of Divine truth, which, during the sixteenth century, had been diffusing its sacred influence through a great part of Europe, and dispelling the shades of superstition and ignorance, shone with peculiar lustre in the seventeenth century, and rendered it an age of profound biblical learning and labours. The Oriental languages were assiduously studied, biblical criticism engaged the talents and the pens of the most distinguished scholars, and the holy scriptures issued from the press in numerous versions, and in every variety of form, from the diminutive volumes of Stephens, Elzevir, and Bleau, to the ponderous tomes of the Polyglotts of Walton and Le Jay."<sup>†</sup>

Nothing can be more striking than the care which was taken by our learned ancestors to insure the accuracy of the translation of the bible, now in common use, at its last revision in

the reign of James I. It seems that at the conference held at Hampton Court, in January, 1603, before that monarch, between the Episcopalians and Puritans, Dr. John Reynolds, the speaker of the Puritans, requested of his majesty that a new translation of the bible might be made, alleging that those which had been allowed during former reigns were incorrect. To which motion, says Dr. William Barlow, dean of Chester, one of the assembly, "there was at the present no gainsaying, the only objections being trivial, and old, and already in print, often answered, only my lord of London, (Bancroft) well added, that if every man's humour should be followed, there would be no end of translating." His majesty, however, formed the resolution of causing a new and more faithful translation to be made, and commissioned for that purpose fifty-four of the most learned men in the universities and other places. At the same time he required the bishops to inform themselves of all the learned men within their several dioceses who had acquired especial skill in the Greek and Hebrew languages, and had taken great pains in their private studies of the scriptures, for the clearing up of obscurities either in the Greek or Hebrew, or for the correction of any mistakes in the former English translations, and to charge them to communicate their observations to the persons employed, so that the intended translation might have the keep and furtherance of all the principal learned men in the kingdom.

Before the work was begun seven of the persons nominated for it either were dead or declined to engage in the task; the remaining forty-seven were ranged under six divisions, and several parcels of the bible were assigned to them, according to the several places where they were to meet, confer, and consult together. Every one of the company was to translate the whole parcel; then they were each to compare their translations together; and when any company had finished their part, they were to communicate it to the other companies, that nothing might pass without the general consent. If any company, upon the review of the book so sent, doubted or differed upon any place, they were to note the place and send back their reasons for their disagreement. If they happened to differ about the amendments, the difference was to be referred to a general committee, consisting of the chief persons of each company at the end of the week. When any passage was found remarkably obscure, letters were to be directed by authority to any learned persons in the land for their judgment thereon.

The translation seems to have been begun in the spring of 1604, and it is said to have been retarded by the death of Mr. Edward Lively, whose active labours had materially assisted the work. When the translation was finished, three copies were sent to London; one from Cambridge, a second from Oxford, and a third from Westminster. Two from each company were then selected to review and polish the whole, Mr.

\* For an account of Philemon Holland, see 1636, post.  
† *Illustrations of Biblical Literature*, vol. iii. p. 285.

John Boyse and Mr. Andrew Downes, from Cambridge, with their fellow-labourers, met daily at stationers' hall, London. In nine months they completed their important task, and during that time received £30 weekly, from the company of stationers, having previously received nothing. Afterwards Dr. Bilson, and Dr. Miles Smith, again reviewed the whole, and prefixed arguments to the several books; and the latter was ordered to write the *preface*.\*

The highest eulogiums have been passed upon this version by the most competent critics, and learned men of every country.

\* Of the translators of this version no biographical account has been published; but the following brief sketches of the principal portion of the learned men who made this translation, will most probably be acceptable to the reader.

Lancelot Andrews was born at London, in 1553, and educated at Cambridge. By his unremitting attention to study, he rose to be one of the most learned men of the age in which he lived; so that Fuller, in his humorous way, says of him, "the world wanted learning to know how learned this man was." He was bishop of Chichester, in 1603; translated to Ely, 1609; and Winchester, in 1618. In the exercise of his episcopal dignity, he was the patron of learning; in his private character, generous and modest; and in his manner grave and sedate. He died September 25, 1656, in the 71st year of his age.

John Overall, styled by Camden a "prodigious learned man," was born in 1559, and educated at Cambridge. In 1604 he was made dean of St. Paul's, London; in 1614, bishop of Lichfield and Coventry; and in 1618, translated to Norwich, where he died May 13, 1619. His attainments were very high in theological learning, leaning towards Arminianism.

Adrian a Saravia, D.D., was a native of Artois, where he was born in 1521. In 1587 he came to England, and was appointed master of the free school at Southampton; and successively obtained prebends in the churches of Gloucester, Canterbury, and Westminster. He died at Canterbury in 1613, aged 82. His works were published in 1611, in one volume folio.

Richard Clarke, D.D., fellow of Christ college, Cambridge, and vicar of Minster and Monkton, in the Isle of Thanet. He died in 1634. A folio volume of his sermons was published in 1637.

John Layfield, D.D., fellow of Trinity college, Cambridge, and afterwards rector of St. Clement Danes, Westminster. He died at his rectory in 1617.

Robert Tighe, or Teigh, D.D., was born at Deeping, in Lincolnshire, and received his education partly at Oxford and partly at Cambridge. He was archdeacon of Middlesex, and rector of All-Hallows, Barking. He died in 1616. William Bedwell studied at Cambridge, and became vicar of Tottenham High cross, near London. He was esteemed the first Arabic scholar of his age, and at his death left many valuable manuscripts to the university of Cambridge, with numerous notes upon them, and a fount of types for printing them.

Edward Lively, fellow of Trinity college, Cambridge, and regius professor of Hebrew, was profoundly learned in the oriental languages, but died before the completion of the bible, May, 1603.

John Richardson, D.D., was born at Linton, in Cambridgeshire, and educated at Cambridge. He was master first of Peter House then of Trinity, and regius professor and vice-chancellor. Died (according to Fuller) in 1621, and was buried in Trinity college chapel.

Laurence Chaderton, D.D., was born at Chadderton, in Lancashire, in 1537, and having renounced the catholic faith he entered Christ college, Cambridge, which so enraged his father that he not only disinherited him, but as a mark of his great displeasure, "sent him a poke, with a great in it, to go a-begging." When sir Walter Mildmay founded Emmanuel college, he was appointed the first master; and, when from his great modesty, he objected to undertake the charge, sir Walter replied, "if you will not be the master, I will not be the founder of the college. In this office he continued thirty-eight years, and which he resigned to Dr. Preston in 1622, and died November 13, 1640, at the extraordinary age of 103 years!

John Rainolds, D.D., was born at Penhoe, near Exeter, in the year 1549, and educated at Oxford. In 1598, he was made dean of Lincoln, which he exchanged the following year, for the presidency of Corpus Christi col-

lege. Dr. Adam Clarke says, "those who have compared most of the European translations with the original, have not scrupled to say, that the English translation of the bible, made under the direction of James I. is the most accurate and faithful of the whole. Nor is this its only praise: *the translators have seized the very spirit and soul of the original, and expressed this almost every where with pathos and energy.* Besides, our translators have not only made a *standard translation*, but have made this translation the *standard of our language.*"

"Indeed," says Dr. Geddes, "if accuracy.

lege. "To name Rainolds," says Dr. Crackenthorpe. "is to commend virtue itself." He died May 21, 1607. We are told that he "was most prodigiously seen in all kinds of learning, most excellent in all tongues, a living library, and a third university." At first he was a zealous catholic, and his brother William a professed Protestant; but engaging in disputation, they are said to have converted each other to their respective creeds, William becoming an inveterate catholic, and John an avowed protestant; which occasioned a copy of verses, in Latin, concluding with the following distich.

"What was this? when conquered, both are glad,  
And either to have conquered other, sad."

Thomas Holland, D.D., was born at Ludlow, in Shropshire, in 1539, and educated at Oxford, where he was accounted "a prodigy in almost all kinds of literature." He was master of Exeter college, and died March 17, 1612, aged 73. He was buried in the chancel of St. Mary's church, Oxford.

Richard Kibbye, D.D., was born at Radcliffe, in Leicestershire, and educated at Oxford. He obtained a prebend in the cathedral church of Lincoln, and professor of Hebrew in the university of Oxford. He died November, 1620, and was buried in the college chancel of All Saints' church.

Miles Smith, D.D., was born in the city of Hereford, and educated at Oxford. For his services in the translation of the bible, he was rewarded by promotion to the see of Gloucester, to which he was consecrated September 20, 1612, and died in 1624. He wrote the *Translator's Preface* prefixed to our large bibles, the original of which is said to be preserved in the Bodleian library.

John Harmer, D.D., was born at Newbury, in Berkshire, and educated first at Winchester, and then at New college, Oxford, of which he became perpetual fellow in 1574. He was chief master of Winchester school for nine years, and warden of the college there seventeen. He died October 11, 1613.

Richard Brett, D.D., was born in London, and educated at Oxford. Anthony Wood says, "He was a person famous in his time for learning, as well as piety, skilled and versed to a criticism in the *Latin, Greek, Hebrew, Chaldaic, Arabic, and Ethiopic* tongues." In 1598, he obtained the rectory of Quainton, near Aylesbury, in Buckinghamshire. He died April 13, 1637, and was buried in the chancel of his church.

John Spencer, D.D., a native of Suffolk, was of Corpus Christi college, Oxford, and on the death of Rainolds, succeeded him as master of his college, and is said to have been "reverenced by all good men, for his knowledge, learning, and piety." He died April 3, 1614.

Andrew Downes, fellow of St. John's college, Cambridge, and King's Greek professor, was accounted one of the best scholars of his time. He died in 1625.

John Boyse, or Bois, was born at Nettlesend, in Suffolk, January 3, 1556, and educated at Cambridge. He was rector of Bosworth, in Cambridge, and a prebend of Ely. He died in 1643.

Thomas Revis, D.D., was born at Maldon, or Meadon, in Surrey, was first at Westminster, and afterwards of Christ church, Oxford. He was dean of Christ church and bishop of Gloucester, and died December 14, 1609.

George Abbot, D.D., was the son of a cloth-worker of Guildford, in Surrey, where he was born October 29, 1562. He was of Balliol college, Oxford, and became a popular preacher in the university. His church preferments were, dean of Winchester, March, 1599; vice-chancellor of Oxford in 1600, 1603, and 1605; bishop of Lichfield and Coventry, 1609; translated to London, 1610; and succeeded Bancroft to the archiepiscopal see of Canterbury, 1611. Though a zealous protestant, he boldly defended the rights

fidelity, and the strictest attention to the letter of the text, be supposed to constitute the qualities of an excellent version, this of all versions must, in general, be accounted the most excellent. Every sentence, every word, every syllable, every letter and point seem to have been weighed with the nicest exactitude, and expressed either in the text, or margin, with the greatest precision."

Some of the editions of this bible, especially the folio and quarto copies, were accompanied with *genealogies of scripture*, by John Speed. A patent was granted him by the king, for securing the property of this work to him and his heirs.

of the subject and liberty of conscience. He founded an hospital at Guildford, which he liberally endowed with £300 per annum, for the employment and maintenance of a certain number of indigent persons. He died at Croyden, August 5, 1633, at the age of 71; and was buried in the church of the Holy Trinity, at Guildford. He left several large sums to charitable purposes; beside considerable donations to the university of Oxford. His publications were chiefly, though not entirely, in divinity; his *History of the Massacre in the Valtoline*, was printed in the 3d volume of Fox's *Acts and Monuments*.

William Barlow, D.D., was born at Barlow, in Lancashire, became fellow of Trinity college, Cambridge; prebendary of Westminster; and in 1603 dean of Chester; in 1605 he was made bishop of Rochester, and in 1608 translated to the see of Lincoln. He died in 1613, and was buried at his palace at Bugden.

William Dakin, B.D., was educated at Westminster, and from thence he removed to Cambridge, and was admitted into Trinity college, May 8, 1587. On the 16th of March, 1599, he was chosen senior fellow. In 1603, he was Greek lecturer of his college; and in 1604, he succeeded Dr. Gray, as professor of divinity, in Gresham college, London. Mr. Dakin was also chosen junior dean of Trinity college, October 2, 1606; but dying in the February following, had not the happiness of seeing the great work completed in which he was engaged.

Giles Thompson, or Tomson, D.D., was born in London; and in 1571, was entered an exhibitor of University college. He became chaplain to queen Elizabeth, residentiary of Hereford, rector of Penbridge, in Herefordshire, dean of Windsor, registrar of the most noble order of the garter, and in 1611 was advanced to the see of Gloucester. He died in 1612, to the grief of those who knew and honoured his piety and learning.

Samuel Ward, D.D., was of a good family, and was born at Bishop's Middleton, in the bishopric of Durham. He was educated at Cambridge, and on January 5, 1609, was chosen master of Sidney Sussex college. He obtained many valuable preferments in the church; and in 1624 was rector of Moch-Munden, in Hertfordshire. He was one of the divines sent by James I. to the synod at Dort, in 1618. On the breaking out of the civil wars, he suffered severe persecution, was deprived of his mastership and professorship, and plundered and imprisoned, both in his own and St. John's college. He is said to have died in great want, September 7, 1643. He was buried in Sidney Sussex chapel.

Thomas Blisco, D.D., who assisted Dr. Miles Smith in the final revision of the Bible, was of German descent, from a family related to the duke of Bavaria; was a native of Winchester, where he received his education at Wykeham school. In 1563, he was admitted perpetual fellow of New college, Oxford. He so distinguished himself by his learning and talents, that he rose to be prebendary of Winchester, warden of the college there; and at length bishop of Worcester, in 1596, and in the following year translated to Winchester. Among other works, he published a *Survey of Christ's Sufferings and Descent into Hell*, which occasioned much debate. He died June 18, 1616, and was buried in Westminster abbey.

Roger Andrews, D.D., was brother to Lancelot Andrews, bishop of Winchester. He was fellow of Pembroke hall, and master of Jesus college, Cambridge. He was also prebendary of Chichester and Southwell.

Robert Spalding, D.D., was fellow of St. John's college, Cambridge, and king's professor of Hebrew.

Andrew Blag, or Byng, D.D., fellow of St. Peter's college, Cambridge, and king's professor of Hebrew, in that university. In May, 1609, he was collated to the sub-deanery of York; and in April, 1618, he was installed archdeacon of Norwich. He died during the Interregnum.

In the British museum there is another edition of this Bible, of the same date. They are word for word the same throughout. One copy, however, is printed in a larger letter than the other, and makes a thicker volume, but it is impossible to determine which of these two were first printed.

1611. VALENTINE SIMS, or SIMMES dwelt at the sign of the White Swan, near Barnard castle, in Addle, or Adling-street, from 1595, to this time.

1611. Conrad Vorstius, a professor of divinity at Leyden, published a work on the *Nature and Attributes of God*, on which, being presented to king James I. at London, his majesty ordered the book to be burnt by the common hangman, and also wrote an answer, called the *Declaration*, to which he added the following singular dedication to our Saviour:

"To the honour of our Lord and Saviour Jesus Christ, the eternal Son of the eternal Father, the only theanthropos, mediator and reconciler of mankind, in sign of thankfulness, his most humble and obliged servant, James by the grace of God, king of Great Britain, France, and Ireland, Defender of the Faith, doth dedicate and consecrate this his declaration." The Puritans arraigned this as indecency; and why not books to the sacred dead.

James not being satisfied with depressing the Catholics and Puritans at home, thus entered the lists of disputation with the Arminians and Gowerists. He attacked Bellarmine, the champion of the Catholics, and reminded him, "that, as king of England, he was defender of the faith, and that it consequently became his duty to remand all abominable doctrines to hell." He likewise remonstrated with the Dutch government, and the result was, that a synod was held at Dort, and seven hundred families of Arminians were driven into exile, and reduced to beggary. Vorstius himself was compelled to leave Leyden, and retired to Torringon, in Holstein, where he died, September 29, 1622. He was born at Cologne, July 19, 1569.

To the great astonishment of the whole world, be it told, that John Norton refused to print his majesty's (king James's) Latin work against Vorstius *without getting the money first!* Tempora mutantur. Lydiat tells the above story to archbishop Usher.

A Welsh bishop, who had written a work, made an apology to king James I. for preferring the Deity to his majesty in the dedication.

1611. In or about this year, the company of stationers thought proper to remove from their old hall to the situation they now occupy; and on the 11th of April in this year, the purchase of *Bergavenny house* was ordered to be paid for from the stock of the partners in the privilege. That house is thus described: "At the north end of Ave Mary-lane, is one great house, builded of stone and timber, of old time pertaining to John duke of Britaine, earl of Richmond, as appeareth by the records of Edward II. Since that, it was called *Pembroke Inne*, neere unto

Ludgate, as belonging to the earles of Pembroke in the times of Richard II. the eighteenth yeere, and of Henry VI. in the fourteenth yeere. It was afterwards called *Aburgavenny-house*, and belonged to Henry late lord *Aburgavenny*. But the worshipfull company of stationers have since that purchased it, and made it the hall for the meeting of the societie, converting the stone worke into a new faire frame of timber, and applying it to such serviceable use, as themselves have thought convenient for the amending it in some particulars in which it had been found defective."—*Stowe*, edition 1618, page 649.

"The preceding owners," Mr. Pennant says, "might boast of their nobility, their successors of their wealth, for the loss sustained by this company in the fire of London, lord Clarendon computed was not less than £200,000."

1611. The art of printing introduced into the town of Coire, an ancient town of Switzerland, capital of the county of the Grisons. The first work was an edition of *The Psalms of David* in verse, in the Romanesche dialect of the Grey League, executed in the year 1611, which is not only interesting as being the first portion of scripture, but as being the very first book printed in that dialect. Dr. Cox, in his *Travels in Switzerland*, relates that a typographical society had been established in Coire, for the publication of Latin, German, and Romanesche books. In the year 1718, a *Romanesche*, or *Grisson version of the Bible* was printed here, in two folio volumes, with a dedication to king George I. of England; a fine copy of which curious work may be seen in the Bodleian library. On the interesting subject of the variety of the Romanesche dialects, the reader will be gratified by the perusal of an able paper from the pen of Mr. Planta, which is published in the *Philosophical Transactions*, vol. lxxvi.

1611. NICHOLAS ZCHNIKER conducted the printing-press, erected in the religious house of the *Paraclete*, at Zittau, a town of Upper Lusatia. In 1608, this press, together with a great part of the town, was consumed by fire, but was re-established about three years afterwards.

1612, May. *A Remembrance of the Honours due to the Life and Death of Robert Earle of Salisbury, Lord Treasurer of England, &c.*

Imprinted at London, for John Wright, and are to be sold at his shop, neere Christ Church.

This is a tribute to the memory of Robert Cecil, earl of Salisbury, by Richard Johnson. It is partly in prose and partly in verse, and to which a portrait of the earl is prefixed.

Robert Cecil, earl of Salisbury, was the son of lord Burghley, and born June 1, 1560. The repeated disappointments which he encountered in his endeavours to supply the wants of the treasury, had a sad effect on his health. He tried the waters of Bath, but without receiving the desired benefit; and he expired at Marlborough, on his way back to town. Lord Bacon remarked of this nobleman, "that he was a more fit man to keep things from getting worse, but no very fit man to reduce things to be much better."

+ 1612. *Died*, JOHN NORTON, printer to queen Elizabeth, in Latin, Greek, and Hebrew, and an alderman of London. In 1593, he lived at the sign of the Queen's Arms, in the house formerly inhabited by his cousin Bonham Norton; and being a man of eminence, employed others to print for him. He was the first person who carried on printing in the college of Eton, (see page 449, ante.) He was master of the company of stationers in 1607, 1610, and 1612, the year in which he died. He gave £150 to the minister and churchwardens of the parish of St. Faith, to purchase, in fee-simple, lands, tenements, and hereditaments; from the produce of which, ten shillings to be annually paid for a sermon at St. Faith's, on Ash Wednesday; and, weekly, to twelve poor persons (six to be appointed by the company of stationers, and six by the parish) 2d. each, and a penny loaf, the *vantage loaf* (the thirteenth, allowed by the baker) to be the clerks; the residue of the revenue to arise by such purpose to be laid out in cakes, wine, and ale, for the company of stationers, either before or after the sermon.—He also gave to the company £1000 to be laid out in like manner, in fee-simple purchases; and the produce to be applied, by the master, wardens, and assistants, at their discretion, for the benefit of the poor members of the company. This benevolent testator's intentions are substantially fulfilled. The weekly pensions continue to be paid. The sermon is also annually preached; to which the livery at large are regularly invited; and every one who attends receives six buns. A guinea is presented to the preacher for his sermon, half a guinea to the reader, and 6s. to the sexton. The court of assistants dine together on that day, in commemoration of this bountiful benefactor; whose legacy was paid to the company by Bonham Norton, Esq. who was also an alderman, and master of the company in 1610, 1616, and 1619.

When Paul Stephens, the son of Henry, visited London, about the year 1594, he formed an intimacy with some of our best scholars, and contracted an intimate friendship with John Norton, then possessing in London the honourable distinction of "Regius in Latinis, Græcis, et Hebraicis Typographus," to whom Paul Stephens permitted the use of his family mark or symbol. This mark was first used by Norton in the year 1605.

1612. RALPH BLOWER printed a tract entitled, *The Court of Good Counsell*.

Wherein is set downe the true Rules how a Man should choose a good Wife from a bad, and a Woman a good Husband from a bad.

Wherein is also expressed the great care that Parents should have for the bestowing of their Children in marriage, and likewise how Children ought to behave themselves towards their Parents, and how Maisters ought to governe their Servants, and how Servants ought to be obedient towards their Maisters. Set forth as a patterne for all people to learne wit by. Published by one that hath dearely bought it by experience. At London. Printed by Ralph Blower, and

are to be sold by William Barley, at his shop, in Gracious Streete.\*

1612. Printing introduced into Presburg, the capital of Lower Hungary. Dr. Cotton says, "Probably this was the first town of the kingdom into which the art was introduced: nor did it make any extensive progress for many years afterwards; since so late as the year 1646, Christopher Ravius observed, 'in tota Hungaria vix tres sunt typographiæ.'"

1612. The college of Jesuits erected a press at Fleche, a town of France, in Anjou; and in the year 1638, one George Griveau designates himself "printer to the king, and to the Henrician college of Jesuits."

1613. THE PETRUSES were a celebrated family of printers at Basil, in Switzerland. There was ADAM the father, and HENRY and JEROM his sons. Henry again had a son of the name of SEBASTIAN. Adam had been a fellow-labourer with John Froben in the printing office of Nicolas Brylinger. Henry died in 1579, in his 71st year, and his epitaph is given in a note in the *Annal. Typog.* vol. iii. p. 220, and Sebastian his son published an edition of *Virgil* in this year. Their device was an allusion to their name—which is the Greek for a rock.

1613. DIED, RICHARD COLLINS, clerk of the stationers' company from 1578. He was succeeded in his office by Thomas Mountfort.

1613, April 13. *Strange News from Lancaster.* A pamphlet written by a reverend gentleman, containing an account of a *prodigious monster* that was born at Addlington, in Lancashire; with two bodies joined to one back.

1613. *The three sisters teares, shed at the late solemne funeral of Henry Prince of Wales.* By Richard Nichols. London, 1613, 4to. dedicated to lady Hay. The three sisters are Angela, (England.) Albana, (Scotland.) and Cambra, (Wales.) Richard Nicolls was "a poet of great elegance and imagination, and one of the ornaments of the reign of Elizabeth."—*Headley.*

Henry prince of Wales, was the eldest son of James I. whose premature death in his eighteenth year, was wept by all the Muses, and mourned by all the brave in Britain. At an early age he evinced a thoughtfulness of character, extraordinary in a child, and attracted the attention, and excited the hopes of those who were about his person. His bold and martial character was discoverable upon many occasions; and had he lived to govern these realms, the whole face of our history might have been changed, and the days of Agincourt and Cressy been revived, and Henry IX. had rivalled Henry V. This prince, though ambitious to wield the sword, did not neglect the pen; and the finest geniuses of the age addressed their works to him, and wrote several at his suggestion. Dallington, in the preface to his curious *Aphorisms, Civil and Militaire*, has described prince Henry's domestic

life: "Myself," says he, "the unabled of many in that academy, for so was his family, had this especial employment for his proper use, which he pleased favourably to entertain, and often to read over." He was born at the castle of Stirling, February, 1594, and died Nov. 6, 1612.\*

1614. *The Description of a Maske, presented in the Banqueting Roome at Whitehall, on Saint Stephen's Night last, at the Marriage of the Right Honourable the Earl of Somerset, and the Right Noble the Lady Frances Howard.* Written by Thomas Campion.

Whereunto are annexed divers choysse Ayres composed from this Maske, that may be sung with a single voyce, to the Lute or Base-Violl.

London: printed for Laurence Lisle, dwelling in Paules Church Yarde, at the signe of the Tyger's head.

The compositions called *Masques* were carried to their greatest perfection at this time, and the chief writers of these dramatic entertainments, were Ben Jonson and Samuel Daniels, though, perhaps none of them rivals the *Comus* of Milton. They were generally founded on some story from the Greek or Roman mythology; and, though therefore possessing little human interest, were so well set off by fine poetry, dresses, and machinery, that, during the reigns of James I. and Charles I. they formed a favourite amusement of the gay persons of the court, who were themselves the chief performers.

The following song is taken from *Luminalia, or the Festival of Light.* A *Masque*, presented at Court, on Shrove Tuesday night, 1637.

#### SONG OF NIGHT.

In wet and cloudy mists I slowly rise,  
As with mine owne dull weight oppress,  
To close with sleep the jealous lover's eyes,  
And give forsaken virgins rest.

Th' adven'turous merchant and the mariner,  
Whom storms all day vex in the deep,  
Beginne to trust the windees when I appeare,  
And lose their dangers in their sleep.

The studious that consume their brains and sight,  
In search where doubtful knowledge lies,  
Grow wearie of their fruitlesse use of light,  
And wish my shades to ease their eyes.

The ambitious toy ing statesman that prepares  
Great mischiefs ere the day begins,  
Nor measures day by houres, but by his cares,  
And night must intermit his sines.

Then why when my slow chariot used to cime,  
Did old mistaking sages weepe?  
As if my empire did usurpe their time,  
And houres were lost when spent in sleep.

I come to ease their labours, and prevent  
That wearinesse that would destroy;  
The profit of their toyles are still mispent,  
Till rest enables to enjoy.

1614. "In an unpublished letter of the times," says Mr. D'Israeli, "I find a cause in the star-chamber, respecting a play being acted at Christmas in this year, at the house of sir John Yorke; the consequences of which were heavy fines and

\* The reader will observe that what is now spelt Grace church-street, was at this time written Gracious-street. It was originally Grace-street, from a herb market there.

\* *The Life of Henry Prince of Wales, son of James I. compiled chiefly from his own papers, never before published.* By Thomas Birch, D.D., F.R.S. London, 1760. 8vo.

imprisonment. The letter-writer describes it as containing 'many foul passages to the vilifying of our religion and exacting of popery,' for which he and his lady, as principal procurers, were fined one thousand pounds a piece, and imprisoned in the tower for a year; two or three of his brothers at five hundred pounds a piece, and others in other sums."

1614. *Died*, ISAAC CASAUBAN, a learned divine and critic. He was born at Geneva, in the year 1559, and at the age of twenty-three was chosen professor of Greek in his native city. In 1586 he married a daughter of the second Henry Stephens the printer, by whom he had twenty children. On the death of Henry IV. king of France, (1610) he removed to England, when James I. settled a considerable pension upon him, besides giving him a prebendal stall in Westminster, and another in Canterbury. He was buried in Westminster abbey.

1614. In this year a poetical tract was published by an anonymous author, in the dedication to which he has comprehended the greatest number of persons by name in one dedication:

*The Martyrdome of Saint George of Cappadocia, titular patron of England, and of the most noble order of the Garter.* It is dedicated "to all the noble, honourable, and worthy in Great Brittain, bearing the name of George; and to all other, the true friends of Christian chivalrie, lovers of Saint George's name and virtues."

1614. The feasts of the stationers' company were restrained for six months, by order of the lord mayor.

1615. *Died*, ZACHARIAS PALTENIUS a very learned printer of Francfort on the Maine. His books occur with the following imprints:

Zacharias Palthenius LLD. in 1597.

Collegium Palthinorum in 1605—10.

Collegium Musarum Palthen in 1612-1614.

Officina Haredum Palthen 1616.

Hartmannus Palthenius in 1616-1622.

1615. WILLIAM STANSBY printed the following curious play, a copy of which is in the Garrick collection:

*Exchange Ware and the Second Hand, viz. Band, Ruffe, and Cuffe, lately cut, and now newly dearned up, or a Dialogue, acted in a shew in the famous universitie of Cambridge.* The second edition.

London. Printed by W. Stansby, for Myles Patrick, and are to be sold at his shop, neere Saint Dunstons Church Yard, in Fleet Street.

1616, Nov. *The just downfall of Ambition, Adultery, and Murder;* at the end of which are added, *Weston's and Mrs. Turner's last tears shed for the murder of sir Thomas Overbury, poisoned in the tower; who for the fact, suffered deserved execution at Tiburne, the 14th day of November last, 1615, 4to.* Fifteen leaves.

This tract relates to the death of sir Thomas Overbury, an author and a courtier of this reign. He assisted Robert Carr, earl of Somerset, in his amour with the countess of Essex, yet he opposed

his marriage with her, for which he incurred the hatred of both. On a frivolous charge he was sent to the tower, where by the contrivance of Somerset and his wife, he was poisoned on the 13th of September, 1613. Sir Thomas Overbury was born in Warwickshire, in 1531, and was educated at Queen's college, Oxford. He was the author of several pieces in verse and prose, which were reprinted in 1753, in 8vo.

Books are a part of man's prerogative,  
In formal ink they thoughts and voices hold,  
That we to them our solitude may give,  
And make time present travelled that of old.  
Our life, Fame pierceth at the end,  
And books if farther backward do extend.

1615, Nov. 6. The privilege of printing all bills for *fencing* was granted to Thomas Purfoot, by the company of stationers.

1616, Feb. 3. James I. by letters patent, dated this day, grants to Ben Jonson a yearly pension of one hundred marks during his life, "in consideration of the good and acceptable service heretofore done, and hereafter to be done by the said Ben Jonson." If the receipt of this royal favour was unconnected, as it appears to have been, with any arrangement in which Daniel was concerned, as poet laureat, we must doubt the fact of Jonson having succeeded that poet in the post. Indeed, it is generally understood that the commencement of the above pension is the first clear commencement of the post of laureat. Long before 1616, Ben Jonson had been fully engaged in the service of the court, which was indebted to him for some of the most beautiful masques in the English language. He had also shown his peculiar qualifications for the duty of a laureat, by flattering James as the best of both poets and kings.

1616. THOMAS DAWSON dwelt at the three Cranes, in the Vintry; put to the beginning of some of his books a pretty wooden cut, or device, of three cranes in a vineyard, and printed many works for others besides himself. He was in business for the space of twenty-two years, and executed about thirty-three works. In 1595 he printed *Seamens Secrets, divided into two parts; wherein is taught the three kinds of sailing, horizontal, paradozell, and sailing upon a great circle, &c.* by John Davis, of Sundridge, near Dartmouth, gentleman. 4to. In 1599 he printed *the life and deathe of Thomas Wolsey, cardinall; divided into three parts: his aspiring triumph and death.* By Thomas Storer, student of Christchurch, in Oxford. In verse. 4to.

Thomas Dawson was master of the stationers' company in 1615; and gave, July 12, 1616, "twenty shillings, towards making up the stairs in the garden, up to the city wall."

1616. *The Orthographiall Declaration: containing a brief advertisement of two new inventions called Lineage and Portage, whereby writing paper and parchment are decently ruled and inclined, for to grosse or write upon, after a more dexterous and beneficial manner than is done or performed by the ordinary way of hand-ruling with plummet, ruler, or brass pen.* Examples

*satisfactorie for Paper Books in quarto are annexed.* 1616. 4to.—See *Brydges's Censura Literaria*.

1618. It appears from the register of the stationers, that among others, the *Decameron* of "Mr. John Bocace Florentine" was revoked by a sudden inhibition of Abbot, archbishop of Canterbury. Caprice and ignorance, perhaps partiality, seem to have had some share in this business of licensing books.—*Warton*.

1618, March 9. *Died*, FRANCIS BEAUMONT, a poet and dramatic writer of some eminence. He was born in Leicestershire, and educated at Cambridge, from whence he removed to the Inner Temple. He was buried in Westminster abbey.

JOHN FLETCHER was the son of Richard Fletcher, bishop of London, who died June 15, 1596. He was born in 1576, received his education at Cambridge, died of the plague at London, August 29, 1625, and was buried in St. Saviour's church, Southwark. The principal piece of his own writing is a dramatic pastoral entitled the *Faithful Shepherdess*.

Beaumont and Fletcher agreed to write plays in company; and fifty-two dramatic compositions, tragic and comic, appear under their joint names, and only one or two out of that number are ascertained to have been written by either, without assistance with his coadjutor. It is understood, however, that Fletcher, notwithstanding his being the older man, was chiefly employed in the business of imagining and writing the plays, while Beaumont had the task of chastening down and regulating the exuberant fancy of his senior. The following extract relating to *books*, is taken from one of their plays.

Give me  
Leave to enjoy myself. That place that does  
Contain my books, the best companions, is  
To me a glorious court, where hourly I  
Converse with the old sages and philosophers;  
And sometimes for variety, I confer  
With kings and emperors, and weigh their counsels;  
Calling their victories, if unjustly got,  
Unto a strict account; and in my fancy,  
Deface their ill-placed statues. Can I then  
Part with such constant pleasures, to embrace  
Uncertain vanities? No; be it your care  
To augment a heap of wealth: it shall be mine  
To increase in knowledge.

1616, March 16. The company of stationers obtained a renewal of their charter for the sole printing of *Primers, Psalters*, both in metre and prose, with or without musical notes; *Almanacks*, &c. in the English tongue; and the *A. B. C.* with the *Little Catechism*, and the *Catechism in English and Latin*, &c. by Alexander Nowell.

1616. *Died*, LOUIS ELZEVIUS, of Leyden, in Holland, the founder of one of the most learned family of printers that ever adorned the republic of letters. Out of the twelve printers of this family, who exercised the art in this century, SEVEN have distinguished themselves by the number and beauty of their editions, viz.

LOUIS above named printed at Leyden, from 1595 to 1616. He was succeeded by

ISAAC, who exercised the art at Leyden from 1617 to 1628.

BONAVENTURE and ABRAHAM ELZEVIUS, brothers and partners, printed at Leyden, from 1626 to 1652, in which year they died. To them we owe the pretty 12mo editions of the *classics*, and the collection of authors who have written the histories of almost every state in the world, which collection is sometimes added to the collection of *classics*.

JOHN, the son of Abraham Elzevir, printed in partnership with Daniel, at Leyden, in 1662, 1623, and 1624, and afterwards *alone* from 1653 to 1661.

LOUIS II. (the son of Isaac) printed at Amsterdam, *alone*, from 1640 to 1655, and from that year in partnership with Daniel, until July 1662, when the former died.

DANIEL, the son of Bonaventure, having printed first at Leyden, in partnership with John from 1652 to 1654, and afterwards at Amsterdam in partnership with Louis from 1655 to 1662, continued to carry on business *alone* from the last mentioned year, until his death, September 13, 1689. His widow printed only a short time longer.

A catalogue of the Greek, Latin, and French authors, executed by this learned family of printers, in 12mo, is given by Mr. Horne, in his *Introduction to the Study of Bibliography*, p. lxxxii. appendix. M. Brunet has given a copious list of editions, printed in a small size by the Elzevirs. See his *Manuel du Libraire*, tom. iii. pp. 372-377.

The Elzevir editions have long and deservedly been esteemed for the clearness, delicacy, and perfect equality of the characters, for their close position together on a solid and very white paper, and the excellence of the press-work. Their Virgil, Terence, and Greek Testament, have been reckoned their master-pieces; and are indeed so very fine, that they justly gained them the reputation of being the first printers in Europe. Their types were so elegant, that their name has been given to all beautiful letter ever since. It would have been very wonderful, if the encouragement which the art of printing received from the great and learned should not have induced some persons, whose ignorance and avarice would not permit them to aim at that degree of perfection which they saw others arrive at, to engage in base methods of enjoying the fruits of their ingenuity and diligence, without the trouble of imitating them in their industry: for as soon as a curious, or reputed correct edition was published, with prodigious expense and labour, some of these rapacious characters immediately printed another after it; and carefully copying titles, and other distinctive marks, with a proper degree of accuracy, easily imposed their fictitious editions upon unwary but economical people for genuine copies. This shows the necessity also of accurate descriptions of scarce books, for fraudulent editions are of all countries; and none have experienced greater injury in this respect than the printers of pocket

classics. The Elzevirs, in particular, have suffered more by counterfeits than, perhaps, any other; for, as their books were not at first so plentifully circulated, as to satisfy the numerous purchasers, there were not wanting persons willing to purchase such surreptitious works; especially, when they were to be obtained below the common price.

1616, April 23. Died, WILLIAM SHAKSPEARE, or SHAKSPEERE, (for the floating orthography of the name is properly attached to the one or the other of these varieties) the pride and glory of the English nation, and whose fame is now the admiration of the civilized world:—

A creature such  
As, to seek through the regions of the earth  
For one his like, there would be something falling  
In him that should compare.—*Cymbeline*.

Biographical curiosity is a just and generous tribute to the memory of those mortals whom heaven has been pleased to endow with a larger portion of its own ethereal energy. If the favoured individual was conversant with courts; if he directed the movement of armies or of states; or if the powers of his mind were devoted to the silent pursuits of literature—to the converse of philosophy and the muse, dark must that age be that could withhold from him its admiration. It becomes then a subject of the deepest interest to inquire into the history of that man, the expansion of whose intellectual greatness has filled the eyes of the world; the bright track of whose genius indelibly remains, but the solitary trace of whose mortal footsteps is now obliterated for ever. Homer is now only a solitary name, of whom we actually know nothing; and we see only an arm of immense power thrust forth from a mass of impenetrable darkness, and holding up the hero of his song to the applauses of never-dying fame.

Little more than two centuries have elapsed since William Shakspeare conversed with our tongue, and trod the self-same soil with ourselves; and if it were not for the records kept by our church in its registers of births, marriages, and burials, we should at this moment be as personally ignorant of the "sweet swan of Avon" as we are of the old minstrel and rhapsodist Meles. That William Shakspeare was born in Stratford upon Avon; that he married and had three children; that he wrote a certain number of dramas; that he died before he had attained to old age, and was buried in his native town, are positively the only facts, in the personal history of this extraordinary man, of which we are certainly possessed; and, if we should be solicitous to fill up this bare and most unsatisfactory outline, we must have recourse to the vague reports of unsubstantial tradition, or to the still more shadowy inferences of lawless and vagabond conjecture. Of this remarkable ignorance of one of the most richly endowed with intellect of the human species, who ran his mortal race in our own country, and who stands separated from us by no very great intervention of time,

the causes may not be difficult to be ascertained. The history of William Shakspeare is a perfect blank till the occurrence of an event which drove him from his native town, and gave his wonderful intellect to break out in its full lustre on the world. That he became an actor and a writer of plays; in neither of which characters, however, he might excel in them, could he be lifted high in the estimation of his contemporaries. He was honoured, indeed, with the friendship of nobles, and the patronage of monarchs: his theatre was frequented by the wits of the metropolis; and he associated with the most intellectual of his times. But the spirit of the age was against him; and, in opposition to it, he could not become the subject of any general or comprehensive interest. The nation, in short, knew little, and cared less, about him. During his life, and for some years after his death, inferior dramatists outran him in the race of popularity; and then the flood of puritan fanaticism swept him and the stage together into temporary oblivion.

It would be especially gratifying to us to exhibit to our readers some portion at least of the personal history of this illustrious man during his long residence in the capital;—to announce the names and characters of his associates, a few of which only we can obtain from Fuller; to delineate his habits of life; to record his convivial wit, to commemorate the books which he read; and to number his compositions as they dropped in succession from his pen. But no power of this nature is indulged to us. All that active and efficient portion of his mortal existence, which constituted considerably more than a third part of it, is an unknown region, not to be penetrated by our most zealous and intelligent researchers.

He was born on the 23rd of April, 1564, in Henley-street, Stratford. His father was a considerable dealer in wool, and had filled the highest magisterial office of his native town;\* but having a large family, and his trade declining, he could give him but a scanty education. In 1582, before he had completed his eighteenth year, he married Ann Hathaway, the daughter, as Rowe informs us, of a substantial yeoman in the neighbourhood of Stratford. The bride was eight years older than the bridegroom. She remained in Stratford during the long abode of her husband in the metropolis, and at his death she is found only slightly mentioned in his will; little more is known respecting her than that, surviving her husband rather more than seven years, she was buried on the 8th day of August, 1623. By the Stratford register we can ascertain that his only son, Hamnet, was buried in the twelfth year of his age, on the 11th of August, 1596; and that, after an interval of

\* A grant or confirmation of 'arms' to John Shakspeare, the dramatist's father, 1596, viz. gold, on a bend sable, and a spear of the first, the point steeled, proper; and his crest, or cognizance, a falcon, his wings displayed, argent standing on a wreath of his collars supporting a spear gold steel as aforesaid, set upon a helmet with mantles and tassels.

nearly eleven years, his eldest daughter, Susanna, was married to John Hall, a physician, on the 5th of June, 1607. With the exception of two or three purchases made by him at Stratford, one of them being that of New Place, which he repaired and ornamented for his future residence, the two entries which we have now extracted from the register, are positively all that we can relate with confidence of our great poet and his family, during the long term of his connexion with the theatre and the metropolis. We may fairly conclude, indeed, that he was present at each of the domestic events recorded by the register: that he attended his son to the grave, and his daughter to the altar. We may believe also, from its great probability, even on the testimony of Aubrey, that he paid an annual visit to his native town; whence his family were never removed, and which he seems always to have contemplated as the resting place of his declining age.

It is well that we are better acquainted with the rectitude of his morals, than with the symmetry of his features. To the integrity of his heart; the gentleness and benignity of his manners, we have the positive testimony of Chettle and Ben Jonson. The latter, in his *Discoveries*, says, "I loved the man, and do honour his memory, on this side idolatry as much as any. He was, indeed, honest, of an open and free nature; had an excellent fancy, brave notions, and gentle expressions," &c. &c. The following lines are taken from a poem written by Jonson.

Sweet swan of Avon! what a sight it were,  
To see thee in our waters yet appear;  
And make those flights upon the banks of Thames,  
That so did take Eliza, and our James!  
But stay; I see thee in this hemisphere  
Advanced, and made a constellation there:—  
Shine forth, thou star of poets; and with rage,  
Or influence, child, or cheer, the drooping stage.

As we are not told the precise time when Shakspeare retired from the stage and the metropolis to enjoy the tranquillity of life in his native town, we cannot pretend to determine it. As he is said, however, to have passed some years in his establishment at New Place, we may conclude that his removal took place either in 1612 or in 1613, when he was yet in the vigour of life, being not more than forty-eight or forty-nine years old.

The amount of the fortune on which he retired from the busy world, has been the subject of some discussion. By Gibbon, who forbears to state his authority, this fortune is valued at £300 a year; and by Malone, who, calculating our poet's real property from authentic documents, assigns a random value to his personal, it is reduced to £200. Of these two valuations of Shakspeare's property, we conceive that Gibbon's approaches more nearly to the truth.

On the 2nd of February, 1615-16, he married his youngest daughter, Judith, then in the thirty-first year of her age, to Thomas Quiney, a vintner in Stratford; and on the 25th of the succeeding month he executed his will. He was then,

as it would appear, in the full vigour and enjoyment of life; and we are not informed that his constitution had been previously weakened by the attack of any malady. But his days, or rather his hours, were now all numbered; for he breathed his last on the 23rd of the ensuing April, on that anniversary of his birth which completed his fifty-second year.

On the 25th of April, 1616, two days after his decease, he was buried in the chancel of the church of Stratford; and at some period within the subsequent seven years (for in 1623 it is noticed in the verses of Leonard Digges) a monument was raised to his memory either by the respect of his townsmen, or by the piety of his relations. It represents the poet with a countenance of thought, resting on a cushion and in the act of writing. Immediately below the cushion is the following distich:—

Judicio Pyllum; genio Socratem; arte Maronem  
Terra tegit; populus moeret; Olympus habet.

On a tablet underneath are inscribed these lines:

Stay, passenger, why dost thou go so fast?  
Read, if thou canst, whom envious death has placed  
Within this monument—Shakspeare; with whom  
Quick nature died; whose name doth deck the tomb  
Far more than cost; since all that he has writ  
Leaves living art but page to serve his wit:

and the flat stone, covering the grave, holds out, in very irregular characters, a supplication to the reader, with the promise of a blessing and the menace of a curse:

Good friend! for Jesus' sake forbear  
To dig the dust enclosed here.  
Blest be the man that spares these stones,  
And curst be he that moves my bones.

The last of these inscriptions may have been written by Shakspeare himself under the apprehension of his bones being tumbled, with those of many of his townsmen, into the charnel-house of the parish.

Shakspeare differs essentially from all other writers; him we may profess rather to feel than to understand; and it is easier to say, on many occasions, that we are possessed by him, than that we possess him. And no wonder;—he scatters the seeds of things, the principles of character and action, with so cunning a hand, yet with so careless an air, and master of our feelings, submits himself so little to our judgment, that every thing seems superior. We discern not his course, we see no connexion of cause and effect, we are rapt in ignorant admiration, and claim no kindred with his abilities. All the incidents, all the parts, look like chance, whilst we feel and are sensible that the whole is design. His characters not only act and speak in strict conformity to nature, but in strict relation to us; just so much is shown as is requisite, just so much as is impressed; he commands every passage to our heads and to our hearts, and moulds us as he pleases, and that with so much ease, that he never betrays his exertions. He at once blends and distinguishes every thing; every

thing is complicated, every thing is plain; and it is really astonishing that a mere human being, a part of humanity only, should so perfectly comprehend the whole; and that he should possess such exquisite art, that whilst every child shall feel the whole effect, his learned editors and commentators should yet so very frequently mistake or seem ignorant of the cause. A sceptre or a straw are in his hands of equal efficacy; he needs no selection; he converts every thing into excellence; nothing is too great, nothing is too base. The chronicle, the novel, or the ballad; the king or the beggar, the hero, the madman, the sot, or the fool; it is all one;—nothing is worse, nothing is better; the same genius pervades, and is equally admirable in all. Or, is a character to be shown in progressive change, and the events of years to be comprised within the hour:—with what a magic hand does he prepare and scatter his spells! The glancings of his eye are from heaven to earth—from earth to heaven, we behold him breaking the barriers of imaginary method. In the same scene he descends from the meridian of noblest tragic sublimity to puns and quibbles, to the meanest merriment of a plebeian force. In the midst of his dignity, he resembles his own Richard II. the skipping king, who sometimes discarding the state of a monarch

Mingled his royalty with carping fools.

He seems not to have seen any impropriety in the most abrupt transactions from dukes to buffoons—from senators to sailors—from councillors to constables—and from kings to clowns. The laws of nature give way, and leave nothing in our minds but wildness and horror. No pause is allowed us for reflection: horrid sentiment, furious guilt and compunction, air-drawn daggers, murders, ghosts, and enchantment, shake and possess us wholly, whilst we, the fools of amazement, are insensible to the shifting of place and the lapse of time, and till the curtain drops, never once wake to the truth of things, or recognize the laws of existence.\*

1616, April 23. *Died*, MICHAEL CERVANTES, the author of the inimitable romance of *Don Quixote*.† He was born at Alcalá, Oct. 9, 1547, and died at Madrid on the same day that our Shakspeare breathed his last.

Dr. Johnson used to say, that there are few books of which one ever could possibly arrive at the last page; and that there never was any thing written by mere man that was wished longer by its readers, excepting *Don Quixote*, *Robinson Crusoe*, and the *Pilgrim's Progress*. "After

*Homer's Iliad*," he said, "the work of Cervantes was the greatest in the world, as a book of entertainment; and when we consider that every other author's admirers are confined to his countrymen, and perhaps to the literary classes among them; while *Don Quixote* is a sort of common property, a universal classic, equally enjoyed by the court and the cottage; equally applauded in France and England, as in Spain; quoted by every servant, the amusement of every age, from infancy to decrepitude; the first book you see in every shop where books are sold, through all the states of Italy;—who can refuse his consent to an avowal of the superiority of Cervantes to all modern writers? Shakspeare has, until within the last half-century, been worshipped at home; while translators and engravers live by the hero of *La Mancha* in every nation; and the walls of the miserable inns and the cottages, all over England, France, and Germany, are adorned with the exploits of *Don Quixote*."

1616. In this year was printed at Maillé, or Mailly, a town of France, in La Vendée, an edition of the *Universal history of the Sieur de Daubigné*, in two volumes folio, with the imprint *A Maillé par Jean Moussat imprimeur ordinaire du dit Sieur*. This edition is very rare, having been burnt by the hands of the common hangman at Paris, on account of some indiscreet disclosures, from which later editions are free.

1617. BARNARD ALSOP dwelt in Garter Place, in Barbican, where he printed in this year, the following tragi-comedy, a copy of which is in the Garrick collection. *A Looking Glass for London and England. Made by Thomas Lodge, Gent. and Robert Greene, In Artibus Magister*.

Thomas Lodge was a physician and poet, who died in 1625. Besides the above, he wrote the *Wounds of Civil War*, a tragedy. He also assisted Robert Green in writing some of his works.

1617. L. GRIFFIN printed the following work: *Muchief's mysterie; or, Treason's masterpiece; the Powder Plot, invented by hellish malice; prevented by heavenly mercy; truly related, and from the Latin of the learned and reverend Dr. Herring, translated and very much dilated by John Vicars. London, 1617. 4to.*

1617. PYRAMUS DE CANDOLE, a well-informed printer of the city of Geneva, taking disgust at his residence, quitted the city, and transported himself and his printing apparatus to Gerdun, or Iverdon, an ancient town of Switzerland, in the Pays de Vaud. A specimen of his printing is in the Bodleian.—*Cotton*.

1617, May 17. *Died*, JACOB AUGUSTUS DE THOU, the celebrated bibliographer and historian of France. His collection of books was formed with the greatest care and unbounded expense, with the advice of Scaliger, Casaubon, the brothers Du Puy, Salsmasius, Grotius, the brothers St. Martine, and Sirmond. The binding alone, Quessel and Morhof inform us, cost *twenty thousand crowns*. Anxious that posterity

\* For Shakspeare's plays, see 1623, post.

† *Cervantes, El Ingenioso Hidalgo Don Quixote de la Mancha*. 2 vols. Madrid, 1605 and 1615. A copy of this first edition of *Don Quixote* was sold at the splendid sale of Colonel Stanley, in April, 1813, for £42.

*Cervantes, El Ingenioso Hidalgo Don Quixote*, 4to., second edition, revised by Cervantes. Madrid, 1608. A copy at the above sale sold for £12 12s.

The curious bibliographer should possess both the first and second editions of *Don Quixote*, on account of the alterations made by Cervantes in the second.—*Horne*.

should enjoy the benefit of his valuable library, the collection of more than forty years, De Thou, by his will, forbade it to be sold, but he bequeathed it to his sons for their use, and that of the literary world. Accordingly, after his death, in 1617, during the minority of his children, as well as afterwards, additions continued to be made, until the death of James Augustus de Thou, his youngest son, in 1677; who dying greatly involved, this magnificent library was sold for payment of his debts. He had previously offered it for sale to the king of France for the use of the Dauphin, but his tender was declined. That the value of this collection has not been overrated, will be sufficiently evident, when it is known that the family of De Thou, as well as the curators of his library, proceeded to the expense of having one copy or more of every valuable work published in Europe, printed on particularly fine paper made for the purpose! And they sometimes selected the choicest leaves from two or three different copies or editions. It would seem that the president Ménars purchased this library for less money than the binding of the books had cost. Mr. Collinson, on the authority of Mr. Buckley, who published the splendid edition of De Thou's *Universal History*,\* says that the illustrious minister Colbert purchased the manuscripts, which in the year 1730, were bought and deposited in the king's library at Paris. Many of the splendid volumes of De Thou's library are to be found in the British museum, the royal library at Paris, and other great public libraries; where the richness of the binding easily point them out to the observant bibliographer.—*Horne*.

1618. *The Owles Almanake, prognosticating many strange accidents shall happen to this kingdom of Great Brittain this year.* London, 1618. 4to. With a wood cut.

A curious and humorous old pamphlet, in which every day of the month has its appropriate fortune annexed to it.—*Gifford*. Sold at the Gordonstoun sale for £3 10s.

1618, Oct. 29. Upon this day was beheaded, in Old Palace-yard, London, sir Walter Raleigh, of whom it is not too much to say, that he was the most eminent man of the age in which he lived; an age enlightened by his talents, and improved by his example. He was the fourth son of Walter Raleigh, esq., of Fardel, near Plymouth. He studied at Oriel college, Oxford, for a short time, but, when only seventeen, was one of a hundred gentlemen whom queen Elizabeth allowed to assist the protestants in France. He served afterwards in the Netherlands, under sir John Norris, in 1578; the next year he joined an unsuccessful expedition to America; and distinguished himself, in 1580, in Ireland. His introduction to Elizabeth has already been noticed at page 443 *ante*, and from that time he rose rapidly in her favour, and was enriched by her with places and lands. He availed himself

of his court favour to obtain letters patent for discovering unknown countries, and took possession of that part of America which is called Virginia, after the virgin queen.

Upon his return, he was returned to parliament for Devonshire, and soon afterwards knighted. He was also favoured by a licence to sell wine throughout the kingdom! He continued in favour, and engaged in various public employments, both civil and military, till 1593, when he justly offended the queen by an intrigue with the daughter of sir Nicholas Throgmorton. Both he and his partner in guilt were confined for several months, and, when set at liberty, forbidden the court. He married her, however, and lived with her afterwards in the strictest conjugal affection. The next year he was entirely restored to favour, and enriched by his royal mistress with the manor of Sherborne, that had been alienated from the church.

In 1597, his enterprising spirit was gratified by two expeditions to Guiana, the first of which was conducted by himself, and by his being employed at sea in active service against the Spaniards. On the fall of his rival, Essex, he disgraced himself by entreating sir Robert Cecil to show him no mercy. Though sir Robert took his advice, there was no sincere friendship between him and Raleigh: and on the accession of James, the latter was stripped of his preferments, and accused and condemned of high treason. After being kept for a month at Winchester, in daily expectation of death, he was reprieved and confined for some years in the Tower, where he composed many works. After twelve years' imprisonment, he received a commission from the king to explore the gold mines of Guiana. The expedition was unsuccessful; the Spanish monarch enraged, by the burning of a town; and, in spite of the just reasoning of Bacon, James had the meanness to have this great man executed in consequence of his former attainder. He entreated the spectators, that if any disability of voice or dejection of countenance should appear in him, they would impute it to the disorder of his body (he was suffering from the ague), rather than to any dismayedness of mind. He confessed his grievous offences, and begged the prayers of all who heard him. Having fingered the axe, he said, smiling, to the sheriff, "this is a sharp medicine, but it is a sound cure for all diseases." The executioner knelt down and asked him forgiveness, which Raleigh, laying his hand upon his shoulder, granted. Then being asked which way he would lay himself on the block, he answered, "so the heart be right, it is no matter which way the head lies." After a little pause, he lifted up his hand, and his head was struck off at two blows, his body never shrinking nor moving.

"Authors are perplexed," says Wood, "under what topic to place him; whether of statesman, seaman, soldier, chemist, or chronologer, for in all these he did excel; and it still remains a dispute whether the age he lived in was more obliged to his pen or his sword, the one being

\* See Notice of Samuel Buckley, Feb. 18, 1784, *post*.

busy in conquering the new, the other in so bravely describing the old world." A peninsula is too cheap to purchase the life of such another man. The mark of Raleigh will stand as a continent supported by opposite seas; for the wanton root of favouritism bursts into honour before the turbulent gust which swept him from the earth. Thomson thus speaks of Raleigh :

Who can speak  
The numerous worthies of the maiden reign ?  
In Raleigh mark their every glory mix'd;  
Raleigh, the scourge of Spain ! whose breast with all  
The sage, the patriot, and the hero burn'd.  
Nor sunk his vigour, when a coward-reign  
The warrior fetter'd, and at last resign'd  
To glut the vengeance of a vanquish'd foe.  
The active still and unrestrain'd, his mind  
Explor'd the vast extent of ages past,  
And with his prison-hours enrich'd the world;  
But found no times, in all the long research,  
So glorious, or so base, as those he proved,  
In those he conquer'd, and in those he hid.

It is peculiar to the fate of Raleigh, that having before suffered a long imprisonment with the expectation of a public death, his mind had been accustomed to its contemplation, and often dwelt on the event which was now passing. The soul, in its sudden departure, and its future state, is often the subject of his few poems. The following beautiful song called the *Farewell*, is attributed to Raleigh :

Go, soul ! the body's guest,  
Upon a thankless errand,  
Fear not to touch the best,  
The truth shall be thy warrant ;  
Go, since I needs must die,  
And give the world the lie !  
  
Tell zeal it lacks devotion,  
Tell love it is but lust,  
Tell time it is but motion,  
Tell flesh it is but dust ;  
And wish them not reply,  
For thou must give the lie !  
  
Tell fortune of her blindness,  
Tell nature of decay,  
Tell friendship of unkindness,  
Tell justice of delay ;  
And if they will reply,  
Then give them ALL the lie !  
  
And when thou hast, as I  
Commanded thee, done blabbing,  
Although to give the lie  
Deserves no less than stabbing ;  
Yet stab at thee who will,  
No stab the soul can kill !

Sir Walter Raleigh's unfinished *History of the World*, which leaves us to regret that later ages had not been celebrated by his sublime eloquence, was the fruits of eleven years of imprisonment. It was written for the use of prince Henry, as he and Dallington, who also wrote *Aphorisms* for the same prince, have told us; the prince looked over the manuscript. Of Raleigh it is observed, to employ the language of Hume, "they were struck with the extensive genius of the man, who, being educated amidst naval and military enterprises, had surpassed, in the pursuits of literature, even those of the most recluse and sedentary lives: and they admired his unbroken magnanimity, which at his age, and under his circumstances, could engage him to undertake and execute so great a work as his *History of the World*." He was, however, as-

sisted in this great work by the learning of several eminent persons; a circumstance which has not been noticed.

The scenes in which illustrious men have been found to enjoy the pleasures of retirement and reflection, must be dear to every heart; so the name of Sherborne Lodge, in Dorsetshire, is consecrated by the name of Raleigh, the grove which he planted, and the walk which he formed, still bear his name.

1619. *Died*, SAMUEL DANIEL, a poet and historian, who succeeded Spencer in the office of laureat. He was born in Somersetshire, in the year 1562, and educated at Magdalen college, Oxford; on leaving which he became groom of the privy chamber to Anne of Denmark, the queen of James I. He seems to have passed his days under the protection of royal and noble personages, and distinguished himself as a writer of *masques*; the poems, however, were in general so applicable only to the persons and circumstances of his own age, that they have fallen almost entirely out of notice; yet he wrote in a style rather in advance of his time, and in some of his pieces rises to a high degree of excellence. His address to the countess of Cumberland, to whom he had been tutor, is still ranked among the finest effusions of meditative thought in the English language. His noble patroness erected a monument to his memory in the church of Beckington, near Philips Norton, in Somersetshire. His poems were collected and printed in two volumes, 12mo. 1718. He wrote the *History of England*, to the end of the reign of Edward III.

1619. The company of stationers' was ordered to attend in their stand in due form, on the king going to hear a sermon in St. Paul's cathedral.

1620. JOHN TAUNDELL dwelt at the sign of the Nobody, in Barbican, and in this year printed the following curious work :

*Westward for Smelts, or the Watermans Fare of mad merry Western Wenches, whose tongues albeit like Bell-Clappers, they never leave ringing. Yet their Tales are sweet, and will much content you.* Written by Kindo Kit, of Kingston.

This is a work of facetious and whimsical tales, related by different fishwomen; viz. The Fishwives Tale of Brainford (Brentford.) The Fishwives Tale of Standon on the Greene. The Fishwives Tale of Richmond. The Fishwives Tale of Twitnam (Twickenham.) The Fishwives Tale of Kingston: and the Fishwives Tale of Hempton.

1620. In this year was published at Prague, the *Bohemian Chronicle* of Dalemile, one of the oldest poets and historians of Bohemia. The work is curious and valuable, not only on account of the fidelity with which the author has related facts, but also as being the earliest written monument existing, of the language and literature of the Slavonian Bohemians. It is in verse, and extends from the birth of Christ to the year 1314. He was a native of Mezrig, and canon of the collegiate church of St. Bokeslane.

1620. In this year WILLIAM JANSON BLAEU, a printer at Amsterdam, made considerable improvements in the printing press, and succeeded so much to his expectation, that he caused nine presses to be made, which he named after the nine muses. The excellence of the improvements soon became known to other printing offices, which induced their proprietors to follow Blaeu's example; so that presses of his construction became, in the course of a few years, almost general throughout the low countries, and from thence, notwithstanding the opposition of the ignorant, were introduced into England.

This ingenious artist was famous for his astronomical and geometrical productions. In the early part of his life he was brought up to joinery, in which employment he served an apprenticeship. Being of an inquisitive disposition, he rambled to Denmark, about the time the famous Tycho Brahe established his astronomical observatory, by whom he was entertained, and under whose instruction he was employed in making mathematical instruments, which curious art he greatly improved; and it was generally reported that all or most of the sidereal observations published in Tycho's name were made by Blaeu, as well as the instrument.

Before these observations were published to the world; Tycho, to gratify Blaeu, gave him the copies of them, with which he went to Amsterdam, and there practised the making of globes according to those observations. As his trade increased, he found it necessary to deal in geographical maps and books, and became so particularly curious in his plates, that many of the best globes and maps were made by himself; and by his frequent connexion with the printing of books, got so good an insight into the practical part of the art, that he set up a printing office; he here soon found the inconveniences attending the structure of the old presses, which induced him to contrive remedies. He was born at Amsterdam in 1571, and died in 1638.

JOHN JANSON BLAEU, son of the above, was also a printer at Amsterdam, and produced a great many classics, which yield in beauty and correctness only to the Elzevirs.

The liberal policy of queen Christina of Sweden introduced into Stockholm one of the family of Blaeus, of Amsterdam, as a printer, to whom she allowed an annual pension, and granted several privileges, amongst which was the valuable one of importing all his paper duty free.

1620. THOMAS ADAMS gave to the stationers' company £100 towards defraying the public charges of the company, at the discretion of the court.

1620. LORD BAACON published his celebrated work, *Novum Organon Scientiarum*; or, *New Method of Studying the Sciences*. London, folio.

In this great work, Lord Bacon taught the proper method of studying the sciences: that is, he pointed out the way in which we should begin and carry on our pursuit of knowledge, in order to arrive at truth. He gave a set of rules by which mankind might deliver them-

selves from slavery to names, and from wandering fanciful systems, and return once more, as little children, to the school of nature. The task he chose was far more useful to the world, and honourable to himself, than that of being, like Plato or Aristotle, the author of a new sect: he undertook to expose the errors of those who had gone before him, and to show the best way of avoiding them for the future: he had the principal share in pulling down the old building of a false philosophy, and, with the skill of a superior architect, he laid the foundation, and sketched the plan of another fabric; and gave masterly directions to those who should come after him—how, upon the ruins of the first, the temple of science must be erected anew. As, in a great army, there are some whose office it is to construct bridges, to cut paths along mountains, and to remove various impediments, so lord Bacon may be said to have cleared the way to knowledge; to have marked out the road to truth; and to have left future travellers little else to do than to follow his instructions: he was the miner and sapper of philosophy, the pioneer of nature; and he eminently promoted the dominion of man over the material world. He was the priest of nature's mysteries; and he taught men in what manner they might discover her profoundest secrets, and interpret those laws which nature has received from the great Author of all. In the *Novum Organum*, we find the principles of that improved method of conducting the inquiries of science, which has now so long and so happily prevailed. But to understand the benefits which this great philosopher has conferred upon us, we must carry our minds back to that state in which Bacon found the world, as to knowledge and science, at the time when he flourished. For as the returning light appears more glorious after the sun has been eclipsed—and the order and beauty of nature would look doubly striking to an eye that had seen that chaos from which she first arose, when all was without form and void,—so, if we glance, but for a moment, at that darkness which so long overshadowed the human mind, and gave birth to so many phantoms and prodigies, under the name of science, this retrospect will serve to show more clearly the merits of a philosopher, who may be regarded as the morning star of that illustrious day which has since broken out upon mankind; and in the spirit of whose method, even the immortal Newton himself explored to the heavens—by the aid of a sublime geometry, as with the rod of an enchanter, dashed in pieces all the cycles, epicycles, and crystal orbs of a visionary antiquity; and established the true Copernican doctrine of astronomy on the solid basis of a most rigid and infallible demonstration.

In several of the fine arts, in which chiefly the taste and imagination are concerned, such as poetry, rhetoric, statuary, and architecture, the ancients, according to general opinion, have equalled, if not surpassed, any of the moderns. Homer and Demosthenes continue, notwithstanding

ing the flux of time, to retain their station as the masters of eloquence and song; and those exquisite statues, the Venus and the Apollo, still command our admiration as perfect models of what is chaste, and severe, and beautiful in the art of sculpture. The ancients nobly distinguished themselves also in those more rigorous exercises of the understanding which are demanded by pure mathematics; in proof of which it is sufficient to quote the name of Euclid, and of Archimedes whose discoveries in geometry and mixed science entitle him to be regarded as the Newton of all antiquity; but it was reserved for the moderns to invent a *calculus*—a new and more profound arithmetic, which was called for by a more exact acquaintance with nature herself, and was to be applied to that more improved state of natural science which is peculiar to later times: we allude to the doctrine of *fluxions*, or the *differential* method of Newton and Leibnitz; since cultivated, and applied to physical astronomy with great success by the French, and especially by La Place.

One instance, out of many, in natural science, may suffice to convince the reader to what absurd and extravagant notions the mind can reconcile itself, when once permitted to rove into the regions of imagination, unrestrained by that strict and scientific method, so successfully pointed out by lord Bacon. Cosmas Indopleustes, who lived so late as the sixth century, affirmed that the earth was an oblong plane, surrounded by an impassable ocean; an immense mountain in the form of a cone, or sugar-loaf, placed in the north, was the centre around which the sun, moon, and stars daily revolved: the shape of this mountain, and the slanting motion of the sun, accounted for the variable length of the days, and the changes of the seasons. The heavens were supposed to be an immense arch, one side of which rested on the earth, and the other on two mighty pillars beyond the sea; under this vault a multitude of angelic beings were employed in guiding the motion of the stars. Such was the theory which gravely presented itself for adoption, seven or eight centuries later in the world than Euclid, Archimedes, and Apollonius!

Aristotle was the founder of the *Peripatetic*\* school, the philosophy of which held the minds of men in a kind of intellectual bondage for about two thousand years.

Up to the time of lord Bacon, Aristotle still maintained, in a very great degree, his dominion in the realms of philosophy—a dominion which, at some periods, had been scarcely less absolute over the minds of men, and far wider and more lasting than ever his renowned pupil Alexander was able to secure over their bodies. Aristotle's works were the great text-book of knowledge,

and his logic was the only weapon of truth. Men's minds, instead of simply studying nature, were in an endless ferment about occult qualities and imaginary essences; little was talked of but *intention* and *remission*, *proportion* and *degree*, *infinity*, *formality*, *quiddity*, *individuality*, and innumerable other abstract notions. The Latin tongue, which was employed by these scholastics, was converted into a barbarous jargon, which a Roman would not have understood; and, in the end, the most sectarian bitterness was produced, sometimes ending in bloody contests. The rage for disputation which now began to prevail, in consequence of the spread of this philosophy, induced the council of Lateran, under pope Innocent III., to proclaim a prohibition of the use of the physics and metaphysics of Aristotle; but awful as were then the thunders of the Vatican, they were not mighty enough to dethrone him from that despotism over men's minds, which, by long custom, had now rendered itself almost omnipotent. In England, his doctrines were cherished with as great an eagerness as elsewhere. From about the end of the twelfth century the very name of Aristotle operated like a charm; his writings had obtained universal circulation, and in some of the universities of Europe, statutes were framed which required the professors to promise, on oath, that in their public lectures on philosophy they would follow no other guide!

From this period till the close of the sixteenth century, though the authority of Aristotle still continued in the schools, the minds of men were gradually preparing to shake off his yoke, and a more propitious era was fast approaching. The revival of learning in the fifteenth century, the invention of the art of printing, and the Reformation, had done much to prepare the world for that new light which was afterwards to be cast over the fields of science, hitherto covered with darkness, and peopled only with airy and delusive phantoms. In opposition to the system that was held by Aristotle and his followers, which made the earth the centre of the universe, Copernicus had revived the ancient Pythagorean doctrine of the earth's motion round the sun, and had discovered the true theory of the planets. Galileo, Kepler, Gassendi, and others, who lived at the same time with Bacon, were acquiring a well earned fame by their improvements in geometry and physics; and the whole world of science already sighed to be redeemed from the darkness of the middle ages, and the bondage of the schools.

It was reserved, however, for Francis Bacon, lord Verulam, to break the spell of the mighty enchanter of Stagira, and to give a final blow to the scholastic philosophy;—to make one grand and general attempt to deliver men's minds from the bondage of two thousand years;—to assert the right of that reason with which the beneficent Creator has endowed man, as above all authority merely human;—and to sketch the outline of one grand and comprehensive plan, that should include in it the endless varieties of

\* A word signifying to walk about, because it was customary for the disciples to study and dispute as they walked in the *Lyceum*, a place of Athens, which was appropriated to their use.

our knowledge, and guide our inquiries in every branch. And this great philosopher has well merited the appellations he has received—the Prophet of the Arts, and the Father of Experimental Philosophy.

Bacon laid the foundation of an encyclopædia\* full of the most profound inquiries, and boldest anticipations which his own age was not capable of understanding. Since the time of Bacon, a multitude of encyclopædias have appeared, but none of them have his purely scientific design, and all relate either to the instruction of the young and uninformed, or are intended as books of reference for the deeply learned.

The honour of undertaking encyclopædias on a regular plan belongs to the middle ages, which, with iron industry, produced not only a large number of encyclopædias of particular sciences, called *Summe* or *Specula*, but also a *Universal Encyclopædia*, such as had never been seen before. The first person who conceived the idea of an encyclopædia or universal dictionary, was Andrew Matthew Acquaviva, duke of Altri and prince of Teramo, in the kingdom of Naples. He was one of the greatest luminaries of the age in which he lived. He published a work under that title in two volumes folio, which though scanty and defective, was sufficient to give some hints for conducting a compilation of that kind. He died in the year 1528.

In the seventeenth century, the works, by no means without value, of Matthius Martinus, professor and rector in the gymnasium of Bremen (*Idea methodica et brevis Encyclopædia sive adumbratio Universitatis*, Herborn, 1606), and of John Henry Alstead (*Encyclopædia vii Tomis distincta*, Herborn, 1620, 2 vols. folio), were followed by those of the illustrious Bacon.

1621, Jan. 5. PAUL VAN SOMER, an artist of great merit, was born at Antwerp, in 1576, and died in London. He was the first of those artists who, after the accession of James I. arrived in England, and practised a skilful management of the chiaro-scuro. His portraits were admired for great elegance of attitude, and remarkable resemblance. His pencil was chiefly employed on portraits of royal, noble, and eminent personages.

1621. CRISPIN VAN PAS, PASSE, or PASSE, a celebrated engraver of Utrecht, resided in England, at this time. He published Holland's *Herologia*, and a treatise *Dell' Arte di Disegnare e di Pingere*, in 1643. He engraved the plates for Withers's *Emblems*, 1615. Magdalen his daughter, William his son, and Simon of the same family, were all engravers. Magda-

len engraved Katherine, duchess of Buckingham. William engraved the family of king James I., the king and queen of Bohemia, and their children, 1621, and some single portraits. Simon settled in Denmark, after having spent two years in England; he engraved counters of the English royal family; Liberum Belgium, and a great number of portraits. There was also a younger Crispin.

1621. Printing introduced into ABERDEEN, a town of Scotland, well known for its university, which was founded about 1494. The circumstances attending the introduction of the art of printing into this town are here given from the *Annals of Aberdeen*, by W. Kennedy, in two volumes quarto, 1818. "In the year 1621, a patent was obtained from king James, by bishop Patrick Forbes and sir Paul Menzies of Kilmundie, provost of Aberdeen, for establishing printing at Aberdeen: and Mr. Raban was accordingly appointed soon after, by the magistrates and council, printer to the town and university; with the exclusive privilege of printing. He was allowed a salary of £40 annually: and for his further encouragement to prosecute the art, a small emolument of eight-pence quarterly from each scholar at the grammar-school, which was collected with the school-fees.

"He had acquired the reputation of being at the time a very eminent master; which indeed appears from the specimens of his works. Among these may be mentioned a pocket *Prayer book for the service of the Church*, printed in the year 1625, with the Calendar and the Psalms set to music, which we believe was among the first of his works."

In 1623, Mr. Raban printed *A brief Chronicle of all the Kings of Scotland; declaring in what year of the world, and of Christ, they began to reign, how long they reigned, of what qualities they were, and how they died*. Printed for David Melvill. 8vo. pp. 41. Reprinted in the third volume of the *Harleian Miscellany*.

"In the year 1633, Dr. Barron printed his book *On the arrival of King Charles in Scotland, with Poems on the Coronation*; which was dedicated to the magistrates and council. In 1636 a volume of *The Funerals of a right reverend Father in God, Patrick Forbes, of Corse, Bishop of Aberdeen*, and the Canons and Constitutions of the Church were printed there in the same year.

"Mr. Raban carried on the printing business until the year 1649, when he died, and was succeeded in his office of printer to the town and university by James Brown, son of William Brown, minister of Inverochty."

1621. *Anatomy of Melancholy*. By Democritus Junior. Oxford. Folio. London, 1652.

This is the celebrated work of Robert Burton, and presents, in quaint language, and with many shrewd and amusing observations, a full view of all the kinds of that disease. It was so successful at first, that the publisher realized a fortune by it; and Warton says, that "the author's variety of learning, his quotations from scarce

\* The word *Encyclopædia* or *Cyclopædia* is formed from the Greek, but not a native compound of that language, originally denoted the whole circle of the various branches of knowledge which were comprehended by the ancients in a liberal education. At a later period, the word was applied to every systematic view, either of the whole extent of human knowledge (universal encyclopædia), or of particular departments of it (particular or partial encyclopædia). The spirit of compiling, which prevailed in the Alexandrian school, soon led to attempts remotely allied to this, and Varro and Pliny the Elder, among the Romans, composed works of a similar kind.

and curious books, his pedantry, sparkling with rude wit and shapeless elegance, miscellaneous matter, intermixture of agreeable tales and illustrations, and perhaps, above all, the singularities of his feelings, clothed with an uncommon quaintness of style, have contributed to render it, even to modern readers, a valuable repository of amusement and information." Burton classes the pleasures of study among those exercises or recreations of the mind which pass *within doors*. Looking about "this world of books," he exclaims "I could even here live and die with such meditations, and take more delight and true content of mind in them, than in all thy wealth and courts. There is a sweetness, which as Circe's cup, bewitcheth a student; he cannot leave off, as well may witness those many laborious hours, days, and nights, spent in their voluminous treatises. So sweet is the delight of study. The last day is *prioris discipulus*. Heinsius was mewed up in the library of Leyden all the year long, and that which, to my thinking, should have bred a loathing, caused in him a greater liking, 'I no sooner,' saith he, 'come into the library, but I bolt the door to me, excluding lust, ambition, avarice, and all such vices, whose nurse is idleness, the mother of ignorance and melancholy. In the very lap of eternity, among so many divine souls I take my seat with so lofty a spirit, and sweet content, that I pity all our great ones, and rich men, that know not this happiness.'"

Such is the incense of a votary who scatters it on the altar, less for ceremony than for the devotion.—*D'Israeli*.

Rantzen, the founder of the great library at Copenhagen, whose days are dissolved in the pleasures of reading, discovers his taste and ardour in the following elegant effusion:—

Golden volumes! richest treasures!  
Objects of delicious pleasures!  
You my eyes rejoicing please,  
Yon my hands in rapture seize!  
Brilliant wits and musing sages,  
Lights who beam'd through many ages,  
Left to your conscious leaves their story,  
And dared to trust you with their glory,  
And now their hope of fame achieved,  
Dear volumes, you have not deceived!

Burton\* has drawn a fearful picture of the abject condition of men of learning before they had a public to rely upon. "Rhetoric only serves them to curse their bad fortunes; and many of them, for want of means, are driven to hard

shifts. From grasshoppers they turn humble bees and wasps, plain parasites, and make the muses mules, to satisfy their hunger-starved families, and get a meals meat."

1621, Sept. 25. Died, Mary Sidney, countess of Pembroke, who was not only an ingenious poet, but a great encourager of letters, which enabled her to make an illustrious appearance among the literati of her time.† She was born about the middle of the sixteenth century, the daughter of sir Henry Sidney, knight, and sister of sir Philip Sidney. About the year 1576, she married Henry, lord Pembroke. As her genius inclined her to poetry, she translated many of the psalms into English verse; and was the author of many other works. She survived her husband twenty years; and having lived to a good old age, died at her house in Aldersgate-street, London. She was buried in Salisbury cathedral. Her character may be fairly judged from the following epitaph:

Underneath this sable hearse  
Lies the subject of all verse,  
Sidney's sister, Pembroke's mother.  
Death, ere thou hast slain another,  
Fair and learned, good as she,  
Time shall throw a dart at thee.

Another patroness of letters was Lucy Harrington, countess of Bedford. This remarkable lady was, like the former, a patroness of talent, at a period when the female mind was generally circumscribed within the bounds of domestic duties. She was herself a poet, and the warm friend of genius in every class of society. She died in the year 1628.

Elizabeth Jane Weston was, without doubt, the most learned lady of her time, but of whom very few particulars are known. She was born about the beginning of queen Elizabeth's reign, and is supposed by Fuller to have been a branch of the ancient family of Weston, of Sutton, in the county of Surry. She appears to have left England at an early age, accompanying her father, and settled at Prague, in Bohemia, where she afterwards married a gentleman of the name of Leon, who held an appointment in the emperor's court. She was greatly skilled in languages, particularly the Latin; her compositions abounding in such elegance of diction, and correctness of style, as to merit the encomiums of the erudite Scaliger, May, and other celebrated men. Mr. Evelyn has placed her in his *Numismata*, among learned women; and Farnaby ranks her with sir Thomas More, and the best Latin poets of the sixteenth century.

\* Robert Burton was born at Lindley in Leicestershire, Feb. 8, 1576. He was educated at Oxford, and was presented to the vicarage of St. Thomas in that university, and next to the rectory of Seagrave in his native county. He led a studious and solitary life in his college, till he at length became oppressed with melancholy, and resolved to write a book upon that subject with the view of curing himself. He died in 1639-40; and in his epitaph, in the cathedral of Oxford, he is described as having lived and died by melancholy.

William Burton was an elder brother of the above, and an eminent antiquary; was born in Leicestershire in 1575, and educated at Oxford, from whence he removed to the Inner Temple, London, and was called to the bar. He died in 1648.

† The Countess of Pembroke's *Arcadia*. London: printed for William Ponsoby. 4to., 1590. A curious and copious account of this romance is given in Zouch's *Life of Sir Philip Sidney*, and a good analysis of the story is in Dunlop's *History of Fiction*. It was severely censured by Horace Walpole, afterwards earl of Orford. The romance has been translated into Italian, French, Dutch, and other languages.

The Countess of Pembroke's *Arcadia*, now the third time published, with sundry new additions of the same author. Edinburgh: printed by Robert Waldgrave, 1599, folio.

Neither Ballard nor Chalmers could discover the year of her death, but merely state that she was living in 1605. It is, however, proved that she survived till 1613.\*

It was not until this period that the literary education of women, of the middle class of society, began to prevail in England; few were taught more than to read, but at this time, writing was superadded, with music, dancing, and French; and it is a singular fact that neither of Shakspeare's daughters could write.

1621, Dec. Died, ANDREW HART, one of the most distinguished of the early typographers of Scotland. He flourished in the reign of James VI. Previous to 1600, he was in the habit of importing books from abroad; he was at this time exclusively a bookseller. From a mere bookseller he seems gradually to have become a publisher: several books were printed in Holland about the years 1600 and 1601, "at his expense." Finally, he added the business of printing to his other dealings. The productions of his press specify that his shop was in the High-street of Edinburgh, on the north side, opposite the cross; being, by a strange chance, the identical spot from which Mr. Archibald Constable, two hundred years after, issued so many noble efforts of Scottish genius. Hart's edition of the bible, 1610, has also been admired for its fine typography. He also published a well-known edition of Barbour's *Bruce*. In addition to all other claims upon our praise, Hart was a worthy man. He died in a good old age, as we learn from a notice in Boyd of Trochrig's *Obituary*.†

1622. *New and Merry Prognostication, devised after the finest fashion.*

Made and written for this present year,  
By four witty Doctors as shall appeare,  
Spendall, Whobail, and Doctor Dewe-ace,  
With them Will. Sommer takes his place,  
They have consulted all in deede,  
To solace them, that this shall reede.

This is a poetical tract of the greatest rarity. It is in 4to, and embellished with wood cuts. A copy, in morocco, was lately offered for £8 8s.

1622. *Grievous Groanes for the Poore.* Done by a well wisher, who wisheth that the Poore of England might be provided for, as none should need to go a begging within this realme.

The poore afflicted are,  
So that they perish fast;  
If now no order taken be,  
Then ruine comes at last.

Printed for Michael Sparre.

This tract is assigned to Thomas Decker, but upon no sufficient authority. It is inscribed, by the printer, "to the right honourable, right worshipfull, and worthy company of the Virginia and Sommer Iland plantations." He calls it a poor fatherless volume.

\* See the *Bibliographical and Retrospective Miscellany*. London. 1830. post 8vo.

† Le moy de Dec. 1621, mourut a Edin. le bon homme, Andrew Hart, imprimeur et libraire; decede en bonne vieillesse; homme de bien et notre ancien amy.

1622. Died, JOHN BARON NAPIER, of Merchiston, in Scotland, where he was born in 1550. An able mathematician and theologian, the fore-runner of Newton, and inventor of *logarithms*\* with *secret inventions*.† Mr. Chalmers observes, that the reforms and revolutions of Scotland had no happy influence on her genius and literature, during several ages. But a few individuals arose, who by devoting their lives to useful studies, amidst fanaticism and turbulence, would do honour to any country. The foremost was Napier, whose *logarithms* and *secret inventions* however, "did little honour to his genius, and proved less useful to mankind."

1622. *The Belgicke Piemire stinging the slothful sleeper, and bringing the diligent to Fast, Watch, Pray, &c.* By Thomas Scot. 4to.

1622, Aug. 23. *The Certain News of the present week*, edited by, and printed for Nathaniel Butter, at the Pyde Bull, St. Austin's gate.

This is a small quarto of eighteen pages, with the following advertisement at the end of it:—"If any gentleman, or other accustomed to buy the weekly relations of newes, be desirous to continue the same, let them know that the writer, or transcriber rather of *this newes*, hath published two former newes, the one dated the second, the other the thirteenth of August, all which do carry a like title, with the arms of the king of Bohemia, on the other side of the title-page, and have dependence one upon another: which manner of writing and printing he doth purpose to continue weekly, by God's assistance, from the best and most certain intelligence. Farewell, this twenty-three of August, 1622."

This publication is deemed the first weekly newspaper in England. The thirty years' war, and the exploits of the great Gustavus Adolphus, excited the curiosity of all classes, and the occasional pamphlets which had been issued, were now converted into weekly intelligence.

The following statement of the progress of "publick news and papers; when they first began; their progress, increase, and uses and abuses to the people," is taken from the *Harleian manuscripts*. 5910.

"In the days of King Henry VII. we had none that ever I could see, that is to say, in single sheets, except some invectives against the pope and the church of Rome. It is true there were several tracts wrote against cardinal Wolsey; but they were in books in octavo; and several other relating to several matters, as about the sacrament, against Gardiner, bishop Bonner, &c.: but these might rather be called libels than

\* *The Mirifici Logarithmorum Canonis Descriptio* was printed by Andro Hart, at Edinburgh, 1614, 4to., and was dedicated to Charles, Prince of Wales.

† The *secret inventions* were a *burning mirror*, a wonderful piece of artillery, and a war chariot. "These inventions," says Napier, besides devices of sailing under the water, and stratagems for burning the enemies ships, by the grace of God and works of expert craftsmen, I hope to perform."

Many of these were rather pamphlets and not continued publications; but single sheets, merely printed as attacks or answers on temporary occurrences, on the spur of the occasion.

pamphlets. These were most printed beyond the seas. Only one I remember, which was *The Supplication of Beggars*, wrote against the begging friers by one Fish.

"But in the days of queen Mary they began to fly about in the city of London; as several ballads and other soogs and poems, as a ballad of the queen's being with child.

"And these, I say, were the forerunners of the newspapers. In the days of queen Elizabeth we had several papers printed, relating to the affairs in France, Spain, and Holland, about the time of the civil wars in France. And these were, for the most part, translations from the Dutch and French, and were books, or pamphlets rather, which, I take, if I mistake not, the word signifieth to be held in the hands and quickly read. We must come down to the reign of king James I. and that towards the latter end, when news began to be in fashion; and then, if I mistake not, began the use of Mercury-women; and they it was that dispersed them to the hawker, which word hath another signification. Look more in the *Bellman of London*."

The business of these Mercuries and hawkers at first was to disperse proclamations, orders of council, and acts of parliament, &c. The Harleian manuscripts proceed to give what is there styled a list of early-printed newspapers; but which was so extremely incomplete, that Mr. Nichols\* took some trouble to improve it, from the entries at stationers' hall, and from the royal collection in the British Museum, before he was aware that Mr. Chalmers† had encountered a similar labour. The Rev. Samuel Ayscough added more than one hundred articles to the list of Mr. Nichols, which had escaped the notice of Mr. Chalmers; and from a collection of newspapers in his own possession, besides being continued to a later period, Mr. Nichols was enabled to form his list tolerably complete.‡

1536. *News out of Hell*; a dialogue between Charon and Zebul, a devil. London, printed by John Byddell. 8vo.

1576. *Pasquin in a trance. A christian and learned dialogue, conteyning news out of heaven,*

*purgatory, and hell, discovering the crafty consequences of antichrist.* London: printed by William Seres. 4to.

1578. *Joyfull newes from the new found world, of things used in physick, brought from the West Indies.* London: printed by William Norton. 4to. with cuts. Again in 1580.

1579. *Newe Newes, contayning a short rehearsal of Stukeley and Morice's rebellion.*

1579. *Newes from the North; or a conference between Simon Certain and Pierce Plowman.* 4to. A copy sold at the Roxburghe sale for £12 12s.

1583, Feb. 1. *Wonderful and strange Newes out of Suffolke and Essex, where it rayned Wheat the space of six or seven miles.* 12mo.

1588. *English Mercurie.\**

1588. *Mercurij Gallo-Belgici.†*

1593. *Newes from Spain and Holland.* 8vo.

1600. *Newes out of Cheshire of the new found well, with a frontispiece.*

1604. *Newes from Gravesend.* 4to.

1608. *Newes from Lough-Boyle in Ireland, of the rebellion of sir Carey Daugherty and Filly-me Reah Mac Davy.* 4to.

1611. *Newes from Spain.* For Nathaniel Butter, 4to. 12 pages.

1612. *Woful Newes from the west parts of England of the lamentable burning of Teverton.* 4to. with frontispiece.

1612. *Newes out of Germany.* 4to.

1614. *Good Newes from Florence.* 4to.

1615. *Newes from Gulick and Clece.* 4to.

1618. *Newes from Perin (Penrith) in Cornwall, of a murder committed by a father on his owne sonne (lately returned from the Indies).* 4to. Black letter. From this pamphlet Mr. George Lillo, author of *George Barnwell*, took his tragedy of the *Fatal Curiosity*.

1618. *Newes from Italy.* 4to.

1620. *Vox Populi, or Newes from Spain,* 4to. with plates.

1620. *Good Newes to Christendome sent to a Venetian in Legorne, from a merchant in Alexandria.* 4to. with wood cut.

1621. *Courant, or Weekly Newes from Foreign Parts;* a half sheet in black letter. 4to. out of high Dutch, printed for Nath. Butter.

1621, Oct. 23. In the stationers' books, *Newes from Poland, wherein is truelie enlarged the occasion, progression, and interception of the Turks formidable threatening of Europe*, was entered by William Lee.

1621, Oct. 29. *The certain and true Newes from all parts of Germany and Poland, to the present time.* 4to.

Burton, in his *Anatomy of Melancholy*, published in this year, says, "that if any read now a-days it is a play-book, or a pamphlet of *newes*."

1622, April 13. *Strange Newes out of diverse*

\* *Literary Anecdotes*, vol. 4, &c.

† Life of Thomas Ruddiman, the printer.

‡ For the list of newspapers, the compiler has been much indebted to the labours of Chalmers and Nichols; but many articles are here inserted that escaped the indefatigable research of those two gentlemen.

§ The original orthography was *newes*, and in the singular. Johnson has, however, decided, that the word *news* is a substantive without a singular, unless it be considered as singular. The word *new*, according to Wachter, is of very ancient use, and is common to many nations. The Britons, and the Anglo-Saxons, had the word, though not the thing. It was first printed by Caxton, in the modern sense. In the *Siege of Rhodes*, which was translated by John Kay, the poet laureate, and printed by Caxton, about the year 1490. In the *Assembly of Fouslie*, which was printed by William Copland in 1530, there is the following exclamation:—

News! News! News! have ye ony News?"

In the translation of the *Utopia*, by Raphe Robinson, citizen and goldsmith, which was imprinted by Abraham Nele, in 1551, we are told, "As for monsters, because they be no *newes*, of them we were nothing inquisitive."—Such is the rise, and such the progress of the word *news*, which even, in 1551, was still printed *newes*!"

\* See page 599, ante.

† See page 423 and 443, ante.

‡ There is not a porch or a market-place in which the *news-monger* does not take his stand for a whole day together, tiring his invention and amusing his hearers with an everlasting series of fictions and forgeries.—*Theophrastus*. B. C. 505.

*Countries, neuer discovered till of late, by a strange Pilgrim in those Parts*, by George Fairbanke.

1622, May 3. *A Courant of Newes from Vienna and other places*, entered May 29, by Mr. Bourne and Thomas Archer.

1622, June 7. *A Courant of Newes*, by Mr. Butler.

*A Courant of Newes*, dated at Rome, May 21; entered June 17, by Nath. Newbunie and William Sheffard.

1622, June 19. *Newes from New England*, by John Bellamie.

1622, Aug. 21. *The certain Newes of the present Week*, by Mr. Butler.

1622, Aug. 27. *A Discourse of Newes from Prague in Bohemia, of a Husband who by Witchcraft had murdered eighteen Wives, and of a Wife who had likewise murdered nineteen Husbands*, by Barth. Downes and William Sheffard.

1622, Sept. 3. *A Courant, called Newes from sundry Places, with a relation of the Storm at Plymouth*; by Mr. Butler.

About this period, newspapers began also to be established on the continent. Their originator at Paris is said to have been a physician, named Theophrastus Renaudot, who had found that it was conducive to success in his profession to be able to tell the news to amuse his patients. Seasons were not always sickly, but his taste for the collection of gossip was incessant. He, therefore, came to reflect that there might be some advantage in printing his intelligence periodically, so that the world might have it whether sick or whole. His scheme succeeded, and he obtained a sole privilege from cardinal Richlieu, for publishing the *Paris Gazette*, and the first number appeared in April, in the year 1632.

1623. Edward Hulet gave to the stationers company £5 "for a drinking among them," and a silver bowl, gilt in fashion of an owl, weighing six ounces, inscribed "The gift of Edward Hulet, gentleman, 1623." This bowl was preserved in 1629, when all the rest of the plate was sold, to relieve the king's wants.

1623. The following work was printed at Amsterdam in this year:—*Voorbeels der Oude Wyse, handelende van trouw, ontrouw, list, haet, ghenetdicheyt, ende alle andere Menschelucke gheneghenheden*, with curious cuts formed with types, instead of the common mode of engraving or casting entire subjects upon one piece, these consist of several. A book of the most extreme rarity, which appears to have escaped the researches of bibliographers. It must always rank as a curiosity on account of the cuts being formed of detached types. There is a copy in the royal library at Paris. A copy of this work was lately offered at £8 8s.

1623. ISAAC JAGGARD and EDWARD BLOUNT printed the first edition of Shakspeare's plays, with the following title:

*Mr. William Shakespeares Comedies, Histories, and Tragedies. Published according to the true Originall Copies.* London, 1623. Folio.

This edition was published under the direction

of Heminge and Condell, two players, with the following dedication to the earls of Pembroke and Montgomery:

"Since your lordships have been pleased to think these trifles something, heretofore," say these fellow-labourers in the art of pleasing, "and have prosecuted both them and their author, living, with so much favour, we hope you will use the like indulgence toward them you have done unto their parent. There is a great difference, whether any book choose his parents or find them: this hath done both; for so much were your lordships likings of the several parts, when they were acted, as before they were published, the volume asked to be yours. We have but collected them, and done an office to the dead to procure his orphans guardians, without ambition either of self-profit or fame: only to keep the memory of so worthy a friend and fellow alive, as was our Shakspeare."

Leonard Digges wrote an elegy upon Shakspeare, immediately after the appearance of the first edition; of which the following is an extract:

"Next nature only helped him, for look thorough  
This whole book, thou shalt find he doth not borrow  
One phrase from Greeks, nor Latins imitate,  
Nor once from vulgar languages translate;  
Nor plagiary-like, from others glean,  
Nor begs he from each witty friend a scene,  
To piece his acts with: all that he doth write  
Is pure his own; plot, language, exquisite."

Most of the plays of Shakspeare were published in a detached form during his lifetime. This edition was thrice reprinted before the close of this century, but without any attention being paid to the accuracy of the text. At length, in 1714, Nicholas Rowe, presented an edition in which an attempt was made to correct many words and phrases, which were either wrong or supposed to be so; now also was it thought, for the first time, necessary to gather a few particulars respecting the life of the author.

This first edition is greatly prized by amateurs, as it contains the only *portrait*, which requires no evidence to support its authenticity. "It is," says John Horne Tooke, "the only edition worth regarding, and it is much to be wished, that an edition of Shakspeare were given *literatim* according to the first folio," as "the ignorance and presumption of the commentators have shamefully disfigured Shakspeare's text."

The insensibility of Shakspeare to the offspring of his brain may be the subject of our wonder or admiration; but its consequences have been calamitous to those who in after times have hung with delight over his pages. On the intellect and the temper of these ill-fated mortals it has inflicted a heavy load of punishment in the dulness and the arrogance of commentators and illustrators—in the conceit and petulance of Theobald; the imbecility of Capell; the pert and tasteless dogmatism of Steevens, the ponderous littleness of Malone and of Drake. Some superior men, it is true, have enlisted themselves in the cause of Shakspeare. Rowe, Pope, Warburton, Hanmer, and Johnson, have successively been his editors; and have professed to give his

scenes in their original purity to the world. But from some cause or other, which it is not our present business to explore, each of these editors, in his turn, has disappointed the just expectations of the public; and, with an inversion of nature's general rule, the little men have finally prevailed against the great. The blockheads have booted the wits from the field; and attaching themselves to the mighty body of Shakspeare, like barnacles to the hull of a proud man of war, they are prepared to plough with him the vast ocean of time; and thus, by the only means in their power, to snatch themselves from that oblivion to which nature had devoted them.—*Symmons.\**

Dr. Johnson remarks, that from the year 1623 to 1664, that is forty-one years, only two editions

\* Perhaps there is no work in the English language which has risen so rapidly in value as the first edition of our great natural poet. The players, Heminge and Condell, published the first edition at £1. At the sale of Philip Spilist, esq., 1814, the following prices were obtained:—

First edition, title-page reprinted, and Martin Droghda's portrait inserted, bound in russia by R. Payne, 1623, £37 10s.

Second edition, bound in russia by R. Payne, 1632, £18 2s. 6d.

Third edition, and unto this impression is added seven plays, never before printed, in folio, blue morocco, 1664, £16 10s.

Mr. Beloe says, "I can remember a very fine copy of the first edition of Shakspeare to have been sold for five guineas. I could once have purchased a superb one for nine guineas." At the sale of Dr. Monro's books it was purchased for thirteen guineas; and I was once present when thirty-six guineas were demanded for a copy.

Dr. Askew had a fine copy of the first edition of this book, with the autograph of Charles I. Mr. Steevens purchased it at Dr. Askew's sale for £5 10s. In this book Charles I. had written these words: *Dux spiao spacio*, C. R. and sir Henry Herbert, to whom the king presented it the night before his execution, had also written, "Ex dono serenissimi Regis Car. Servo suo Humilis. T. Herberts."

At the sale of the Kenble library, Mr. Boswell gave £113 7s. for a copy of the folio edition. It had on doubt cost Mr. Kenble three times that sum in the illustrations.

Mr. Ford, a bookseller of Manchester, about 1806, sold a copy of the original edition of *Venus and Adonis* for £50.

At the sale of Craven Ord, esq., 1830, a copy of the first edition, title reprinted, Colonel Stanley's copy, was sold for £38 6s. 6d. At the same sale, the following prices were obtained:

*Shakspeare's Sonnets*, never before imprinted, extremely rare. From the libraries of George Steevens and the duke of Roxburghe, 1609. £31 10s. 6d. It sold at the duke of Roxburghe's sale for £31, and a copy of the same edition sold at Mr. Sotheby's, June, 1896, for £40 12s.

*Much Ado about Nothing*, first edition, 1600. 4to. £11. Mr. Bindley's copy sold for £17 17s., and Mr. Steevens's for £26 10s.

*History of the Merchant of Venice*, first edition. 4to. 1608. £10 5s.

*Richard II.* second edition, 1598, 4to. £7 17s. 6d.

*Henry IV.* Part the First. Second edition. 1599. 4to. £3 18s. 6d. The White Knights' copy sold for £16 17s. 6d.

*Romeo and Juliet*, newly corrected, augmented and amended, second edition. Steevens's copy. 1599, 4to. £6 16s. 6d.

*Rape of Lucrece*, 1694, 4to. Bindley's sale, £9 9s.

*Sonnets*. Printed by G. Eld, for T. T., and are to be sold by William Aspley, 1609. 4to. Sold at the sale of Dr. Farmer's library for £8; at Mr. Steevens's for £3 19s.; at the duke of Roxburghe's for £31; at White Knight's for £37; at Mr. Boswell's for £38 18s.; and at Sotheby's, June, 1896, for £40 19s.

*Poems*. Written by William Shakspeare, Gent. Printed by Thomas Cotes, and are to be sold by John Benson, 1640. Small 8vo., with a portrait of Shakspeare, by Marshall. Sold at Bindley's sale for £5 5s.; at Sir Mark Syke's for £7.

of the works of Shakspeare were printed, which probably did not altogether make 1000 copies.

1623, Nov. 9. *Died*, WILLIAM CAMDEN, a learned antiquary and historian. He was born May 2, 1551, in the Old Bailey, London, of humble parents, and owed his education to charity. He received the rudiments of his education at Christ's hospital, London, and was afterwards of Magdalen college, Oxford, in 1566. In 1573 he took the degree of B.A., and in 1576 was appointed second master of Westminster school. In 1586 he published in Latin, the *History of the Ancient Inhabitants of Britain, their Origin, Manners, and Laws*; a third edition of this work appeared in 1590, at which time he had a prebend in Salisbury cathedral, but without being in orders. In 1593 he became head master of Westminster school, and next year published an enlarged edition of his *Britannia*. In 1597 he printed his Greek grammar, for the use of Westminster school; and the same year was made clarencieux king at arms. In 1600 came out his *Catalogue of the Monuments in Westminster Abbey*, and a new impression of his *Britannia*. In 1603 he published at Frankfurt a collection of our ancient historians, in Latin; and in the year following appeared his *Remains concerning Britain*, in 4to. In 1615 he printed his *Annals of Queen Elizabeth*. But such was the literary despotism, that men of genius in this country were either suffering the vigorous limbs of their productions to be shamefully mutilated in public, or voluntarily committed a literary suicide on their own manuscripts. Camden declared that he was not suffered to print all his Elizabeth, and sent those passages over to De Thou, the French historian, who printed his history faithfully two years after Camden's first edition, 1615. He died at Chiselhurst, in Kent, and his remains were interred with great solemnity in Westminster abbey. He founded a history professorship at Oxford, and bequeathed all his books and papers to sir Robert Cotton.

William Camden was a man of singular modesty and integrity, profoundly learned in the history and antiquities of this kingdom, and a judicious and conscientious historian. He was revered and esteemed by the literati of all nations, and will be ever remembered as an honour to the age and country wherein he lived.

1623. From a passage in the *Devil's Law Case*, a drama by John Webster, first published in this year, it is very evident that gold ornaments had been long familiarly known as applied to vellum binding, at that period. He says—

There's in my closet  
A prayer book that is covered with gilt othelm;  
Fetch it.

1623. The following curious English book was printed at Tournay, in 12mo., entitled, *The image of both Churches, Hierusalem and Babel, unite and confusion, obedience and sedition*, by P. D. M. (i. e. Matthew Patison); for some account of which consult Wood's *Athene Oxoniensis*, and the *Censura literaria*, vol. vi. p. 245.

1624, Dec. 14. *Died*, Charles Howard, earl of Nottingham, lord high admiral of England. This nobleman planned the following work, with a view to sooth queen Elizabeth's despair for the recent execution of the earl of Essex, by flattering her preposterous vanity, and gave for a prize subject to the best poets and musicians, whom he liberally rewarded, the beauty and accomplishments of his royal mistress:—*The Triumphs of Oriana, to five and six voices, composed by divers several authors*. London: printed by Thomas Este, 1601; consisting of twenty-five songs.

1625, March 27. *Died*, JAMES I. of England, and VI. of Scotland, after a reign over England of twenty-two years, in the fifty-ninth year of his age; and was buried with great pomp and solemnity in Westminster abbey. He left only one son, Charles, and Elizabeth, the titular queen of Bohemia.

The reign of James was vastly different from that of his predecessor. Instead of an uninterrupted harmony of government, it was marked by a perpetual jarring dissonance; instead of success and glory abroad, disappointment and contempt; instead of satisfaction, prosperity and union at home, discontent, distress, and, at last, civil war in all its horrors, and the ruin of his family. It was unfortunate for himself that James was born to fill a throne, since he had neither the spirit nor resolution to act as became a sovereign, and his weaknesses were more conspicuous from his elevated station, particularly at a period when the general diffusion of knowledge rendered men eager to discern and to exaggerate the defects of their superiors.

James had the advantage of queen Elizabeth's good example; and happy had it been for him, his family, and the nation, if her example had really had a due influence over his conduct. Fraught with learning, not with knowledge; ignorant of the true principles of government; more a stranger to our constitution by his notions and habits of thinking, than to our country by his birth; obstinate, though not steady; misled by self-opinion, and confirmed in error by superlative pedantry. His pedantry was too much even for the age in which he lived, and fixed upon him a just ridicule; because the merit of a chief governor is wisely to superintend the whole, and not to shine in any inferior class, because different, and in some cases, perhaps, opposite talents, both natural and required, are necessary to move and regulate the movements of the machine of government; in short, because as a good adjutant may make a very bad general, so a great reader and writer too may be a very ignorant king. In vain did the people look for the judgment and discernment which had rendered the government of the last reign glorious. A prince who had worn the crown of Scotland under so many restraints, and in so great penury, might have contented himself, to hold that of England on the same principles as had contented the best and greatest of his predecessors; but his designs were as bad as those of

the very worst of the princes who were before him.\* From the principle of an absolute independent right to the crown, inherent in himself, as he vainly boasted of from the first, he introduced the notion of an independent authority; a right superior to law, not to be contradicted by any human power; and consequently that an independent king is accountable to God alone. Could he have imposed this system of policy upon the generality of his subjects, he might have basked himself in the full sunshine of arbitrary power. But instead of making his impositions pass on the people, he only awakened their jealousy. The spirit of liberty baffled all his designs; and the same active principle which complied with queen Elizabeth, vigorously resisted king James, though he scrupled not to tell his parliament, "that, as it is blasphemy to dispute what God may do, so it is sedition in subjects to dispute what a king may do in the height of his power." Yet, notwithstanding his notions and principles of government were so absurd, by which he hoped to establish his authority, he found numbers to adopt them; for numbers are at all times liable to be deceived, ready to be tempted, and prone to be corrupted. By his system of government, by his giving the reins of power into the hands of favourites, he conjured up that storm in which his successor perished.

Amongst the arbitrary acts of James's, was his opposing the election of sir Francis Goodwin, member for the county of Berks, after he had been declared duly elected by a committee of the house of commons. That king James was unfriendly to the liberty of the press, has already been noticed, and the following are further proofs of his desire to curtail the fruits of genius; he proclaimed Buchanan's *History*, and a political tract of his at the "Mercat Cross;" and every one was to bring his copy "to be perusit and purgit of the offensive and extraordinary materis," under a heavy penalty. Knox, whom Milton calls "the reformer of a kingdom," was also curtailed; and "the sense of that great man shall, to all posterity, be lost for the fearfulness or the presumptuous vastness of a perfunctory licenser.

On the 4th December, 1621, the king addresses

\* Queen Elizabeth had so little concern about hereditary right, that she neither held, nor desired to hold, her crown by any other tenure than the statute of the 35th of her father's reign. In the 15th of her own reign, she declared it, by law, high treason, during her life, and a premunire, after her decease, to deny the power of parliament, in limiting and binding the descent and inheritance of the crown, or the claims to it. It was usual when the people compared the reign of James with that of the preceding glorious one, to distinguish him by the name of *queen James*, and his predecessor as *king Elizabeth*. A public record informs us, that James I. granted to the duchess of Richmond and another person, an exclusive patent for coining *farthings*. Francis Howard, duchess of Richmond died 1639.

In the reign of James I. an act was passed to prevent the further *growth of poetry* in England; the object of the bill was to prevent the *growth of popes*.

The first lottery known in England was drawn in this reign, and was made for the support of the English colonies in North America; the last lottery was drawn in 1827.

the Speaker, complaining, in reply to a petition of the influence possessed by certain "fiery, popular, and turbulent spirits" in the lower house, forbidding their inquiry into the mysteries of state, or to concern themselves about the marriage of his son, or to touch the character of any prince his friend or ally, or to intermeddle with causes which were submitted to the decision of the courts of law, or even to send to him their petition, if they wished him to hear or answer the same; desiring them also to recollect that the crown possessed and would exercise the right of punishing the misbehaviour of the members both in and out of parliament.

James bestowed honours in so lavish a manner, and with so little distinction, that they ceased, in some sense, to be honours, as it frequently made those that possessed them the jest of the nation. Two hundred and thirty-seven persons received knighthood in the first six weeks of his reign, and at the end of six months a pasquinade was fixed at the door of St. Paul's church, to teach the vulgar the names of the new nobility, which amounted to more than seven hundred. In May, 1611, he created the dignity of *Baronets*, (or lesser barons,) they engaging singly to maintain thirty foot soldiers in Ulster, for three years, at the rate of eight-pence English per day.

Lord Walpole, in his *Anecdotes of celebrated Painters*, says, "it was fortunate for the arts that king James had no liking towards them, and let them take their course; for he would probably have meddled to introduce as bad taste in art as he did in literature." Hayley says,—

James, both for empire and for arts unfit,  
His sense a quibble, and a pun his wit;  
Whatever works he patronised, debased;  
But happily left the pencil undiagnosed.

As a poet, James has already been mentioned. He commenced, but did not live to complete, a *metrical version of the Psalms*. What he had written of it, was published in 1631, with the permission of king Charles. It is said to be "remarkable for its flat simplicity and unmeaning expletives." The version of Psalm lxxiv. 11, may serve as a brief specimen.

"Why dost thou thus withdraw thy hand  
Even thy right hand restrain?  
Out of thy bosom, for our good,  
Drawe back the same againe."

James also published *Witty Apothegms*, of which the following is a curious specimen relating to tobacco, which had become in very common use, and which he called the image of hell: "the smoke he likened to the vanities of the world; like them it caused a passing pleasure, made men's heads light and drunken therewith, and bewitched men's hearts, so that they could not quit the habit; besides that it was loathsome and stinking like hell, so that were he to invite the devil to dinner he would provide him a pig, a poll of ling and mustard, and a pipe of tobacco to help his digestion."

Of the colleges erected and endowed in the reign of James, there were only two, which were in the university of Oxford:

Wadham College, founded in 1613, by Nicholas and Dorothy Wadham, for a warden, fifteen fellows, and an equal number of scholars, with two chaplains, and two clerks. It is peculiar to this college that the fellows are obliged to resign on the completion of eighteen years from their becoming regent masters, if they have not been fortunate enough to have previously obtained preferment. The building cost £10,816 7s. 8d. to which was added somewhat more than £500 for plate and the furniture of the kitchen. The whole of this was paid by Dorothy Wadham, who survived her husband, and devoted herself to fulfilling his benevolent intentions.

Pembroke College, originally Broadgate hall, was converted into a college by the joint munificence of Thomas Tesdale and Richard Wightwick; for although in the charter, dated in 1624, king James I. is called the founder, and the earl of Pembroke, then chancellor of the university, the godfather, yet it does not appear that either of these personages assisted the foundation otherwise than by their patronage.

1625, April. King Charles I. commanded that the company of stationers in London should have monthly certificates of the works printed by the universities of Oxford and Cambridge, signed by the vice-chancellor of each university.

1625. MRS. LOWNES, widow of MATTHEW LOWNES, gave £10 to the stationers' company, as a remembrance of her husband. Matthew was son of Hugh Lownes, of Rode, in Ashbury, Cheshire, and was born about 1568.

1625. In Ben Jonson's play, entitled the *Staple of News*, written in this year, we have a very curious and amusing description of an office of news manufacturers, which for the gratification of the reader it is quoted entire. The scene is laid at the west end of St. Paul's:—

*Peni-boy, Cymbal, Fittion, Tho. Barber, Center.*

In troth they are dainty rooms; what place is this?  
*Cymbal.* This is the outer-room, where my clerks sit,  
And keep their sides, the Register I the midst;  
The Examiner, he sits private there, within;  
And here I have my several rowls and fyles  
Of News by the alphabet, and all put up  
Under their heads.

*P. jun.* But those too subdivided?

*Cymb.* Ioto Authentical, and Apocryphall.

*Fittion.* Or News of doubtful credit; as Barbers' News.

*Cymb.* And Taylors' News, Porters', and Watermen's News.

*Fitt.* Whereto beside the Corant, and Gazette.

*Cymb.* I have the News of the season.

*Fitt.* As Vacation-news,

Term-news, and Christmas-news.

*Cymb.* And News o' the Faction.

*Fitt.* As the Reformed-news. Protestant news.

*Cymb.* And Pontifical-news, of all which several.

The Day-books, Characters, Precedents are kept.

Together with the names of special Friends—

*Fitt.* And Men of Correspondence I' the Country—

*Cymb.* Yes, of all ranks, of all religions.—

*Fitt.* Factors and Agents—

*Cymb.* Liggers, that lye out

Through all the shires o' the kingdom.

*P. jun.* This is fine!

And bears a brave relation! but what says  
*Mercurius Britannicus* to this?

Cymd. O Sir, he gains by 't half in half.

Fitt. Nay, more  
I'll stand to't. For, where he was wont to get  
In, hungry Captains, obscure Statesmen.

Cymd. Fellows  
To drink with him in a dark room in a tavern,  
And eat a sawsage.

Fitt. We ha' seen't,

Cymd. As fain,  
To keep so many politick pens,  
Going to feed the press.

Fitt. And dish out News,  
Were 't true or false.

Cymd. Now all that charge is sav'd  
The publick Chronicle.

Fitt. How do you call him there?

Cymd. And gentle reader.

Fitt. He that has the maidenhead  
Of all the books.

Cymd. Yes, dedicated to him.

Fitt. Or rather prostituted.

P. juv. You are right, Sir.

Cymd. No more shall be abus'd, nor Country Parsons  
Of the Inquisition, nor busy Justices

Trouble the peace, and both torment themselves  
And their poor ignorant neighbours with inquiries

After the many and most innocent monsters,  
That never came 't th' Counties they were charg'd with.

P. juv. Why, methinks, Sir, if the honest common  
people

Will be abus'd, why should not they ha' their pleasure,  
In the believing eyes, are made for them;

As you 't th' Office, making them themselves?

Fitt. O Sir! it is the printing we oppose.

Cymd. We not forbid that any News be made,  
But that 't be printed: for, when News is printed,

It leaves, Sir, to be News, while 'tis but written.

Fitt. Though it be ne're so false, it runs News still.

P. juv. See divers men's opinions! unto some  
The very printing of them makes them News;

That ha' not the heart to believe anything,  
But what they see in print.

Fitt. I, that's an error

Has abus'd many: but we shall reform it,  
As many things beside (we have a hope)

Are crept among the popular abuses.

Cymd. Nor shall the Stationer cheat \* upon the time,  
By battering over again—

Fitt. Once in seven years,

As the age doats—

Cymd. And grows forgetful o' them—  
His antiquated pamphlets, with new dates.

But all shall come from the mint.

Fitt. Fresh and new stamp'd,

Cymd. With the Office-seal, staple commodity.

Fitt. And if a man will assure his News, he may:

Twence a sheet he shall be warrant'd,

And have a policy for 't."

P. juv. What are your present Clerk's habilities?

How is he qualified?

Cymd. A decay'd Stationer

He was, but knows News well; can sort and rank 'em.

Fitt. And for a need can make 'em.

Cymd. True Paul's bred,

I' the church-yard.

1625, Aug. Count de Tilly, the celebrated Austrian general, who is equally known for his military talents and for the frightful scenes of pillage and massacre which marked the course of his army, during the thirty years war in Germany, sent to the deputies of the circle of Lower Saxony, at Brunswick, for them to exert all their authority peremptorily to forbid all

writers and printers from speaking in an improper manner of the imperial troops, and inflaming men's minds by such publications. In answer to this order, among other things, the printers returned these words: "if his excellency will seriously exert himself to restrain the soldiery from inhumanly wicked actions, all such publications will soon die away." No further notice was taken by the general. He was defeated by Gustavus Adolphus at Leipsic, August 28, 1631, and died at Ingoldstadt, April 30, 1632.

1626, Feb. A second newspaper of weekly news, printed at London for Mercurius Britannicus, entitled, *Imperial and Spanish News*, a small 4to. of 14 pages.

1626. The first Latin work printed in Ireland, is supposed to have been sir James Ware's *Archæopagorum Cassilensium et Tuamensis Vitæ, duobus expressæ Commentariolis*. Dublin, 4to. Sir James Ware was born at Dublin, November 26, 1604, and died in that city, December 1, 1666.

It is asserted in the *Nouveau Dictionnaire Historique*, printed at Lyons, in 1804, that archbishop Usher's publication of *Gotteschalchi, &c. literæ*, 4to., Dublin, 1631, is the first Latin book printed in Ireland. *The History of Gotteschalchi, and the Predestinarian Doctrine stirred by him.* He was a monk of the abbey of Orbais, in the beginning of the ninth century, and was whipped and imprisoned, because he would not recant many things condemned by councils against his doctrines, which he never held.

1626. Died, CLAUDE MOREL, son of Frederic Morel, noticed at page 376, ante, a Parisian printer of considerable eminence. He was a member of the "societas libroriorum et typographorum," formed with a special view to the publication of voluminous Greek works. In this character, he was both employed in the impression of, and had the chief concern in editing, many folio editions of the Greek fathers, and other sumptuous editions, undertaken at the expense of the society. Claude Morel left three sons, viz., Charles, Claude, and Giles, concerning whom little more is recorded, than that the first and third also signalized themselves in the typographical profession.

1626. Died, PAUL STEPHENS, son of the second Henry. He was born probably in or about the year 1566; and received his education chiefly at Geneva, and as it is supposed, in the house of his father, whose parental solicitude in his behalf is pleasingly evinced by an epistle prefixed to the *Noctes Atticæ* of Aulus Gellius, printed by Henry, Parisiis, 1589. When Paul had completed his juvenile studies, he began at an early age to travel; and after the example of his father, visited various seats of learning, and formed an intimacy with some of the most eminent scholars of the age; which he was careful afterwards to cherish and increase. The periods of his different excursions in pursuit of knowledge and improvement, cannot at present be accurately defined: but it appears, that at

\* In a note to the reader, Ben Jonson speaks of the Times News as a weekly cheat to draw money, which "could not be fitter reprehended, than in raising this ridiculous office of the Staple, wherein the age may see her own folly, or hunger and thirst after published Pamphlets of News, set out every Saturday, but made all at home, and no syllable of truth in them; than which there cannot be a greater disease in nature, or a fouler score put upon the times."

† This alludes, no doubt, to Nathaniel Butter, the great newspaper-monger.

intervals he took an early share in the labours of his father's *Imprimerie*, repeating as opportunity served, his visits to distant places. Probably with a more particular view of improving himself in the typographic art, in 1595, he was at Heidelberg, with Jerome Commelin, an eminent printer there: and from thence, by his father's direction, proceeded to Lyons, to avail himself of the skill and experience of John Tornasius, king's printer of that city. That he was some time resident in London, there is no doubt.

The year which followed the decease of Henry, is considered as the first of Paul's typographical career. His professional mark was generally the paternal one, *Olivia cum viro adstante*, with the legend, *Noli altum sapere*: sometimes, *cum viro gesticulante*, and the words *Rami ut ego inererer defuncti sunt*. He occasionally adopted that variety of the mark, which had been used by his uncle, the second Francis; and in some instances added embellishments of his own invention. He died at about seventy years of age.

Paul became an author at an early age. His father Henry, himself an indifferent though prolific Latin poet, was particularly solicitous that his son should become a proficient in that species of composition. Mention is made with commendation of *Pauli Stephani versiones epigrammaticum Græcorum Anthologie Latinis versibus, and ejusdem Juvenilia*. Genève, 1593, ap. Franciscum le Preux. Perhaps the most interesting, and one of the most successful of his poetical efforts, is the monody on the death of his father, prefixed to the *Concordantie Græc. Nov. Testamenti*, anni. 1600.

1626, April 9. Died, FRANCIS BACON, viscount St. Albans, and lord chancellor of England. Of the advancement and ruin of this great philosopher, lawyer, and politician, the space allotted the brief notices of this work will not admit of amplification. He was born in London, January 22, 1561, and educated at Cambridge. At the age of sixteen he went to France, in the suite of sir Amias Pawlet, ambassador to that court. During his residence there he wrote an acute piece on the state of Europe, which displayed great observation, though he was then but nineteen years of age. On his return to England he entered Gray's inn, and at the age of twenty-eight was appointed one of the queen's counsellors. But by his attachment to the earl of Essex, who was at enmity with Cecil, Bacon lost those advantages at court which he might otherwise have expected. In 1593 he was chosen member of parliament for Middlesex. On the accession of James I. he obtained the honour of knighthood, and in 1604 was appointed one of the king's council, with a pension. In 1617 he was made lord keeper of the great seal; and two years after constituted high chancellor of Great Britain, at which time he was advanced to the peerage, by the title of baron of Verulam, and the year following was created viscount St. Albans. In 1620 he published the most elaborate of all his works, the *Novum Organum Scientiarum*, (page 467, ante,) shewing a perfect

method of exercising the faculty of reason. The year following he was accused in parliament of bribery and corruption in his high office, which heavy charge being admitted by his own confession, he was sentenced to pay a fine of £40,000, to be imprisoned during the king's pleasure, and for ever rendered incapable of holding any office. He was soon restored to liberty, had his fine remitted, and was summoned to the first parliament of king Charles. After this disgrace, he went into retirement, where he devoted himself to his studies. Notwithstanding his pension of £1800 a year, and his paternal estate, which was worth £700 a year, his liberality was so great, that at his death his debts amounted to £22,000. His remains were interred in St. Michael's church, at St. Albans. His writings are an inestimable treasure of sound wisdom. It was the opinion of Bacon, that knowledge was the same as power. His own life unfortunately showed that there might be great knowledge without power. Subsequent philosophers have agreed that knowledge is what Bacon described it, only when combined with moral excellence, which, though apt to be favoured and improved by knowledge, is not always found in its company. Lord Bacon, speaking of books, says, "the opinion of plenty is among the causes of want; and the great quantity of books maketh a show rather of superfluity than lack; which surcharge, nevertheless, is not to be remedied by making no more books, but by making more good books, which, as the serpent of Moses, might devour the serpents of the enchanters."

1626, Dec. 7. Died, SIR JOHN DAVIES, a poet and judge, who was born at Chisgrove, in Wiltshire, and educated at Oxford, and from thence removed to the Inner Temple, and was called to the bar. James I. conferred on him the honour of knighthood, and made him attorney-general for Ireland. In 1626 he was appointed chief justice of the king's bench, in London, but died shortly after of an apoplexy. He wrote a valuable book on the state of Ireland, 1612, which has been several times reprinted. His poetical works, of which that entitled *Noce Triplex* is the principal, were collected and published in 1773, 12mo. Among his works, are twenty-six short poems entitled *Hymns to Astræa*, each of which is an acrostic\* on the words *Elizabetha Regina*, and are perhaps the most elegant compositions of this description in any language. His prose works were printed in one volume

\* A Greek term, signifying literally the beginning of a line or verse. An acrostic is a number of verses so contrived, that the first letters of each being read in the order in which they stand, shall form some name or other word. According to some authorities, a writer named Porphyrius Optatianus, who flourished in the fourth century, has the credit of being the inventor of the acrostic (see page 299 ante). The acrostic being addressed merely to the eye, and conveying no pleasure either to the imagination or to the ear, cannot of course add to the poetical effect of the lines which it ornaments, any more than would the printing of the initial letters in a different coloured ink. But it is sometimes useful, as an aid to the memory, in recollecting such verses as are composed only to be got by heart, for the sake of the facts, of which they form a summary.

8vo. in 1786. He married Eleanor Touchet, daughter of lord Audley, who pretended to be a prophetess, and printed several pamphlets filled with predictions and revelations. She died in the year 1652. Lady Davies was also a most prolific anagrammatist,\* and scarcely yielded in that art to Mrs. Mary Fage, who flourished at this time, and is considered the greatest writer of acrostics and anagrams that England ever produced. We learn from Camden, that the art of making anagrams began to flourish in this country during the reign of Elizabeth; and he tells us, he knew some who had bestowed many idle hours herein with good success, albeit our English names, running rough with cragged consonants, are not so smooth and easy for transposition as the French and Italian. Accordingly, Camden furnished us with but one English anagram, which is the following, on Charles I.

Charles James Stuart "Claims Arthur's seat."

In a *New Help to Discourse*, 12mo. London, 1684, we have an English anagram, with a very quaint epigrammatic "exposition."

TOAST—A SOTT.

A toast is like a sot; or, what is most  
Comparative, a sot is like a toast;  
For when their substances in liquor sink,  
Both properly are said to be in drink.

Anagrams, says Mr. D'Israeli, were very often devoted to the personal attachments of love or friendship. *Curiosities of Literature*, vol. iii.

\* Anagrammatism or metagrammatism (which, by the way, is a more accurate term) is a Greek compound, and is defined by Camden to be "the dissolution of a name, truly written into its letters as its elements, and a new connexion of it by transposition, without addition, subtraction, or change of any letter into different words, making some perfect sense applicable to the person named." And this, the same laborious author farther informs us, "is the only quibblescence that hitherto the alchemy of wit could draw out of names." See the *Bibliotheca Ralis Philosophica* of Lepenul, published at Frankfurt on the Maine in 1662. He enumerates thirty-five treatises on anagrammatical subjects, all but about five, which were written by Germans. Among the five alluded to is a collection of anagrams and chronograms, published in London, 1613, by one J. Cheeke, an Englishman. As far as science may be recommended by the antiquity of its origin, anagrammatism has every thing in its favour, since there is ground for assuming, that it may be traced to the time of the great Jewish lawgiver himself, whose mystical traditions, called *Cabala*, communicated by him to the chosen seventy, are thought by some to have been neither more nor less than so many anagrams. At least it is certain, that among the various species of cabalistical lore, in which the Jews delighted; the one called the *mura* was precisely synonymous with what we understand by anagrammatism; and hence the ancient cabalists were of opinion, that there was not a word in the whole Mosiac law which did not contain some hidden mystery, that might, by this means, be disclosed. Upon this principle they discovered the Hebrew word for "grace" in the name of Noah, the words "he shall receive" in that of Messiah, and in the name of the Virgin Mary, the anagrammatical appellation, "our holy mistress." After the Jews, the Greeks appear to have been the earliest cultivators of this mystical learning. And in order of time, the next people that evinced any passionate attachment to this ancient art, are the French, who, in the sixteenth century, about the time of Francis I. began, as Camden tells us, "to distill their wits herein," and Louis XIII. retained at his court Thomas Billon, a Provençal, as a sort of anagrammatist laureate, with an annual pension of twelve hundred livres. The Italians and Germans have also displayed a great deal of ingenuity in this kind of writing.

1626. Died, JOHN LEGATE, citizen and stationer, of London, and printer to the university of Cambridge, to which office he was appointed in 1589. He married Agatha, the daughter of Christopher Barker, printer to queen Elizabeth, (see page 433 *ante*.) by whom he had eleven children; the eldest, John, was also a printer, and succeeded in the license to print Thomas Thomas's *Dictionary*. In 1606 John Legate, the elder, printed the seventh edition of Thomas's *Dictionary*, wherein he used the impression of the ALMA MATER CANTABRIGIA, and about it, HINC LYCEUM ET POEVLA SACRA.

1627. THOMAS BUCK succeeded Cantrell Legge as printer to the university of Cambridge. He had held the office from 1606.

1627. Died, FRANCIS SAVARY DE BREVES, who projected the publication of an edition of the *Arabic Bible*. He was born towards the close of the sixteenth century; and was early employed in the service of the court. He was sent as ambassador to Constantinople, where he remained twenty-two years. On his return, about 1611, Henry IV. sent him to Rome, as ambassador in the pontificate of Paul V. During his residence at the papal court, he attempted the publication of the *Arabic Bible*, as the means of reclaiming the Mohammedans from their errors, for which he considered the dispersion of vernacular translations most peculiarly adapted. With this design, he established an oriental press, at which nothing more than the *Psalms* was ever printed. Of these there were two editions, one of the *Arabic* only, translated from the Greek, and printed in 1614; and the other from the Syriac, with a Latin version, printed in the same year. Both of them in 4to. He engaged Scialac and Sionita, as editors and correctors. From some cause, the further prosecution of the work was dropped. In 1615 Savary returned to Paris, taking with him Gabriel Sionita, and his printer, Stephen Paulin, who established the oriental press in that city, under his patronage; and with a liberality characteristic of a great mind, he lent his types to those who were desirous of printing works in the oriental languages. On his decease, the English and Dutch made proposals for the purchase of his types, and his oriental manuscripts, of which he had brought ninety-seven from the east; but the whole were bought by the king of France. The types are said to be still extant in the royal printing office. Savary published an account of his travels, from which we learn that he recommended the extension of the commerce of his country, and the propagation of christianity, by certain conquests in the east.

1627. The plate of the stationers' company was pledged to raise £840, towards a loan to king Charles I.; and in 1628, three bills of sale of plate were sealed with the common seal, to Dr. Eden, Walter Terrill, and John Burrage, for £100 each.

1628, July 19. When king Charles I. printed his speech on the dissolution of the parliament, which excited such general discontent, some one

printed queen Elizabeth's last speech, to accompany Charles's. This was presented to the king by his own printer, John Bill, not from a political motive, but merely by way of complaint, that another had printed, without leave or license, that which, as king's printer, he asserted was his own copyright. Charles does not appear to have been pleased with the gift, and observed, "*you printers print anything.*" Three gentlemen of the bed-chamber, continues the writer, commended Mr. Bill very much, and prayed him to come oftener with such rarities to the king, because they might do some good.

1628. *The Countess of Lincoln's Nursery.* This is a small but valuable tract, written by Elizabeth countess of Lincoln, and is addressed to her daughter-in-law, Bridget, countess of Lincoln. A judicious writer observes, this work is an excellent proof of her good sense, being full of fine arguments, and capable of convincing any one, that is capable of conviction, of the necessity and advantages of mothers nursing their own children,—she herself being the mother of seven sons and nine daughters. By her ladyship's speaking of it as the first work of hers ever printed, one would imagine she had written more, but nothing else has been found.

1629. In this year, Ben Jonson, the poet, was in great distress from sickness. Charles I. sent him a present of one hundred pounds, which, sir Walter Scott justly says, would be no trifling gift for a poor bard, even in the present day. Jonson acknowledged the royal generosity in a grateful epigram, which turns upon a declaration that Charles was possessed of both the gift of curing the king's evil, and the poet's evil—poverty; but his gratitude seems to have been much of that kind which consists in a lively anticipation of future favours, for, in the very next year, we have him petitioning that his pension of a hundred merks may be made a hundred pounds.

*The humble petition of poor Ben,  
To the best of monarchs, masters, and men,*

KING CHARLES:

—Doth humbly show it,  
To your majesty, your poet:

That, whereas your royal father,  
James the blessed, pleased the rather,  
Of his special grace to letters,  
To make all the muses debtors  
To his bounty, by extension  
Of a free poetic pension,  
A large hundred merks annuity,  
To be given me in gratuity,  
For done service, and to come;  
And that this so accepted sum,  
Or dispensed in books or bread,  
(For with both the muse was fed),  
Hath drawn on me from the times  
All the envy of the rhymes,  
And the rattling pit-pat noise  
Of the less poetic boys,  
When their pop-guns aim to hit  
With their pellets of small wit  
Parts of me (they judged) decayed,  
But we last out still unlaid.

Please your majesty to make,  
Of your grace for goodness' sake,  
Those your father's merks your pounds:  
Let their spite, which now abounds,  
Then go on and do its worst;  
This would all their envy burst:  
And so warm the poet's tongue,  
You'd read a snake to his next song.

The king accordingly having received a surrender of the patent for the former annuity, was pleased to grant a new one for one hundred pounds, and "one terce of Spanish wine yearly, out of our store of wines remaining in our cellars within the palace of Whitehall;" and this "in consideration of the acceptable service done unto us and our said father, by the said Benjamin Jonson, and especially to encourage him to proceed in those services of his wit and pen which we have enjoined unto him, and which we expect from him." This patent is dated March 26, and its efficacy was shewn in about two months by an epigram on the queen then lying in on the birth of a prince,—afterwards Charles II.

1629. The secret bibliographical history of these times would show the extraordinary state of the press in the trade of *Bibles*. The writer of a curious pamphlet exposes the combination of those called king's printers, with their contrivances to keep up the price of bibles; their correspondence with the booksellers of Scotland and Dublin, by which means they retained the privilege in their own hands. Printing of English bibles was an article of open trade; every one printed at the lowest price, and as fast as their presses would allow. Even those who were dignified as "his majesty's printers" were among these manufacturers, and they got bibles printed cheaper at Edinburgh. In this year, when folio bibles were wanted, the Cambridge printers sold them at ten shillings in quires; on this the Londoners set six printing houses at work, and, to annihilate the Cambridgians, printed a similar folio bible, but sold with it five hundred *quarto* Roman bibles, and five hundred *quarto* English, at five shillings a book; which proved the ruin of the folio bibles, by keeping them down under the cost price. Another competition arose among those who printed English bibles in Holland, in *duodecimo*, with an English imprint, for half the price even of the lowest in London. Twelve thousand of these *duodecimo* bibles, with notes, fabricated in Holland, usually by our fugitive sectarians, were seized by the king's printers, as contrary to the statute.\* Such was this shameful war of bibles—folios, quartos, and duodecimos, which were for some time suffered to be printed upon bad paper, and so corrupted that no books ever yet swarmed with such innumerable errata. See 1632 post.

1629. The first motion relative to printing and publishing of books in the house of commons was made by Mr. Seldon;—he moved to make a law to regulate printing and publishing, and to restrict the decrees of the star chamber.

1629. GEORGE PURLOWE printed the following curious book, *News out of Purgatory*. Onely such a Jest as his Jigge, fit for gentlemen to laugh at an houre, &c. Published by an old

\* *Scintilla, or a Light broken into darke Warehouses; of some Printers, sleeping Stationers, and combining Book-sellers; in which is only a touch of their forestalling and ingrossing of Books in Patents, and raising them to excessive prices. Left to the consideration of the high and Honourable House of Parliament, now assembled. London: No where to be sold, but some where to be given. 1611.*

companion of his, Robin Goodfellow. Richard Tarlton. London: printed for and to be sold by Francis Grove, on Snow Hill, at the signe of the Wind Mill, neere unto St. Sepulchre's Church. Richard Tarlton was a celebrated actor, writer, and jester; he died Sept. 3, 1588.

1629. *The Merchandizes of Popish Priests; or a Discovery of the Jesuites Trumpery, newly packed in England; laying open to the world how cunningly they cheate and abuse people, with their false, deceitfull, and counterfeit Wares. Written in French by John Chassarnan, and truly translated into English.* Printed at London, for Henry Gosson, and are to be sold at his shop, on London Bridge. Small 4to.

1629, Oct. 28. The company of stationers were called upon for £60 4s. as their quota\* of £4,300 expended by the city for pageants and other solemnities, and beautifying the city, on the late entrance-time of his majesty passing through the same for his coronation;† and for other necessary and public services of the city.

1630. HUMPHRY LOWNES gave £20 to the stationers' company. He was elder brother of Matthew Lownes, (noticed at page 476 ante,) and was born about 1566. He was bound apprentice to William Lownes, in 1580. His first shop was at the west door of St. Paul's, and he lived afterwards at the Star on Bread-street-hill. He was under warden in 1616, and 1626. There was an earlier Humphry Lownes, who was upper warden in 1615, and died before 1620. The name of Lownes was long famous in the trade.

1629. Among the most eminent English bookbinders, of early times, the family of FERRARS stands distinguished for the taste and skill displayed in their works. They were settled at Little Gidding, in the county of Hertford, in the reign of James I. and is chiefly known for the ascetic piety of its members; but as industry formed an essential part of their rule, the family was taught the art of bookbinding in all its parts. The fame of their work reached the ears of Charles I. to whom a splendid *Concordance of the Four Evangelists* was exhibited, adorned with many beautiful pictures, and bound by one of Nicholas Ferrars' nieces, "all wrought in gold, in a new and most elegant fashion." Dr. Wordsworth, in his *Ecclesiastical Biography*, vol. v. has given several instances of the magnificent works executed by individuals of this family.

1630. *The German Intelligencer.* Nathaniel Butter, the active newsmonger of the times, was influenced by his interest to tell—"News, old news, and such news as you never heard of;"—and converted his *Weekly News* into half-yearly columns, under the above title.

1630. *Died, JOHN KEPLER*, a celebrated German astronomer, and author of many valuable discoveries in that science. He was born De-

cember 27, 1571, at Weil, near Wirtemberg. In the year 1620, he published, at Sagan, a considerable town of Prussian Silesia, some *Ephemerides*, which perhaps may have been the earliest attempts at printing in that town; as the colophon to his book states, that the printing of it was commenced at Lintz, and finished at Sagan. It was executed in the ducal printing office, which (as we learn from one of Kepler's dedications) was erected at the beginning of the year 1630.

It appears that Kepler had been living at Lintz, where he had published several of his works; but when in the year 1627 or 1628, some civil commotions overthrew the printing establishment, and compelled the printer to fly, he began to look out for some quiet place of residence, where he might pursue his celestial observations. At this conjuncture he found a friend in Albert duke of Friesland and Sagan, who granted him a house and an annual pension, and likewise promised him a press: he took up his residence at Sagan in the month of July, 1628. He had previously purchased a supply of types, figures, &c., with which his former *Ephemeris* had been printed, and these he brought with him: his press appears to have been furnished to him before the close of 1628. He continued here until his death.

1630. *Died, FREDERICK MOREL* the younger, who was probably exceeded in learning by none of the Parisian printers contemporary with Robert or Henry Stephens; and he certainly surpassed the greater part of them in diligence, in the number and variety of his impressions, and in the special labour which he bestowed upon them. To this ardent typographer scholars are indebted for the first appearance of many curious Greek tracts and larger works, theological, rhetorical, poetical, and scientific, which he drew from the repositories of the *Bibliothèque Royale*, and generally illustrated with able translations; imitating in poetical works the measures of the Greek originals. Perhaps so many literary honours were scarcely ever accumulated upon any other individual. Maittaire observes, that he was appointed "Typographus Regius," "Regius Interpres," "Professor utriusque Lingue et Eloquentiæ," "Architypographus," (probably a newly created distinction,) and lastly, "Professorum Regiorum Decanus." Many of, or perhaps all these honours he bore, at one and the same time. We are certified by the subscription found in his impression of the *Acta Concilii Nicæni, anni 1599*, that in his person the offices of Professor Regius, and Architypographus Regius, were then united; and we observe a similar combination of other honours of his incidentally mentioned in several other of his impressions: "De quanto honoris culmine," (says Maittaire,) "nunc temporis decedit ars typographica!"

La Caille believes that Frederic Morel (the younger) was appointed king's printer in general, so early as in the year 1581, his father being then living. This title was fully confirmed to

\* This was regulated according to the proportion of 140 quarters of corn (at which the company of stationers were in general rated on an assessment for provisions) to 10,000.

† King Charles I. was crowned Feb. 2, 1626.

him at the decease of his father, in 1583; from which period he continued to exercise the profession with extraordinary zeal and diligence almost thirty-four years. He had possession of his father's residence, in *via Jacobæ*; and instead of the Mulberry Tree, his father's usual mark, he sometimes distinguished his title-pages with the "insigne Fontis:" sometimes he used the device common to the "Impressores regii," with or without the motto: sometimes he exhibited the arms of France and Navarre, or of France only: occasionally the arms of those to whom he inscribed his impressions, or the heads (or portraits) of the authors, or some medallion relating to the subject of the volume.

As a commentator, he particularly distinguished himself by very learned notes on *Libanius*, and on the *Sylve* of Statius; which include corrections and illustrations of various Greek and Latin authors. He was the author of a Latin tragedy, entitled *Alexander Severus*, and translated into Greek metres several portions of different Latin poets.

It is related that whilst Frederick Morel was attentively engaged upon his Latin version of *Libanius*, he was informed that his wife, Isabella Duchesne, daughter of one of the professors of the College Royale, was very ill. He answered, I have only two or three periods to translate, and will then go to see her. The messenger returned to inform him she was dying. I have but two words to write, said he, and will be with you presently. At length they came to announce to him that his wife had expired. I am very sorry for it, he replied—she was an excellent woman. In the early part of his career, he seldom connected himself with any other of the Parisian printers; but about the year 1600, Frederick availed himself of the subsidiary press, and professional assistance of his brother Claude. Maittaire observes, that from this time, the care of many impressions was left wholly to Claude, though some continued occasionally to exhibit the name of Frederick. The same author thus notices this illustrious family:—"Late viguit Morellorum nomen; quorum Typographeum ab anno 1557, ad 1646, celebratum...diutius quam ullum aliud, si Stephanos excipias, literarum reipublicæ operam suam indefessam consecravit."

1631, Jan. 9. The *Swedish Intelligencer*, with a portrait of Gustavus Adolphus, of Sweden, half-yearly, by N. Butter.\* In the preface, in 1632, he says, "Now the third time revised, corrected, and augmented." We are assured that "very good use have also been made of the *Weekly Currantes*, which if a man of judgment read, he shall find very true and very punctual; whosoever will be cunning in the places and persons of Germany, and would understand her wars, let him not despise her currantes." Butter had for his compiler, Wil-

liam Watts, of Caius college, of whom it may be said, that he was educated for other labours; and of whom Vossius speaks as *doctissimus et clarissimus Wattius, que optime de Historia meruit*. He was born at Lynn, in Norfolk, and educated at Oxford and Cambridge. He travelled into many countries,\* and on his return was made chaplain to Charles I. He suffered much in the royal cause, and was present at many engagements in the field. He died on board prince Rupert's fleet, in the harbour of Kinsale, in Ireland, in the year 1649. Watts began several numbers of *Newes books*, in the English tongue, (more than forty) containing the occurrence alone in the wars between the king of Sweden and the Germans. William Watts may, therefore, says Mr. Chalmers, be deemed the *Gallo Belgicus* of England.

1631. LUCRETIA EASTE, widow of Thomas Easte, (noticed at page 448 *ante*), gave a legacy of £20 to the stationers' company, for a piece of plate.

1631. Mr. BUSBY gave the stationers' company £5 "for a meeting." At that time the fixed sum of £5 was frequently given by individuals for the attendance of the livery on the funerals of their husbands and wives.

1631. THOMAS HARPER printed the play of *Cæsar and Pompey*, a Roman tragedy, declaring their wars, out of whose events is erected the proposition, only a just man is a freeman. By George Chapman. At London, for Godfrey Edmonson and Thomas Alchorne.

1631. A tragi-comedy, called *Match mee in London*. As it hath been often presented; first at the Bell in St. John-street, and lately at the private house in Drury-lane, called the Phoenix.

Si non his utere mecum.

Written by Tho. Dekker. London: printed by B. Alsop and T. Faucett, for H. Scile, at the Tyger's head, in St. Paul's church-yard.

All this writer's plays are remarkably scarce, as well as those which he wrote himself, as those written in conjunction with Webster.

Thomas Dekker exceeds most of his cotemporaries in whimsical drollery; but yet in the midst of all his humour, glances at the deepest and most touching of human emotions. He was satirized by Ben Jonson in his *Poetaster*, under the name of Crispianus, but Dekker retorted in *Satyrmastix*; or, *Untrussing of the Humorous Poet*. He died in 1638.

1631. If the benefactors of mankind deserve to be remembered with gratitude, no apology will be necessary for inserting in this work the name of sir Hugh Middleton, who died in this year. He was the projector of that gigantic undertaking for supplying London with water, which has since been incorporated under the

\* In the catalogue of the Gordonstoun library is described a curious copy of the *Swedish Intelligencer*, with a great variety of tracts relating to Gustavus Adolphus, king of Sweden, 1732-9, which was sold for £18 10s.

\* In the books of the privy council, December 22, 1620, there is a pass for William Watts, who was going, as chaplain, with sir Albert Moreton, then appointed envoy to the united province of Germany; but this pass was not to allow him to go to Rome.

designation of the "New River Company." This scheme, although the greatest undertaking ever attempted by an individual, and the source of accumulating immense wealth, proved the ruin of the great man whose mind conceived the design, and whose personal exertion achieved the execution of it. The undertaking was commenced in 1608, and finished in 1613; and the water is supplied by uniting two streams in Hertfordshire and Middlesex, and conveying the same through various soils for a course of sixty miles. Sir Hugh was a native of Denbighshire, and was knighted by James I.

1631, May 6. *Died*, Sir Robert Bruce Cotton, bart., founder of the Cottonian library; and whose arduous labours have contributed so much to illustrate the history and antiquities of this country; whose noble collection of books and manuscripts were such an invaluable acquisition to the national museum; "whose name," as an admirable writer observes, "must always be remembered with honour; and whose memory cannot fail of exciting the warmest sentiments of gratitude, while the smallest regard for learning subsists among us." He was of an ancient family, and born at Darton, in Huntingdonshire, January 22, 1570, and studied at Cambridge. About 1585, he went to London, and was admitted into a society of antiquaries, who met at stated seasons for their own amusement. He accompanied Camden in his travels through the kingdom, and very much assisted him in carrying on and perfecting his *Britannia*. He was knighted by James I. and very much courted by the privy council and ministers of state upon almost every point relating to the constitution. New projects being contrived to repair the royal revenue, which had been so prodigally squandered, none pleased James so much as the creating a new order of knights, called baronets, and sir Robert Cotton was the thirty-sixth baronet that was created. He was a member of the first parliament of Charles I. and joined in complaining of those grievances which the nation was said, in 1628, to groan under; but was always for mild remedies, zealous for the honour and safety of the king, and had no views but the nation's advantage.

It is almost incredible how much we are indebted to the library of sir Robert Cotton for what we know of our own country. Such a man, we may imagine, must have had many friends and acquaintance: and indeed he was not only acquainted with all the virtuosi and learned in his own country, but with many also of a high reputation abroad. He died May 6, 1631, aged 60 years, and was succeeded by his only son, Thomas, who died in 1682.

1631, Dec. 23. *Died*, MICHAEL DRAYTON, a very voluminous author, but throughout the whole extent of his writings, shows the fancy and feeling of a true poet. He was born in Warwickshire, in the year 1563. In 1593, he published a collection of pastorals, entitled the *Shepherd's Garland*; which was followed by his poems of the *Baron's Wars*, and *England's*

*Heroical Epistles*. In 1613, he published his *Polyolbion*, to which Mr. Selden wrote notes. It is constructed in an uncommon measure of twelve syllables, and is a work entirely unlike any other in English poetry, both in its subject, and the manner in which it is written. It is full of topographical and antiquarian details, with innumerable allusions to remarkable events and persons, as connected with various localities; yet such is the poetical genius of the author, so happily does he idealize almost every thing he touches on, and so lively is the flow of his verse, that we do not readily tire in perusing this vast mass of information. He seems to have followed the manner of Spenser in his unceasing personifications of natural objects, such as hills, rivers, and woods. His works were reprinted in 1748, in one volume folio; and 1753, in ten volumes, 8vo. He was buried in Westminster abbey.

The following lines are a good specimen of his style:

#### THE SOUL.

—— To show her powerful deity,  
Her sweet Endymion more to beautify,  
Into his soul the goddess doth infuse  
The fiery nature of a heavenly muse;  
Which the spirit labouring by the mind,  
Partaketh of celestial things by kind:  
For why the soul being divine alone,  
Exempt from gross and vile corruption,  
Of heavenly secrets incomprehensible,  
Of which the dull flesh is not sensible,  
And by one only powerful faculty,  
Yet governeth a multiplicity,  
Being essential uniform in all  
Not to be severed or divided;  
Not in her function biddeth her estate  
By powers divine in her ingenerate;  
And so by inspiration conceiveth,  
What heaven to her by divination breatheth.

1632, Feb. 6. Henry Sherfield, recorder of the city of Salisbury, was tried in the star chamber, and fined £500, and also required to make acknowledgment of his offence before the bishop of the diocese and such persons as he should think proper to be present. The crime for which this sentence was inflicted, was as follows:—In one of the windows of the cathedral were some fine paintings, the six days work of the creation, in four different lights or partitions, were exquisitely represented; in several parts of it were figures of God the Father, portrayed in blue and red vests, like little old men; the head, feet, and hands naked; in one place having a pair of compasses on the sun and moon; in others were some blunders committed in point of chronology, the godhead being figured creating the sun and moon on the third day, whereas it should be on the fourth; and the trees and herbs on the fourth day, instead of the third; the fowls on the third day, instead of the fifth; and the creation of man (from whose side the woman literally rises) on the fifth, instead of the last; and the rest of the seventh day was represented by God the Father in a deep sleep. The superstition of this piece raised the spleen of the recorder, who irreligiously and violently broke this window; for which the above sentence was inflicted.

1632. ROBERT BARKER and MARTIN LUCAS, the king's printers, at London, printed an edition of the bible of one thousand copies, in which a serious mistake was made by leaving out the word *not* in the seventh commandment, causing it to read "Thou shalt commit adultery." His majesty king Charles I. being made acquainted with it by Dr. William Laud, bishop of London, an order was given for calling the printers into the star chamber, where, upon the fact being proved, the whole impression was called in, and the printers fined £3000. With this fine, or a part of it, a fount of fair Greek types and matrices were provided, for publishing such manuscripts as might be prepared, and should be judged worthy of publication; of this kind were the *Catena* and *Theophylact*, edited by Lyndsell. The following is a copy of king Charles's letter to bishop Laud:

"Most reverend father in God, right trusty, and right entirely beloved counsellor, we greet you well. Whereas our servant Patrick Young, keeper of our library, hath lately with industry and care, published in print an epistle of *Clemens Romanus* in Greek and Latin, which was never printed before, and has done this to the benefit of the church, and our great honour; the manuscript by which he printed it being in our library, or in the libraries of our universities of Oxford and Cambridge, or elsewhere, if there were Greek letter, matrices, and money ready for the work, which pains of theirs will tend to the great honour of ourself, this church, and nation: we have thought good to give them all possible encouragement herein. And do therefore first require you, that the fine lately imposed by our high commissioners upon Robert Barker and Martin Lucas, for base and corrupt printing of the bible, being the sum of three thousand pounds, be converted to the present buying of such and so many Greek letters and matrices as shall be by you thought fit for this great and honourable work. And our further will and pleasure is, that the said Robert Barker and Martin Lucas, our patentees for printing, or those which either now are, or shall hereafter succeed them, being great gainers by that patent, which they hold under us, shall at their own proper costes and charges of ink, paper, and workmanship, print, or cause to be printed, in Greek, or Greek and Latin, one such volume in a year, be it bigger or less, as the right reverend father aforesaid, or our servant Patrick Young, or any other of our learned subjects shall provide and make ready for the press."

A prior circumstance, indeed, had occurred, which induced the government to be more vigilant on the biblical press. The learned Usher, one day hastening to preach at Paul's cross, entered the shop of one of the stationers, as book-sellers were then called, and inquiring for a bible

of the London edition, when he came to look for his text, to his astonishment and his horror, he discovered that the verse was omitted in the bible! This gave the first occasion of complaint to the king of the insufferable negligence and incapacity of the London press; and, says the manuscript writer of this anecdote, first bred that great contest which followed, between the university of Cambridge and the London stationers, about the right of printing bibles.

In 1634, an edition of the bible was printed at London, in which the text ran (Psalm xiv. 1,) "The fool hath said in his heart *there is a God.*"

Mr. Nye (in his defence of the canon of the new testament,) tells us that, in consequence, the printers were heavily fined, and all the copies were suppressed by order of the king.

In 1638, another error, of less moment, indeed, than that for which the fine was imposed, but rendered important by the disputes between the independents and episcopalians, appeared in the edition of the bible printed at Cambridge, by Buck and Daniel. This was the alteration of the word *we* into *ye*, in Acts vi. 3. The error was continued in several editions, till 1685, when it was corrected. See 1638, *post*.

During the civil wars a large impression of Dutch English bibles were burnt by order of the assembly of divines, for these *three errors* :—

Gen. xxxvi. 24.—This is that *ass* that found rulers in the wilderness—for *mule*.

Ruth iv. 13.—The Lord gave her *corruption*—for *conception*.

Luke xxi. 28.—Look up, and lift up *your* hands, for your *condemnation* draweth nigh—for *redemption*.

These errata were none of the printer's; but, as a writer of the times expresses it, "egregious blasphemies and damnable errata" of some sectarian, or some Bellamy editor of that day!

It appears that the authentic translation of the bible, such as we now have it, by the learned translators in the time of James I., was suffered to lie neglected. The copies of the original manuscript were in the possession of two of the king's printers, who, from cowardice, consent, and connivance, suppressed the publication; considering that a bible full of errata, and often, probably, accommodated to the notions of certain sectarists, was more valuable than one authenticated by the hierarchy!

The proverbial expression of *chapter and verse* seems to have originated in the puritanic period, just before the civil wars under Charles I., from the frequent use of appealing to the bible on the most frivolous occasions, practised by those whom South calls "those mighty men at *chapter and verse*." With a sort of religious coquetry, they were vain of perpetually opening their gilt pocket bibles; they perked them up with such self-sufficiency and perfect ignorance of the original, that the learned Selden found considerable amusement in going to their "assembly of divines," and puzzling or confuting them. A ludicrous anecdote on one of these occasions is given by a cotemporary, which shows how ad-

mirably that learned man amused himself with this "assembly of divines!" They were discussing the distance between Jerusalem and Jericho, with a perfect ignorance of sacred or of ancient geography; one said it was twenty miles, another ten, and at last it was concluded to be only seven, for this strange reason, that fish was brought from Jericho to Jerusalem market! Selden observed, that "possibly the fish in question was salted," and silenced these acute disputants. At length, owing to the numerous complaints of the gross errors in the scriptures, the printing of bibles was a privilege granted to WILLIAM BENTLEY; but he was opposed by Hills and Field; and a paper war arose, in which they mutually recriminated on each other, with equal truth. See the year 1653, post.

1632. In this year a patent was granted to the university of Oxford, empowering them to have three printers, with a licence to print all manner of books not forbidden by law.

1632. *Novum Testamentum Græcum*, was printed at Cambridge, by Mr. Buck, and has ever been admired for the perspicuity of its type, as well as for the accuracy of its typography. But it is by no means generally known, that the types were borrowed from the sister university of Oxford. Lord Pembroke\* was the chancellor of the university of Cambridge, and there is said to be a letter in existence from his lordship to the curators of the university of Oxford, entreating from them the loan of their Greek types, as they made no use of them themselves.

1632. JOHN NORTON printed the following play, *The Fatal Dowry*, a tragedy, as it hath been often noted at the private house in Black Friars, by their majesties servants. Written by P. M. and N. F. London: printed by John Norton for Francis Constable, and are to be sold at his shop, at the Crane, in Paul's church yard. P. M. is Philip Massinger, and N. F. is Nathaniel Field. The play is said to be a very good one.

1632. MARK WYON, a printer of Douay, executed the following English work entitled, the *Whetstone of reproof*; being a reply to sir Humphrey Linde's *Safe way*; by T. T. Sacristan and Catholike Roman, 12mo. which bears for imprint Catuapoli apud viduam Marci Wyonis. Thus it it appears that Catuapolis is another name for Douay. When Wyon died is unknown, but his widow continued to reside in that town at the sign of the Golden Phoenix, until the year 1640, in which year she was the publisher of a *Disputation of the Church*, by E. S. F. 2 vols. 12mo.

\* William, earl of Pembroke, was the son of the illustrious Mary Sidney, who united in himself the exquisite virtues of his mother, with the manners, accomplishments, and character of a true English gentleman; beloved by every good man, and by all the muses of the age. He was born at Wilton, February 8, 1580, and died at Baynard's castle, April 10, 1630, and was buried in Salisbury cathedral. He was the first who wore knit stockings in England, which were introduced in this reign. They were presented to him by William Rider, an apprentice, near London bridge, who happened to see a pair from Mantua, at an Italian merchant's, in the city, and made a pair exactly like them.

1632. THE POETICAL GARLAND OF JULIA. Huet has given a charming description of a present made by a lover to his mistress; a gift which romance has seldom equalled for its gallantry, ingenuity, and novelty. It was called the *Garland of Julia*. To understand the nature of this gift, it will be necessary to give the history of the parties. The beautiful Julia d'Angennes was in the flower of her youth and fame, when the celebrated Gustavus, king of Sweden, was making war in Germany with the most splendid success. Julia expressed her warm admiration of this hero. She had his portrait placed on her toilette, and took pleasure in declaring that she would have no other lover than Gustavus. The duke de Montausier was, however, her avowed and ardent admirer. A short time after the death of Gustavus,\* he sent her, as a new-year's gift, the POETICAL GARLAND, of which the following is a description.

The most beautiful flowers were painted in miniature by an eminent artist, one Robert, on pieces of vellum, all of equal dimensions. Under every flower a space was left open for a madrigal on the subject of the flower there painted. The duke solicited the wits of the time to assist in the composition of these little poems, reserving a considerable number for the effusions of his own amorous muse. Under every flower he had its madrigal written by N. du Jarry, celebrated for his beautiful caligraphy. A decorated frontispiece offers a splendid garland, composed of all these twenty-nine flowers; and on turning the page a cupid is painted to the life. These were magnificently bound, and enclosed in a bag of rich Spanish leather. When Julia awoke on new-year's day, she found this lover's gift lying on her toilette; it was one quite to her taste, and successful to the donor's hopes.

Of this Poetical Garland, thus formed by the hands of Wit and Love, Huet says, "As I had long heard of it, I frequently expressed a wish to see it: at length the duchess of Uzzez gratified me with the sight. She locked me in her cabinet one afternoon with this garland: she then went to the queen, and at the close of the evening liberated me. I never passed a more agreeable afternoon."

One of the prettiest inscriptions of these flowers is the following, composed

#### ON THE VIOLET.

"Modeste en ma couleur, modeste en mon séjour,  
Franche d'ambition, je me cache sous l'herbe;  
Mais si sur votre front je puis me voir un jour,  
La plus humble des fleurs sera la plus superbe."

Modest my colour, modest is my place,  
Pleas'd in the grass my lowly form to hide;  
But, 'mid your garland might I twine with grace,  
The humblest flower would feel the loftiest pride.

At the sale of the library of the duke de la Valliere, in 1784, it was actually sold for the extravagant sum of 14,510 livres! though in 1770, at Gaignat's sale, it only cost 780 livres.

\* Gustavus Adolphus, king of Sweden, was born at Stockholm, December 9, 1594, and was killed at the battle of Lutzen, November 6, 1632, (o. s.)

The Abbe Rive, superintendent of the Valliere library, published, in 1779, an inflammatory notice of this garland; and as he and the duke had the art of appreciating, and it has been said making spurious literary curiosities, this notice was no doubt the occasion of the maniacal price. In the great French revolution, this literary curiosity found its passage into this country. A bookseller offered it for sale at the enormous price of £500.

1632. *A Slavonic New Testament* was printed in the monastery of Kuteinski, in Russia, the exact site of which is not learnt. Another edition appeared in the year 1652.—*Henderson*.

1632. The continuation of the *Weekly News*, No. 49,\* in fourteen pages, printed for Nathaniel Butter.

1632. Catalogues of printed books first published in Ireland.

1632. The company of stationers contributed £150 toward the repairs of St. Paul's church.

1633. *The English Traveller*. As it hath bene publicly acted at the Cock Pit, in Drury Lane, by His Majesties Servants. Written by Thomas Heywood.

Aut prodesse solent aut delectare.

London, printed by Robert Raworth, in Old Fish-street, neere Saint Mary Maudlina Church.

THOMAS HEYWOOD was an actor and dramatic writer who died early in this reign. It is stated that he wrote two hundred and twenty plays, of which only twenty-four are now extant, and those of little merit. Mr. Hone, however, in his *Table Book*, thus speaks of Heywood, "If I were to be consulted as to a reprint of our old English dramatists, I should advise to begin with the collected plays of Heywood. He was a fellow-actor, and fellow-dramatist, with Shakspeare. He possessed not the imagination of the latter; but in all those qualities which gained for Shakspeare the attribute of *gentle*, he was not inferior to him. Generosity, courtesy, temperance in the depths of passion; sweetness, in a word, and gentleness, shine throughout his beautiful writings in a manner more conspicuous than in those of Shakspeare, but only more conspicuous inasmuch as in Heywood these qualities are primary, in the other subordinate to poetry. I love them both equally, but Shakspeare has most of my wonder."

1633. AUGUSTUS MATTHEWES printed the following play: *A Match at Midnight*. A pleasant comedie, as it hath bene acted by the children of the revels. Written by William Rowley.

London: printed by Augustus Matthewes, for William Sheares, and are to be sold at his shop in Brittaines Burse.

William Rowley lived in the reign of James I. and wrote eleven plays, and was also engaged in eight other plays with Heywood, Middleton,

Massinger, Day, and others. There was a Samuel Rowley who lived at the same time, and was the author of two plays.

1633. In this year secretary Windebank, in a letter to the lord deputy Strafford, ordered a book which had been imported into Ireland from Loraine, to be suppressed, and to call the author, Peter Lombard, titular primate of Armagh, to account for the same, who it appears was dead at that period. It appears that so late as this period, very few works were printed in Ireland. The progress of printing was probably retarded for many years by the unfortunate state of the country, and the tyranny of the *star chamber*, the arbitrary decrees of which compelled those who were opposed to the established order of things, to have recourse to the printing of their works in a foreign land.

1633. Mr. LOCKE left a legacy of £50 towards building the stationers' hall; and a piece of plate value £10.

1633. The desire of news from the capital, on the part of the wealthier country residents, and probably the false information of the news writers, led to the establishment of a very curious trade, that of a news correspondent, who, for a subscription of three or four pounds per annum, wrote a letter of news every post day to his subscriber in the country; and the trade of a news correspondent at length seems to have suggested a sort of union of written news and published news. In the household book of Skipton castle, in Yorkshire, in this year, there is the following item:—paid to captain Robinson, by my lord's command, for writing letters of newes to his lordship, for half a year, five pounds." The practice was continued by this family till the year 1687.

1633, Nov. Mr. GREEN, a printer, who had taken some offence from archbishop Laud, was committed to Newgate for going to court at St. James's, with a great sword by his side, swearing the king should do him justice, or he would take another course with the prelate. "All the harm," says the archbishop, "that I ever did him, was, that being a poor printer, I procured him of the stationers' company, five pounds a year for life."

1634, March 16. Died, SIMON WATERSON, citizen and stationer, of London, aged 72 years. He was son of Richard Waterson, noticed at page 337, *ante*. He had a monument to his memory in the church of St. Paul, with a very long Latin epitaph, erected by his son John.

1634, Died, PETER DE JODE, a celebrated engraver on wood, at Antwerp, was pupil of Goltzius. He designed correctly, and was less a mannerist than his master.

1634. *A Maske*, presented at Ludlow castle, on Michaelmas night, before the right honourable John, earle of Bridgewater, viscount Brackley, lord president of Wales, and one of his majesties most honourable privie counsell. London: printed for Humphrey Robinson, at the signe of the Three Pidgeons, in Paul's Church-yard. 1637. This is the first edition of Milton's *Masque of Comus*, a copy of which is in the Garrick collection.

\* In this list, generally speaking, the first number only is noticed; but, in some few instances, the earlier papers not having been preserved, the earliest that is known to exist will be mentioned.

1634. *Died*, GEORGE CHAPMAN, a poet and dramatist, in the 77th year of his age. He was the author of sixteen plays, and is also distinguished as the first translator of Homer into English verse. He has a high philosophical vein in his tragedies, and a very lively humour in his comedies, but wants passion and imagination. His *All Fools*,\* *Widow's Tears*, and *Eastward Hoe*,† are his most esteemed plays of the latter kind; the last contains the first idea of Hogarth's *Idle and Industrious Apprentices*. The following is an abstract from one of his plays, describing

## AN AUTHOR'S VANITY.

— the foolish poet, that still will  
All his self-loved verse in paper royal.  
Or parchment ruled with lead, smooth'd with the pumice,  
Bound richly up, and strung with crimson strings;  
Never so blest as when he writ and read  
The ape-loved issue of his brain: and never  
But joying in himself, admiring ever.

1634. A convocation met at Dublin, in which the importance of communicating the scriptures and liturgy to the natives of Ireland, in their own tongue, was the subject of much debate. Two canons were passed under the authority of archbishop Usher and Dr. Bedell; the first, that "where most of the people were Irish, the churchwardens should provide, at the charge of the parish, a bible; and two common prayer books, in the Irish tongue:" the other, that, "where the minister was an Englishman, such a clerk might be chosen as should be able to read those parts of the service, which should be appointed to be read in Irish." The design of translating the bible met with violent opposition, not only from the catholics but many protestants;

and the troubles which then raged in Ireland put a stop to all exertions; and the types which had been used for the printing of the new testament, and other books, after passing through several hands, were procured by the jesuits, and carried over to Douay, for the express purpose of extending their own principles in Ireland, through the medium of the vernacular tongue.

1634, June 25. *Died*, JOHN MARSTON, a poet and dramatist, whose *forte* is not sympathy with either the softer or stronger emotions, but an impudent scorn and bitter indignation against the vices and follies of men. He was rather more of a satirist than a dramatist.—*Chambers*.

Marston was the author of eight plays, and was concerned in two others. The whole of the quarto editions are very scarce indeed; and of these the Garrick collection possesses seven.

1635. It having been noticed that some of the assistants, and others of the livery, of the stationers' company, came to the hall in falling bands, doublets slashed and cut, or other indecent apparel, not suitable to the habit of citizens; it was ordered that the assistants do come to the hall on court days in ruff bands.

1636. Mr. ROBERT ALLOTT gave £10 to the poor, and £10 for a dinner for the stationers' company.

1536, Feb. 9. *Died*, PHILEMON HOLLAND, an industrious writer, who was a descendant of an ancient family of the Hollands, of Lancashire, and was the son of the Rev. John Holland, a pious divine, who, in queen Mary's days, was obliged to go abroad on account of his religion. He afterwards returned, and became pastor of Great Dunmow, where he died in 1578.

Philemon was born at Chelmsford, about the latter end of the reign of Edward VI.; and after some initiatory instruction at the grammar school of that place, was sent to Cambridge. He was admitted fellow of his college, and took his degree of M.A., in which he was incorporated at Oxford in 1587.

Having left the university, he was appointed head master of the free-school of Coventry, in which laborious station he not only assiduously attended to his duties, but served the interests of learning, when learning was scantily dispensed, by those numerous translations which gained him the title of "Translator-general of the age." He likewise studied medicine, and practised with considerable reputation in his neighbourhood; and, when in his fortieth year, took his degree of M.D. at Cambridge.

He was a peaceable, quiet, and good man in all the relations of life; and, by temperate habits, attained his eighty-fifth year, without diminution of faculties or sight. He continued to translate till his eightieth year; and his translations, though devoid of elegance, are accounted faithful and accurate. His translation of *Livy* is said to have been written with one pen, which a lady of his acquaintance so highly prized that she had it embellished with silver, and kept it as a great curiosity. His other translations were *Pliny's Natural History*; *Plutarch's Morals*;

\* *All Fools*, a Comedy, presented at the Black Friars and lately before His Majesty. Written by George Chapman. At London: printed for Thomas Thorpe. 1605.

† *Eastward Hoe*. As it was played in the Black Friars, by the Children of her Majesties Revels. Made by Geo. Chapman, Ben Jonson, Job. Marston. At London: printed for William Aspley. 1605. King James was so displeased with this performance, on account of some sarcastical remarks upon the Scotch, that both the writer and printer were high being imprisoned.

‡ William Bedell, D.D., was born at Black Notley, in Essex, in 1576, and studied at Cambridge. In 1627 he was elected provost of Trinity college, Dublin, and two years afterwards was raised to the united sees of Kilmore and Armagh. In his high station he conducted himself with that propriety which his private character had given reason to expect; and his conciliatory procedure so won the hearts of the catholics, that in the rebellion of 1641, his palace in the county of Cavan, was the only habitation of an Englishman that remained unviolated. He died Feb. 7. 1642. He was buried in the church-yard of Kilmore, two days after his death, when his remains were accompanied to the place of interment by the rebel forces with unusual honours. His manuscripts, of which there was a large trunk full, fell into the hands of the Irish. Among the books carried off by them was his valuable Hebrew manuscript bible, which is now in the library of Emanuel college, Cambridge, and which was happily preserved by an Irish servant. This bible, which is in three folio volumes, is said to have been presented to Emanuel college, by the bishop.\* It has two columns in a page; the initial letters large, and decorated; an illumination round the first page of each volume; some letters gilt. It has the vowel points, and the Masora. It was purchased of the chief Chacum of the synagogue at Venice. Sir Henry Wotton gave for it its weight in silver.

§ The new testament, and such passages of the old as are inserted in the book of common prayer.

*Suetonius*; *Ammianus Marcellinus*; *Xenophon's Cyropædia*; and *Camden's Britannia*; to the last of which he made some useful additions. His translation of *Suetonius* produced the well known epigram:

Philomen with translations does so fill us,  
He will not let *Suetonius* be *Tranquillus*.

Dr. Holland was buried in St. Michael's church, at Coventry. He married a Staffordshire lady, by whom he had a large family. One of his sons, Henry, appears to have been a bookseller in London, and was editor of that valuable collection of portraits and lives, entitled *Heroologia Anglicana*. These portraits, sixty-five in number, were chiefly engraved by the family of Pass, and many of them are valued as originals, having never been engraved since but as copies from these. When he died is not mentioned.

1636, April 5. Died, BONHAM NORTON, of Church-Stretton, in the county of Salop, esq. stationer, and sometime alderman of the city of London. See page 416, ante.

1636. The indefatigable Butter published No. 1, of the *Principal Passages* of Germany, Italy, France, and other places; all taken out of good originals, by an English Mercury. It is not ascertained whether William Watts was this *English Mercury*.

1636, Aug. 10. The patronage afforded by archbishop Laud to learning in general, and especially to oriental pursuits, claims our grateful recollection. During a period of uncommon agitation, in the affairs both of church and state, the archbishop constantly endeavoured to promote the cultivation of the oriental languages; he founded an Arabic lecture at Oxford, which began to be read upon this day, by the celebrated Dr. Edward Pocock, the first professor; he erected a library adjoining the Bodleian, with other elegant buildings. His enemies were irritated by his violent high church principles, which at length brought him to the block.

1636. *The Book of Common Prayer and administration of the sacraments and other rites and ceremonies of the Church of England*. London, imprinted by Robert Barker. Folio.

At the end of the Psalms, are certain godly prayers to be used for sundry purposes, in two sheets. And these are followed by the form and manner of making and consecrating bishops, priests, and deacons; with which this edition concludes.

1636. Through the liberality of Gustavus Adolphus, king of Sweden, printing had been introduced into the town of Strengnes, an ancient episcopal town of Sweden, in order that Laurentius Paulinus, bishop of that town, might have his own works, *On the christian Ethics*, printed with less expense and delay than at Stockholm. The first production of this press was his *Loimoscopia*, executed by Olaus Olai Enæus, a printer brought from Stockholm, in the year 1623. Another work of this bishop, viz., *Historia arctice libri tres*, may be seen in the Bodleian and Fagel

libraries, bearing for imprint, *Strengnesii, typis et impensis authoris, excudebat Johannes L. Barkenius*, anno 1636. It is a quarto volume, of which both paper and press-work are very indifferent. Paulus subsequently becoming bishop of Upsal, carried thither his printing establishment; but after a continuance there of two years, it was reconveyed to its old abode.

1637, Feb. JOHN LILBURN, who had served an apprenticeship to the bookbinding business, was found guilty of printing and publishing several seditious books, particularly *News from Ipswich*,\* a production of Prynne's. He was condemned to be whipped at the cart's tail from the Fleet-prison to Old Palace-yard, Westminster; then set in the pillory there for two hours; afterwards to be carried back to the Fleet, there to remain till he conformed to the rules of the court; also to pay a fine of £500 to the king; lastly, to give security for his good behaviour. He underwent the sentence with undiminished obstinacy, uttering many bold speeches against the bishops, and dispersing many pamphlets from the pillory, where, after the star chamber then sitting had ordered him to be gagged, he stamped with his feet. The spirit he showed upon this occasion procured him the nickname of "Freeborn John" among the friends to the government, and among his own party the title of Saint. Wood characterizes him as a person "from his youth much addicted to contention, novelties, opposition of government, and to violent and bitter expressions." "The root of the factious people;" naturally a great trouble-world in all the variety of governments a hodge-podge of religion, the chief ring-leader of the levellers, a great proposal maker, a modeller of state, publisher of several seditious pamphlets, and of so quarrelsome a disposition that it was appositely said of him (by judge Jenkins) that "if there was none living but he, John would be against Lilburne and Lilburne against John." He died August 29, 1657.

1637, June. WILLIAM PRYNNE, author of the *Histriomastix*, or *Player's Scourge*, which contains all that was written against plays and players, published in 1633, one thousand 4to. pages; Dr. Burton; and Dr. Bastwick, author of *Sion's Plea*, which severely lashes the dignified clergy, and court vices, was condemned in the star chamber to lose their ears, to pay a fine of £5000 each to the king, and to be imprisoned for life in the castles of Carnarvon, Cornwall, and Lancaster.† Sir John Finch brutally said, "Is that

\* It is in quarto, and bears for title, *News from Ipswich, discovering certain detestable practices of some domineering lordly prelates, &c.* Printed at Ipswich. No date or printer. The title-page has at the lower part a rude woodcut of Death, and another figure. The tract consists of six leaves only, and is signed "Matthew White." The typographical execution of it is indifferent.

† A speech delivered in the Starr-chamber the 14th of June, MDCXXXVII at the censure of John Bastwick, Henry Burton, and William Frin; concerning pretended innovations in the church. By William (Laud) bish. of Canterbury. 4to. London: printed on vellum by Richard Badger. A reprint of this work was executed under the directions of Dr. Rawlinson.

Mr. Prynne? I had thought Mr. Prynne had no ears; but methinks he hath ears, and it is fit the court should take order that their decrees should be better executed,\* and see whether Mr. Prynne hath ears or no." Prynne being conveyed through Chester to be imprisoned in Carnarvon he was met on his approach by numbers of the citizens, who paid so much respect to the sufferer for the liberty of conscience, as to give offence to the government. Many of them were therefore fined, some £500, £300, and £250. Mr. Peter Luce, a stationer, and one of the offenders, made a public recantation before the bishop, in the cathedral. In the following year, (1634,) four portraits of Prynne, painted in Chester, were buried at the High Cross, in the presence of the magistracy; but at the beginning of the civil wars, they were triumphantly brought to London.

Prynne was an arrogant bigot, who wrote a book in barbarous taste; moreover, he loved neither power nor the trappings of royalty; indulged himself in unseemly invectives, and manifested altogether a most unmanageable temper. But Prynne was a brave and conscientious bigot, and his honest endeavours, in after-life, to save king Charles from the block, should, though it was late and unavailing, be admitted as evidence in his favour. Remembering, too, the savage treatment he had experienced at the hands of Charles's ministers, his conduct deserves to be called generous; for he wrote on the king's behalf when so to write involved personal risk. Prynne has written a library, amounting, perhaps, to nearly two hundred books. Our unlucky author, whose life was involved in authorship, and his happiness, no doubt, in the habitual exuberance of his pen, seems to have considered the being debarred from pen, ink, and books, during his imprisonment, as an act more barbarous than the loss of his ears. The extraordinary perseverance of Prynne in this fever of the pen appears in the following title of one of his extraordinary volumes, *Comfortable Cordials against uncomfortable Fears of Imprisonment; containing some Latin Verses, Sentences, and Texts of Scripture*. Written by Mr. William Prynne on his Chamber Walls, in the Tower of London, during his imprisonment there; translated by him into English verse, 1641. Prynne literally verified Pope's description:

Is there, who, lock'd from ink and paper, scrawls,  
With desperate charcoal round his darkened walls.

William Prynne took upon himself the office to correct every enormity in church and state. He wrote against bishops, players, long hair and love-locks; and was in consequence dignified by his party with the appellation of *Cato*: he was a man of great reading; and Mr. Wood supposes that he wrote a sheet for every day of his life, computing from the time of his arrival at man's estate. He says, "His custom was, when he studied, to put on a long quilted cap, which

came an inch over his eyes, serving as an umbrella to defend them from too much light; and seldom eating a dinner, would, every three hours or more, be maunching a roll of bread, and now and then refresh his exhausted spirits with ale. He gave his works, in forty volumes folio and quarto, to the Society of Gray's Inn. There is a catalogue of them in the *Athenæ Oxonienses*. He died Oct. 23, 1666, and was buried in Lincoln's Inn chapel.

We have also a catalogue of printed books written by William Prynne, esq., of Lincoln's Inn, in these classes,

BEFORE,  
DURING, } his imprisonment,  
and  
SINCE }

with this motto, "*Jocundi acti labores*," 1643. The secret history of this voluminous author concludes with a characteristic event: a cotemporary who saw Prynne in the pillory at Cheapside, says, that while he stood there "they burnt his huge volumes under his nose, which had almost suffocated him."

Another sufferer for conscience sake was a clergyman named Leighton, who, in a book entitled *An Appeal to Parliament, or Sion's Plea against Prelacy*, used language so inflammatory as to attract the notice of Laud. He was brought before the peers, who adjudged him to undergo the following extraordinary punishment:—he was degraded from the ministry, was publicly whipped in the palace-yard, stood two hours in the pillory, and had an ear cut off, a nostril slit open, and a cheek branded with S. S. to denote a sower of sedition. At the end of one week Leighton had a second whipping, and was again placed in the pillory; he then lost the other ear, had the other nostril slit, and was branded on the other cheek. Thus degraded and mutilated, he was conducted back to prison; and, not finding mercy from Charles, he remained in confinement ten years, and was then liberated by the parliament when it was in arms against the king.

1637. *Thieves falling out True-men come by their Goods, or the Bel-man wanted a Clapper*. A Peele of new villanies rung out, being musical to gentlemen, lawyers, farmers, and all sorts of people that come up to the tearme. Shewing that the villanies of lewd women by many degrees excell those of men. By Robert Greene.

Goe not by me, but by me, and get by me.

Printed for Henry and Moses Bell.

1637. A collection of the best Latin poetical compositions of Scotchmen which had appeared in this and the preceding century, was printed at Amsterdam, entitled *Delita Poetarum Scotorum*, 2 vols. Dr. Johnson says this work reflects great credit on the country. Latin poetry was more extensively cultivated in Scotland than either English or Scotch. The principal poets

\* According to a former sentence.

of Scotland at this period were William Drummond, sir Robert Ayton,\* William Alexander earl of Stirling, Alexander Hume,† and Robert Kerr, earl of Ancrum. When James I. visited Scotland in 1617, he was addressed, wherever he went, in excellent Latin verse, sometimes the composition of persons in the middle ranks of society.—*Chambers.*

1637, July 11. A decree of the star chamber contains the following oppressive clause, "Whereas there is an agreement betwixt sir Thomas Bodley, knight, founder of the university library, at Oxford, and the master, wardens and assistants of the company of stationers, viz.:—that every book of every sort, that is now printed, or reprinted with additions, be sent to the universitie at Oxford, for the use of the public librarie there. The court doth hereby order and declare, that every printer shall reserve one book new printed, or reprinted by him with additions; and shall, before any publique visiting of the said books, bring it to the common hall of the companie of stationers, and deliver it to the officer thereof, to be sent to the librarie at Oxford accordingly, upon pain of imprisonment, and such further order and direction therein, as to this court, or the high commission court respectively, as the severall causes shall be thought fit."

This delivery of a single copy to the Bodleian library originating out of a private transaction, became a serious matter of obligation: it seems not to have been very willingly complied with.

1637, July 11. Archbishop Laud procured a decree to be passed in the *star chamber*, by which it was ordered, "that the master printers should be reduced to twenty in number; and that if any other should secretly, or openly, pursue the trade of printing, he should be set in the pillory, or whipped through the streets, and suffer such other punishment as the court should inflict upon him; that none of the master printers should print any book or books of divinity, law, phisic, philosophy, or poetry, till the said books, together with the titles, epistles, prefaces, tables, or commendatory verses, should be lawfully licensed, on pain of losing the exercise of his art, and being proceeded against in the *star chamber*, &c.; that no person should reprint any book without a new license; that every merchant, bookseller, &c., who should import any book or books, should present a catalogue of them to the archbishop or bishop, &c., before they were delivered, or exposed to sale, who should view them, with power to seize those that were schismatical; and, that no merchant, &c., should print, or cause to be printed abroad, any book, or books, which either entirely, or for the

most part, were written in the English tongue, nor knowingly import any such books, upon pain of being proceeded against in the star chamber, or high commission court.\* The allowed printers by this decree were, Felix Kingstone, Adam Islip, Thomas Purfoot, Miles Flesher, Thomas Harper, John Beale, John Legat, Robert Young, John Haviland, George Miller, Richard Badger, Thomas Cotes, Bernard Alsop, Richard Bishop, Edward Griffin, Thomas Punslow, Richard John Raworth, Marmaduke Hodkinsonne, John Dawson, John Parsons: and the letter founders were, at the same time, restricted to four, whose names were, John Grismand, Arthur Nichols, Thomas Wright, and Alexander Fifeild, under the following regulations:

"That there shall be four founders of letters for printing, and no more.

"That the archbishop of Canterbury, or the bishop of London, with six other high commissioners, shall supply the places of those four as they shall become void.

"That no master founder shall keep above two apprentices at one time.

"That all journeymen founders be employed by the masters of the trade; and that all idle journeymen be compelled to work upon pain of imprisonment, and such other punishment as the court shall think fit.

"That no master founder of letters shall employ any other person in any work belonging to casting and founding of letters than freemen and apprentices to the trade, save only in putting off the knots of metal hanging at the end of the letters when they are first cast; in which work every master founder may employ one boy only, not bound to the trade."

1637. JACOB MARCUS, a printer at Leyden, executed an 8vo. edition of the *Swedish Bible*, in 1633, 1634, 1635, 1636, and 1637; but all the copies of the edition of 1637 were lost by shipwreck of the vessel which was conveying them to the place of their destination. The printing of the bible in this portable size, the privilege of which was granted to Marcus by the king, Gustavus Adolphus, a little before his death at the battle of Lutzen, 1632, was designed by that prince for the use of the army, and for the greater convenience of the citizens in their private perusal. Marcus had printed an edition of the *Swedish New Testament*, in 1633, 4to., with the privilege of his Swedish majesty.

In 1622, SAMUEL JAUCHEN, a printer at Lubbeck, had printed an edition of the *Swedish Bible*, in 4to., but it was so disfigured by typographical errors and transpositions, that it was suppressed by order of the king.

Alder also notices an edition of the bible, in 8vo. printed by Wallian, at Upsal, in 1636.

\* Sir Robert Ayton, an eminent Scottish poet, was born in the year 1570, and educated at St. Andrews. He was employed, both at home and abroad, in the service of James I. and Charles I., and was acquainted, says Aubrey, "with all the wits of his time in England." He died at London, March, 1638, and was buried in Westminster abbey, under a handsome monument of black marble. He was the first Scotchman who wrote in the English language with any degree of elegance or purity.

† Alexander Hume, minister of Logie, born about 1560, and died 1609.

\* The latter part of this decree was specially designed to prevent the importation of the Geneva bible from Holland, where it had been printed with the objectionable notes, and where some had been seized by the care of Boswell, the British resident at the Hague, who had also received intimation of a new impression designed for England, but which probably was prevented being sent by the decree now noticed.

1637, Aug. 6. *Died*, BENJAMIN JONSON, a distinguished comic poet. He was born at Westminster, July 31, 1574. His father was a clergyman, and died about a month before the birth of our poet, who received his education at Westminster school; but his mother marrying again, his father-in-law, who was a bricklayer, compelled him to work at his business. On this he listed for a soldier, and went to the Netherlands, where he distinguished himself by his courage. After his return he went to St. John's college, Cambridge, but did not remain there long, owing to his extreme poverty. He then turned his attention to the stage, and became a player and dramatic writer, with indifferent success, till Shakspeare gave him his assistance. His first printed play was his comedy of *Every Man in his Humour*, produced at the Rose Theatre, Nov. 25, 1596, after which he produced a new piece\* annually for several years. He engaged with Chapman and Marston in writing a comedy called *Eastward Hoe*, which being deemed a satire on the Scotch nation, had nearly brought the authors to the pillory. On the death of Samuel Daniel, in 1619, he was made laureate; and the university of Oxford conferred on him the degree of M. A.

All the dramatic writings of Jonson are deficient in passion and sentiment, and his genius seems to have been upon the whole best fitted for the production of those classic idealities which constituted the masque. For these reasons, though the great reputation attained by Ben Jonson in his own time still affects our consideration of him, he is not now much read, and *Every Man in his Humour* is the only one which now continues to be occasionally performed.

The following Song is taken from the *Queen's Masque*,† performed in 1605 :

## SONG.

So beauty on the waters stood,  
When love had severed earth from flood;  
So when he parted ayre from fire,  
He did with concord all inspire;  
And there a matter he then taught,  
That elder then himself was thought;  
Which thought was yet the child of earth,  
For love is older than his birth.

On the death of Jonson, the king, who was a competent judge of poetry, wished to confer the vacant wreath on Thomas May, afterwards the historian of the Long Parliament; but the queen obtained it for her favourite bard William Davenant, author of *Gondibert*, a heroic poem, and of a great number of plays. The office and pension were given to Davenant in December, 1638, sixteen months after the death of Jonson;

\* The Garrick copy of this *Masque* was the presentation copy of Ben Jonson to the queen, and has this inscription in the poet's own writing :—"D. Anne M. Britanniarum Insa. Hib. Ac. Regine Felicis. Formosiss. Musco S. S. Hunc librum vocit Fama: et honoris ejus Servientiss. Inno addictissimus. Bax. Jonson."

Victurus Genium debet habere liber.

† The *Scjansus*; the *Alchymist*; the *Silent Women*; and the tragedy of *Volpone* were entered on the book of the stationers' company, October 3, 1600.

the delay having probably been occasioned by the dispute which had broken out in the interval, between the king and his Scottish subjects.

The character given of him by Drummond is worth copying, if not for its justice, at least for its force: he was "a great lover and praiser of himself; a contemner and scoffer of others; rather given to lose a friend than a jest; jealous of every word and action of those about him, especially after drink, which was one of the elements in which he lived; a dissembler of the parts which reign in him; a bragger of some others that he wanted—thinking nothing well done but what he himself, or some of his friends, had said or done."

Tradition has sent down to us several tavern tales of "Rare Ben." A good humoured one has been preserved of the first interview between bishop Corbet,\* when a young man, and our great bard. It occurred at a tavern where Corbet was sitting alone. Ben, who had probably just drank up to the pitch of good fellowship, desired the waiter to take to the gentleman "a quart of raw wine; and tell him," he added, "I sacrifice my service to him."—"Friend," replied Corbet, "I thank him for his love; but tell him from me that he is mistaken; for sacrifices are always burnt." This pleasant allusion to the mulled wine of the time, by the young wit, could not fail to win the affection of the master wit himself.—*Harleian manuscripts*, 6395.

It is related, that when Jonson was on his death-bed the king sent him ten pieces. Ben remarked, "he sends me this trifle because I am poor and live in ally: but go back and tell him that his soul lives in an alley." He was buried in Westminster abbey.

1638. Printing introduced into CAMBRIDGE, in Massachusetts, a large town in Middlesex county. As this settlement was the cradle of the art of printing throughout the vast continent of North America, and many volumes of considerable interest have issued from its presses, the reader will perhaps be gratified with the following detailed account, taken from *Thomas's History of Printing*; Thomas himself being a native of that colony, and having investigated the history of its early typography with considerable care.

"The founders of the colony of Massachusetts consisted of but a small number of persons, who arrived at the town of Salem in 1628; a few more joined them in 1629; and governor Winthrop, with the addition of 1500 settlers, arrived

\* Richard Corbet was a facetious poet and distinguished divine; born at the close of the sixteenth century, and was educated at Christ church, Oxford. He rose rapidly in the church. He was bishop of Oxford in 1629, and in 1632 was translated to Norwich. He died July 28, 1635, and was buried in the cathedral of Norwich.

† It appears that at this time, wine was sent as a complimentary present from persons in one room in a tavern to those in another. It was a polite form of introduction, as appears from Shakspeare's *Merry Wives of Windsor*, where Berdolph says:—"Sir John, there's Master Brook below would fain speak with you, and would be acquainted with you, and hath sent your worship a morning's draught of sack." To which, by the way, Sir John rejoins with admirable punning pleasantry, "that such Brooks are welcome to him that o'erflow each liquor."

in 1630. These last landed at the place since called Charlestown, opposite to Boston, where they pitched their tents, and built a few huts for shelter. In 1631, they began to settle at Cambridge, four miles from the place where they first landed. They also began a settlement on the identical spot where Boston now stands. In 1638, they built an academy at Cambridge, which in process of time was increased to a college: and in the autumn of the same year, they opened a printing-house in that place. In January, 1639, printing was first performed in that part of North America which extends from the gulf of Mexico to the Frozen Ocean.

"For this press our country is chiefly indebted to the rev. Mr. Glover, a nonconformist minister, who possessed a considerable estate, and had left his native country with a determination to settle among his friends, who had emigrated to Massachusetts; because in this wilderness he could freely enjoy with them those opinions which were not countenanced by the government and a majority of the people of England."

The ancient records of the college mention Mr. Joss or Jesse Glover gave to the college "a font of printing letters," and some gentlemen of Amsterdam "gave towards furnishing of a printing press with letters, forty-nine pounds and something more." The college employed their press under the management of Stephen Daye, a rather incompetent person, as appears, for about ten years, at the end of which time it was placed under the care of Stephen Green. It was thirty-five years after its appearance at Cambridge, before the art had proceeded as far as Boston; and fifty years before its coming to Philadelphia, which was the next step. The first work issued from the Cambridge press was the *Freeman's Call*, and the second, an *Almanack for New England*, both in 1639; the first book printed was the New England version of the psalms, an octavo volume of 300 pages.

1638, June 4. In Massinger's play of the *King and the Subject*, licensed on this day, there is the following passage: "Monies? We'll raise supplies what way we please, and force you to subscribe to blanks, to which we'll mnlet you as we shall think fit." The king upon reading this play over at Newmarket, wrote opposite the above passage, *this is too insolent, and to be changed*.

1638. RICHARD HODGKINSONNE printed the *Tragedy of Julia Agrippina, Emperess of Rome*. By Thomas May, Esq. 12mo. London: printed for Thomas Walkly, and are to be sold at his shop, at the Flying Horse, neare Yorke House.

THOMAS MAY was the translator of Lucan's *Pharsalia*, and author of many valuable productions. He wrote five dramatic pieces. He died at London, Nov. 16, 1650, and was buried in St. Margaret's church-yard.

1638. GEORGE ANDERSON printed the following work in the city of Glasgow, and which is considered the earliest specimen executed in that place: *The Protestation of the general assemblee of the church of Scotland, and of the noblemen &c. subscribers of the Covenant lately renewed,*

*made in the High Kirk, and at the Mercate Crosse of Glasgow the 28 and 29 of November 1638.* [A rude woodcut.] *Glasgow, by George Anderson, in the yeare of grace 1638 4to.* (pp. 13.) A copy of this scarce piece is in the library at Cashel.

1638. THOMAS BOCK and ROGER DANIEL, printed at Cambridge a beautiful edition of the bible, in folio, with the following title:

*The Holy Bible: containing the Old Testament and the New: newly translated out of the original tongues, and with the former translations diligently compared and revised, by his Majesty's special command, &c.\**

1738. JOHN OKES dwelt at the Hand, near Holborn Bar, and printed the following work: *Porta Pietatis, or the Port or Harbour of Piety. Express in sundrie Triumphes, Pageants, and Shewes, at the Initiation of Right Honourable SIR MAURICE ABBOT, Knight, into the Majoralty of the famous and farre renowned city London.* All the charge and expense of the laborious projects, both by water and Land, being the sole undertaking of the right worshipfull Company of the Drapers.

Written by Thomas Heywood.

Redeunt Spectacula.

In the following year Okes printed a similar work, written by Heywood, for the inauguration of Henry Garway, of the company of drapers.

1638. Lambert Osbaldeston, M.A., head master of Westminster school, and a prebend of Westminster abbey, was found guilty in the court of star chamber, of certain libellous passages in a letter written by him to Dr. Williams, dean of Westminster, and bishop of Lincoln; wherein he styled archbishop Laud "the little vermin, the urchin, and *hocus pocus*;" for which he was sentenced to have his ears tacked to the pillory in the presence of his scholars; and to pay a fine of £3,000. The former part of this cruel sentence he avoided by withdrawing from Westminster. He was, however restored by the

\* In the year 1665, this copy was bequeathed to the learned and ingenious sir Philip Warwick, secretary to the lord treasurer, and clerk of the signet; who employed much of his time, even to the year of his death, in 1662, in writing commentaries upon the text, on the margins, in abundance of places. It came afterwards into the possession of sir William Durrell, at whose death it was sold for thirteen pounds five shillings, in May, 1796. I shall only make this one remark upon this beautiful edition: that there has on one *erratum* escaped in it, repeated in many following editions (as may be seen in Howel's *History of the Gospel*) which, favouring the independent scheme, made it suspected to have been done by the contrivance of some of that faction. It is only in having placed the second person plural, for the first, *ye* for *we*, in the Acts of the Apostles, chap. vi. verse 3. For it is there stated that the chosen persons, there mentioned, are meant to be appointed, by *ye*, the apostles, not by *ye*, the electors.—Lewin's *History of the Translation of the Bible*, 1739.

† Sir Maurice Abbot died January 10, 1640.

‡ John Williams, D.D. was born at Aber Conway, in Carnarvonshire, March 25, 1589; was educated at Cambridge, and became an eminent theological writer. He was very high in the favour of James I., to whom he was lord keeper. His church preferments were many; and at his death was archbishop of York, which took place March 25, 1650.

long parliament, and suffered for a time to keep his prebend, when all the rest of the prebendaries were turned out. But seeing the course which the second parliament took, he inclined to the king's cause, and lived in retirement during the commonwealth.

He was born in the parish of St. Olave, in Southwark, and was first of Christ church, and then of Westminster, where he died in the beginning of October, 1659, and was buried in the south aisle of St. Peter's church, Westminster. He was a learned man; but does not appear to have published any book.—Wood's *Athen Oxon Fasti*, i. p. 212.

1638. Died, HANS PAULSEN RESEN, D.D., bishop of Zealand, the great promoter of dispersing the scriptures in the Danish tongue. When Christian IV. came to England in 1606, on a visit to his brother-in-law James I., he chose Resen and Venusin to accompany him. Here Dr. Resen had an opportunity of forming an acquaintance with men of the highest repute in the republic of letters, and collected upwards of thirty ancient and scarce manuscripts; which were afterwards presented by his grandson to the university library in Copenhagen. On the demise of bishop Winstrop, in 1615, he was created bishop of Zealand, which office, says Zwergius, he discharged with great watchfulness and zeal, both in regard to the outward purity of religion, and the advancement of true piety, till his death.

The result of Resen's interview with his Danish majesty, was his appointment to superintend a new edition of the holy scriptures, to be revised according to the Hebrew and Greek texts. In 1605, the new testament appeared in 2 vols. 18mo., printed on ordinary paper, with a small, yet tolerably distinct type; and is remarkable for being the first of any part of the Danish scriptures in which the division of the chapters into verses is introduced. An edition of the Pentateuch, answering to the new testament just described, in size, paper, and arrangement, was finished April 19th, 1605; and is stated to have been printed by Niels Michelson, at John Albert's. The text of these editions is exactly the same as that of the whole bible printed in 1607.

Resen's bible being completed, was published at Copenhagen in 1607, "with his majesty's special privilege." On the back of the title-page is the portrait of Christian IV. with this motto, "*Regina firmat pietas*,"—"Piety is the strength of kingdoms."

The publication of Resen's bible gave rise to a famous controversy between Resen and Ivar Stubb, the Hebrew professor in the university of Copenhagen, which terminated in the expulsion of the professor from his office, and is said to have occasioned his end.

Several editions of the psalms succeeded the publication of Resen's bible. Among which may be noted an edition printed by H. Waldkirch, Copenhagen, 1614, 8vo. accompanied with a portrait of Luther; a metrical version by Christian Berg, Copenhagen, 1614, 12mo. with

the tunes of Sobwasser, which were greatly esteemed in the Lutheran churches of Germany; another elegant metrical version by A. C. Arreboe, who had been deposed from the see of Drontheim, for his irregular life; Copenhagen, 1623, 16mo. and a small folio edition of the psalms printed by Tyge Nelson, in Copenhagen, 1632, at the expense of the noble and benevolent lady Ellen Marsvin, of Ellenborg. The object she had in view in publishing this edition was, that the holy and sublime truths in it might be accessible by old people with weak eyes, which it is certainly well calculated to answer, the type being so uncommonly large, that though the size be small folio, there are sometimes not more than three verses on a page. Denmark was now in possession of three editions of the bible, and of several impressions of select portions of it: yet the copies thus brought into circulation were inadequate to the wants of the nation. Little progress, however, was made in the work for some time, which was most probably owing to his majesty having resolved that the bible should be in folio, and the want of a sum adequate to the expenses of such an undertaking. Steps were, nevertheless, taken for the procuring of paper, and engaging a printer: and at length the bible appeared in 1633, in large folio, printed at Copenhagen; accompanied with plates. The portrait of Christian IV. is inserted before the preface, and portraits of Danish kings, in a smaller size, fill the border. Some copies were printed on parchment, and presented by his majesty to foreign courts. The profits arising from the sale of this edition were ordered to be applied to the publication of a Hebrew and Latin bible, the emoluments of which were to be devoted to printing other useful and vendible books; and 300 rix-dollars of the sum advanced by the Norwegians, were sent to Amsterdam, as a contribution towards the building of the Lutheran church, in that city. The plan of the Hebrew bible failing, an account was rendered to the consistory, by which it appeared that the neat profit arising from the sale of this edition of the Danish bible amounted to 7000 dollars; of which 1000 were given to the library, and 2000 to the librarian; 2000 applied to the purchase of fuel and candles for the students of king's college; and the interest of the remaining 2000 employed in relieving the widows of the professors.

In 1639, the royal permission was obtained for reprinting Resen's bible, the former impression being exhausted. The new testament was first ready, and was published separately, in 1644; and the entire bible made its appearance in 1647, 4to. The whole has a double title, the first surrounded with figures, and accompanied with a beautiful figure of Christian IV., the second quite plain; double titles were also affixed to each part, the one ornamented with figures, the other plain. This revision of Resen's version is generally called *Svaning's Bible*, from having been corrected principally by archbishop Svaning, who improved the version, according to the manuscripts left by Resen.

1638. *News and Strange News from St. Christophers of a tempestuous spirit, which is called by the Indians a Hurry-cano or whirlwind; whereunto is added, the true and last relations (in verse) of the dreadful accident which happened at Witticombe in Devonshire, 21 Oct. 1638.* London, 12mo. with a wood-cut. Sold at the Gordonston sale for £1 18s. Ingliss, £1 8s.

1639. At the commencement of the great civil war, each army carried with it its own printer; expecting either to convince by its reasoning, or delude by its falsehood. King Charles I. carried Robert Barker with him to NEWCASTLE-UPON-TYNE, this year, and there published a newspaper, which was the first provincial one in the kingdom; and the same year was printed a book entitled, *Laws and ordinances of Warre, for the better government of his majestie's army royall, in the present expedition for the Northern parts, &c.* Imprinted at Newcastle, by Robert Barker, printer to his majesty, &c. a small 4to. of 27 pages. Barker did not remain long at Newcastle, but returned to London.

1640. MILES FLESHER printed the following curious work, entitled the *Belman of London bringing to Light the most notorious Villanies that are now practised in the Kingdome*. Profitable for gentlemen, lawyers, merchants, citizens, farmers, masters of households, and all sorts of servants to mak, and delightfull for all men to read.

Lege, perlege, relego.

The fifth impression with new editions.

Of this book Warton observes, that it was called by a cotemporary writer, the most witty, elegant, and eloquent display of the vices of London then extant. Scarce as this book now is, and few are more scarce, it went through a prodigious number of editions. This is almost the first book which professes to give any account of the canting language of thieves and vagabonds.

JOHN BUSBY printed the *Lanthorn and Candle Light: or, the Bell-Mans Second Nights Walke*. In which he brings to light a brood of more strange villanies than ever were till this yeare discovered.

Decet novissae malum, fecisse nefandum.

The second edition, newly corrected and amended.

This appears to be a continuation of the former work, and certainly is no less curious. It is inscribed "To the very worthy Gentleman, Francis Musician of Peckam."

M. PAASONS printed *English Villanies seven severall Times prest to Death by the Printers*, but still reviving, are now the eighth time (as at the first) discovered by *Lanthorne and Candle Light*, and the helpe of a new cryer, called

O-per-se-O.

Whose loud voyce proclames to all that will heare him, another conspiracy of abuses lately plotting together to hurt the peace of this kingdome: which the *Bell-man*, because he then went stumbling in the dark, could never see till

now. And because a company of rogues, cunning, canting gypsies, and all the scumme of a nation fight here under their tattered colours. At the end is a canting dictionary to teach their language, with canting songs. A booke to make gentlemen merry, citizens warie, countymen carefull. Fit for all justices to reade over, because it is a pilot by whom they may make strange discoveries.\*

1640. THOMAS COTES printed the *Tragedy of Messalina, the Roman Emperesse*, as it hath beene acted with generall applause, divers times, by the company of his majesties revells. Written by Nathaniel Richards.

Optimus hic et formosissimus idem  
Gentis Patrie rapitur miser extinguendus  
Messalinæ oculis.—*Jurnal. Sat. 10.*

For Daniel Frere, at the sign of the Red Bull, in Little Brittain.

To this play a portrait of the author is prefixed, with this inscription round the border:—"Sentite supra non Terrestria, suspice cælum, despice mundum, respice finem."

1640. The School of Abo,† the capital of Swedish Finland, having been raised to the dignity of an university by queen Christina, in this year, its directors; unwilling that the academical acts should continue to be printed at Stockholm or Dorpi, as had previously been customary, established at Abo in 1642 or 1643, as their own printer, Peter Waldius, who had before exercised the art at Upsal and at the Westeras. Printing continued to be exercised at Abo until the year 1713, at which time, on account of the troubles of war, the press was removed for security to Stockholm, where it was still remaining in the year 1722, when Alnander wrote his history of Swedish typography.

\* The following is the first work in which any account or description can be found of the cant language of thieves and pickpockets. It is in black letter, and has this title:—*A Cveat for Common Characters, vulgarly called Vagabones, set forth by Thomas Harman, Esquier, for the whistle and profit of his naturall Countrey, newly augmented and imprinted Anno Domini, 1597. Viewed, examined, and allowed according unto the Queene's Majesties injuncions.* Imprinted at London, in Fleetstreet, at the signe of the Paulcon, by Wylliam Gryffith, and are to be sold at his shoppe in Saynt Dunstons Churchs Yarde in the West.

In the title page is a wood engraving, which represents two vagabonds tied at the cart's tail, and the executioner in the act of flogging them.

It is thus inscribed:—"To the Right Honorable and my singular good Lady Elizabeth Countess of Shrewsbury, Thomas Harman wisheth all joye and perfitte felicity here and in the world to come."

It seems singular enough to inscribe a book of this kind to a woman of exalted rank. It contains a minute description of the tricks and terms of the notorious villains of the day.

† On the 7th of September, 1827, the town of Abo was almost wholly destroyed by a conflagration, when it is said that only eight hundred volumes of the public library escaped destruction; and, what is worse, that nearly one hundred persons perished in the flames. Fortia, in his *Trauels in Sweden*, speaks of a *Musæi thesæus*, printed at Lubeck, in 1588, a very rare book, only two copies being known to exist, one of which is in the university library of Abo, and the other in that of the university of Upsal; this latter, however, is imperfect.—*Cotton.*

1640. CARDINAL RICHELIEU,\* prime minister of France, erected a private press, in his chateau, near Tours, from which several works, executed with great neatness, have proceeded, bearing date 1653, 1654, &c., for a particular account of which, see Peignot's *Dictionnaire de Bibliog.*

1640. DIED, ROBERT STEPHENS THE THIRD, who was the son of the second Robert Stephens. The time of his birth is not exactly ascertained, but Mr. Greswell supposes it to have taken place in 1563, he must therefore have been very young at the death of his father. Du Verdier describes him as a young man of very promising talents, and as resident in the family of M. des Portes, in the year 1584. Though he is allowed to have become conspicuous as a typographer, yet the time of his commencement of this art remains very doubtful: Maittaire says in the year 1598; but La Caille asserts that he commenced printing in the year 1588, several considerable works. As impressions of so late a date as 1640, bear his name, Maittaire believes him to have attained at least to the age of seventy. "Assuming," says Mr. Greswell, "my conjecture above, respecting the time of his birth, to be near the truth, he must have lived to the age of seventy-seven years."

This Robert Stephens had the title of "Poete et Interprete du Roy pour les Langues Grecque et Latin." All those poetical compositions cited by Maittaire as productions of his father, are proved by clear evidence to belong to the son.

To his brief notice of Robert Stephens the third, Maittaire has subjoined a variety of Greek and Latin "Epigrammata;" which are further proofs of his facility and fruitfulness in this species of composition. To some of those poetic

effusions he was accustomed to subjoin his name, Robertus Stephanus, simply: but to others, Robertus Stephanus, R. F. R. N. (Roberti Filiius, Roberti Nepos); and the same distinction is sometimes found subscribed to the title-pages of his impressions.

Maittaire terms him "Typographus insignis, quamvis non Regius; in symbolis excogitandis ingeniosus, et Latine ac Græcæ linguis peritus." La Caille says, he had for his mark the Olive, which was that of his ancestors. With the Olive he adopted the words, variously, "Noli altum sapere, sed time." His several modes of subscription, "in librorum titulis," were: "ex typographia," or "ex officina Roberti Stephani:" or "Oliva," or "ad Olivam R. Stephani:" "de l'imprimerie de Robert Estienne:" "à l'Olivier de Robert Estienne." Maittaire observes that various impressions of his are found without any device: that John Jannon occasionally used his office and materials; and that many other "libraires" of Paris frequently employed his press. As king's interpreter he translated into French the two first books of *Aristotle's Rhetoric*.

1640. We are now come to that memorable epoch, in English history,

When civil dudgeon first grew high.

Each party, whether political, or religious, now hoped to gain their object, by spreading their pretensions. From this source, the nation was soon over-run with tracts of every size, and of various denominations: hence, the Diurnal, which continued its hebdomal round, notwithstanding the ridicule of Cleveland, from 1640 to 1660: and hence too the different mercuries, which were sent abroad, to inflame by their vehemence, or to conciliate by their wit; to convince by their argument, or to delude by their sophistry. Many of them were written with extraordinary talent, and published with uncommon courage. The great writers of these mercuries were Marchmont, Needham, sir John Birkenhead, and sir Roger L'Estrange.

When hostilities commenced, every event, during a most eventful period, had its own historian, who communicated *News from Hull, Truths from York, Warranted Tidings from Ireland, and Special Passages from several Places*. These were all occasional papers. Impatient, however, as a distracted people were for information, the news were never distributed daily. The various newspapers were published weekly at first; but in the progress of events; and in the ardour of curiosity, they were distributed twice, or thrice, in every week. Such were the *French Intelligencer*, the *Dutch Spy*, the *Irish Mercury*, and the *Scots Dove*; the *Parliament Kite*, and the *Secret Owl*. *Mercurius Acheronticus* brought them hebdomal *News from Hell*, *Mercurius Democritus* communicated wonderful news from the World in the Moon, the *Laughing Mercury* gave perfect news from the Antipodes, and *Mercurius Mastic* faithfully lashed all *Scouts, Mercuries, Posts, Spies*, and other *Intelligencers*.

\* John Armand Du Plessis de Richelieu, a great cardinal, and minister of state in France, was born Sept. 5, 1585. Being a man of prodigious capacity, and of a restless and insatiable ambition, he formed to himself vast designs, which made his whole life nothing but a series of agitations and inquietudes. He showed himself a patron of men of letters, and caused the arts and sciences to flourish in the kingdom. He abounded, however, rather with great qualities than good ones, and therefore was much admired, but not beloved. He was one of those ambitious men who foolishly attempt to rival every kind of genius; and seeing himself constantly disappointed, he envied, with all the venom of rancour, those talents which are so frequently the all that men of genius possess. He died, December 4, 1642, before he had completed any of his designs; leaving behind him a name somewhat dazzling, but by no means dear and venerable. Cardinal Mazarine carried on Richelieu's plan, and completed many of his schemes. Never was a gigantic baby of adulation so crammed with the soft pap of *Dedications* as cardinal Richelieu. French flattery even exceeded itself. There are a vast number of very extraordinary dedications to this man, in which the divinity itself is disrobed of its attributes to bestow them on this miserable creature of vanity. I suspect, says D'Arsail, that even the following one is not the most blasphemous he received. "Who has seen your face without being seized by those softened terrors which made the prophets shudder when God showed the beams of his glory? But as he whom they dared not to approach in the burning bush, and in the noise of thunders, appeared to them sometimes in the freshness of the zephyrus, so the softness of your august countenance dissipates at the same time, and changes into dew the small vapours which cover its majesty."—One of these herd of dedicators, after the death of Richelieu, suppressed, in a second edition, his hyperbolical panegyric; and as a punishment to himself, dedicated the work to Jesus Christ!

Among this clamour of contradiction, this activity of ridicule, this tumult of laughter, Scotland and Ireland were not neglected. Devoted to political purposes, they soon became a party nuisance, by serring as receptacles of party malice, and echoing to the farthest ends of the kingdom the insolent voice of all factions. They set the minds of men more at variance, inflamed their tempers to a greater fierceness, and gave a keener edge to the sharpness of civil discord. *Mercurius* was the favourite name, with another word, to indicate the character of the party from which it emanated. When any title, however, grew popular, it was stolen by the antagonist, who, by this stratagem, conveyed his notions to those who would not have received them had he not worn the appearance of a friend. It is clear, however, that they occupied no great share of public attention, till that war had fully aroused the national mind. Whole flights of *Diurnalls* and *Mercuries*, in small 4to., then began to be disseminated by the different parties into which the state was divided. Nearly a score are said to have been started in 1643, when the war was at its height. Peter Heylin, in the preface to his *Cosmographie*, mentions that "the affairs of each town or war were better presented in the *Weekly Newbooks*.\*"

1640, Nov. *Diurnal of Occurrences in Parliament*.

1640. The several companies were required to lend £50,000 to the king; of which the stationers' quota was £500—and in 1642, in like manner, £100,000, towards which they paid £1000. In 1643, they were called on to pay £5 a week for three months, besides £32 for a royal subsidy. To defray these heavy charges, all their plate was sold, except Mr. Hulet's standing cup—the white plate at 4s. 9d. an ounce—one parcel of gilt plate at 4s. 10d.—and another at 5s. 3d.

1640. *A Certain Relation of the Hog-faced Gentlewoman*, called Mistriss Tannakin Skinker, who was borne at Wickham, a neuter town between the emperour and the Hollander, situate on the river Rhyne, who was bewitched in her mother's womb, in the year 1618, and hath lived ever since unknowne in this kind to any but her parents and a few of her neighbours; and can never recover her true shape until she be married, &c. Also relating the cause, as it is since conceived, how her mother came so bewitched. London, 4to. With a wood-cut of the lady and her suitor.†

1640. The first book that was published in England with an appendix, or collection of

original papers; a practice which has since been often followed by our antiquaries and historians very laudably, was Mr. Sonnen's *Antiquities of Canterbury*. 4to.—Dr. Pegge.

1640. *Collection of Speeches in Matter of Religion*. By sir Edward Deering. London, 4to.

"House of Commons.—Die Mercurii, 2 Feb. 1641. Resolved, that this book of sir Edward Deering (entitled a *Collection of Speeches*, &c.) is against the honour and privilege of this house, and scandalous to the house; and shall be burnt by the hands of the common hangman, in Westminster; Cheapside, and Smithfield, the author disabled from sitting as a member, and ordered to be committed to the tower."

"Friday, 4 Feb. 1641.—Ordered that the stationer that printed sir E. Deering's book should be sent for, and the books to be seized on, and burnt according to the order of the house, and to prohibit the sale of them."—*Diurnall of the Passages in Parliament*.

1640. JOHN JANNON, a celebrated printer at Sedan, in France, printed some very diminutive volumes, well known to collectors of books by the name of *Sedan editions*; they are highly valued, and in much request, on account of the smallness and neatness of the type, which corresponds with our diamond type; the *Virgil*, 32mo., dated 1625; the *Horace* of 1627, 32mo.; the *Greek Testament* of 1628, 32mo.; and the *Great Bible*, (the Geneva version) of 1633, two vols. 12mo. These editions are remarkably correct; but copies in fine condition are not often to be obtained. They are frequently either stained, or cut down in binding.

1640. *Died*, JOHN FORD, a poet and dramatic writer. He was designed for the legal profession, but, while a student in the Middle Temple, began to write plays and poems, of the former of which nine have been preserved. His chief play is the tragedy of the *Brother and Sister*, which, though in the highest degree objectionable on account of its subject, contains some scenes of striking excellence. The passion which Ford most successfully delineates is that of love: he excels in representing the pride and gallantry, and high-toned honour of youth, and the enchanting, or mild and graceful magnanimity of the female character. He was born in London, April 17, 1586.

1641. Printing introduced at KILKENNY and WATERFORD, Ireland, by Rinuccini, the pope's legate, for the purpose of disseminating those doctrines which he conceived to be essential to the interests of his master, and which his own violent disposition was but too ready to adopt. Dr. O'Connor (*Columbanus*, letter II. page xvi.) relates that "the nuncio's presses at Waterford and Kilkenny teemed with those vile publications which maintained that a papal excommunication, *whether just or unjust*, must be obeyed; and preachers were every where employed to assure the illiterate rabble, the bloody, and plundering, and desolating mob of the country, in their own language, that all the calamities of plague, famine, and war, which

\* A (CURIOUS) *Series of the Diurnalls or Weekly Intelligencers*, &c. of the period from 1641 to 1646, comprising two hundred and seventy various pieces. London, 1641, 4to., £19 12s.

† This very rare tract sold at the Gordonstoun sale for £7 17s. 6d. It has however been reprinted within these few years. As we have never been able to ascertain whether the contents of this singular tract are a translation, or merely the composition of an Englishman, it is impossible for us to say what degree of credit may be attached to the recital. On one point, however, we are decided, namely, that this tale has served as the basis for all the *pig-faced ladies*, both in this country and in France.—*Bibliographical Miscellany*.

then raged in Ireland, were to be attributed to the resistance which our nobility, gentry, and second order of clergy, made to the excommunications of the synod of Waterford! a synod which, in consequence of foreign influence, was guilty of the most flagrant perjury, violation of the public faith, and rebellion against their country, and against their king." The rebellion commenced in 1641, and was suppressed in September, 1643; it was calculated that 300,000 British and protestants had been massacred by the rebels, or driven from their habitations, besides those who fell in battle. Books, and particularly the bible, were treated with every indignity: they were torn to pieces or burnt.

1641. *Ar't asleepe Husband?* A *Bouster Lecture, stored with all variety of witty Jest, merry Tales, and other pleasant passages, by Philogenes Panedonius*, with the rare frontispiece, by Marshall. This work was sold for £5 5s.

1641. A precept from the lord mayor, for the master, wardens, and ten of the most graceful of the company of stationers, to attend on horseback, in their best array, with footmen, to receive the king on his return from Scotland, and wait on him through the city.

1640, Nov. 3, to June 1641. *The Speeches in Parliament were published in two vols. pp. 534, for William Cooke.*

1641. *The English Post.*

1641. *Warranted Tidings from Ireland*—London, printed by N. Butter, 4to. There were many occasional papers of news from Ireland, during the Irish wars.

1641, Sept. 23. *Sad Newses from the Seas, being a true relation of that good ship called the Merchant Royall, which was cast away ten leagues from the Land's End, on Thursday night, being the 23 of September last, 1641; having in her a world of Treasure, as this story following doth truly relate.* Printed in the year 1641. 4to.

1641. *Old Newses newly revived, on the discovery of all occurrences happened since the beginning of the Parliament.* 4to.

1641. *Newses from the North, or a Dialogue betwixt David Dammeslash, a souldier, and Walter Wheeler, a riche Northerne farmer.* 4to. with frontispiece.

1641. *A Pack of Patentees, opened, shuffled, cut, dealt, and played.* London. 1641. 4to. The characters introduced in this dramatic satire are Coals, Soap, Starch, Leather, Vinum, Salt, Hops, Tobacco, &c.

1642, Jan. 8. *Died, GALILEO GALILEO*, the celebrated astronomer. June 22, 1632, Galileo and his books were condemned at Rome, and he was compelled publicly to disavow sentiments, the truth of which to him must have been abundantly manifest. "Are these, then, my judges?" he exclaimed, in retreating from the inquisitors, whose ignorance astonished him. "It was in Florence (says Milton) that I found and visited the famous Galileo, grown old, a prisoner to the inquisition, for thinking in astronomy otherwise than the Franciscan and Dominican sciences thought." The confessor of his widow,

taking advantage of his piety, perused the manuscripts of this great philosopher, and destroyed such as in his judgment were not fit to be known to the world. He was born at Pisa, Feb. 19, 1564.

1642, March 7. The printers of London exhibited a petition before the committee for the better regulating the art of printing, and the calling in of four several patents concerning printing, which they conceived to be monopolies.

1st. A patent granted to Christopher Barker, and Robert Barker, his son, in the 19th and 31st Elizabeth, and since renewed 10th of James I., 3rd Caroli, to Bonham Norton, Bill, and others, or the sole printing of bibles, testaments, common prayer books, &c., in English; inhibiting all others from printing them.

2nd. A patent first granted to Richard Tottle, and lately confirmed to John More, for the sole printing of all law books whatsoever, prohibiting all others from printing them.

3rd. A patent first granted to John Norton, for the sole printing of all bibles, testaments, grammars, accidences, &c., in Latin, Greek, or Hebrew, and sundry other books in English.

4th. A patent lately made to Thomas Symcocke, for printing all things that are, may, or shall be printed upon one side of a sheet, or any part of a sheet, provided the other side be white paper. The complaint did not affect the patents. —*Prynne's Manuscripts.*

1642. STEPHEN BOLKELEY was settled as a printer in the city of York, and continued to practice the art till the year 1677.

1642. Sir THOMAS BROWN,\* author of the celebrated treatise entitled the *Religio Medici*, first written in 1634, and which he declares himself never intended for the press, having composed it only for his own exercise and entertainment. He had, however, communicated it to his friends, and by some means a copy was given to a printer in this year, and was no sooner published than it excited the attention of the public by the novelty of its paradoxes, the dignity of sentiment, the quick succession of images, the multitude of abstruse allusions, the subtlety of disquisition, and its strength of language. Amongst other strange opinions, the following will give some idea of his love towards the press, and upon authors that are multifarious, not having the good of "the trade" before their eyes; but thinking in Ganganelli's way, speaks in this heterodox style: "Tis not a melancholy wish of my own, but the desires of better heads, that there were a general synod; not to unite the incompatible differences of religion, but for the benefit of learning to reduce it, as it lay at first in a few and solid authors; and condemn to the fire those swarms

\* Sir Thomas Brown was born at Norwich, in 1605, and educated for the medical profession; he devoted many years to travelling in various countries; and besides his *Religio Medici*, wrote an *Enquiry into Vulgar and Common Errors*, which ran through many editions, and met with great applause. In 1663 he was chosen honorary member of the college of physicians, and in 1671, received at Norwich the honour of knighthood from Charles II. He died at Norwich, October 19, 1682.

and millions of rhapsodies, begotten only to distract and abuse the weaker judgment of scholars, and to maintain the trade and mystery of typographers." The earl of Dorset recommended this book to the perusal of sir Kenelm Digby, who returned his judgment upon it, not in a letter, but in a book, in which, though mingled with some positions fabulous and uncertain, there are acute remarks, just censures, and profound speculations; yet its principal claim to admiration is that it was written in twenty-four hours, of which part was spent in procuring Browne's book, and part in reading it. This induced the author to publish a more correct edition of his work, which had great success.

1642. The popularity of carol-singing occasioned the publication of a work entitled *Psalms or Songs of Sion turned into the language and set to the tunes of a strange land*. By W(illiam) S(layter), intended for Christmas carols, and fitted to divers of the most noted and common but solemn tunes, every where in this land familiarly used and known. Upon the copy of this book in the British museum, a former possessor has written the names of some of the tunes to which the author designed them to be sung; for instance, Psalm 6, to the tune of *Jane Shore*; Psalm 19, to *Bar. Forster's Dreame*; Psalm 43, to *Crimson Velvet*; Psalm 47, to *Garden Greene*; Psalm 84, to the *Fairest Nymph of the Valleys*.\*

1642, Jan. 11, Feb. 3. *Ireland's true Diurnal*, sent from an alderman in Dublin to his son in London. London: printed for William Bladen.

1642. *The Scots Scout's Discoveries*. Printed at London early in this year.

1642, April 22. *Occurrences from Ireland*.

1642, May 16. *A continuation of the Weekly Occurrences in Parliament—as also other Occurrences upon Saturday May 20*.

1642, May 24 to June 2. *Some special passages from London, Westminster, York, Ireland, and other parts, collected for the satisfaction of those that desire true information*. Printed for Thomas Baker.

1642, June 13-20. *A perfect Diurnal of the Passages in Parliament*, No. 4.

1642, July 3. *A perfect Diurnal*, No. 1, a continuation of *Special Passages*.

1642, July 26. *An exact Coranto*.

1642, July 16-26. *A Diurnal and Particulars of the last Week's Daily Occurrences, from his Majesty, in several places*.

\* The adaptation of religious poetry to secular melody in England, is noticed by Shakespeare, in the *Winter's Tale*, (act iv. sc. 3.) The clown relates that his sister being the mistress at his father's shearing feast, made four-and-twenty nose-gays for the sheep-shearers, all good catch-songs, mostly trebles and bases, with "but one puritan among them, and he sings psalms to herpsipes."

The most singular measure adopted for circulating the reformed opinions in Scotland, was the composition of "Gude and godly ballades, changed out of prophane songs, for avoiding of sinne and harlotrie." The title sufficiently indicates their nature and design. The air, the measure, the initial line, or the chorus of the ballads most commonly sung by the people at that time, were transferred to hymns of devotion. Unnatural, indelicate, and gross as this association appears to us, these spiritual songs edified multitudes at that time.

1642, August 16. *Special and considerable Passages*, No. 1.

1642, Aug. 22. *Mercurius Rusticus*; or, the Country's Complaint of the barbarous outrages begun in the year 1642, by the sectaries of this once flourishing kingdom. By Bruno Ryves, the king's chaplain. 4to.\*

1642, Oct. 3. *England's Memorable Accidents*.

1642, Oct. 11. *Weekly Intelligence*.

1642, Nov. 28. *A grand Diurnal of the Passages in Parliament*, No. 1.

1642, Nov. 6-11. *True Newses from our Navie now at Sea*.

1642, Dec. 20-27. *The Kingdom's Weekly Intelligencer*, No. 1.

1642. *Special Passages*.

1642. *The Latest remarkable Truth*.

1642. *Newses from Germany*.

1642. *A Grand Journal*.

1642. *Exceeding Welcome Newses from Ireland, being the copie of a letter sent from Dundalk to Mr. Dudley Norton, with true information what Victories have been obtained against the rebels in several parts of that Kingdome*, &c. London, 4to.

1642. *Newses from the narrow Seas, of the fearful fight between the Danes and Van Trump*.

1642. *Newses from the narrow Seas. Being a relation of a mighty fight upon the coast of Frizeland*. London, 4to.

1642. *Lamentable and Sad Newses from the North*. London, 4to.

1642. *Newses, true Newses, laudable Newses, Citie Newses, Court Newses, Country Newses: The world is mad, or it is a mad world my masters; especially now when the Antipodes these things are come to passe*. London, 4to.

1642. *Newses from Sally; or a strange delivery of four English captives from the slavery of the Turks*. 4to.

1642. *Happy Newses to England, sent from Oxford*. 4to. With a wood-cut.

1642. *Speedy Post, with more Newses from Hull*.

1642. *A Perfect Relation*.

1642, May 23-30. *The Heads of all the Proceedings of both Houses of Parliament*. London: printed for J. Smith and A. Coe.

1643. It appears that printing was introduced into the city of BRISTOL, in this year, from the following works:—*A Sermon by Richard Towgood*, 1643. 8vo. *Certain Observations on the new League or Covenant*, &c. with a copy of said Covenant. 4to. Bristoll, printed for Richard Harsell, and are to be sold by him in Bristoll, 1643. On the reverse is the licence of the bishop, "Imprimatur, Tho. Bristol," dated Feb. 20, 1643.

1643. A printing office at Tornaci destroyed by fire, in which many valuable works were consumed.

\* *Mercurius Rusticus* was originally published in one, and sometimes two sheets 4to. It has since gone through four editions, the last published in 1723, with a curious frontispiece; representing a kind of Dutch Mercury in the centre, and the other compartments, with fancied views of places where some of the scenes were acted. Bruno Ryves was a native of Blandford.

1643. *The Journal of William Dowling, of Stratford, parliamentary visitor, appointed under a warrant from the earl of Manchester, for abolishing the superstitious pictures and ornaments of churches, &c., within the county of Suffolk, in the years 1643, 1644.*

William Dowling was a fanatical Quixote, to whose intrepid arm many of our noseless saints, sculptured on our cathedrals, owe their misfortunes, as detailed by himself with a laconic conciseness, and it would seem with a little dry humour. He and his deputies scoured one hundred and fifty churches, breaking windows, defacing monuments, digging down the steps, and taking up inscriptions, &c. It has been humourously conjectured, that from the ruthless devastation of this redoubtable Goth, originated the phrase to *give a Dowling*.

During the civil wars the fury of the people was carried to such a pitch, that all resistance proved futile: the deans and canons were turned out of their stalls, the fonts were pulled down, and sold piecemeal; inscriptions, statues, coats of arms in brass, were torn from their ancient tombstones, and the very graves ransacked for the sake of plunder; in short, whatsoever remained of beauty was despoiled by the outrageous hands of sacrilegious profanation. In this forlorn state many churches remained for some years, when the committee of government took possession of the edifices and revenues accruing to the same. In 1649, an ordinance of the state passed for the pulling down and sale of the materials of all cathedral churches. In January, 1644, an ordinance was passed for the reform of the university of Cambridge. The earl of Manchester had the superintendence of this mandate, and ten heads of colleges, with sixty-five fellows only, were expelled; but upon the general's departure a more zealous committee increased the number.

Speaking of the sabbatical institutions of these times, Mr. D'Israeli observes, that they were acts of persons who imagine that they become more spiritual in the degree that they remove themselves from all corporeal humanity; as if mortals were born, so dead to all the affections of their nature! In transferring the rigours of the Jewish sabbath to the Lord's day, the contrast among the people was not only melancholy, but even ridiculous. All the business and recreations of life suddenly ceased; no cattle were led to the water, no provender was procured for the horse, no wine was to be sold, and if a godly servant could be prevailed on to prepare the Sunday dinner, she saved herself from the sin of washing the dishes. A sabbatarian lady had all her days longed to bless her eyes with the sight of royalty; when Charles and Henrietta were on a progress, Heylyn offered to procure her this favour; but the lady refused seeing a king and queen on a sabbath day.—*D'Israeli*.

The following copy of *ECHO VEASES* exhibits a curious picture of the state of religious fanatics, the Roundheads of Charles I., and are an evidence that in the hands of a wit even such things can be converted into instruments of wit. They

occur at the end of a comedy presented at the entertainment of the prince, by the scholars of Trinity college, Cambridge, in March, 1641; printed for James Calvin, 1642. The author, Francis Cole, holds in a print a paper in one hand, and a round hat in another. At the end of all is this humorous little poem:

## THE ECHO!

Now, Echo, on what's religion grounded?  
Round-head!  
Whose its professors most considerable?  
Rabble!  
How do these prove themselves to be the godly?  
Oddly!  
But they in life are known to be the holy.  
O lie!  
Who are these preachers, men or women-common?  
Common!  
Come they from any universitie?  
Cittie!  
Do they not learning from their doctrine sever?  
Ever!  
Yet they pretend that they do edifie:  
O fe!  
What do you call it then, to fructify?  
Ay.  
What church have they, and what pulpits?  
Fittie!  
But now in chambers the Conventicle:  
Tickle!  
The godly sisters shrewdly are belied.  
Belied!  
The godly number then will soon transcend.  
End!  
As for the temples they with zeal embrace them.  
Rase them!  
What do they make of bishop's hierarchy?  
Archies!  
Are crosses, images, ornaments their scandal?  
All!  
Nor will they leave us many ceremonies,  
Monies!  
Must even religion down for satisfaction?  
Faction.  
How stand they affected to the government civil?  
Evill!  
But to the king they are most loyal.  
Lge all.  
Then God keep king and state from these same men.  
Amen!

1643. Five hundred and thirty-nine ounces of plate, belonging to the company of stationers, were pledged for £120, to answer the assessment of £5 a week for three months; and on account of the present distractions, there shall be no dinner on the 6th of May, usually called *Lamb's Feast*; nor procession, or livery gowns. Only the company to meet at St. Faith's church, to hear the sermon.

1643. *Manchester's Joy for Darbie's Overthrow, or an exact relation of a famous Victory obtained by the Manchester Tories against the Lord Strange, Earle of Derby.* 4to. Oxford.

1643. *The Welshman's Declaration, declaring her resolution to be revenged on her enemies for to great overthrow of her cousins and countrymen in Teane forest, Cloucestershire.* 4to.

1643, Jan. 1. *Mercurius Aulicus: a Diurnal, communicating the intelligence and affairs of the court to the use of the kingdom, from Ox-*

\* An allusion probably to Archibald Armstrong, the fool or privileged jester of Charles I., usually called *Archy*, who had a quarrel with archbishop Laud, and of whom many arch things are on record. There is a little jest book, very high priced, and of little worth, which bears the title of *Archie's Jest*. He died April 1, 1673.

ford. By sir John Birkenhead. Oxford; printed by H. Hall, for W. Webb, bookseller, near to Queen's college.\*

1643, Jan. 9. *Certain Information*. No. 1.

1643, Jan. 30. *The Daily Intelligencer of Court, City, and Country*, relating the most remarkable passages in either, which may save much labour in writing letters. London: printed for John Thompson.

1643. *Britannicus Vapulans*, No. 1.

1643, Nov. 2. *Mercurius Vapulans*; or, the Whipping of poor British Mercury, by Mercurius Urbanus, younger brother to Aulicus.

\* *Mercurius Aulicus* continued in weekly 4to. sheets, until about 1648, after which time it only made an occasional appearance.

† It is ornamented with a great variety of wooden cuts; and this number, containing a vote of parliament with regard to the queen, is ornamented with her majesty's portraiture.

‡ A wood cut represents the dove with her aprig.

§ It has a wood cut, representing the Post on horseback.

|| This formed "the Water Poet's answer to all that hath or shall be writ by Mercurius Britannicus;" and intended as a partial reply to No. 16 of that work. The same writer in the following year printed "*No Mercurius Aulicus*," in reply to John Booker. See *British Bibliographer*, i. 520.

1644. *The Hypocrite discovered and cured*. By Samuel Torshell. 4to. The following instance of fanaticism and impiety is recorded in the above work:—A Mr. Greswold, a gentleman of Warwickshire, whom a Brownist had by degrees enticed from his parish church, was afterwards persuaded to return to it—but he returned with a troubled mind, and lost in the prevalent theological contests. A horror of his future existence shut him out, as it were, from his present one: retiring into his own house, with his children, he ceased to communicate with the living world. He had his food put in at the window; and when his children lay sick, he admitted no one for their relief. His house, at length, was forced open; and they found two children dead, and the father confined to his bed. He had mangled his bible, and cut out the titles, contents, and every thing but the very text itself; for it seems that he thought that every thing human was sinful, and he conceived that the titles of the books and the contents of the chapters, were to be cut out of the sacred scriptures, as having been composed by men.

1644. The first periodical publication issued in Denmark appeared at Copenhagen in this year; but not a single copy of this is now known to be remaining.

1644. A printing-office situate in the Butcher Row, at Oxford, was destroyed by fire.

1644, Sept. 8. *Died*, FRANCIS QUARLES, author of the *Emblems*, &c. He was born near Rumbold, in Essex, in 1592, and became secretary to archbishop Usher, was afterwards chronologer to the city of London, and wrote much in both prose and verse; but his principal work was his *Emblems*, a set of quaint pictorial designs, referring to moral and religious ideas, and each elucidated by a few appropriate verses. His *Enchiridion*, a series of moral and political observations, is also worthy of notice. His verses were more popular in their own time than those of the gayest court poets, being recommended by a peculiar harshness and gloom, accordant with the feelings of a large portion of the people. The *Emblems* have been reprinted. Quarles was also the author of a comedy, called the *Virgin Widow*, 1621.

1644, Jan. 17—23. *Mercurius*, &c.

Upon my life new borne, and wants a name,  
Truth let the reader then impose the same.

VERIDICUS,

— I wish thee; if not so.

Be —

MUTUS,

— for we lyce enough do know.

1644. *The Monthly Account*.

1644. *Mercurius Problematicus*.

1645, Jan. 10. WILLIAM LAUD, archbishop of Canterbury, was beheaded on this day for high treason, not proved against him.† He possessed great influence in the councils of Charles I., and was supposed by his opponents to have advised many of the most intemperate and obnoxious measures which led both himself and his master to the scaffold; his ruin therefore was earnestly sought by his enemies, and he fell a sacrifice to party violence, and high church sentiment. He was born at Reading, in Berkshire, October 7, 1573.

His great attachment to books appeared even from the articles of impeachment exhibited against him by his enemies—for amongst them are the following:—

ART. 5. Receiving a Bible, with a crucifix embroidered on the cover of it by a lady.‡

ART. 6. A book of Popish pictures, two Mis-

\* This French paper had been formerly published for two or three weeks, but discontinued. From this time it was published at London weekly, on Thursday morning, at nine o'clock.

† Another victim to popular fury was Thomas Strafford, earl of Westworth. The saints of the day vindicated this palpable murder by the phrase of Caiaphas, "that it was expedient that one man should die for the people." To what absurd lengths the people were carried away in the arts of insurrection, even from the pulpit, &c. is evident from one of the aldermen and common council, who said that the decay of trade, and difficulty with which country tradesmen paid their debts, were caused by delaying the decapitation of Strafford.—D'Israeli's *Commentaries on the Life and Reign of Charles I.* He was born in Chancery-lane, London, April 13, 1595, and beheaded May 13, 1641.

‡ In the library of St. John's college, Oxford, there is still preserved a *Salisbury Primer*, or *Missal*, printed by Pynson, upon vellum, and a beautiful copy of the *Aldine Aristophanes* of 1498; both of which belonged to the archbishop.

sales, *Pontificale*, and *Breviaries*, which he made use of as a scholar.

ART. 7. His [own] admirable *Book of Devotion*, digested according to the ancient way of canonical hours, &c.

1645, Jan. 10. Died, ROBERT BARKER, the king's printer, and who is noticed at page 433. ante, as having paid £3500 for amending or correcting the bible, had his reverses in fortune; for it appears from the following certificate, that he lay in prison for ten years:—"These are to certify whom it may concern, that Robert Barker, esq., was committed a prisoner to the custody of the marshal of the king's bench, the 27th of November, 1635, and died in the prison of the king's bench, the 10th of January, 1645."

1645, Feb. 18. Died, Sir RICHARD BAKER, well known as the author of the *Chronicle of the Kings of England*,\* which is rendered familiar to every reader, by the circumstance of Addison having taken it for the standard work always referred to by Sir Roger de Coverley, in any question relating to the history of our country.† It continued to be reprinted until 1730,‡ when an edition appeared with a continuation to the end of the reign of George I., but still with many errors, although, perhaps, not of much importance to the plain people who delight in the book. This is called by the booksellers the best edition. Sir Richard Baker was born at Sissinghurst, in Kent, about 1568, and educated at Oxford, from whence he removed to one of the inns of court, London, and afterwards travelled abroad. In 1620, he served the office of high sheriff of Oxford, and being cast into the Fleet prison for some of his wife's family debts, died there, and was buried in St. Bride's church, Fleet-street.

1643-5. *A looking glass for Malignants*. London: 4to. A virulent attack on the king's followers, particularly Laud and the prelates.

1645. A committee appointed by the privy council to discover scandalous or seditious pamphlets, that they might punish the authors, printers, and publishers.

1645. Thomas Fuller, the celebrated historian and divine, is said to have written at Exeter his *Good Thoughts in Bad Times*, and where the book was published this year, which he states to be "the first-fruits of the Exeter press."

1645. A *Book of Martyrs* was given for the prisoners in Ludgate, at their request, inscribed "The Gift of the Company of Stationers, 1645."

1645. LORD HERBERT, of Cheshbury, printed a work entitled *De Veritate, Causis Errorum et de Religione Laici*, 4to. London. This book of Lord Herbert's had no sooner made its appearance, than it was most eagerly sought after, and

\* Sir R. Baker's *Chronicle of the Kings of England, from the time of the Romans' Government, unto the Death of King James*. London. 1641, folio. First edition. With a frontispiece by Marshall, containing portraits of Charles I. and Sir R. Baker, and a plate by Cor. V. Dalen, of Charles II. when a boy, to whom it is dedicated.

† See *Spectator*.

‡ In ten editions, and it is sometimes found with the date of 1733, being the same as 1730, with a new title.

as rapidly translated into the several European languages. His lordship, prior to printing it, offered up the following ejaculation:—"O thou eternal God, author of the light which now shines upon me, and giver of all inward illuminations, I am not satisfied whether I should publish this book *De Veritate*; if it be for thy glory, I beseech thee give me some sign from heaven; if not, I shall suppress it." It is said the sign was received, and accordingly the book was printed.

Edward lord Herbert, of Cherbury, was born in 1581. On the breaking out of the civil wars he espoused the interest of the parliament, and being plundered by the king's forces, he obtained a pension. He was one of the most romantic and extraordinary persons of his age: his biographer states, "the most eminent and accomplished men of his time courted his intimacy, and the women procured miniature copies of his picture, and wore them secretly about their persons. He died at London in 1633."

1645. ANTOINE VITRAY, of VITRE, printed the celebrated *Paris Polyglott*, in seven languages, Hebrew, Samaritan, Chaldee, Greek, Syriac, Latin, and Arabic; and no work executed in France during this century, was equal in splendour or celebrity to this magnificent undertaking, published under the auspices and at the sole expense of M. Le Jay.\*

The design of this great work originated with cardinal Perron, who conceived the idea of reprinting the *Antwerp Polyglott*, with additions; but the cardinal dying in 1617, before the Polyglott had been commenced, M. Le Jay became the patron of the undertaking, which was begun in 1628, and completed in 10 vols. imperial folio.

It contains all that is in the Complutensian or Antwerp editions, with several important additions, particularly of the *Samaritan Pentateuch*, which was first printed in this Polyglott, with its version, from manuscripts brought into Europe between 1620 and 1630. One great inconvenience in the work is, that the Samaritan, the Syriac, and the Arabic, are not placed in parallel columns. It is also defective in having no "apparatus," or prolegomena; and being destitute of the grammars and lexicons accompanying the former Polyglotts; and consequently, though more splendid, much less useful than the *Polyglott of London*.

1645, Aug. 28. Died, HUGO GROTIUS, an illustrious Dutch writer, whose works in the different departments of learning are believed

to have had a decisive influence in the diffusion of an enlightened and liberal manner of thinking in affairs of science. He was born at Delft, in Holland, April 10, 1583, and while a child acquired fame for his extraordinary attainments. At the age of eight he composed Latin verses of great merit. In his twelfth year he was sent to Leyden under the care of Francis Junius. In 1598 he accompanied the ambassador Barneveldt to the court of Henry IV. of France, who was so pleased with Grotius, that he gave him his picture and a gold chain; while in France he took the degree of doctor of laws. The year following he commenced practice as an advocate, and pleaded his first cause at Delft. Soon afterwards he published an edition of *Martianus Capella*, which was well received by the learned. This was followed by the translation of a work of Stevinus, on finding a ship's place at sea. His edition of the *Phænomena of Aratus* appeared in 1600, and about the same time he composed Latin tragedies on sacred subjects. He was now appointed historiographer of the united provinces, and advocate-general of the treasury for Holland and Zealand. In the year 1608, Grotius married Mary Reigersberg, whose father had been burgomaster of Veer. The wife was worthy of the husband, and her value was duly appreciated. Through many changes of fortune they lived together in the utmost harmony and mutual confidence. In 1609, he published his famous book on the liberty of the sea, which was answered by the learned Selden. About this time also appeared his *Treatise de Antiquitate Reipublicæ Batavæ*, to prove the independence of Batavia of the Romans. In 1613 he accepted the post of pensioner of Rotterdam, by which means he obtained a seat in the states of Holland.

Grotius lived in an evil time, when society was unhappily distracted by furious religious and political disputes. Mankind were mad with theological controversy, and Christian charity, amidst the tumult of parties, was entirely forgotten. Grotius was an Armenian and republican, and his professional pursuits soon involved him in a strife, which it was next to impossible to avoid. Barneveldt, his early patron, who possessed similar sentiments, was seized and brought to trial, and Grotius supported him by his pen and influence. In 1619, Barneveldt, on the charge of rebellion, was brought to the scaffold and beheaded, and his friend Grotius was sentenced to imprisonment for life in the fortress of Louvestein, in South Holland. After this very rigorous and unfair proceeding, his estates were confiscated.

Literature added its powerful charm to his domestic consolations; and he who has a good wife, and is surrounded by good books, may defy the world. Accordingly, we find Grotius pursuing his studies with cheerful contentment, in the fortress where he was condemned to remain during life. But his faithful wife was resolved to procure his freedom. Those who trusted her with him must have had a small

\* Gui Michel le Jay was an advocate in parliament, eminent for his profound knowledge of languages. He expended 100,000 crowns in the publication of the Polyglott, which was offered to sale in England, but at too high a price to be accepted. Cardinal Richelieu offered to reimburse the expenses, on condition of having his own name affixed to it; but the high-spirited Le Jay refused the proposal, and the cardinal meanly endeavoured to depreciate the work, by countenancing certain persons to write against it. The fortune of Le Jay being thus ruined, and he having become a widower, he adopted the ecclesiastical life, was made dean of Vézelay, and at length counsellor of state, by Louis XIV. He died in 1675.

knowledge of the ingenuity and activity of woman's affection. Her mind never for a moment lost sight of this favourite project, and every circumstance that might favour it was watched with intense interest.

Grotius had been permitted to borrow books of his friends in a neighbouring town; and when they had been perused, they were sent back in a chest, which conveyed his clothes to the washer-woman. At first his guards had been very particular to search the chest; but never finding any thing to excite suspicion, they grew careless. Upon this negligence, Mrs. Grotius founded hopes of having her husband conveyed away in the chest. Holes were bored in it to admit the air, and she persuaded him to try how long he could remain in such a cramped and confined situation. The commandant of the fortress was absent, when she took occasion to inform his wife that she wished to send away a large load of books, because the prisoner was destroying his health by too much study. At the appointed time Grotius entered the chest, and was with difficulty carried down a ladder by two soldiers. Finding it very heavy, one of them said, jestingly, "there must be an Arminian in it." She answered very coolly that there were indeed some Arminian books in it. The soldier thought proper to inform the commandant's wife of the extraordinary weight of the chest; but she replied that it was filled with a load of books, which Mrs. Grotius had asked her permission to send away, on account of the health of her husband. A maid, who was in the secret, accompanied the chest to the house of one of her master's friends. Grotius came out uninjured; and, dressed like a mason, with trowel in hand, he proceeded through the market-place to a boat, which conveyed him to Brabant, whence he took a carriage to Antwerp. This fortunate escape was effected in March, 1621. His courageous partner managed to keep up a belief that he was very ill in his bed, until she was convinced that he was entirely beyond the power of his enemies. When she acknowledged what she had done, the commandant was in a furious passion. He detained her in close custody, and treated her very rigorously, until a petition, which she addressed to the states-general, procured her liberation. Some dastardly spirits voted for her perpetual imprisonment; but the better feelings of human nature prevailed, and the wife was universally applauded for her ingenuity, fortitude, and constant affection. Grotius found an asylum in France, where he was reunited to his family. A residence in Paris was expensive; and for some time he struggled with pecuniary embarrassment. The king of France at last settled a pension upon him. He continued to write, and his glory spread throughout Europe.

He was unable to obtain any public permission to return; but relying on a recent change in the government, he, by his wife's advice, boldly appeared at Rotterdam. His enemies were still on the alert; they could not forgive

the man who refused to apologise, and whose able vindication of himself had thrown disgrace upon them. Many private persons interested themselves for him; but the magistrates offered rewards to whoever would apprehend him. Such was the treatment this illustrious scholar met from a country which owes one of its proudest distinctions to his fame!

He left Holland, and resided at Hamburg two years; at which place he was induced to enter the service of Christina, queen of Sweden, who appointed him her ambassador to the court of France. After a residence of ten years, during which he continued to increase his reputation as an author, he grew tired of a situation, which circumstances rendered difficult and embarrassing. At his request he was recalled.

He visited Holland, on his way to Sweden, and at last met with distinguished honour from his ungrateful country. After delivering his papers to Christina, he prepared to return to Lubeck. He was driven back by a storm; and being impatient, set out in an open waggon, exposed to wind and rain. This imprudence occasioned his death. He was compelled to stop at Rostock, where he died suddenly, in the sixty-third year of his age. His beloved wife, and four out of six of his children, survived him.

One of the most interesting circumstances in the life of Grotius, which strongly marks his genius and fortitude, is displayed in the manner in which he employed his time during his imprisonment. Other men, condemned to exile and captivity, if they survive, despair; the man of letters may reckon those days as the sweetest of his life. The life of this great man shows the singular felicity of a man of letters and a statesman; and how a student can pass his hours in the closest confinement. The gate of the prison has sometimes been the porch of fame. Another circumstance worthy of imitation was his uninterrupted literary avocations, when his hours were frequently devoted to the public functions of an ambassador. "I only reserve for my studies the time which other ministers give to their pleasures, to conversations often useless, and to visits sometimes unnecessary."

1646, April 3. *Died*, THOMAS LYDIAT, an eminent chronologer and astronomer. While confined in the king's bench for debt, he wrote his *Annotations on the Parian Chronicle*, which were first published by dean Prideaux, in 1676. Thomas Lydiat was that learned scholar whom Dr. Johnson alludes to; an allusion not known to Boswell and others. He was born in 1572.

1646. An almanack was printed at Waterford, in Ireland, and one at London, each containing an epitome of Irish affairs; the latter was entitled the *Bloody Irish Almanack*.

1646, Oct. 9. The order of bishops abolished by parliament. I refer the reader, says D'Israeli, to Selden's *Table Talk*, for many admirable ideas on bishops. That enlightened genius, who was no friend to the ecclesiastical temporal power, acknowledges the absolute necessity for this order in a great government. The preservers of our literature and our morals they ought to be, and many have been. When the political reformers ejected the bishops out of the house, what did they gain? A mere vulgar prating race, but even more lordly. Selden says, "the bishops being out of the house, whom will they lay the fault upon now? When the dog is beat out of the room, where will they lay the stink?"

1646. Nearly thirty years having elapsed since the publication of the last folio edition of the *Swedish bible*, the queen Christina,\* rendered so famous in history by her literary attainments, her renunciation of the Protestant religion, and her abdication of the crown of Sweden, caused

a new edition to be printed at Stockholm, in folio, by Henry Kayser, senr. which has obtained the designation of *Queen Christina's Bible*.

1646, Nov. 25—Dec. 2. *Diutinus Britannicus*, Collector of the affairs of Great Britain, and Martial Proceedings in Europe, No. 1. In No. 5, dated Dec. 8, 1646, the title was changed to *Mercurius Diutinus*.

1646. *Papers from the Scots Quarters*, No. 1.

1646, Dec. 31. The *London Post*, No. 1.

1647. During the reign of Charles I. and the Commonwealth, the most curious and singular titles of books were adopted; and as a subject of literary curiosity, some amusement may be gathered from a glance at what has been doing in the world concerning this important portion of every book. Goldsmith says that "titles and mottoes to books are like escutcheons and dignities in the hands of a king. The wise sometimes condescended to accept them; but none but a fool would imagine them of any real importance. We ought to depend upon intrinsic merit, and not to the slender hopes of the title." D'Israeli remarks, that "it is too often with the titles of books, as with those painted representations exhibited by the keepers of wild beasts; where, in general, the picture itself is made more striking and inviting to the eye, than the enclosed animal is always found to be." The copious mind of Johnson could not discover an appropriate title, and indeed in the first *Idler*, acknowledged his despair. The *Rambler* was so little understood, at the time of its appearance, that a French journalist has translated it *Le Chevalier Errant*; and when it was corrected to *L'Errant*, a foreigner drank Johnson's health one day, by innocently addressing him by the appellation of Mr. "Vagabond!" Were it inquired of an ingenious writer what page of his work had occasioned him the most perplexity, he would often point to the title-page.

The Jewish and many oriental authors were fond of allegorical titles, which always indicate the most puerile age of taste. The titles were

\* Born at Stockholm, December 8, 1626, and was the only child of Gustavus Adolphus, whom she succeeded at the age of six years, in 1632. She invited to her court the most learned men in Europe, particularly Grotius, whom she sent ambassador to France; Selmaeus, Descartes, Bochart, Huet, Vossius, and Melibonius. In 1654 she resigned the crown to her cousin Charles Gustavus, and removed to Rome, but after residing there some time, she went to France, where she was well received by Lewis XIV. But the unaccountable murder of her master of the horse, Monaldeschi, whom she caused to be put to death in her own house, for having betrayed some confidential secrets, gave general disgust, and she applied to Cromwell for leave to visit England, which was refused. On this she returned to Rome. On the death of Charles Gustavus, in 1660, she returned to Sweden, with a view of regaining the throne, but her subjects were disgusted with the change of her religion; and to preserve her income she was obliged to make a second renunciation of the crown. She returned to Rome, where she died in 1689.

usually adapted to their obscure works. It might exercise an able enigmatist to explain their allusions; for we must understand by the *Heart of Aaron*, that it is a commentary on several of the prophets. The *Bones of Joseph* is an introduction to the Talmud. The *Garden of Nuts*, and the *Golden Apples*, are theological questions; and the *Pomegranate with its Flower*, is a treatise of ceremonies, not any more practised. Jortin gives a title, which he says of all the fantastical titles he can recollect is one of the prettiest. A rabbin published a catalogue of rabbinical writers, and called it *Labia Dormientium*, from Cantic. vii. 9. "Like the best wine for my beloved that goeth down sweetly, causing the lips of those that are asleep to speak." It hath a double meaning, of which he was not aware, for most of his rabbinical brethren talk very much like men in their sleep.

Almost all their works bear such titles as bread—gold—silver—roses—eyes, &c.; in a word, any thing that signifies nothing.

Affected title-pages were not peculiar to the orientals; the Greeks and the Romans have shown a finer taste. They had their Cornucopies, or horns of abundance—Limones, or meadows—Pinakidions, or tablets—Pancarpes, or all sorts of fruits; tides not unhappily adapted for the miscellanists. The nine books of Herodotus, and the nine epistles of Æschines, were respectively honoured by the name of a muse; and three orations by those of the graces.

The modern fanatics have had a most barbarous taste for titles. We could produce numbers from abroad, and at home. Some works have been called, *Matches lighted at the Divine Fire*,—and one the *Gun of Penitence*: a collection of passages from the fathers is called the *Shop of the Spiritual Apothecary*: we have the *Bank of Faith*, and the *Sixpennyworth of Divine Spirit*: one of these works bears the following elaborate title: *Some fine Biscuits baked in the Oven of Charity, carefully conserved for the Chickens of the Church, the Sparrows of the Spirit, and the Sweet Swallows of Salvation*. Sometimes their quaintness has some humour. Sir Humphrey Lind, a zealous puritan, published a work which a jesuit answered by another, entitled *A Pair of Spectacles for Sir Humphrey Lind*. The doughty knight retorted, by *A Case for Sir Humphrey Lind's Spectacles*.

About 1614-15 the following sermons were published by William Adams, which, for the sake of the titles, are worth preserving, viz.:—*White Devil*; or the *Hypocrite Unmasked*. *Black Devil*; or the *Apostate*. *Lycanthropy*; or the *Wolfe annoying the Lambs*. *Spiritual Navigation bound for the Holy Land*. *The Devil's Banquet*. *Sinner's Passing Bell*; or *Phisicke for Heaven*.

In 1626, a pamphlet was published in London, entitled, *A most delectable sweet perfumed Nosegay for God's Saints to smell at*. About the year 1646, there was published a work entitled, *A Pair of Bellows to blow off the Dust cast upon John Fry*. The author of a book on charity entitled his work, *Hooks and Eyes for Believers*

*Breeches*; and another, who professed a wish to exalt poor human nature, called his labours, *High-heeled Shoes for Dwarfs in Holiness*; and another, *Crumbs of Comfort for the Chickens of the Covenant*. A quaker, in prison, published *A Sigh of Sorrow for the Sinners of Zion, breathed out of a Hole in the Wall of an Earthen Vessel, known among men by the name of Samuel Fish*. About the same time appeared, *Salvation's Vantage Ground! or a Louping Stand for Heavenly Believers*; another, *A Shot aimed at the Devil's Head Quarters, through the Cannon of the Covenant*. This is an author who speaks plain language, which the most illiterate reprobate cannot fail to understand. Another book has the following copious description,—*Seven Sobs of a Sorrowful Soul for Sin, or the Seven Penitential Psalms of the princely Prophet David, whereunto is also annexed William Hunnui's Handful of Honeyuckles, and divers godly and pithy Ditties, now newly augmented*. (See page 426, ante.)

In 1640, the following work was published:—*Silver Watch-Bell, the sound whereof is able (by the grace of God) to win the profane Worldling to become a true Christian*. By Thomas Tymmes.

Among the titles of French books of piety, burlesque has ever reigned; as the *Snauffers of Divine Love*; the *Spiritual Mustard Pot*, to make the Soul sneeze with Devotion; the *Capuchin booted and spurred for Paradise*.

Some of these obscure titles have an entertaining absurdity; as the *Three Daughters of Job*, which is a treatise on the three virtues of patience, fortitude, and pain. The *Innocent Love, or the Holy Knight*, is a description of the ardours of a saint of the virgin. The *Sound of the Trumpet* is a work on the day of judgment; and *A Fan to drive away Flies* is a theological treatise on purgatory.

A rhodomontade title-page was once a great favourite. There was once a time when the republic of letters was over-built with *Palaces of Pleasure, Palaces of Honour, and Palaces of Eloquence*, with *Temples of Memory, and Theatres of Human Life, and Amphitheatres of Providence*; *Pharoses, Gardens, Pictures, Treasures*. The epistles of Guevara dazzled the public eye with their splendid title, for they were called *Golden Epistles*; and the *Golden Legend* of Voiraigue had been appropriately entitled leaden. They were once so fond of novelty, that every book recommended itself by such titles as, *A New Method*; *New Elements of Geometry*; the *New Letter Writer*, and the *New Art of Cookery*.

To excite the curiosity of the pious, some writers employed artifices of a very ludicrous nature. Some made their titles rhyming echoes; as this one of a father, who has given his works under the title of *Scala Alæ animi*; and *Jesui novi Orbis*. Some have distributed them according to the measure of time, as one Father Nadasi, the greater part of whose works are *years, months, weeks, days, and hours*. Some have borrowed their titles from the parts of the body; and others have used quaint expressions,

such as,—*Think before you leap—We must all die—Compel them to enter.* Some of our pious authors appear to have been aware that they were burlesquing religion.

One Massieu having written a moral explanation of the solemn anthems sung in Advent, which begin with the letter O, published his work under the punning title of *La Douce Moelle, et la sausse friande des on savoureux de l'Advent.*

If a title be obscure, it raises a prejudice against the author; we are apt to suppose that an ambiguous title is the effect of an intricate or confined mind. The false idea which a title conveys is alike prejudicial to the author and the reader. Titles are generally too prodigal of their promises, and their authors are contemned; but the works of modest authors, though they present more than they promise, may fail of attracting notice by their extreme simplicity. In either case, a collector of books is prejudiced; he is induced to collect what merits no attention, or he passes over those valuable works whose titles may not happen to be interesting. After all, many authors are really neither so vain, nor so honest, as they appear; for magnificent, or simple titles, have often been given from the difficulty of forming any others.

1647. One of the scarcest books in the world is entitled *Prieres et Meditations, par Antoine Godeau*.<sup>\*</sup> Paris. It was printed in a particular form for the use of Anne of Austria, queen of France, and the royal family; and only six copies were struck off.

1647, Sept. 30. An ordinance of parliament passed the house of lords on this day, that no person shall make, write, print, sell, publish, or utter, or cause to be made, &c., any book, pamphlet, treatise, ballad, libel, sheet, or sheets of news whatsoever (except the same be licensed by both or either house of parliament,) under the penalty of 40*s.* and an imprisonment not exceeding forty days, if he can not pay it: if a printer, he is to pay a fine of only 20*s.*, or suffer twenty days' imprisonment, and likewise to have his press and implements of printing broken in pieces. The bookseller, or stationer, to pay 10*s.*, or suffer ten days' imprisonment,—and, lastly, the hawker, pedlar, or ballad-singer, to forfeit all his printed papers exposed to sale, and to be whipt as a common rogue in the parish where he shall be apprehended. Early in the following year, the committee of estates in Scotland passed an act prohibiting the printing, *under the pain of death*, any book, declaration, or writing, until these were first submitted to their revision. Upon the restoration, the prohibition was renewed against printing without license from the king, the parliament, or privy council; and those who

presumed to publish seditious books, or had them in their possession, were punished with the utmost rigour.

One of the consequences of these persecutions was the raising up of a new class of publishers those who became noted for what was called “unlawful and unlicensed books.” Sparkes, the publisher of Prynne's *Histriomastix*, was of this class.\* The presbyterian party in parliament, who thus found the press closed on them, vehemently cried out for its freedom; and it was imagined, that when they ascended into power, the odious office of a licenser of the press would have been abolished; but these pretended friends of freedom, on the contrary, discovered themselves as tenderly alive to the office as the old government, and maintained it with the extreme vigour.

Both in England and Scotland, during the civil wars, the party in power endeavoured to crush by every means the freedom of the press; but it has been well remarked, that the liberty of the press is the most powerful instrument which a people possess for the safeguard of their liberties and of the administration of justice. It creates, establishes, and directs the public opinion; it bestows on and deprives kings and governments of that moral force without which no power can subsist. Despots and tyrants who seek to perpetuate the government of privileges and of abuses on the ruins of the liberties of the people, have always waged the most violent warfare against the right of expressing thought, that birthright of nature and the spring and principle of all society. They hate it, slander it, invent captious objections as arms against it, and mislead the understanding of many who are thus perhaps rendered adverse to the exercise of the most sacred of the rights of men. But the great bugbear, the war-horse which is constantly mounted against the liberty of the press, is the abuse which has been made of it where the people are but little civilized, the passions which it stirs up, the discords to which it gives birth; and indeed the effects which are thus produced seem to favour the rancour which is displayed against the fairest and most valuable of human institutions; never reflecting that the most just and sacred of things are subject to abuses which may prevent their ends, and which make them seem vicious instead of appearing beneficial.

1647. *Died*, EDWARD BREWSTER, who had been eight years treasurer to the stationers' company. In the following year his widow presented to the company a large bowl of silver, weighing nineteen ounces. Edward Brewster, their son, was master of the company in 1689 and 1692.

1647. The following work was printed in the island of MALTA: *Della descrizione di Malta isola nel mare Siciliano*; and the same work is adduced by Haym, in his *Biblioteca Italiana*, where the author, G. Abela, as well as the printer, Bonacota, are expressly named.

\* M. Anthony Godeau, bishop of Vince, in France, was a voluminous author both in prose and verse. He published a *French New Testament*, in which he inserted explanatory terms, printed at Paris, 1666, two vols. 8vo. and again in 1679, two vols. 12mo. He is said to have been the first person who gave a *Church History* in the French language. It was a saying of Godeau, that to compose was an author's heaven, to correct his works an author's purgatory, but to correct the press an author's hell. He died April, 1671.

The Chrystal springs by swine, are puddle made.

1647, Sep. 14. *Mercurius Pragmaticus*, communicating intelligence from all parts, touching all affairs, designs, humours, and conditions, throughout the kingdome, especially from Westminster and head-quarters, No. 1.

When as we liv'd in Peace (God wot)  
A King would not content us,  
But we (for sooth) must hire the Scot  
To all-be Parliament us.

Then down went King and Bishops too,  
On goes the holy worke.  
Betwixt them and the Brethren blew,  
T' advance the Crowne and Kirke.

But when that these had reign'd a time,  
Rob'd Kirke and Sold the Crowne,  
A more Religious sort up climbe,  
And crush the Jockies downe.

But now we must have Peace againe,  
Let none with feare be vex;  
For, if without the King these reigns,  
Then heigh down they goe next.

By Marchmont Needham, says Anthony Wood.

1648. An ordinance was passed for "the suppression of all stage plaies, and for the taking down all their boxes, stages, and seats whatsoever, that so there might be no more plaies acted." "Those proud parroting players" are described as "a sort of superbius ruffians; and, because sometimes the asses are clothed in lions' skins, the dolts imagine themselves somebody, and walke in as great state as Cæsar." This ordinance against "boxes, stages, and seats," was, without a metaphor, a war of extermination. They passed their ploughshare over the land of the drama, and sowed it with their salt; and the spirit which raged in the governing powers appeared in the deed of one of their followers. When an actor had honourably surrendered himself in battle to this spurious "saint," he exclaimed, "Cursed be he who doth the work of the Lord negligently," and shot his prisoner because he was an actor!

This stage persecution, which began in the reign of Elizabeth, had been necessarily resented by the theatrical people, and the fanatics were really objects too tempting for the traders in wit and satire to pass by. They had made themselves very marketable; and the puritans, changing their character with the times, from Elizabeth to Charles I., were often the *Tartuffes* of the stage. But when they became the government itself, in 1642, all the theatres were suppressed, by an ordinance dated September 2, of that year, because "stage-plays do not suit with seasons of humiliation; but fasting and praying have been found very effectual." This was but a mild cant, and the suppression, at first, was only to be temporary. But as they gained strength, the hypocrite, who had at first only struck a gentle blow at the theatre, with redoubled vengeance buried it in its own ruins. Alexander Brome's comedies disclose the secret motive:—

— " 'Tis worth our note  
Bishops and players, both suffer'd in one vote.  
And reason good, for they had cause to fear them;  
One did suppress their schisms, and t' other jeer them.  
Bishops were guiltiest, for they swell'd with riches;  
'T other had nought but verses, songs, and speeches,  
And by their ruin the state did no more  
But rob the spiteful, and unrag the poor.

The tenor of the above ordinances was strictly enforced; many young and vigorous actors joined the king's army, in which for the most part they obtained commissions, and others retired on the scanty pittances they had earned.†

\* Marchmont Needham.

† Some account of the dispersed actors will be found in that curious morsel *Historia Histrionica*, preserved in the twelfth volume of Dodsley's old plays.

Captain Bethan was appointed provost marshal, "with power to seize upon all ballad singers, and to suppress stage-plays." This was to enforce Cromwell's ordinance enacted February 13.

1648. *The Kentish Fayre*, or the parliament sold to their best worth. 4to.

Good Oliver lend me thy nose,  
Tis darke, all lights are out,  
For now I mean to write in prose,  
But guided by thy snout.

Black Tom already's at the Faire,  
And in his coach is carried;  
His men meanwhile blowne in the Ayre,  
And to the fiends are married.

Some Citizens they say shall ride  
To buy knacks for their wives,  
Let Skippin Skipp on as their guild,  
He may protect their lives.

At Rochester the faire is held,  
By all good tokens know it,  
A thousand Saints late there were feld  
As yet the bridge can shew it.

Printed at Rochester, and are to be sold to all those that dare to buy them. This is the earliest specimen of printing from that city.

1648. *Mistis Parliament her Gossiping*. Full of Mirth, merry Tales, chat, and other pleasant Discourse, between

Mrs. { Statute, } and Mrs. { Parliament,  
      { Justice, }         { Ordinance,  
      { Truth, }         { Synod.

Mistis Parliament that late lay in,  
Invites you now unto her gossiping;  
And as the order is unto the day,  
For what you este she'll make you roundly pay.  
Pray commons eate, heres chat and laughter,  
And committee fruit in dishes after.  
Fall too and welcome, I have still in store.  
Her tryalls past; shee is condemn'd to die,  
Her execution day draws ne;,  
Come help to guard her to the Gallow-tree,  
England is freed of all her miserie.

MRS. ENGLAND being moderator.

By Mercurius Melancholicus. Printed in the year of the downfall of the Sectaries. 1648.

1648, Dec. 23. Richard Royston, the royal bookseller, at the Angel, in Ivy-lane, receives the manuscript copy of *Eikon Basilike*; the *Pourtraicture of his Sacred Majesty in his Solitude and Sufferings*, for the press. The book was in circulation on the "martyrdom." Royston made such haste with the work, that it was printed before the 30th of January, on which day his majesty died. On the first publication of this work, the instantaneous effect produced on the nation was such, fifty editions, it is said, appearing in one year. Mr. Malcolm Laing observes, "that had this book," a sacred volume to those who considered the sovereign as a martyr, "appeared a week sooner, it might have preserved the king," and possibly have produced a change of popular feeling.

The *Eikon Basilike* was written by Charles during his confinement at Holmsby; the work has, however, been attributed to Dr. Gaudon, bishop of Worcester, who was incapable of writing the book, but not of disowning it. Dr. Gaudon died September 20, 1662, buried at Worcester.

1648. *Craftie Cromwell*, or Oliver ordering our New State. A Tragi-Comedie. Wherein is discovered the trayterous Undertakings and Proceedings of the said Nol and his levelling Crew. Written by Mercurius Melancholicus.

Shall Cromwell not be famous made  
Unto the after-times,  
Who durst a throne for to invade,  
And act the worst of crimes?

Shall not his nose dominical  
In verse be celebrated;  
Shall famous Harry Martin fall,  
And not be nominated?

Shall Pride the drayman, Joice the taylor,  
And all the holy crew,  
With Hammond, and K. Charles his jaylor,  
And Stains that holy Jew,

Be read hereafter? sure they shall!  
And if my muse give aid,  
This shall be their memoriall,  
These rogues their king betrayd.

—— Ridetentem dicere verum,  
Quid vetat?

To kill the King eight yeares agoon  
Was counted Highest Treason:  
But now 'tis deemed just, and done  
As consonant to Reason.

The Temple was esteemed then  
Sacred and Venerable:  
Adorn'd with grave and godly Men,  
But now 'tis made a Stable.

"Twas Criminal to violate  
The wholesome Lawes o' th' Nation:  
But (now we have a lawlesse State,)  
'Tis done by Proclamation.

Both Prince and People liv'd in Peace;  
The Land with Wealth abounded:  
But now those Blessings fade and cease,  
Thanks to the cursed Round-head.\*

\* Newspapers had been established a very short time before they were prostituted to serve a party, and to impose upon the public. The following anecdote, from the interesting memoirs of Col. Hutchinson, of Nottingham, written by his wife, will illustrate the subject. When describing the conduct of sir John Gell, of Derbyshire, she says—This man kept the diurnal makers in pension, so that whatever was done in the neighbouring counties against the enemy, was attributed to him; and thus he hath indirectly purchased himself a name in story, which he never merited;—one who knew him well, says he was not valiant, though the men once held him up among a stand of pikes, while they obtained a glorious victory, when the earl of Northampton was slain; certain it is he was never, by his good will, in a fight, but either by chance or necessity; and that which made his courage the more questioned was, the care he took, and the expense he was at, to get it weekly mentioned in the diurnals, so that when they had nothing else to renounce him for, they once put in that the troops of that valiant commander, sir John Gell, took a dragoon with a plash doublet. Mr. Hutchinson, on the other side, that did well for virtue's sake, and not for the vain glory of it, never would give anything to buy the flatteries of those scribblers, and when one of them once, while he was in town, made mention of something done at Nottingham with falsehood, and had given Gell the glory of an action in which he was not concerned, Mr. Hutchinson rebuked him for it; whereupon the man begged his pardon, and told him he would write as much for him the next week; but Mr. Hutchinson told him he scorned his mercenary pen, and warned him to dare to be in any of his concerns, whereupon the fellow was awed, and he had no more abuse of that kind.

1648, Jan. 30. On this day was beheaded, in the forty-ninth year of his age, and twenty-fourth of his reign, CHARLES I. king of England, an awful lesson to the possessors of royalty, to watch the growth of public opinion, and to moderate their pretensions in conformity with the reasonable desires of their subjects. The conduct of Charles shews the false policy of attempting to overcome circumstances; but none of the Stuarts would temporize, and thus ruined themselves. The times of this king are a lesson of instruction to all ages, particularly as to fixing the character of the civil rights and constitutional usages, and the means of preventing the spiritual from elevating itself above the temporal power, the best preventive to which is the diffusion of knowledge, through a well regulated press. Had Charles lived at a more early period, when the sense of wrong was quickly subdued by the habit of submission, his reign would probably have been marked by fewer violations of the national liberties. It was resistance that made him a tyrant. The spirit of the people refused to yield to the encroachments of authority; and one act of oppression placed him under the necessity of committing another, till he had revived and enforced all those odious prerogatives which, though usually claimed, were but sparingly exercised, by his predecessors. The unfortunate end of this monarch filled the kingdom with consternation. The people sought freedom of rights, religious and political; but they had no wish to shed the blood of their monarch. The pious resignation with which he bore his sufferings had greatly endeared him to the nation; and the firmness with which he conducted himself during his trial drew upon him the respect of mankind. His mind was inclined to virtue, but he was better suited to direct a regular established government than to check the pretensions of a popular assembly, and it was his misfortune to be brought forward just at the period when the exercise of arbitrary power began to feel restraint from the genius of liberty: a situation of peculiar difficulty, and which required great political prudence, with no common portion of firmness of character. No wonder then that a king who was wholly deficient of the latter quality, should have become the dupe of a small faction of bold and ambitious spirits.

Charles I. was a great virtuoso, and delighted particularly in sculpture and painting. He not only possessed a critical tact, but an extensive knowledge in the fine arts and the relics of antiquity; and what is more remarkable, it was a passion without ostentation or egotism.

Warburton, who had ranged with keen delight through the age of Charles I., the noblest and

the most humiliating in our own history, and in that of the world, perpetually instructive, has justly observed the king's passion for the fine arts. It was indeed such, that had the reign of Charles I. proved prosperous, that sovereign about 1640 would have anticipated those tastes, and even that enthusiasm, which are still almost foreign to the nation.

The mind of Charles I. was moulded by the Graces. His favourite Buckingham\* was probably a greater favourite for those congenial tastes, and the frequent exhibition of those splendid masques and entertainments, which combined all the picture of ballet dances, with the voice of music; the charms of the verse of Jonson, the scenic machinery of Inigo Jones, and the variety of fanciful devices of Gerbier, the duke's architect, the bosom friend of Rubens.

For an intimate knowledge of Charles's intercourse with artists, the reader is referred to D'Israeli's *Commentaries on the Life and Reign of Charles I.* vol. iii. chap. vii. Lord Orford, in his *Anecdotes of Painting in England*, has also given an interesting anecdote, to show the king's discernment in the knowledge of painting.†

1649, Feb. A committee of the House of Commons appointed to punish the author, publisher, printer, or preacher, who should publish a pamphlet on the proceedings against bringing the king to justice; and to restrain the printing or preaching any thing against the House of Commons and the high court of justice.

1649, April 10—17. *The Man in the Moone*, discovering a World of Knavery under the Sunne, No. 1. This paper was on the side of the king, and it was most rigorously suppressed by the commonwealth, the soldiers and the city officers having strict orders to seize any person who should be seen with the paper in their possession, or attempting to sell it. Many persons were thrown into prison for vending it; nevertheless, every week it regularly made its appearance, in defiance of "the powers that were." The following curious passage occurs in the one dated July 4, 1649, a few months only after Charles's martyrdom: "A hott combat lately happened at the Salutation taverne in Holburne, where some of the commonwealth vermin, called sol-

diers, had seized an Amazonian virago, named Mrs. Strosse, upon a suspicion of being a loyalist, and selling the *Man in the Moone*; but she, by applying beaten pepper to their eyes, disarmed them, and (with their own swords) forced them to aske her forgiveness, and down on their mary-bones, and pledge a health to the king, and confusion to their masters, and so honourably dismissed them." "Oh!" adds the loyal news-writer, "for twenty thousand such gallant spirits, when you see that one woman can beat two or three." From another number we learn that "An act has been brought in, and read, for the sale of the goods of the late king, queen, and prince;" New Market Fayre is proclaimed at Westminster. Here I, before all the world, forbid any man or woman to buy any part or parcel thereof, upon payne of being guilty of buying stolen goods, and as they will dearly answer it when the thieves and murderers shall be apprehended and brought to the tryal of the laws." The writer then mentions an act for borrowing £150,000, and says, "Yes, when ye are hanged ye shall have it; the devil is in your covetousness; a p— choak ye, for money won't. What is become of those vast sums that you, by robbing and murdering, keep your bloodhounds in good flesh till doomsday in the afternoon." The number concludes with a short hint about "resurrection of royalty."

1649. *News from Powles; or the new Reformation of the army, with a true relation of a colt that was foaled in the cathedral church of St. Paul, in London, and how it was publickly baptized, and the name, (because a bald colt,) was called Baal-Rez!* This pamphlet records the strange fact, that the saints actually baptized horses in churches at the fonts; and these men, who baptized horses and pigs in the name of the Trinity, sang psalms as they marched. St. Paul's cathedral was turned into a market, and the aisles, the communion table, and the altar, served for the foulest purposes. Prostitution was professed as a religious act.

1649. The odious office of licenser of the press, seems to have lain dormant a short time under the government of Cromwell, from the scruples of a conscientious licenser, who desired the council of state, for reasons given, to be discharged from that employment. This Mabot, the licenser, was evidently deeply touched by one of the noblest and most eloquent prose compositions in the English language; Milton's *Areopagitica; a Speech for the Liberty of Unlicensed Printing*, published in 1644.† It is a work of love and inspiration, breathing the most enlarged spirit of literature; separating at an awful distance from the multitude, that character "who was born to study and to love learn-

\* George Villiers duke of Buckingham, born August 30, 1592, assassinated by John Felton, at Portsmouth, August 23, 1628, and buried in Westminster abbey.

† The high opinion which Charles I. entertained of regal dignity, led him to observe a stateliness and imperiousness of manner, which was not only unenviable and disgusting, but strongly characterised a little mind. Carte, in his *Life of Ormond*, vol. i. p. 355, says, that different rooms in the palaces of Charles, were allotted to the different ranks of the nobility and gentry; and orders were hung up in every apartment, forbidding all persons below a certain quality to enter. The observance of these ridiculous distinctions was exacted with such rigour, that sir Henry Vane, the younger, having introduced himself into an apartment allotted to a superior rank, was so suddenly, whilst in discourse, surprised by the king's appearance, that, not having opportunity to retire unperceived, he hid himself behind a large carpet, which hung before a sideboard. In this situation he was discovered by the king, who, with unmanly insolence, struck him with his cane. And even in his days of humiliation, he struck colonel Whaley for the omission of some ceremony, or imaginary disrespect.

\* In March, 1648, the parliament ordered commissioners to be appointed, to inventory the goods and personal estate of the late king, queen, and prince, and appraise them for the use of the public. The whole collection of the king's curiosities were sold at above £50,000.—*Hume's History of England*.

† Milton's *Areopagitica, or a Speech for the Liberty of Unlicensed Printing*. 1644. 4to. Reprinted Again in 1773, 8vo., to which are now added a note to J. Jenkinson, esq., and a preface by the editor.

ing for itself, not for lucre, or any other end, but, perhaps, for that lasting fame and perpetuity of praise, which God and good men have consented shall be the reward of those whose published labours advance the good of mankind."

Milton's mind, having now reached maturity, yielded in profusion those rich and incomparable fruits which are the natural produce of genius and learning. The *Areopagitica*, and the *Treatise on Education*, were written with the design of convincing the presbyterians—who, being now in power, were mimicking the intolerant example set them by the prelates—of the iniquity and impolicy of endeavouring the suppression of opinions by force. He saw, with that quick intuition which belongs to elevated minds, how vain the attempt must always prove to confine thought, or the active expression of it, by material shackles: and, with the honesty and magnanimity of a devout Christian, he sought to vindicate for others the liberty he had, while his party was the weaker, contended for himself.

One part of this unparalleled effusion turns on "the quality which ought to be in every licenser." It will suit our new licensers of public opinion, a laborious corps well known, who constitute themselves without an act of star-chamber. The following sentences, are some little facts, casually preserved, of the ineptitude of such an officer.

"He who is made judge to sit upon the birth or death of books, whether they may be wafted into this world or not, had need to be a man above the common measure, both studious, learned, and judicious; there may be else no mean mistakes in his censure. If he be of such worth as behoves him, there cannot be a more tedious and unpleasant journey-work, a greater loss of time levied upon his head, than to be made the perpetual reader of unchosen books and pamphlets. There is no book acceptable, unless at certain seasons; but to be enjoined the reading of that at all times, whereof three pages would not down at any time, is an imposition which I cannot believe how he that values time and his own studies, or is but of a sensible nostril, should be able to endure.—What advantage is it to be a man over it is to be a boy at school, if we have only escaped the ferula to come under the fescue of *Imprimatur*?—if serious and elaborate writings, as if they were no more than the theme of a grammar lad under his pedagogue, must not be uttered without the cursory eyes of a temporising licenser? When a man writes to the world, he summons up all his reason and deliberation to assist him; he searches, meditates, is industrious, and likely consults and confers with his judicious friends, as well as any that writ before him; if in this, the most consummate act of his fidelity and ripeness, no years, no industry, no former proof of his abilities, can bring him to that state of maturity, as not to be still mistrusted and suspected, unless he carry all his considerate diligence, all his midnight watchings, and expense of Palladium, to the hasty view of an unlearned licenser, perhaps much his younger, perhaps far inferior

in judgment, perhaps one who never knew the labour of book writing; and if he be not repulsed or slighted, must appear in print like a Punie with his guardian, and his censor's hand on the back of his title to be his bail and surety that he is no idiot or seducer; it cannot be but a dishonour and derogation to the author, to the book, to the privilege and dignity of learning."

The following is worth preserving for its exquisite sarcasm:

"Debtors and delinquents walk about without a keeper: but inoffensive books must not stir forth without a visible jailor in their title; nor is it to the common people less than a reproach: for if we dare not trust them with an English pamphlet, what do we but censure them for a giddy, vicious, and ungrounded people, in such a sick and weak state of faith and discretion, as to be able to take nothing but through the glister pipe of a licenser!"

The ignorance and stupidity of these censors were often, indeed, as remarkable as their exterminating spirit.

The literary fate of Milton was remarkable: his genius was castrated alike by the monarchical and the republican government. The royal licenser expunged several passages from Milton's history, in which Milton had painted the superstition, the pride, and the cunning of the Saxon monks, which the sagacious licenser applied to Charles II. and the bishops; but Milton had before suffered as merciless a mutilation from his old friends the republicans; who suppressed a bold picture, taken from life, which he had introduced into his *History of the Long Parliament and Assembly of Divines*. Milton gave the unlicensed passages to the earl of Anglesea, a literary nobleman, the editor of *Whitelock's Memorials*; and the castrated passage, which could not be licensed in 1670, was received with peculiar interest when separately published in 1681.\*

After the death of the king, Milton obtained the situation of Latin secretary to the Commonwealth. No sooner was he placed in this office, than he was applied to by those who were then in power, to write—first a rejoinder to the celebrated royalist pamphlet, named *Eikon Basilike*, which he published under the title of *Eikonoclastes*; and secondly, an answer to the *Defensio Regia pro Carolo Primo*, by Salmasius.

Never did any book more fulfil the ends for which it was produced, than this work of Milton. It was every where received on the continent with astonishment and applause. The ambassadors of the different governments of Europe, at that time resident in London, paid visits of com-

\* It is a 4to tract, entitled *Mr. John Milton's Character of the Long Parliament and Assembly of Divines*, in 1641: omitted in his other works, and never before printed, and very seasonable for these times. 1681. It is inserted in the uncastrated edition of Milton's prose works in 1738. It is a retort on the Presbyterian Clement Walker's *History of the Independents*; and Warburton, in his admirable characters of the historians of this period, alluding to Clement Walker, says, "Milton was even with him in the fine and severe character he draws of the Presbyterian administration."

pliment to the author. It had the honour to be burned by the hands of the common hangman at Toulouse, on Friday the 27th of June, 1650, and at Paris on the 9th of July in the same year. Lastly, having been perused by Christina, queen of Sweden, she was struck with the eloquence of the composition, the strength of the reasoning, and the vigour with which he exposed the fatuity, the sophistry, and contractions of his antagonist, spoke on all occasions warmly in its praise, and from that hour withdrew her favour from Salmasius. This redoubted champion sank under his defeat, withdrew himself into obscurity, and soon after died in Holland. Claudius Salmasius was born April 15, 1588, and died Sept. 8, 1653.

1649. The following work was printed at CORK: *Certain Acts and Declarations made by the ecclesiastical congregation of archbishops, bishops, and other prelates met at Clonmacnoise, on 4th Dec. 1649. Cork, 25th Feb. 1649, [1650,] and reprinted in Dublin by W. B. 4to, 20 pages.* In 1664, was printed a small work, entitled, *Inquisitio in fidem Christianorum hujus seculi, authore Rogero Boyle, Decano Corcagiensi*, 12mo.

1649. Died, EDWARD RABEN, who styled himself master printer, the first in Aberdeen. (See page 469, ante.) On the 9th of the subsequent month of January, the magistrates and town council, appointed James Brown, minister of Invernochty, to succeed Mr. Raban in the office of printer to the town and university, with the same emoluments which his predecessor had been entitled to receive from the town. Brown printed the works of several authors who flourished at the time. In 1651, he printed *The form and order of the Coronation of Charles the Second, as it was acted and done at Scone, the first of January, 1651.*

1649. Died, JOHN GERARDUS VOSSIUS, a very learned professor of chronology and eloquence at Leyden, and of history at Amsterdam, whose works are frequently referred to as authorities, particularly the following:—*De Historicis Græcis, De Historicis Latinis, and Ars Historica.* He was born in the year 1577. He was the father of ten children in a very short space of time, and being attended with a wonderful fertility in his pen, made Grotius say, with some pleasantry, that he did not know whether Vossius had a better knack of producing children or books.

1649, Dec. 4. Died, WILLIAM DRUMMOND, a celebrated poet and historian of Scotland. He was the son of sir John Drummond, of Hawthornden, a retired seat near Edinburgh, where he was born in 1585. He was destined for the law, but Parnassus had more charms than the law. He wrote the history of the five James's successively kings of Scotland; and his poetical works consist of amatory sonnets and madrigals, chiefly expressive of a hopeless passion which possessed his own bosom; some sacred poems; few complimentary odes and addresses to the two kings, James I. and Charles I. on their respective visits to Edinburgh; and a variety of epigrammatic and humorous pieces. In many

of these compositions there are passages of great delicacy and tenderness; but, as with the minor poets of this age in general, it is difficult to find any entire piece which is not degraded by some share of insipidity, or by forced and cold conceits, or by that coarseness which, after all, seems to have been the prevailing tone of mind in even the most enlightened portions of society at the beginning of the seventeenth century. Ben Jonson made a pedestrian pilgrimage into Scotland, in order to see him. He left a widow and three children. His works were printed at Edinburgh, in folio, in 1711.

Drummond's *Polemio middinia* is the earliest regular British macaronic poetry,\* and was probably written when he was on a visit to his brother-in-law, at Scotstravet, and contains a ludicrous account of a battle between lady Scotstravet under the title of Vitarya, and lady Newbarns as Neberna. The celebrity of this poem has no doubt been increased from the circumstance of bishop Gibson having in his earlier years published an edition (Oxford, 1691, 4to.) with Latin notes.

\* It is the characteristic of a macaronic poem to be written in Latin hexameters, but so as to admit occasionally vernacular words, either in their native form, or with a Latin inflexion; other licenses, too, are allowed in the measure of the lines, contrary to the strict rules of prosody. For the origin of this term, different derivations have been assigned: the most rational is that of Mr. Mason Goode, who adduces it from the Italian term, *Maccherone*, significative of a blockhead, an ignoramus, or an equivalent English, *pudding-pated fellow*; *Maccherone*. Macaronies are obviously, therefore, burlesque imitations of the unclassical style of such writers. Goode's *Life of Dr. Geddes*. Theophilo Folengo, better known by the name of *Merlin Coccyus*, was born in the vicinity of Mantua, in 1491, and became a Benedictine; but being of an amorous turn, he quitted his habit, which he resumed after he had led a rambling life for some years. He died in 1544, and he is the reputed inventor of Macaronic poetry. The Macaronic productions of the English press are not very numerous, this species of writing having been little cultivated. At the end of vol. vi. of Leland's *Itinerary*, (pp. 151—156,) Hearne has given a short poem, somewhat in the Macaronic style, relative to a battle at Oxford, between the scholars and the townsman; and part of Ruggie's celebrated comedy of *Ignoramus* is composed on the same model.

An edition was published by Messrs. Poulis-gow, 1788, and it is also to be found in a collection, *Carminum variorum Macaron, delectus*.

1650. BARBOSA, a bishop of Ugento, printed among his works a treatise obtained by one of his domestics bringing in a fish rolled in a leaf of written paper, which his curiosity led him to examine. He was sufficiently interested to run out and search the fish market, till he found the manuscript out of which it had been torn. He published it under the title *De Officiis Episcopalia*. Machiavelli acted more adroitly in a similar case; a manuscript of the Apophthegms of the ancients by Plutarch having fallen into his hands, he selected those which pleased him, and put them into the mouth of his hero Castrucio Castruciani.

1650, July. AMUNDUS NICOLAI GREFWÉ, a printer, from Nyköping, introduced the art of typography into Gothenburg, a commercial town of Sweden, in the province of West Gothland. One of the earliest specimens of his printing, is a volume containing the *Psalms*, in Swedish verse, *Luther's Catechism*, and other pieces, dated 1650. In the year 1669 Grefwé sustained very serious damage, as well by the shipwreck of a vessel which was conveying to him a large quantity of types and paper from Hamburg, as by a fire, which on the 10th day of May consumed his

whole establishment, together with a great part of the town.

1650. A precept occurs from the lord mayor of the city of London, ordering the company of stationers to substitute the arms of the commonwealth for those of the late king; and to remove the king's picture and all monarchical arms out of their hall.

1650. ANTHONY UPHILL left £5 to the poor of the stationers' company.

1650. *Died*, ROGER DANIELL, printer to the university of Cambridge. He had been joined in the patent with Thomas Buck, and was succeeded in the office by John Field. Daniell used for his mark, a naked figure of Truth—a sun in her right hand, a cup in her left, with milk streaming from each breast, having for a motto *Hinc Lucem et Pocula Sacra*.

1650. In this year, that now highly respected body of Christians, termed *Quakers*, had their origin; which was as follows:—George Fox,\* a shoemaker, being at a lecture delivered at Derby, on the 30th of October, by a colonel of the parliament army, after the service was over addressed the congregation, till there came an officer who took him by the hand, and said, that he and the other two that were with him, must go before the magistrates. They were examined for a long time, and then George Fox, and one John Fretwell, of Stoviensby, a husbandman, were committed to the house of correction for six months, upon pretence of blasphemous expressions. Gervas Bennet, one of the two justices who signed their mittimus, hearing that Fox had him, and those about him, “*Tremble at the word of the Lord*,” regarded this admonition so lightly, that from that time, he called Fox and his friends, *Quakers*. This new and unusual denomination was taken up so eagerly, that it soon ran all over England, and from thence to foreign countries.—*See* vol.

It has since remained their distinctive name, inasmuch, that to the present time they are so termed in acts of parliament; and in their own declarations on certain public occasions, and in addresses to the king, they designate themselves “the people called *Quakers*.” The community, in their rules and minutes, for government and discipline, denominates itself “the Society of *Friends*.”

The Quakers at their first setting forward, committed various kinds of extravagancies and other disorders; which probably, if they had not been opposed, would more readily have subsided. But the ministers, justices of the peace, constables, and others, disparted with them, bound

\* George Fox, who is accounted the founder of the Quakers, was born at Drayton, in Leicestershire, in 1634. He was at first placed with a shepherd, and afterwards was bound apprentice to a shoemaker. He suffered frequent imprisonment and much ill usage from those in power, during his public preaching. In 1659, he married the widow of a Welch judge, but still continued his course of itinerant preaching, and visited Holland, Germany, and America. He died at London, January 13, 1690. His Journal was printed at London in 1694, his Epistles in 1696, and his Tracts in 1706, all in folio.

\* Ornamented with the arms of the Republic.

them over to keep the peace, procured them to be indicted, and imprisoned, thus rendered the sect considerable. They ran about the streets, foaming and bellowing out such like expressions as these: "Repent, repent; Woe, woe! the judge of the world is come!" Some of them stood naked on the market-cross, on the market-days, preaching from thence to the people. At Kendal, in Westmoreland, the wife of one Edmund Adlington, went naked through the streets. A man and a woman, who called themselves Adam and Eve, went publicly naked; and, when examined concerning the same at the assizes, the man affirmed that the power of God was upon him, and he was commanded so to do. In their preaching they called themselves "the way, the truth, and the life." They made it a constant practice to enter into the churches with their hats on during divine service, and to rail openly, and exclaim aloud against the ministers, calling them liars, deluders of the people, Baal's priests, Babylon's merchants selling beastly ware, and bidding them come down from the high places. The railed at the judges sitting on the bench, calling them scarlet-coloured beasts. The justices of the peace they styled "justices so called;" and said there would be Quakers in England, when there should be no justices of the peace. A quaker, to prove the text that "Man shall not live by bread alone, but by the word of God," persisted in refusing his meals. The literal text proved for him a dead letter, and this practical commentator died by a metaphor. This quaker, however, was not the only victim to the letter of the text; for the famous Origin, by interpreting in too literal a way the 12th verse of the 19th of St. Matthew, which alludes to those persons who become eunuchs for the kingdom of heaven, with his own hands armed himself against himself, as is sufficiently known. "*Retourmons à nos moutons!*"

A poet of the time thus speaks of the religious insanity which raged among the people, and the numerous sects in which they were divided:

#### ON SECTS.

Eternity, which puzzles all the world  
To name the inhabitants that people it;  
Eternity, whose undiscovered country  
We fools divide before we come to see it,  
Making one part contain all happiness,  
The other misery, then unseen fight for it:  
All sects pretending to a right of choice,  
Yet none go willingly to take a part.

In one of the chronicle poems of George Withers, entitled a *Dark Lanthorne*, published in November, 1652, after noticing that God, to mortify us, had sent preachers from "the shop-board and the plough,"

Such as we seem justly to condemn,  
As making truths abhorred, which come from them.

again, he describes these self-taught "Teachers and Prophets," and says,

They act as men in ecstasies have done—  
Striving their cloudy visions to declare,  
Till they have lost the notions which they had,  
And want but few degrees of being mad.

1650. In a comedy, called *Hey for Honesty*, written by T. Randolph,\* there is the stationer's preface before the play. "Reader, this is a pleasant comedy, though some may judge it satirical, 'tis the more like Aristophanes, the father; besides, if it be biting, 'tis a biting age, we live in; then biting for biting." Again, Tom Randal, the adopted son of Ben Jonson, being the translator hereof, followed his father's steps. They both of them loved sack, and harmless mirth, and here they shew it; and I, that know myself, am not averse from it neither. This I thought good to acquaint thee with. Farewell. Thine, F. J.

1650. The following *Ancient Customs used in a Printing-house* at this period, are taken from Moxon's *Mechanical Exercises*† and which hand down the peculiar customs formerly observed with respect to that curious tribunal, termed "a CHAPEL," as well as some other singularities in practice among the members of the art at this early period. Though, from the change that has taken place in the habits of men and circumstances of trade, as well as from other matters which have happened in more recent times, the ancient customs will not apply to modern practice; yet, as historical memoranda, such things afford an opportunity of contrasting the past with the present, and thus become a subject of some amusement; and hence it may be presumed that they will contribute to many in the profession, and to many more who may yet enter it, both instruction and gratification, and, therefore, we shall quote them entire.

"Every printing-house is by the custom of time out of mind, called a Chapel, and all the workmen that belong to it are members of the Chapel; and the oldest freeman is father of the Chapel. I suppose the style was originally conferred upon it by the courtesy of some great churchman, or men (doubtless when chapels were in more veneration than of late years they have been here in England,) who, for the books of divinity that proceeded from a printing-house, gave it the reverend title of Chapel.

There have been formerly, customs and by-laws made and intended for the well and good government of the Chapel, and for the more civil and orderly deportment of all its members while in the Chapel; and the penalty for the breach of any of these laws and customs, is, in printers' language, called a Solace; and the judges of these solaces, and other controversies relating to the Chapel, or any of its members, were, plurality of votes in the Chapel, it being asserted as a maxim, that "the Chapel cannot err." But when any controversy is thus decided, it always ends in the good of the Chapel.

- 1, Swearing in the Chapel—a solace.
- 2, Fighting in the Chapel—a solace.

\* Thomas Randolph was born at Newnham, June 14th, 1603; and died at Blatherwick, March 17th, 1684.  
† *Mechanical Exercises*, by Joseph Moxon. 1677-96. 2 vols. 4to. For an account of Mr. Moxon, see the year 1683, post.

3, Abusive language, or giving the lie in the Chapel—a solace.

4, To be drunk in the Chapel—a solace.

5, For any of the workmen to leave his candle burning at night—a solace.\*

6, If the compositor let fall his composing-stick, and another take up—a solace.

7, Three letters and a space to lie under the compositor's case—a solace.

8, If a pressman let fall his ball, or balls, and another take it or them up—a solace.†

These solaces were to be bought off, for the good of the Chapel; nor were the prices alike, for some were 12d. 6d. 4d. 2d. 1d., according to the nature and quality of the solace. But if the delinquent proved obstinate or refractory, and would not pay his solace at the price of the Chapel, they *solaced* him thus:—The workmen take him by force and lay him on his belly, athwart the correcting stone, and hold him there, while another of the workmen, with a paper-board, gives him 10f. and a *purse*, viz. eleven blows on his buttocks, which he lays on according to his own mercy.

These nine solaces were all the solaces usually and generally accepted; yet in some particular Chapels the workmen did, by consent, make other solaces, viz.

That it should be a solace for any of the workmen to mention joining their penny, or more, a piece, to send for drink.

To mention spending chapel money till Saturday night, or any other before agreed time.

To play at quadrats,‡ or excite any of the chapel to play at quadrats, either for money or drink.

This solace is generally purchased by the master printer, as well because it hinders the workmen's works, as because it batters and spoils the quadrats, for the manner how they play with them is thus,—they take five, or seven, or more, quadrats (generally of the English body) and holding their hand below the surface of the correcting stone, shake them in their hand and toss them upon the stone, and then count how many *nicks* upwards each man throws in three times, or any number of times agreed on; and he that throws most wins the bet of all the rest, and stands out free, till the rest have tried who throws fewest nicks upwards in so many throws, for all the rest are free, and he pays the bet.

For any to take up a sheet, if he received copy-money; or if he received no copy-money, and did take up a sheet, and carried that sheet or sheets out of the printing-house till the whole book was printed off and published.

Any of the workmen may purchase a solace for any trivial matter, if the rest of the Chapel consents to it. As if any of the workmen sing in the Chapel, he that is offended at it may,

with the Chapel's consent, purchase a penny or two-penny solace for any workman's singing after the solace is made; or if a workman or a stranger salute a woman in the Chapel, after the making of the solace, it is a solace of such a value as is agreed on. The price of all solaces to be purchased is wholly arbitrary in the Chapel; and a penny solace may perhaps cost the purchaser six-pence, twelve-pence, or more, for the good of the chapel. Yet sometimes solaces may cost double the purchase, or more: as if some compositor have (to affront a pressman) put a whisp of hay in the pressman's ball-racks; if the pressman cannot brook this affront, he will lay six-pence down on the correcting stone, to purchase a solace of twelve-pence upon him that did it; and the Chapel cannot in justice refuse to grant it, because it tends to the good of the Chapel; and being granted, it becomes every member's duty to make what discovery he can, because it tends to the further good of the Chapel; and by this means it seldom happens but the aggressor is found out.

Nor did solaces reach only the members of the Chapel, but also strangers that came into the Chapel and offered affronts or indignities to the Chapel, or any of its members; the Chapel would determine a solace: example—it was a solace for any to come to the King's printing-house and ask for a ballad:

For any to come and inquire of a compositor whether he had news of such a galley at sea:

For any to bring a wisp of hay, directed to any of the pressmen:

And such strangers were commonly sent by some who knew the customs of the Chapel, and had a mind to put a trick upon the stranger.

Other customs were used in the Chapel, which were not solaces, viz. every new workman to pay half-a-crown, which is called his *bienvenue*. This being so constant a custom, is still looked upon by all workmen as the undoubted right of the Chapel, and therefore never disputed; he who has not paid his *bienvenue* is no member of the Chapel, nor enjoys any benefit of Chapel money. If a journeyman wrought formerly in the same printing-house, and come again to work in it, he pays but half a *bienvenue*. If a journeyman *smout* more or less in another printing-house, and any of the Chapel can prove it, he pays half a *bienvenue*.

I told you before that abusive language, or giving the lie, was a solace; but in discourse, when any of the workmen affirm any thing that is not believed, the compositor knocks with the back corner of his composing-stick against the lower ledge of his lower-case; and the pressman knocks the handles of his ball-stocks together, thereby signifying the discredit they give to his story.

It is customary for all the journeymen to make every year new Paper-Windows, whether the old will serve again or no; because that day they make them, the master-printer gives them a *Way-goose*, that is, he makes them a good feast, and not only entertains them at his own

\* Thanks to the invention of gas for doing away with greasy boxes.

† Superseded by the use of the composition roller.

‡ *Twisted joggins*, and is always played with nine quadrats, called *gods*; a practice very prevalent in the present day.

house, but besides gives them money to spend at the ale-house, or tavern, at night; and to this feast they invite the corrector, founder, smith, joiner, and ink-maker, who all of them severally (except the corrector in his own civility) open their purse-strings, and add their benevolence (which workmen account their duty, because they generally choose these workmen) to the master-printer's; but from the corrector they expect nothing, because the master-printer choosing him, the workmen can do him no kindness. These *way-goose*s are always kept about Bartholomew-tide; and till the master-printer have given this way-goose,\* the journeymen do not use to work by candle-light.

If a journeyman marry he pays half-a-crown to the Chapel.

When his wife comes to the Chapel, she pays six-pence, and then all the journeymen join their two-pence a-piece to welcome her.

If a journeyman have a son born, he pays one shilling: if a daughter, six-pence.

The father of the Chapel drinks first of Chapel drink, except some other journeyman have a *token*, viz. some agreed piece of coin or metal, marked by consent of the Chapel, for then, producing that token, he drinks first; this token is always given to him who in the round should have drank, had the last chapel drink held out; therefore, when the Chapel drink comes in, they generally say, who has the token?

Though these customs are no solaces, yet the Chapel excommunicates the delinquent; and he shall have no benefit of Chapel-money till he have paid.

It is also customary in some printing-houses that if the compositor or pressman make either the other stand still through the neglect of their contracted task, that then he who neglected shall pay him that stands still as much as if he had wrought.

The compositors are jocosely called galley-slaves, because allusively they are, as it were, bound to their galleys; and the pressmen are jocosely called horses, because of the hard labour they go through all day long.†

An apprentice, when he is bound, pays half-a-crown to the Chapel; and when he is made free, another half-crown, but is yet no member of the Chapel; and if he continue to work journey-work in the same house, he pays another half-crown, and is then a member of the Chapel.

So far the *ancient customs*. The following observations are given, as relating to *modern practice*.

"In extensive houses, where many workmen are employed, the *calling a Chapel* is," says Mr. McCreery, "a business of great im-

portance, and generally takes place when a member of the office has a complaint to allege against any of his fellow-workmen, the first intimation of which he makes to the *Father of the Chapel*, usually the oldest printer in the house, who, should he conceive that the charge can be substantiated, and the injury supposed to have been received is of such magnitude as to call for the interference of the law, summonses the members of the Chapel before him at the *imposing stone*, and there receives the allegations and the defence in solemn assembly, and dispenses justice with typographical rigour and impartiality. These trials, though they are sources of neglect of business, and other irregularities, often afford scenes of genuine humour. The punishment generally consists in the criminal providing a libation by which the offended workmen may wash away the stain that his misconduct has left upon the body at large. Should the plaintiff not be able to substantiate his charge the fine then falls upon himself, for having maliciously arraigned his companion,—a mode of practice which is marked with the features of sound policy, as it never loses sight of the good of the Chapel."

The origin of applying the appellation of Chapel to a printing-office, has been guessed at by many writers. Mr. McCreery says, the title of Chapel to the internal regulations of a printing-office, originated in Caxton's exercising the profession in one of the chapels of Westminster, and may be considered as an additional proof, from the antiquity of the custom, of his being the first English printer.

Each printer hence, howe'er unblest his walls,  
E'en to this day his house a chapel calls.

The following humorous description of a *modern Chapel*, is taken from a very clever poem, entitled the *Composing Room*, written by Mr. George Brimmer, a printer of London, in 1833; and as it depicts a *real scene*, we shall be excused for inserting it at length.

#### THE CHAPEL.

But now the father damps the angry flame,  
And the full chapel empties every frame.  
Sam Brown—the plaintiff—duly has paid down,  
With solemn phiz, the customary brow;  
For here, as in king William's courts of law,  
There must be current coin as well as jaw.  
The clerk cries "Silence!" and the father spreads  
His hand, in view of the assembled heads,  
And thus commences—"Gentlemen, in your  
Collective wisdom we must find a cure  
"For ills—which I'm inform'd by Mr. Brown,  
"Stick in his throat, and can't be bolted down."  
At this ensues a loud and general laugh,  
With nods and winks, and lots of *under-chaff*.  
Order restor'd,—complainant states his case  
With *quantum-suff*, of tremor and grimace:  
"I'm sorry, Gents, (his hand upon his braces,)  
"My case has caus'd you all to leave your cases—  
"But Mr. Green supposes I am Green,  
"Whereas the difference will be shortly seen,  
"For you're too deep, too long upon the town,  
"To think that brown is green, or green is brown."  
Loud cries of *Nonsense, Folly, Trash, and Stuff!*  
Mix'd up with question, *Hear him, That's enough!*

Now Mr. Brown—to order call'd—proceeds  
To tell the chapel of Green's evil deeds.

\* The derivation of this term is not generally known. It is from the old English word *ways*, *stubble*. A *stubble goose* is a known dainty in our days. A *ways-goose* was the head dish at the annual feast of the forefathers of our fraternity. "WAYS-GOOSE, a stubble-goose, an entertainment given to journeymen at the beginning of winter." *Bailey's Dict. 3rd Edit.*

† Why not, by the same reasoning, because they, as it were, are bound to their horses?—Q.—*Hansard.*

"My father—Mister Father—Gentlemen—  
 "With your permission I'll begin again.  
 "Last Tuesday afternoon, at half-past four—  
 "It might be somewhat less, or somewhat more—  
 "Defendant Green (as I suppose) espied  
 "An empty letter-board at my frame side,  
 "And speedily solicited me to  
 "Permit his using it a day or so.  
 "This I—at all times willing to oblige—  
 "Here plaintiff's head sustains'd a vigorous *smack*,  
 "Which drove the heels of chapelians near  
 "Upon the toes collected in their rear,  
 "And caus'd some growlings—such as, "Cut the line!"  
 "Dismiss his case, that I may go to mine!  
 "I wish that Brown and Green were black and blue,  
 "For hind'ring business with this much ado;  
 "With more, which it is needless here to note;  
 "When the loud "silence!" of the father's throat  
 "Recalls our bang-up speaker to his theme,  
 "Kindles his fire, and generates his steam.  
 "Well—to conclude—to Mr. Green I lent  
 "This board—the subject of my discontent;  
 "But if choppy'd up,—or cast into that *bowrie*  
 "From whence, alas! no letter-boards return—  
 "Or seiz'd by quoin-drawer overseer, to bear  
 "Its load of standing matter for a year  
 "(Fast bound in his queer closet's potent spell),  
 "To me 'twere quite as *un-cause-able*.  
 "Therefore, I pray ye, make my cause your own,  
 "And let this worthy chapel's will be done."

He ceas'd—and, with a self-approving smile,  
 Look'd round upon the partners of his toil;  
 Then prick'd his ears up and compos'd his mien,  
 To learn what might proceed from Mr. Green.

He, with firm front and a decided tone,  
 Admits at once the damage he has done.  
 "I make not, gentlemen, a vain defence  
 "Against our chapel's laws and common sense.  
 "I am the worm which leav'd'd Jonah's gourd!  
 "I saw—I borrow'd—and I kept his board.  
 "This is the head and front of my offence;  
 "For *this* the chapel fine is *twenty-pence*;  
 "Which I (in duty bound) will freely pay—  
 "But yet I have a word or two to say.  
 "I hate the curst aristocratic crew  
 "Of an *imperium in imperio*!—  
 "Had Mr. Brown, while claiming of his right,  
 "Behav'd towards me in a way polite,  
 "And not perform'd the parts of *Boniface* and *Swell*—  
 "Which (though he acts them tolerably well)  
 "To me are hateful as the fends of hell—  
 "I should have kept my temper and my word,  
 "And long ere this return'd his letter-board."

So saying, on his cash his hand he laid,  
 As one who thought—why, damme, who's afraid?  
 Which when the father and the chapel saw,  
 The cry was—"Messrs. Brown & Green, withdraw!"  
 This while they did, the chapel laugh'd outright:  
 Green stalk'd like Ajax from the field of fight;  
 While little Brown—(like dog who fears the gale  
 May separate his body from his tail,  
 And therefore draws it close his legs between)—  
 Slow creeping o'er the office floor was seen.  
 At length the door shuts after them—and now,  
 O Muse! assist me to describe—the *rew*.

To aid your view (I should have said before)  
 Imagine, reader, thirty men, or more,  
 Assembled near a long *imposing-stone*;  
 Some more than *sissy*, some but *twenty-one*—  
 Of each complexion, disposition, taste—  
 Imbu'd with virtue, or by vice debas'd.  
 Some strictly steady, *frank* to persevere,  
 Pursue this course throughout the varying year:—  
 From bed to *Baldwin's*, and from *Baldwin's* back  
 To bed—in one contin'd beaten track:  
 Deducting Sundays, walking, eating, sleeping,  
 Thro' their whole lives at work they're closely keeping.  
 Others, erratic from their mother's breast,  
 Are by some untam'd devil still possess'd:  
 These are your harum-scarum jolly boys,  
 Who love Scotch ale, and glory in their noise;  
 Who, if their object were the soul's salvation,  
 Would strive to carry *that*—by acclamation!  
 This latter class (well knowing how to screen)  
 Intuitively take the part of Green.  
 The former—not without abundant cause—  
 Support *Saint* Brown, the chapel, and its laws.

And now—let loose awhile each Typo's tongue—  
 Confusion reign'd, which cannot here be sung.  
 Take, then, this single sample for the whole—  
 A glass of punch will show what's in the bowl—  
 "I say Tom Green has spoken like a man!"  
 Loud cries of "Order!" through the chapel ran;  
 Some from the father's lungs, and some from those  
 Yclept the *Sainte*, the *Mess-scums*, and the *Crews*.  
 At length the father—"Gentlemen, forbear!  
 "While all are talking, nobody can hear.  
 "Into short motions cut your long *verbooses*;  
 "For really this too much our time engrosses.  
 "And time, if well employ'd, is cash, my boys;  
 "Therefore save all you can, and—spare your jaws."

Anon, like Antwerp's citadel, appears  
 Two *Motton*—filling many breasts with fears;  
 But soon the *AMENDMENT*'s quick exploding mine  
 Compels its stern commander to resign.  
 "I move that we remit the fine on Green,"  
 Was leav'd to the ground as soon as seen  
 (How'er secure, determin'd, or unwilling),  
 By moving—"that Green's fine be made a shilling."  
 Thus showing, though the chapel's laws they guard,  
 No wish on individuals to be hard;  
 While the proposers of entire remission  
 Hold out immunity for crime's commission.

At length the chapel's messenger goes down  
 Below—to fetch up Messrs. Green and Brown.  
 Arriv'd the chapel's organ—*l. e. dad*—  
 Breathes forth this solemn dirge, so slow and sad:—

"My painful duty, Mr. Green, is now  
 "(In chapel, where all typographers bow)  
 "The chapel's awful mandate to reveal,  
 "And show you how your brother members feel.  
 "You have been guilty of a great transgression:  
 "We've had the *proofs*—we've got a *strong impression*  
 "Of all your *matter*—guilt, remorse, confession!  
 "We feel this latter feature in your case  
 "Gives it at once a better-favour'd face;  
 "It *sinks the afair*, and it shows a mind  
 "Not totally deprav'd, diseas'd, and blind:  
 "This almost sav'd you from impending fate,  
 "And quite inclin'd us all to mitigate.  
 "One solemn portion now alone remains  
 "Of this black bill of penalties and pains:—  
 "You know the chapel's fine is *twenty-pence*;  
 "And thus—in me—the chapel shows its *severe*;  
 "Take *eight* from *twenty*, *twelve* remains behind—  
 "Our judgment is—that you one *shilling* be fin'd."

These were his words—but my description's weak;  
 No one but those who saw and heard them speak,  
 Can form an adequate idea of these  
 Diverting, well sustain'd, solemnities.

But ere the members to their *frames* return—  
 To think how much they need, how little earn—  
 Towards the clerk I see the father look,  
 And hear him ask—"What stands upon your book?"  
 The clerk replies—"Ours are indeed *hard lines*;  
 "Dry is the chapel, scanty are the fines.  
 "I fear ere long we shall have no 'effects,'  
 "The bump of *circumspection* so projects.  
 "However, there's six shillings now in hand—  
 "Then let the chapel issue its command  
 "To *spread* or *not* to *spread*—as that's decided,  
 "The liquor will or will not be provided."

And now at once to th' vote *this* composition goes;  
 O *Leah-Ingtons*! and cannot ye compose  
 The differences of the *dry* and *wet*?  
 Well knowing (as ye do) good liquor slips  
 Betwixt those parties, as 'twixt cups and lips.  
 Cannot your partners—Clamour, Heat, and Noise—  
 Mix up a be'rage for your parched jaws?  
 May not your will and theirs, at least, be done  
 By holding up two hands instead of one?  
 No!—on *division* every *Crow* insists;  
 Where *ought* is gain'd by *kandy* extra fats:  
 And (though ye tell their numbers o'er and o'er)  
 They still have a majority of—*four*.  
 Alas! your friends are smother'd in the dust  
 They rais'd—with nothing to assuage their thirst!

Go on, brave Typos! ever thus outvote  
 All motions flowing from a fiery throat.  
 Fools, like soft stones, yield to the force of *drops*;  
 But men of mind may more than master *Mops*!

1651. *Nympha Libethris; or, the Cotswold Muse, presenting some extempore verses for the Imitation of Young Scholars. In two parts. London, printed for F. A. at Worcester. 12mo.*

The author was Clement Barksdale. The following verses are contained in this curious and scarce book :

#### TO THE PRINTER.

Did I diffuse a little more of brine  
 On m' Epigrams, on such and such a line;  
 Or could I write as well as you can print,  
 Unless there be a fatal disaster in't.  
 (Although my *Thuesen* were not of quick sale,  
 The muse will roundly off like Cotswold ale.  
 Pray tell the Bookseller if he will see't.  
 Th' Epigram, though not very salt is sweet.  
 No obscure Jest, no jeers fall from my pen,  
 But it delights in praise of books and men.

From the following verse it is evident, that at this early period, they beat their books somewhat in the same manner as at the present day.

#### TO THE BOOKBINDER.

Has my Muse made a fault? Friend, I entreat,  
 Before you bind her up, you would her beat.  
 Though she's not loose and wanton, I can tell,  
 Unless you beat her, you'll not bind her well.

1651. *Died*, JOHN WINDET, a good printer, who succeeded John Wolfe as printer to the honorable city of London, and dwelt at the sign of the White Bear, in Adling-street, near Bernard's castle. He commenced business in 1585, and was succeeded in the office of city printer by

Richard Cotes. Windet used an elegant device of Time cutting down a sheaf of corn, with a book clasped; on the cover this, *Verbum Dic manet in aeternum*. The compartment had the queen's (Elizabeth's) arms at top, the city's on the right, and the stationers' on the left, with his sign of the Bear beneath, and I W over it, and the motto, *Homo non solo pene vivit*, round it.

1651, Dec. 16. HUMPHREY CHEETHAM,\* by his will, bearing this date, besides founding the college and other charities to the town of Manchester, bequeathed the sum of £1000 for the purchase of books, and £100 for a building, as the foundation of a public library; for the augmentation of which he devised the residue of his personal estate. "He further left £200," says his biographer, "to purchase godly English books to be chained upon desks in the churches of Manchester, Bolton," &c.

This library is the only one in the kingdom in which every person has the liberty of unlicensed reading. It is open daily, (Sundays excepted,) from nine in the morning till one, and from two till five in the afternoon, except in the interval from October to Easter, when it is closed at four o'clock. Any person that chooses, whether resident or not, on going to Chetham's library, and requiring to read, is requested by the sub-librarian to write his name and address in a book kept for that purpose, and, having done this, he is at liberty to read on that and every other day, in a room provided with requisites for writing. In 1791, a catalogue of the books and manuscripts, was printed in two octavo volumes, with the title of *Bibliotheca Chethamensis: sive Bibliotheca publica Mancunienis ab Humfredo Chetham armigero fundata catalogus, exhibens libros in varias classes pro varietate argumenti distributos. Edidit Joannes Radcliffe, bibliothecae supradictae custos*. In 1826, a third

\* Humphrey Chetham, whom Fuller briefly mentions among his *Worthies of England*, was born July 10, 1590. He was descended of an ancient family, and obtained his wealth chiefly by supplying the London markets with fustians, a material of dress then in almost general use throughout the nation. By this commerce, which was probably conducted on an extensive scale, Mr. Chetham acquired opulence; while his strict integrity, his piety, and works of charity, secured him the respect and esteem of those around him. His chief residence was Clayton Hall, near Manchester, at that time surrounded by a moat, the traces of which are now to be distinguished. "He was," says Fuller, "a diligent reader of the Scriptures, and of the works of sound divines; a respecter of such ministers as he accounted truly godly, upright, sober, discreet, and sincere. He was high sheriff of the county of Lancaster, a.n. 1635, discharging that office with great honour, inasmuch that very good gentlemen of birth and estate did wear his cloth at the assize, to testify their unfeigned affection to him." He died October 12, 1653, and was buried in the chapel of the Chethams, at the east end, and beheld the altar of the Collegiate church, where a tomb is erected to his memory.

The charity of Mr. Chetham was not to appear only after his death. During his life he had "taken up and maintained fourteen boys of the town of Manchester, six of the town of Salford, and two of the town of Droyden; in all twenty-two. By his will he directed that the number of boys should be increased to forty; bequeathing the sum of £7000 for the purchase of an estate, the profits of which are to be applied to the support of this establishment. The operations of this benevolent institution have been since greatly extended by judicious management, and due attention to the views of the founder.

\* Which is badly and incorrectly enough: especially the Latin.—*Dublin*.

† Qu. An edition of *Thuesen*.

‡ For Cotswold ale.

Mr. Henly, bookseller, of Cheltenham, had a copy of this work marked 12a. Mr. Evans, of London, sold a copy by auction for £4 16s. In the *Anglo-Poetica* of Longman and Co. 1813, a copy was marked at £30.

Sir Egerton Brydges put forth in the most elegant manner possible, from the Lee priory press, a reprint of the Cotswold muse, in 1816, in 12mo, of which only sixty copies were printed.

volume was printed, containing subsequent additions, by the rev. William Parr Greswell.\* The property, which was left by him for the use and augmentation of the library, and for the board, &c. of the librarian, amounts, at present, to nearly £700 per annum. Donations have been made from time to time; so that the collection now amounts to about 25,000 volumes. Several of the manuscripts are exceedingly curious; the printed books are, in general, the best works in history, philosophy, and science, with the best editions of the classics. The liberality which has provided, and thrown open to unrestricted use, so vast a library, is without example.

1651. *News from Newcastle*, a poem. 4to.†

1651. *News from the Dead*.

1651, Nov. 25. *The French Intelligencer*, faithfully communicating the chief proceedings of the king of Scots, the king of France, and the prince of Conde, &c. London, printed by Ro. Wood, No. 1.

1652. *Died*, the Rev. JOHN COTTON, one of the early ministers of New England, in North America. His friend, Mr. Woodbridge, wrote the following singular epitaph:

A living breathing bible; tables where  
Both covenants at large engraven were;  
Gospel and law in's heart had each its column,  
His head an index to the sacred volume!  
His very name a title-page; and next  
His life a commentary on the text.  
Oh, what a monument of glorious worth,  
When in a new edition he comes forth!  
Without errata, we may think he'll be  
In leaves and covers of eternity!

1652. Having been robbed by cut throats, near Bromley, I made on to London, and got 500 tickets printed. The robber refusing to plead, was pressed to death.—Evelyn's *Diary*.

1652. EVAN TYLER, a printer, of Edinburgh, appears to have carried on business at LEITH, in this year; a pamphlet of that date being in the Bodleian library. Mr. Chalmers says, "it is a remarkable fact, which history was either too idle to ascertain, or too much ashamed to relate, that the arms of Cromwell communicated to Scotland, with other benefits, the first newspaper, which ever illuminated the gloom, or dispelled the fanaticism, of the North. Each army carried with it its own printer, and in this year Cromwell conveyed CHRISTOPHER HIGGINS to Leith; and when Cromwell had here estab-

lished a citidel, Higgins reprinted, in November, what had already been published at London, a *Diurnal of some Passages and Affairs*, for the information of the English soldiers. See *Mercurius Politicus*, October 26, 1653, post.

1652. JOHN TAYLOR, the water poet, published a work called *Miscellanies*; or, *Fifty Years gatherings out of sundry authors, in prose and verse*. Being the studious readings, painful recollections, and some of them are the composings of the writer and publisher hereof.

#### TO THE READER.

All these things heer collected, are not mine,  
But divers grapes, make but one sort of wine;  
So I, from many learned authors took,  
The various matters printed in this book.  
What's not mine own by me shall not be father'd,  
The most part, I in fifty years have gather'd;  
Some things are very good, pick out the best,  
Good wits compiled them, and I wrote the rest.  
If thou dost buy it, it will quit thy cost,  
Read it, and all thy labour is not lost. JOHN TAYLOR.

John Taylor was born in Gloucestershire, in the year 1580, and from his occupation of a waterman, derived the title of *water poet*. He possessed great natural parts, but little education. From his laborious calling he found leisure to write a very great number of humorous poems, some of which were dedicated to James I.\* and Charles I. For some time he kept a public-house in Long acre; and upon the death of Charles I. set up the sign of the Mourning Crown; but was compelled, by those in power, to pull it down; upon which he set up a picture of his own head, with these lines beneath it:

King's heads are hung up for a sign,  
And many a saint, then why not mine.

What is called his water poetry was printed in 1630, in folio. He died in the year 1654.

1652, March 25. *The Dutch Spy*, faithfully communicating the most choice Intelligence from the States General, with their designs now on foot, &c. London, 4to. No. 1.

1652. *News from France*; or, a description of the library of cardinal Mazarinet before it was utterly ruined. Sent in a letter from monsieur G. Naudes, keeper of the public library. London, 1652, 4to, six pages. Reprinted in the third volume of the Harleian Miscellany.

1653. Advertisement of *Walton's Angler*. There is published a Booke of Eighteen-pence, called the Compleat Angler, or the Contemplative man's Recreation; being a Discourse on Fish and Fishing. Not unworthy the perusal. Sold by Richard Marriott in St. Dunstan's Church-yard, Flete-street.

Izaak Walton, was born at Stratford, August 20, 1593, and became a tradesman under the royal exchange, where he acquired a good fortune. His *Complete Angler* is a standard book on the subject. He was also the author of the *Lives of Dr. Donne*,† Hooker, Wotton, Herbert, and bishop Sanderson.‡ At the restoration he wrote a congratulatory pastoral. He died at Winchester, December 15, 1683, and was buried in the cathedral of that city.

\* See Arnot's *History of Edinburgh*, which gives an account of the establishment of newspapers in Scotland, that is very superficial, and inaccurate. See Spalding's *History of the Troubles of Scotland*, vol. i. p. 336. "Now, [December 1642] printed papers daily came from London, called *Diurnal Occurrences*, declaring what is done in Parliament." Spalding then lived at Aberdeen.

† Julius Mazarine, an eminent cardinal and minister of state in France, during the minority of Louis XIV. He was born at Placini, in Italy, July 14, 1602, and died March 9, 1661. His Letters have been published in two volumes.

‡ John Donne, dean of St. Paul's, in London, who stands at the head of our metaphysical poets, was born in 1573, and died March 31, 1631. Buried in St. Paul's cathedral.

§ Dr. Robert Sanderson, bishop of Lincoln, an eminent polemic writer and casuist, was born 1587, and died 1663.

1653. JOHN FIELD, printer to the university of Cambridge, printed an edition of the bible, in 24mo. and which is commonly called the *Pearl Bible*, alluding, no doubt, to a diminutive type so called, for it could not derive its name from its worth. To contract the Bible into this dwarfishness, all the Hebrew text prefixed to the *Psalms*, explaining the occasion and the subject of their composition, is wholly expunged. This curiosity may be inspected among the great collection of our English bibles, at the British museum, and is set off by many notable errata, of which the following are noticed:—

Romans vi. 13.—Neither yield ye your members as instruments of righteousness unto sin—for unrighteousness.

First Corinthians vi. 9.—Know ye not that the unrighteous shall inherit the kingdom of God?—for shall not inherit.

Now when a reverend doctor in divinity did mildly reprove some libertines for their licentious life, they produced this text from the authority of this corrupt edition, in justification of their vicious and inordinate conversations.

This Field was a great forger; and it is said that he received a present of £1500 from the independents to corrupt a text in Acts vi. 3, to sanction the right of the people to appoint their own pastors. The corruption was the easiest possible; it was only to put a *ye* instead of *us*; so that the right in Field's bible emanated from the people, not from the apostles. Butler, in his *Hudibras*, makes a happy allusion to this extraordinary state of our bibles at this period:

Belligon spawned, a various rout  
Of petulant, capricious sects,  
THE MADDOGS OF CORRUPTED TEXTS.

In other bibles by Hills and Field we may find such abundant errata, reducing the text to nonsense or blasphemy, making the scriptures contemptible to the multitude, who came to pray, and not to scorn.

It is affirmed, in the manuscript account already referred to, that one bible swarmed with *six thousand faults*! Indeed, from another source we discover that "Sterne, a solid scholar, was the first who summed up the *three thousand and six hundred faults*, that were in our printed bibles of London."§ If one book can be made to contain near four thousand errors, little ingenuity was required to reach to six thousand; but perhaps this is the first time so remarkable an incident occurred in the history of literature, that has ever been chronicled. And that famous edition of the Vulgate, by pope Sixtus V., a memorable book of blunders, which commands such high prices, ought now to fall in value, before the pearl bible, in 24mo. of Hills and Field.

Mr. Field, and his worthy coadjutor, seem to have carried the favour of the reigning powers over their opponents; for I find a piece of their secret history. They engaged to pay £500 per annum to some, "whose names I forbear or mention," warily observes the manuscript writer;

\* G. Garrard's Letter to the Earl of Strafford, vol. i.

and above £100 per annum to Mr. Marchmont Needham and his wife, out of the profits of the sales of their bibles; deriding, insulting, and triumphing over others, out of their confidence in their great friends and purse, as if they were lawless and free, both from offence and punishment.—*Harleian manuscripts*, 7580.

In a quarto bible, printed at London, in 1653, the following erratum occurs in the singing psalms lxvii. 2.

That all the world may know  
The way to worldly wealth.

For Godly wealth.

Not only had the bible to suffer these indignities of size and price, but the prayer-book was once printed in an illegible and worn out type; on which the printer being complained of, he stoutly replied, "that it was as good as the price afforded; and being a book which all persons ought to have by heart, it was no matter whether it was read or not, so that it was worn out in their hands." The puritans seem not to have been so nice about the source of purity itself.

These hand-bibles of the sectarists, with their six thousand errata, like the false Duessa, covered their crafty deformity with a fair raiment; for when the great Selden, in the assembly of divines, delighted to confute them in their own learning, he would say, as Whitelock reports, when they had cited a text to prove their assertion, "Perhaps in your little pocket-bible with gilt leaves," which they would often pull out and read, "the translation may be so, but the Greek or the Hebrew signifies this."

In 1617, Zachariah Schurers, a bookseller of Wittenberg, published an edition of Luther's *German Bible*, in 4to., which he republished in 1625. In this latter edition, a Roman Catholic printer had the audacity to corrupt the text in different places, especially in Rev. xiv. 6, where, by the substitution of *new* for *ewig*, the passage reads, "I saw another angel fly in the midst of heaven, having the *new*" (instead of *everlasting*) "Gospel;" intending to mortify the disciples of Luther, who were accustomed to apply this passage to that great reformer. A few copies got abroad, but the edition was speedily suppressed. A similar corruption was attempted in an edition published at Nuremberg, 1670, folio, in which the printer introduced the doctrine of Purgatory, in the epistle of Jude, 23.

An imitation of Field's 24mo. bible, was printed in Holland, in 1658; but the genuine one is known by having the four first Psalms upon a page without turning over. Field printed several other bibles, 8vo. large and small, and 12mo., but they do not rank as curiosities. During the latter half of this century, several curious flat bibles were printed, which are denominated *Preaching Bibles*, from the use made of them in the pulpits of the dissenters. The print of many of these is very clear, a broad faced letter upon thin paper, with some marginal notes, which gives them a superiority over the clumsy thick books printed since.

1653, Jan. 11. An order was made that a bill should be brought into the house of commons, for a new translation of the *Bible* out of the original tongues; but as the house only sat about two months, being dismissed April 20, 1653, little or no progress was made in the design. It was, however, revived during the protectorate of Cromwell, when "grand committees" were chosen by the parliament, for special purposes, one of which was for "Religion." This committee was appointed Jan. 16, 1656, and often met at Whitelocke's house at Chelsea, who had been appointed "lord commissioner to take care of this business." After many consultations and great pains taken therein, it became fruitless by the parliament's dissolution.—*Lewis*.

Of the character of the intelligence furnished by the early English newspapers, many amusing examples might be given: from the above paper we may safely infer that a smack of the miraculous was nothing uncommon in their columns.—"A perfect mermaid was, by the last great winde, driven ashore neere Greenwich, with her combe in one hande, and her lookinge glasse in the other. She seemed to be of the countenance of a most faire and beautiful woman, with her armes crossed, weeping out many pearly drops of

salt tears, and afterwards, she gently turning herself upon her back again, swam away without being seen any more."

1654, Feb. 8. A precept from the lord mayor, for the company of stationers' rails to be set in the street, and the livery to attend in their gowns and hoods, when the lord protector goes to dinner at Grocers' hall; orders were given accordingly; and the wardens to provide cloth to adorn the rails.

1654. John Mould, tallow-chandler, and a freeman of the stationers' company, presented to them a silver bowl as a token of respect, inscribed "The gift of John Mould, stationer, 1654."

1654. MILES FLESHER gave £5 to the stationers' company, "for the service of the livery at the funeral of his wife."

1654, Nov. 30. *Died*, JOHN SELDEN, the most learned and honest patriot of his time,—whom Grotius styles "the glory of the English Nation." Wealth, power, and dignities were laid at his feet, and he refused them. Firm in his resistance to that royal prerogative, the limits of which no man could so well define as himself, and equally indifferent to popularity, he stood almost alone, a perfect example of public integrity. He enriched the republic of letters with many useful works, the chief of which are, *Titles of Honour*, *History of Tithes*, and *De Jure Naturali et Gentium juxta Disciplinam Hebræorum*. He was born at Salvington, in Sussex, Dec. 16, 1584, and buried in the Temple church, London.

1654, Jan. 6. *The true Informer*, for T. Lock.

1654, Jan. 11. *The Politique Post*, No. 12.

1654, Jan. 17. *The Grand Politique Post*, No. 127.

1654, Feb. 6. *Perfect Occurrences*, No. 1.

1654, March 8. *Mercurius Poeticus*, No. 2.

1654, March 20. *Mercurius Aulicus*, No. 1.

1654, April 21. *Perfect Occurrences*, No. 1.

1654. *The Blood's Almanack*; or Monthly Observations and Predictions.

1654, May 8. *Perfect Diurnal Occurrences*.

1654, May 8. *The Weekly Post*, for George Horton, No. 177.

1654, June 7. *Mercurius Fumigosus*; or, the Smoaking Nocturnal, No. 1.

1654, July 21. *Mercurius Jocosus*; or, the Merry Mercury.

1654, Oct. 31. *The Observer*, No. 1.

1654, Nov. The reprinting of *Mercurius Politicus*, was transferred from Leith to Edinburgh; where it continued to be published till the 11th of April, 1660; and was then reprinted, under the name of *Mercurius Publicus*. The printing-office of Mr. Higgins, in Edinburgh, was in Hart's Close, opposite the Tron church; a part of the town now occupied by North-bridge-street.

1655. Mr. Meredith gave to the company £20 a-year; (which still continues a rent charge on two houses on the north side of St. Paul's Church-yard) out of which books to the amount of £6, are annually sent to the rector of Kempsey, in Worcestershire, for the use of the free-school in that parish; £4 to Christ's Hospital, for bibles; and £10 to the poor of the company.

1655, March 21. *Died*, JAMES USHER,\* archbishop of Armagh, in Ireland, designated by Dr. Johnson as the greatest luminary of the Irish church. He was born in Dublin, January 4, 1580, and was one of the three first students admitted into Trinity college, in 1593. See page 412, *ante*. In 1620 he was promoted to the bishopric of Meath, and in 1625, translated to the see of Armagh. He was not only eminent in the pursuits of literature, but was no less reputable for the gentleness of his manners and the holiness of his life, than for his profound erudition. His chief work, entitled *Annales Veteris et Novi Testamenti*, is an excellent sacred chronology, in which the great events of profane and sacred history are reconciled. It is translated into English in one volume folio. He died of a pleurisy at London, and was buried in Westminster abbey. After the death of this illustrious prelate, the English army in Ireland, purchased his valuable collection of books and manuscripts, in order to present them to Trinity college, Dublin; and though several obstacles intervened, through Cromwell, the munificent donation was finally confirmed by Charles II.

1655. The earliest Hebrew production known to have been issued from the Oxford press, was Dr. Pococke's *Porta Moses*, 4to.

1655, Feb. 4. *Mercurius Politicus*.

1655, Sep. 7. *Certain Passages of every Day's Intelligence*, No. 1.

1655, Oct. 8. *The Public Intelligencer*, for Henry Hills, No. 1.

1656. Dr. Cotton, in his *Typographical Gazetteer*, states that printing was introduced into the city of Chester so early as this year, without giving either the name of the printer, or work produced. Peter Ince was a stationer in Chester in 1636, see page 489, *ante*; and Peter Boydell is noticed as a bookseller in 1663.

1656. Mr. Leake, on behalf of himself, Mr. Rothwell, Mr. Hurford, Mr. Pakeman, and Mr. Fawne, presented a large silver cup, valued at £12 10s. with the company's arms, and their several names engraved on it.

1656, Sept. 8. *Died*, JOSEPH HALL, an eminent and learned bishop of Norwich: he was the first who wrote satires in English verse, with any degree of elegance and success. They refer to general objects, and present some just pictures of the more remarkable anomalies in the human character; and are written in a style of greater polish and volubility than most of the compositions of his age. He is universally allowed to have been a man of great wit and learning, and of as great meekness, modesty, and piety. His works make five vols. folio, and have gained him the appellation of the English Seneca. He was born in 1574.

The following extract is from his *Occasional Meditations*, "upon the sight of a great library."

\* The family name was originally Nevill, but an ancestor who accompanied King John into Ireland, in the quality of usher of the chamber, followed the common custom of the times, in exchanging the English name for that of the office with which he was invested.

"What a happiness is it, that without all offence of necromancy, I may here call up any of the ancient worthies of learning, whether human or divine, and confer with them of all my doubts! That I can at pleasure summon whole synods of reverend fathers, and acute doctors from all the coasts of the earth, to give their well-studied judgments in all points of question which I propose! Neither can I cast my eye casually upon any of these silent masters, but I must learn somewhat; it is a wantonness to complain of choice. No law binds me to read all; but the more we can take in and digest, the better; blessed be God that hath set up so many clear lamps in his church.

"Now none but the wilfully blind can plead darkness; and blessed be the memory of those his faithful servants, that have left their blood, their spirits, their lives, in these precious papers; and have willingly wasted themselves into these daring monuments, to give light unto others."

1656. There seems to have been in this year few or no additional newspapers set up. The *Public Intelligencer*, and *Mercurius Politicus*, were the two chief papers in the years 1655, 1656, 1657, 1658, and 1659, and were both published by order of parliament. In the year 1657 the collector of the king's tracts ceased, as he says himself, from his great pains and labour; as the publications became less numerous and interesting.—*Chalmers*.

1657, June 26. OLIVER CROMWELL solemnly inaugurated lord protector, in Westminster Hall. "The speaker invested his highness with a purple mantle, lined with ermine; presented him with a bible, superbly gilt and embossed; girt a sword by his side, and placed a sceptre of massive gold in his hand. On the right of the chair, at some distance, sate the French, on the left, the Dutch ambassador: on one side stood the earl of Warwick, with the sword of the commonwealth; on the other, the lord mayor, with that of the city."

In this year appeared a pamphlet, entitled *Killing no murder*, written against the protector by colonel Silas Titus, under the assumed name of William Allen. This is one of the most singular controversial pieces the political literature of our country has to boast; one of those happy productions which are perpetually valuable; which whenever a usurper reigns, appears as if written at the moment, and points with equal force at a protector or consul.\* "Shall we," said this popular declaimer, "who would not suffer the lion to invade us, tamely stand to be devoured by the wolf?" On reading this book Cromwell was never seen to smile again.

1657, July 7. This day was the election feast kept by the master and wardens of the stationers' company, with garlands, music, &c., according to former practice, but for several late years discontinued.

We again refer to Moxon\* for the following particulars of the very curious celebration of the Printers' May Festival, and which is remarkable as being a description of the old mode of the festive enjoyment amongst the fraternity.

"The printers of London, masters and journeymen, have every year a general feast, which, since the re-building of stationers'-hall, is commonly kept there. This feast is made by four stewards, viz. two masters and two journeymen; which stewards, with the collection of half-a-crown a-piece of every guest, defray the charges of the whole feast; and as they collect the half-crowns, they deliver every guest a ticket, wherein is specified the time and place they are to meet at, and the church they are to go to, to which ticket is affixed the name and seals of each steward.

It is commonly kept on or about May-Day; when, about ten o'clock in the morning, they meet at stationers'-hall, and from thence go to some church thereabouts; four whiffiers† (as servitors) by two and two walking before with white staves in their hands, and red and blue ribbons hung beltwise upon their left shoulders; these go before to make way for the company; then walks the beadle of the company of stationers, with the company's staff in his hand, and ribbons, as the whiffiers, and after him the divine (whom the stewards before engaged to preach them a sermon) and his reader; then the stewards walk by two and two, with long white wands in their hands, and all the rest of the company follows till they enter the church; then divine service begins, anthems are sung, and a sermon preached to suit the solemnity, which ended, they in the same order walk back again to stationers'-hall, where they are immediately entertained with the city waits and other music; and as every guest enters he delivers his ticket, which gives him admittance, to a person appointed by the stewards to receive it.

The master, wardens, and grandees of the company (although perhaps no printers) are yet commonly invited, and take their seats at the upper table, and the rest of the company where it pleases them best, the tables being furnished with variety of dishes of the best cheer; and to make the entertainment more splendid, is usherd

\* See also Randle Holme's *Storehouse or Armory*, 1688. † Whiffier, Mr. Donce says, (*Illustrations of Shakespeare*, vol. i. p. 167,) is a term undoubtedly borrowed from *whiffle*, another name for a file or small file; for whiffiers were originally those who preceded armies or processions, as files or pipers; in process of time the term *whiffier*, which had been always used in the sense of a *file*, came to signify any person who went before in a procession. Minshew defines him to be a club or staff-bearer, and that it appears, whiffiers carried white staves, as in the annual feast of the printers, founders, and ink-makers, described by Randle Holme. Archdeacon Nares, in his *Glossary*, cites Grose's mention of whiffiers at Norwich, who make way for the corporation by flourishing their swords. Archdeacon Nares also remarks, that in the city of London, young freemen, who march at the head of their proper companies on the lord mayor's day, sometimes with flags, were called whiffiers, not because they cleared the way, but because they went first as whiffiers did; and he quotes a character in the old play of the *City Match*, saying, 'I look'd the next lord mayor's day to see yon o' the livery, or one of the bachelor whiffiers.'

\* It was reprinted entire, at the end of the *Revolutionary Plutarch*, exhibiting the distinguished characters, literary, military, and political, in the annals of the French republic.

In with loud music; and after grace is said (commonly by the minister that preached the sermon, every one feasts himself with what he likes best) while the whiffiers and other officers wait with napkins, plates, beer, ale, and wine, of all sorts, to accommodate each guest according to his desire; and to make their cheer go cheerfuller down, are entertained with music and songs all dinner time.

Dinner being near ended, the king's and other healths is begun by the several stewards at the several tables, and goes orderly round to all the guests; and while these healths are drinking, each steward sets a plate on each table, beginning at the upper and conveying it downwards to collect the benevolence of charitable minds towards the relief of printers' poor widows; and at the same time each steward distributes a catalogue of such printers as have held the office of stewards ever since the feast was first kept, viz. from the year of Christ, 1621.

After dinner, and grace said, the ceremony of electing new stewards for the next year begins, therefore the present stewards withdraw into another room, and put garlands of green laurel, or of box, on their heads, and white wands in their hands, and are again ushered out of the withdrawing-room by the beadle of the company, with the company's staff in his hand, and with music sounding before them; then follows one of the whiffiers, with a great bowl of white wine and sugar in his right hand, and his whiffier's staff in his left; then follows the eldest steward, and then another whiffier, as the first, with a bowl of white wine and sugar before the second steward; and in like manner another whiffier before the third, and another before the fourth; and thus they walk, with music sounding before them, three times round the hall; and in a fourth round the first steward takes the bowl of his whiffier, and drinks to one (whom he resolved on) by the title of Mr. Steward Elect; and taking the garland off his own head puts it upon the steward-elect's head, at which ceremony the spectators clap their hands, and others so drum with their feet, that the whole hall is filled with noise, as applauding the choice; then the present steward takes out the steward elect, giving him the right hand, and walks with him, hand in hand behind the three present stewards another round about the hall; and in the next round, as aforesaid, the second steward drinks to another with the same ceremony as the first did; and so the third steward, and so the fourth, and then all walk one round more hand in hand about the hall, that the company may take notice of the stewards elect. And so ends the ceremony of the day; such as will, go their ways, but others that stay are diverted with music, songs, dancing, farcing, &c. till they all find it time to depart."

1657, July 7. Before the dinner held at stationers' hall, Mr. Andrew Crook presented to the company a large silver bowl, inscribed, "The Gift of John Haviland, Printer, by Andrew Crook, Executor."

1657. THOMAS PIERREPOINT presented to the stationers' company, a silver pot with two ears, after the manner of a college pot, weighing 10oz. 11½ dwts. with the arms of the stationers' company and his arms engraven on it. A like pot of nearly the same weight was presented by Thomas Vere and William Gilbertson.

1657. In this year was published the London *Polyglott*,\* six volumes folio, printed by Thomas Roycroft, under the superintendence of Dr. Brian Walton,† and was the first work ever published in England by subscription. Dr. Walton made known his design to archbishop Usher, and most of the English bishops then living; and having obtained private subscriptions to the amount of £4000, he published his proposals for the publication, with a printed letter signed by himself, archbishop Usher, and four other distinguished literary characters, dated London, March 1, 1653. The proposals were, that every subscriber of £10 should receive one copy, and of £50 six copies. He received such encouragement that in about two months the subscriptions amounted to £9000, and obtained the approbation both of the exiled sovereign‡ and the protector. Cromwell, and the council of state, encouraged the undertaking, by allowing paper to be imported duty free; and, as there is reason to believe, by contributing £1000 out of the public money, to begin the work. The most learned men in the nation lent their assistance; and noblemen possessing rare and valuable manuscripts permitted them to be used, in order to render the polyglott more complete. The first volume of this great work issued from the press in 1654, in folio; and the sixth, or last, in 1657; "and thus, in about four years, was finished the English polyglott bible, the glory of that age, and of the English church and nation." Nine languages are used in the polyglott bible, Hebrew, Chaldee, Samaritan, Greek, Syriac, Arabic, Ethiopic, Persian, and Latin; yet there is no one book in the whole bible printed in so many. The first volume is enriched with prefaces, prolegomena, treatises on weights and measures, geographical charts, and chronological tables; and ornamented with a fine portrait of bishop Walton, and several plates illustrative of biblical subjects, as architecture, numismatology, sacerdotal dresses, instruments of music, &c.: the sixth, or last volume, contains *Various Readings*, critical remarks on all the preceding versions, and an explanation of all the proper names,

\* *Biblia Sacra Polyglotta edente Waltonio*, 6 vols. London, 1659. *Castellii Lexicon Heptaglotton*, 2 vols. London, 1669, in all 8 vols. folio. Sold by Mr. Evans, October, 1839, for £21 10s. 6d.

† Brian Walton, the learned editor of the London *Polyglott*, was born at Cleveland, in Yorkshire, in 1606, and was educated at Cambridge. He suffered much in the breaking out of the civil wars. Besides compiling the polyglott bible, he was also the author of a defence of it against Dr. Owen; and a book on the *Right of the London Clergy to Tithes*. In September 1660, he was preferred to the see of Chester, and died at London, November 29th following, and was buried in Westminster abbey.

‡ This fact is noticed by Dr. Walton, in the dedication to Charles II. prefixed to some copies of the *Polyglott* bible.

both Hebrew and Greek, in the Old and New Testaments.

On the restoration of Charles II. to the throne, Dr. Walton presented the work to his majesty, and cancelled the two last leaves of the preface, in which he had acknowledged the generosity of the protector and council, in handsome terms, the place of which he supplied by three other leaves, in which the language was considerably altered, and suited to the views of the royal party; and to some copies prefixed a *Dedication* to the king. From these circumstances, the copies which have the original leaves are called the *Republican*; those which have the substituted leaves are called the *Loyal* copies; but as some differences have been found in the loyal copies, there must have been two copies even of those.

The publication of the *Polyglott Bible* was followed by that of the *Lexicon Heptaglotton*, by Dr. E. Castell.\* This work, which contained a joint-lexicon of the Hebrew, Chaldee, Syriac, Samaritan, Ethiopic, and Arabic; and a separate lexicon of the Persian, with brief grammars of those tongues, "is probably," says Dr. A. Clarke, "the greatest, and most perfect of the kind ever performed by human industry and learning." Dr. Castell expended both his fortune and his life in this immense undertaking. He laboured at this work for seventeen years, from sixteen to eighteen hours each day, during which time he maintained in his own house, at his own cost, seven Englishmen, and seven foreigners, as writers, all of whom died before the work was finished; unfortunately their names have not been preserved. He expended £12,000 of his own property on the work, and was obliged to borrow £1,800 more; which, not being able to repay, he was constrained to make application to king Charles II. "that a prison might not be the reward of so many labours, and so much expense!" The king directed a letter, in 1660, to all the nobility, clergy, and gentry, recommending the work, and earnestly soliciting pecuniary assistance in behalf of its distressed author, who complains, in his dedication to the king, that "he had expended all that he had inherited from his parents, and all that he had acquired in his past life; that after suffering severely from the effects of the civil war and the plague, he had, in the fire of London, lost his library, and household goods, with three hundred copies of his *Lexicon*; and that to these misfortunes were added divers private accidents; and from incessant study, an almost total blindness." The sale, however, notwithstanding the patronage it received, was very slow, so that at the time of the author's decease, many copies were still on hand.

Several learned men rendered assistance to

Dr. Castell, besides those whom he regularly employed in his own house; Dr. J. Lightfoot,\* and professor Golius,† were the two great coadjutors of Dr. Castell in the *Lexicon*.

The *Lexicon* was printed at London, by Thomas Roycroft, in 1669, in 2 vols. folio, and delivered to subscribers at forty shillings per volume in sheets. It is probable the paper had been imported duty free, as well as that for the *Polyglott*, a petition having been drawn up, and presented to Cromwell, who had granted the same favour for Bee's *Critici Sacri*;‡ an immense collection of the works of Biblical critics, in 9 vols. folio.

1657. Printing introduced into the town of Schuel, in Switzerland, which is memorable for having produced the first edition of the *Romansch*, or *Grisson Bible*, which was printed in this year, and is an exceedingly rare book. Coxe, however, in his *Travels in Switzerland*, assigns 1679 as the date of its publication. The second edition of this bible, furnished with a new preface and observations by N. Da Porta, was also printed at Schuel in 1743, in folio. Of this last a good copy may be seen in the Bodleian library.

1657, May 26. *The Public Adviser*. This is a weekly newspaper, which was printed for Thomas Newcomb, in Thames-street, and consists almost wholly of advertisements, with the arrival and departure of shipping, with books to be printed. No. 1.

1657, May 26. *The Public Adviser*, No. 1.

1657, July 29. *The Weekly Information*, No. 1.

1658. *A Catalogue of the most vendible Books in England*, digested under the heads of Divinity, History, Physick, &c., with School Books, Hebrew, Greek, and Latin; and an *Introduction for the Use of Schools*, by W. London, was published in 4to., London, with this motto, *Varietas Delectat*.

1658, Sept. Died, OLIVER CROMWELL, who had been elected lord protector of England. This extraordinary man, who by his bold and daring efforts united in his simple person the whole power, civil and military, of the three kingdoms; who, with the bubble in one hand, and the sword in the other, raised and ruled the storming elements of political and religious fanaticism, was born at Huntingdon, April 25, 1599: he was of a good family, but being the son of a second brother, inherited only a small

\* John Lightfoot, D. D. was born at Stoke upon Trent in Staffordshire, and educated at Cambridge. He was "a man," says Dr. Adam Clarke, "who, for the amiableness of his disposition, the purity of his manners, and the extent and depth of his literary knowledge, had, even in that age of profound learning, no superior, and since an equal." He died at Ely, December 6, 1675, and was interred at Great Munden, in Hertfordshire, of which place he was rector.

† Jansen Golius, professor of Arabic at Leyden, was born at the Hague, in 1600. He died September 28, 1667, as much respected for his virtue and piety, as for his talents and learning. He left two sons who became considerable men in Holland.

‡ The *Critici Sacri*, or a Collection of Commentaries and Treatises by the most eminent English and foreign critics, which was formed under the direction of bishop Pearson, John Pearson, Anthony Scattergood, and Francis Gouldman, and printed in London, 1656, by Cornelius Bee, was designed as a companion to the *Polyglott Bible*.

\* Edmund Castell was born at Hatley, in Cambridgeshire, in 1606, and educated at Emanuel college, Cambridge. While in the university he laboured in compiling his *Lexicon*. In 1666 he was appointed chaplain to Charles II. and Arabic professor at Cambridge, to which was added a prebend of Canterbury. He died at Higham-Golton, in Bedfordshire, of which place he was rector, being about 79 years, and was buried in the church.

paternal estate. Though educated in a liberal style, his genius was little fitted for the elegant and tranquil pursuits of literature, and therefore he made small proficiency in his studies at the universities. From Cambridge he went to study the law in London, where he became a member of Lincoln's Inn, and spent most of his time in dissipated company. He soon returned to reside upon his paternal estate, and in the long parliament he represented the town of Cambridge; but for two years he was not heard with attention, his person being ungraceful, his voice untuneable, his elocution embarrassed, and his speeches tedious, obscure, confused, and often unintelligible; his actions, however, were as decisive, prompt, and judicious, as his speeches were wavering, prolix, and inconclusive. He was forty-three years of age when he first engaged in the military profession; and by the mere force of genius, seconded by an indefatigable application, he soon became an excellent officer, though perhaps he never obtained the fame of a consummate commander. He soon convinced the world that no difficulties could deter him from serving the cause which he had embraced. By merit he speedily rose to be the first in command; and by fraud and violence he soon became the first in the state. In proportion to the increase of his power, his talents seemed to be enlarged, and he daily discovered new abilities, which he was never known to possess till some particular emergency called them into action. The power he obtained awakened his ambition, and he adopted the usual mode of intrigue to extend it to the name as well as the authority of a king. All Europe were amazed to see a nation, so restless and turbulent, who, for encroachments on their liberties, had de-throned and murdered their hereditary prince, now reduced to slavery by the immediate descendant of an obscure private gentleman. The system of the government was military, and was called the commonwealth, to give the lower classes a notion that it had for its object the common good of all; but, in fact, the presence of forty-five thousand men awed them (the people) into submission. The foreign powers had anticipated Cromwell's success, and upon his being invested with the supreme power, all who had reason to hope for his friendship, or fear for his enmity, hastened to present their congratulations. The cares of government oppressed his thoughts by day, and assassination haunted his dreams by night. One conspiracy was no sooner detected, than another rose from its ruins; indisposition affected his nerves, and domestic affliction undermined his sinking constitution; and, more than all, the exhausted state of his treasury gave him the most poignant uneasiness. He was in arrears to the army, and he had relied on that for support; and he was now taught, upon reasoning principles, that his death was not only desirable, but his assassination would be meritorious. The death of his favourite daughter, Mrs. Claypole, filled up the measure of his affliction; he survived the loss of

her only a few weeks. Such confidence did the friends of Cromwell entertain after his death of his sanctity, that Thurloe thus announced the event to the deputy of Ireland, "He is gone to heaven, embalmed with the tears of his people, and upon the wings of the prayers of the saints."

According to Ludlow's account, Cromwell expressed on his death-bed, some fears that his memory would be insulted, and his remains trampled upon. He asked his preacher whether it was true that the elect could never finally fall; and when assured that it was so, Cromwell said, "Then I am safe; for I am sure that once I was in a state of grace." His last words appeared to be those of a person interceding with God for the people. He was buried with great pomp in Westminster abbey. Most of the European courts went into mourning for him, even that of Versailles. Great as a general, Cromwell was still greater as a civil ruler; and, on the whole, his political administration was masterly, and adapted to the circumstance of his situation. The public revenues were strictly and economically managed without any additional impost. He appointed for judges the most upright and distinguished men. He never interfered with the proceeding of the courts of justice. In religion he acted on the principles of toleration. Every man had liberty of conscience. In other things too, Cromwell, as his own correct judgment prompted, would have governed with mildness and justice, promoted the arts and sciences, and healed the wounds of the nation; but he was obliged to maintain his power, as he had acquired it, against his better will, by a severity often amounting to tyranny.

On the other hand, he strengthened the British navy. The famous admiral Blake,\* and other naval heroes, fought several well-contested battles with the Dutch fleets under De Ruyter, Tromp, and others. At the peace with Holland, in 1654, England maintained the honour of her flag, and the navigation act gave a new impulse to the colonial trade.

Oliver Cromwell had appointed his eldest son, Richard, his successor; but the mild and virtuous Richard was compelled by the mutinous officers of the army to dissolve the parliament; and a few days after, conscious of his incapacity, he voluntarily abdicated the protectorship, April 22, 1659. At the restoration he went to the continent, and returned to England in 1680, and assuming the name of Clark, passed the remainder of his days in tranquil seclusion, at Cheshunt, in Hertfordshire, where he died March 25, 1712, at the age of eighty-six years. His brother Henry, who had talent, bravery, and mildness of temper, and who from 1654 had governed Ireland in tranquillity, improved its

\* Robert Blake was born at Bridgewater, in Somersetshire, August 15, 1599. In February 1659, he was appointed to command the fleet, and during nine years actual service in the navy, he performed exploits that, for the skill with which they were conducted, and the success that attended them, were never surpassed till the days of Howe, St. Vincent, Duncan, and Nelson. He died August 17, 1667, aged 58, and was buried in Westminster abbey.

trade, and won the affections of the people by his upright administration, followed the example of Richard, and lived in privacy in England. He died in 1674, aged forty-seven years.

During the civil wars the calm delights of literature gave way for the angry discussion of politics; and the disputations of puritanical bitterness passed for religion among the great mass of the people. The minds of philosophical men were naturally directed to the subject of civil government, in which it seemed desirable that some fixed truths might be arrived at, as a means of preventing future contests of the same kind; neither at that time nor since has it been found possible to lay down a theory of government to which all mankind might subscribe; but the period of the commonwealth produced some political works of merit. The *Leviathan* of Hobbes was the most distinguished work on the monarchical side of the question; while the *Oceana* of sir James Harrington, published soon after the accession of Cromwell to supreme power, and some of the treatises of Milton, are the best works in favour of the republican doctrines.

1658. *Wine, Beer, Ale, and Tobacco, contending for Superiority.* A Dialogue.

Horat. Siccis omnia dura Deus proposuit.

London. Printed by I. B. for John Grove, and are to be sold at his shop betwixt St. Katharine's Stairs and the Mill, next door to the sign of the Ship.

The following are the Dramatis Personæ.

Wine ..... A Gentleman.  
Sugar ..... His Page.  
Beer ..... A Citizen.  
Nutmeg ..... His Prentice.  
Ale ..... A Countryman.  
Toast ..... One of his rural Servants.  
Water ..... A Parson.  
Tobacco ..... A swaggering Gentleman.

The following whimsical medley is introduced by way of song.

*Wine.* I, jovial wine, exhilarate the heart.  
*Beer.* March beer is drink for a king.  
*Ale.* But ale, bouny ale, with spice and a toast.  
*Chorus.* Then let us be merry, wash sorrow away,  
Wine, beer and ale shall be drunk to-day.  
*Wine.* I, generous wine am for the court.  
*Beer.* The title calls for beer.  
*Ale.* But ale, bonny ale, like a lord of the soyl,  
In the county shall domineer.  
*Chorus.* Then let us be merry, wash sorrow away,  
Wine, beer and ale shall be drunk to-day.

1658, July 17. *Mercurius Meretriz*; or, the Venereal Spy. Entered at stationers' hall of this date.

1659. JOHN SWEETING, if not the founder, was at least the confirmer and augments of the annual venison dinner. By will, dated May 8, 1659, and proved Feb. 6, 1661, he gave his *fourscore pound share* of the English stock; a fee-farm rent of £10 a year from the tithes of Dodington in Northumberland, and another fee-farm rent of £10 a year, from the tithes of

Chutton in the same county, purchased in 1657 from the trustees for the sale of fee-farm rents, and then payable by the Lord Grey of Wark, possessor of the premises. Out of the first year's receipt, Mr. Sweeting directs that £10 be laid out in something to preserve "his memorial in the company," and that his brother, who was a merchant in London, should be advised with on that subject. He also desires that £6 should be expended on two dinners (£3 for each dinner) for all the bachelors that are booksellers free of the company of stationers, shopkeepers themselves in the city of London. After the first year, the annual sum to be thus applied: to the master 10s. for a pair of gloves; and 20s. to a godly minister, for a sermon to be preached on the 10th of August, or some day near it; and with the residue a dinner is to be provided for the master, wardens, assistants, clerk, and such of the livery as should attend at the church to hear the sermon. On the 3d of August, 1663, the company invited Mr. Sweeting's brother to a dinner of four shillings, when it was agreed that the £10 given by his brother's will, should be bestowed on a silver cup, college fashion, for the preservation of his memory. At the same time four bachelor booksellers were appointed stewards for the first dinner.

1659, Feb. 21. *A perfect Diurnal of every Day's Proceedings in Parliament*, No. 1.

1659, March. *A seasonable Speech made by a worthy Member of Parliament in the House of Commons, concerning the other House.*

1659, April 23. *The faithful Scout*, No. 1.

1659, April 21—28. *Mercurius Democritus*, No. 1. This title was used at different periods; and it seems doubtful if several of the other Mercuries had not temporary revival, recommenced the numerical number for each volume. Dr. Johnson says, "that when any title grew popular, it was stolen by the antagonist; who, by this stratagem, conveyed his notions to those who would not have received him, had he worn the appearance of a friend."

1660. The society of London for propagating the gospel among the Indians, in New England, North America, sent a press, &c. and a printer, solely for the purpose of printing the bible and other books in the Indian language. On their arrival they were carried to Cambridge, and employed in the printing office established there.

In 1661 the *New Testament*, with the *Psalms* in metre, was printed at Cambridge, in 4to., by GREEN and JOHNSON, and dedicated to Charles II. This was followed by the *Old Testament*,\* which was printed at the same place in 1664. 4to. Dr. Cotton Mather states, as two curious facts, that this was the first bible ever printed in America; and that the whole of the translation was written with one pen. The language in which the bible was printed was a dialect of the *Mohegan*. The translator was the rev. John Eliot, who was born in England, 1604, and educated at Cambridge. In 1631 he emigrated to America, and became pastor to the Independents at Roxbury. His indefatigable exertions as a minister of the gospel, and his unwearied labours in the conversion of the heathen, caused him to be esteemed and revered as the *apostle of the Indians*. He lived to a good old age, and died as he had lived, in the triumph of faith, in 1690, in his 86th year.

Notwithstanding printing continued to be performed in Cambridge, from a variety of causes it happened that many original works were sent from New England, Massachusetts, in particular, to London to be printed. Among these causes the principal were, first, the press at Cambridge had generally full employment; secondly, the printing done there was executed in an inferior style; and thirdly, many works on controverted points of religion were not allowed to be printed in that country. Hence it happened, that for more than eighty years after printing was first practised in the colony, manuscripts were occasionally sent to England for publication.

The fathers of Massachusetts kept a watchful eye on the press; and, in neither a religious nor civil point of view, were they disposed to give it much liberty. Both the civil and ecclesiastical rulers were fearful that if it was not under wholesome restraints, contentions and heresies would arise among the people. In 1662 the government of Massachusetts appointed licensers of the press; and afterwards, in 1664, passed a law that "no printing should be allowed in any

town within the jurisdiction, except in Cambridge"—nor should any thing be printed there but what the government permitted through the agency of those persons who were empowered for the purpose. Offenders against this regulation were to forfeit their presses to the country, and to be disfranchised of the privilege of printing thereafter. In a short time, this law was so far repealed, as to permit the use of a press at Boston, and a person was authorized to conduct it: subject, however, to the licensers who were appointed for the purpose of inspecting it.

1660, May 29. KING CHARLES II. enters London, on his restoration to the sovereignty of Great Britain. Charles was in his thirtieth year, and possessed an excellent constitution, a manly figure, a graceful demeanour, many personal accomplishments, a love of literature and the fine arts, and a great share of mental abilities. Ten years spent in exile and adversity, it was expected, would have taught him moderation; but a determined desire to govern without control, and a wasteful prodigality of disposition, aided by his convivial talents and his ready wit, led him to a free indulgence in the levities of youth, and the intemperance of appetite. His example was contagious, and debauchery and irreligion soon became the characteristics of his court. Nothing was more sudden and more conspicuous than the change in public morals; from the moment that the state ceased to be guided by men who professed the forms of godliness, vice walked forth without disguise; no longer concealed by the assumed garb of virtue, she appeared without restraint, and was received as a welcome visitor; the affectation of decorum was exchanged for a round of gay pleasure and revelry, the court of king Charles II. vied in voluptuousness with that of his cotemporary, Louis XIV.—which in the end lost him the affection of his subjects.

1660. *Cromwell's Conspiracy*, a tragedy-comedy, relating to our latter times, beginning with the death of king Charles I. and ending with the happy restoration of king Charles II. London. Printed for the author.

1660. *The tragicall Actions of the Martyrdom of the late king Charles*, wherein Oliver's late falsehood, with the rest of his gang, are described in their several actions and stations. At the end of the piece, printed for S<sup>r</sup>. Arthur.

1660. *A Phanatique Play*, the first part, as it was presented before and by the Lord Fleetwood, S<sup>r</sup>. Arthur Haslrig, S<sup>r</sup>. Henry Vane, the Lord Lambert, and others, last night, with Master Jester and Master Pudding. Printed in London. This is the first edition.

The knave, the chiefest card, had won the day,  
Had not the king came in whilst they did play.

1660, June 7. An order of council, that the stationers' company do seize and deliver to the secretary of state, all copies of Bnehanan's *History of Scotland*, and *de Jure regni apud Scotos*, "which are very pernicious to monarchy, and injurious to his majesty's blessed progenitors."

\* The reader may find some of the *Uems* of the expenses of printing the bible in the Indian language, in Brown's *History of the Propagation of the Gospel among the Heathen*. Vol. I. p. 69.

1660, May 17. A precept from the lord mayor, directed to the master and wardens of the company, was read; requiring that if the king, at his return to his kingdom, shall please to pass through the city, ten of the most grave, tall, and comely personages of the company, well horsed, and in their best array or furniture of velvet, plush, or satin, with chains of gold, be in readiness to attend the lord mayor, aldermen, and other citizens, for his better reception. They were accordingly nominated, and ordered to choose each of them a footman to attend him. The wardens are to deliver them coats, ribbons, and truncheons, for the occasion.

Mr. Hunscoth (the beadle) being very ancient, and therefore incapable of the service, ordered that John Cleaver do carry the company's banner on horseback on that day, with such furniture and allowance for his service as the wardens think fit; the wardens to pay Mr. Hunscoth 20s. in lieu of the benefit that might accrue to him had he carried the company's banner; and to give notice to some young free-men of the company, to serve as whiffers, who are with him to attend the livery at their stand on that day.

1660, Sept. 25. By the stationers' books, it appears, that a warrant under sign manual, was granted to George Wharton, esq., for "perusing and licensing almanacks."

1660, Oct. 16. Hugh Peters\* was executed upon this day, at Charing cross, London, when a spectator penned the following lines, in which his character is accurately summed up.†

See here the last and best edition  
Of Hugh, the author of sedition;  
So full of errors, 'twas not fit  
To read, till *Dun* corrected it;  
But now 'tis perfect, nay, far more  
'Tis better bound than 'twas before.  
And now I hope it is no sin  
To say, Rebellion took the swing;  
For he that says, says much amiss,  
That Hugh an Independent is.

1660, Jan. 7. *The Parliamentary Intelligence*, comprising the sum of Foreign Intelligence, with the affairs now in agitation in England, Scotland, and Ireland; for information of the People; published by order, No. 1.

This was a continuation of an old paper under the former title. No. 14, March 26 to April 2,

\* Hugh Peters was born at Povey, in Cornwall, in 1599, and educated at St. John's college, Cambridge, from whence he was expelled for irregular conduct. He afterwards tried the stage; but left that, and was ordained by bishop Mountaine, when he became lecturer of St. Sepulchre's, London. He was forced to flee, and went to Rotterdam, where he joined the Independents. From Holland he went to America, but on the breaking out of the civil war he returned to London.

† A correspondent in the *Gentleman's Magazine* asks, "May this be regarded as the original of the celebrated Epitaphs on Jacob Tenson and Dr. Franklin."

‡ The common hangman of that time.—See *Hudibras*, and Dr. Grey's notes.

And while the work is carrying on  
Be ready listed under *Dun*.—*Hudibras*.

But stay, my frightened pen is fled;  
Myself through fear creep under bed;  
For just as muse would scribble more  
Fierce city *Dun* did rap at the door.—*D'Avenant*.

was said to be published by order of the council of state; and No. 16 began with the following advertisement: "Whereas Marchmont Needham, the author of the weekly news-books called *Mercurius Politicus* and the *Publique Intelligence*, is, by order of the council of state, discharged from writing or publishing any *publique intelligence*; the reader is desired to take notice, that, by order of the said council, Giles Dury and Henry Muddiman are authorized henceforth to write and publish the said intelligence, the one upon the Thursday, and the other upon the Monday, which they do intend to set out under the titles of the *Parliamentary Intelligence* and of *Mercurius Publicus*."—These two weekly books of news, which in 1656 had been entered in the stationers' register as the property of Thomas Newcombe, with the license of secretary Thurlow, were on the 9th of April, 1660, entered as the property of Dury and Muddiman, by licence of the council of state.—*Chalmers*, p. 422.

1660, Jan. An exact Account of the Daily Proceedings in Parliament, No. 56. This appears to have been revived upon the fresh meeting of parliament.

1660, Nov. 26. *The Kingdom's Intelligence*.

1660. *News from Brussels*. In a letter from a near attendant on his majesties person to a person of honour here; which casually become thus publike. Printed in the year 1660. 4to.

1661. About this time may be dated the origin of the Royal Society of London, and according to D'Israeli was as follows:—It was in the lodgings of Dr. Wilkins,\* in Wadham college, Oxford, that a small philosophical club met together, which proved to be, as Aubrey expresses it, the *incunabula* of the Royal Society. When

\* John Wilkins, D. D. bishop of Chester, was a most ingenious and learned theologian, critic, and mathematician. He was born 1614, and died November 19, 1672.

the members were dispersed about London, they renewed their meetings first at a tavern, then at a private house; and when the society became too great to be called a club, they assembled in "the parlour" of Gresham college, which itself had been raised by the munificence of a citizen, who endowed it liberally, and presented a noble example of the individuals now assembled under its roof. The society afterwards derived its title from a sort of accident. The warm loyalty of Evelyn in the first hopeful days of the Restoration, in his dedicatory epistle of Naude's *Treatise on Libraries*, called that philosophical meeting THE ROYAL SOCIETY. These learned men immediately voted their thanks to Evelyn for the happy designation, which was so grateful to Charles II. who was himself a virtuoso of the day, that the charter was soon granted: the king, declaring himself their founder, "sent them a mace of silver gilt, of the same fashion and bigness as those carried before his majesty, to be borne before the president on meeting days." Were the origin of the Royal Society inquired into, it might be justly dated a century before its existence; the real founder was lord Bacon, who planned the ideal institution in his philosophical romance of the *New Atlantis*!

1661, March 13. Evelyn notes, "This afternoon, prince Rupert showed me the new way of Graving, called *mezzotinto*, which afterwards, by his permission, I published in my *History of Chalcography*: this set so many artists on work, that they soon arrived to that perfection it is since come to, emulating the tenderest miniatures." The history was presented to the royal society, in a dedication to Boyle, on the 10th of June, 1662.

1661. The following observations by Fuller,\* are curious, respecting the paper of his times:—"Paper participates in some sort of the characters of the country which make it; the *Venetian* being neat, subtle, and court-like; the *French*, light, slight, and slender; and the *Dutch*, thick, corpulent, and gross, sucking up the ink with the sponginess thereof." He complains that the paper manufactories were not then sufficiently encouraged, considering the vast sums of money expended in our land for paper, out of Italy, France, and Germany, which might be lessened were it made in our nation. "To such who object

that we can never equal the perfection of *Venice* paper, I return, neither can we match the purity of *Venice* glasses; and yet many *green ones* are blown in *Sussex*, profitable to the makers, and convenient to the users. Our *home-grown paper* might be found beneficial."

1661, Jan. 7. *The Kingdom's Intelligencer of the Affairs now in Agitation in England, Scotland, and Ireland; together with Foreign Intelligence. To prevent false News. Published by authority*, No. 1.

1661, Jan. 8. *Mercurius Caledonius: comprising the Affairs in Agitation, in Scotland, with a Survey of foreign Intelligence*, No. 1.

This was the first newspaper which was of Scottish manufacture, and was printed by a Society of Stationers, at Edinburgh, and published once a week, in small 4to. of eight pages. The editor of this first Scottish newspaper, was Thomas Sydsersfe, son of the bishop of Orkney, "who thought," says Mr. Chalmers, "that he had the wit to amuse, the knowledge to instruct, and the address to captivate, the lovers of news in Scotland; but he was only able, with all his powers, to extend his publication to ten numbers, which were very loyal, very illiterate, and very affected." The last paper, No. 10, was dated from March 22, to March 28, 1661.

1661, Jan. 10. *Mercurius Publicus*, No. 1.

1661. *Strange News from the West, being an account of several miraculous sights seen in the air, westward, by divers persons of credit, standing upon London Bridge. Two great armies marching forth of two clouds and encountering each other, after a sharp dispute they suddenly vanished*, &c. 4to.

1662. Miles Flesher, esq., having lately fled for alderman of Loudon, earnestly moved that he might not be exposed to election for master of the stationers' company; but his desire was overruled.

1662. The *Book of Common Prayer* was revised by authority, when commissioners were appointed who were to execute the work. They accordingly took a folio *Prayer Book*, printed in this year, and with a pen they made such alterations as seemed to them expedient. This copy was lodged in the tower, and at the same time they marked the same alterations in a certain number of other copies, one of which was to be deposited in every cathedral. This is known by the name of the *sealed book*, because every copy had appended to it, as a mark of authority, an impression of the great seal of England.

1662, July 9. A very extraordinary question arose, about preventing the publication of the debates of the Irish parliament in the English newspaper called *The Intelligencer*; and a letter was written from the speaker to sir Edward Nicholas, the English secretary of state, to prevent such publications in those *diurnals*, as they called them.

1662. HILL and FIELD printed an edition of the *Holy Bible*, 12mo. with Canne's references. Canne, the author of the notes, was a Brownist, and pastor of a congregation in Holland. His

\* Thomas Fuller, a celebrated historian and divine, was born at Aldwinckle, in Northamptonshire, in 1608, and educated at Cambridge. He adhered strenuously to the royal cause, and on the ruin of the king's affairs, he was chosen lecturer of St. Bride's, Fleet-street, London, and about 1648, he obtained the rectory of Waltham in Essex. At the restoration he was made chaplain extraordinary to the king, restored to his prebend, and created D. D. He published a great number of works, the principal of which were the *History of the Worthies of England*, folio, the *Church History of Britain*, folio, the *History of the Holy War*, folio, the *Holy State*, folio; *Abel Redivivus*, or the *Lines of Eminent Divines*, quarto; *Sermons*, Tracts, &c. He is said to have had so strong a memory as to tell, in their exact order, the names of the signs then placed over every tradesman's door, after a walk from Temple-bar to the Royal Exchange. His style is exceedingly quaint, and he is too fond of punning. The following line is his epitaph:

HERE LIES FULLER'S EARNS.

bibles were several times printed both in Holland and England; an edition was on sale in England at the commencement of the nineteenth century, dated 1682, with a London title, though printed at Amsterdam. His best printed bibles are on a fine silky paper; and should not exceed one inch in thickness, including the covers. John Baskett, at Cambridge, printed an edition in 4to, 1720.

1662. *The Lord's Prayer*, in forty languages, was printed at Riga, the capital of Livonia, in Russia.—*Le Long*. The British museum contains a *Livonic Testament* executed at Riga in 1685, and a *Livonic Bible*, in 1689.

1662. THOMAS JOHNSON printed a comedy, entitled *The Poor Scholar*, written by George Nevile, fellow of King's college, Cambridge.

Spectatum admisi risum tenestis amici.

Hor. de Art. Poet.

London: printed for Francis Kirkman and Henry Marsh, and are to be sold at their shop, at the Princes arms, in Chancery lane. 1662.

1662, July 1. *The Intelligencer*.

1662, August 24. On this day was passed the *Act of Uniformity*, by which two thousand ministers were silenced and ejected from the bosom of the established church. Dr. Calamy\* chronicles this bloodless martyrology. Their history is not glorious, and their heroes are obscure; but it is a domestic tale! When the second Charles was restored, the presbyterians, like every other faction, were to be amused, if not courted. Some of the king's chaplains were selected from among them, and preached once. Their hopes were raised that they should, by some agreement be enabled to share in that ecclesiastical establishment which they had so often opposed; and the bishops met the presbyters in a convocation at the Savoy. A conference was held between the high church, resuming the seat of power, and the low church, now prostrate; that is, between the old clergy who had recently been mercilessly ejected by the new, who in their turn were awaiting their fate. The conference was closed with arguments by the weaker, and votes by the stronger. Many curious anecdotes of this conference have come down to us. The presbyterians, in their last struggle, petitioned for indulgence: but oppressors who had become petitioners, only showed that they possessed no longer the means of resistance. These divines were not driven from their father-land, and compelled to learn another

language than their mother-tongue. Destitute as divines, they were suffered to remain as citizens; and the result was remarkable. These divines could not disrobe themselves of their learning and their piety, while several of them were compelled to become tradesmen: among these the learned Samuel Chandler, whose literary productions are numerous, kept a bookseller's shop in the Poultry.—*D'Israeli*.

1662. The office of licenser of the press which had been abolished during the usurpation of Cromwell, was restored by an act of parliament. By this act, the press, with reference to its different productions, was placed under the dominion of the judges, some of the officers of state, and the archbishop of Canterbury. Thus it will be seen, that the control of the press no longer remained a royal prerogative of the crown, but was passed into the possession of the legislature, and made the subject of statutory enactment. It has already been shewn (see page 247, *ante*.) that very soon after the introduction of printing into England, the king assumed the right of controlling the exercise of the art, not merely in regard to certain classes, but in regard to all classes of books; and there was no stretch of jurisdiction in this matter which the prerogative did not claim to possess, and which, therefore, it might not upon the same grounds transfer to be exercised by another; for the king assumed not only the right of exclusive printing, but also of exclusive selling to whom he pleased. This was asserted in its fullest extent down to the abolition of the star chamber, 1641. The censors, or licensers of books appointed by that court were appointed in virtue of the supposed royal prerogative, and were conceived to derive from its all comprehensive nature that universal authority over the press which they were empowered to exercise. The abolition of the star chamber, however, did not long leave the press free. By the above act, the parliament soon took up the office of censorship which the royal court no longer exercised. In vain did Milton attempt to prevent this usurpation; it was perpetrated in defiance of all his eloquence and all his unanswerable arguments. But still an important principle was asserted by the parliament having thus taken the matter into their own hands. The ground thus gained was preserved at the restoration; indeed, the press was put under a censorship, but the yoke was imposed upon it by an act of parliament. Subsequent acts continued the grievance till 1694, when the last restrictive law expired. From that date the press in England has been commonly considered to be free.

1662, Dec. Died, WILLIAM DU GARD, an eminent schoolmaster, orator, poet, and printer. He was born in the parish of Bromsgrove, in Worcestershire, January 9, 1605, and admitted a pensioner of Sidney Sussex college, Cambridge, Sept. 17, 1622, where he took the degree of M. A. In 1629, he was usher of Oundle school, in Northamptonshire; the same year, appointed master at Stamford free school, in Lincolnshire;

\* Edmund Calamy was born in 1600, and educated at Cambridge. He joined the nonconformists, and obtained the valuable rectory of Rochford, in Essex. In 1639, he was chosen minister of St. Mary Aldermanbury, on which he removed to London, and engaged warmly in the religious disputes of the times. He was one of the writers of the celebrated treatise against episcopacy, entitled *Smectonismus*, a word formed from the initials and surname of those connected with it. He opposed both the execution of Charles I. and the usurpation of Cromwell, for which, on the restoration, he was offered the bishopric of Lichfield, which he refused. The act of uniformity obliged him to resign his church peremptorily. He died October 29, 1666, and his death is supposed to have been hastened by witnessing the great fire of London.

and on the 7th of July, 1637, he was appointed head master of the free school at Colchester, in Essex. After remaining at Colchester some years, he received the appointment of head master of the Merchant tailors' school, in the parish of St. Laurence Poultney, London, May 10, 1644. Upon taking possession of his school, he erected a printing press in his house, which seems to have been the source of all his misfortunes. Under his influence and management the school flourished exceedingly, but in 1649, for shewing, as was thought, too great an affection to the royal cause,\* and especially for being concerned in printing *Salmasius's Defence of Charles I.*, in defiance of a triumphant faction and victorious army; the council of state irritated thereby, issued an order for his commitment to Newgate; his wife and six children were turned out of doors, and a printing office, which he valued at one thousand pounds, seized and destroyed. The council of state also wrote to the merchant tailors' company, desiring that he might be deprived of his office, as a person unfit to "be entrusted with the education of so much youth." At the expiration of one month, he found means, through the intercession of Milton, who professed a friendship for him, to pacify his enemies and procure his enlargement, and opened a private school for his support. In September, 1650, he was however reinstated in his former school, by order of the same council of state that deprived him of it. He again resumed his typographic labours, though on a very different kind of work—the answer to *Salmasius*, with the following title: *Joannis Miltoni Angli Defensio pro Populo Anglicano contra Claudii Anonimi alias Salmasii Defensionem regiam*. London, typis Du Gardienis; anno domini, 1651. In 1652, his name appears as printer to the *Lord Protector*. In 1653, he printed an edition of William Hill's *Dionysius*, to which he prefixed a copy of Latin verses. The house of commons ordered this book to be publicly burnt, upon which occasion the trustees of Merchant tailors' school, intimated that it would be very acceptable to them, if he would relinquish the printing business, and devote himself entirely to his proper duty. In December, 1660, he was again deprived of his school, but so great was his reputation, and the fame of his abilities, that, by the 25th of March following, he had gathered one hundred and ninety-three scholars. Besides the qualifications of his mind, which caused him to be highly valued by a large circle of friends, his literary attainments will cause his name to be remembered by scholars of the present day—Wilson.

\* That he was well affected to Charles I. and to the royal interest, appears from a curious register he kept of his school, which is still extant in Sloo-college library, wherein are entered two Greek verses, on the beheading of that monarch, to this effect: "Charles, the best of kings, is fallen by the hands of cruel and wicked men, a martyr for the laws of God and of his country." There are also two more Greek verses on the burial of Oliver Cromwell's mother in Westminster abbey, to this effect: "Here lies the mother of a cursed son, who has been the ruin of two kings, and of three kingdoms."

1663. Jan. 5. *The Kingdom's Intelligencer of the Affairs now in agitation in England, Scotland, and Ireland*. No. 1.

This paper contains many regular advertisements of books; and begins with one that is worth transcribing: "There is stolen abroad a most false and imperfect copy of a poem, called *Hudibras*, without name either of printer or bookseller, as fit for so lame and spurious an impression. The true and perfect edition, printed by the author's original, is sold by Richard Marriott, under St. Dunstan's church in Fleet-street; that other nameless impression is a cheat, and will but abuse the buyer as well as the author, whose poem deserves to have fallen into better hands." A kind of obituary found also a place in this paper; with some account of the proceedings of parliament, and in the court of claims; a list of the judges' circuits, the sheriffs, the lent preachers, &c. &c. And in No. 8, notice is given "that the faculties office for granting licenses (by act of parliament) to eat flesh in any part of England, is still kept up at St. Paul's Chain, near St. Paul's churchyard."

1663. ROGER L'ESTRANGE, esq., (after more than twenty years spent in the royal cause, near six of them in gaols, and almost four under sentence of death in Newgate,) had interest sufficient to obtain an appointment to a new created office, under the title of *Surveyor of the Imprimery and Printing Presses*. Upon the appointment he wrote a pamphlet, which is a very great curiosity, and by shewing the sentiments of his party on this subject, will, even at the present day, excite astonishment for the boldness of its sentiments, which could advise such severe restrictions on the liberty of the press, and which has no doubt been the guide of all future enemies to the great bulwark of the civil and religious freedom of the people.

*Considerations and Proposals in order to the Regulation of the Press: together with Diverse Instances of Treasonous and Seditious Pamphlets, proving the necessity thereof.* By Roger L'Estrange. London, printed by A. C. June 3, M.DC.LXIII.

To the King's Most Excellent Majesty.

SIR,

It is not without some force upon myself that I have resolved upon this dedication: for I have no ambition to appear pragmatical, and to become the marque of a peevish faction: but, since my duty will have it thus, I shall accompt

\* In the register of St. Alkmund's church, at Derby, is the following entry:—"Whereas Katharine, the wife of Nathaniel Bate, of Little Chester, within the parish of St. Alkmund, Derby, being great with child and, (by reason of her health) very infirm and weak, and therefore not able to feed upon fish meat without apparent injury (as I am credibly informed); I do, therefore, by these presents, permit (so far forth as by the statutes of this kingdom I may), unto the said Katharine Bate, to provide for herself, and to feed upon such flesh meats as by the said statute are licensed in such case, during the time of her sickness, and no longer. In witness whereof I have hereunto set my hand. H. Coke, minister and preacher of the word of God, in the parish of St. Alkmund aforesaid."

all other interests as nothing in competition with my allegiance.

If your majesty shall vouchsafe to look so far, and so low, as in the ensuing treatise you will find it, Sir, to be partly a deliberative discourse about the means of regulating the press; (the matter being at this instant under publique debate) and in part, an extract of certain treasonous and seditious passages and positions which may serve to evince the necessity of that regulation. The latter of which, I do most humbly offer to your royal consideration, not presuming in any sort, to concern your majesty in the former.

In this extract, is presented to your majesty's view; first, that spirit of hypocrisie, scandal, malice, error, and illusion, that actuated the late rebellion. Secondly. A manifestation of the same spirit reigning still, and working, not only by the same means, but in very many of the same persons, and to the same ends; that is, there is a combination and design against your sacred life, and dignity, which is carried on by the same arguments, pretences, wayes, and instruments, that ruin'd your royal and blessed father. All which I think myself bound, not only in generals, to declare, but, more particularly, to trace, and to discover to your majesty, as a duty which I owe both to God and to my sovereign.

The first part of the conspirator's work, is to disaffect the people toward your majesties person and government; and their next business is to encourage and carry on those seditious inclinations into action.

Touching the former; scarce any one regicide or traitor has been brought to justice, since your majesties blessed return, whom either the pulpit hath not canonized for a saint, or the press recommended for a patriot, and martyr, (beside the arraignment of the bench, for the very formalities of their trials) what is the intent or what may be the effect of suggesting to the people that there is no justice to be found, either in your cause or in your courts; (both of which are struck at in the same blow) is submitted humbly to your royal wisdom. Nor is the faction less industrious to draw an odium upon your majesties person, and to perplex, seduce, and exasperate, the multitude, in matters of religion, and concerning the government of the church.

There have been printed, and reprinted, since your majesties happy restauration, not so few as a hundred schismatical pamphlets against bishops, ceremonies, and common-prayer: in many of which, your majesty is directly, and in all of them implicitly, charg'd with an inclination to popery. The instruments that manage this part of the plot, are ejected ministers, booksellers, and printers; and, it is believed, by men of judgment, and experience, in the trade of the press, that since the late Act for Uniformity, there have been printed near thirty thousand copies of Farewell Sermons (as they call them) in defiance of the law. All which, as they are now drawn together into one binding, (to the number of

betwixt thirty and forty) and represented with figures, do certainly make up one of the most audacious, and dangerous libels, that hath been made publique under any government; and they are now printing it in Dutch too, for the greater honour of the scandal. By these arts and practices, the faction works upon the passions and humours of the common people; and, when they shall have put mischief into their hearts, their next business is to put swords in their hands, and to engage them in a direct rebellion: which intent of theirs, together with the means whereby they hope to execute it, I shall humbly lay before your majesty in a few words.

That they propose and labour another change appears, first, from the recourse they have in almost all their schismatical papers to the obligation of the covenant; which is no other, than to conjure the people under the peyn of perjury, to treat your majesty as the covenanters did your father; and (in a flat contradiction to the blessed apostle) to pronounce, that he that [obeyes] shall receive to himself damnation. A second proof of their designe may be drawn from their still pleading the continuance of the long parliament; and the sovereignty of the people; which is but in plain terms to disclaime your authority-royal, and to declaime to the world, that they want nothing but another opportunity for another rebellion. What may be the event of these liberties, belongs not to me to divine; but that such liberties are taken, I do, with great reverence, presume to enform your majesty: and, further, that the visible boldness and malice of the faction, seems not to be the only danger; diverse of very instruments, who are entrusted with the care of the press, being both privy and tacitly consenting to the corruptions of it; by virtue of which connivance, many hundred thousands of seditious papers, since your majesties return, have passed unpunished. And yet in this prodigious licence and security of libelling your sacred majesty, and the government, let but any paper be printed that touches upon the private benefit of some concerned officer; the author of that paper is sure to be retriv'd, and handled with sufficient severity.

Finally; to present your majesty with some common observations: it is noted, first, as a very rare thing, for any presbyterian pamphlet to be seiz'd, and suppressed, unless by order from above. Secondly, it is observed of those offenders that are discovered, that generally the rich have the fortune to come off, and the poor to suffer; and, thirdly, that scarce one of five, though under custody, is ever brought to either of your majesties principal secretaries of state.

I have now discharg'd my soul both to God, and to your majesty; in what I take to be as honest and a necessary office; and I have done it with this choice before me, either to suffer the worst that malice or calumny can cast upon me, or to forfeit my duty. I should not speak this but upon experience, nor dare to mention it upon this occasion, but that I think it highly imports your majesty to know how dangerous a

matter it is to render you a publique service. To present your majesty with a fresh instance :— I was lately engaged as a commissioner, in a publique debate on the behalf of the loyal officers; and for no other crime, or provocation, but for asserting the profess'd desires of the whole party; a certain gentleman took such a heat, and confidence, as openly to charge me with writing against your majesty; affirming withal, that your majesty had accused me for it to the parliament, and that my lord chancellor would justify it: since which time, it appears, not only that hee himself was the first person that by a private tale had endeavoured to exasperate my lord chancellor against mee; but that, being called to account by my lord's order, for so great, and so injurious a boldness, both towards your majesty, and his lordship, he desired God to renounce him, if ever he spake the words, (although delivered in the face of a full committee.) If I were impudent enough to trouble your majesty with a personal character, his familiar discourses, both concerning your sacred majesty and the honourable house of commons, would afford matter for it; but let God witness for me, that I have no passion, but for your majesties service, and for the general good of your loyal subjects; both which interests I do humbly conceive to be very much concern'd in some provision, that men may not suffer in their reputations for doing their duties; and that those persons who have cheerfully and honourably passed through the utmost extremities of a long and barbarous warr, out of a sence of loyalty to your royal father, may not now at last be stung to death by the tongues of tale-bearers, and slanderers for being faithful to your majesty. Which is the case of many, more considerable than myself, and among the rest in particular of

Your Majesties

Most loyal and obedient subject,

ROGER L'ESTRANGE.

*To the Right Honourable the Lords and to the Honourable the Commons assembled in Parliament.*

Having been lately employ'd to draw up some proposals touching the regulation of the press, and to search for certain seditious books and papers: I think it agreeable both to my reason and duty that I dedicate to your honours some account of my proceeding; especially in this juncture, when both the danger and the remedy are the subject of your present care. The drift and argument of this little treatise is express'd in the title. One particular only was forgotten in the body of the discourse, which I must now crave leave to insert in my dedication; (i. e.) an additional expedient for the relief of necessitous and supernumerary printers; many of which would be well enough content to quit the trade, and betake themselves to other employments, upon condition to be reimburs'd for their presses, letter, and printing materials: and it is

computed that £4000, or thereabouts, would buy off their stock; for the raising of which sum, and so to be employ'd, there occurs this expedient.

It is credibly reported, that there have been printed at least ten or twelve impressions of a collection entituled, *The First, Second, and Third, Volume of Farewel-Sermons*: (with the figures of the ejected ministers) which is no other, than an arraignment of the law, and a charge of persecution against the king and his parliament.

Upon a supposition of twelve impressions, (at a thousand a piece, which is the lowest) the clear profit, beside the charge of paper and printing, comes to £3300, which sum, being impos'd as a fine upon their heads for whom the books were printed, will defray a considerable part of the aforesaid charge, and what is wanting may be abundantly made up by the like course upon the publishers of other seditious pamphlets, keeping the same proportion betwixt the profit and the punishment.

Of the *Farewel-Sermons*, I seiz'd the other day in quires, to the quantity of betwixt twenty and thirty ream of paper: and I discovered likewise the supposed author of another pamphlet, entituled [*A Short Survey of the Grand Case of the Ministry, &c.*] Wherein is maintain'd, in opposition to the declarations required by the Act of Uniformity, that in some cases it may be lawful to take arms against the king.— To take arms by the king's authority against his person, or those commissioned by him. And that the obligation of the covenant is a knot cut by the sword of authority, whilst it cannot be loosed by religious reason. Concerning which, and many other desperate libels, if your honours shall think fit to descend into any particular enquiry, it may be made appear, that whereas not one of twenty is now taken, scarce one of a hundred could scape, if there were not connivance (at least, if not corruption) joyn'd to the craft and wariness of the faction.

How the world will understand this freedom and confidence in a private person, I do not much concern my self; (provided that I offend not authority) but the question to me seems short and easy, Whether it be lawful, or not, for any man that sees his country in danger, to cry out Treason? And nothing else hath extorted this singularity of practice and address from

Your honours'

Most dutiful servant,

ROGER L'ESTRANGE.

*Considerations and Proposals in Order to the Regulations of the Press.*

I think no man denies the necessity of suppressing licentious and unlawful pamphlets, and of regulating the press; but in what manner and by what means this may be effected, that's the question. The two main-points are printing and publishing.

The instruments of setting the work afoot are these. The adviser, author, compiler, writer, correcter, and the persons for whom, and by whom; that is to say, the stationer (commonly), and the printer. To which may be added, the letter-founders, and the smiths, and joiners, that work upon presses.

The usual agents for publishing are the printers themselves, stitchers, binders, stationers, hawkers, mercury-women, pedlers, ballad-singers, posts, carriers, hackney-coachmen, boatmen, and mariners. Other instruments may be likewise employ'd, against whom a general provision may be sufficient. Hiding and concealing of unlawful books, is but in order to publishing, and may be brought under the same rule.

Touching the adviser, author, compiler, writer, and correcter, their practices are hard to be retriev'd, unless the one discover the other.

This discovery may be procur'd partly by a penalty upon refusing to discover, and partly by a reward to the discoverer; but let both the penalty and the reward be considerable and certain: and let the obligation of discovery run quite through, from the first mover of the mischief, to the last disperser of it. That is to say; if any unlawful book shall be found in the possession of any of the agents, or instruments aforesaid, let the person in whose possession it is found, be reputed and punish'd as the author of the said book, unless he produce the person, or persons, from whom he receiv'd it; or else acquit himself by oath, that he knows neither directly nor indirectly how it came into his possession.

Concerning the confederacy of stationers and printers, we shall speak anon: but the thing that we are now upon is singly printing, and what necessarily relates to it.

One great evil is the multiplicity of private presses, and consequently of printers, who for want of public and warrantable employment, are forc'd either to play the knaves in corners or to want bread.

The remedy is, to reduce all printers and presses that are now in employment, to a limited number; and then to provide against private printing for the time to come, which may be done by the means following.

First; The number of printers and presses being resolved upon, let the number of their journey-men, and apprentices be likewise limited: and in like manner, the number of master-founders, and of their journey-men, and their apprentices; all which to be allow'd of, and approv'd by such person or persons, as shall be authoris'd for that purpose; neither let any journey, carpenter, or smith, presume to work for or upon any printing press, without such allowance as aforesaid, according to the direction of the late act for printing.

Secondly, Let all such printers, letter-founders, joiners, carpenters, and smiths, as shall hereafter be allow'd, as aforesaid, be respectively and severally interrogated before their admittance, in

order to the discovery of supernumerary printers and presses. That is;

1. Let the printers be question'd what private presses they have at any time wrought upon for so many years last past, and the time when, and for, and with whom: and what other printers, and presses they know of at present, beside those of the present establishment.

2. Let the founders be also examin'd, what letter they have furnish'd since such a time; when and for whom, and what other printers, &c.—*Ut supra*.

3. Let the joiners, carpenters, and smiths, be question'd likewise what presses they have erected, or amended, when and for whom? and what other presses, printers, &c.—as before.

And if after such examination it shall appear at any time within so many months, that any man has wilfully conceal'd or deny'd the truth, let him forfeit his employment as a person not fit to be trusted, and let the enformer be taken into his place if he be capable of it, and desire it; or else, let him be rewarded some other way. The same course may be taken also concerning English printers and presses beyond the seas.

This may serve as to the discovery of private printers and presses already in employment: now to prevent underhand-dealing for the future, and to provide against certain other abuses in such as are allow'd.

First; Let a special care be taken of card-makers, leather-guilders, flock-workers, and quoy-drawers; either by expressly inhibiting their use of such presses, as may be apply'd to printing of books, or by tying them up to the same terms and conditions with printers; and let no other tradesman whatsoever presume to make use of a printing-press, but upon the same conditions, and under the same penalties with printers.

2. Let no presse or printing-house be erected or lett, and let no journey, carpenter, smith, or letter-founder, work for a printing-house, without notice (according to the late act.)

3. Let no materials belonging to printing, no letters really founded or cast, be imported or bought without the like notice, and for whom (according to the late act.)

4. Let every master-printer be bound at least, if not sworn, not to print, cause or suffer to be printed in his house, or press, any book or books without lawful licence (according to the late act.)

5. Let no master-printer be allow'd to keep a press but in his own dwelling-house, and let no printing-house be permitted with a back-dore to it.

6. Let every master-printer certify what warehouses he keeps, and not change them without giving notice.

7. Let every master-printer set his name to whatsoever he prints, or causes to be printed, according to the late act.

8. Let no printer presume to put upon any book the title, marque, or viunet, of any other person who has the priviledge of sole printing the same, without the consent of the person so priviledg'd (according to the late act), and let

no man presume to print another man's copy.

9. Let no printer presume either to re-print or change the title of any book formerly printed, without licence; or to counterfeit a licence, or knowingly to put any man's name to a book as the author of it, that was not so.

10. Let it be penall to antedate any book; for, by so doing, new books will be shuffled among old ones to the encrease of the stock.

11. Let the price of books be regulated.

12. Let no journey-man be employ'd, without a certificate from the master where he wrought last.

13. Let no master discharge a journey-man, nor hee leave his master, under fourteen dayes notice, unless by consent.

14. Let the persons employ'd be of known integrity; so near as may be; free of the sayd mysteries, and able in their trades (according to the late act).

But if sixty presses must be reduced to twenty, what shall all those people do for a livelyhood that wrought at the other forty?

It is provided by the late act, that as many of them shall be employ'd as the printers can find honest work for, and a sufferance of more, is but a toleration of the rest to print seditious, so that the supernumeraries are in as ill a condition now, as they will be then; and yet something may be thought upon for their relief.

There have been divers treasonous and seditious pamphlets printed, since the act of indemnity; as, the *speeches of the late king's judges*, *Sir Henry Vane's [Pretended] Tryal*; the *Prodigies*, 1 Part and 2; and the like. Let any of these necessitous persons make known at whose request and for whose behoofe these or the like, seditious libells have been printed, and they shall not only be pardoned for having had a hand in it themselves, but the first enformer shall upon proof or confession be recommended to the first vacancy whereof he is capable in the new regulation, and the next to the second, and so successively: and moreover a fine shall be set upon the heads of the delinquents, to be employ'd toward the maintenance of so many indigent printers as shall be interpreted to merit that regard, by such discovery.

*The Stationers are not to be entrusted with the care of the Press, for these following reasons.*

1. They are both parties and judges; for diverse of them have brought up servants to the mystery of printing which they still retain in dependence: others again are both printers and stationers themselves; so that they are entrusted (effectually) to search for their own copies, to destroy their own interests, to prosecute their own agents, and to punish themselves; for they are the principal authors of those mischiefs which they pretend now to redress, and the very persons against whom the penalties of this intended regulation are chiefly levelled.

2. It is not adviseable to rely upon the honesty of people (if it may be avoided) where that

honesty is to their loss; especially if they be such as have already given proof that they prefer their private gain before the well-fare of the publique; which has been the stationer's case throughout our late troubles, some few excepted, whose integrity deserves encouragement.

3. In this trust, they have not only the temptation of profit, to divert them from their duty; a fair part of their stock lying in seditious ware, but the means of transgressing with great privacy and safety; for, make them overseers of the press, and the printers become totally at their devotion; so that the whole trade passes through the fingers of their own creatures, which, upon the matter, concludes rather in a combination, then a remedy.

4. It seems a little too much to reward the abusers of the press with the credit of superintending it; upon a confidence that they that destroyed the last king for their benefit, will now make it their business to preserve this to their loss.

5. It will cause a great disappointment of searches, when the persons most concerned shall have it in their power to spoil all, by notice, partiality, or delay.

6. As the effectual regulation of the press is not at all the stationer's interest, so is it strongly to be suspected that it is as little their aim: for not one person has been fin'd, and but one prosecuted, (as is credibly affirmed) since the late act, notwithstanding so much treason and sedition printed and dispersed since that time.

7. It is enjoyn'd by the late act "that no man shall be admitted to be a master-printer, until they who were at that time actually master-printers, shall be by death or otherwise reduced to the number of twenty:" which provision notwithstanding, several persons have since that time been suffer'd to set up masters; which gives to understand that the reducing of the presses to a limited number is not altogether the stationers purpose.

*The Printers are not to be entrusted with the Government of the Press.*

1. All the arguments already objected against the stationers, hold good also against the printers, but not fully so strong. That is, they are both parties and judges. Self-ended, (upon experiment) under the temptation of profit. Offenders, as well as the stationers; and, in all abuses of the presse, confederate with them. Beside, they will have the same influence upon searches; and they have probably as little stomach to a regulation, as the other. 'Tis true, the printer's interest is not so great as the stationer's; for where hee gets (it may be) 20 or 25 in the 100 for printing an unlawful book, the other doubles, nay many times trebles his money by selling it: yet nevertheless the printer's benefit lies at stake too.

2. It were a hard matter to pick out twenty master-printers who are both free of the trade, of ability to manage it, and of integrity to be entrusted with it: most of the honestest sort being

impoverished by the late times, and the great business of the press being engross'd by Oliver's creatures.

But they propose to undertake the work upon condition to be incorporate. That is, to be disengaged from the company of stationers, and to be made a society by themselves. It may be answered, that it would be with them as 'tis with other incorporate societies: they would be true to the publick, so far as stands with the particular good of the company. But evidently their gain lyes the other way: and for a state to erect a corporation that shall bring so great a danger upon the publick, and not one penny into the treasury, to ballance the hazzard, were a proceeding not ordinary.

But they offer to give security, and to be lyable to fines. Let that be done, whether they be incorporate or no. In case of failer, they'll be content to lose their privileges. What signifies that, but only a stronger obligation to a closer confederacy? 'Tis true, the printers in a distinct and regulated society may do some good as to the general business of printing, and within the sphere of that particular profession: but the question is here, how to prevent a publick mischief, not how to promote a private trade. But are not printers the fittest instruments in searches? They are, without dispute, necessary assistants, either for retrieving conceal'd pamphlets, or for examination of work in the mettle, but whether it be either for the honour, or safety, of the publick, to place so great a trust in the hands of persons of that quality, and interest, is submitted to better judgments.

To conclude, both printers and stationers, under colour of offering a service to the publick, do effectually but design one upon another. The printers would beat down the bookselling trade, by menaging the press as themselves please, and by working upon their own copies. The stationers, on the other side, they would subject the printers to be absolutely their slaves; which they have effected in a large measure already, by so encreasing the number, that the one half must either play the knaves or starve.

The expedient for this, must be some way to disengage the printers from that servile and mercenary dependence upon the stationers, unto which they are at present subjected. The true state of the business being as follows:—

1. The number of master-printers is computed to be about sixty,\* whereas twenty or twenty-four would dispatch all the honest work of the nation.

2. These sixty master-printers have above one hundred apprentices; (that is, at least twenty more than they ought to have by the law.)

3. There are, beside aliens, and those that are free of other trades, at least one hundred and fifty journey-men, of which number at least thirty are superfluous; to which thirty there will be

added about thirty-six more, besides above fifty supernumerary apprentices, upon the reduction of the master-printers to twenty-four. So that upon the whole reckoning, there will be left a matter of sixty journey-men and fifty apprentices to provide for, a part of which charge might very reasonably be laid upon those who bound or took any of the said number, as apprentices, contrary to the limitation set by authority.

These supernumerary printers were at first introduced by the booksellers, as a sure way to bring them both to their prices and purposes; for the number being greater then could honestly live upon the trade, the printers were enforc'd either to print treason, or sedition, if the stationer offered it, or to want lawful work, by which necessity on the one side, and power on the other, the combination became exceeding dangerous, and so it still continues; but how to dissolve it, whether by barely disincorporating the company of stationers, and subjecting the printers to rules apart, and by themselves; or by making them two distinct companies, I do not meddle.

This only may be offer'd, that in case those privileges and benefits should be granted to both stationers and printers, which they themselves desire in point of trade; yet in regard that several interests are concern'd, that of the kingdom on the one side, and only that of the companies on the other: it is but reason that there should be several superintending powers, and that the smaller interest should give place, and be subordinate to the greater: that is, the master and wardens to menage the business of their respective trade, but withall, to be subjected to some superior officer, that should over-look them both on behalf of the publick.

As the powers of licensing books are by the late act vested in several persons, with regard to the several subjects those books treat of; so may there likewise be several agents authoris'd and appointed for the care of the press, touching these several particulars, under the name and title of surveyors of the press: and every distinct surveyor to keep himself strictly within the limits of his own province. As for example:

1. The lord chancellor, or lord keeper of the great seal of England for the time being, the lords chief justices, and lord chief baron for the time being, or one or more of them, are specially authoris'd to license, by themselves, or by their substitutes, all books concerning the common laws of this kingdom.

Let there be one surveigher of the press constituted peculiarly for that subject.

2. All books of divinity, physique, philosophy, or whatsoever other science, or art, are to be licensed by the lord archbishop of Canterbury, and lord bishop of London for the time being, or one of them, or by their, or one of their appointments, or by either one of the chancellours, or vice-chancellours of either of the universities, for the time being.

Let three other surveighers of the press be likewise authorized for these particulars.

3. All books concerning heraldry, titles of

\* According to the books of the stationers' company. May 12, 1663, there were fifty-nine persons in and about London, exercising the trade of master printers.

honour, and arms, or concerning the office of earl-marshal, are to be licens'd by the earl-marshal for the time being; or in case there shall not then be an earl-marshal, by the three kings of arms, or any two of them, whereof garter to be one. This is to be the subject of another surveigher's care.

4. Books of history, politiques, state-affairs, and all other miscellanies, or treatises, not comprehended under the powers before mentioned, fall under the jurisdiction of the principal secretaries of state, to be allow'd by themselves, or one of them, or by their, or one of their appointments.

The care of the press concerning these particulars may be another surveigher's business; so that six persons may do the whole work, with good order and security. Three substitutes for the bishops, and chancellours, and one a-piece for the rest. A word now touching the encouragement of these officers, and then concerning penalties to be inflicted upon offenders, and rewards to be granted to enformers.

The inward motive to all publique and honourable actions, must be taken for granted to be a principle of loyalty and justice: but the question is here concerning outward encouragements to this particular charge. There must be benefit and power. Benefit, that a man may live honestly upon the employment; and power, for the credit and execution of the trust.

The benefit must arise partly from some certain standing fee; and in part from accessory and contingent advantages, which will be but few, and small, in proportion to the trouble and charge of the employment: for there must be, first, a constant attendance, and a daily labour in hunting out, and over-looking books and presses; and secondly, a continual expense in the enterertainment of instruments for discovery and intelligence, which, being deducted out of the pittances of licenses and forfeitures, will leave the surveigher a very small proportion for his peyns.

The next thing is a power to execute; without which, the law is dead, and the officer ridiculous.

Now concerning penalties and rewards:—

1. The geyn of printing some books is ten times greater, if they scape, then the loss, if they be taken; so that the damage bearing such a disproportion to the profit, is rather an allurements to offend, then a discouragement.

2. As the punishment is too small for the offender, so is the reward also for the enformer; for reckon the time, trouble, and money, which it shall cost the prosecutor to recover his allotment, he shall sit down at last a loser by the bargain, and more than that, he loses his credit and employment, over and above, as a betrayer of his fellows; so great is the power and confidence of the delinquent party.

The way to help this, is to augment both the punishment and the reward, and to provide that the inflicting of the one, and the obeyning of the other, may be both easie and certain; for to impose a penalty, and to leave the way of rayeing it so tedious and difficult, as in this case hitherto

it is, amounts to no more than this: if the former will spend ten pound, 'tis possible he may recover five; and so the prosecutor must impose a greater penalty upon himself then the law does upon the offender, or else all comes to nothing.

An expedient for this inconvenience is highly necessary; and why may not the oath of one credible witness or more, before a master of the chancery, or a justice of the peace, serve for a conviction. Especially the person accused being left at liberty before such oath taken, either to appeal to the privy-council, or to abide the decision. Now to the several sorts of penalties, and to the application of them.

The ordinary penalties I find to be these:—Death, mutilation, imprisonment, banishment, corporal peyns, disgrace, pecuniary mulcts; which penalties are to be apply'd with regard to the quality of the offence, and to the condition of the delinquent. The offence is either blasphemy, heresie, schism, treason, sedition, scandal, or contempt of authority.

The delinquents are the advisers, authors, compilers, writers, printers, correctors, stitchers, and binders, of unlawful books and pamphlets; together with all publishers, dispersers, and concealers of them in general, and all stationers, poets, hackney-coachmen, carriers, boatmen, mariners, hawkers, mercury-women, pedlars, and ballad-singers, so offending, in particular.

Penalties of disgrace ordinarily in practice are many, and more may be added.

Pillory, stocks, whipping, carting, stigmatizing, disablement to bear office or testimony, publique recantation, standing under the gallows with a rope about the neck at a publique execution, disfranchisement (if free-men), cashiering (if souldiers), degrading (if persons of condition), wearing some badge of infamy, condemnation to work either in mines, plantations, or houses of correction.

Under the head of pecuniary mulcts, are comprehended forfeitures, confiscations, loss of any beneficial office or employment, incapacity to hold or enjoy any; and finally, all damages accruing, and impos'd, as a punishment for some offence.

Touching the other penalties before-mention'd, it suffices only to have nam'd them, and so to proceed to the application of them, with respect to the crime, and to the offender.

The penalty ought to bear proportion to the malice, and influence of the offence, but with respect to the offender too; for the same punishment (unless it be death itself) is not the same thing to several persons, and it may be proper enough to punish one man in his purse, another in his credit, a third in his body, and all for the same offence. The grand delinquents are, the authors or compilers (which I reckon as all one) the printers, and stationers.

For the authors, nothing can be too severe that stands with humanity and conscience. 1. 'Tis the way to cut off the fountain of our troubles. 2. There are not many of them in as age, and so the less work to do.

The printer and stationer come next, who, beside the common penalties of mouy, loss of copies, or printing materials, may be subjected to these further punishments.

Let them forfeit the best copy they have, at the choice of that surveigher of the press under whose cognisance the offence lyes; the profit whereof the said officer shall see thus distributed, one third to the king, a second to the enformer, reserving the remainder to himself.

In some cases, they may be condemn'd to wear some visible badge, or marque of ignominy, as a halter instead of a hatband, one stocking blew and another red; a blew bonnet with a red T or S upon it, to denote the crime to be either treason or sedition: and if at any time the person so condemned shall be found without the said badge or marque during the time of his obligation to wear it, let him incur some further penalty, provided only, that if within the said time he shall discover and seize, or cause to be seized, any author, printer, or stationer, liable at the time of that discovery and seizure, to be proceeded against for the matter of treasonous or seditious pamphlets, the offender aforesaid shall, from the time of that discovery be discharg'd from wearing it any longer.

This proposal may seem phantastique at first sight; but certainly there are many men who had rather suffer any other punishment than be made publicly ridiculous.

It is not needful here to run through every particular, and to direct in what manner and to what degree these and other offenders in the like kind shall be punished, so as to limit and appropriate the punishment; but it shall suffice, having specif'd the several sorts of offenders and offences, to have laid down likewise the several species of penalties, sortable to every man's condition and crime.

Concerning rewards, something is said already, and I shall only add for a conclusion, that they are every jot as necessary as punishments, and ought to be various, according to the several needs, tempers, and qualities, of the persons upon whom they are to be conferr'd. Money is a reward for one, honour for another; and either of these misplac'd, would appear rather a mockery than a benefit."—THE END.

The powers which he obtained by the above appointment were the sole licensing of all ballads, charts, printed portraictures, printed pictures, books, and papers; except books concerning common law, affairs of state, heraldry, titles of honours, and arms, the office of Earl Marshal, books of divinity, physick, philosophy, arts and sciences, and such as are granted to his majesty's peculiar printer; and except such books as by a late act of parliament are otherwise appointed to be licensed. He had also a grant of "all the sole privilege of writing, printing, and publishing, all narratives, advertisements, mercuries, intelligencers, diurnals, and other books of public intelligence; and printing all ballads, plays, maps, charts, portraictures, and pictures, not previously printed; and all

briefs for collections, playbills, quacksalvers bills, custom and excise bills, post-office bills, creditors bills and tickets in England and Wales; with power to search for and seize unlicensed and treasonable, schismatical and scandalous books and papers."—*Bagford's Collections, in Harl. Manuscripts*, 5910, vol. ii.

The first-fruits of this new appointment appeared in the *Intelligencer*; published for the satisfaction and information of the People, with privilege. By Roger L'Estrange, Esq. Nos. 1 and 2, Aug. 31, and Sept. 3; and on the Thursday following appeared the *News*, published for satisfaction and information of the people, with Privilege. No. 1. Thus the *Intelligencer*, and the *News*, continued to be published, the one on Monday, the other on Thursday, till the beginning of Jan. 1666; when the publication of L'Estrange was superseded by the *Gazette*.

The *Prospectus* prefixed by sir Roger L'Estrange to the first number of the *Intelligencer*, far from the modern refinements of the present day, sets out by treating its readers with perfect contempt; with a gross insult on the public taste; and by such restrictions on the liberty of the press, as in these times of real liberty would not for a moment be tolerated. "His sacred majesty," says the important patentee, "having been lately and graciously pleased to grant and commit the privilege of publishing all intelligence, together with the survey and inspection of the press,\* to one and the same person; it may be good discretion, I suppose, for the person so intrusted, to begin (as his first step toward the work) with some considerations and advertisements, by way of preamble and introduction to the future order and settlement of the whole affair. First, as to the point of printed intelligence, I do declare myself, (as I hope I may, in a matter left so absolutely indifferent, whether any or none) that, supposing the press in order, the people in their right wits, and news or no news to be the question, a public Mercury should never have my vote; because I think it makes the multitude too familiar with the actions and counsels of their superiors, too pragmatical and censorious, and gives them, not only an inch, but a kind of colourable right and licence to be meddling with the government. All which (supposing as before supposed) does not yet hinder, but that in this juncture a paper of that quality may be both safe and expedient; truly, if I should say necessary, perhaps the case would bear it; for certainly there is not any thing which at this instant more imports his majesty's service and the publick, than to redeem the vulgar from their former mistakes and delusions, and to preserve them from the like for the time to come: to both which purposes the prudent management of a *Gazette*† may contribute in a very high degree: so that, upon the main, I perceive the thing requisite, and (for ought I

\* L'Estrange first occurs in the stationers' books, in the character of a licenser, Oct. 30, 1663. His predecessor was sir John Birkenhead.

† This was before that title was adopted in England.

can see yet) once a week may do the business, for I intend to utter my news by weight, and not by measure. Yet if I shall find, when my hand is in, and after the planting and securing of my correspondents, and the matter will fairly furnish more, without either uncertainty, repetition, or impertinence, I shall keep myself free to double at pleasure. One book a week may be expected however; to be published every Thursday, and finished upon the Tuesday night, leaving Wednesday entire for the printing it off. The way as to the vent, that has been found most beneficial to the master of the book, has been to cry and expose it about the streets, by mercuries and hawkers; but whether that way be so advisable in some other respects, may be a question: for, under countenance of that employment, is carried on the private trade of treasonous and seditious libels; nor, effectually, has any thing considerable been dispersed, against either church or state, without the aid and privacy of this sort of people. Wherefore, without ample assurance and security against this inconvenience, I shall adventure to steer another course. In the mean time, to prevent mischief (as far as in me lies), and for their encouragement that shall discover it, take these advertisements of encouragement to the discovery of unlawful printing:—1. If any person can give notice, and make proof, of any printing press erected and being in any private place, hole, or corner, contrary to the tenor of the late act of parliament for the regulating of printing and printing presses; let him repair with such notice, and make proof thereof, to the surveyor of the press, at his office at the Gun in Ivy-lane, and he shall have forty shillings for his pains, with what assurance of secrecy himself shall desire.—2. If any such person as aforesaid shall discover to the said surveyor any seditious or unlawful book to be upon such a private press imprinting, and withal give his aid to the seizing of the copies and the offenders; his reward shall be five pounds.—3. For the discovery and proof of any thing printing without authority or licence, although in any public house, ten shillings.—4. For the discovery and proof of any seditious or unlawful book to be sold or dispersed by any of the mercuries or hawkers, the informer shall have five shillings."

It is but justice to add, that the papers of sir Roger L'Estrange contained more information, more entertainment, and more advertisements of importance, than any succeeding paper whatever, previous to the golden age of letters, which may be said to have commenced in the reign of queen Anne.

1663, Feb. 20. At the sessions in the Old Bailey, JOHN TWYNN, printer, was indicted for high treason; and THOMAS BREWSTER, bookseller; SIMON DOVER, printer; and NATHAN BROOKS, bookbinder, for misdemeanors. The act laid in the indictment was the printing of a seditious, poisonous, and scandalous book, entitled, *A Treatise of the execution of Justice is as well the people's as the magistrates' duty; and if the magistrates prevent judgment, then the*

*people are bound by the law of God to execute judgment without them, and upon them.* The sentence upon Twynn was, "That he be led back to the place from whence he came, and from thence to be drawn upon an hurdle to the place of execution; and there to be hanged by the neck, and being alive, to be cut down, and his privy members to be cut off, his entrails to be taken out of his body, and he living, the same to be burnt before his eyes; his head to be cut off, his body to be divided into four quarters, and his head and quarters to be disposed of at the pleasure of the king's majesty."—Simon Dover, Thomas Brewster, and Nathan Brooks, were further indicted for printing and publishing one book, called, *The Speeches and Prayers of Harrison, Cook, Hugh Peters, and others condemned for the murder of the late King*; and another book, called *The Phoenix; or, Solemn League and Covenant*. They were again found guilty, and lord chief justice Hyde, in passing sentence, made the following remark:—"You three, Thomas Brewster, Simon Dover, and Nathan Brooks; you have been severally indicted for a heinous and great offence: Brewster, you have been indicted for two several books, as full of villany, and slander, and reproach to the king and government, as possibly can be: And I will tell you all three, it is the king's great mercy you have not been indicted capitally; for every one of those are books filled with treason, and you for publishing of them, by strictness of law, have forfeited your lives and all to the king: It is his clemency towards you. You may see the king's purposes; he desires to reform, not to ruin his subjects. The press is grown so common, and men take the boldness to print whatever is brought to them, let it concern whom it will, it is high time examples be made. I must let you and all men know, by the course of the common law, before this new act was made, for a printer, or any other, under the pretence of printing, to publish that which is a reproach to the king, to the state, to his government, to the church, nay to a particular person, it is punishable as a misdemeanour. He must not say He knew not what was in it; that is no answer in law. I speak this, because I would have men avoid this for time to come, and not think to shelter themselves under such a pretence. I will not spend time in discouraging of the nature of the offence, it hath been declared already; it is so high, that truly the highest punishment that by law may be justly inflicted, is due to you. But, Thomas Brewster, your offence is double: Therefore the judgment of the court is,

"That you shall pay to the king, for these offences committed, an hundred marks: And for you (the other two), Simon Dover and Nathan Brooks, you shall pay either of you a fine of forty marks to the king.

"You shall each of you severally stand upon the pillory from eleven to one of the clock in one place at the Exchange, and another day (the same space of time) in Smithfield; and you

shall have a paper set over your hats, declaring your offence, for printing and publishing scandalous, treasonable, and factious books against the king and state.

"You shall be committed till the next gaol-delivery without bail; and then you shall make an open confession and acknowledgment of your offences in such words as shall be directed you.

"And afterwards you shall remain prisoners during the king's pleasure: And when you are discharged, you shall put in good security by recognizances, yourself £400 a-piece, and two securities each of you of £200 a-piece, not to print or publish any books, but such as shall be allowed of." And this is the judgment of the court.

1663, April 8. This is the date of the first printed play bill that was issued from Drury lane theatre. The play was the *Humorous Lieutenant*, and commenced at three o'clock. The prices of admission were, boxes, 4s. pit, 2s. middle gallery, 1s. 6d. gallery, 1s.

Previous to this the announcement of the evening's or rather afternoon's entertainment, was not circulated by the medium of a diurnal newspaper, as at present, but broadsides were pasted up at the corners of the street to attract the passer-by. The puritanical author of a *Treatise against Idleness, Vaine Playes, and Interludes*, printed in black letter, without date, but possibly anterior to 1587, proffers an admirable illustration of the practice.—"They use," says he, in his tirade against the players, "to set up their bills upon postes some certain dayes before, to admonish the people to make resort to their theatres, that they may thereby be the better furnished, and the people prepared to fill their purses with their treasures." The whimsical John Taylor, the water-poet, under the head of Wit and Mirth, also alludes to the custom.—"Master Nat Field, the player, riding up Fleet-street at a great pace, a gentleman called him, and asked what play was played that day. He being angry to be stay'd on so frivolous a demand, answered, that he might see what play was played on every poste. I cry your mercy, said the gentleman, I took you for a poste, you rode so fast."

It may naturally be inferred, that the emoluments of itinerant players could not afford the convenience of a printed bill, and hence from necessity arose the practice of announcing the play by beat of drum. Will. Slye, who attended Kempe in the provincial enactment of his "Nine Men of Gotham," is figured with a drum. Parolles, in Shakspeare's "All's Well that ends Well," alludes to this occupation of some of Will. Slye's fellows, "Faith, sir, he has led the drum before the English comedians."

In the "Twelfth Night," Malvolio says, "He'll stand at your door like a sheriff's post," &c. It was the custom for that officer to have large posts set up at his door as an indication of his office, the original of which was, that the king's proclamations and other public acts might be affixed thereto. From these terms are derived the modern name of *posting-bills*.

1663. An act was passed, which amongst other obnoxious clauses, directed that, in future, "Every printer should send *three copies* of every book new printed, or reprinted with additions, to the stationers' company, to be sent to the king's library, and the vice chancellors of the two universities of Oxford and Cambridge. The first entry of books on the stationers' records, took place on the 1st of December, 1663.

1663. A precept from the lord mayor was received, for sending ten members of the company of stationers, substantially horsed, and apparelled in velvet coats and chains of gold, to attend his lordship, and wait on the king and queen, at their return from their progress. A court was accordingly called for their nomination.

1663. Nov. 20. *Mercurius Rusticus*. In this paper appears the following singular advertisement: Newly published, the second part of *Hudibras*, by the author of the former, which, if possible, has cut down the first. Sold by John Merlin and James Allestry, at the Bell, St. Paul's church yard.

Pepys, in his *Diary* of the date of Nov. 28, says, "To Paul's church yard, and there looked over the second part of *Hudibras*, which I buy not, but to borrow to read, to see if it be as good as the first, which the world cried up, though it hath a good liking in me."

1664, March 10. *A Tryal of Witches,\* at the Assizes held at Bury St. Edmund's, for the county of Suffolk*. Before sir Matthew Hale, knt. Then lord chief baron of his majesty's court of exchequer. Taken by a person then attending the court. London: Printed for William Shrewsbury, at the Bible, in Duck lane.

1682. This curious tract, with many others, have been lately reprinted, with an Appendix, at the private press of Charles Clark, at Great Totham, Essex. 8vo. 2s. 6d. Only one hundred copies were printed. London: Longman and Co. The reprints of Mr. Clark (author of *Epsom Races*, a poem) are very well executed, and do great credit to his typographical skill, as well as to his judgment and learning. They are only printed upon one side the paper.

1664. *Common Prayer* in the Welch language, black letter. London.

In the beginning of this book is wrote as follows, viz. Memorandum, that "PETER BODVEL, the undertaker of this book was a Presbyterian bookseller at Chester, and often bragged of comparing the king to an owl, the royal family to cranes, and the clergy and their followers to apes, by the capitals in the Morning and Evening service at the beginning of these prayers."

The black letter at this time began to give

\* *The Discovery of Witches, in answer to severall Queries lately delivered to the judges of Assize for the county of Norfolk; and now published by Matthew Hopkins, of Mannington, Essex, Witche Finder, for the benefit of the whole nation*. London, 1647. Reprinted verbatim, with an Appendix from the original edition, with a portrait of Hopkins, from a print in the Pepysian library at Magdalen college, Cambridge. Printed at the private press of Charles Clark, Great Totham, Essex. London: Longman and Co. 8vo. 2s. 6d. Printed on one side the paper.

way to the roman. Beza's Bible, in small 4to. was one of the first which appeared in this letter, with small neat wooden cuts.

1664. From a newspaper printed in this year, we obtain an account of the extent of bookselling carried on in Little Britain, London. It says 460 pamphlets were published there within four years. Bookselling in Little Britain might have emanated from John Day, the eminent printer, who lived over Aldersgate, in the immediate vicinity. Little Britain was as remarkable for booksellers through the reigns of Charles I. Charles II. James II. and William and Mary, as Paternoster row is at present. The honourable Mr. North, in the first volume of the *Gentleman's Magazine*, 1731, says, "the race of booksellers in Little Britain is now almost extinct; honest Ballard, well known for his curious divinity catalogues, being their only genuine representative." Again he says, "Little Britain was, in the middle of the last century, a plentiful and learned emporium of learned authors; and men went thither as to a market. This drew to the place a mighty trade; the rather because the shops were spacious, and the learned gladly resorted to them, where they seldom failed to meet with agreeable conversation."

1665, Jan. *Journal des Savans*, par le Sieur Hédouville (Denis Sallo) et continué par J. Gallois, de la Roque, L. Cousin, Dupin, Fontenelle, de Vertot, Terrasson, Burette, du Resnel, des Fontaines, Trublet, Monerif, de Guignes, Bonguer, Clairaut, Dupuy, Macquer, de La-lande, &c. Paris, 1665-1792, 111 vols. 4to.

The origin of many of the journals was the project of Denis de Sallo, a counsellor in the parliament of Paris. He published his Essay in the name of the sieur de Hedouville, his footman! Was this a mere stroke of humour, or designed to insinuate that the freedom of his criticism would only be allowed in a footman? This work however, met with so favourable a reception, that Sallo had the satisfaction of seeing it the following year, imitated throughout Europe, and his journal, at the same time, translated into various languages. But as most authors lay themselves open to an acute critic, the animadversions of Sallo were given with such asperity of criticism, and such malignity of wit, that this new journal excited loud murmurs, and the most heart-moving complaints. Denis de Sallo, after having published only his third volume, felt the wasps of literature thronging so thick about him, that he very gladly abdicated the throne of Criticism. Intimidated by the fate of Sallo, his successor, Abbe Gallois, flourished in a milder reign. He contented himself with giving the titles of books accompanied with extracts; and was more useful than interesting. \* \* \* This work was carried to a vast extent. A curious Index has been formed occupying several volumes in 4to. and may be considered as a very useful instrument to obtain the science and literature of this century.—*Curiosities of Literature*, vol. i. p. 22.

A re-impression of the *Journal des Savans*,

combined with the *Memoires de Trevoux*, (from Jan. 1764 to December, 1763) was published at Amsterdam, in 79 vols. 12mo.; comprising a volume of Index.

1665. *The Philosophical Transactions* was the first periodical work of Science published in England, and continued for many years in numbers, monthly, quarterly, or annually, as materials were supplied.

1665. The reverend THOMAS TRIPLETT gave to the stationers' company £20 for the use of the poor; and in 1668, he further gave £100 to the same purpose. This gentleman was born in or near Oxford, and was beyond doubt in some way related to Robert Triplett, stationer or book-binder, at the sign of the Aqua Vitæ Still, near Olde Fish-street, whose name occurs in a book without date, about the year 1587. Dr. Thomas Triplett obtained many church preferments, and died July 18, 1676.

1665, Oct. 27. The act of parliament received the royal assent which confirmed "the right of the king's prerogative in printing."

Charles II. issued many proclamations for various purposes, but the most remarkable, are those which concern the regulations of coffee-houses, and are for putting them down, on purpose to restrain the spreading of false news and licentious talking of state and government; the speakers and the hearers were made alike punishable. This was highly resented as an illegal act by the friends of civil freedom, who succeeded in obtaining the freedom of the coffee-houses, under the promise of not sanctioning treasonable speeches. In this year was passed the *Five-mile Act* for the prevention of seditious preaching within five miles of any town sending members to parliament.

1665. RICHARD CARPENTER, a poet and divine, who flourished at this period, published a work entitled, *Experience, History, and Divinity; or the Downfall of Popery*, in four volumes 8vo., in which the following curious passage occurs in his list of errata, and will remind the reader of some passages quoted by Cervantes from the Spanish romances:—"I humbly desire all clean hearted and right spirited people, who shall read this book, (which because the press was oppressed, seems to have been sup-pressed, when it was by little and little im-pressed, but now at last truly pressed through the press into public) to correct the following errata," &c. Richard Carpenter was born early in this century, was first at Eton, and afterwards elected to King's college, Cambridge. He was the author of many singular tracts and sermons, one of which was entitled, *The Anabaptist Washed, and Shrunk in the Washing*. Quitting England, he became a convert to the church of Rome, in which he took orders, and became a monk of the order of St. Benedict; he was sent to England as a missionary, when he recanted, and obtained a vicarage in Sussex. On the rebellion, returning to Paris, he once more declared himself a Catholic, and at the restoration again settled himself as a zealous Protestant at Aylesbury.

in Buckinghamshire. He wrote a comedy, called the *Pragmatical Jesuit*, and changed his religion once more, dying a Catholic at last.

1665, Nov. 7—14. The *Oxford Gazette*, No. 1. This *Gazette* began to be published twice a week, by Leonard Litchfield, in a folio half-sheet, the first of which (undated) contains the news of Nov. 7—14, 1665, the king and queen, with the court, being then at Oxford; and was reprinted in London, by Thomas Newcomb, "for the use of some members and gentlemen who desired them:" but upon the removal of the court to London, it was called the *London Gazette*; the first of which (No. 24, Feb. 1—5,) was published on a Monday, the Oxford one having been published on a Tuesday. The *Oxford* and *London Gazettes* were for several years entered in the stationers' register as the property of Thomas Newcomb in the Savoy, who had formerly published for Thurloe, and whose name continues as printer till July 19, 1688.

RICHARD ALLEN, a clergyman of the church of England, who was ejected from the living of Batcomb, in Dorsetshire, for nonconformity, published a religious tract, entitled a *Vindication of Godliness*, which was, and is, in high reputation among persons of Calvinistic sentiments. It consists of three parts, published in 1664—6. As it was printed without a license, the king's bookseller, Richard Royston, caused the copies to be seized, but afterwards purchased them from the king's kitchen, where they were sent as waste paper, and bound them up and sold them; being, however, discovered, he was obliged to make subversion to the privy council, and the books were ordered to be destroyed.

1666. H. HALL, printer to the university of Oxford, printed an edition of the *New Testament* in the Turkish language. 4to. This translation appears to have been first suggested to the translator, Mr. William Seaman, by sir Cyril Wiche, and to have been completed under the patronage of the hon. Robert Boyle; who proposed to print it at his own expense, but relinquished that honour to the Levant company, at their request, though he contributed £60 towards the publication of it.

1666. MILES FLESHER gave to the stationers' company two silver salts.—"This bowle and collar was made in the year 1721 out of two large salts the gift of Miles Flesher, printer to the worshipful company of stationers in the year 1666." To this gentleman the elder Mr. Bowyer was an apprentice.

1666. About this period, under the administration of the duke of Buckingham, the following extraordinary prosecution, for a singular libel, occurred. Some fiddlers, at Staines, were indicted for singing scandalous songs of the duke. The songs also did not fail to libel both the king and his brother the duke of York. The bench were puzzled how to proceed. The offensive passages they would not permit to be openly read in court, lest the scandals should spread. It was a difficult point to turn. The judges were anxious that the people should see

that they did not condemn these songs without due examination. They hit upon this expedient. Copies of the songs were furnished to every lord and judge present; and the attorney-general in his charge, when touching on the offending passages, did not, as usual, read them out, but noticed them by only repeating the first and final lines, and when he had closed, they were handed to the fiddlers at the bar, interrogating them whether these were not the songs which they had sung of the duke? To this they confessed, and were condemned in a heavy fine of £500, and to be pilloried and whipped. This novel and covert mode of trial excited great discontent among the friends of civil freedom.

1666, Sept. 2. The hall of the company of stationers shared in the dreadful conflagration of the great fire of London,\* and the first court, October 2, was held at Cooks' Hall; and afterwards at St. Bartholomew's hospital, in the *lame hospital hall*. On December 21, all the ruined ground, as well belonging to the hall,† as to the other tenements of the company of stationers destroyed by the late dreadful fire, was ordered to be forthwith cleared away, and measured. By this calamity, the booksellers dwelling about St. Paul's lost an immense stock of books in quires, amounting, according to Evelyn and lord Clarendon, to £200,000, which they were accustomed to stow in the vaults of the cathedral, and other churches.

1666, Oct. 23. A paper entitled *The Case and Proposals of the Free Journeymen Printers in and about London*, was published this day, from which it appears that the entire number of working printers, who had served a regular apprenticeship, then resident in and about London, was no more than 140;‡ There were, to be sure, in addition, some "foreigners," as they were called, that is, workmen who had not obtained their freedom by their serving a regular apprentice-

\* This visitation consumed 406 streets, 12,900 dwelling-houses, and 89 churches, with the city gates, &c. It began at the house of the king's baker (Paryner), at two o'clock of the morning, in Pudding-lane, and stopped at the Temple, called Fye-corner. The fire destroyed the plague most righteously. On the 23rd of October William Lilly, the astrologer, was examined before a committee of the house of commons, respecting the causes of the fire of London, which he had predicted in hieroglyphic. At this time religious prejudices warped the minds of the people, and they listened eagerly to the malicious reports that were circulated; and as popery was then the alleged object on which slander could rest her suspicions, on the monument which perpetuates this sad event, it stands recorded, from the pen of Dr. Thomas Gale, afterwards dean of York, that "the burning of this Protestant city was begun and carried on by the treachery and malice of the popish faction." Next to the guilt of him who perpetrates an atrocious crime, is the guilt of those who charge it on the innocent.

† Mr. Hansard, in his *Typographie*, has preserved a curious relic, the real original block of Stationers' Hall before the fire; and, says that gentleman, "while it presents a resemblance of the old elevation, furnishes at the same time, a specimen of wood engraving of former days."

‡ According to the population returns for 1831, the number of printers then in the metropolis was 5628, or probably more than twenty times the number it contained in 1666; and by the same census the population of Ireland amounted to 7,767,401, of which there were engaged in paper making about 600 persons, and in letter-press printing 914.

ship; but they are not spoken of as very numerous. The paper is a remonstrance against any such interlopers being allowed to be employed.

1666. JOHN FORBES, who had succeeded Mr. Brown\* as printer to the town of Aberdeen, was among the first Scottish printers who were possessed of music-types; and printed in this year a *Collection of cantos and songs set to music, with a brief introduction to the art as taught by Thomas Davison in the music school of Aberdeen*: which work he reprinted in the year 1682.

1666, Feb. 1—5. *The London Gazette*, No. 24.

1666, June 4. *The Current Intelligencer*.

1666. *Intelligence*, by J. Macock.

1667, April 27. Milton executes this day the contract disposing of the copy-right of his *Paradise Lost* to Samuel Simmons, a printer and stationer of London, for the present sum of five pounds, and five pounds more when 1300 copies of the first impression should be sold in retail, and the like sum at the end of the second and third editions, to be accounted as aforesaid; and that [each of] the said first three impressions shall not exceed fifteen books or volumes of the said manuscript. The price of the small 4to. edition was 3s. in plain binding.

This national epic, when ready for the press, was nearly being suppressed through the ignorance and malice of the licenser, who saw or fancied treason in the following noble simile of Satan with the rising sun, in the first book:—

As when the sun, new risen,  
Looks through the horizontal misty air,  
Shorn of his beams; or from behind the moon,  
In dim eclipse, disastrous twilight sheds  
On half the nations, and with fear of change  
Perplexes monarchs.

The second edition, which was brought out under the superintendence and correction of the author, in 1674, is ushered in by two copies of verses; the first in English, by Andrew Marvel; and the second in Latin, by Samuel Barrow, physician to the army under General Monk, and who had been actively concerned in bringing about the restoration; in the latter of which the poem is expressly placed "above all Greek, above all Roman fame." Dryden, the poet-laureat, and the most popular writer of verses in that period, had, with the author's permission, turned Milton's story into an opera, entitled the *State of Innocence*, which was also published in 1674. In the preface to this performance, Dryden observes—"What I have here borrowed will be so easily discerned from my mean produc-

tions, that I shall not need to point the reader to the places, the original being undoubtedly one of the greatest, most noble, and sublime poems, which either this age or nation has produced."

This is one of the earliest authenticated instances of a copy-money being given by previous agreement for an original work. Posterity, in its real or fictitious admiration of Milton, has set down this bargain as in the highest degree disgraceful to Mr. Simmons; but when we learn that the first impression of the poem does not seem to have been fully sold off before the expiration of seven years, nor till the bookseller had given it five new title-pages by way of wets to the public appetite, the transaction will appear quite accordant with the natural course of things at the period. The second five pounds was received by Milton, and no further profit was realised by the family, except eight pounds, for which sum his widow, in 1680, resigned to Simmons the full copyright. The *Paradise Lost* may therefore be said to have been sold to the trade\* for eighteen pounds. Sir Walter Scott, in his *Life of Dryden*, remarks, that probably the trade had no very good bargain of it. The copyright, however, afterwards fell into the hands of Jacob Tonson, who, according to Mr. D'Israeli, rode in his carriage from the profits.

However ill paid Milton might have been, the editors of that poet were better rewarded: Dr. Bentley, got one hundred guineas for his edition; and Dr. Newton no less than six hundred and thirty pounds for the *Paradise Lost*, and one hundred and five pounds for the *Regained*.

It was an extraordinary misjudgment of the celebrated Waller, who speaks thus of the first appearance of *Paradise Lost*:—"The old blind schoolmaster, John Milton, hath published a tedious poem on the Fall of Man: if its length be not considered as its merit, it has no other."—Poor Milton was obliged to keep school for his livelihood.

1667. Wisingsburg, an island in the lake of Wetter, in the province of Jönköping, in Sweden. Its proprietor, the count Peter Brahe, who is called Drotzetus regni, having established a school at this place, in the year 1666, for the furtherance of literature erected there a press of his own, which continued until 1681, when the island was ceded to Sweden. In 1688 the press was removed to Jönköping. The first printer was Johannes Kankel, himself a learned man, who declares the first specimen of his press to be *Itinerarium Nicolai Matthiæ Kiöpingi*, dated 1667. Gestrin and Axner, who published a special dissertation on the Wisingsburg printing establishment, (4to. Upsal, 1733,) enumerate and describe twenty-eight books, executed here, chiefly in the Swedish language, declaring at the same time that all of them are rare, and some of them extremely so, from the small number of copies which were struck off.

\* Mr. Brown died in 1662, when John Forbes, stationer, purchased from Agnes Rutherford, his widow, the whole types, printing-presses, and apparatus, which had belonged to her husband; and on the 23d of April, that year, Mr. Forbes and his son jointly, were appointed by the magistrates and council, printers to the town and universities, with the exclusive privilege of printing. As an encouragement to prosecute the business, they were provided with a printing-office on the north side of the Castle-street, and a dwelling-house, rent free; and by an act of council all merchants and chapmen were prohibited from importing into the town any pamphlets or small books to their prejudice.—Kennedy's *Annals of Aberdeen*.

\* The booksellers, having much commercial intercourse with each other, have acquired a habit of terming themselves *the trade*, in contradistinction to the public.

1667, April 2. A precept was received by the master and wardens of the stationers' company to attend the lord mayor, for receiving his majesty's pleasure about rebuilding their hall.

1667, May 2. *Died*, GEORGE WITHERS, a poet of some eminence, who was imprisoned for his first work, called *Abuses Whipt and Stript*, but still continued to write satires and eclogues in prison. Sir John Denham begged his life that it might be said that there was a worse poet living than himself. The following inscription is from a collection of rare portraits in the Cracherode collection, in the British museum:—

No matter where the world bestowes her praise,  
Or whom she crowns with her victorious bayes:  
For be that fearless hath opposed the crimes  
And cheekt the gyant vices of the tymes;  
He that unchanged bath afflictions borne,  
That smiles on wants, that laughs contempts to scorne,  
And hath most courage when most perills are,  
Is he that should of right the laurel weare.

The motto of George WITHERS was, "I grow and wither both together."

1667, July 28. *Died*, ABRAHAM COWLEY, a writer of considerable note, whom Dr. Johnson places at the head of our metaphysical poets. Cowley is sometimes sublime, always moral, and frequently witty; his poems possess great shrewdness, ingenuity, and learning; yet, though they frequently excite our admiration, they seldom convey pleasure. The Anacreontics (gay trifles in the manner of the Greek poet Anacreon) are reckoned the best. He wrote a comedy called the *Cutler of Coleman Street*. His prose works extend but to sixty folio pages, and consist of a *Discourse on the government of Cromwell*, and a *Proposition for the advancement of Experimental Philosophy*. In these essays it is allowed that he writes with more natural ease, and is therefore more successful in prose than in verse. He was born in London in 1618, where his father was an apothecary, and received his education first at Westminster school, and afterwards at Trinity college, Cambridge, from whence he was ejected for his loyalty, and then went to Oxford, where he materially served the royal cause. He afterwards went to France, and on his return, in 1656, he was committed to prison, from whence he was bailed by Dr. Scarborough. In 1657 he obtained the degree of M. D. from the university of Oxford. At the restoration he obtained a lease of a farm at Chertsey, valued at £300 a-year, where he died. His remains were deposited in Westminster abbey, and a monument erected to his memory.

1667, Aug. 10. The charter of the stationers' company was exemplified, at the request of Humphry Robinson, master, and Evan Tyler and Richard Royston, wardens.

1667, Aug. 13. *Died*, JEREMY TAYLOR, bishop of Downe and Connor, in Ireland, and one of the most admired English writers, especially in the department of theology. He was born of poor parents at Cambridge, between the years 1600 and 1610, and through his attention to learning procured the friendship of archbishop

Laud, who obtained for him a fellowship of All Souls' college, Oxford. Being devoted to the royal cause he was obliged to live in obscurity during the time of the commonwealth, and for his support he taught school in Carmarthenshire. He afterwards went to Ireland in the suit of lord Conway; and at the restoration, (1661) he was raised to the episcopal bench. The principal work of bishop Taylor, is the *Liberty of Prophecy*, which is remarkable as being the first treatise published in England, in which it was assumed, and attempted to be proved, that no man has a right to prescribe the religious faith of another, or prosecute him for difference of opinion. His other works are, the *Rule and Exercise of Holy Living*, and the *Rule and Exercise of Holy Dying*, besides many sermons. An eminent critic says of bishop Taylor, that, "in one of his prose folios, there is more fine fancy and original imagery—more brilliant conceptions and glowing expressions—more new figures and new applications of old figures—more, in short, of the body and soul of poetry, than in all the odes and epics that have since been produced in Europe."

1668. The company of stationers gave directions, "that the beadle do give notice to every printer, to reserve in his custody THREE of every book by him printed, of the best and largest paper, according to the act of parliament at Oxford in 1665.

1668, April 2. Amongst other libertine libels there was one now printed and thrown about, called a *Bold Petition of the poor W—es to Lady Castlemaine*: written, it would appear, by Evelyn himself.—Evelyn's *Diary*.

1668. The earliest English publication which has any claim to be considered as an annual register, is Edward Chamberlayne's *Anglicæ Notitiæ*, or the *Present State of England*, which continued to be annually published, with the requisite alterations, till the year 1703 inclusive. This work, however, presented merely an account of the country in its existing state, with the list of public functionaries, &c.

1668. The art of printing introduced into the episcopal town of LUND, capital of Schonen, in Sweden. In 1666, Charles XI. founded an university in this town, and the new academy immediately looked round for a printer. In 1668 they established in that capacity VITUS HABERGER from Malmoe. Troublesome times, however, prevented this printer from continuing long at Lund, from whence having retired to Malmoe after a sojourn of only eight years, in 1687 he removed his press to Carlsrona, *ut Ammiralitatibus fieret typographus*; but not succeeding to his expectation, he returned once more to Malmoe. At Lund, Peter Winstropius, bishop of Scania, erected a printing-office of his own for the express purpose of printing some *Pandects on St. Matthew's Gospel*, the first volume of which appeared in 1666. George Schroeder, who afterwards directed this press, was imprisoned for publishing some seditious or treasonable pamphlets during the war with Denmark, and

the press was moved to Malmoe. Fortia, in his *Travels in Sweden*, mentions a rare work printed at Lund in the year 1682, entitled *Lisera polygamia triumphatrix*, which was publicly burnt at Stockholm: a copy however was preserved in the royal library of that city.

1668, April 7. Died, Sir WILLIAM DAVENANT, poet laureat, and author of *Gondibert*, a heroic poem, which he finished while a prisoner in Carisbrooke castle, Isle of Wight, having been taken prisoner while fighting in the royal army, and narrowly escaped with his life. During the interregnum, Davenant was still considered as the laureat by his own party. After his death, the office of poet laureat, with that of royal historiographer, was conferred upon Dryden, a salary of £200 being appointed, in addition to the butt of wine, for the united offices. The patent bore a retrospect of the term after Davenant's demise, and is declared to be to "John Dryden, master of arts, in consideration of his many acceptable services theretofore done to his present majesty [Charles II.], and from an observation of his learning and eminent abilities, and his great skill and elegant style, both in verse and prose." He was born at Oxford, March 3, 1666, and is supposed, (though erroneously,) to have been a son of Shakspeare; his father was a vintner, and sir William was knighted for his loyalty and attachment to the house of Stuart.

1668, May 18. In the *Gazette* of this day Mr. Ogilby's lottery of books is announced, which was the first of the kind in England; the shares were five shillings each, the value of the books was £13,700, and the number of lots was 3368. The highest prize was books to the amount of £51, the second £49, &c. &c.

1668. *The Mercury; or, Advertisements concerning trade.*

1669. *London Mercury, City and Country Mercury.*

1669, July 22. *The Faithful Mercury, imparting News foreign and domestick.*

1669. *The English Intelligence*, by Thomas Burnell.

1670. THOMAS COWLEY gave a legacy of £100 to the poor of the stationers' company.

1671. ANDREW ANDERSON, who had served his apprenticeship in the city of Glasgow, went to Edinburgh, and prevailed on the printers of that city to apply for a patent, to be taken out in his name, by which they were to be jointly vested with the office of king's printer. Having succeeded in their application, they, in this year, obtained a patent so extensive that no one in the kingdom was at liberty to print any book, from a bible to a ballad, without a licence from Andrew Anderson. He printed a *New Testament* so full of errors, that the privy council prohibited the sale of it. His patent was afterwards restricted to *Bibles and Acts of Parliament*, and to be in force for forty-one years.

1671. HUMPHRY ROBINSON. Young Mr. Robinson gave £10 to the company of stationers to be bestowed on a piece of plate in memory of

his father. A silver tankard was purchased weight 34 ounces 10 pennyweights.

1671. *The Protestant Oxford Intelligence; or Occurrences foreign and domestick*, by Thomas Benskin.

1672, Jan. 15. Died, JOHN COSIN, bishop of Durham, a lover of literature, who lavished great sums of money on the bindings of his books, consisting of the choicest works, which the following document attests:—

To the Right Ffather in God, John Id. Bp of Durham.

For one booke of Actes bd. in whitelether	0	2	6
For binding the Bible and Comon Prayer and double gilding and other trouble in fitting them	3	0	0
Pd. for ruling the Comon Prayer	0	8	0

The Totall £3 10 6

This, taking into consideration the value of money at the time, appears to have been the very height of luxury and extravagance; but is nothing when compared with the other ornaments lavished on the above bible and prayer.

"Received the 31 of January, 1662, of the Right Reverend Father in God, John, Lord Bishop of Durham, by the hands of Myles Stapylton, the summe of one hundred pounds being in part of payment for the plate and workmanship of the covers of a Bible and Common Praier Booke. I say received by me, M. S. Houser, Goldsmith, £100."

This munificent patron of the art does not appear to have confined his endeavours to the embellishment of his own library, and the book of the church over which he presided, but to have influenced by his example the patronage of others. In a letter bearing the date of Dec. 8, 1662, from Mr. Arden to the bishop's secretary Myles Stapylton, is this passage:—"My Lord desires you to bespeake black leather cases, lined with green, for the silver and gilt bookes, for the countess of Clarendon to carrie and keep them in."

On the 18th of October, 1670, the bishop expressly enjoined that "the bookes should be all rubbed once a fortnight before the fire to prevent moulding." In another letter, in the year 1671 to his secretary, Stapylton, he says, "You spend a greate deale of time and many letters about Hugh Hutchinson, and the armes he is to set upon my bookes. Where the backs are all gilded over, there must bee of necessity a piece of crimson leather set on to receive the stamp, and upon all paper and parchment bookes besides. The like course must be taken with such bookes as are rude and greasy, and not apt to receive the stamp. The impression will be taken better if Hutchinson shaves the leather thinner."

1672, May 28. A true relation of the engagement of his majesty's fleet under the command of his royal highness, with the Dutch fleet. Published by authority.

1672. The sum of £4,000 was raised by the university of Oxford for the purpose of purchasing types in France, Holland, and Germany, there being at this time no type foundry in England.

1672, Aug. 13. The biographers of Milton speak highly of the lenity of Charles II. to the immortal bard, but mention an order which was issued to seize two of his political works. It was not, however, until 1797, that a copy of the royal proclamation for that purpose was discovered, when it was found to be much more severe than was generally believed. The following is a copy of this royal order for seizing and burning the works of a man whose talents have been the admiration of ages.

"By the king,

"A proclamation for calling in and suppressing two books written by John Milton, the one intitled, *Johannis Miltoni Angli pro Populo Anglicano Defensio contra Claudii Anonymi, alias Salmatii Defensionem Regiam*; and the other, in answer to a book intitled, *The Portraiture of his Sacred Majestie in his Solitudes and Sufferings*; and also a third book, intitled, *The Obstructors of Justice*, written by John Goodwin.\*

"CHARLES R.

"Whereas John Milton, late of Westminster, in the county of Middlesex, hath published in print two several books, the one intitled, "*Johannis Miltoni Angli pro Populo Anglicano Defensio contra Claudii Anonymi, alias Salmatii Defensionem Regiam*"; and the other, in answer to a book intitled, *The Portraiture of his Sacred Majestie in his Solitudes and Sufferings*, in both which are contained sundry treasonable passages against us and our government, and impious endeavours to justify the horrid and unmatched murder of our late dear father of glorious memory.

"And whereas John Goodwin, late of Coleman-street, London, Clerk, hath also published in print a book, intitled, *The Obstructors of Justice*, written in defence of the traitorous sentence against his late majesty. And whereas the said John Milton and John Goodwin are both fled, or so obscure themselves, that no endeavours used for their apprehension can take effect, whereby they might be brought to legal trial, and deservedly receive condign punishment for their treasons and offences. Now to the end that our good subjects may not be corrupted in their judgments with such wicked and traitorous

principles as are dispersed and scattered throughout the before-mentioned books, we, upon the motion of the commons in parliament now assembled, do hereby strictly charge and command all and every person and persons whatsoever, who live in any city, borough, or town incorporate, within this our kingdom of England, the dominion of Wales, and the town of Berwick-upon-Tweed, in whose hands any of those books are or hereafter shall be, that they, upon pain of our high displeasure, and the consequence thereof, do forthwith, upon publication of this our command, or within ten days immediately following, deliver, or cause the same to be delivered, to the mayor, bailiff, or other chief officer or magistrate in any of the said cities, boroughs, or towns incorporate, where such person or persons so live; or, if living out of any city, borough, or town incorporate, then to the next justice of peace adjoining to his or their dwelling or place of abode: or if living in either of our universities, then to the vice-chancellor of that university where he or they do reside.

"And in default of such voluntary delivery, which we expect in observance of our said command, that then and after the time before limited is expired, the said chief magistrates, of all the said cities, boroughs, or towns incorporate, and the justices of the peace in their several counties, and the vice-chancellors of our said universities respectively, are hereby commanded to seize and take all and every the books aforesaid, in whose hands or possession soever they shall be found, and certify the names of the offenders unto our privy council.

"And we do hereby also give special charge and command to the said chief magistrates, justices of the peace, and vice-chancellors, respectively, that they cause the said books which shall be so brought unto any of their hands, or seized, or taken as aforesaid, by virtue of this our proclamation, to be delivered to the respective sheriffs of those counties where they respectively live, the first and next assizes that shall after happen. And the said sheriffs are hereby also required, in time of holding such assizes, to cause the same to be publicly burnt by the hands of the common hangman.

"And we do further strictly charge and command, that no man hereafter presume to print, vend, sell, or disperse any of the aforesaid books, upon pain of our heavy displeasure, and of such further punishment as for their presumption in that behalf may any way be inflicted upon them by the laws of this realm.

"Given at our court at Whitehall, the 13th of August, in the twelfth year of our reign, 1672."

1673. The first *Almanack* in England, in the present shape, was compiled by Maurice Wheeler, canon of Christ Church, Oxford, and printed in that city in this year. "There were," says Anthony Wood, "near thirty thousand of them printed, besides a sheet almanack for twopence, that was printed for this year; and because of

\* John Goodwin was chaplain to Oliver Cromwell, and a nonconformist; but of a different stamp to the generality of them. He was exempted out of the act of indemnity, for having written a defence of Charles's murder; which book, with that of Milton's, was burnt by the common hangman. "He had a clear head, a stout tongue, a penetrating spirit, and a marvellous faculty in descanting on scripture, and must be owned to have been a very considerable man."—*Barter*.

the said almanack, they were all vended. Its sale was so great, that the society of booksellers in London bought off the copy for the future, in order to engross it in their own hands."

1673. *The Empress of Morocco*. A tragedy with sculptures. As it is acted at the Duke's theatre. Written by Elkanah Settle, servant to his majesty.

Primos da versibos annos. Petr. Arb.

London: printed for William Cademan, at the Pope's Head, in the lower walk of the new exchange, in the Strand.

This play is much sought after, as being the first which was ever published with engravings, and which was sold for what was then thought the enormous sum of two shillings. The engravings were executed by W. Dole, and were not improbably a representation of the scenes, in one of which the most shocking tortures are exhibited. Horace did not think it possible that it should enter into the human imagination to exhibit things so offensive. It was exhibited before the king, by the great personages of the court. Lord Mulgrave wrote the prologue, and lord Rochester the epilogue, both of which were spoken by lady Elizabeth Howard.\*

Elkanah Settle had the distinguished honour of being poet laureat to the city of London, and the misery of dying a poor pensioner in the charter house. He wrote seventeen plays.

1673. ROBERT SANDERS who had succeeded Andrew Anderson about 1668, calls himself printer to the city and university of Glasgow. His work appears to be very neatly executed.

1673. *Bloody News from Shrewsbury; a true relation of a horrible villian, by name Thomas Reynolds, who before he was eighteen, murdered Alice Stephens and her daughter Martha, and set their house on fire. He likewise set on fire one Goodman Merick's house, and twice attempted to murder one Miss Corfuda.* 4to.

1674. Printing introduced into Boston, the capital of the state of Massachusetts, in New England. This town was the second place throughout the United States of America to receive the art of printing, which was first practised here under a special license from government, by John Forster, who printed the first book, 1676.

1674. Died, RICHARD WHITLOCK, M.D., who, at the restoration, says Wood, took orders, and obtained a living in Kent, from archbishop Sheldon, where he died. In 1654 he published a work entitled, *Zootomia, or, Observations on the Present Manners of the English; briefly anatomizing the Living by the Dead. With an Usefull Detection of the Mountebanks of both Sexes.* By Richard Whitlock, M. D. late fellow of All Souls' college, in Oxford. London: Printed by Thomas Roycroft, &c. 1654. 8vo. (610 pp. with a frontispiece.)

This worthy doctor labours to be witty and original, till he becomes unintelligible; expres-

sing a good meaning in terms so unconnected and far-fetched, that it is often difficult to discover his allusions. Yet his style and manner of quoting much resemble those of his contemporary, Burton, in his *Anatomy of Melancholy*, this also being an anatomy.

As a specimen of his style, the following extract is taken from his *Tears of the Presse*.

"Now the causes of the enormities of the presse, are either in writers or readers.

"1. Among writers, first some that write to eat, as beggars examine not the vertues of benefactors, but such as they hope or finde able, or willing, they ply, be they good or bad, wiseman or foole, so do they beg of any theme that will sell; true or false, good or bad, in rime or prose, and that pitifull or passable, all is one, inke must earne ale and three penny ordinary's; write they must against things or men, (if the spirit of contradiction prove saleable,) that they can neither master nor conquer; sparing neither Bacons, Harveys, Digbys, Brownes, or any the like of improvement colledge, (as I may terme them) though (beside some little somewhat for the venture) they get nothing, but such a credit as he did, that set Diana's temple on fire to perpetuate his name.

"2. A second sort are discoverers of their affections by taking the cudgels on one side or other, and it is come to that now, that author scarce passeth that writeth not controversies, ecclesiasticall, politick, or philosophicall. Though farre better it were for public good there were more, deserving the name of Johannes de Indagine) progressive pioners in the mines of knowledge, than controverters of what is found; it would lessen the number of conciliatours which cannot themselves now write, but as engagedly biassed to one side or other, but these are, Desiderata, vereor semper desideranda, things wanting, and to be desired (I feare) for ever.

"Second cause are buyers, the chapman's vanity and weakness of choice, maketh the mart of lesse worthy books the bigger. Such is the fate of books, of all other ware, the courser the ware, the more the seller getteth by it; examine the truth of it at stationers' hall, and it will too truly appeare in these latter times, the bookseller hath got most by those bookes, the buyer hath got the least, being not only the luck of Rablais his bookseller, that was a looser by his book of sence and judgment, but abundantly repaired by that ingenious nothing, the *Life of Garagantua and Pantagruel*. What age ever brought forth more, or bought more printed waste papers? to reach which, is the worst spending of time (next the making them) and the greater price given for them, and farre above their worth, &c. But not to make our eyes sore by looking only on the hurt; let us turne them on the benefits of the well employed press; and we shall see it a mint of solid worth, the good it hath done, (and yet may do) being inestimable; it is truth's armory, the bank of knowledge, and nursery of religion, never suffering a want of the sincere milk of the word, nor piety's practice to be out of print (and

\* For further anecdotes on this subject, see Malone's *Life of Dryden*.

that not only in one book) weekly issuing forth helps to doing, as well as knowing our duty. But the worth of the warehouse will be best known by the wares, which are books, of which see further in my *Essay of Books*," which he entitles *The Best Furniture*.

"They are for company, the best friends; in doubts, counsellors; in damps, comforters; time's prospective; the home traveller's ship or horse; the busie man's best recreation; the opiate of idle weariness; the mindes best ordinary, nature's garden, and seed plot of immortality.

Timespent (needlessly) from them is consumed, but with them twice gained. Time captivated and snatched from thee by incursions of business, thefts of visitants, or by thy own carelesnesse lost, is by these redeemed in life, they are the soules viaticum; and against death its cordiall."

"Bookes are not only titles on their author's monuments, but epitaphs preserving their memories, be they good, or bad, beyond short lived pyramids, or mausoleum piles of stone."

1674, Nov. 8. *Died*, JOHN MILTON, author of *Paradise Lost*,\* *Regained*, &c. "The character of Milton," says the historian of the Commonwealth, "is one of those which appears to gain by time. To future ages it is probable he will stand forth as the most advantageous specimen that can be produced of the English nation. He is our poet. There is nothing else of so capacious dimensions in the compass of our literature (if, indeed, there is in the literary productions of our species), that can compare with the *Paradise Lost*. He is our patriot. No man of just discernment can read his political writings without being penetrated with the holy flame

that animated him; and if the world shall ever attain that stature of mind as for courts to find no place in it, he will be the patriot of the world. As an original genius, as a writer of lofty and expansive soul, and as a man, he rises above his countrymen; and, like Saul, in the convention of the Jews, from his shoulders and upward he is higher than any of the people."

"Fancy," says Johnson, speaking of this divine character, "can hardly forbear to conjecture with what temper he surveyed the silent progress of his work, and marked its reputation stealing its way in a kind of subterraneous current, through fear and silence. I cannot but conceive him calm and confident, little disappointed, not at all dejected, relying on his own merit with steady consciousness, and waiting, without impatience, the vicissitudes of opinion, and the impartiality of a future generation."

Milton has left several passages, both in his prose and poetical works, in which he refers to his affliction of blindness; but instead of complaining or reflecting upon the wisdom and goodness of Providence, they indicate the most exalted national piety, and resignation to God.

Hail, holy light, offspring of heaven's first-born!  
Or of th' Eternal, coeternal beam,  
May I express thee unblam'd! since God is light,  
And never but in unapproach'd light  
Dwelt from eternity; dwelt then in thee,  
Bright effluence of bright essence increate.  
Or hear'st thou rather pure ethereal stream,  
Whose fountain who shall tell? Before the sun,  
Before the heav'n's thou wert, and at the voice  
Of God, as with a mantle didst invest  
The rising world of waters dark and deep,  
Won from the void and formless infinite.

These I revisit safe,  
And feel thy sov'reign vital lamp; but thou  
Revisit'st not these eyes, that roll in vain  
To find thy piercing ray, and find no dawn;  
So thick a drop serene hath quenched thy orbs,  
Or dim suffusion veil'd. Yet not the more  
Cease I to wander where the Muses haunt,  
Clear spring, or shady grove, or sunny hill,  
Smilt with the love of sacred song: but chief  
Thee, Sion, and the flowery brooks beneath,  
That wash thy hallow'd feet, and warbling sow,  
Nightly I visit: not sometimes forget  
Those other two, equally with me in fate,  
So were I equal'd with them in renown,  
Blind Thamyris, and blind Meleides;  
And Tiresias, and Phineus, prophets old:  
Then feed on thoughts, that voluntary move  
Harmonious numbers; as the wakeful bird  
Sings dawning, and in shadest cover hid  
Tunes her nocturnal note. Thus with the year  
Seasons return; but not to me returns  
Day, or the sweet approach of ev'n or morn,  
Or sight of vernal bloom, or summer's rose,  
Or flocks, or herds, or human face divine;  
But cloud instead, and ever-during dark  
Surround me, from the cheerful ways of men  
Cut off, and for the book of knowledge fair  
Presented with a universal blank  
Of nature's works, to me expung'd and rais'd,  
And wisdom at one entrance quite shut out.  
So much the rather thou, celestial light,  
Shine inward, and the mind through all her powers  
Irradiate, there plant eyes, all mist from thence  
Purge and dispense, that I may see and tell  
Of things invisible to mortal sight.

*Paradise Lost*, b. III.

The literary fate of Milton was remarkable: his genius was castrated alike by the monarchical and the republican government. The royal licenser expunged several passages from Milton's history, in which Milton had painted the

\* An Essay on Milton's use and imitation of the Moderns in his *Paradise Lost*.

Things unattempted yet in prose or rhyme.

London: printed for J. Payne & Borenet, Paternoster-row, 1800. This work was written by William Lauder, who had much more industry than ingenuity, and is one of the greatest literary impositions upon record. His alleged quotations from Grotius and others passed as genuine for some time, but at length they were detected, and proved forgeries of Lauder, by Dr. Douglas, bishop of Salisbury. Lauder, on being discovered, subscribed a confession of his offence, dictated by Dr. Johnson.

William Lauder was a native of Scotland; and first taught Latin at the university of Edinburgh, where he published in 1739, an edition of Johnston's *Poetice*. From thence he went to London, and wrote the work against Milton. After his detection he went to Barbadoes, where he kept a school. He died in 1771, contemned by all the world.

#### SONNET,

On the first Impression of Lauder's Forgeries; to Nicholas Hardinge, by William Hall, Esq.

Hardinge! firm advocate of Milton's fame!  
Avenge the honour of his injur'd muse!  
The bold *Salmasius* dar'd not so accuse,  
And brand him, living, with a felon's name!  
More hellish falsehood could not *Satan* frame,  
Arch forger, cursed poison to infuse  
In Eve's chaste ear, her freedom to abuse:  
That lurking fiend,—th'urliel's arm and flame,  
Æthereal gifts, detected: up arose  
In his own form the foe: But this new plot  
Thou hast an arm, and spear, that can expose:  
With lashes keen, drive, to that trait'rous spot,  
The curse of base impostors, to his snows,  
And barren mountains, the blaspheming Scot!

superstition, the pride, and the cunning of the Saxon monks, which the sagacious licenser applied to Charles II. and the bishops; but Milton had before suffered as merciless a mutilation from his old friends the republicans; who suppressed a bold picture, taken from life, which he had introduced into his *History of the Long Parliament and Assembly of Divines*. Milton gave the unlicensed passages to the earl of Anglesea, a literary nobleman, the editor of Whitelock's *Memorials*; and the castrated passage, which could not be licensed in 1670, was received with peculiar interest when separately published in 1681.\* "If there be found in an author's book one sentence of a venturesome edge, uttered in the height of zeal, and who knows whether it might not be the dictate of a divine spirit, yet not suiting every low decrepit humour of their own, they will not pardon him their dash." The unpopularity of Milton's prose writings arises out of the general ignorance of their high and incomparable qualities, none who have ever looked into them can doubt. For profundity of thought, energy of diction, felicity of illustration, vigour of reasoning, sublimity of conception, and almost every variety of the most original and nervous eloquence, his prose compositions are distinguished from those of all his contemporaries.

Speaking of knowledge, Milton uses the following beautiful expressions:—"We see in all other pleasures there is satiety, and after they be used, their verdure departeth, which sheweth well they be but deceits of pleasure, and not pleasures: and that it was the novelty which pleased, and not the quality: and therefore we see, that voluptuous men turn friars, and ambitious princes turn melancholy; but of knowledge, there is no satiety, but satisfaction and appetite are perpetually interchangeable."

"If it be true that a wise man, like a good refiner, can gather gold out of the drossest volume, and that a fool will be a fool with the best book,—yea, or without a book,—there is no reason that we should deprive a wise man of any advantage to his wisdom, while we seek to restrain from a fool, that which, being restrained, will be no hinderance to his folly."

However many books  
Wise men have said, are wearisome, who reads  
Incessantly, and to his reading brings not  
A spirit and a judgment, equal or superior,  
(And what he brings, what need he elsewhere seek?)  
Uncertain and unsettled still remains:  
Deep versed in books, and shallow in himself;  
Crude and intoxicate, collecting toys  
And trifles for choice matters worth a sponge,  
As children gathering pebbles on the shore.

*Paradise Regained*, b. iv.

\* It is a quarto tract, entitled *Mr. John Milton's Character of the Long Parliament and Assembly of Divines* in 1661: omitted in his other works, and never before printed, and very seasonable for these times. 1661. It is inserted in the uncastrated edition of Milton's prose works in 1738. It is a retort on the Presbyterian Clement Walker's *History of the Independents*; and Warburton, in his admirable characters of the historians of this period, alluding to Clement Walker, says, "Milton was even with him in the fine and severe character he draws of the Presbyterian administration."

1674. *Died*, ANTHONY STEPHENS, son of Paul. He was a native of Geneva, commenced his studies at Lyons, and finished them at Paris. La Caille says he obtained letters of naturalization, which bear date Sept. 20, 1612: and that having in the presence of cardinal Perron abjured the reformed opinions, he obtained a pension of five hundred livres, and the post of "Huissier de l'Assemblée du Clergé," which he retained till 1635. He also says, that he was admitted, "Imprimeur et Libraire," at Paris, Oct. 26, 1618, and honoured with the appointment of "Imprimeur du Roy," in December, 1623, with a pension of six hundred livres: and that he had moreover the office of "Imprimeur et libraire du Rochelle," which became vacant by the death of his brother Joseph, in 1630. This is the only mention which is found of such a brother.

Anthony Stephens enjoyed the special favour of cardinal Perron, who from the period of the decease of Pattison, consigned to him the impression of his works. Many of the specimens of this typographer are of an important as well as voluminous description: but the most considerable in both respects, are those which he executed for, or in conjunction with, the company of printers, who styled themselves "Societas Græcarum Editionum." From a preface to a fine impression of the *Sybillina Oracula*, Gr. Lat. *Obœpei*, 8vo. dated 1699, it appears that such a society had been formed ten years before that date, but had been interrupted in its operations by the civil wars. The above-mentioned impression of the *Sybillina Oracula* (which was repeated in 1670,) exhibits a first and very pleasing specimen of its renewed labours. The types employed by this society are the royal ones; and as a characteristic distinction of their editions, we generally find conspicuous, amongst other titular embellishments, the figure of an ancient galley in full sail, as it appears in the arms of the city of Paris, (of which it is emblematical,) with the word *Lutetia*, and sometimes the motto *Vogue la Galere*. This emblem or device, however, is not always found in the title-pages of impressions by that society.

Perhaps the double character in which Anthony Stephens appears, namely, as a printer on his own private account, and as such, in connexion with the society above-mentioned, may have involved Maittaire in some confusion, when he attempts to describe his professional distinctions. "The books," says he, "which proceeded from Anthony's officina, were characterized by his family symbol, the olive, with the legends, 'Noli altum sapere,' or 'Noli altum sapere, sed time.' 'De fractis rami tui ego insererem:' or if he used the royal types or published any state papers, the royal arms: sometimes his impressions have no device, sometimes they exhibit the portrait of the author whose works were printed, sometimes the device of the printer with whom he associated himself. Underneath his own device he often placed the initials of his name. In the titles of his impres-

sions he variously styles himself 'Typographus Regius,' 'Architypographus Regius,' 'Imprimeur du Roy,' 'Premier Imprimeur et Libraire du Roy,' 'Premier Imprimeur et Libraire ordinaire du Roy.' He often added 'ad Insigne Olivæ Roberti Stephani,' 'a l'Olivier de Robert Estienne.'"

In personal erudition Anthony Stephens certainly did not degenerate from his predecessors. *Il estoit*, says La Caille, *grand orateur and bon poëte tout ensemble*. Various literary productions of his pen are mentioned.

He appears to have had several children, and in particular a son Henry, who was admitted "Imprimeur et Libraire," in 1646, and afterwards became king's printer. This Henry, (adds La Caille,) during his life supported his father Anthony; who became needy, infirm, and even blind, in his old age. Almelooven says, that Anthony Stephens ended his days in a hospital of Paris, having outlived his children, with the exception of one daughter only, who supported herself by manual labour, and was surviving in 1683. La Caille informs us that Anthony Stephens died at the age of eighty years; but (he adds) his fine impressions will render his name immortal, and no less estimable than those of his ancestors, in the opinion of posterity. The children of his son Henry did not live to years of maturity. He may therefore be considered as the last individual of this renowned family.

1674. *News from Puddle Dock; or, a narrative of apparitions and transactions in the house of Mr. E. Pitts, at Puddle Dock.* 4to.

1674. *News from Kensington, being a relation how a maid there, is supposed to have been carried away by an evil spirit.* 4to.

1674. *Strange and terrible news from Shore-ditch of a woman that hath sold herself to the Devil, living in Badger alley.* 4to.

1675. Nov. 4. *The City Mercury; or, Advertisements concerning Trade.* With allowance. No. 1. Advertisements received at the Intelligence offices upon the Royal Exchange, and next door to the Pigeon tavern, Charing Cross. Complaints rectified, on application to Mr. R. L'Estrange in Gifford's buildings, Holborn.

1676. *Strange and terrible News from Oak-ingham, in Berks, of a thunder clap, &c.*

1676. Mr. Caorrs left £5 to the company of stationers.

1676. The first book auction in England of which we have any record, was the library of Lazarus Seaman, D.D. and sold by William Cooper, bookseller, in Warwick-lane, London. Prefixed to the catalogue there is an address, which thus commences:—"Reader, it hath not been usual here in England, to make sale of books by way of auction, or who will give most for them; but it having been practised in other countries to the great advantage of both buyers and sellers, it was, therefore, conceived (for the encouragement of learning,) to publish the sale of these books in this manner of way."

The next book sale was the library of the reverend Mr. Kidner, rector of Hitchin, sold

also by William Cooper, in Little Britain. And that these were the first in the kind, may be gathered from the preface to the third, which was, that of the reverend William Greenhill, minister of Stepney, at the Turk's Head coffee-house, 72 Bread-street (in ædibus Ferdinandi Stabile, *coffipole*, ad insigne capitis Turcæ,) by Zach. Be'rne, who sets forth, that "the attempts in this kind (by the sale of Dr. Seaman's and Mr. Kidner's libraries) having given great content and satisfaction to the gentlemen who were the buyers, and no discouragement to the sellers, hath encouraged the making this trial by exposing (to auction or sale) the library of Mr. William Greenhill." Cooper next sold the library of Dr. Thomas Manton, at his late house in King-street, Covent Garden, 1678; and in the same year, John Dunmore and Richard Chiswell, booksellers, those of Dr. Benjamin Worsley, and two other learned men, over against the Hen and Chickens, in Paternoster-row, at nine in the morning. By manuscript prices in some of the early catalogues, it appears that one penny was a very common bidding.

For some curious particulars concerning the early book sales see Dibdin's *Bibliomania*.

1676. *General Catalogue of Books, printed in England since the dreadful fire 1666, to the end of Trinity term, 1676, London, folio.*

This catalogue was published by ROBERT CLAVEL, an eminent bookseller. It is a thin folio, and includes an abstract of the bills of mortality. The books are classed under the heads of divinity, history, physic, and surgery, miscellanies, chemistry, poetry, &c. The titles of the books are briefly stated, and the publishers' names are given. The catalogue was continued every term till 1700.

Dunton says, "Mr. Robert Clavel is a great dealer, and has deservedly gained himself the reputation of a just man. Dr. Barlow,\* bishop of Lincoln, used to call him *the honest bookseller*. He has been master of the company of stationers [1698 and 1699] and perhaps the greatest unhappiness of his life, was his being one of alderman Cornish's jury. He printed Dr. Comber's works," &c.—*Life and Errors*, p. 283.

1676, Sept. 4. *Died*, JOHN OGBLY, geographical printer to king Charles II. and a voluminous writer. He was born near Edinburgh in 1600, and was originally a dancing master. The earl of Stafford, in whose family he was employed, as teacher to his children, appointed him deputy master of the revels at Dublin, where he erected a theatre. On the breaking out of the Irish rebellion he returned to Cambridge. He was appointed in 1661 to conduct the coronation of Charles II. and of which he published a pompous account in folio, with plates. He also published a magnificent Bible, with plates, for

\* Thomas Barlow, bishop of Lincoln, died October 8, 1691, aged 88, and was buried at Buckden. It is stated, that whilst he sat, bishop [1675-1691] he was remarkable for having never visited any part of his diocese in person, or been ever in all his life at Lincoln; so that he was commonly called the bishop of *Buckden*, where he mostly lived.

which he was remunerated by the house of Lords. Ogilby translated Virgil and Homer into English verse; an *Account of Japan*, folio; an *Atlas*, folio; the *Fables of Æsop*, in verse, two volumes 8vo.; and a *Book of Roads*, 8vo. He died at London, and was buried in the church of St. Bride, Fleet-street.

1676. *News from Sussex; or, the Barbarous Robber strangely convicted.* 4to.

1676. *News from St. John's Street of a Monster brought forth by a Sow.* 4to. Sold at Mr. Bindley's sale for £3 7s.

1676, March 23. *Poor Robin's Intelligence, from the beginning of the world to the day of the date hereof.* Printed by A. P. and T. H. for the general assembly of hawkers, No. 1.

1677. *Died, USCAN, or OSOAN*, minister of Erivan, the seat of the Armenian patriarch,\* and editor of the first printed Armenian bible. Manuscript copies of the bible were become so scarce in Armenia, that a single copy cost 1200 livres, or £50. Such being the rarity of copies of the scriptures, a council of Armenian bishops, assembled in 1662, resolved to call in the art of printing, of which they had heard in Europe. For this purpose they applied first to France; but the Roman catholic church having refused their request, Usacan was sent to Europe about the year 1662, by Acopus (Jacobus) Carractri, patriarch of the Armenians, for the purpose of having an edition of the Armenian scriptures printed under his inspection. According to the commission of the patriarch he went to Rome, where he remained fifteen months, and then removed to Amsterdam, where he established an Armenian press, and printed the bible in 1666, 4to., and an edition of the new testament in 1668, in 8vo., which was reprinted in 1698, in a smaller form. His chief assistant was Solomon De Leon, a deacon, his nephew, who afterwards married a young lady at Marseilles; his printers' names were Eizmiatzneus and Sergius. In 1669 Usacan obtained permission from the king of France to establish an Armenian printing office at Marseilles, under the restriction of printing nothing contrary to the Catholic faith. The court of Rome immediately adopted every precaution to prevent any errors being inserted in the publications printed by the Armenians of Marseilles. A written confession of faith was demanded from Usacan, and an Armenian priest, named John Agolp, was sent to watch the press. Whilst Usacan, who was a man of great prudence, lived, the printing establishment was conducted peaceably; but after his death several law suits were commenced. These being terminated,

Solomon De Leon continued the establishment, but not without considerable uneasiness, occasioned by Thomas Herabied, an Armenian priest, who had been appointed inspector of the press, in the place of John Agolp. The printing establishment was finally transferred to Constantinople.—*Le Long.*

1677, March 28. *Died, WENCESLAUS HOLLAR* an eminent copper-plate engraver, of whom it is stated, that he used to work for the booksellers at the rate of fourpence per hour. He was born at Prague, in 1607, and died, in great poverty, at Westminster. His works amount to nearly two hundred and forty prints.

1677. *Died, JAMES LASCAILLE*, a celebrated printer in Holland, whose press was famous for the number of beautiful and accurate editions which issued from it. He was esteemed so excellent a poet that, in 1663, he was honoured with the poetic crown by the emperor Leopold. James Lascaille was born in 1610 of an illustrious family at Geneva, which removed to Holland. His daughter, Catharine Lascaille, who died June 8, 1711, was so much admired for her poetic talent, as to be called the Dutch Sappho, and tenth Muse. A collection of her poems was printed in 1728, with several tragedies, which, although they were not written according to the ordinary rules of the drama, frequently discover marks of superior genius.

1677. The earliest *Almanack* published in Scotland commenced in this year, by Mr. Forbes, of Aberdeen, under the title of a *new Prognostication, calculated for North Britain*; which was embellished by the armorial bearings of Aberdeen on the title-page. Mr. Forbes continued to publish this almanack until the year 1700.

1677, July 13. *Died, SIR WILLIAM BERKELEY*, governor of Virginia from the year 1670, and who, while in that colony, made the following reply with regard to the press:—"I thank God there is no free schools nor printing, and I hope we shall not have these hundred years. God keep us from both. He was buried at Twickenham, near London.

1677. A type foundry was established at the university of Oxford, the matrices of which were severally given by BISHOP FELL,\* in 1667, and Mr. JUNIUS, in 1677. The university still possess some very valuable unique materials of these foundries, and published in the years 1706 and 1770, specimens which are now to be found only in the collections of the curious, but which Mr. Rowe Mores, p. 28, says, are "no credit to that learned body," and "not so accurate as might have been expected from an archetypographus and the curators of the Sheldonian.

1677. *SIR THOMAS DAVIES*, knight, lord mayor, gave two large silver cups, weight 124 oz. 9 dwts. on his translation from the company of stationers to the company of drapers. In 1667 he was chosen an assistant of the stationers' company, and master in 1668-1669. "Aug. 4, 1673. Ordered,

\* When the British envoy, sir Harford Jones, was sent to Persia, in 1598 and 1599, he was met about four miles from Ispahan, by an advanced part of the inhabitants. First came the merchants of the city, in number about three hundred, all in their separate classes. Then followed a deputation from the Armenian clergy, composed of the bishop and chief dignitaries, in their sacerdotal robes. They carried silken banners, on which was painted the Passion of our Saviour. The bishop, a reverend old man with a white beard, presented the Evangelists, bound in crimson velvet, to the envoy, and proceeded on with his attendant priests, chanting their church service.

\* John Fell, bishop of Oxford, was born at Longworth, June 23, 1623, died July 10, 1686, and was buried in Christ Church, Oxford.

That if sir Thos. Davies do not provide his brace of bucks in time towards the entertainment on the 10th of August, that then the master and wardens of the company shall provide the said brace of bucks at their own charge, and shall repay themselves out of the said sir Thomas Davies's next dividend."

1677. MRS. MARY CROOKE gave to the company of stationers a silver cup, weight 22 oz. 18 dwts. She was the widow of Mr. Crooke, bookseller, near Temple Bar, who was master in 1665 and 1666; and of whom Dunton says, "He was well acquainted with Mr. Hobbes, and published many of his books. He got a good estate by his trade, and was a man of extraordinary sense, which he had the happiness of being able to express in words as manly and apposite as the sense conveyed under them."

1677. ABEL ROPEA gave to the stationers' company a large silver flagon; weight 31 oz. 3 dwts. "He rises in the world, and his behaviour, methinks, is extremely obliging. He prints the *Post-boy*, the *Life of King William*, the *Annals of Queen Anne*, and several excellent abridgements."—*Dunton's Life and Errors*.

1677. THOMAS VERE gave to the stationers' company a silver cup, with a handle, weighing 21 oz. 15 dwts.

1677, Sept. 14. Died, RICHARD ATKYNS, a typographical author, who suffered much on account of his loyalty. After the restoration he was a deputy-lieutenant of Gloucestershire. Having been at the expense of above £1,000 in law-suits for twenty-four years, to prove the right of the king's grant in printing law-books, he had some hopes of repairing his finances by his pen; and published his *Origin and Growth of Printing in England*, 4to. 1664. See page 146, ante. He was of a respectable family in Gloucestershire, where he was born in 1615, and educated at Oxford. He died a prisoner for debt, in the marshalsea, and was buried at the expense of sir Robert Atkyns, a baron of the exchequer, to whom he was related.

Richard Atkyns appears to have been a bold ambitious man, and his writings were all in favour of the court, and arbitrary government. His *Origin and Growth of Printing*, was to defend the *Oxford Book* in favour of Consellis against Caxton. But it is strange that a piece so fabulous, and carrying such evident marks of forgery, could impose upon men so knowing and so inquisitive, as some who have coincided with Atkyns.

1678. Nov. Translation of the Gazette into French.

Nov. 6. A complaint being made to the house, of a material mistake in that part of the translation of the Gazette into French, which has reference to his majesty's proclamation for removing the Papists: ordered that Mons. Moranville, who translated the Gazette into French, and Mr. Newcombe the printer, be summoned to attend this house on to-morrow morning.

Nov. 7. Mr. Newcombe being called in, to give an account of the translation of the Gazette

into French, informed the house, that he was only concerned in the setting the press, and that he understood not the French tongue; and that Mons. Moranville had been employed in that affair for many years, and was the only corrector of it. Mons. Moranville, being called in, acknowledged himself guilty of the mistake; but he endeavoured to excuse it, alledging it was through inadvertency.

Ordered, that Mons. Moranville be committed to the custody of the serjeant at arms; and that he be searched, and his house and lodgings. And several papers written in French being found about him; Ordered, that the said papers be referred to the consideration of the committee appointed to examine Mr. Colman's papers, to translate the same, and report to the house.

Ordered, that it be referred to a committee further to examine the matter concerning the translating, printing, and publishing the French Gazette.—*Journals of the house of commons*, v. 9.

Whitehall, Nov. 10. A great and malicious abuse being found to have been committed by the person entrusted to translate the Gazette into French, in the translation of his majesty's late proclamation, commanding all persons, being popish recusants, or so reputed, to depart from the cities of London and Westminster, and all other places within ten miles of the same; for which he is in custody, and the matter under examination, in order to his just punishment: it is thought for the rectifying the said abuse, that a new and true translation of his majesty's said proclamation be given to the world in the French Gazette of this day.—*Gazette*, November 7—11, 1678.

Nov. 18. Serjeant Seis reports from the committee appointed to examine concerning the translating, printing, and publishing of the Gazette in French, that the committee had taken the particulars thereof, and put the same into writing, which he delivered in at the clerk's table.—*Journals of the house of commons*, v. 9.

1677. An edition of five hundred copies of the *Four Gospels*, and *Acts of the Apostles*, in the MALAYAN language, was printed at Oxford, in 4to. at the expense of the Hon. Robert Boyle, and under the superintendence of Dr. Thomas Hyde,\* keeper of the Bodleian library. A preface

\* Thomas Hyde, D.D., the learned editor of the *Malayan Gospels*, and *Acts of the Apostles*, was born near Bridgenorth, in Shropshire, June 29, 1666, and was educated at Cambridge. He rendered considerable assistance to Dr. Wallis, in the Polyglott Bible, by his knowledge of the Arabic. In 1668, he was chosen head keeper of the Bodleian library at Oxford. His extraordinary knowledge of the oriental languages gained him considerable promotion in the church. In April, 1701, he resigned the office of *Protoprothectoris*, or head keeper of the Bodleian library, and died Feb. 16, 1705, and was buried in the church of Hamburg, near Oxford. His work on the *Religion of the Ancient Persians*, (*Historia Religioſa Veterum Persarum*), Oxford, 1706, eto. will remain a monument of his various and profound erudition. Several of his smaller works were collected and republished by Dr. Gregory Sharpe, master of the Temple, under the title of *Synagoga Dissertationum et Opuscula*, 1767, 3 vols. 4to. accompanied with a life of the author. A list of other works projected by Dr. Hyde, but not completed, is given by Wood, *Athen. Græciæ*, and Chalmers, *Græc. Biog. Dict.*

was prefixed by Dr. Thomas Marshall, rector of Lincoln college, Oxford, and afterwards dean of Gloucester; with a dedication by Mr. Hyde. This edition being sent over to the East Indies, a second was published, in 1704, 4to. at Oxford, superintended by Mr. Thomas Bowrey.\* As both these editions were printed in Roman type, Bowrey added a specimen of the Malay character, which he had obtained from Dr. Hyde.

1677. *Poor Robin's Intelligence revived.*

1677. *Lamentable and bloody News from St. Albans; being an account of the late great robbery and barbarous murder committed there by highwaymen.* 4to.

1677. *Strange News from the deep, with an account of a large prodigious whale.* 4to. With a wood-cut.

1677. *Strange and wonderful News from Bridenell of a converted whore.* 4to.

1677. *News from Buckinghamshire, or a perfect relation how a young maid hath been for twelve years posset with the Devil.* 4to.

1677. *Horrid News from St. Martin's, being a relation of a girl not sixteen, poisoning her mother, a servant maid, and two gentlewomen.* 4to.

1677. R. SABBATHEUS BEN JOSEPH erected a printing-office at Dyrenfurt, a small town of Silesia, of which Wolfius relates some anecdotes respecting it. Several of the Dyrenfurt publications are found in the Oppenheimer library, now at Oxford.

1677. Printing carried on at Dunkirk, a seat-port of French Flanders, by JAN WINK.

1677. *A French and Italian Dictionary*, in two octavo volumes, bears for imprint, Imprimé au chateau de Duillier, en Suisse.

1678, July 19. Died, ANDREW MARVELL, who stands in the very first and very highest rank, *facile princeps*, as an incompatible patriot, the best of controversialists, and the leading prose wit of England. His are the "first sprightly runnings" of that glorious stream of wit, which will bear upon it down to the latest posterity, the names of Swift, Steele, and Addison. Before the time of Marvell, wit was to be forced, strained, and conceited. From him wit first came sparkling forth, untouched with baser matter. It was like his personal character. Its main feature was an open clearness. Mean destraction, or sordid jealousy never for an instant stained it. He turned aside in the midst of an exalted panegyric to Oliver Cromwell, to say the finest things that have ever been said of Charles I. He left for a while his own wit in the *Rehearsal Transposed*, to praise the wit of Butler, his rival and political enemy. As a poet, Marvell was true, and this is the grand point in poetry. He was not of the highest

order, not perhaps in even a high order, but what he did was genuine. It is sweetness speaking out in sweetness. In the language there is nothing more exquisitely tender than the *Nymph Complaining for the Loss of her Fawn*. Such poems as this and the *Bermudas* may live, and deserve to live, as long as the longest and the mightiest. Of as real a quality are the majority of the poems of Marvell. In a playful and fantastic expression of tender and voluptuous beauty, they are well nigh unrivalled.

Andrew Marvell was born at Kingston-upon-Hull, Nov. 15, 1620, where his father was a celebrated preacher of the church of England. The son was educated at Trinity college, Cambridge, and afterwards travelled to Rome, where he first associated with Milton, and both being attached to the popular cause in politics, formed a friendship which lasted during his life. It is related of him, that, while he represented the town of Hull in parliament, and was without any other resources than a small allowance, which he received for that duty, a courtier was sent with a thousand pounds in gold to buy him over to the opposite side; he placidly refused the bribe, pointing to a blade-bone of mutton which was to serve for his dinner on the ensuing day, as a proof that he was above necessity. He was buried in St. Giles's in the Fields, London.

He was the author of several political treatises, published anonymously, particularly one, *On the Growth of Popery and Arbitrary Government in England; more particularly from the long Prorogation of November, 1675, ending the 15th of February, 1676, until the Meeting of Parliament, July 16, 1677.* The king and his ministry were so offended at this production, that an advertisement appeared in the *Gazette*, offering a reward of one hundred pounds for the discovery of the author, and fifty pounds for the apprehension of the printer. He entered into a long and bitter controversy with Parker, bishop of Oxford, a temporising prelate, a famous partisan, and virulent writer on the side of arbitrary government, and between him and Marvell many pamphlets were written. On one occasion a letter, dated July 3, 1676, was received by Marvell, subscribed J. G., and concluding with these words:—"If thou dar'st to print any lie or libel against Dr. Parker, by the eternal God I will cut thy throat."

Marvell gives the following pertinent description of the powers of the press:—"The press, invented much about the same time with the Reformation, hath done more mischief to the discipline of our church than all the doctrines can make amends for. It was a happy time when all learning was in manuscript, and some little officer did keep the keys of the library. Now, since printing came into the world, such is the mischief, that a man cannot write a book but presently he is answered. There have been ways found out to fine, not the people, but even the grounds and fields where they assembled! but no art yet could prevent these seditious

\* Thomas Bowrey was the author of a *Grammar and Dictionary of the Malay tongue*, published at London, 1701. 4to. He had been engaged nineteen years in the Eastern Isles, in mercantile concerns, and accompanied his edition of the *Malay Gospel* and *Acts of the Apostles*, printed at the expense of the East India company, with a map of the Malay islands.

meetings of letters. Two or three brawny fellows in a corner, with mere ink and elbow-grease, do more harm than a hundred systematic divines. Their ugly printing letters, that look like so many rotten teeth, how oft have they been pulled out by the public tooth-drawer; and yet these rascally operators of the press have got a trick to fasten them again in a few minutes, that they grow as firm a set, and as cutting and talkative, as ever. Oh, printing! how hast thou disturbed the peace of mankind! Lead, when moulded into bullets, is not so mortal as when founded into letters! There was a mistake sure in the story of Cadmus, for the serpent's teeth which he sowed, were nothing else but the letters which he invented. The first essay that was made towards this art, was in single characters upon iron, wherewith of old they stigmatized slaves and remarkable offenders; but a bulky Dutchman diverted quite from its original institution, and contrived these innumerable syntegems of alphabets. One would have thought in reason, that a Dutchman at least, might have contented himself only with the wine-press."

1678, *Died*, MARCHMONT NEEDHAM, the great patriarch of newspaper writers; a man, says D'Israeli, of versatile talents and more versatile politics; a bold adventurer, and most successful, because the most profligate of his tribe. From college he came to London: was an usher in Merchant Taylors' school; then an under clerk in Gray's Inn; at length studied physic, and practised chemistry; and finally he was a captain; and in the words of honest Anthony Wood, "siding with the rout and scum of the people, he made them weekly sport by all that was noble, in his intelligence, called *Mercurius Britannicus*, wherein his endeavours were to sacrifice the fame of some lord, or any person of quality, and of the king himself, to the beast with many heads." He soon became popular, and was known under the name of Captain Needham of Gray's Inn; and whatever he now wrote was deemed oracular. But whether from a slight imprisonment for aspersing Charles I., or some pique with his own party, he requested an audience on his knees with the king, reconciled himself to his majesty, and showed himself a violent royalist in his *Mercurius Pragmaticus*, and galled the Presbyterians with his wit and quips. Some time after, when the popular party prevailed, he was still further enlightened, and was got over by president Bradshaw, as easily as by Charles I. Our mercurial writer became once more a virulent Presbyterian, and lashed the royalists outrageously in his *Mercurius Politicus*; at length, on the return of Charles II., being now conscious, says our friend Anthony, that he might be in danger of the halter, once more he is said to have fled into Holland, waiting for an act of oblivion. For money given to an hungry courtier, Needham obtained his pardon under the great seal. He latterly practised as a physician among his party, but lived universally hated by the royalists, and now only committed harmless treasons with the college of

physicians, on whom he poured all that gall and vinegar which the government had suppressed from flowing through its natural channel.

He was born at Burford, in Oxfordshire, in 1620, and educated at All Souls' college, Oxford.

An account of Marchmont Needham, with a list of his publications, will be found in Wood's *Athen. Oxon.*

1678. *Died*, RICHARD HEAD, a bookseller of London, and author of several low works.\* He was the son of an Irish ecclesiastic, who suffered in the dreadful massacre which took place in that kingdom in the year 1641. Mrs. Head and her son came to England, when being sent to school, he was fitted for the university, and through the interest of some of his father's friends forwarded to Oxford, where he completed his studies, in the same college in which his father had been formerly elevated. His mother's income being but slender, Head was taken from the university before he had acquired any degree, and apprenticed to a bookseller. Having accomplished his time, he married, and set up in business for himself; but his passion for gaming, shortly after, obliged him to relinquish business, when he retired for a period into Ireland, and there wrote his comedy of *Hic et Ubique*; when having acquired a little money, he commenced business, and was again unsuccessful, upon which he had recourse to his pen for subsistence, and produced several works, the whole being more or less tinged by indecency. The following character of Richard Head is to be found in Dr. William King's works. "He was of a lively genius, and had a considerable knowledge in the scenes of low life and debauchery; he was the author of *Hic et Ubique*, or the *Humours of Dublin*, a comedy, printed in 1663, by which he acquired much reputation, and of several other pieces, particularly *Nuga Venales*, which would have

\* *Hic et Ubique; or the Humours of Dublin.* A Comedy by Richard Head; acted privately with general applause. 1663. 4to. A copy sold at Rhodes' sale for 19s.

*The English Rogue*, described in the *Life of Meriton Latroon, a Witty Extravagant*. 4 parts, in 5 vols. 8vo. 1661-1666. With portraits and cuts. Complete copies of this work are of rare occurrence, and when found, generally produce a large sum. It sold for £3 8s. but it can be purchased at the present day for about half that sum.

*Proteus Redivivus; or the art of Whedding, or Insinuation*, obtained by General Conversation, and extracted from the several *Humours, Inclinations, and Passions of both Sexes, respecting their several Ages, and suiting each Profession or Occupation*. Collected and Methodized by the Author of the First Part of the *English Rogue*, [Richard Head.]

Thy credit wary keep, 'tis quickly gone,  
B'ing got by many actions, lost by one.

London: printed by W. D., and are to be sold at the sign of the Ship, St. Mary-Axe, and by most booksellers, 1675. 8vo. (pp. 355, Title and Epistle to the Reader, 3 leaves.)

*The Canting Academy, or Villanies discovered.* Lond. 1674. 8vo. With a frontispiece. Sold at Nassau's sale for £3 2s.

*Nuga Venales; or, a Complaisant Companion; being New Jestes, domestic and foreign, Bulls, Rhodomontades, Pleasant Novels and Miscellanies.* Lond. 1675. 12mo. 1661. 12mo. 1665. 12mo. third edition, with a portrait. Sold at Lloyd's sale for £5 10s. Fourth edition, with additions, 1667. 12mo.

served as a general title to his works. Roguery, fornication, and cuckoldom, were the standing topics of this author, who was persuaded that his books would sell in proportion to the prevalence of those vices. In the first part of the *English Rogue*, he had given scope to so much licentiousness, that he could not procure an imprimatur, until some of the most luscious descriptions were expunged." Head, after many crosses and difficulties, at last perished at sea, when crossing to the Isle of Wight. The editors of the *Biographia Dramatica*, notice only his comedy of *Hic et Ubique*, and the *English Rogue*; and Watts simply mentions the above play. Francis Kirkman, who had been his partner in the bookselling trade, was also the author of two works of a similar description to those of Head.

1678, Dec. 3. *The Weekly Packet of Advice from Rome*, or the Popish Courant, No. 1.

1678. *News from Bartholomew fair*, 4to. With a wood cut.

1678. *Bloody News from Angel alley, being a true account of the cruel murdering of one Dorothy Jewens, who was barbarously robbed and killed by two of her lodgers*, 4to.

1678. *News from Maidstone, a narrative of the trials and condemnation of four notorious house breakers*, &c. 4to.

1678. *News from Wicklow, a relation how Dr. Moore was taken invisibly by his friends*, 4to.

1678. *News from Hallidy Wells of a barbarous father who killed his own son*, 4to.

1678. *Poor Robin's public and private occurrences and remarks*, printed for T. C. near Fleet Bridge.

1678. *Public Occurrences truly stated by George Larkin*.

1679. In this year there were two German versions of the *Old Testament* printed by the Jews, for the use of their Hebrew brethren.

The first of these versions was made by R. Jekuthiel ben Isaac Blitz, of Wittmund, in East Friesland, who received eight florins and sixteen stivers, per sheet, for the translation: it was revised by R. Meir Stern, chief rabbi of the synagogue of Amsterdam, who received six florins and six stivers, per sheet, for the revision. The printer was URI VEIBSCH BEN ACHARON HALEVI, who undertook the edition at his own charge, but being involved in expensive lawsuits, he relinquished the undertaking to the Christians, WILLIAM BLEAU, and LAURENCE BAAK, at whose cost the work was completed, and printed at Amsterdam, 1679, folio. R. Jekuthiel is said to have corrupted the text, and to have inserted various remarks demonstrative of the most determined hatred to Christianity.

The other version was executed at the expense of JOSEPH ATHIAS, the celebrated Jewish printer, of Amsterdam, where it was printed in the same year as the former, in folio. Josel Witzenhansen was not only the principal translator of this version, but acted also as the compositor of it in the office of Athias. He received four imperials per sheet for his labour. R. Meir Stern received

the same sum and rather more, for revising the translation.

1679. A news writer in Holland, who had presumed to print some very severe and sarcastic reflections on Madame Maintenon\* and Louis XIV. suffered the following severe punishment. Some months after this offence, he was induced, by a person sent expressly for the purpose, to make a tour into French Flanders. The instant he had quitted the Dutch territories, he was put under arrest, and immediately, by his majesty's express command, conducted to Mount St. Michael, then one of the state prisons of France. He was shut up in a wooden cage, comprising about twelve feet square and twenty feet in height. Here he lived upwards of three and twenty years; and here he at length expired.—During the long nights of winter, no candle or fire was allowed him; nor was he permitted to have any book. He saw no human face except the jailor, who came once every day to present him, through a hole in the wicket, with his little portion of bread and wine; no instrument was given him, with which he could destroy himself; but he found means at length to draw out a nail from the wood, with which he cut or engraved, on the bars of his cage, certain fleurs de lis, and armorial bearings, which formed his only employment and recreation.—Mr. WRAXALL, in a visit to Mount St. Michael, in August, 1775, saw the cage and the nail with which he had executed his work. The same gentleman thus apostrophised as he stood within this place of torture. "As I stood within this dreadful engine, my heart sunk within me. I execrated the vengeance of the prince, who, for such a trespass could inflict so disproportionate and tremendous a punishment. I thought the towers and pinnacles of the abbey seemed to shake, as conscious of the cruelty committed in their gloomy round; and I hastened out of this sad apartment, impressed with the deepest pity and indignation."

1679, Dec. 4. *Died*, Sir JOHN BISSENEKIA, the fertile parent of numerous political pamphlets devoted to the court and its cause. He had a promptness to seize on every temporary circumstance, and a facility in execution; and his papers appear to abound in banter, wit, and satire. In buffoonery, keenness, and boldness, he was not inferior to his political opponent, Marchmont Needham, nor was he at times less an adventurer, being frequently imprisoned. His *Paul's Church Yard* is a bantering pamphlet.

\* Frances D'Aubigny, madame de Maintenon, was born in the prison of Nîort, November 27, 1643, and became the wife of Scarron, the French poet, and afterwards of Louis XIV. "A strange connexion," says Voltaire, "of tenderness and scruple on the part of the king, and of submission and devotion on that of the new mistress, seems to have lasted from 1661 to 1686, which was the epoch of their marriage." Her life of penitential piety after her marriage; her extensive charity to the poor, and exemplary life, caused her to be universally respected. She founded the celebrated convent of St. Cyr, at Versailles, for the maintenance of thirty-six nuns, ladies of quality, and twenty-four assistant sisters. Upon this foundation, three hundred young ladies were received and educated gratis. Madame Maintenon died at St. Cyr, April 15, 1719, aged 84 years, regretted by the nation.

containing fictitious titles of books and acts of parliament, reflecting on the mad reformers of those times. One of his poems is entitled *The Jolt*, being written on the protector having fallen off his own coach-box: Cromwell had received a present from the German count Oldenburgh, of six German horses, and attempted to drive them himself in Hyde Park, when this great political phaeton met the accident, of which sir John Birkenhead was not slow to comprehend the benefit, and hints how unfortunately for the country it turned out! Sir John was during the dominion of Cromwell an author by profession. After various imprisonments for his majesty's cause, says Wood, "he lived by his wits, in helping young gentlemen out of dead lifts in making poems, songs, and epistles on and to their mistresses; as also in translating, and other petite employments." He lived, however, after the Restoration to become one of the masters of requests, with a salary of £3000 a-year. But he showed the baseness of his spirit, says Anthony, by slighting those who had been his benefactors in his necessities.

1679, Dec. 4. Died, THOMAS HOBBS, who is celebrated as the first English writer on political philosophy. He was born at Malmesbury, in Wiltshire, July 5, 1588, and in 1628, he began to publish a series of works, designed to warn the people as to the consequences of their efforts for the reduction of the royal power. The most remarkable of these, was the *Leviathan*, published in 1651, which is full of sophistry and bad maxims in philosophy and morals. At the restoration he received a pension, but in 1665 the parliament passed a censure on his writings. He died at Chatsworth, in Derbyshire, having been mostly employed as tutor in the family of the duke of Devonshire. It is very curious that, while Hobbes maintained the necessity of an established church under the supremacy of a temporal monarch, he expressed doubts of the existence of that deity, whose worship it is the business of a church to encourage. He asserts that Ezra wrote the *Pentateuch*, and that the *New Testament* was not received as canonical till the council of Laodicea, in the year 363.

1679, Feb. 14. *The Courant Intelligence*; or, an impartial account of transactions, both Foreign and Domestick. Printed for John Smith, bookseller, in Great Queen Street.

1679. *The Loyal Intelligencer*.

1679. *The Protestant Domestic Intelligencer*.

1679, May 1—24. *A List of one unanimous Club of Voters in his Majesty's Long Parliament, dissolved in 1678; with votes of the house of commons concerning the pensioners.*

1679, June 11. *An impartial Account of divers remarkable Proceedings in the last Session of Parliament, relating to the Popish Plot, &c.*

1679, June 7. *A Proclamation for calling out Heretors and Freeholders to attend the King's Host*. Printed at Edinburgh by the heirs of Andrew Anderson. It was reprinted at London, June 17.

1679, June 26. *The Declaration of the Rebels*

*now in Arms in the West of Scotland; with an address against the duke of Lauderdale.*

1679, July 9. *Domestick Intelligence*, or news both from city and country, published to prevent false reports. Printed for Benjamin Harris, No. 1.

1679, July 10. *Some further Matters of Fact, relating to the Administration of Affairs in Scotland, under the Duke of Lauderdale.*

1679 July 10. *The Impeachment of the Duke and Dutchess of Lauderdale, with their Brother my Lord Hatton, presented to his Majesty by the City of Edinburgh.*

1679. *Articles of High Treason and other Misdemeanors against the Dutchess of Portsmouth.*

1679. *Articles of High Treason against Sir Wm. Scroggs, Knt. Lord Chief Justice of the King's Bench.*

1679. *Plain Truth, or a private Discourse betwixt P[epys] and H[arbord], [about the Navy.]*

1679, July 14. *The Confession and Execution of Richard Langhorne, late Counsellor in the Temple, who was executed for treasonable Practices.*

1679, July 21. *The English Intelligencer*.

1679, July 22. *The Faithful Mercury*, No. 1.

1679, Aug. 14. *A true and perfect Collection of all Messages, Addresses, &c. from the House of Commons to the King's most excellent Majesty, with his Majesty's gracious Answers, from 1660 till the Dissolution of the Parliament.*

1679, Sept. 3. *The Weekly Packet of Advice from Germany; or the History of the Reformation of Religion there*, No. 1.

1679, Sept. 4. *Poor Robin's Intelligence newly revived; published for the Accommodation of all ingenious persons*, No. 1.

1679. *Relationes Extraordinariae*.

1679. *Mercurius Civicus*; or, an Account of Affairs domestick and foreign, printed by R. Everingham.

1679. *The Weekly Intelligence*; or, News from City and Country, printed by Samuel Crouch.

1679, Sept. 7. *The Friendly Intelligence*, published for the Accommodation of all sober Persons, No. 1.

1679, Sept. 8. *The English Currant*; or, Advice domestick and foreign, for general satisfaction. Printed for Thomas Burrell, at the Golden Ball, Fleet-street.

1679. *Domestick Intelligence*, published gratis, for the promoting of Trade: printed by N. Thompson, for Benjamin Harris.

1679. *Domestick Intelligence*; or, News from City and Country, published to prevent false Reports. London: printed by Nathaniel Thompson, next the Cross Keys, in Fetter Lane, for Benjamin Harris, at the Stationers' Arms, in the Piazza, under the Royal Exchange, Cornhill.

1679, Aug. 26. *The true Domestick Intelligence*; or, News both from City and Country, published to prevent false Reports: printed by N. Thompson, No. 16. Against this paper B. Harris cautions the publick, as being a Popish impostor. Though called No. 16, it was the first by that publisher.—No. 25, Sept. 30, an-

nounces, that "Mr. Garraway, master of the famous coffee-house, near the Royal Exchange, hath store of good cherry-wine; and 'tis said, that the Black Cherry and other wild cherries do yield good and wholesome Aquavites and Brandies.—In some part of Buckinghamshire they are said to have got from the Canaries a sort of Barley, which hath roes of Barley upon every ear. In some other places they have a sort of Wheat which bears four, five, or six ears of Wheat upon every stalk; but it is not much commended."

1679. *Account of the Proceedings at the Guildhall of the City of London, on Saturday, September 12, 1679; with the substance of Sir Thomas Player's Speech, and the Lord Mayor's Answer thereunto.*

1679. *A Reply to the excellent and elegant Speech made by Sir Thomas Player, the worthy Chamberlain of London, &c. By H. B. an unworthy Member of the said city.*

1679. *A Vindication of Sir Thomas Player.*

1679, Sept. 29. *The Speech of Sir Robert Clayton, Knt. Lord Mayor Elect, at Guildhall.*

1679, Oct. 7. *London's Choice of Citizens to represent them in the ensuing Parliament.*

1679, Oct. 21. *A true Account of the Invitation and Entertainment of the Duke of York at Merchant Tailors Hall by the Artillery-men.*

1679. *An impartial Account of the Trial of the Lord Cornwallis, on a Charge of Murder.*

1679. *London's Defiance to Rome; a perfect Narrative of the magnificent Procession and solemn Burning of the Pope, at Temple Bar, Nov. 17, 1679, being the Coronation-day of that never-to-be-forgotten princess, queen Elizabeth. With a Description of the Order, rich Habits, extraordinary Fireworks, Songs, and generous Triumphs attending that illustrious ceremony.*

1679. *The Rotterdam Courant.*

1679, Nov. 20. *Mercurius Anglicus; or, the Weekly Occurrences faithfully transmitted, No. 1. London: printed by Robert Harford, at the Angel in Cornhill; and revived in October, 1681, by Richard Baldwin, in the Old Bailey.*

1679. *A Letter from a Gentleman of the Isle of Ely, in Cambridge, to Colonel Roderick Mansel, containing an Account of the first Discovery of the pretended Presbyterian Plot at the Assizes at Wisbech, Sept. 23, published Nov. 28.*

1679. *A Proclamation against Vice and Immorality. By the Mayor. Guildhall, Nov. 29, 1679. Printed by Samuel Roycroft, printer to the Honourable City of London.*

1679, Dec. 10. *A Second Letter from Leghorn, with a farther Account, as incredible and unparalleled as the first, from aboard the Van-herring, and a Conspiracy for seizing the Ship detected.*

1679. *An Answer returned to the Letter from Leghorn, by L. F. a Merchant concerned in the Ship.*

1679, Dec. 27. *The True News; or Mercurius Anglicus, No. 11.*

1679. *The Universal Intelligence.*

1679. *The Epitome of the Weekly News.*

1679. *The Harlem Courant truly rendered into English, No. 1, Harlem, Dec. 28, London, Dec. 29.*

1679, Dec. *English Gazette. Printed for W. E. and sold by Thomas Fox, at the Angel, in Westminster Hall.*

1679. *The Snotty-nose Gazette, or Coughing Intelligence.*

1680, July 3. *Died, JOHN MARTYN, printer of London, aged 60 years. On a flat stone in St. Faith's vault, is the following inscription:—*

M. S. Johannis Martyn, Societatus Regiæ Typographi &c.

on a very fine monument in the same vault, with a fine figure of him in robes, kneeling; his lady in beautiful drapery on the opposite, and a pile of books in the middle. He was printer for many years to the royal society. He managed all his affairs with discretion, was a thriving man in his trade, and made a very pious end.—*Denton.*

1680, Sept. 24. *Died, SAMUEL BUTLER, author of the celebrated poem of Hudibras, i. and ii. parts, London, 1662-3, 8vo.; iii. 1676, 12mo. He was born at Strensham, in Worcestershire, Feb. 8, 1612, where his father was a small farmer, and received his education first at Worcester and then at Cambridge, where he remained six or seven years. His first employment was as clerk to a justice of the peace at Earl's Cooke, in his native county. His life was chiefly passed in obscurity and poverty; and we know, says D'Israeli, little more of Butler than we do of Shakspeare and of Spenser! Longueville, the devoted friend of the poet, has unfortunately left no reminiscences of the departed genius whom he so intimately knew, and who bequeathed to Longueville the only legacy a neglected poet could leave—all his manuscripts; and to his care, though not to his spirit, we are indebted for Butler's *Remains*. His friend attempted to bury him with the public honour he deserved, among the tombs of his brothers in Westminster abbey; but he was compelled to consign the bard to an obscure burial-place in Paul's, Covent Garden. Many years after, when Alderman Barber raised an inscription to the memory of Butler in Westminster abbey, others were desirous of placing one over the poet's humble gravestone. The following epitaph is attributed to Dennis. If it be Dennis's, says D'Israeli, it must have been composed in one of his most lucid moments.*

Near this place lies interred  
The body of Mr. Samuel Butler,  
Author of Hudibras.

He was a whole species of Poets in one!  
Admirable in a Manner  
In which no one else has been tolerable;  
A Manner which began and ended in Him;  
In which he knew no Guide,  
And has found no Followers.

After his death were published three small volumes of his posthumous works, and subsequently two volumes more were printed by Mr. Thyer, of Manchester, indubitably genuine. From none of these pieces can his life be traced,

or his character fully discovered. Oldham, in his *Satires against Poetry*, thus speaks of Butler—

On Butler who can think without just rage,  
The glory and the scandal of the age.

The first part of *Hudibras* is the most perfect; that was the rich fruit of matured meditation, of wit, of learning, and of leisure. Butler had lived amidst scenes which might have excited indignation and grief; but his strong contempt of the actors could only supply ludicrous images and caustic raillery. The second part was published the following year. The third and last part was given to the world when every thing had changed! the poet, the subject, and the patron. Butler appears to have turned aside, and to have given an adverse direction to his satirical arrows, and become the satirist of the party whose cause he had formerly so honestly espoused; and the greatest glory of Butler is, that his high and indignant spirit equally lashed the hypocrites of Cromwell, and the libertines of Charles.

Butler was fortunate, for a time, in having Charles II. to admire his *Hudibras*.<sup>\*</sup> That monarch carried one in his pocket: hence his success, though the work has great merit. Yet merit does not sell a work in one case out of twenty. Butler, after all, was left to starve; for, according to Dennis, the author of *Hudibras* died in a garret.

In the *Public Intelligence*, published in 1662, there is the following warning to the public against a literary piracy:—"There is stolen abroad, a most false and imperfect copy of a poem, called *Hudibras*, without name either of printer or bookseller, as fitting so lame and spurious an impression. The true and perfect edition, printed by the author's original, is sold by Richard Marriott, under St. Dunstan's church, in Fleet-street; that other nameless is a cheat, and will but abuse the buyer as well as the author, whose poem deserves to have fallen into better hands."

1680. JOHN NORTH gave to the company of stationers a piece of plate 6½ ounces, value £20.

1680. Dr. Plot published the *Clog; or, Staffordshire Almanack*, engraved on a copper-plate.

1680. The trial, sentence, and public flagellation of Elizabeth Cellier, for writing, printing, and publishing a scandalous libel, called *Malice Defeated*, &c. London.—Thomas Dangerfield's answer to a certain scandalous and lying pamphlet, entitled *Malice Defeated*, or the deliverance of Elizabeth Cellier. London.

1680. *Jan. Advice from Parnassus*. Printed for H. L.

<sup>\*</sup> John Townley, esq., of Lancashire, translated *Hudibras* into French, except the epistle to Rhdrophel, which indeed has nothing to do with the rest of the poem. Mr. Townley was educated in France, and was for a long time in the French service, and thus naturally acquired an intimate knowledge of the French language. He was uncle to Charles Townley, esq., who died January 2, 1805, trustee of the British museum, and celebrated for his noble and elegant collection of ancient marbles. John Townley was born in 1697, and died in 1782.

† Dr. Robert Plot, a very celebrated antiquary, died at Borden, April 30, 1696.

1680, Jan. 6. *The Latin Gazette*, a paper imported from Germany, to be seen at the Widow's Coffee House, and Black Boy, Ave Mary Lane.

1680, Jan. 16. *The Protestant (Domestic) Intelligence*, No. 58.

1680, Feb. 5. *A short but just Account of the Tryal of Benjamin Harris for printing a seditious Book*, called, *An Appeal from the Country to the City*.

1680, Feb. 6. *An impartial Account of the Tryal of Francis Smith, for printing a Book*, called, *Tom Ticklefoot*, &c.; and of Jane Curtia, for printing *A Satyr upon Injustice*.

1680, Feb. 14. *The Current Intelligencer*; or, an impartial Account of Transactions, both foreign and domestic, printed by John Smith, Great Queen-street, No. 1.

1680, March 13. *The Courant Intelligence*; or an impartial Account of Transactions, both foreign and domestic. Printed for Allen Banks, bookseller, in Fetter-lane.

1680, Feb. 28. *Mercurius Publicus*; being a summary of the whole week's intelligence, No. 1.

1680, March 1. *Catholick Intelligence*; or, infallible News both Domestic and Foreign; published for the Edification of Protestants. Printed for J. How, Sweeting's Alley, Cornhill.

1680, March 4. *Mercurius Infernus*; or, News from the other world, discovering the cheats and abuses of this; being all Truth, no Fable, No. 1.

1680, March 22. *Mercurius Civicus*; or, a true Account of Affairs, both Foreign and Domestic, No. 1.

1680, March 27. *The True News*, No. 37, first announces, that "a project was setting on foot for conveying of letters, notes, messages, amorous billets, and all bundles whatsoever, under a pound weight, and all sorts of writings (challenges only excepted) to and from any part of the city and suburbs; to which purpose the projectors have taken a house in Lime-street for a general office, and have appointed eight more stages in other parts at a convenient distance; a plot, if not timely prevented by the freemen porters of the city, is like to prove the utter subversion of them and their worshipful corporation." It is not generally known that this important benefit to the comfort and convenience of the inhabitants of London and the environs, and also to the revenue (believed to be £200,000 and £300,000 per annum) was the invention and property of a private merchant, a Mr. Docura,\* who, about the year 1683, seeing the deficiencies

<sup>\*</sup> It is a singular fact, that to another of the same family London is indebted for one of its principal ancient relics, viz., St. John's Gate, built by Sir Thomas Docura, the last grand prior of Malta in England, who sat as an earl in the house of peers. His family arms, derived from Palestine, are carved on the outside and painted on the roof. This was a noble and very generous family, originally from the north, afterwards of Herts (*vide* Chauncy) and Ireland, where they obtained lands and a peerage for distinguished services, 1621. They were allied to very noble families, and through that of the first lord St. John, of Blesto, to the royal stock of their own name. Between 1100 and 1650 they reckoned about twenty knights, English and foreign. A grand memorial is seen in Lelley church, Herts, and two houses, each styled Docura hall, remain at Kendal and Penrith.

in this respect of the general post, established an office for the conveyance of letters to all parts of London, and the environs for ten miles (more or less) around, at one penny each; purchasing a great number of horses, and engaging steady men, who it may be supposed, were in those times armed. It almost instantly obtained general approval and acceptance. The government soon cast an anxious eye on this powerful novelty, and finally took it into their own hands. What license or patent he had is not fully known, but it is understood that he had some, besides a moral right; but he unfortunately made no demand for compensation. The public expected that he would be appointed superintendent of the new institution, with some benefit to his descendants; but no reward or compensation was given; on the contrary, his family suffered injury.

1680. *The English Gazette*.

1680. *The Loyal Intelligence*; or, News both from City and Country, No. 3, March 31, according to the old Julian, not the new Popish Gregorian Account.

1680, April 22. *Mercurius Librarius*; or a faithful account of all books and pamphlets, No. 2. "All booksellers that approve of the design of publishing this catalogue weekly, or once in fourteen days at least, are desired to send in to one of the undertakers any book, pamphlet, or sheet they would have in it, so soon as published, that they may be inserted in order as they come out: their books shall be delivered to them back again upon demand. To shew they design the public advantage of the trade, they will expect but 6d. for inserting any book; nor but 12d. for any other advertisement relating to the trade, unless it be excessive long."

1680, April 23. *The true Protestant (Domestick) Intelligence*. No. 1.

1680. *The Rotterdam Courant*.

1680, May 12. *Mercurius Civicus*, No. 241. In this paper first occurs a proposal to insure houses from fire, at an office in Threadneedle-street.

1680, May 12. *A Proclamation for suppressing the printing and publishing unlicensed News-books and Pamphlets of News*.

"Whereas it is of great importance to the state, that all news printed and published to the people, as well concerning foreign as domestick affairs, should be agreeable to truth, or at least warranted by good intelligence, that the minds of his majesty's subjects may not be disturbed, or amused by lies or vain reports, which are many times raised on purpose to scandalize the government, or for other indirect ends: And whereas of late many evil-disposed persons have made it a common practice to print and publish pamphlets of news without licence or authority, and therein have vended to his majesty's people all the idle and malicious reports that they could collect or invent, contrary to law; the continuance whereof would in a short time endanger the peace of the kingdom, the same manifestly tending thereto, as has been declared by all his majesty's judges unanimously; his majesty, therefore, considering

the great mischief that may ensue upon such licentious and illegal practices, if not timely prevented, hath thought fit by this his royal proclamation (with the advice of his privy council) strictly to prohibit and forbid all persons whatsoever to print or publish any news-books or pamphlets of news not licensed by his majesty's authority."

1680. *The Impartial London Intelligence* or Occurrences, foreign and domestick. Printed for Thomas Benskin.

1680. *Mercurius Publicus*; or domestick and foreign news.

1680, Oct. 7. *Weekly Advertisement of Books* No. 1. Printed by R. Everingham, and annexed to the city mercury, from the office of the Royal Exchange, No. 250.—In No. 6, Nov. 11 is the following caution:—"It is not unknown to booksellers, that there are two papers of this nature weekly published; which, for general satisfaction, we shall distinguish. That printed by Thomas James is published by Mr. Vile, only for the lucre of 12d. per book. This printed by Robert Everingham is published by several booksellers, who do more eye the service of the trade, in making all books as public as may be, than the profit of insertions. All men are therefore, left to judge who is most likely to prosecute these ends effectually; whether a person that is no bookseller, nor hath any relation to that trade, or those who have equal end with all others of the trade, in dispersing the said papers both in city and country. All titles to be inserted in this paper are either to be left with Robert Everingham, a printer, or to be delivered to Mr. Orchard, a porter."

1680, Nov. 29. *Votes of the House of Commons* Printed for John Wright and Richard Chiswell by authority of W. Williams, speaker.

1680, Dec. 22. *The English Gazette*, No. 1.

1680, Dec. 28. *The True Protestant Mercury* or Occurrences Foreign and Domestick, No. 1. Printed for H. T. and L. V. and sold by Langley and Curtis, Ludgate Hill; continued till 1682. From No. 79 it was printed at the sign of six Edmondbury Godfrey, near Fleet-bridge.

1681, May 27. "The Sweet Singers" of the city of Edinburgh, renounce the printed Bible at the Canonage tolbooth, and all unchaste thoughts, words, and actions, and burn all story books, ballads, romances, &c.

1681. An edition of the *New Testament*, in the Irish character, was printed at London, at the expense of the Hon. Robert Boyle, who mentions the circumstance in a letter to the rev. J. Kirkwood; "I, with much ado, procured a version of the New Testament; and finding it to have been many years out of print, the copies having, as I have been informed, been bought up, from time to time, by some Romish ecclesiastic, I caused a fount of Irish letters to be cast and the book to be here [in London] reprinted of which I sent over some hundreds, ready bound, to be distributed gratis among those to whom they should upon the place be judged the most likely to do good." The press was corrected by

a Mr. Reily, a person well versed in the Irish language, though born in France. An excellent preface was prefixed, written either by Mr. Boyle, or one of his friends: it is copied in the *Appendix to the Life of the Hon. Robert Boyle*, by Birch, No. 11, Works, vol. i. London, 1772, 4to.

The printing of the *New Testament* in Irish, was soon followed by the publication of the *Old*, under the patronage of the same benevolent person. The following curious account of the expenses of transcription, is given by Dr. Narcissus Marsh, in a letter to Mr. Boyle, dated August 24, 1685:

Paid for transcribing 719½ sheets...	35	19	6
For pens, ink, and paper (whereof 18 quires were 8d per quire, the rest 6d.) .....	0	18	0
For translating 17 psalms that were wanting .....	3	0	0
To Mr. Mullan, for revising the transcript.....	4	10	0
At the custom for the Irish testaments .....	0	9	2
	£44	16	8

Mr. Mullan received £2 7s. 6d. more, afterwards. These expenses included the transcription of the *Apocrypha*, (about 157 sheets) which was not printed. The whole Bible being transcribed and corrected, it was put to press, and an edition of five hundred copies in the Irish character was issued, printed at London, in two volumes 4to. Mr. Boyle contributed £700 towards defraying the expenses of printing these two editions.

1680. From Clavel's *Catalogue* it appears, that the whole number of books printed in England, from the year 1686 to 1680, was 3,550; of which 947 were divinity, 420 law, and 135 physic—so that two-fifths of the whole were professional books, 397 were school books, and 253 were on subjects of geography and navigation, including maps. On the average of the fourteen years the total number of works produced annually was 253; but deducting reprints, pamphlets, single sermons, and maps, the average would be much under one hundred. This will show an increase upon a former period, namely, from 1471 and 1600, a period of about 130 years, the average number of distinct works published each year in this country was seventy-five.

1681. The *Spanish Friar*, by John Dryden, was printed for Richard and Jacob Tonson, at Gray's Inn-gate, in Gray's Inn-lane, and at the Judge's Head, in Chancery-lane. This appears to be the first work published by the *Tonsons*.

Mr. J. Tonson was bookseller to the famous Dryden: and is himself a very good judge of persons and authors: and as there is nobody more competently qualified to give their opinion of another, so there is none who does it with a more severe exactness, or with less partiality: for, to do Mr. Tonson justice, he speaks his mind upon all occasions, and will flatter nobody.—*Dunton*.

1681. *Died*, JOHN FOSTER, printer, of Boston, North America. He was graduated at Harvard college, in North America, in 1667. In the year 1676, about forty years after the beginning of the settlement, he conducted the press, from which issued the *first book* ever printed in Boston. The following epitaph, in black letter, was placed on his grave-stone.

Thy body, which no activeness did lack,  
Now's laid aside, like an old almanack;  
But for the present only's out of date;  
'Twill have at length a far more active state;  
Yea, though with dust the body soll'd be,  
Yet at the resurrection we shall see  
A fair edition, and of matchless worth,  
Free from errors, not in heaven set forth:  
'Tis but a word from God, the great Creator,  
It shall be done when he says *Imprimatur*.

1681. *Died*, GEORGE SAWBRIDGE, printer. He was master of the stationers' company in 1675, and in 1677, he gave to them a large silver bowl, 46 oz. 3 dwts. He was treasurer to the company from the year 1647 to 1679.

George Sawbridge, esq. was the greatest bookseller that has been in England for many years, as may sufficiently appear by the estate he has left behind him; for, besides that he was chosen sheriff of London, and paid his fine, he left behind him four daughters, who had each of them for their portion £10,000 a-piece. And if Mr. Awnsham Churchill, his apprentice, continue to thrive as he has begun, he will be as rich as his master in a few years. Mr. George Sawbridge succeeds his father in the trade, and prints many valuable copies. He has good skill in military discipline, and made a very handsome figure in captain Robiuson's company.—*Dunton*.

1681, Dec. 26. *Died*, THOMAS NEWCOMBE, printer to king Charles II. He left to the stationers' company a silver bowl, weight 68 oz. 12 dwts., which was presented by his executor, Mr. Henry Herringman. In the south aisle of the church at Dunchurch, in Warwickshire, on a white marble tablet, with open marble doors, is the following inscription:—

Here lieth interred the body of  
Thomas Newcombe, Esq. a worthy Citizen of London,  
and Servant to his late Majesty K. Charles II. in his  
Printing-office; who departed this life 26 December, 1681,  
in the 53d year of his age.

In memory of whom, his son, Tho. Newcombe, Esq.,  
Servant likewise to his late Majesty and his present Ma-  
jesty King James H. in the same office, erected this  
monument.

He likewise departed this life March 21, 1691, being  
Good Friday.

On the left door:—

Mrs. Dorothy Hutchinson, relict of Thomas Newcombe,  
sen. Esq. departed this life Feb. 28, 1718.

Near the church, to the west, are six almshouses, with this inscription:—

These Almshouses are the Legacy of Tho. Newcombe, Esq. Printer to King Charles the 2d, King James the 2d, and his present Majesty King William 3d, for the maintenance of 3 poor men and 3 poor widows borne in this parish, built and endowed by his Widow and Executrix in the year of our Lord God 1693.

Thomas Newcombe, jun., gave by will £600 for this purpose; the building cost £150; and the rest was laid out in the purchase of land at

Shawell, in Leicestershire. The vicar for the time being manages the whole, and makes up the allowance 1s. 6d. a week, with coals, &c.

1681, Nov. 25. *A New Dialogue between Somebody and Nobody*; or the Observer observed.

1681, Dec. 9. *The Important Protestant Mercury*, No. 66. This paper contains proposals from the chamber of London, "for insuring houses in case of fire." On payment of £2 8s. the sum of £100 to be insured for 31 years.

1681. *The Monthly Recorder of all true Occurrences, both Foreign and Domestic*.

1682, Jan. *Acta Eriditorum*, the first critical journal published in Latin, and the most celebrated for its literary and scientific reviews, which was not confined merely to review of books, but inserted also accounts of scientific discoveries, and of the general progress of mathematical and physical discoveries. It began to be published at Leipzig under the conduct of the learned Otto Mencke, one of the professors of the university, assisted by several of his brother professors, and especially by Carpzov. (Morhof. *Polyhistor*, i. 178. edit. 1747). The numbers, which were in 4to., appeared once a month. On the death of its original editor, in

\* Roger L'Estrange.

the beginning of the year 1707, the management of the journal was undertaken by his son John Burchard Mencke; on whose death, in 1732, the charge devolved on his son Frederic Otto. The property of the work seems to have remained to the last in the hands of the Mencke family, or their heirs; but the latter editors were not men of distinguished name. The last was Charles Andrew Bel, professor of philosophy in the university, who, after managing the publication from 1754, died on the 4th of April, 1782. The volume for 1776 was only published in that same month. It was the last which appeared; although the publisher intimates his hope that the work will regain its ancient reputation, having thus got rid of the editor who had allowed it to fall so sadly into arrear, a matter, he remarks, concerning which the less that is said the better. In the hands of its early editors, it was considered to be admirably conducted; and Morhof congratulates his countrymen on having, in this publication, produced something which even commanded the approbation of foreigners, "who rarely," he is pleased to add, "find anything done by us (the Germans) to their taste." He mentions a translation of the *Acta* into French, which had been undertaken; but this undertaking does not appear to have proceeded beyond the first volume, which was published in 12mo. at the Hague, in 1686, under the title of *Ouvrages des Savans, publiés à Leipzig*. After the first fifty volumes, coming down to the end of the year 1731, the journal took the name of the *Nova Acta*, or the *New Acta*. The first series, besides the fifty regular volumes, consists of ten supplementary volumes, one having been published every five years. Occasional supplements also appeared in the course of the new series; which, together with several volumes of indices, make the complete work amount to 117 volumes.

1682. *Died*, EVAN TYLER, stationer, of London. He was master of the company in 1672, and by will, dated Dec. 5, 1681, he gave £500, and the interest of £120, to be applied to a yearly collation for the masters, wardens, and assistants, and such other members as they shall choose for their trouble. In 1688, the small sum which the company received towards a dinner from the legacy of Mr. Lamb, (amounting to £1 2s. 8d.) was consolidated with the interest of £120 (£7 4s.) given by Mr. Evan Tyler, to be expended in a dinner on May 29. The following epitaph is copied from Mr. Park's *History of Hampstead*:—

*Mors mihi lucrum.*

Here resteth ye body of Mr. Evan Tyler,  
late Citizen and Stationer of London,  
who departed this life ye fifth day of December,  
anno Dom. 1681.

This tombe was erected for, and at the special appointment and direction of, Mr. Evan Tyler, by us Henry Tronge, clerks, Nicholas Hardinge, and William Miller, his executors, ye 12th day of February, anno Dom. 1683.

1682. *Friendly Advice to the corrector of the English Press at Oxford, concerning the English Orthographie*. London, folio.

1682. A magnificent missal, in the public library at Rouen, nearly three feet in height, which occupied the labour of a monk of St. Audeon for thirty years, was completed at this time. It is supposed to be the latest specimen of illuminated manuscripts.

1682, Jan. 1. *Monthly Recorder* of all true Occurrences both Foreign and Domestic, No. 1. This seems to be the first publication of a monthly miscellany; and it complains of the haste in which the weekly gazettes, intelligences, mercuries, currants, and other news books, were put together, "to make their news sell." Published by Langley Curtis.

1682, Jan. 17. *Complete Mercury, or Haerlem Courant*, truly rendered into English, No. 1.

1682, Feb. 16. *London Gazette*, No. 1695.

1682, Sept. 25. *L'Etat present de l'Europe; suivant les Gazettes et autres Avis d'Angleterre, France, Hollande, &c.* Imprime a Londres pour Mr. Guy Miegé, Auteur, No. 1.

1682. *New News Books; or, Occurrences both Foreign and Domestick*: by R. Janeway.

1682. *Moderate Intelligencer*. R. Robinson.

1682. *Current Domestick, and Foreign Intelligencer*. Printed by George Croom.

1683. *Fleta Minor; or, the Laws of Art and Nature in knowing the bodies of Metals, &c.* by sir John Pettus, who gave it this title from the circumstance of his confinement in the Fleet prison, London. *Fleta*, a well-known law production, was also written by a preson in the Fleet.

1683. PETER WALPERGEN, or WALPERGER, was a type-founder at Oxford in this year, but of whom no further information can be obtained.

1683. *Died*, SAMUEL MEARNE, stationer to king Charles II. He was master of the stationers' company in 1679 and again in 1683, dying whilst in office. In 1685, Mrs. Anna Mearne his widow and executrix, presented to the company a silver salver weight 58½ oz. Mrs. Mearne added a tankard 31 oz. 16 dwts. It was from the representatives of Mr. Mearne that king George III., in the year 1762, purchased the valuable collection of pamphlets, now in the British museum, known by the name of the *King's Pamphlets*. The following account of them is found annexed to the first folio volume of the manuscript index, which seems to have been printed with a view of promoting their sale at some subsequent period.

*A Complete Collection of Books and Pamphlets begun in the year 1640, by the special command of king Charles I. of blessed memory, and continued to the happy Restauration of the Government, and the Coronation of king Charles II.*

There hath been very much money disbursed, and great pains taken, and many hazards run in making an exact collection of all the pamphlets that were published from the beginning of that long and rebel parliament which began November, 1640, till his late majesties happy Restauration and Coronation, consisting of near thirty thousand several sorts, and by all parties. They may be of very great use to any gentleman concerned in publick affairs, both for this present and after ages, there being not the like in the world, neither is it possible to make such a collection. The collection contains upwards of two thousand volumes, all of them uniformly bound, as if they were done at one time, and all exactly marked and numbered. The method that has been observed, as time, and such punctual care was taken, that the very day is written upon most of them when they came out. The catalogue of them, fairly written, is in twelve volumes in folio, and though the number of them be so great, (when the books are set in their order, according to the mark set upon each of them) the smallest piece, though but one sheet of paper, being shewn in the catalogue, may be found in a moment; which method is of singular use to the reader. In the whole are contained near one hundred several manuscript pieces that were never printed, all or most of them on the king's behalf, which no man durst then venture to publish without endangering his ruin. But the peruser now may, by them, be let into the knowledge of many occurrences in those times, which have passed hitherto unobserved. This collection was so privately carried on, that it was never known that there was such a design in hand; the collector designing them only for his majesties use that then was: his majesty having occasion for a pamphlet, could no where compass the sight of it but from him, which his majesty having perused, was very well pleased with the design, and commanded a person of honour to restore it with his own hands, and withal, expressed his desire of having the collection continued. This was the great encouragement to

the undertaker, who had otherwise desisted prosecuting so difficult and chargeable a work, which lay a heavy burden upon himself and his servants for above twenty years. To prevent the discovery of them, when the army was northwards, he packed them up in several trunks, and by one or two in a week, sent them to a trusty friend in Surry, who safely preserved them; and when the army was westward, and fearing their return that way, they were sent to London again, but the collector durst not keep them, but sent them into Essex, and so according as they lay near danger, still by timely removing them, at a great charge, secured them, but continued perfecting the work. And for a farther security to them, there was a bargain pretended to be made with the university of Oxford, and a receipt of a thousand pounds, given and acknowledged to be in part for them, that if the usurper had found them out, the university should claim them, who had greater power to struggle for them than a private man. All these shifts have been made, and difficulties encountered to keep the collection from being embezzled and destroyed; which, with the great charges of collecting and binding them, cost the undertaker so much, that he refused four thousand pounds for them in his life time, supposing that sum not sufficient to reimburse him.

The collector was a clergyman, and his name Thomason; for the direction, which is preserved, is, "For the Reverend G. Thomason. These."

It appears that after an interval of a few years they came into the possession of the king's stationer, for there is preserved, in the museum, the copy of an order of privy council, authorizing Anne Mearne, relict of Samuel Mearne, his majesties stationer, to dispose of them as she might think fit.

At the Court at Whitehall,  
the 15th of May, 1684.

By the kings most excellent majesty and the lords of his majesties most honble. privy council.

The humble peticon Anne Mearne, relict of Samuell Mearne, his majesties stationer, lately deceased, being this day read at the board, setting forth, That his majesty was pleased, by sir Joseph Williamson, the Secretary of State, to command the petitioners husband to purchase a collection of severall bookes, concerning matters of state, being above thirty thousand in number, and being vniformly bound, are contained in two thousand volumes and vpwards, and that by reason of the great charge they cost the petitioners husband, and the burthen they are upon herselfe and family, by their lying vndisposed of soe long, Therefore most humbly prays his majesties leave to dispose of the said collection of bookes, as being a ready way to raise money upon them, to support her selfe and family: His majesty in council was graciously pleased to give leave to the petitioner to dispose and make sale of the said bookes as she shall thinke fit.

PHI LLOYD.

There was a CHARLES MEARNE, bookseller to the king, who died in the latter part of the year 1686, and was most probably a son of the above. His stock of French books was sold by Mr. W. Cooper, February 28, 1687, at the King's arms, Charing cross; and his English books by Mr. Millington, at Richard's coffee house.

1683, Jan. 27. *The English Gusman*, or Captain Hilton's Memoirs, the Grand Informer.

1683, Feb. 10. *Scot's Memoirs, by way of Dialogue*, No. 1.

1683. *Scotch Memoirs, by way of Dialogue between John and Elymas*. Printed, No. 1 and 2 for William Abington, and the subsequent numbers for Richard Butts, at the Bear and Orange tree, in Prince's-street. February.

1683, March 22. *Domestic Intelligence*, published gratis every Thursday, for the promoting of Trade, by B. Harris.

1683. *Weekly Memento for the Ingenious; or an Account of Books in 1682*.

1683, June 28. *The Jockey's Intelligence; or, Weekly Advertisements of Horses and second-hand Coaches to be bought or sold*. In this paper the charge for inserting advertisements (then untaxed) was a shilling for a horse or coach, for notification, and sixpence for renewal. Printed by J. Smith.

1683, Dec. 7. On this day was beheaded, on a groundless charge of high treason, on Tower-hill, the celebrated Algernon Sydney. He was a great patriot, and an eminent politician. His principles were highly appreciated, and his writings are still held in great repute. His *Discourses on Government* are chiefly designed to show the necessity of a balance between the popular and monarchical parts of a mixed government, and have obviously a particular reference to the political evils of his own time, to which, unfortunately he was himself a victim.

The boldest son of public weal  
See Sydney leaning o'er the block! his mien,  
His voice, his hand, unshaken, clear, serene;  
Unconquer'd patriot! form'd by ancient lore,  
The love of ancient freedom to restore,  
Who nobly acted what he boldly wrote  
And seal'd by death, the lessons that he taught.

He was the son of Robert earl of Leicester, and born about 1617. He distinguished himself at the beginning of the civil wars by his opposition to Charles I., but when Cromwell assumed the sovereignty, under the title of protector, Sydney retired to private life. He was apprehended on a charge of being concerned in the Rye-house plot, tried before judge Jefferies, and sentenced to death. The sentence against him was declared illegal in the first parliament of William and Mary. His *Discourses* were not published until the year 1689, and again by Hollis. Lord William Russell had before fallen a victim to the jealousy and fears of the king. This eminent patriot was beheaded in Lincoln's Inn Fields, July 21, 1682, aged forty-four years.

1684, Feb. 5. A remarkable frost overspread the Thames from the beginning of December, 1683, until February 5, 1684. Evelyn, who was

an eye-witness of the diversions carried on upon the ice, furnishes perhaps, the most extraordinary account of it in his *Diary*, where, on January 24, he observes that "the frost continuing more and more severe, the Thames before London was still planted with booths in formal streets, all sorts of trades and shops furnish'd, and full of commodities, even to a printing presse, where the people and ladies took a fancy to have their names printed, and the day and years set down when printed on the Thames: this humour took so universally, that 'twas estimated the printer gained £5 a day, for printing a line only, at sixpence a name, besides what he got by ballads, &c. Coaches plied from Westminster to the Temple, and from several other stairs to and fro, as in the streets; sleds, sliding with skeetes, a bull baiting, horse and coach races, puppet-plays, and interludes, cookes, tipling, and other lewd places, so that it seem'd to be a bacchanalian triumph, or carnival on the water." Charles II. with other personages of the royal family, visited these diversions, and had their names printed on the ice. The author of some curious verses, entitled, *Thamasis's Advice to the Painter, from her Frigid Zone; or, Wonders upon the Water*, says,

Then draw the King, who on his Leads doth stay,  
To see the throng as on a Lord Mayor's day,  
And thus unto his Nobles pleas'd to say,  
With these Men on this Ice, I'd undertake  
To cause the Turk all Europe to forsake:  
An army of these Men, arm'd and compleat,  
Would soon the Turk in Christendom defeat.

The same poem contains the following advice to its readers:

—To the Print-house go  
When Men the Art of Printing soon do know:  
Where for a Teaster you may have your Name  
Printed, hereafter for to show the same;  
And sure in former ages ne'er was found  
A Press to print where men so oft were drowned.\*

London: Printed by G. Croom, on the ICE, on the River of Thames, January 31, 1684.

1684. *Nouvelles de la Republique des Lettres*. The celebrated PETER BAYLE published this work. He possessed the art, acquired by habit, of reading a book by his fingers, as it has been happily expressed; and of comprising, in concise extracts, a just notion of a book, without the addition of irrelevant matter. Lively, neat, and full of that attic salt which gives a relish to the driest disquisitions, for the first time the ladies and all the *beau-monde*, took an interest in the labours of the critic. He wreathed the rod of criticism with roses. Yet even Bayle, who declared himself to be a reporter, and not a judge, Bayle the discreet sceptic, could not long satisfy his readers. His panegyric was thought somewhat prodigal; his fluency of style somewhat too familiar; and others affected not to relish his gaiety. In his latter volumes, to still

\* The original of this poem is in the possession of Mr. William Upcott, of the London Institution, whose valuable collection of rarities can also boast one of the very papers on which the king and his royal companions had their names printed. This document consists of a quarter-sheet of coarse Dutch paper.

the clamour, he assumed the cold sobriety of an historian; and has bequeathed no mean legacy to the literary world, in thirty-six small volumes of criticism, closed in 1687. These were continued by Bernard, with inferior skill; and by Basnage more successfully in his *Histoire des Ouvrages des Sçavans*. Voltaire has said that Bayle confessed he would not have made his dictionary exceed a folio volume, had he written only for himself, and not for the booksellers. This dictionary, with all its human faults, is a stupendous work, which must last with literature itself.

1684, Oct. 13. The charter of the company of stationers was again exemplified, at the request of Roger Norton, then master, and Henry Hills and James Cotteral, wardens of the company.

1684, Nov. The music feast on St. Cecilia's day was held at stationers' hall. In the wardens' accounts from the 5th day of July, 1684, to the 24th of July, 1685, is the following entry under the head of charge: "Received, the 25th of November, 1684, for the music feast kept in the hall, £2. The price paid by the stewards of this feast for the use of the hall, till 1694, was only £2; in 1694 and 1695, £4; in 1698, £5; and in 1700 six guineas was paid.—For some curious particulars, see Malone's *Life of Dryden*, vol. i.

1684, July 26. *The Observer Reformed*, No. 104. It is announced in one of the numbers of this paper, that advertisements of eight lines are inserted for one shilling.

1684, Nov. 26. *Account of the Proceedings against Nathaniel Thompson, upon his Trial at the King's Bench Bar, Westminster.*

1685, Feb. 6. Died, CHARLES II., king of England, whose character it is difficult to describe with any certainty.\* With graceful manners and a pleasing address, he possessed various talents, and a fund of ready wit. Some historians have defined him according to their own peculiar principles and prejudices; all allow that he was gifted with sense and judgment, and all agree in representing him to have been trifling, capricious, and extravagant; addicted to voluptuous pleasures, and incapable of serious attention. His affability was such, that he always treated others as gentlemen, but was himself deficient of kingly dignity. His natural indolence induced him to follow the advice of others, rather than take the trouble to think for himself; his sensuality rendered him heartless and ungrateful; and he wanted energy to be generous, or he could not have allowed the author of *Hudibras* (a work from which the royal cause derived great advantages, and the monarch a continual source of amusement) to live in obscurity, and die in

distress; and the pathetic Otway† to expire from hunger. With respect to religion, he wanted the real principle of virtue; and while in the enjoyment of health, felt careless as to the appearance of it; but having been early initiated in the Catholic faith, he fled to its sanctuary in the moment of expecting dissolution.

Of the writers of this reign there were some of considerable reputation. Four of the poets were of the rank of earls, the earl of Rochester,‡ celebrated for his profligacy and wit; the earl of Roscommon§ who was a smooth and elegant versifier; the earl of Halifax,¶ an eminent historical personage; and the earl of Dorset,|| who remains as the only worthy poetical personage of this list. The nautical ballad, *To all you ladies now on land*, by this nobleman, remains as the only worthy poetical memorial of a very amiable nobleman, and magnificent patron of poets.

The wits of Charles found easier ways to fame  
Nor wish'd for Jossion's art or Shakespeare's flame.  
Themselves they studied, as they felt they writ;  
Intrigue was plot, obscenity was wit.  
Vice always found a sympathetic friend;  
They pleased their age, and did not aim to mend.  
Yet bards like these aspired to lasting praise,  
And proudly hoped to pimp in future days.

Of the writers of this period Wordsworth gives the following character.

Great men have been among us; hands that penned  
And tongues that uttered wisdom, better none:  
The latter Sidney, Marvel, Harrington,  
Young Vane, and others who called Milton Friend.  
These Moralists could act and comprehend;  
They knew how genuine glory was put on;  
Taught us how rightfully a nation shone  
In splendour: what strength was, that would not bend  
But in magnanimous meekness. France, 'tis strange,  
Hath brought forth no such souls as we had then.  
Perpetual emptiness! unceasing change!  
No single volume paramount, no code,  
No master spirit, no determined road;  
But equally a want of books and men!

1685. *County Gentleman's Courant*, published by Morpheus. The editor remarks that, "seeing promotion of trade is a matter that ought to be encouraged, the price of advertisements is advanced to twopenne per line."

1686. JOSEPH MOXON published his typographical work, entitled *Mechanical Exercises*, a work which has commanded respect to the present day, and though it may yield in extent

\* Evelyn in his *Diary* of February 6, says, "The king died. I can never forget the inexpressible luxury and profaneness, gaming, and all dissoluteness, and, as it were, total forgetfulness of God, (it being Sunday evening,) which this day se'night I was witness of. The king sitting and toying with his concubines Portsmouth, Cleveland, and Mazarine, &c. and a French boy singing love songs; whilst above twenty of the great courtiers and other dissolute persons were at basset round a large table, with a bank of at least 2000 in gold before them."

† Thomas Otway was born at Trotting, March 2, 1681; he was the son of a clergyman, and by profession a player and a poet, though unsuccessful in both capacities. After a life spent in the utmost poverty, degradation, and wretchedness, he is said to have died in consequence of eating, when almost famished, a roll which had been given him in charity. Out of ten plays, written by this unfortunate author, two only are now in repute, *Venice Preserved* and the *Orphan*; and upon the appearance of the former, in 1682, it took such hold of the stage, that even to this day it has not been diminished. Otway died April 14th, 1685, and was buried in St. Clement Danes, London.

‡ John Wilmot, earl of Rochester, the inseparable companion of Charles II., died July 26, 1680.

§ Wentworth, earl of Roscommon, died Jan. 17, 1694.

¶ Charles Montague, earl of Halifax, was born April 17, 1666, and died 1716.

|| Charles Sackville, earl of Dorset, was born in 1667, and died in 1705.

and practical value to those of Fournier, it must be remembered that the pursuits of Mr. Moxon were those of general science, while Fournier was by birth, education, and profession, a letter-founder. Moxon was the first of English letter-cutters who reduced to rule the art which before him had been practised but by guess, and left to succeeding artists examples that they might follow; by nice and accurate divisions, he adjusted the size, situation, and form of the several parts and members of letter, and the proportion which every part bore to the whole. The letters most in use in England when Moxon wrote, were pearl, nonpareil, brevier, long primer, pica, english, great primer, double pica, two-line english, and french canon. These are all the bodies of letter noticed by Moxon, from which it appears, that in his time printers were not incumbered with so many different founts as they are at present; for now there are seven sorts of letter more than are noticed in the above list, viz. minion, bourgeois, small pica, paragon, two-lines pica, two-lines great primer, and two-lines double pica. For, if these seven sorts had then existed, Mr. Moxon would not have failed to have mentioned them, as he does small pica; concerning which he says, "We have one body more, which is sometimes used in England, that is, a small pica; but I account it no discretion in a master printer to provide it, because it differs so little from pica, that unless the workmen be more careful than they sometimes are, it may be mingled with the pica, and so the beauty of both may be spoiled."

Mr. Moxon followed the business of a mathematical instrument maker, and resided at the sign of the Atlas, on Ludgate hill, where he suffered materially by the great fire of London. On November 30, 1678, he was elected a fellow of the royal society, and hydrographer to king Charles II.

The provisions of that absurd and oppressive decree which had restrained the number of master printers to twenty, and, by the same act, the number of the type-founders to four, like all other enactments which are opposed to the spirit of an age, were found to have been impossible of execution. The demand for knowledge had become so general that twenty printers and four founders were quite inadequate to the supply, whatever might have been the opinion of Charles II. and his arbitrary court. The supply, therefore, went; for Mr. Moxon informs us, that "the number of founders and printers were grown so many, insomuch that, for the more easy management of typography, the operators had found it necessary to divide it into the several trades of the master-printer, the letter-cutter, the letter-caster, the letter-dresser, the compositor, the corrector, the pressman, the ink-maker, besides several other trades which they take into their assistance, as the smith, the joiner, &c." Such a division of labour indicates the natural progress of an art towards perfection, and is indeed in itself a cause of that perfection. Moxon says that letter-cutting was a handy-work at that time, kept so concealed among the artificers of it, that

he could not learn any one had taught it any other. Moxon himself, however, laid down mathematical rules for the formation of letters, but his science does not seem to have led him to any improvement in shape, for the characters which he formed are like the ugly Elzevirs.

1686, May. King James II. granted a licence to Obadiah Walker, and his assignees only, for twenty-one years, to print and sell the books following, without incurring any penalty, loss, or disability whatsoever; so that the number of any one of the said books printed in any one year exceed not 20,000.

*Succession of the Clergy; Church Government; Eucharist; Communion in one kind; Eucharist in Compendium; Motives to Christian Piety; Necessary Piety; Infallibility; Obligation of Judgments; Short Confessions of Faith; Danger of Schism; Concerning Sacred Things; Celibacy; Miracles; Idolatry; Anti-Christ; Appendix to Roman Devotions; Benefits of the Holy Ghost; Adam's Fall; Litanies and Hymns; Pious Romances, et Parisiensis; Rubric; Consideration on the Lives of Saints; Oral Tradition; Infallibility of the Soc. of Jesus; State of the Dead; Guide in Controversies; Roman Devotions vindicated; Roman Doctrine of Repentance and Indulgences vindicated; Stillings' Principles considered; Paraphrase on St. Paul's Epistles; Benefits of our Saviour; Life of Jesus Christ; S. Teresa's Works; S. Austin's Life; Greg. Lopez's Life.*

Obadiah Walker was at first a divine of the church of England, but afterwards joined the Roman catholics. He was himself the author of several of the above mentioned pieces. In the same place above referred to, will be found king James's licence, dispensation, and pardon, for Obadiah Walker, master of university college, Oxford, and others. The original of this licence is preserved among bishop Tanner's manuscripts in the Bodleian library, Oxford.

1686. WILLIAM LEYSBURN, a printer in London, but of whom there is no account of his birth or death. He published several of the mathematical works of Samuel Foster, astronomical professor to Gresham college. He afterwards became an eminent author himself, and appears to have been the most universal mathematician of his time. He published many mathematical treatises in the seventeenth century. Among these his *Cursus Mathematicus* was esteemed the best system of the kind extant. His *Panarithmologia*; or, *Trader's Sure Guide*, being tables ready cast up, was long in use. It was formed upon a plan of his own, and has been adopted by M. Barenne, in France. The seventh edition was published in 1741.

1686. Pennsylvania\* was the second English colony in America (Massachusetts being the first) in which the art of printing was established. About the year 1686 or 1687, William Bradford, a native of Leicester, in England, set up a press near Philadelphia; commencing his labours by printing a sheet almanac for the year 1687: in 1689 he moved into the city, where one of his earliest essays was a quarto pamphlet by George Keith, respecting the New England churches.

\* This province was founded by the justly celebrated William Penn, in the year 1682. He was born in London, Oct. 1644, and died July 20, 1718.

1686. The famous OLAUS RUDBECK erected a press in his own house at Upsal, an ancient and celebrated city of Sweden, which, together with the fourth volume of his great work, the *Atlantica*, was consumed in the dreadful fire which laid waste that city in the year 1702: not more than three or four copies are supposed to have escaped, one of which is treasured up in the library of the university of Upsal, and another in the royal library at Stockholm. Only two hundred and ten pages of the volume were finished at the press when the fire occurred. The first volume of the *Atlantica* was published in 1675, (and with a reprinted title in 1679, and again in 1684,) the second in 1689; the third, printed in the author's own house, in 1698; and the fourth has no title. The best and most minute account of this valuable work is to be found in the travels of M. Fortia, to whom it was communicated by one of the best bibliographers of Sweden, in the year 1791. Greek, Hebrew, Syriac, and Runic types were used at Upsal soon after the commencement of the seventeenth century. In 1637 Grotius notices, in one of his epistles, that the Greek types then used were deficient in elegance, and that the paper was of inferior quality. The first Arabic types ever used in Sweden were brought to Upsal by Peter Kirstenius, of Breslau; at whose death, in 1640, his printing apparatus was purchased by the university. His types were thought to be cast in imitation of those of the Medicean press at Florence.

It is believed that printing was first exercised in this city about the year 1510, by Paul Griis, three of whose books are named, the earliest of them being a Latin psalter, with the imprint, *Impressum Upsaliæ in domo Venerabilis patris domini doctoris Ravaldis Archidiaconi ibidem per Paulum Griis anno Dei MDX*: but Alnander observes that there is some little uncertainty about the exact period of the introduction of the art. It appears to have declined about 1541, after the publication of an edition of the Swedish bible in that year, [a small folio with wood-cuts, a copy of which (on the authority of Fortia) is preserved in the library of the academy of sciences at Stockholm; a second, in the collection of M. Gieurlwell, librarian to the king; and a third, in the university library of Upsal,] and to have revived in 1604. Charles XI. granted to the college of national antiquities a typographer of their own: the university likewise possessed a printing establishment peculiar to themselves.

1686. Louis XIV. king of France, by an edict, separated the corporation binders from the printers of books in the university of Paris; but by the same edict, the binders were always rated and reputed of the number of the agents of the university, and enjoyed in this quality the same privileges they had done before. Louis erected a press in the Louvre; and the editions of the *Greek Testament*, of *Terence*, *Virgil*, *Horace*, *Juvenal*, and *Sallust*, which were issued from this press, were, indeed princely, and ob-

serves Dr. Harewood, the institution of a royal typography in the Louvre, in the estimation of every wise and judicious person, added prodigious splendour to the enlarged and exalted views of Louis XIV.\* and redound more to his true glory, than the false and momentary splendour he acquired by sacking peaceful cities, and desolating happy provinces.

1686, Sept. 28. The following certificate serves as a curious instance in what manner the censors of books clipped the wings of genius when it was found too daring and excursive.

"I, the under-written John Paul Marana, author of a manuscript Italian volume, entitled *L'Esploratore Turco, tomo terzo*, acknowledge that Mr. Charpentier, appointed by the lord chancellor to revise the said manuscript, has not granted me his certificate for printing the said manuscript, but on condition to rescind four passages. The first beginning, &c. By this I promise to suppress from the said manuscript the places above marked, so that there shall remain no vestige; since, without agreeing to this, the said certificate would not have been granted to me by the said Mr. Charpentier; and for surety of the above, which I acknowledge to be true, and which I promise punctually to execute, I have signed the present writing. Paris, 28th September, 1686.

"JOHN PAUL MARANA."

These rescindings of the censor appear to be marked by Marana in the printed work. We find more than once chasms, with these words: the beginning of this letter is wanting in the Italian translation; the original paper being torn."

The ingenious writer of the *Turkish Spy* is John Paul Marana,† an Italian, so that the *Turkish Spy* is just as real a personage as Cid Hamet, from whom Cervantes says he had his *History of Don Quixote*. Marana had been imprisoned for a political conspiracy; after his release he retired to Monaco, where he wrote the *History of the Plot*, which is said to be valuable for many curious particulars. Marana was at once a man of letters and of the world. He had long wished to reside at Paris; in that emporium of taste and luxury his talents procured him patrons. It was during his residence there that he produced his *Turkish Spy*. By this ingenious contrivance he gave the history of the last age. He displays a rich memory, and a lively imagination; but critics have said that he touches every thing, and penetrates nothing.

\* Louis XIV., was born at St. Germain, Sept. 6, 1638, and died at Versailles, Sept. 1, 1715.

† John Paul Marana was descended of a distinguished Italian family, and was born in the city of Milan, or its immediate vicinity, in the year 1648. In consequence of being concerned in a political conspiracy, he went to France, and settled at Paris, where he seems to have met with patronage and friendship from the noble and the learned. It was during his residence in this city that he wrote his *Turkish Spy*, in 6 vols. 12mo. He was also the author of two or three other works, which prove him to have been a keen observer and a man of learning. Being restored to his native country, he died in 1693.

His first three volumes greatly pleased: the rest are inferior. Plutarch, Seneca, and Pliny, were his favourite authors. He lived in philosophical mediocrity; and in the last years of his life retired to his native country, where he died.

In Boswell's *Life of Johnson* is this dialogue concerning the writer of the *Turkish Spy*. B. —Pray, sir, is the *Turkish Spy* a genuine book? J. —No, sir, Mrs. Manley, in her *Life* says, that her father wrote the two first volumes; and in Dunton's *Life and Errors*, we find that the rest was written by one Sault, at two guineas a sheet, under the direction of Dr. Midgley.\*

It is not known on what authority Mrs. Manley advances that her father was the author; but this lady was never nice in detailing facts. Dunton, indeed, gives some information in a very loose manner. He tells us, p. 242, that it is probable, by reasons which he insinuates, that one Bradshaw,† a hackney author, was the writer of the *Turkish Spy*. This man probably was engaged by Dr. Midgley to translate the volumes as they appeared, at the rate of 40s. per sheet. On the whole, all this proves, at least, how little the author was known while the volumes were publishing, and that he is as little known at present by the extract from Boswell.

1686, *Died*, RICHARD ROYSTON, bookseller. He was master of the stationers' company in 1673 and 1674; and gave £5 to the poor. Two silver candlesticks, the gift of Mr. Richard Royston, deceased, (57 ounces 15 dwts.) were presented by his widow; to accompany which, a pair of snuffers and a snuffer-box of silver (10 ozs. 13 dwts.) In the south aisle of Christ Church, Newgate-street, is this inscription:—

Richard Royston, bookseller to three kings, died 1686, in the 66th year of his age.

Elizabeth, wife of Luke Meredith, grand-daughter of the above Richard, 1699.

Mary Chiswel, late wife of Richard Chiswel, bookseller, another daughter of the above Richard Royston, 1695.

1686. The first *Historical Dictionary* was the work of the learned and industrious Nicholas Lloyd, fellow of Wadham college, Oxford, who

spent thirty years in compiling it; Oxford, folio, 1670; again with additions, at London, 1686.

Some consider Gessner's work in this light, printed in 1545, and consequently abridgments of it; and others the Dictionary of Charles Stephens, from the materials collected by Robert Stephens, his father. But whoever considers and compares the work of Mr. Lloyd with these will see it is a very different thing, and built upon a much broader foundation.

We stand indebted for the scheme of an *Historical Dictionary*, in its utmost extent to a French ecclesiastic, Lewis Morrier, who formed it before he was twenty-five, and executed it before he was thirty. Lyons: 1674. folio, 1 vol.

1686. *Died*, JOHN LEIGH, treasurer to the company of stationers. He was appointed to that office in 1679.

1686, Dec. 1. SAMUEL JOHNSON, a divine of remarkable learning and steadiness in suffering for the principles of the revolution of 1688, published a pamphlet entitled, *A Humble and Hearty Address to all the Protestants in the present army*; for this work he was sentenced in the court of king's bench to stand in the pillory, in Palace-yard, Westminster, Charing Cross, and the Old Exchange; to pay a fine of 500 marks, and to be whipped from Newgate to Tyburn, after he had been degraded from the priesthood. This cruel and arbitrary sentence was put into execution upon this day. "He came," says the writer, "with his cassock on to the pillory, (which had been omitted in the act of degradation, and therefore saved his living,) when Mr. Rouse, the under-sheriff tore it off, and put a frieze coat upon him." Samuel Johnson was born in the year 1649, and died in 1703.

1686, April 26. *Hippocrates Ridens*; or, Joco-serious Reflections on the Impudence and Mischief of Quacks, and Illiterate Pretenders to Physick, No. 1; licensed by Robert Midgley.

1686, June 21. *An Account of the Proceedings against Samuel Johnson, who was tried at the King's Bench Bar, Westminster.*

1686, *Observations on the Weekly Bill, from July 27 to August 3; with directions how to avoid the Diseases now prevalent*; licensed by Robert Midgley, Aug. 9.

1687. An edition of Dryden's poems, the *Hind and Panther*, a quarto volume of 90 pages, appeared this year, with the imprint Holyrood-house, printed by J. Watson. Of this book Dr. Cotton could give no information, until he met with a work entitled *A Description of the Antiquities, &c. of Holyrood-house*, 8vo. 1821, from which the following particulars are extracted:—

"During the reign of James VII. (our James II.) who manifested an unconstitutional partiality to Roman Catholics, Holyrood-house appears to have been destined by that bigotted prince as a nursery for superstition. Not satisfied with securing to his popish subjects, within the precincts of his palace, the free exercise of their religion, at a time when the most limited degree of that religious toleration now so liberally enjoyed by every British subject was considered

\* Dr. Midgley was a cotemporary writer with Mr. Fraser, and had his despatchment from the bishop of London. His humour was constantly kind and agreeable; his aspect cheerful and strangely obliging. He licensed for me Mr. Jay's tragedies of *Sir Barlow's Treatise of Fortification*, and other divine essays that were out of Mr. Fraser's province. He was a good physician, and very high for the church; yet (to do Dr. Midgley justice,) censoriousness, and speaking unhandsonably of persons, or believing easily any ill reports of those that disanted from him, were vices his soul abhorred. In a word, he was a man of singular modesty; and living a pious life, when he lay on his death-bed, he expressed no concern to live, nor fear to die: he kept nothing in reserve for his last hours, and, being ripe for death could not be surprised; and the same may be said of his brother licensor, Mr. D. Poplar.—Dunton.

The following memorandum was taken from a copy of the original conveyance in the hands of the late Mr. Charles Bathurst, bookseller, in London, in May 1767. "Dr. Robert Midgely, of the parish of St. Michael Basil-shaw, London, conveys 27th Dec. 1693, to Jos. Hindmarsh, Ed. Lane, and Henry Rhodes, all the copyright in the *Turkish Spy*, in eight volumes. He first says; *translated, written, and composed by himself*. Afterwards written originally in Arabic, translated into Italian, and from thence into English. Last of all, he calls himself the sole author of these copies of books. He sold the copy for £209 11s. 9d.

† See Dunton's *Life and Errors*, vol. 2.

as a connivance at heresy, James most imprudently instituted 'a popish college in the abbey of Holyrood,' and published rules for it on the 22nd of March, 1688, inviting children to be there educated *gratis*.

"He also appointed one Watson,\* a popish printer, who had availed himself of the protection of the sanctuary, to be the king's printer in Holyrood-house. This Watson also obtained a right from the privy council to print all the *Prognostications* at Edinburgh; which accounts for several books bearing in their title-pages to have been printed in Holyrood-house."

Dr. Lee, in his *Memorial*, states that he was acquainted with several books printed here in 1687 and 1688, many of them being popish works, allowed to be printed and dispersed by king James II. Again, in the year 1775, there was a press in this palace, when a tract by James Fea, a surgeon, entitled the *Present State of the Orkney Islands considered*, (8vo. pp. 66,) was published, bearing the imprint Holyrood-house.

1687, Feb. 10. A proclamation for preventing and suppressing unlicensed books and pamphlets.

1687, March 25. In order to retain the lower class of people in the Protestant religion, charity schools were set up in and about London; the first were opened at Norton Folgate, and St. Margaret's, Westminster.

1687, Sept. 1. Died, Dr. HENRY MORE, the Platonist, and a celebrated divine, whose works were once read with great enthusiasm by the people. Time, however, has long cast into the shade the visionary papers of Henry More, and he seems himself to have survived that fame which he had once promised to himself. His philosophical and theological works have been collected into two volumes folio. The following is a curious fact relating to his writings:—A gentleman who had died beyond sea, left a legacy of £300 for the translation of Dr. More's works. The task was cheerfully undertaken by the doctor himself; but when he had finished it, he was compelled to give the bookseller the £300 to print them. He was born at Grantham, Lincolnshire, October 12, 1614.

1687. WILLIAM HAMMOND, of Skipton in Craven, Yorkshire, gave £10 to the poor of the stationers' company.

1687, Oct. 21. Died. EDMUND WALLER, a poet of some celebrity, whose writings partake of the gay and conceited manner of Charles I. and chiefly consist in complimentary verses, of an amatory character, many of which are dedicated to a lady whom he addressed under the name of *Sacharissa*.† In his latter years, Waller wrote in a more formal manner which had by that time been introduced. He was born at Colshill, in Buckinghamshire, March 3, 1605, and was educated at Cambridge. At the age of eighteen he became a member of parliament, and in 1643, was sent to the tower on the charge of conspiring

to deliver the city to the king. Two persons were executed for the plot, and Waller was condemned to be hanged, but saved himself by an abject submission, and a liberal distribution of money. After a year's imprisonment he went into exile; but returned by favour of Cromwell, on whom he wrote an elegant panegyric. He also wrote another on the death of the protector, and afterwards celebrated the restoration, and praised Charles II. He was elected to serve in parliament, where, by his eloquence and wit, he was the delight of the house. He endeavoured to procure the provostship of Eton, but being refused by the earl of Clarendon,\* he joined in the persecution of that great man.

1687, Feb. 21. *Publick Occurrences truly stated; with Allowance*. By Henry Case. No. 1. Printed by George Larkin, at the Two Swans, without Aldersgate.

1687. *News from Pannier-alley*, or a true relation of some pranks the Devil hath lately played with a plaster pot there. 4to.

1688, Aug. 31. JOHN BUNYAN author of the *Pilgrim's Progress*, *Holy War*, *Grace abounding to the Chief of Sinners*, and other works. He was born at Elstow, near Bedford, in 1628, and was brought up to his father's business, which was that of a travelling tinker. For some time he led a very profligate kind of life; but by degrees he acquired a sense of religion, and the ability to read and write, and by study he soon acquired a great knowledge of the scriptures. In the civil war he entered into the parliamentary army, and was present at the siege of Leicester. In 1655 he became a member of a Baptist congregation at Bedford, in which he used to exhort. For this, at the restoration, he was taken up, and confined in Bedford jail upwards of twelve years, supporting himself and family by tagging laces. There also he wrote his *Pilgrim's Progress*, which has gone through innumerable editions, and been translated into most European languages. Its object is to give an allegorical account of the life of a Christian, his difficulties, temptations, and ultimate triumph. On his release from

\* Edward Hyde, earl of Clarendon, was born at Ditton, 1609, and was lord chancellor of England from 1660 to 1667, when, having lost the royal favour, he retired to France, and passed the last six years of his life in exile, where he finished that splendid monument of his genius and impartiality, the *History of the Rebellion*, (for such was the epithet bestowed by the royalists on the civil war.) It was not published till the reign of queen Anne, in six volumes. His *Essays* belong to the language, they express the man, showing his unfitness for a station, where integrity and decency caught no reflection from the court. He died December 9, 1674, and was buried in Westminster abbey. In 1660, James, duke of York, afterwards king of England, married Anne, eldest daughter of lord Clarendon. She was the mother of our two queens, Mary and Anne.

† In March, 1814, the library of Mr. Palmer, of Beckney, was sold by Mr. Munn. In this collection were some curious and valuable pieces of the old Puritan divines; but the chief article of attraction was the lot No. 131, a copy of Bill and Barker's 4to. bible, in morocco, and in excellent preservation. It was the identical pulpit bible of John Bunyan, and also his companion during his twelve years' unjustifiable confinement in Bedford jail, where he wrote his memorable *Pilgrim's Progress*. This bible was purchased for Mr. Whitbread, M.P., for Bedford, at the price of £21.

\* Father of J. Watson, queen's printer in the reign of queen Anne.

† The *Sacharissa* of Waller's muse was Dorothy Sidney, afterwards countess of Sunderland. She died in 1693.

prison in 1672, for which he was indebted to Dr. Barlow, bishop of Lincoln, a violent Calvinist, he became a preacher of the Baptist congregation at Bedford. He also travelled into various parts of England, on which he was called bishop Bunyan. He died in London of a fever, and his remains were interred in Bunhill Fields.

Dr. Beattie, in his *Dissertations, Moral and Critical*, thus speaks of the *Pilgrim's Progress*. "Few books have gone through so many editions, in so short a time, as the *Pilgrim's Progress*. It has been read by persons of all ranks and capacities. The learned have not thought it below their notice; and among the vulgar it is an universal favourite. I grant, the style is rude, and even indelicate sometimes; that the invention is frequently extravagant; and that, in more than one place it tends to convey erroneous notions in theology. But the tale is amusing, though the dialogue be often low; and some of the allegories are well contrived, and prove the author to have possessed powers of invention, which, if they had been refined by learning, might have produced something very noble. This work has been imitated, but with little success. The learned bishop Patrick\* wrote the *Parable of the Pilgrim*: but I am not satisfied, that the bishop borrowed the hint, as it is generally thought he did, from John Bunyan. There is no resemblance in the plan; nor does the bishop speak a word of the *Pilgrim's Progress*, which I think he would have done, if he had seen it. Besides, Bunyan's fable is full of incident—Patrick's is dry, didactic, verbose, and exceedingly barren in the invention."

It has been stated that Bunyan was indebted for the incidents in his work, to some of the early French romances, but more particularly to the *Pilgrimage of Human Life*, written by Guillaume de Guilleville, in rhyme, about 1330, and printed by Michael le Noir, at Paris, in 1506. This work was very favourably received at its first appearance; and was turned into prose at the request of Jeanne de Lavac, queen of Jerusalem and Sicily, &c. Ant. Verard gave a new impression in prose, Paris, 1511, folio. Not only in early ages, but in later also, mankind have been found less willing to be instructed by abstract reasoning, than by fables or similitudes. Hence the popularity of these old religious fictions. "The *Pilgrim's Progress* of our days," says Mr. Greswell, "confessedly excels all other productions of its kind; and though some have endeavoured to trace its prototype in earlier works, it was probably, a perfectly spontaneous and original effort of its unlettered author."

1688. *The Saints' Triumph; or, the Glory of the Saints with Jesus Christ*. Discours'd in a Divine Ejaculation. By (John) B (unyan.) Printed by J. Millet, for J. Blaze, at the Look-

ing Glass on London Bridge. 1688, small 4to. A rude but characteristic wood cut portrait of Bunyan is indented in the margin of this title-page.

1688. *Died*, THOMAS BUCK, printer to the university of Cambridge. He left two legacies to Catharine Hall, where he had been a fellow, or scholar, to purchase books. He was buried in St. Mary's church on the 16th of November.

1688, Nov. 12. The first sale of books by auction, which took place in Scotland, commenced upon this day by ANDREW ANDERSON, jun. with the following notice: "A catalogue of excellent and rare books, especially History and Romances, for the most part in English, and the variorums, to be sold by way of auction, the 12 day of November, 1688. The books are to be seen, from the first day of November to the day of the auction, at Edinburgh, on the south side of the High-street, a little above the cross, being the close immediately above the Fish-market close, in the head of the said close, on the left hand, where a placat will be on the gate, and the catalogues are to be had there gratis. The time for sale is only in the afternoon, from two of the clock till four. Edinburgh, printed in the year 1688;" only nine pages, closely printed in two columns. "He who pays not his money presently, is to give earnest, to take them away and pay his money before the next day the auction begins; or else to lose his earnest, and the books to be put to sale again. What books shall happen to be unsold at the auction, are to be had afterwards."

1688, May 9. *The Weekly Test Paper*; with Allowance, No. 1. Printed by G. C. [George Croom] for the author.

1688, May 12. *Poor Robin's publick and private Occurrences and Remarks*; written for Meritment and harmless Recreation, No. 1.

1689, May 25. *A true and impartial Account of the remarkable Incidents, Casualties, and other Transactions of the like Nature, happening in City and Country, &c.*

1688. *Historical Account of Books and Transactions of the Learned World*, published at Edinburgh. This was the earliest review of books in Scotland or in Great Britain.

1688, Nov. 22. *Declaration of the nobility, gentry, and commonalty, at the rendezvous at Nottingham*.

Three new papers made their appearance on the 12th of December. King James II. had abdicated on the preceding day.

1688, Dec. 12. *Universal Intelligencer*, No. 1. For John Wallis.

1688, Dec. 12. *English Courant*, No. 1.

1688, Dec. 12. *London Courant*, No. 1.

1688, Dec. 18. *London Mercury, or Moderate Intelligencer*, No. 1. Printed by George Croom, at the Blue Ball, in Thames-street.

1688, Dec. 24. *Observer*, volume last, No. 1.

1688. *Orange Intelligencer*. Printed by George Croom.

1688, Dec. 31. *Orange Gazette*, with allowance. For Jane Curtis.

\* Simon Patrick, bishop of Ely, was born at Gainsborough, in Lincolnshire, September 8, 1628. He is well known for his valuable commentary on the *Old Testament*, usually published with bishop Lenth, *On the Prophets*, and Whitby on the *New Testament*. The imprimatur to his *Parable of the Pilgrim* is dated April 11, 1665. He died May 31, 1707.

1689, Feb. 13. **THE REVOLUTION.** William Prince of Orange, and the Princess Mary, a daughter of the abdicating monarch, are proclaimed on this day, (Wednesday) with the approbation of the lords and commons.

The most important period in the history of Great Britain, is that of the revolution under William III. Then it was that our constitution, after many fluctuations, and frequent struggles for power by the different members of it, (several of them attended by vast effusions of blood,) was finally settled. A revolution so remarkable, and attended with such happy consequences, has perhaps no parallel in the history of the world. This it was, says Hume, that cut off all pretensions to power founded on hereditary right; when a prince was chosen who received the crown on express conditions, and found his authority established on the same bottom with the privileges of the people; so that there have been no differences between our kings and parliament since. Indeed, all the danger we have reason to apprehend since that period, seems to be from the aid which the parliament itself may be induced, by indirect methods, to give the court, to encroach upon the liberties of the people; or as Montesquieu observes, when the executive shall be more corrupt than the crown.

1689, May 26. **JOHN WHITE** was a printer in the city of York, and at the landing of the prince of Orange, in 1688, printed his manifesto, it having been refused by all the printers in England, and for which he was sent prisoner to Hull castle, where he was confined till the place surrendered. He was afterwards rewarded by king William's appointing him his majesty's sole printer for the city of York, and the five northern counties, as appears by his majesty's grant, dated at Hampton court, May 26, 1689.

1689. **JOHN DAYDEN** being unable both from religious and political prepossessions, to take the oaths to the government of William and Mary, this illustrious poet was compelled with an anguished heart to resign his offices. They were conferred, with a salary increased to £300, upon Thomas Shadwell, a person now only known to British literature through the immortal satire of *Macflecknoe*, in which Dryden had pilloried him as the prince of dullness.

The rest to some faint meaning make pretence,  
But Shadwell never deviates into sense.  
Some beams of wit on other souls may fall,  
Strike through, and make a lucid interval;  
But Shadwell's genuine night admits no ray.

A modern critic, reviewing the comedies of Thomas Shadwell, gives a judgment, which will be startling to those who have been content to take him upon the opinion of his great rival and antagonist. According to a writer, in the *Retrospective Review*, xvi. 56. "he was an accomplished observer of human nature, had a ready power of seizing the ridiculous in the manners of the times, was a man of sense and information, and displayed in his writings a very considerable fund of humour." Whatever truth there may be in this decision, it seems reasonable to con-

clude with sir Walter Scott, that, in his advocacy of whig principles, and the sufferings he had endured under the old government, as a "non-conforming poet," he probably possessed merits with king William, which were deemed by that prince as of more importance than all the genius of Shakspeare, Milton, and Dryden, if it could have been united in one person.

1689. At the end of the *Ninth Collection of Papers relative to the present Juncture of Affairs in England*, quarto, there is a curious advertisement, of which the following is nearly a verbatim copy:—Late published, the *Trial of Mr. Papillon*; by which it is manifest that the (then) lord chief justice Jefferies\* had neither learning, law, nor good manners, but great impudence, (as was said of him by Charles II.) in abusing all those worthy citizens who voted for Mr. Papillon and Mr. Dubois, calling them a parcel of factious, pragmatical, sneaking, canting, snivelling, prick-eared, crop-eared, atheistical fellows, rascals, and scoundrels, as in page 19 of that trial may be seen. Sold by Michael Janeway, and most booksellers.

1689. **SUSANNA LATHUM** gave the company of stationers a silver tankard "The gift of Susanna Lathum," 31 oz. 15 dwts.

1698, June. **DIED, PETER PALLIOT**, historiographer, printer, and bookseller, "o the king of France, and genealogist of the duchy of Burgundy, was born at Paris, March 19, 1608. In his youth he showed a taste for genealogy, and heraldic studies, in which he made great proficiency, by a relation who had published a work on armorial bearing. In his 25th year he settled at Dijon, where he married Vivanda Spirinx, the daughter of a printer and bookseller, with whom he entered into business. At his leisure hours, however, he pursued his heraldic studies, and laboured with so much perseverance as to produce five large works in folio. He left also thirteen volumes of manuscript collections, respecting the family of Burgundy. It is an additional and remarkable proof of his industry and ingenuity, that he engraved the whole of the plates in these volumes with his own hand. Palliot died at Dijon, at the age of 89.

1689, Jan. 10. *England an unlucky Soil for Popery*, (no printer's name.) No. 1.

The same paper in French.

1689, Jan. 14. *King James's Letter to the Lords and others of his Privy Council, from St. Germans en Laye*.

1689, Jan. 15. *London Intelligence*, No. 1.

1689, Jan. 19. *Weekly Memorials; or, an Account of Books lately set forth; with other Accounts relating to Learning; by authority.* No. 1. This is the earliest specimen of an English Review.

\* George Jefferies, baron Wem, commonly known by the name of Judge Jefferies, the infamous lord chancellor under James II., and one of the greatest advisers and promoters of all the oppressive and arbitrary measures of that unhappy tyrannical reign. His sanguinary and inhuman proceedings will ever render his name detested. He died a prisoner in the tower, April 16, 1669.

1689, Feb. 14. *Haerlem Courant*, No. 1. Printed for John Search.

1689, March 23. *Roman Post-boy*, or *Weekly Account from Rome*, printed by G. C[room.] for John Mumford.

1689, March 25. *Account of the Proceedings of the Meeting of the Estates of Scotland*, with licence. Published by Richard Chiswell, at the Rose and Crown, in St. Paul's Church-yard. No. 1. This paper, printed on a folio half-sheet, was continued by Richard Baldwin till October 1690; and, together with the proceedings of the Convention, contained news and advertisements. When the Revolution had been accomplished in Scotland, it seems to have ceased in England.

Mr. George Chalmers, in his *Life of Thomas Ruddiman*, says, that "in the annals of our literature, and our freedom, it is a memorable fact, that there was not a newspaper printed in Scotland, at the era of the revolution. The few had doubtless instructed themselves, during several years, from the *London Gazette*. And the many had been too busy, during the late times, with the affairs of the other world, to be very anxious about the events of this. Yet, were the estates of Scotland, who assembled at Edinburgh, on the 4th of March, 1689, and the mobs which outraged, on that occasion, both law and religion, sufficiently inflamed without the aid of a newspaper. Whatever freedom, either of thought, or of printing, may have been established in Scotland, by the revolution, ten years elapsed, before it was deemed safe by the public, or advantageous by an individual, to print a newspaper." In order to supply that deficiency at Edinburgh, the above paper was printed at London.

1689, April 11. *Great News from Ireland*; being motives of encouragement for the officers and soldiers who shall serve in the present war of Ireland; licensed by J. Fraser,\* No. 1.

1689, May 29. *New Heraclitus Ridens*; or,

an Old Dialogue between Jest and Earnest revived, No. 1.

1689, June 19. *Geographical Intelligence*, for the better understanding of foreign news, No. 1.

1689, A full Narrative of the Pope's Death, between the 12th and 13th of August; licensed.

1689. A full and true Account of the besieging and taking of Carrickfergus by the Duke of Schomberg;\* as also a Relation of what has lately passed in the islands of Antego, Mevia, and Montserrat, in the West Indies; where their Majesties have been solemnly proclaimed; in a Letter from Chester, Aug. 31; licensed and entered according to order; printed for R. Baldwin.

1689. *The Universal Intelligence*. Printed by Thomas More,† in the Whyte Friars.

1689, Nov. 6. *A Ramble round the World*, by Kainophilus, a lover of novelties; performed by a single sheet coming out every Friday; to each being added the *Irish Courant*: No. 1.

1689. *A Dialogue between two Friends, concerning the present Revolution*, &c.

1689, Dec. 6. *True Protestant Mercury*; or, an impartial History of the Times, No. 1.

1689. *Strange News from Arpington, near Bezley, in Kent*; a true relation of a young maid who was possessed with several Devils or Evil Spirits, &c. 4to.

1689, *Weekly Packet of Advice from Rome*, by R. Carre.

1690. R. EVERINGHAM‡ printed an edition of 3000 Bibles, and 1000 New Testaments, in 8vo. in the Roman character, for the use of the highlands of Scotland, and the Irish people generally. In the promotion of this design, the rev. James Kirkwood, of Astwick, was particularly active. He obtained a promise of £100 from Mr. Boyle; and by circulating proposals, and personally soliciting subscriptions, was enabled to procure this impression. To silence the objections made by certain persons against printing the bible in the Irish or Gaelic tongue, a valuable paper was written, entitled *An Answer to the objection against printing the Bible in Irish*; which is given at length by Birch, in the *Appendix to the Life of the Hon. Robert Boyle*, No. 3, pp. xcxi.—xcxiii. The translation from the Irish into the Roman character, was done by

\* Commonly called catalogue Fraser, from his skill in books and constant frequenting of auctions. He was our chief licenser for several years, and it was pity he had not continued longer in the same post, for his treatment was kind and impartial. He licensed for me the *Athenian Mercuries*, *The Works of the Learned*, *The Royal Voyage*, and such a numerous company of other books, as advanced his fees (for bare licensing) to thirty pounds per annum, which I paid him for several years together, as appears by receipts under his own hand; and as Mr. Fraser was an impartial licenser, I suppose the booksellers were as forward as myself to have recourse to him, which made his salary very considerable, and he deserved every penny of it; for his compass of learning was very large; his judgment correct and moderate; his imagination lively; and he was diligent and impartial in every part of his duty; but, notwithstanding these qualifications, the highflyers were continually pinching at him, and at last he surrendered his deputation. There is little happiness in high posts; they are attended with fatigue and trouble. Advancement exposes a man as the mark of envy, and the malice of others; every common mortal must be throwing in his censure, and meddling with the characters of those above him; and when neither the man nor his management is well known, he must sit to every ill-natured club and have his picture daubed with suspicion and prejudice. Mr. Fraser had his full of this hard measure, though no man was better skilled in the mystery of winning upon the hearts of booksellers, nor were the company of stationers ever blessed with an honest licenser. He has now a very honourable place in Chelsea college, where he has a noble library, and lives in great reputation.—Dunton.

\* Frederic Armand, duke of Schomberg, a celebrated French general, was shot by mistake, by the French refugees of his own regiment, while crossing the river at the battle of the Boyne, July 1, 1690. He was buried in St. Patrick's, Dublin.

† I once travelled with him to Brentford, and found him a true lover of the present government. He is a very conscientious man, punctual to his word in the smallest matters, courteous and affable in his conversation, and is ready to do every one what good he can; and reader, I must say there is no virtue I would wish in a friend but I find it in Mr. More.—Dunton.

‡ Mr. Everingham and Mr. Whitledge were two partners in the trade; I employed them very much, and looked upon them to be honest and thriving men; and they confided themselves a little sooner to household love, they might possibly have kept upon their own bottom; however, so it happened that they loved themselves into journeyman printers again. Their misfortunes do not take off my affections for them, for it will always be a pleasure to me to hear of their welfare.—Dunton.

Mr. Robert Kirk, who also superintended the printing of this edition, at London.

1690. In this year white paper first began to be made in England, before which time the manufacture had been confined to brown only.

1690, Feb. 13. *His Majesty's Letter to the Lord Bishop of London, to be communicated to the two provinces of Canterbury and York.*

1690, March 17. *Athenian Mercury*, No. 1. Printed for John Dunton, at the Raven, in Jewin-street.

1690. *Mercurius Reformatus*, or the New Observer, printed for Dorman Newman.\*

1690, April 4. *Irish Courant*, or the Weekly Packet of Advice from Ireland, by J. F. No. 1.

1690. *Account of the Victory obtained by the King in Ireland, on the 1st day of this instant July*, printed by Edward Jones.

1690, Sept. 30. *Dublin Intelligence*, published by Authority, No. 1; printed by Joseph Ray,† on College Green; reprinted at London by W. Downing.

1690, Nov. 11. *Mercurius Britannicus*; or, the London Intelligencer turned Solicitor, No. 1.

1699. *Pacquets of Advice from Ireland, with the Irish Courant.*

1690. *Lampoons; or Reflections on Public News Letters.* R. Taylor.

1690. *Coffee-house Mercury*; containing all the remarkable Events that have happened, from Nov. 4 to Nov. 11; with reflections thereupon. Printed by J. Astwood.

1690, Dec. 31. *Abdicated King and Queen, under the disguised names of Mr. and Mrs. Redding.*

1690. *Plaine Scottish; or, News from Scotland*, 4to.

1691, Dec 31. *Died*, The Hon. Robert Boyle, inventor of the air pump, and of whom it has been said that he was designed by nature to succeed lord Bacon, for by his experiments he filled up those plans that genius had sketched out. From his works may be deduced the whole system of natural knowledge.—Burnet, to whom flattery has never been imputed, sums up a brilliant eulogium upon the character of Boyle in

the following strain. "I will not amuse you with a list of his astonishing knowledge, or of his great performances in this way. They are highly valued all the world over, and his name is every where mentioned with particular characters of respect. I will conclude this article with this, in which I appeal to all competent judges; that few men, if any, have been known to have made so great a compass, and to have been so exact in all parts of it as Boyle." He was the seventh son, and the fourteenth child, of Robert earl of Cork, and born at Lismore in Ireland, January 25, 1627. He died at London, and was buried at St. Martin's, Westminster.

1691. *The Works of the Learned*, 4to. by J. la Crosse, a late editor of the *Universal Bibliothekue*. It continued only for a few years. The *Universal Bibliothekue* was an English translation, which was published for a short time, of Le Clerc's *Bibliothekue Universelle*, begun at Amsterdam in 1686.

1691, Feb. 29. *Compendio Mercuriale.*

1691. *Momus Ridens*; or, Comical Remarks on the Public Reports.

1691. *Urbanicus and Rusticus*; or, the City and Country Mercury.

1691. *Pacquet of Advice from France.*

1691, March 25. *Weekly Remarks on the Transactions Abroad*. No. 1.

1691. *Athenian Gazette*. By an advertisement in the *Athenian Gazette*, dated Feb. 8, 1696, it appears that the coffee-houses of London had then, exclusive of the *Votes of Parliament* every day, nine newspapers every week.

1691, Aug. 5. *Mercurius Eruditorum*; or, News from the Learned World. No. 1.

1691, Feb. 1. *History of Learning*; or, an Abstract of several Books lately published, as well Abroad as at Home.

1691, Dec. 10. *Mercurius Reformatus*; or the true Observer, No. 1.

1691. *City Mercury*; or, advertisements concerning trade; by R. Everingham, B. Harris, Mercury and Intelligence offices, E. Hawkins, &c. for divers years.

1691. *Infernus*; or, News from the other World. Printed by Thomas Marlow.

1692, May 18. *Died*, ELIAS ASHMOLE, an eminent antiquary, and founder of the Ashmolean museum at Oxford, which was the first institution in England for the reception of rarities in nature and art; and in the infancy of the study of natural history in this country, it possessed what was then considered a very valuable collection. He offered to bestow on the university all the collections in natural history which had been bequeathed to him by the Tradescants, the eminent botanists and gardeners at Lambeth, and to add to these his own coins, manuscripts, and books, provided the university would defray the expense of erecting a proper building for their reception. The offer was accepted, and the present edifice raised, under the direction of sir Christopher Wren. Twelve cart loads of rarities were deposited within its walls, by the hands of Dr. Plot, on the 20th of March, 1682.

\* He published *Mercurius Reformatus*, or the New Observer. He was once a considerable dealer, but has been unfortunate. He is a man of excellent parts—a famous casuist; and since his misfortunes, is turned preacher. He served seven years to the same master; and to do him justice he was always kind and obliging to me. His usual appellation was, "Dear Brother." I had many fine things to hold forth on this subject, but I know not how it comes to pass, on the sudden they are all lost again, like friends in a crowd.—Dunton.

† He is slender in body; his head rather big than little; his face thin and of a moderate size; a smooth tongue, and voice neither deep nor shrill. His countenance is ever intermixed with joy and sweetness. He is a courteous man in his shop; and being both printer and bookseller, has got a good estate in a few years: he is the best situated of any bookseller in Dublin. But I shall leave Mr. Ray to ramble to Castle-street, where Eliphal Dobson with his wooden leg startled me with the creaking of it; for I took it for the *Crepitum Ossium*, which I have heard some of our physicians speak of. Mr. Dobson is a great dissenter; but his pretence to religion does not make him a jot precise. He values no man for his starched looks, or supercilious gravity, or for being a Churchman. Presbyterian, Independent, &c., provided he is sound in the main points, wherein all good men are agreed.—Dunton.

In 1638 he settled in London as an attorney; but on the breaking out of the rebellion, he went to Oxford, and entered of Brasenose college. He was for some time in the royal army, but when the king's affairs were ruined, he settled in London, and became a member of the society of astrologers. In 1649 he married lady Manwaring, with whom he had a good fortune. In 1658, we find him at Oxford, employed in drawing up a description of the coins given to the public library by archbishop Laud. On the restoration of Charles II. he was appointed Windsor herald, and became one of the first members of the Royal Society. In 1669, the university of Oxford conferred on him the degree of M. D. In 1672, he presented his "*History of the Order of the Garter*" to the king, who rewarded him with £400. He was born at Lichfield, May 23, 1617. Wood, in his account of Ashmole, tells us, "In his library I saw a large thick paper book, near a yard long, containing on every side of the leaf two, three, or more pictures or faces of eminent persons of England, and elsewhere, printed from copper cuts, pasted on them, which Mr. Ashmole had with great curiosity collected; and I remember he has told me, that his mind was so eager to obtain all faces, that when he could not get a face by itself, he would buy the book, tear it out, paste it in his blank book, and write under it from whence he had taken it." An admirable portrait this of our modern portrait collectors, who have sent back many a volume to the bookseller's shop stript of its graven honours. A most noted collector told a person at Cambridge, "That his own collection must needs be large and good, as it rested on six points. 1. I buy; 2. I borrow; 3. I beg; 4. I exchange; 5. I steal; 6. I sell." This book was consumed by fire, with the rest of his library, which took place at his chambers in the Middle Temple, London, together with his collection of about nine thousand coins, besides seals, charters, and other curious antiquities.

1692. JOHN MACOCK gave to the stationers' company a silver cup and foot, 45 oz. 4 dwts. the legacy of John Macock, who was master in 1680; to pair with that of Mr. Sawbridge.

1692, Nov. 21. *Died*, THOMAS SHADWELL, poet laureat and historiographer royal. He was succeeded in his offices by Nahum Tate, a dramatist and miscellaneous writer, who is now only known for his joint labours with Nicholas Brady in a metrical version of the psalms. Tate retained the laurel till the reign of George I. and even wrote the first birth-day ode for that monarch, but is said to have died Nov. 21, 1715, in the Mint, where he was forced to seek an asylum for debt. Lord Rochester said, if Shadwell had burnt all he wrote, and printed all he spoke, he would have had more wit and humour than any other poet. Dorset was also his friend.

1692, Feb. 1. *London Mercury*, No. 1. The sixth and seventh numbers of this paper were ornamented with a curious wood-cut representing an owl perched on a raven, with the words "*Par pari*, or Birds of a Feather."

1692. *Lacedemonian Mercury*, being a continuation of the *London Mercury*.

1692, March 30. *Collection for Improvement of Husbandry and Trade*. By John Knighton, F.R.S. Published by Randal Taylor. No. 1.

1692. *The Gentleman's Journal*, for March.

1692. *Monthly Miscellany*; consisting of News, History, Philosophy, Poetry, Music, &c.

1692. *The complete Mercury*, or News for the Ingenious.

1692, May 8. *The Scotch Mercury*; giving a true Account of the daily Proceedings and most remarkable publick Occurrences in Scotland, No. 1. Printed for R. Baldwin.

1692, May 9. *Proclamation for calling out Heretors and Fencible Men to attend the King's Host*. Edinburgh: printed for R. Baldwin.

1692, June 9. *The Moderator*, No. 1.

1692, Sept. 13. *Proclamation for the better Discovery of seditious Libellers*.

1692, Dec. 13. *Athenian Mercury*, No. 1.

1693. Printing was introduced into the city of New York, the capital of the province of that name, in North America. WILLIAM BRADFORD, who had previously been the first to exercise the art of printing in Philadelphia. In that city he continued, we are told, "until some time in the year 1693, when he set up a press at New York, and was appointed printer to the government. The first book from his press was a small folio volume of the laws of the colony, bearing the date of that year." In the imprint he styles himself "printer to their majesties," and directs to his printing-house "at the sign of the Bible." Bradford possessed a paper-mill (perhaps the first built in British America) so early as the year 1728. He was a man of good character and affable manners; and, after holding his situation as printer to the government upwards of fifty years, closed his useful life in the year 1752, at the advanced age of ninety-four.

1693. An order was issued by the company of stationers, for prosecuting all printers, booksellers, and others, who neglect to send in their three books for the three libraries.

1693. CHARLES BLOUNT, a deistical writer, published a pamphlet, in which he grounded king William's (III.) claim on the right of conquest; it was burnt by the hands of the hangman; and another, on the *Life of Appollonius Tyanicus*, gave great offence, as an attack on Christianity.

He was the youngest son of sir Henry Blount, an ingenious writer of Hertfordshire, and born in 1654; on the death of his wife, he fell in love with her sister, and because he could not marry shot himself in 1693. His miscellaneous works were published by Gildon.

1693, June 1—3. The trial of WILLIAM ANDERTON, printer, at the Old Bailey, before the lord chief justice Treby, Mr. Justice Powell, sir John Fleet, knt., lord mayor, and sir Salathiel Lovel, knt., recorder of London, for high treason. The trial began on Thursday June 1, but respited till the Saturday following, June 3, that this scene might be acted with the greater solemnity. Mr. Anderton being brought to the

bar, was arraigned, and pleaded not guilty, and made it his request, that he might have a copy of his indictment; but it would not be granted. The crime laid to his charge was, the composing, printing, and publishing, two malicious, treasonable libels: the first entitled, *Remarks upon the present Confederacy and late Revolution in England*; the second, *A French Conquest, neither desirable nor practicable*.

The principal evidence against the prisoner was Robert Stephens,\* the messenger of the press, who made oath, that coming to Scudamore's house, where the prisoner lodged, and asking what lodgers they had, he saw the prisoner's mother in the yard, who crying out murder, the prisoner came out of the house, and fell upon him; and that at the time of Mr. Anderton's apprehension, he did in words disown the government, and called king William Hooknose, not submitting himself: that he took at the said house an old trunk filled with seditious papers and pamphlets, and that he had seen the trunk formerly, and knew it to be Mr. Anderton's, and that he also found a desk, and took out of the said desk forty or fifty of a sort of the *Remarks and French Conquest*, and that he saw the prisoner shove up a bed, which run upon wheels, behind which was a door, which

he opened, and there found a printing press, letters, and other materials proper for that trade; that he also found an errata, with an &c. set in the press, the very same which he believed were the book, called *Remarks upon the present Confederacy*. Hooper, the beadle of stationers' hall, seconded the aforesaid testimony, as also the constable and his beadle; they also alleged forty or fifty of the *French Conquest* to be there. Besides Stephens, the constable, and the beadles, there were also two printers sworn, viz. Roberts† and Snowden,‡ (a dissenter to whom Anderton was some time an apprentice) the substance of whose evidence was, that they had seen the characters in the hall, together with the &c., and that they did believe it was the letter that printed that book, (i. e. the book then shewed in court,) as also, that the two books were printed with one and the same letter or character. Another witness made oath, that about three quarters of a year before, he had sold the prisoner paper, by the name of Williamson.

In summing up the evidence, two or three old, musty, impertinent precedents were brought in, which had not seen the sun for many ages, the chief of which was that of sir John Oldcastle, lord Cobham, and he might as well have urged the case of the Man-in-the-Moon: for what was my lord Cobham's case to printing? That famous Wickliffe lived in the reign of Richard II., some scores of years before printing was thought on, which came not into England till the reign of Henry VII.; and the prisoner had very well observed, that it was not expressed in the statute, 25 Edward III., (and it is impossible printing should be expressed there,) is barred from being any ways adjudged, or interpreted treason, by the statute 1 Mary. In short, in summing up the evidence to the jury, every thing was aggravated to the utmost, every little punctilio was made use of, which was thought might be any thing serviceable to beget in the jury an hard opinion of the prisoner; the bed with wheels was not let alone: every little trifle was fetched in, with all the witty malice imaginable; nay, the very soul of the man was looked into, and the jury told what was within him; he was an ill-minded man, a disaffected person; he was no lover of the government; and that printing was an overt-act; so the jury were sent out to consider of their verdict.

After two hours debate, the greater part of

\* Robert Stephens. And it is fit Robin should bring up the rear of the printers, as he is "messenger to the press," as well as a printer, and orders those *irregular things* as well as they their own heads of letter. I know Robin has many enemies, that *grunt* at him, and, perhaps, they have reason for it; and if I will praise the bridge that I went over, I must say he never did me the least injury; for if I printed a book that had no licence, I took such care to *dazzle* his eyes that he could not see it, and Robin will be as true to his friend (when there is a fellow-feeling in the case) as any man in the world, which is a rare quality in a man who lives by *informing*; and as Robin knows how to be just and kind to those that deserve it from him, so were I put to my oath, I could not swear but Robin Stephens and his brother messenger, *John Gellibrand*, are both very honest quiet men.—I mean as to me; and when the world has believed this, I will endeavour to find out their other virtues; for, as to Gellibrand, I never heard his honesty questioned; and as to Stephens, he is as much a saint as the world thinks him, and that is as high as I can go in his praise; for if he alone is a wise man, who hath a clear and certain knowledge of things, then I am excluded, for I mistake every thing, when I weigh the character of men (whether friends or enemies) if I come near them, I am within a circle and straightways as if conjured from giving a true verdict; yes, when I had *outlawed* a person, as one altogether unworthy of protection (and perhaps have thought him as black as "the *Observer*" has made Stephens) yet how hath the tender of some few qualities been ready to make me reverse it! hath not only stopped my mouth (as is seen in my character of Robin Stephens) but muddled my sounder judgment of him, so that now I have had enough to do to see the fault through my friend. My very judging faculty hath been somewhat bribed to spare the sin, lest I should fall too foul upon the subject of it, and now have I found out a weak brain, a strong temptation, or something or other to extenuate the offence! yes, an intent of getting a place myself, and some possibility of arriving to Robin's height, hath been such a powder mine, that I have been well nigh blown up in my own trenches, and my affections have been like a navy in a storm at sea, hardly kept together, so that you see, reader, if I have given Stephens too loud a character, it is so naturally the effect of those *considering* favours I have received from him that to have *hoped* in his praise would have been very ungrateful; and for such who think I have mistook his virtues, or said too little in his commendation, I would have them consider that Robin has been a kind and honest messenger to me, and that is all I know of the matter.—*Dunton*.

† He was master over himself; when he had a storm in his heart, he made all fair weather in his face. He would look big, but I never found he was passionate, proud, or vain; however, he had this particular in him, that he never broke his word to a bookseller. In twenty books that he printed for me, he never disappointed me once, or exacted twopence, so that what he left to his widow will wear well, for it was every penny honestly gotten.—*Dunton*.

‡ He was my very dear and intimate friend for many years, a man of very great industry, and composed much himself. He was a great admirer of Mr. Lott. His widow follows the same trade; and though I was pretty deeply indebted to her husband, yet she has not once asked me for it, which I take as a very great and noble kindness, and so soon as I can possibly compass money to discharge my debts, she, to be sure, shall not lose a farthing.—*Dunton*.

the jury became very well inclined to have found not guilty; but there was one amongst them who loved mischief, and he was for hanging them for being Jacobites, not for being guilty; and being since told of the severity of their verdict, he readily acknowledged, that the evidence did not amount to the proof of the fact; but, saith he, what of that? I believed he was guilty, and I will hang a hundred of them for half so much evidence.

When the jury appeared, the question was asked, whether they were agreed of their verdict? A zealous man answered, No. Whereat the court frowned, and shewed themselves much displeased, when the foreman of the jury, (desirous that all men may have fair play for their lives) put this question to the bench, Whether the having those things by him, without making any further use of them, did affect the prisoner as to life? Now this question was very pertinent, though nothing pleasing; but after some frowning and pouting, the court answered, No. But that was not their business, they were to find it printing, and that was a sufficient overt act. Some of the jurymen, by way of complaint, said thus: My lord, our foreman is of opinion this fact is not proved.—*Court*: Whether it be proved or no, you ought to determine; the bare finding the books in his custody would not be treason; but the case is, gentlemen, here is a man that has a printing-press, to which no man has admission but himself; and this man is found with an errata, and &c., so that he must needs print the treason. To this a jurymen answered, 'Tis a very strong presumption, my lord. And then baron Powell clenched the nail with this grave saying, "a violent presumption is as much as if a man had been there and done it himself." These answers being returned to questions, the jury were sent back again, where almost three hours more were spent in debating the matter, before they could come to a conclusion; they then complied and brought in the prisoner guilty. The matter now lay wholly before the city recorder, sir Salathiel Lovell, who after a flourish or two of empty rhetoric, proceeded to pronounce that dreadful sentence which the law allots to treason; to have the heart and bowels torn out, and burnt, and the body dismembered, and the quarters set up, or disposed as authority orders.

Whilst Mr. Anderton was preparing for his death, his friends were struggling for his life. He had many friends upon the account of his known ability, industry, and integrity; others were taken up with his manly behaviour, and clear pleading upon his trial; and many more were forward to move in his case, in pity or indignation, at his usage, but all their efforts joined with that of his wife were of no avail, and the dreadful sentence was put into execution at Tyburn, upon the sixteenth day of the same month, except the disembowelling.

It was then well known that Anderton did not print the *French Conquest*, and that it was printed at a press which he never saw, and by

persons with whom, for a long time, he had no communication: for the government had at that time in their custody those persons, who knew when and where it was printed, and (as it was said) had made a discovery of all, perhaps of more than they knew. The papers of that sort taken upon the prisoner, were sent to him the day before he was seized: and some have a vehement suspicion, that it being resolved he should be taken the next day, those pamphlets were sent before-hand, that something might certainly be found upon him; but his innocence in that matter hath since been made evident to all the world, by an irrefragable testimony; for at this September sessions at the Old Bailey, Price, in open court, made oath, that he, and the prisoners then at the bar, Newbolt and Butler, printed the *French Conquest*.—See Howell's *State Trials*, vol. 12, pp. 1240-1267.

1693, Feb. 14. *The Jovial Mercury*. No. 1.

1693, Feb. 18. *The Ladies Mercury*, No. 1.

1693, April 18. *Proceedings of the Parliament of Scotland*. Edinburgh. Sold by R. Baldwin. No. 1. Licensed April 29.

1693, May 31. *Observations upon the most remarkable Occurrences in our Weekly News*. No. 1.

1694. By the firm and decisive tone of the house of commons, the last restrictive laws against the press expired in England, and from this time it has been generally considered to be free. It was granted, says our philosophic Hume, to the great displeasure of the king and his ministers, who, seeing no where, in any government during present or past ages, any example of such unlimited freedom, doubted much of its salutary effects. At the same time the oppressive statutes of giving three copies of every printed book were repealed.

1694, Sept. 13. *Died*, JOHN BARBIER D'ANCOUR, a French advocate of talent, and a celebrated critic. When he was near his death, a friend told him that he left an immortal name behind him. "Alas!" said the critic, "if my works should have any sort of value of themselves, I have been wrong in the choice of my subjects; I have dealt only in criticism, which never lasts long. For if the book criticised fall into contempt, the criticism falls with it, since it is immediately seen to be useless; and if, in spite of the criticism, the work stands its ground, then the criticism is equally forgotten, since it is immediately thought to be unjust!" Pope says,

" 'Tis hard to say, if greater want of skill  
Appear in writing, or of judging ill."

It is related of Barbier, that he married the daughter of his bookseller, as a discharge for a heavy debt.

1694, Nov. 25. *Died*, JOHN TILLOTSON, archbishop of Canterbury, and a very distinguished theological writer. He was born at Sowerby, in Yorkshire, September 29, 1630, and rose through several gradations to the highest office of the church. Birch, in his life of the archbishop, states that on account of his great celebrity as a divine, a bookseller gave to his widow

(the only property with which he was able to endow her) for the copyright of his unpublished sermons, no less a sum than two thousand five hundred guineas. They have ever since been admired as models of correct and elegant composition in the department of literature to which they belong. After the death of the archbishop, a bundle of libels were found among his papers, on which he had written, "these are libels, I pray God forgive them as I do." A striking proof of his charity and benevolence.

1695, Nov. 29. Died, ANTHONY WOOD, a celebrated antiquary, and author of the *History and Antiquities of the Colleges and Halls in the University of Oxford*. This work was commenced about the year 1656, and was completed in the year 1668. It consisted of two parts; the first being a general history of the University, from its institution to the year 1649; the second, a history of the ancient and present schools, theatres, lectureships, &c. together with a history of the several colleges and halls, from their first foundation, down to the year 1668. To the whole of this was subjoined an appendix, entitled, *Fasti Oxoniensis*, or a Commentary on the supreme Magistrates of the Universitie of Oxford, namely of the Chancellours, Commissaries, Prochancellours, or Vicechancellours, and Proctors: also of the High Stewards and Parliamentarie Burgesses of the Universitie. For the compilation of this elaborate work, the author, by means of Dr. Wallis, obtained leave to consult the university registers, monuments, and writings. After he had extracted from these writings every thing he thought useful for his great undertaking, he went to London, with letters of recommendation from Dr. Barlow, provost of Queen's college, to sir William Dugdale, by whose means he obtained leave to peruse some manuscripts in the Cotton library, and had free access to the records in the Tower. With these advantages he easily furnished himself with authentic facts; yet the labour in collecting them must have been immense, and the judgment in selecting what would be useful, and in rejecting what was superfluous, must have required time and attention; so that we cannot sufficiently admire his great assiduity in order to bring so elaborate a performance to a conclusion, in so short a time. On the 22d of October, the university of Oxford offered the sum of *One Hundred Pounds* for the copy of this work; he accepted it, and received the money on the 29th of March following. What astonishing liberality!! This purchase was made for the purpose of translating the work into Latin. The version was accordingly performed, under the inspection of Dr. Fell, dean of Christ Church, and published in 1674, in folio, under the title of *Historia et Antiquitates Universitatis Oxoniensis, duobus voluminibus comprehensa*. Mr. Wood was greatly displeased with this translation, as appears from many passages in his *Athen. Oxon.* where he makes heavy complaints of the injury done to his book (Vid. vol. 2d. Col. 853. 2d edition). The Editors of the *Biographia Britannica* give a remarkable

instance of the translator's wilful misrepresentation of the author's meaning. Bishop Burnet having attacked this work, it was vindicated by the author, in an 8vo. volume. Wood was born at Oxford in 1632, and educated in that university. A new edition from the original manuscript in the Bodleian library; with a continuation to the year 1786, was published by the Rev. John Gutch, chaplain of All Souls' college, Oxford.

1695, Nov. 28. *The Flying Post.* No. 84.

"If any gentleman has a mind to oblige his country friend or correspondent with this account of publick affairs, he may have it for 2d. of J. Salusbury, at the Rising Sun in Cornhill, on a sheet of fine paper; half of which being blank, he may thereon write his own private business, or the material news of the day." "If any person has any study of books or library to dispose of, if they will send a catalogue of them to John Salusbury, at the Rising Sun in Cornhill, they shall have the full value of them in ready money."

Dec. 17.

1696. A work was secretly printed within the convent of La Grande Chartreuse, chief of the whole order of Carthusians, situate on the Guyer, within five leagues of Grenoble in Dauphiné,

\* Queen Mary died Dec. 28, 1694, at Kensington, in the thirty-third year of her age, and was buried in Westminster abbey. Her domestic and reserved habits had tended to reform the licentiousness of the court, which had distinguished the two preceding reigns.

entitled, *Explication de quelques endroits des anciens Statuts de l'ordre des Chartreux, avec des éclaircissemens donnez sur le sujet d'un libelle qui a été composé contre l'ordre, et qui s'est divulgué secrettement.* It was written by the general of the order, in answer to some remarks of the abbé la Trappe. The distribution of this volume was so guarded, that even of the Carthusians themselves few ever saw it, a copy being sent to the superior of each house, which he was directed not to communicate.

1696, Feb. 8. *The Athenian Mercury*. No. 30. With this number, which concluded the nineteenth volume, John Dunton thought it right to discontinue his weekly publication, "as the coffee-houses had the *Votes* every day, and nine Newspapers every week;" and proposed to publish his *Mercuries* in quarterly volumes, "designing again to continue it as a weekly paper, as soon as the *glut of news* is a little over."

1696, March 9. *The Protestant Mercury*; Occurrences Foreign and Domestic. No. 1.

1696, April 10. A Declaration of the Sense of the Archbishops and Bishops now in and about London, upon the Occasion of their Attendance in Parliament, concerning the irregular and scandalous Proceedings of certain Clergymen at the Execution of Sir John Friend and Sir William Parkins.

1696, June 3. *London Mercury*; or, *Mercur de Londres*; printed in opposite columns, English and French. No. 1.

1696, Aug. 4. *Dawks's\* News Letter*, [on a type to imitate Writing]. No. 1. This letter will be done upon good writing-paper, and blank space left, that any gentleman may write his own private business. It does undoubtedly exceed the best of the *written news*, contains double the quantity, is read with abundance more ease and pleasure, and will be useful to improve the younger sort in writing a curious hand.

1696, Sept. 8. *Account of a bloody Battle in Hungary, &c.* in a Postscript to the *Flying Post*.

1696, Sept. 17. *Lloyd's News*; printed for Edward Lloyd (Coffee-man) in Lombard-street.

1696, for Sept. *The Night Walker, or Evening Rambler, &c.*; to be published Monthly.

1696, Oct. 29. *The Weekly Survey of the World, or the Gentleman's solid Recreation*.

1697. Lord MOLESWORTH, who had been the English ambassador at the court of Copenhagen, published, about this period, a valuable work, under the title of *An Account of the History of Denmark*, in which he expressed himself with all the freedom of a Briton respecting the arbitrary conduct of the Danish government. His Danish Majesty, highly incensed at some of the observations of the noble author, commanded his ambassador to complain on the subject to William III. "What would you have me do?"

\* He very often solicited me for work. I obliged him with it as often as I could. He is very obliging and diligent, and reasonable in his prices. He has a very rich invention: witness his new letter, with which he printed his newspaper. He printed several pieces of Salmon, and does excellent work.—Dunton.

replied the king. "Sire," answered the Dane, "if you had caused such a complaint to be preferred to the king, my master, he would have sent you the head of the writer." "That," rejoined his majesty, "is what I neither will nor can do; but if it will give you satisfaction, he shall introduce what you have just said into the second edition of his work."

1697, May 17. *The London Post*; with the newest Intelligence, both Foreign and Domestic.

1697, May 21. *The Foreign Post*, with Domestic News, &c. French and English. No. 3.

1697, July 5. *The Amsterdam Slip*.

1697, Sept. 14. *The Account of the signing the General Peace, &c.* in a Postscript to the *Flying Post*.

1697, Oct. 23. *The Postman and the Historical Account, &c.* No. 386.

1698. John Dunton mentions a Mr. LOWNDS in the Strand. He was Dr. Horneck's bookseller for many years, he printed his *Great Law of Consideration*, his *Sermons of Judgment*, and *Discourse on the Sacrament*, entitled *The Crucified Jesus, &c.* Mr. Lownds was a sincere honest dealer, and had this peculiar to himself; that he was never much concerned, (except for the death of his pious and learned author) for the things that he could not help, for he did all he could to prevent a grievance, and then he acquiesced in the divine pleasure.

1698 (*about*), *The Second and last Adventure of the Wheel of Fortune*; Thomas Cornwallis, Esq. Undertaker.

1699. In this year Fenelon's celebrated *Telemachus*, was first printed in four volumes, under the following extraordinary circumstances:—It appears to have been composed by Fenelon, while he was preceptor to the royal duke. Not long after the affair of Quietism broke out, Fenelon gave the manuscript of it to a valet de chambre, to be copied by him, and the valet sold it to the widow of Claude Barbou, at Paris. At that time the police narrowly watched the motions of Fenelon.\* They had notice of the publication, and when the bookseller was at the 208th page of the impression, seized, in the king's name, all the copies which were in the possession of the booksellers; and every precaution was used to annihilate the work. But it was too late; the manuscript was preserved; it was sold to Adrian Moetjens, a bookseller at the Hague, and by him was immediately printed. This edition was very incorrect, but he afterwards gave a more perfect edition of it in 1701; and that edition was generally followed, in all subsequent editions, till the edition of 1717. In that year, the marquis of Fenelon, great nephew to the archbishop, published a new edition of *Telemachus*, from a copy corrected by Fenelon himself. This edition became

\* Francis de Salguac de la Motte Fenelon, archbishop of Cambray, one of the most illustrious of French prelates, was born of an ancient family, at the castle of Fenelon, in Perigord, August 6, 1661, and died January 7, 1715, without money and without a debt. Besides *Telemachus*, he was the author of many other works of great merit.

the *textus receptus*, or the model from which all subsequent impressions have been taken.

1699. The first work printed in the Isle of Man was a small tract, in Manks and English, entitled the *Principles and Duties of Christianity*. It was printed at the expense and under the immediate inspection of the venerable bishop Wilson.\* In his latter days, he procured a translation of the gospel of St. Matthew into Manks, which was also printed at his own expense, and extensively circulated throughout the country. He also got the gospels of St. Mark, St. Luke, and St. John, and the Acts of the Apostles, translated into the same tongue, but did not live to see them printed.

1699. *Historia Histrionica*. An Historicall Account of the English Stage, shewing the ancient use, improvement, and perfection of dramatick representations in this nation, in a dialogue of plays and players. *Hæc olim meminisse juvabit*. London: Printed by G. Croom, for William Hawe, at the Rose in Ludgate-street. Thirty-two pages, containing a preface of four pages.

James Wright was one of the earliest historians of the English stage, and perhaps one of the first collectors of old plays after Cartwright, whose collection was at Dulwich. He was the author of this very scarce and valuable little piece; of the original edition of which Mr. Warton says, he never saw but one copy. It was first brought forward by Oldys, who quoted it in his life of Alleyn, the player, in the *Biographia Britannica*, having abstracted it in his *British Librarian*, p. 62. By the recommendation of bishop Warburton, it was prefixed, in 1774, to *Dodsley's Old Plays*, and repeated in Mr. Reed's accurate and improved edition of that collection. But the preface should have been reprinted, of which the following is a specimen:—"Old plays will always be read by the curious, if it were only to discover the manners and behaviour of several ages, and how they altered. For plays are exactly like portraits drawn in the garb and fashion of the time when painted. You see one habit in the time of king Charles the First; another, quite different from that, both for men and women, in queen Elizabeth's time; another under Henry the Eighth different from both; and so backward, all various. And in the several fashions of behaviour and conversation, there is as much mutability, as in that of clothes. Religion and religious matters were once as much the mode in publick entertainments, as the contrary has been in some times since."

To the list of his works specified in Watts' *Bibliotheca Britannica*, may be added the following three poems of St. Paul's cathedral, viz.,—*The Ruins, The Rebuilding, The Choir*, 1697.

\* Thomas Wilson, D.D., bishop of Sodor and Man, was born at Burton Wirral, Dec. 20, 1665. He was a most excellent prelate and eminent writer in theology. His works, in two vols. folio, consist of religious tracts and sermons, with a short *History of the Isle of Man*. He died March 7, 1695.—See Stowell's *Life of Bishop Wilson*, 8vo.

Wright was a skilful antiquary, and possessed many rare and valuable old manuscripts, some of which he cites in his *Historia Histrionica*, and undoubtedly many old plays. But all his literary curiosities, among which was an excellent transcript of Leland's *Itinerary*, of the age of queen Elizabeth, and consequently prior to those now existing, which are replete with mutilations and corrections, was unfortunately consumed by a fire that occurred in the Middle Temple, where he occupied chambers, in 1698.

1699, Jan. *The History of the Works of the Learned*, or an Impartial Account of Books lately printed in all parts of Europe; with a particular Relation of the State of Learning in each Country; done by several Hands. No. 1.

The authors of the *History of the Works of the Learned* have settled a correspondence beyond sea, to have all the foreign journals of learning transmitted to them as they are published, and all other curious pieces that can be conveyed by post; and for larger volumes, they shall give such account of them as is transmitted by foreign journals. As to books printed in London, or in either of the universities, unless trifling, shall, as speedily as they can, give an impartial account of them, and, as far as may be in the author's own terms: and that not as critics, but historians, unless in matters relating to an innovation in our established religion and civil constitution. They shall observe a medium betwixt tedious extracts and superficial catalogues; at the end insert an account of books in the press here and beyond sea; and if any gentleman will communicate to the booksellers concerned an extract of his own work, &c. it shall be faithfully published.

1699, Feb. 17. *The Protestant Mercury*. No. 344. This paper coming out only on *Wednesdays* and *Fridays*, and no other paper coming out on those days, it is near as much read as all the other three papers; and therefore very proper to put advertisements in. J. Dawks.

1699, June 8. Mr. JACOB TONSON, by direction of the Rev. Mr. Jonathan Swift (to whom Sir William Temple\* left the care of his writings) gives notice, that with all convenient speed will be published, by the said Mr. Swift, a collection of letters, from the year 1665 to 1672, written by sir William Temple, baronet, containing a complete history of those times, both at home and abroad; which letters were all reviewed by the author some time before his death, and digested into method by his order.

1699, March 2. *The Edinburgh Gazette*, printed by James Watson. No. 1. Author of the *History of Printing*, and for several years the great news-monger of Scotland, as Butter had been during a prior age. In 1699, after having published forty-one numbers, he transferred the *Edinburgh Gazette* to John Reid.

\* Sir William Temple was an eminent English statesman and political and miscellaneous writer. He was one of the few eminent men of his time who preserved both public and private virtue. His works have been frequently printed, and are still admired. He was born in 1628, and died in 1698.

1699, May 4. *The Weekly Comedy*, as it is daily acted at most Coffee-houses in London.

1700, June 25. An order was made by the lord mayor and court of aldermen, forbidding to affix in any part of the city or the liberties thereof, the playhouse bills, according to the presentment of the grand jury, which ran thus:—"The having some effectual course taken (if possible) to prevent the youth of this city from resorting to the playhouses," &c. The usual method of advertising the performances of the London theatres was originally by affixing them to numerous posts, which formerly encumbered the streets of the metropolis, and hence the phrase *posting bills*. See page 541, *ante*.

1700. JOHN ASGILL, a member of parliament, wrote a work entitled, *An Argument, proving that Man may be translated from hence without passing through death*, &c. This work was voted a blasphemous libel, ordered to be burnt, and the author to be expelled the house. John Asgill was born about the middle of the seventeenth century, and studied at Lincoln's inn; in 1699 he went to Ireland, where he acquired a fortune, and was elected a member of parliament. Finding his affairs desperate in Ireland he returned to England, when he was chosen member for Bramber, in Sussex, and enjoyed his seat two years. During an interval of privilege he was committed to the Fleet for debt; while he was in imprisonment the house took into consideration the above book, and having voted it blasphemous he was expelled from his seat. He continued in the rules of the Fleet and king's bench thirty years, in which time he published many political tracts, and died in 1738.

1700. R. JOSEPH ATHIAS, one of the most famous printers of his day, was the son of Tobias Athias, who printed a Spanish bible for the use of the Jews. He resided at Amsterdam, where he published a Hebrew bible, in 1661; and again in 1667, in 2 vols. 8vo., both printed under the inspection of the learned John Leusden. For the latter, which is considered the most accurate, the States General presented him with a chain of gold and a gold medal pendant! Of the edition of 1661, 3000 were printed; and were the first printed copies of the Hebrew bible in which the verses were distinguished by Arabic numerals. It is also affirmed that he printed an immense number of English bibles, and actually ruined himself by attempting to preserve for many years all the forms of a large English bible! but there is reason to doubt the correctness of this statement. Le Long places his death in this year.

1700. *The Dutch Prophet*; or, the Devil of a Conjuror; being infallible Predictions of what shall happen in and about the Cities of London and Westminster, from Tuesday the 20th of November to Tuesday the 3rd of December, 1700. By Peter Nicholas Van-grin, late Superior of the College of Lapland Witches, and Chief Necromancer to the Dutch at Japan: to be continued weekly. No. 1.

1700. *The infallible Astrologer*.

1700, May 1. *Died*, JOHN DRYDEN, one of the most illustrious of English poets. He was born at Aldwinkle, in Northamptonshire, of an ancient family, August 9, 1631, and was educated at Westminster and Cambridge. In 1657 he removed to London, and practised the literary trade, which he had chosen, for forty years, enjoying, during that period, a high though not an undisputed reputation, and suffering considerably from poverty. His plays, twenty-seven in number, of the various classes of tragedies, comedies, and tragi-comedies, are, upon the whole, unworthy of his genius. In 1665 he married lady Elizabeth Howard, daughter of the earl of Berkshire. On the establishment of the Royal Society he was chosen one of the first members. In 1662 appeared his first play, called the *Wild Gallant*. Soon after the fire of London he engaged with the king's theatre for an annual stipend, on condition of furnishing a certain number of plays in each year. At the accession of James II. Dryden turned Roman Catholic, and, like most converts, endeavoured to defend his new faith at the expense of the old one, in a poem called the *Hind and the Panther*, which was admirably answered by Prior and Montague in the *Country Mouse and City Mouse*. At the revolution he lost his posts, and was succeeded by Shadwell, whom Dryden satirized under the name of Mac Flecknoe, in October 1682. In 1695 appeared his translation of *Virgil*, which alone would immortalize his memory. He was buried in Westminster abbey, where is a monument to his memory, erected by Sheffield duke of Buckingham. A complete edition of his whole works, in 18 vols. 8vo. was printed at Edinburgh, by Ballantyne and Co. in 1808. He had three sons; Charles became usher of the palace to pope Clement XI. and was drowned in 1704; John wrote a comedy, called *The Husband his own Cuckold*; and Henry entered into a religious order abroad.

Dryden was a man of amiable and virtuous disposition, but was tempted by the taste of the age to write on many occasions very licentiously, and allowed himself to be hurried away by injured self-love into rancorous controversies, which impaired his peace, and degraded his genius. He was endowed with a vigorous and excursive imagination, and possessed a mastery over language which no subsequent writer has attained. With little tenderness or humour, he had great power of delineating character, wonderful ease, an almost sublime contempt for mean things, and sounding, vehement, varied versification.

The dedications of Dryden, though carried to an excessive height in adulation, were the vices of the time more than of the man; they were loaded with flattery, and no disgrace was annexed to such an exercise of men's talents; the contest being who should go farthest in the most graceful way, and with the best turns of expression. The common price for a dedication was from £20 to £40, though, upon special occasions, a larger sum has been given. From the

revolution to the time of George I. the price for the dedication of a play, was from five to ten guineas, when it rose to twenty; but sometimes a bargain was to be struck when the author and the play were alike indifferent. His prefaces are pleasing, notwithstanding the opposite opinions they contain, because his prose is the most numerous and sweet, the most mellow and generous of any our language has yet produced. His digressions and ramblings, he himself says he learned of honest Montaigne.

Mr. St. John, afterwards lord Bolingbroke, happening to pay a morning visit to Dryden, found him in an unusual agitation of spirits, even to a trembling. On enquiring the cause, "I have been up all night," replied the old bard, "my musical friends made me promise to write them an *Ode*, for their feast of St. Cecilia. I have been so struck with the subject which occurred to me, that I could not leave it till I had completed it; here it is, finished at one sitting." And immediately showed him the *Ode of Alexander's Feast, or the Power of Music*, which places the British lyric poetry above that of any other nation; for in this ode there is a wonderful sublimity of thought, a loftiness and sweetness of expression, and a pleasing variety of numbers.

To the laudable industry of Mr. Malone the curious reader is indebted for the publication of several letters from Dryden to Jacob Tonson, and of one from Tonson to the poet; which considerably illustrate the history of both. The first of these was in 1684, preparatory to the printing of the second volume of those *Miscellaneous Poems* which are equally known by the name of *Dryden* and of *Tonson*; and is written in terms of great familiarity, with thanks for two melons. Tonson's letter is perfectly the *Tradesman's*—pleased with the translations of Ovid, which he had received for the third miscellany, but not with the price; having only 1446 lines for fifty guineas, when he expected to have had at the rate of 1518 lines for forty guineas; adding that he had a better bargain with Juvenal, which is reckoned not so easy to translate as Ovid. Most of the other letters relate to the translation of Virgil, and contain repeated acknowledgments of Tonson's kind attention. "I thank you heartily," he says, "for the sherry; it was the best of the kind I ever drank."—The current coin was at that period wretchedly debased. In one letter Dryden says, "I expect forty pounds in good silver; not such as I had formerly. I am not obliged to take gold; neither will I; nor stay for it above four-and-twenty hours after it is due." Some little bickerings occasionally passed between the author and his bookseller; but they do not seem to have produced any lasting ill-will on either side. In 1698, when Dryden published his *Fables*, Tonson agreed to give him £268 for 10,000 verses; and, to complete the full number of lines stipulated for, he gave the bookseller the *Epistle to his Cousin*, and the celebrated *Musical Ode*. "The conduct of traders in general in the seventeenth century," as Mr. Malone observes, "was

less liberal, and their manners more rugged than at present; and hence we find Dryden sometimes speaking of Tonson with a degree of asperity that confirms an anecdote communicated to Dr. Johnson by Dr. King, of Oxford, to whom Lord Bolingbroke related, 'that one day, when he visited Dryden, they heard, as they were conversing, another person entering the house. This,' said Dryden, 'is Tonson: you will take care not to depart before he goes away: for I have not completed the sheet which I promised him; and, if you leave me unprotected, I shall suffer all the rudeness to which his resentment can prompt his tongue.' On another occasion, Tonson having refused to advance him a sum of money for a work on which he was employed, he sent a second messenger to the bookseller, with a very satirical triplet; adding, 'Tell the dog, that he who wrote these lines, can write more.' These descriptive verses, which had the desired effect, by some means got abroad in manuscript; and, not long after Dryden's death, were inserted in *Faction Displayed*, a satirical poem, supposed to have been written by William Shippen, which, from its virulent abuse of the opposite party, was extremely popular among the Tories." Of Dryden's prose compositions, which have been published separately in four volumes, the most remarkable are his *Discourse on Dramatic Poetry*, and the *Prefaces and Dedications* to his various poetical works. These are the first easy and graceful essays upon the lighter departments of literature which appeared in England. Dr. Johnson describes them as airy, animated, and vigorous. In the *Discourse*, he has drawn characters of his dramatic predecessors, which are allowed to be unsurpassed, in spirit and precision, by any later or more laborious criticisms.

Sir George Mackenzie, lord advocate of Scotland under Charles II. and James II. seems to have been the only learned man of his time that maintained an acquaintance with the lighter departments of cotemporary English literature. He was the friend of Dryden, by whom he is mentioned with great respect. Sir George Mackenzie was born in 1636, and died at Edinburgh, May 2, 1691. The compositions bearing a resemblance to English, which appeared in Scotland during this century, were controversial pamphlets in politics and divinity, now generally forgotten.

1700. *Pue's Occurrences*. This was the second newspaper published at Dublin; it was called after the proprietor, and maintained itself for more than half a century.

1700, Nov. 29. *The Merry Mercury*; or, a Farce of Fools. No. 1.

We shall take leave of the seventeenth century with the following lines upon a picture of Time:

"Years are the teeth of time, which softly eat,  
And wear out curious books in manuscript.  
Fire is the scythe, wherein he down doth mow  
Ten thousand precious volumes at a blow.  
Best printing, best of all his rage withstands,  
And often chains his feet, and ties his hands;  
Rescued from whom here various authors meet,  
And, all united, form a splendid treat.  
So numerous flowers in one rich nosegay joie,  
And still more fragrant smell and brighter shine."

## EIGHTEENTH CENTURY.

"STRICTURE on books when prejudice indites,  
Or ignorance judges of what genius writes;  
When blinded zeal, and rage on learning lower,  
And bigot dulness fills the seat of power;  
Well may pure truth for her hard lot repine,  
And on her hand her pensive head incline;  
Well may fair science mourn the galling chain,  
Candour bewail, and innocence complain,  
Who curb the press with rigid bigot laws,  
Are foes professed to pure religion's cause;  
And with the iron hand of power would bind  
The freeborn soul, and chain the human mind;  
Crush generous sentiments before express'd,  
And fetter each emotion of the breast."

THE assertion that the "liberties taken by the writers of journals with their superiors were exorbitant and unjustifiable," is only an instance of that partiality which almost every man indulges with regard to himself: the liberty of the press is a blessing when we are inclined to write against others, and a calamity when we find ourselves overborne by the multitude of our assailants; as the power of the crown is always thought too great by those who suffer by its influence, and too little by those in whose favour it is executed; and a standing army is generally accounted necessary by those who command, and dangerous and oppressive by those who support it. Such was the opinion of that great leviathan of literature, Dr. Johnson, who lived at that peculiar period when the press of England roused itself from the lethargy which had so long overpowered it, and though it could not escape persecution, for the first time it asserted its right to take a place in the councils of the nation. Johnson not only witnessed the important struggle, but was himself one of the great means by which the proceedings of the house of commons became known to those to whom they are alone amenable—the people.

The eighteenth century may be considered the most important in the annals of printing in this country; the exertions of the press, if they did not completely overthrow the enemies of free discussion, raised the spirit of liberty, and put to flight the evil demons of tyranny and persecution which had so long haunted the dark night of ignorance and oppression. "The strong barriers which confined the stores of wisdom," says Arnott in his *Elements of Physic*, "have been thrown down, and a flood overspreads the earth: old establishments are adapting themselves into the spirit of the age; new establishments are rising; the inferior schools are introducing improved systems of instruction, and good books are rendering every man's fireside a school. From all these causes there is growing

up an enlightened public opinion, which quickens and directs the progress of every art and science, and through the medium of a free press, although overlooked by many, is now rapidly becoming the governing influence in all the affairs of man."

"The utility and influence of the press, in the world of our moral being, is strikingly and beautifully analogous to that property of the atmosphere of our physical universe which we call *reflection*. For, as by this simple, yet wonderful contrivance of nature, not only is light from the great luminaries transmitted to us, but every visible particle of matter is made by radiations, in turn, to contribute to the general stock of light and glory by which we are surrounded, until earth is filled with beauty, and heaven with splendour; so the *Press* not only transmits to us from their rich and elevated sources the world-enlightening rays of genius and science, but even the smallest radiations of mind, the feeblest scintillations of intellect, are enabled by its aid, to render their minute beauties visible; tending, by their infinite number, rather than by their individual importance, to promote the general spread of knowledge, and the consequent improvement of society. Genius dazzles and delights us; but it is the multitudinous radiations from inferior minds which make us acquainted with those ten thousand proximate objects upon which our happiness and well-being in a great degree depend, yet which, but for the 'press,' would, perhaps, entirely, and for ever, have escaped our notice. As without the property of reflection in the atmosphere, though the glorious luminaries of heaven might still walk in brightness the paths of their magnificent orbits, rejoicing in their undiminished lustres, or repose themselves in solemn grandeur on their everlasting thrones, cheering and delighting the worlds of creatures by which they are immediately surrounded, yet we should derive no advantage from their existence, no delight from their career of glory; deprived of its aid,

even the world of light itself would communicate no light to us; nor the canopy from which ten thousand lesser brilliants now shed their streams of radiance upon our path, be other than a starless void, a dark and gloomy waste. So, were the vivifying labours of the press suspended, though those mightier master spirits of our common nature—those worlds of intellectual energy which, as it were, of themselves, create the light in which they 'live and move'—might continue, though withdrawn from their influence over meaner minds, to solace their own spirits in the unborrowed wealth of native genius; might still pursue in solitude their godlike course, revelling and rejoicing in all the delights of refined and elevated intellectual existence—we, who walk but by their light, who shine but by reason of their brightness, and are mentally visible to each other but as we radiate the scattered beams of their profuse effulgence, should soon present, in our degradation and debasement, the appalling spectacle of a dark moral chaos, where every thing which now instructs, and charms, and ennobles, would speedily be buried beneath an ever-gathering, ever-deepening cloud of cheerless, undistinguishing barbarism."—*Recollections in Retirement.*

1701. A bill for laying a stamp-duty of a penny upon every number of a periodical publication, consisting of a whole sheet, and of a halfpenny when it consisted of only half a sheet, was first brought into parliament this year, though it did not then pass into a law. Among the loose sheets in the British museum, there is one entitled *Reasons humbly offered to the Parliament in behalf of several Persons concerned in Paper-making, Printing, and Publishing the Halfpenny Newspapers*, against this bill while it was in dependence. From this statement it appears that there were then in London five printers (that is, we must suppose, master printers) engaged in the trade of these cheap periodical publications, which is spoken of as one of very recent origin. The quantity of paper consumed by them is estimated to amount, "by a modest computation," to 20,000 reams in the year. Each of the five printers, it is stated, "pays 9s. per week duty to his majesty, over and besides 1s. for every advertisement therein inserted, so that, by a like computation, each printer of the said halfpenny newspaper pays *communibus annis* to the king the sum of about £60, besides what the paper-maker pays."

The third objection urged against the proposed stamp-duty lets us into a little more of the statistics of the trade. It runs thus:—"For that the said newspapers have been always a whole sheet and a half, and sold for one halfpenny to the poorer sort of people, who are purchasers of it by reason of its cheapness, to divert themselves, and also to allure herewith their young children, and entice them to reading; and should a duty of three-halfpence be laid upon these newspapers (which by reason of the coarseness of the paper the generality of gentlemen are above conversing with) it would utterly

extinguish and suppress the same." It is added that hundreds of persons and families get their bread by selling the publications in question. Many blind persons are stated to be thus employed, and "divers of them," says the account, "who are industrious, and have but a penny or three-halfpence for stock to begin with in a morning, will before night advance it to eighteen pence or two shillings, which greatly tends to the comfortable support of such miserable, poor, and blind creatures, who sell them about the streets."\*

1701. It is a curious fact, that all the improvements in typography followed each other in such quick succession, that in a few years from its first invention in Europe, we find printers in possession of all our common modes of working, and producing specimens of their art, which even now cannot be surpassed. Of this some of the early printed missals upon vellum afford ample proof. But if we have reason to be surprised at the quick steps by which printing with moveable types was perfected, we have more cause to wonder why, with the acquisition of moveable types, the art became stationary. The transition from founding single letters to founding whole pages was so invitingly obvious, that the circumstance of its not having been attempted, may we think be more reasonably imputed to a want of enterprise, than to any ignorance of the perfect practicability of the art.

With regard to the merit of printing with stereotypes, Holland possesses far more substantial claims to the merit of this invention than to the glory of originating the noble art of typography. Besides a quarto bible published in 1711, there exists a Dutch bible, stereotyped in folio, at the commencement of this century. These are indisputable proofs that the art of

\* A document, without date, about the beginning of 1696, in the British museum, entitled, *the Case of the Paper Traders*, represents that a bill was then pending for laying £20 per cent. upon paper, parchment, vellum, and pasteboard, to be imported; £20 per cent. on English papers, &c.; and £17 10s. per cent. on goods then in hand to be sold. It is stated that there were not then one hundred paper mills in all England, with the exception of that belonging to the company (what company is meant we do not know). The value of paper annually made in England, at this time was only about £28,000. "The paper-makers," the representation goes on to say, "are generally very poor, and now can scarce maintain their families; but when (as by this bill required) they must pay, or give security for the duty before they sell, this manufacture will be so much lessened that most of the mills must be ruined, and the makers, with their families, become a charge to their respective parishes. The same may be said of the parchment-makers. \* \* \* The printing trade now consumes the greatest part of the paper; but if this duty be laid, the consumption will not be half what it now is, few books but that are of absolute necessity being now printed by reason of the present advance upon paper; much less will they be able to bear the charge upon the press when so great a duty shall be laid upon the commodity. This will ruin some hundreds of booksellers, bookbinders, and printers, and others depending on that trade." It appears that under this act every sheet of paper that was sold to the public bore on it the king's stamp, and also that offices or shops for the retail of paper thus stamped were opened in all parts of the kingdom, by commissioners appointed to see the act carried into effect. The commissioners seem to have obtained their supplies of paper by contracting for it with certain manufacturers. The two principal offices of the commissioners were at Lincoln's-inn and Southwark.

stereotype printing was employed in Holland long before it was ever known in France. In a note to No. 1316 of Barbier's *Catalogue*, it is also recorded that Johann Muller, pastor of the German church at Leyden, had devised, in the year 1701, a novel method of printing, which much resembles the process of stereotyping as now practised. This method consisted in composing the page in the usual manner, correcting it accurately—securing the type with iron ties—turning it over on its face, and then cementing it into a solid mass by means of a metallic composition, or probably of mastic. The first trial of this process was made with a book of prayers, and printed by W. Muller, the inventor's son, in this year. The invention was transferred to Hake; and Muller, in a letter of the 28th of June, 1709, mentions that he had published a Syriac new testament conjointly with Lexicon Luther's bible.

Upon the question of the origin of the invention, as at present practised, Mr. Tilloch, editor of the *Philosophical Magazine*, has given in the tenth volume of that work, the following extract translated from a Dutch writer. "Above a hundred years ago the Dutch were in possession of the art of printing with solid or fixed types, which, in every respect, was superior to Didot's stereotype. It may, however, be readily comprehended that these letters were not cut in so elegant a manner, especially when we reflect on the progress which typography has made since that period. Samuel and J. Luchtman, booksellers at Leyden, have still in their possession the forms of a quarto bible, which were constructed in this ingenious manner. Many thousand impressions were thrown off, which are in every body's hands, and the letters are still good.

"The inventor of this useful art was J. Van der Mey, father of the well-known painter of that name. About the end of the sixteenth century he resided at Leyden. With the assistance of Muller, the clergyman of the German congregation there, who carefully superintended the correction, he prepared and cast the plates for the above-mentioned quarto bible. This bible he published also in folio, with large margins ornamented with figures, the former of which are still in the hands of Elwe, bookseller at Amsterdam; also an English new testament, and Schauf's *Syriac Dictionary*, the former of which were melted down; and likewise a small Greek testament in 18mo."

A very intelligent and useful work was published by Mr. Hodgson, of Newcastle-upon-Tyne, which ought to be in the hands of every person who make the art of printing either their business or amusement, entitled, *An Essay on the Origin and Progress of Stereotype Printing: including a description of the various Processes*. By Thomas Hodgson. Newcastle: printed by and for S. Hodgson, &c. 1820. Mr. Hodgson lays claim "to little merit beyond that of collecting into one publication a variety of information, which either lay scattered in different works, or was unknown to the generality of

English readers." It is plain from his work, that he is equally excellent either as author or printer; without, however, any practical knowledge of the stereotype branch of the art. Considerable extracts are made by Mr. Hodgson, from the memoir of M. Camus *Histoire de Stéréotypie*, 1802, 8vo. His exposure of the invention of Van der Mey throws a new, and much more rational, light upon the subject: he says, "this mode, which may be considered an intermediate link between the operations of common letter-press printing and those of stereotype, as practised at the present day, consisted in immersing the bottoms of the types, after the pages had been composed, and made quite correct, nearly up to the shoulder of the letter, in melted lead or solder, thus rendering the page one solid mass. In this manner, Van der Mey prepared for Samuel Luchtman, bookseller of Leyden, the pages of a quarto and folio edition of the bible, and of some other books. The way in which he prepared his pages having been misunderstood, or unknown to all the English writers who have yet noticed this subject, this artist has been constantly represented as the inventor of stereotype printing, in the usual acceptance of that term, an honour to which he is certainly not entitled. The authority on which I have ventured to give the above explanation of the process pursued by Van der Mey, is a letter, dated Leyden, June 24, 1801, addressed by Messrs. S. and T. Luchtman, booksellers, of that city, to M. Renouard, of Paris. As this letter is very interesting, both on account of this explanation, and also for the notice it contains of the works on which this process was employed, I here insert a translation of it as published by M. Camus.

"We have sent you a copy of our stereotype bible, which we take the liberty of offering you as a work truly interesting in regard to the history of the art. All the plates of it are now in our possession, and notwithstanding that many thousand copies have been printed from them, they are still in very good condition. They are formed by soldering the bottoms of common types together, with some melted substance, to the thickness of about three quires of writing paper. The plates were made, about the beginning of the last century, by an artist named Van der Mey, at the cost of our late grandfather, Samuel Luchtman, bookseller. The same artist, at the same time, and in the same manner, also prepared for our grandfather, the stereotype plates of a folio Dutch bible; these plates are at present in possession of the bookseller Elwe; and afterwards of a Greek new testament, on brevier, and of 24mo. size, the plates of which are still preserved by us. The last work which this artist executed in this manner, was the *Novum Testamentum Syriacum et Lexicon Syriacum*, by Schauf, 2 vols. 4to.; a work sufficiently known. The plates of this last work have been destroyed. These instances comprise, as far as our knowledge extends, all the attempts of this kind which have yet been

made in this country.' This letter satisfactorily explains the nature of the process pursued by Van der Mey, and proves that the doubts which have been expressed respecting his right to the appellation of inventor of stereotype printing were not entertained without foundation. The misconception which has arisen on the subject, has been chiefly occasioned by the incorrect statement which appeared in the *Nieuw Algemein Konst en Letter Bode*, for 1798. In the statement here alluded to, of which a translation will be found in the tenth volume of the *Philosophical Magazine*, page 276, Van der Mey is represented as having 'prepared and cast the plates,' an expression which certainly is not warranted by the fact."

As far as is known, Van der Mey printed nothing else in this manner: and the art of preparing solid blocks was lost at his death, or, at least, was not afterwards employed.

1701. In Brown's *History of Norwich*, the following notice occurs under this year; "The art of printing, which had been discontinued many years, was revived by Francis Burges, who opened a printing office near the red well." A copy of the list of Norfolk preachers, appointed by the bishop of Norwich for the year 1701, printed by this Burges, occurs among Bagford's collections in the British museum; it was sent to John Bagford by bishop Tanner, and at the bottom contains a note in the handwriting of the bishop. In a book entitled, *Some Observations on the use and originall of the noble art of Printing*, by Fr. Burges, 8vo. Norwich, 1701, the author observes, that "the first day that ever printing was at Norwich, was Saturday the 27th of September, 1701: and this was the first book that ever was printed and published there." However correct or erroneous the latter part of this statement may be, it decidedly proves that Burges knew nothing of Anthony Solempne's previous printing at Norwich, and consequently attests the extreme rarity of those early specimens, even upwards of a century ago.—See page 340, ante. In Burn's catalogue for 1827, (No. 2089) occurs a book thus announced: "Thomas Stackhouse (of Norwich) *Mutual duties of Elders and People*, 4to. Printed for Edward Giles, Norwich, 1696." This book perhaps was printed for Giles, at some other town; and this opinion is confirmed by a sermon upon a man executed at Norwich, which was printed in London "for Edward Giles,\* bookseller in Norwich," in 1696.

1701. A printing establishment was erected in the monastery of SNAOOF, situated in the midst of a lake, near to Bucharest the capital of Wallachia, by Anthimus, archbishop of Wallachia,

and amply supplied by him with Arabic, Greek, and Illyrian types. Schnurrer, in his *Bibliotheca Arabica*, notices a *Greek and Arabic Missal*, executed here in the year 1701. The volume was printed at the expense of John Constantine Bessaraba, the waywode of Wallachia, and by him gratuitously distributed to the Arabian priests. Schnurrer states it be tolerably well printed; notices its being a book of extreme rarity in Europe, but he himself had chanced to pick up a copy for a small sum, at a public auction in Leipsic.

1701, Jan. 1. *A New Observer on the present Times*. No. 1.

1701, Jan. *The Monthly Miscellany, or Memoirs for the Curious*.

1701. *The Post Angel*. Printed by G. Croom.\*

1701, June 5. *The Proceedings of the King's Commission of the Peace, and Oyer and Terminer and Gaol Delivery of Newgate*.

1701, July 8. *The New State of Europe*, both as to publick Transactions and Learning; with impartial Observations thereon. No. 8.

1702, Jan. 1. *Died*, SAMUEL GREEN, the founder of an extensive family of printers in North America. He succeeded Stephen Daye,† as printer to the college of Cambridge, about the year 1648, or beginning of 1649, and during fifty years, under government, was the manager and conductor of the press at Cambridge, and prosecuted the art extensively and with success. Under the auspices of the college and of the London corporation for propagating Christianity among the Indians, he undertook and completed more than one edition of the scriptures, the psalter, a catechism, and other books in the Indian language, in the year 1653, &c. an ample and interesting account of which is given by Thomas, together with a list of ninety-five pieces, dated 1649—1692, proceeding from his press. Thomas adds, "Soon after his decease, the printing materials were removed from Cambridge, and probably sold. It does not appear that the corporation of the college owned any types after this time, till about the year 1718, when Mr. Thomas Hollis, of London, a great benefactor

\* Some would insinuate as though he favoured the Jacobites, but I take him for a man of more sense; however, that is no more essential to his character under the notion of a printer, than the recommendation of an under groom to prince Rupert, which ran in such terms as these, that he was a good churchman, had a great value for the common prayer, when, alas! prince Rupert did not want his horses about to be dressed according to the liturgy of the church of England. Mr. Croom is a fair dealer, understands his business, and these are the life of matter. He has always been obliging to me, and formerly printed for me *The Figurine Liturgy*, and of late several sheets of the *Post Angel*.—Dunton.

† See page 493, and for Stephen Green read Samuel Green.

‡ Daye continued to reside at Cambridge, where he died December 22, 1668. Thomas observes, that he had not been able to find but few books printed by Daye, and in no one of these was his name to be found. He gives a list of thirteen pieces executed by the printer between the years 1639 and 1649, among which are the laws of the colony, and two editions of the *psalms in metre, translated for the use of the saints*, especially in New England, dated 1640. The book is so scarce in America, that Mr. Thomas could only find one copy, and that wanted the title-page. A perfect copy is in the Bodleian library at Oxford.

\* He evens yearly with those he is concerned with, which may be a serviceable hint to the booksellers in London. The pious and learned Dr. Collins was his great friend; he has met with very good success in his way; but the booksellers in the country cannot in a settled way either ruin or enrich themselves so soon as those in London, in regard they have not the temptation, nor indeed the opportunity to print much; but this is no more applicable to Mr. Giles than to any other, so far out of town. He is an honest man. I know him to be so.—Dunton.

to the college, among other gifts presented to the university a fount, or cast, of Hebrew, and another of Greek types, both of which were of the size of long primer. The Greek was not used until 1761, when the government of the college had a work printed, entitled *Pietas et gratulatio collegii Cantabrigiæ apud Novanglos*, dedicated to king George III., on his accession to the throne; two of these poetical essays being written in Greek, called these types into use. They were never used but at that time, and were, in January, 1764, destroyed by the fire that consumed Harvard hall, one of the college buildings in which the types and college library were deposited: the cast of Hebrew escaped, having been sent to Boston some time before, to print professor Sewall's *Hebrew Grammar*. Green left a large family behind him, and his descendants continued to exercise the business of printers at Boston, until the commencement of the revolution in 1775.

1702, March 8. Died, WILLIAM III, king of England, in the fifty-second year of his age. With respect to his character, William neither merited the encomiums of his friends, who have asserted that he possessed every virtue; nor the severe censure of his enemies, who have dressed him in every vice. He was more indebted to steady perseverance, than to peculiar talents, for his high military reputation. He possessed natural courage, energy of mind, and firmness in the execution of his plans. In person he was ungraceful, his manner cold and repulsive, and his temper silent and unsocial. He recommended the practice of virtue by his example, but it had little effect on men who were corrupted by the licentiousness of the former reigns. In excuse for the intrigues which he entered into to dethrone his uncle and father-in-law,\* a late historian says, "As William's heart seems to have been as dead to the sympathetic feelings, as his soul was insensible to the charms of literature and the beauties of the elegant arts, it is possible that, while he was guiding the great political system, he might be led by the illusions of ambition, under the appearance of principle, to think the ties of blood and the right of inheritance as necessary sacrifices to the welfare of Europe, and the interests of the reformed religion. England, at least, was obliged to him for supporting her cause in a grand struggle for liberty and a protestant succession. But she was dearly paid for those blessings, by being involved in destructive foreign wars, partly, indeed, rendered necessary by the supineness of her two preceding reigns, but in which she ought naturally to have had no concern; by the introduction of the infamous practice of corrupting parliaments, in order to engage them to support those wars; and by their unavoidable consequence, a grievous national debt, which daily accumulating and augmenting the weight of government, threatens us with the worst of evils."

\* James II. died at St. Germain, in France, September 16, 1701, aged 66 years.

William's death was occasioned by the stumbling of his horse, near Hampton-court, by which his collar bone was dislocated, and a trifling injury to a feeble body brought death upon him in a few days. On his left arm was found a ribbon, which had tied to it a gold ring, with some hair of the late queen Mary. His last words were, *Je tire vers ma fin*. I draw near my end. William expired in his palace at Kensington, on the 8th of March, and in the fifty-second year of his age. After the body had lain some days in state, it was interred in Henry VII.'s chapel, Westminster abbey.

1702. EDMUND BOHUN, a voluminous, political, and miscellaneous writer, and licenser of the press.\* Dunton says that "he was our last licenser before the act of printing expired, and he licensed for me that remarkable book called *The second Spira*, and was wont often to visit me; he used great freedom of speech as one that would neither seek nor dread the power of any. He once took the *Shortest way with the Dissenters* and was noticed as a furious man against them. He has a wit so pregnant and prompt to every thing, that you would think it was formed for the very thing, whatsoever it was he was about. He is sufficiently qualified to be a licenser, for he is a man well skilled in most kinds of literature. Besides (under the rose) he is a pretty author himself; has written a *Geographical Dictionary*, revised and enlarged *Heylin's Cosmography*, and, were it not for his former

\* John Dunton also characterised the three following licensers:—

MR. EDWARD COOK received his authority from the principal secretary of state, and was a fit licenser to succeed Mr. Fraser, for he was no bigot to any party; but was true and just to churchmen, presbyterians, and dissenters of all sorts. He was a good lawyer, and furnished with a large stock of wit and moderation: he had no narrow thoughts, nor no superstitious opinions in religion, and therefore as he did not shut himself up within a party, so neither did he shut any party out from him, but was a licenser generally loved and respected by all men: many of our city aldermen treated him with a respect so peculiar and generous, and he was so well known in London, that it was impossible that common artifice should defame and slur him. His character was unblemished, his virtue too bright to be soiled by the highfliers, and his carriage was very sweet and obliging, so that the natural kindness and serenity of his mind gave him the hearts of all the booksellers. In a word, Mr. Cook was a very active ingenious man, and had such an interest at court, that he procured for me the royal privilege mentioned in page 153; and had the act for printing continued in force, Mr. Cook had been licenser to this day.

MR. HANCOCK, our fifth licenser, had a comely mien, and an air of pleasantness in his countenance. He was furnished with a large stock of learning, and a great master of his temper. While he was very young he hit naturally on the true method of study, and contracted friendship with great men, particularly with the earl of ———, who observing his great piety and zeal for the church, made him a licenser. His acquaintance at court, and love to his studies, contributed to the perfection of his mind, and were prophetic symptoms of his future eminence, yet no preference or science could divert him from the study of himself, as the regularity of his conversation abundantly shows. A becoming modesty and conduct appeared in the first stage of his life, and continued like a guardian angel to attend him to this day, so that his life shines in every part, both private and public; and though he continued licenser but four months, yet he left his place with a great deal of honour, and never justly displeased any man.

MR. NICHOLSON was a man of easy access, and ready to license; and that is all I shall say of him, for I never desired his imprimature.

carriage towards dissenters, I would call him the Phoenix of learned licensers." Mr. Bobun was a native of Suffolk; the time of his death is not ascertained, but is supposed to have taken place about this year.

1702, April 1. *Observer*. Printed by J. How.\*

1702. *The Weekly Remembrancer*.

1702, April 23. *The Form of the Proceeding to the Coronation of her most excellent Majesty Queen Anne*.

1702, Sept. 9. *The Secret Mercury*; or, the Adventure of Seven Days.

1702. *Poetical Observer*.

1703. SAMUEL DE Tournes, a celebrated printer at Geneva, flourished at this time. Individuals of this family were settled at the same place in the end of the last, and former part of this century. To some of their descendants, who were living at Lyons and Geneva, Wolfius dedicated his *Monumenta Typographica*, as the most ancient family of printers, who were equally distinguished by their typographical skill and by their personal virtues.

1703. In the convocation of the clergy of the lower house, a complaint was exhibited against the printers of the Bible, for the careless and defective manner in which it was printed by the patentees. The edition complained of was one printed by Hayes, at Cambridge, in 1677 and 1678; and an edition in folio printed at London, in 1701. The printers continued, however, to print the bible carelessly, with a defective type, on bad paper; and when printed, to sell them at an exorbitant price.

1703. A pamphlet was published this year with the following strange title: *The Deformity of Sin Cured*, a sermon, preached at Michael's, Crooked-lane, before the prince of Orange; by the rev. James Crookshanks, sold by Matthew Downton, at the Crooked Billet, near Cripplegate, and by all other booksellers. The words of the text are, "Every crooked path shall be made straight." The prince before whom it was preached, was deformed in his person.

1703. *Died*, EDWARD MILLINGTON, an eminent bookseller and auctioneer, who was concerned in most of the sales for above forty years, and of whom Duntou says, he commenced and continued auctions upon the authority of Herodotus, who commends that way of sale for the disposal of the most exquisite and finest beauties to their amorous, and further informs the world, that the sum so raised was laid out for the portions of those to whom nature had been less kind;

\* He was a bookseller for many years, and now follows the trade of printing. He printed the *Case* relating to my second wife, which will be inserted in the sixth stage of my life, revised and corrected. Mr. How is generous and frank, and speaks whatever he thinks; which, in spite of the highfivers, has given him an honest character. He is a true lover of his queen and country, and I believe would be as willing to sacrifice his life and fortune for the good of either as the honest countryman, or master Tutchin himself. He was a great sufferer in king James's reign, and has had the fate of being a traveller; but being an honest man at the bottom, he is blessed wherever he goes. He is now settled in Gracechurch-street; and, being a great projector (as we see by the *London Spy* and the *Observer*, &c.) is like to increase apace.—Duntou.

so that he'll never be forgotten while his name is Ned, or he a man of remarkable eloquence, wit, sense, and modesty; characters so eminently his, that he would be known by them among a thousand. Millington (from the time he sold Dr. Annesley's library) expressed a particular friendship for me. He was originally a bookseller, which he left off, being better cut out for an auctioneer: he had a quick wit, and a wonderful fluency of speech. There was usually as much comedy in his *once, twice, thrice*, as can be met with in a modern play: "Where," said Millington, "is your generous flame for learning? Who but a sot or blockhead would have money in his pocket and starve his brains?" Though I suppose he had but a round of jests. Dr. C— once bidding too leisurely for a book, says Millington, "Is this your *Primitive Christianity*?" alluding to a book the honest doctor had published under that title. He died in Cambridge; and I hear they bestowed an elegy on his memory, and design to raise a monument to his ashes. An elegy upon the lamented death of Edward Millington, the famous auctioneer.

1703, Nov. 27. Great storm in England.\* Mr. JOHN TAYLOR, bookseller, in Paternoster-row,† having experienced a merciful preservation during the great storm; and being at that period a member of the (Baptist) church meeting, Little Wild-street, Lincoln's-inn-fields, instituted an annual sermon, to perpetuate the recollection of that affecting occurrence.

1703, Aug. 3. *Heracitus Ridens*; a Dialogue between Jest and Earnest concerning the Times.

1703. *The Daily Courant*. No. 1.

1704. About this period the celebrated family of printers, BAAROU, settled in Paris; their press had been distinguished for correctness and neatness in the middle of the sixteenth century. At Paris, Joseph Gerard Barbou continued the collection of Latin classics in 12mo. which Constelier had begun. Constelier had published Catullus, Tibullus, Propertius, Lucretius, Salust, Virgil, Nepos, Lucan, Phædrus, Horace, Velleius, Eutropius, Juvenal and Persius, Martial and Terence. Barbou, from whom the whole collection generally takes its name, published Cæsar, Curtius, Tacitus, Plautus, Seneca, Ovid, Cicero, Justin, both the Plinies and Livy, and also some of the later Latin authors in the same form. The present owner of the whole publication, Auguste Delalain, has added to the collection four volumes, and sells the whole set of seventy-seven volumes, done in boards, at 350 francs; bound at 500 francs.

1704. FREDERICK ROTHSCHOLTZ, a bookseller of Nuremberg, flourished at this period, and acquired a distinguished name in the world of literature. The list of his productions is very

\* The damage in the city of London only, was computed at near £200,000 sterling. At Bristol it was about £200,000. In the whole it was supposed that the loss was greater than that produced by the great fire in London, 1666, which was estimated at £4,000,000.

† Deals very much, and is very honest. He is industrious and obliging, and his principles are moderate.—Duntou.

extended, and many of them display great learning. Among them is a work in two volumes 4to. entitled *A short Essay towards an Ancient and Modern History of Booksellers*.

1704. The first newspaper published in North America, appeared this year, entitled *The Boston News-Letter*, published by authority. The printer was Bartholomew Green, son of Samuel, whom we have mentioned as printer to Harvard college; a person of consideration, and several years a deacon of the Old South Church. Among other subjects of commendation urged in his obituary, is his "caution of publishing anything offensive, light, or hurtful." The proprietor, however, for the first eighteen years, was John Campbell, a Scotchman by birth, the postmaster of the town, whose office, without supposing it to have exercised, in him, the sharp intuition of his countrywoman, the postmistress of St. Ronan's Well, naturally gave him the freest access to intelligence useful to his work. At the end of eighteen years it fell into the hands of Green, and by him and his successors was continued till the evacuation of Boston by the British troops in 1776, being in later years the organ of the tory party, and the only paper continued in Boston through the siege.

1704, Sept. 4. Died, SIR ROGER L'ESTRANGE,\* who was the first individual in England who acquired notoriety as an occasional political writer, and also the first writer who regularly enlisted himself under the banner of a party for pay. He was of an ancient family in Norfolk, and distinguished himself as a soldier at the outbreak of the rebellion. Being captured by the parliamentary army, he was tried and condemned to die, and lay in prison almost four years, every morning expecting to be led forth to execution. He was at last liberated, and lived in almost total obscurity till the restoration, when he was rewarded with the invidious post of licenser of the press. He commenced the *Observer* in 1681, and continued it through three volumes in folio. In this work L'Estrange went as great lengths to vindicate the measures

of the court, as ever were gone by any mercenary journalist. On the accession of James II. he was knighted, April 30, 1685; and elected in that year one of the representatives in parliament for Winchester. December 16, 1688, he was committed to Newgate, for publishing treasonable papers against the government. He was again committed to Newgate, March 2, 1695, and from thence in a few days removed to the Marshalsea, where he continued till May, 1696. He died in his 88th year; as appears by *An Elegy on the much lamented death of sir Roger L'Estrange*. After the revolution he was left out of the commission of the peace; and it is said queen Mary shewed her contempt of him by the following anagram she made upon his name.

Roger L'Estrange,  
Lye strange Roger!

Sir Roger L'Estrange also translated *Esop's Fables*,\* the works of *Josephus*, and many things from the Greek, Latin, and Spanish. In his political writings he was so anxious to accommodate his style to the taste of the common people, that few of them could now be read with any degree of pleasure.

1704, Oct. 28. Died, JOHN LOCKE, author of *An Essay on Human Understanding*, and other eminent works. A more happy combination of the Christian, the scholar, and the gentleman, has perhaps never been exhibited, than in the person of this distinguished philosopher. It is scarcely presumptuous to say, that he brought to light perhaps all that is discoverable respecting the operations of the Human Understanding; and, while his talents were devoted to a work which became one of the highest ornaments of the literature of his country, his pure and virtuous life displayed the most satisfactory proof of the practical efficacy of a piety, the sincerity of which was clearly proved by his efforts, not less humble than vigorous, to shew that all the parts of the Christian system were reconcilable to human reason. He was born at Wrington, in Somersetshire, August 29, 1632, and educated at Oxford, where, after taking his degree in arts, he entered on the study of physic, and made great proficiency. When lord Shaftesbury was appointed lord chancellor, he made Mr. Locke secretary of presentations, which place he lost when his patron was deprived of the great seal. After the revolution he was made a commissioner of appeals, and in 1695 a commissioner of trade and plantations. He died at Oates, in Essex.

1704, Dec. 11. Died, JOHN DARBY, senior, an eminent printer in Bartholomew-close, London. In February, 1684, he was convicted of printing a libel, called *Lord Russell's Speech*, and fined

\* It is a pity Towzer's old Worrier, *Harry Core*, were not now alive—for no limner can hit his features so well as he; however, sir Roger is a remarkable person, and I will draw him as well as I can. Then to come to his character,—Sir Roger descended from an antient and worthy family, yet I cannot make his picture like him without telling the world his *sting* is gone, and since his weekly satire is fallen asleep, is no longer a guide to the inferior clergy. "Hark ye, sir Author," comes a little piece of crape buzzing in my ears, "consider what you say and do. There is respect due to the unfortunate, especially to those who have been great, and are still men of sense and ingenuity; and besides you know what he has done of undoubted value. He only has had the rare happiness of bettering some of the best authors in a translation,—and his *Sences and Offices* will live as long as the world." All this I knew before—but what is this to honesty? There is the jewel. Wit is no more commendable in a knight than courage in a highwayman. A man that betrays his religion and country in pretending to defend it, and writes round to all the points of the compass—that was made surveyor of the press—and would wink at unlicensed books if the printer's wife would but smile on him. How far this is the character of sir Roger I leave to his own conscience to consider, and the rather as he now stands on the brink of eternity (for he is now above four score) and has but a few minutes to repent in.—*Dunton*.

\* Printed by Mr. Gilliflower, of whom John Dunton says, "Both his eyes were never at once from home; for one kept house, and observed the actions of man, while the other roamed abroad for intelligence. He loved his bottle and his friend with an equal affection. He was very testy upon some occasions; yet thriving was part of his character. He printed L'Estrange's *Esop*, lord Halifax's *Advice to his Daughter*, and many excellent copies." His shop was in Westminster hall.

only twenty marks. On this subject, bishop Burnet, in a letter to lady Russell, says, "Now the business of the printer is at an end; and considering how it was managed, it was dwindled to a very small fine, which one may well say was either too much or too little. The true design of the prosecution was to find me out, and so the printer was tampered with much to name the author." Mr. Darby was in the 80th year of his age at the time of his decease.

1704, Jan. 7. *A New Observer*.

1704, Jan. 12. *The Loyal Observer*. No. 1.

1704, Feb. 19. *The Review of the Affairs of France*, by Daniel De Foe, ended in May, 1713. It was during his imprisonment on a conviction for publishing a satirical pamphlet, entitled the *Shortest Way with the Dissenters*,\* that De Foe commenced the above paper; and afterwards, namely, from 1st of Jan. 1706, a *Review of the State of the English Nation*. It was originally published only once a week, but at last appeared every Tuesday, Thursday, and Saturday, printed on a half sheet, or four quarto pages. To the political news and disquisitions, was regularly appended a short chronicle of domestic incidents; and the whole was written by De Foe himself. The work was continued till the completion of the ninth volume, in May, 1713; when a tax which had recently been imposed induced the author to bring it to a termination. He was then in Newgate for the second time. De Foe's *Review*, which, at its commencement at least, had very good success, has been usually regarded as the parent, and in some respects the model of the *Spectator*.

1704, Aug. 5. *The Rehearsal*, by C. Lesley. No. 1.

1704, Sept. 10. *The Observer Reformed*.

\* *St. James's*, Jan. 10.—Whereas Daniel Defoe, alias De Fooe, is charged with writing a scandalous and seditious pamphlet, entitled, *The Shortest Way with the Dissenters*; he is a middle sized spare man, about forty-six years old, of a brown complexion, and dark brown coloured hair, but wears a wig, a hooked nose, a sharp chin, grey eyes, and a large mole near his mouth; was born in London, and for many years was a hose factor in Freeman's yard, in Cornhill, and now is owner of the brick and pantile works near Tilbury fort, in Essex; whoever shall discover the said Daniel De Foe to one of her majesty's principal secretaries of state, or any of her majesty's justices of peace, so as he may be apprehended, shall have a reward of £30, which her majesty has ordered immediately to be paid upon such discovery. He was sentenced to pay a fine of two hundred marks to the queen, stand three times in the pillory, and be imprisoned during the queen's pleasure. This sentence was carried rigorously into effect. After his punishment he wrote an ode to the pillory, of which the following is a portion:

Hail H!rogiyphic state machine,  
Condemned to punish fancy in;  
Men that are men, can in thee feel no pain,  
And all thy insignificance disdain.  
Contempt, that false new word for shame,  
Is without crime an empty name—  
A shadow to amuse mankind;  
But never frights the wise or well fix'd mind;  
Virtue despises human scorn,  
And scandal's innocence adorns.  
Exalted on thy stool of state,  
What prospects do I see of future fate?  
How the inscrutables of providence  
Differ from our contracted sense;  
Hereby the errors of the town,  
That fools look out, and knaves look on.

Advertisements of eight lines inserted for a shilling. No. 1. The editors of newspapers often became the medium of communication between their advertising friends; and the advertisements which are given below, are not only curious, but throw some light upon the manners and customs of the latter part of the last, and early part of this century.\*

1704, Nov. 7. *The Comical Observer*. No. 1.

1705. THOMAS BALLARD,† the first of an eminent family of booksellers, in Little Britain, who continued during nearly the whole of this century famous for their divinity catalogues. Mr. Thomas Ballard was thus characterised by Dutton in 1705:—"He is a young bookseller in Little Britain; but is grown man in body now, but more in mind:

His looks are in his mother's beauty drest,  
And all the father has informed his breast.

1705. HENRY HERRINGMAN gave £20 to the company of stationers, to be applied to the purchase of a large silver flagon, weight 65 oz.

\* "If any Hamburg or other merchant, who shall deserve £200 with an apprentice, wants one, I can help."

"One has a pert boy, about 10 years old, can write, read, and be very well recommended; she is willing he should serve some lady or gentleman."

"I want a cook-maid for a merchant."

"I sell chocolate made of the best nuts, without spice or perfume, and with vineloes and spice, from four to ten shillings the pound, and I know them to be a great helper of bad stomachs, and restorative to weak people, and I'll insure for their goodness."

"If any will sell a free estate, within thirty miles of London, with or without a house, to the value of £100 the year, or thereabout, I can help to a customer."

"If any have a place belonging to the law, or otherwise, that is worth £1000 or £2000, I can help to a customer."

"If any divine or their relics, have complete sets of manuscript sermons upon the Epistles and Gospels, the Catechisms or Festivals, I can help to a customer."

"A fair house in Eastcheap, next to the Flower-de-lis, now in the tenure of a smith, with a fair yard, laid with free stone, and a vault underneath, with a cellar under the shop, done with the same stone, is to be sold: I have the disposal of it."

"I believe I could furnish all the nobility and gentry in England with valuable servants, and such as can have very good recommendation."

"Mr. David Rose, chirurgion and man-midwife, lives at the first brick house on the right hand in Gun-yard, Houndsditch, near Aldgate, London. I have known him these twenty years."

"I want an apprentice for an eminent tallow-chandler."

"If any want all kind of necessities for corps, or funerals, I can help to one who does assure me he will use them kindly; and whoever can keep their corps till they get to London, and have a coffin set down, may have them afterwards kept any reasonable time."

"About forty miles from London is a schoolmaster, has had such success with boys, as there are almost forty ministers and schoolmasters that were his scholars. His wife also teaches girls lace-making, plain work, raising paste, sauces, and cookery, to the degree of exactness. His price is £10 to £11 the year, with a pair of sheets, and one spoon; to be returned, if desired; coaches and other conveniences pass every day within half a mile of the house; and 'tis but an easy day's journey to or from London."

"I know of several men and women whose friends would gladly have them match'd; which I'll endeavour to do, as from time to time I shall hear of such whose circumstances are likely to agree; and I'll assure such as will come to me, it shall be done with all the honour and secrecy imaginable. Their own parents shall not manage it more to their satisfaction; and the more comes to me, the better I shall be able to serve 'em."

† The original name appears by the auction catalogues to be Bullard.

1705, Feb. 27. Died, JOHN EVELYN, a celebrated and extraordinary individual, who most materially influenced the political events during the latter half of the seventeenth century, of which he was also the chronicler. He was born at Wotton, in Surry, October 31, 1620, and educated at Balliol college, Oxford. By his marriage with the daughter of Sir Richard Brown, in 1647, he became possessed of Sayes Court, a manor in Kent, where he led a retired life till the Restoration, to which he in some measure contributed. At the establishment of the Royal Society, he became one of the first members. In 1662 appeared his *Sculptura*, or the *History and Art of Chalcography and Engraving on Copper*. He was appointed a commissioner for the sick and wounded seamen, one of the commissioners for rebuilding St. Paul's, and afterwards had a place at the board of trade. In the reign of James II. he was made one of the commissioners for executing the office of lord privy seal, and after the Revolution was appointed treasurer of Greenwich hospital. In 1697 appeared his *Numismata*, or *Discourse of Medals*, folio. Mr. Evelyn has the honour of being one of the first who improved horticulture, and introduced exotics into this country. Of his garden at Sayes Court, a curious account may be seen in the *Philosophical Transactions*. It was by the publication of the *Sylvia* that Evelyn was chiefly known till the publication of his *Diary*, or *Kalendarium*, which begun in 1641; his other writings had past away, but the *Sylvia* remained a beautiful and enduring memorial of his amusements, his occupations, and his studies, his private happiness and his public virtues. It was the first book printed by order of the Royal Society, and was composed upon occasion of certain queries sent to that society by the commissioners of the navy. The *Sylvia* has no beauties of style to recommend it, and none of those felicities of expression by which the writer stamps upon your memory his meaning in all its force. Without such charms *A Discourse of Forest Trees and the Propagation of Timber in his Majesty's Dominions* might appear to promise dry entertainment; but he who opens the volume is led on insensibly from page to page, and catches something of the delight which made the author enter with his whole heart and all his faculties into the subject. It is a great repository of all that was then known concerning the forest-trees of Great Britain, their growth and culture, and their uses and qualities real or imaginary; and he has enlivened it with all the pertinent facts and anecdotes which occurred to him in his reading. He wrote several books besides the above. The following extract from the epitaph inscribed on his tomb in Wotton church yard, unlike the generality of compositions of its class, speaks only the simple truth:

"Living in an age of extraordinary events and revolutions, he learnt (as himself asserted) this truth, which, pursuant to his intention, is here declared, that all is vanity which is not honest; and that there is no solid wisdom but in real piety."

His son, John Evelyn, wrote a Greek poem, prefixed to his father's *Sylvia*; and translated Rapi'n's poem on *Gardens* into English; and the *Life of Alexander*, from Plutarch. He was also the author of a few poems in Dryden's *Collection*, and died in 1698, aged 44.

1705, Feb. 19. *The Edinburgh Courant*, No. 1. This was begun by James Watson, who printed fifty-five numbers, and then transferred it to Andrew Anderson, "printer to the queen, the city, and the college." It was published twice a week, at the price of three-halfpence.

1705, June 9. *The Wandering Spy*; or, the *Way of the World* enquired into. No. 1.

1705, June 12. *The Whipping Post*; or, a new Session of Oyer and Terminer for the Scribblers. No. 1.

1705. *The Ladies' Diary*.

1705, Sept. *The Scots Courant*, No. 1. Not contented with having established two newspapers in Edinburgh, Watson immediately after his disposal of the *Edinburgh Courant*, established the above paper, which he continued to print for upwards of twelve years afterwards. The *Scots Courant*, like its predecessors, was a folio half-sheet in two columns, but got up with extreme neatness, with diversified type, and its price was a penny. It was the first Scotch paper published thrice a week—on Mondays, Wednesdays, and Fridays—and reference for subscriptions and advertisements was made to "JAMES MUIRHEAD, the author of this paper, at the Royal Exchange coffee-house"; where the paper was sold.

1705, Nov. 23. *The Loyal Post*; with Foreign and Inland Intelligence. No. 1.

1706. The Dutch East India company had a press at Batavia, a city and seaport, the capital of the isle of Java, and of all the Dutch settlements in the East Indies, from which issued some Malay vocabularies in 4to., printed by A. L. Loderus, printer to the Dutch East India company, and to the city of Batavia: copies of these vocabularies are in the Bodleian library. Yet these could not have been the first-fruits of the Batavian press, since La Croze, in his *Histoire du Christianisme des Indes*, relates, that in the year 1706 the Danish missionaries instructed the natives at Tranquebar out of a Portuguese new testament, printed at Batavia: and a Portuguese version of the psalms, executed here in 1703, was in the library of M. Meerman. According to the catalogue of the British and Foreign Bible Society, the old testament was printed here in the Malayan language, in the year 1744, probably at the instance of the Dutch East India company, who appear to have given orders for the execution of such a work so early as 1729. An indirect insinuation that typography was practised at Batavia during the seventeenth century, appears to be furnished by a Dutch tract, preserved in the Fagel collection at Dublin; this piece contains an account of some shocking adventures encountered at or near the island of Aboyna; it is dated 1675, and professes to have been printed from a copy executed at Batavia.—*Cotton*.

1706, Feb. 16, Died, EDWARD JONES, printer of the *London Gazette*, whom Dunton, a short time before Mr. Jones's death, thus characterised: "His soul is enriched with many virtues; but the most orient of all are, his large charity, his remarkable justice in trade, and great kindness to his aged mother. He has got a good estate by authority; and is deservedly famous for printing the *True News*, and publishing the *London Gazette*."

On a small flat stone adjoining the west end of Hampstead church, the following inscription still remains:

M. S.  
EDWARDUS JONES,  
inter Typographos primos quondam primarius,  
in parentes pientissimus,  
in amicos nunquam non benevolus,  
conjugi optimæ filioque charissimo indulgentissimus,  
ad pedes jacet.  
Hoc qualesque monumentum æviternæ  
pietatis testimonium erga ipsam matremque  
ejus iusta jacentem.

Ob. 15 Feb. 1706, æt. XLIX.\* POSUERE { M. J. C.  
{ E. J. F.

At the foot of the above, another stone is thus inscribed:

Here lies the body of Mrs. JOHANNA GRIFPIN,  
who died the 18th of February, 1696,  
aged 76.

In memory of whom this stone is erected by her son,  
EDWARD JONES, printer in the Savoy.

Immediately on his decease, was published the *Mercury Hawkers in Mourning*; an elegy on the much-lamented death of Edward Jones, the famous *Gazette* printer, of the Savoy;† who departed this life at his house, at Kensington, on Saturday the 16th day of February, 1706, in the 54th year of his age; to which was subjoined the following epitaph:

Here lies a printer, famous in his time,  
Whose life by lingering sickness did incline;  
He liv'd in credit, and in peace he died,  
And often had the chance of fortune tried;  
Whose smiles by various methods did promote  
Him to the favour of the senate's vote:  
And so became, by national consent,  
The only printer for the parliament:  
Thus by degrees, so prosperous was his fate,  
He left his heirs a very good estate.

1706. It is the opinion of Schnurrer, expressed in his *Bibliotheca Arabica*, that the Arabic printing-office of the monastery of Snagof, (see page 586, ante,) was removed to the city of ALEPPO in this year, and opened by the publication of an *Arabic Psalter*, under the direction of Athanasius the Antiochene patriarch of the Greek Melchites. Other books followed in 1707, 1708, some *Homilies of Athanasius* in 1711, and a second edition of the *Psalms* in 1735.

\* A difference occurs between the epitaph and the elegy; but the former is no doubt correct.

† The Savoy, in London, was formerly a magnificent palace, erected in the reign of Henry III.: it was subsequently converted by Henry VII. into a hospital, which was suppressed by queen Elizabeth, and its remains converted into private lodgings, barracks, &c., &c. Some printing-presses were worked within its precincts during the time of the commonwealth; and so late as 1743 H. Lintot printed law books here.—Dr. Cotton.

1706. A printing press was erected at Skara, an ancient town of the south of Sweden, by bishop Jasper Suedbergius; and Andreas Kiellbergius, from Upsal, was the first printer. This press having been consumed in the terrible fire which laid the city in ruins, on the 23rd of August, 1719, its owner detained a royal brief for collecting money towards its restoration.

1706, April 20. JACOB TONSON applies to Pope for the honour of printing his *Pastorals*, from Gray's Inn gate.

1706, Aug. 26. Died, THOMAS BENNET, who was a first-rate bookseller in St. Paul's churchyard, particularly noticed by the established clergy of that period, and by the leading men at Oxford, as appears by the controversy of Mr. Boyle with Dr. Bentley. He was, in consequence, patronized by Dr. Atterbury,\* who frequently mentions him in his *Epistolary Correspondence*. John Dunton says, "Mr. Thomas Bennet, a man very neat in his dress, very much devoted to the church, has a considerable trade in Oxford, and prints for Doctor South, and the most eminent Conformists. I was partner with him in Lecroze's *Works of the Learned*; and I must say he acted like a man of conscience and honesty." The following epitaph is in St. Faith's church:

"Here lyeth the body of Mr. Thomas Bennet, citizen and stationer of London, who married Mrs. Elizabeth Whitewrong, eldest daughter of James Whitewrong, of Rothamstead, in the county of Hertford, esq., by whom he had one son and two daughters; and departed this life August the 26th, in the year of our Lord 1706, and in the forty-second year of his age."

1706, Jan. 26. *The Poetical Courant*. No. 1.

1706, Feb. 18. *The London Gazette*. This was the last number printed by Edward Jones; the next was printed by his widow, M. Jones. No. 4202.

1706, Sept. 27. *The Rehearsal Rehearsed*; in a Dialogue between Bayes and Johnson. No. 1.

1706. *The Norwich Postman*, containing remarkable occurrences, foreign and domestic; printed by S. Sheffield, for T. Goddard, bookseller, Norwich. This was a small 4to foolscap, for which the regular charge was a penny—but "a halfpenny not refused."

1706. *The Country Gentleman's Courant*; or Universal Intelligence; being an exact Register of the most material News, both Foreign and Domestic, occurring from Saturday Oct. 5 to Saturday Oct. 12, 1706. To which is added, an Expositor, or Geographical Description of the most important Places mentioned in each Article of News. Printed for J. Morphew. This paper the proprietors are pleased to give away on this day only, that the design may be the better known, and the sale encouraged as it deserves. And as promotion of trade is a matter which ought to be encouraged, advertisements will be taken in by the publisher hereof, at 2d. per line. No. 1.

\* Bishop Atterbury preached his funeral sermon, and has given him a high character. See Nichols's *Literary Anecdotes*, vol. 3, p. 799.

1707, April 25. WILLIAM PETTIS was convicted of writing, printing, and publishing a work entitled the *Case of the Church of England's memorial fairly stated*, &c.; and it being deemed a libel, he was sentenced to pay 100 marks, and to stand in the pillory on the 26th and 29th of the same month; one hour at Charing Cross and one hour at the Royal Exchange, with a paper on his head denoting his offence, and to give security for his good behaviour for two years. George Sawbridge, the printer, was convicted of publishing the said libel, and sentenced to pay £200 to the queen, and to appear in all the courts of Westminster, the said courts sitting, with a paper upon his head denoting his offence, and to find security for his good behaviour for the space of two years.

1707. M<sup>rs</sup>. BURTON gave to the company of stationers a large silver flagon, 64 oz. 15 dwts.

1707. *The Muses Mercury*; or, *Monthly Miscellany* for 1707, 4to. edited by William Oldisworth.\* In the number for June, will be found a republication of Prior's *Nut Brown Maid*.

1707, Aug. 13. *Weekly Comedy*, or the *Humours of the Coffee-house*. By the Author of the *London Spy*. Printed for J. Morphew, No. 1.

1707, Sept. 27. *Observer revived*; printed for J. Morphew, No. 1.

1708, March 17. ROWE'S SHAKESPEARE.—“Whereas a very neat and correct edition of Mr. William Shakspeare's Works, in six volumes in octavo, adorned with cuts, is now so near finished as to be published in a month; to which is designed to be prefixed an account of the life and writings of the said author, as far as can be collected. If, therefore, any gentlemen who have materials by them that may be serviceable to this design, will be pleased to transmit them to Jacob Tonson, at Gray's Inn Gate, they will be a particular advantage to the work, and acknowledged as a favour by the gentleman who hath the care of this edition.”—*Original Advertisement*. The work appeared in seven octavo volumes, early in the following year; in the eighth number of the *Tatler*, (April 28, 1709) Steele highly recommends the work to the public.

1708. *Worcester Postman*, printed by Samuel Bryan.† This is the earliest known newspaper in that city, though it is strongly conjectured that, during the movements of the royal army in the civil wars, a newspaper was printed there.

1708. *Memoirs of Literature*.

1708. *Bibliotheca Curiosa*.

1708, Jan. 19. *The Supplement*, No. 1.

1708, Feb. 13. *British Apollo*; or curious Amusements for the Ingenious. To which are added the most material Occurrences Foreign and Domestick. Performed by a Society of Gentlemen. No. 1. It was published twice a

week, and completed its career in March 1711, having attained the bulk of three volumes folio. In a letter (*the present state of wit*) ascribed to Gay, he mentions that it still recommends itself by deciding wagers at cards.

1708, Oct. *Edinburgh Flying Post*. No. 1. Printed by John Reids, elder and younger, three times a week, in a folio half sheet.

1709. An act was passed “for the encouragement of learning,” in which the printing and reprinting of any work was vested in the author for the space of fourteen years; and, if living at the close of that period, for another period of the same duration. By this act piracy was made punishable during these times, by the forfeiture of the books illegally published, and of a penny for every sheet in the offender's custody—one half to the queen's majesty, the other halfpenny to the informer; and the condition of these remedies was the entering the work at stationers' hall. This act “for the encouragement of learning,” also conferred a power on the archbishop of Canterbury and other great functionaries to regulate the price of books; but this was repealed in the reign of George I. This act also confers on learning the benefit of a *forced* contribution of nine copies of every work, on the best paper, for the use of certain libraries. Before this act, it was usual to purchase from authors the perpetual copyright of their books, and to assign the same from hand to hand, for valuable considerations, and to make them the subject of family settlement. The claim of the author to perpetual copyright was never disputed until literature received this *fatal* boon from the hands of the legislature. Milton, in his immortal pleading for the liberty of unlicenced printing, states as one of the glosses of his opponents, the “just retaining of each man his several copy, which God forbid should be gainsaid.”

1709. The earliest press introduced into the province of Connecticut, North America, was set up at NEW LONDON, a seaport and considerable city, by William Short, from Boston. The first book said to have been printed in the colony is entitled, the *Saybrook Platform of Church Discipline*, dated 1710. Mr. Short, dying soon afterwards, was succeeded by Timothy Green,

1709, Jan. *Monthly Transactions*; published by Dr. William King.\* No. 1.

1709. *The Daily Courant*. This was the first newspaper published daily in London, (Sundays excepted.)

1709. *The Worcester Journal* established by Mr. Berrow, which exists to the present day.

1709. *Monthly Amusement*, by John Ozell.†

\* Dr. William King, an ingenious and humorous writer, whose poetical and political works are numerous. His *Historical Account of the Heathen Gods and Heroes* is still held in esteem. He died December 23, 1713, and was buried in Westminster abbey.

† John Ozell was born in Leicestershire, and educated at the school of Ashby-de-la-Zouch. He was auditor-general of London, and of the accounts of St. Paul's cathedral, and St. Thomas's hospital. He translated Moliere and other French writers, besides being the author of some poems. He died October 13, 1743. Pope has placed him in the *Dunciad*.

1709, April 12. *Tatler*, by Isaac Bickerstaff, Esq. No. 1. This paper was commenced by Steele, under the assumed name of Bickerstaff, who was assisted by Addison, and other eminent writers. It was published three times a week, at the price of one penny, and reached 271 numbers, the last appearing on Jan. 13, 1711. "The hand that has assisted me," says Steele, "in those noble discourses upon the *Immortality of the Soul*, the *Glorious prospects of another life*, and the *most sublime ideas of religion and virtue*, is a person, (alluding to Addison)\* who is too fondly my friend ever to own them." The *Tatler* was essentially a newspaper, in as far as it contained articles of foreign intelligence and advertisements, and the only difference between it and the other sheets of news then published, was in its containing original papers of morals and criticism—they being, of course, the only portions now preserved.—See *Spectator*, page 596, post.

1709, May 12. *Gazette à la Mode*; or, Tom Brown's Ghost. No. 1.

1709, July 8. *Female Tatler*; by Mrs. Crakenhorpe, a Lady that knows every thing. No. 1. In No. 28, a wooden portrait was introduced, and continued till No. 52, when the title adds, "by a Society of Ladies."

1709, Aug. 17. *Scots Postman*, No. 1. This paper was established by permission from the town council of Edinburgh, in virtue of the plenipotent jurisdiction they then exercised, and granted to Mr. David Fearn, advocate, licence to print this paper every Tuesday, Thursday, and Saturday, with a prohibition against all others from publishing on these days. John Moncur was the printer of this paper for Mr. Fearn.

1709, Aug. 22. *The Tatling Harlot*.

1709, Aug. 23. *Mr. Boyer's Case*; and his undoubted Right and Title to the Writing of the *True Post Boy* asserted. "All gentlemen, shopkeepers, coffee-men, and others, who will think fit to continue the true *Post Boy* by A. Boyer, are desired to give particular directions about it to the hawkers that serve them; because Mr. Roper uses all mean endeavours to binder its being dispersed. Mr. Roper, in particular, ought gratefully to reflect, that Mr. Boyer has written for him, *The History of King William*, in three volumes; seven volumes of the *Queen's Annals*; some other books; and the *Post Boy* for four years; by all which he has got considerable sums of money.

1709, Sept. 6. *Evening Post*. "The great expence gentlemen are put to in buying six or seven prints of a post-day, that bear the title of newspapers, when at the same time any one of them would contain more real news than is found in all, and as a further tax as well as imposition

there must be 3 or 4l. per annum paid by those gentlemen that are out of town for written news, which is so far generally from having any probability of matter of fact in it, that it is frequently stuffed up with a *We hear*, &c. or, *An eminent Jew Merchant has received a letter*, &c. being nothing more than downright fiction; it is intended that this paper shall come out every evening at six o'clock, in which shall not only be contained an extract of all the foreign as well as domestic prints, but a better account of our home transactions than has yet appeared, in which there has been such a careless neglect hitherto, that we read more of our own affairs in the Dutch papers than in any of our own. And likewise those persons that have advertisements to put in, if they send them by twelve of the clock, shall have them inserted the same day, being so short a time that the payment of all lost or mislaid bills may be stopped, whereas the delay of the other papers occasions the loss of many valuable things."

1709, Sept. 27. *The General Postscript*; being an Extract of all that is most material from the Foreign and English newspapers; with Remarks upon the Observer, Review, Tatlers, and the rest of the Scribblers; in a Dialogue between Novel and Scandal. No. 1.—In No. 12, Oct. 24, is the following remark: "The weekly papers being exceedingly barren and impertinent; the following catalogue, we hope, will not be unexceptionable to every English reader:"

#### MONDAY—6.

*The Daily Courant*, by Socinus Editor, a modern Whig.—*The Supplement*, by Jacobus Abellius, a Postscriptorian.—*The British Apollo*, by a Society of Gentlemen, consisting of Abennigo Simpleton only.—*The General Remark*, by the most learned and laborious Pevens, Projector and Operator extraordinary.—*The Female Tatler*, by Scandalissima Scoundrella, and her two natural Brothers.—*The General Postscript*, by Novellus Scandalus, an Ubiquitarian.

#### TUESDAY—12.

*The London Gazette*, by the Gazetteer.—*The Post Man*, by M. Hugonotius Politicus Gallo-Anglus, a spiferial Commentator.—*The Post-Boy*, vide Supplement.—*The Flying Post*, by Soclus Phantasticus, an Observer.—*The Review*, by Verbofus Enthusiasticus, a Modernist.—*The Daily Courant*, ditto.—*The Tatler*, by Scriptor Furiosus, a Superintendent, and Court Intelligence.—*The Rehearsal* revived, by Agitator Maximus, an Antediluvian.—*The Evening Post*, by Compositor Patuus, a defacer of Languages.—*The Whisperer*, by Mrs. Jenny Privolous, a near relation to Jacobus Abellius, the Postscriptorian.—*The Post-Boy Junior*, by M. Boyerius a famous Versioneer.—*The City Intelligence*, by Mr. Nibble-news, a Paragaphian.

#### WEDNESDAY—6.

*The Daily Courant*.—*The Supplement*.—*The Observer*, vide *Flying Post*.—*The General Remark*.—*The Female Tatler*.—*The General Postscript*.

#### THURSDAY—12.

*The Gazette*.—*The Post-Man*.—*The Post-Boy*.—*The Flying Post*.—*The Daily Courant*.—*The Review*.—*The Tatler*.—*The Rehearsal* revived.—*The Evening Post*.—*The Whisperer*.—*The Post-Boy Junior*.—*The City Intelligence*.

#### FRIDAY—6.

*The Daily Courant*.—*The Supplement*.—*The General Remark*.—*The Female Tatler*.—*The General Postscript*.—*The British Apollo*.

#### SATURDAY—12.

*The Gazette*.—*The Post-Man*.—*The Post-Boy*.—*The Flying Post*.—*The Daily Courant*.—*The Observer*.—*The Review*.—*The Tatler*.—*The Rehearsal* revived.—*The Evening Post*.—*The Whisperer*.—*The Post-Boy Junior*.—*The City Intelligence*. In all—35.

\* It was the intention of sir Richard Steele to have kept his name, as connected with the *Tatler*, a profound secret from his friend Addison, who was then in Ireland as secretary to the lord lieutenant; but Addison, soon discovered the author among the very first numbers, by Steele inserting some remarks on Virgil which had been suggested by his friend, and they thereafter laboured jointly in the work. Addison's first contribution appeared on the 26th of May, 1709.

1709. *Censura Temporum*; the good or ill tendencies of Books, Sermons, Pamphlets, &c. impartially considered, in a dialogue between Eubulus and Sophronius. 2 vols. 4to. Printed by H. Clements. Published monthly.

1709. *Nov. Monthly Amusement*, by Hughes.\*

1709. *Re-Tatler, Tory Tatler, Condoler, Tell Tale, and Whisperer*, by Mrs. Jenny Bickerstaff.

1710, Feb. 1. Amongst the records of the town council of Edinburgh is an act of this date, "authorising Mr. Daniel De Foe to print the *Edinburgh Courant*, in the place of the deceased Adam Bog," and prohibiting any other person from printing news under the name of the same paper. We have no means of ascertaining how long the independent minded De Foe continued to perform the duties of the editorship of this paper; but there is reason to believe, however, that his active mind was soon wearied of this slavish sort of work. He had been sent down to Edinburgh, at the expense of the government, to negotiate the union of Scotland with England, and he appears to have accounted his services on this occasion among the most important he had been enabled to render his country; and probably few individuals of that day saw so clearly the advantages of the arrangement which thus converted the two nations into one people.

1710, CHARLES HILDEBRAND, baron de Canstein, established a printing-office at Halle, in Germany, which is called the *Canstein or Bible Institution*, for the purpose of printing and selling bibles and new testaments at a moderate price, in order to secure a more general circulation of the scriptures; and in which it proved so successful, that in 1805, above 3,000,000 copies of the entire bible and new testament had issued from the press of the institution. In the thirty-fourth edition of the bible, printed by this institution, an error occurred in one of the commandments, similar to that in the English bible, printed by Barker and Lucas, in the year 1632. (See page 484, *ante*.) By the omission of the word *not*, the commandment read, "Thou shalt commit adultery." The edition was consequently confiscated, and judiciously prevented from being circulated. A copy is in the library of Wolfenbuttel, which, on account of its great rarity, cost fifty dollars. Interesting accounts of this establishment will be found in professor Franck's *Pietas Hallensis*, or Abstract of the marvellous footsteps of Divine Providence.—*Second Report of the British and Foreign Bible Society*, App. No. 9, &c.

1710, March 22. JOHN BARBER succeeded Mr. Samuel Roycroft as city printer. He was admitted to be printer to the honourable city of London, for which he then paid for fees twelve guineas to the lord mayor, and six to the chamberlain. His fee was £6 a-year for two suits of clothes; the one for summer, the other for winter.

\* John Hughes, poet, dramatic author, and essayist, was born at Marlborough, in Wiltshire, January 29, 1677, and died at London, Feb. 17, 1739. He was the author of *Dumacus*, a tragedy, which long kept possession of the stage. Several papers in the *Tatler*, *Spectator*, and *Guardian*, were written by him.

1710, March 27. *British Mercury*.—This paper was established by the projectors of the Sun Fire Office; who appear to have then lately purchased the interest of a preceding office which had been managed by Mr. Povey.—"In a few days," they state, "the company's policies will be ready, and delivered gratis to all persons who had subscribed to the Exchange-House Fire-office, and continue to insure their houses or goods from loss by fire with the company of London insurers, they only paying their quarterage as usual." The top of the paper is ornamented with a bold Sun, resembling the present badge of the Sun Fire office.—At No. 38, they added the figure of Mercury. The earliest insurance-office has been noticed page 560 *ante*.

1710, April 28. *Died*, THOMAS BETTERTON, a famous actor in Shakspeare's principal characters, as Hamlet, Othello, Brutus, and Hotspur. He was born at Westminster, August 11, 1635, served his apprenticeship to a bookseller, and then took to the stage. In 1656, he made his first appearance in the company of sir William Davenant. In 1695 he opened a new playhouse in Lincoln's Inn Fields, but his scheme did not answer. He was the author of some dramatic pieces. His death was occasioned by taking improper means to repel the gout from his feet. He was buried in Westminster abbey.

1710, March. *Tit for Tat*, by John Partridge.

1710, April 1. *Northern Tatler*, No. 1. The arbitrary injunction of the town council of the city of Edinburgh, with regard to newspapers, already noticed, did not prevent other newsmongers from starting up. The *Northern Tatler* was printed by John Reid for Samuel Colvil, and published on Mondays and Fridays.

1710, May 22. *Moderator*, No. 1.

1710, Aug. 3. *Examiner*, or Remarks upon Papers and Occurrences, No. 1.

1710, Aug. 21. *Visions of Sir Heister Ryley*.

1710, Sept. 2. *The Examiner*, No. 1. This was another newspaper from the busy press of James Watson at Edinburgh. It was issued weekly, and after the two first numbers had appeared, it was transferred to London, but continued to be printed in Edinburgh, by Watson, until the year 1715, when it was stopped. The *Examiner* was entirely different in its character from that of any other newspaper that had before been seen in Britain or elsewhere. Each number consisted solely of a political essay or commentary, in which are displayed a minute acquaintance with the political condition and coteremporaneous literature of Europe, all which are discussed with great freedom and boldness.

1710, Sept. 14. *Whig Examiner*, No. 1.

1710, Oct. 5. *Medley*, in a Letter to the *Whig Examiner*, by Mr. Oldmixon,\* No. 1.

1710. *The Tatler*, anonymous.

1710. *Annotations on the Tatler*, by W. Wagstaff. [Oldisworth.]

\* John Oldmixon, a political writer and historian, was born near Bridgewater in Somersetshire, and died July 9, 1743. He wrote a *History of the Stuarts*, folio, a *Volume of Poems*, 8vo., the *Life of Queen Anne*, and other works.

1711, Jan. 6. CHRISTOPHER BATEMAN, a celebrated bookseller who lived in Little Britain, and dealt principally in old books, is mentioned by Swift, in a letter to Stella, of this date: "I went to Bateman's, the bookseller, and laid out eight and forty shillings for books. I bought three little volumes of *Lucian*, in French, for our Stella." John Dunton, speaking of Mr. Bateman, says, "There are very few booksellers in England (if any) that understand books better than Mr. Bateman, nor does his diligence and industry come short of his knowledge. He is a man of great reputation and honesty, and is the son of that famous Bateman, who got an alderman's state by bookselling." It was said that he would never suffer any person whatever to look into one book in his shop; and when asked a reason for it, would say, I suppose you may be a physician or an author, and want some recipe or quotation; and if you buy it, I will engage it to be perfect before you leave me, but not after; as I have suffered by leaves being torn out, and the books returned, to my very great loss and prejudice.

1711, March 1. *Spectator*, No. 1. This was printed in the same form, and at the same price as the *Tatler*, and supported by the same able contributors, but was altogether a work of far more elevated pretensions than its predecessor. The paragraphs of news were discarded; and many articles of sound and generous criticism were introduced, which had for their object to direct the public attention to splendid productions of literature, such as Milton's *Paradise Lost*, which had been neglected amidst the heartless corruption that disgraced the age of Charles II. Dr. Johnson's account of these essays, and of the rise of periodical papers is too valuable to be omitted. "To teach the minuter decencies and inferior duties, to regulate the practice of daily conversation, to correct those depravities which are rather ridiculous than criminal, and remove those grievances which, if they produce no lasting calamities, impress hourly vexation, was first attempted in Italy, by Casa, in his *Book of Manners*, and Castiglione in his *Courtier*, two books yet celebrated in Italy for purity and elegance. This species of instruction was continued, and perhaps advanced, by the French, among whom La Bruyere's *Manners of the Age*, though written without connexion, deserves great praise. Before the *Tatler* and *Spectator*, if the writers for the theatre are excepted, England had no masters of common life. No writers had yet undertaken to reform either the savageness of neglect or the impertinence of civility, to teach when to speak or to be silent, how to refuse or how to comply. We wanted not books to teach us more important duties, and to settle opinions in philosophy or politics; but no *arbitræ elegantiarum*, a judge of propriety, was yet wanting, who should survey the track of daily conversation, and free it from thorns and prickles, which tease the passer, though they do not wound. For this purpose nothing is so proper as the frequent publication

of short papers, which we read not as study, but amusement. If the subject be slight, the treatise likewise is short. The busy may find time, and the idle may find patience. The *Tatler* and *Spectator* reduced, like Casa, the unsettled practice of daily intercourse to propriety and politeness; and, like Bruyere, exhibited the characters and manners of the age. But to say that they united the plans of two or three eminent writers is to give them but a small part of their due praise; they superadded literature and criticism, and sometimes towered far above their predecessors, and taught with justness of argument and dignity of language the most important duties and sublime truths."

The *Tatler* and *Spectator* were the first attempt made in England, or any other country, to instruct and amuse unlearned readers by short papers, appearing at stated intervals, and sold at their due price; the object of these writers was "to bring philosophy out of closets and libraries, schools, and colleges, to dwell in clubs and assemblies, at tea-tables and at coffee-houses."

Gay, who lived at this period, speaking of Isaac Bickerstaff (the assumed name of the conductor of the *Tatler*), says, "It is incredible to conceive the effects his writings have had on the town; how many thousand follies they have either quite banished or given a very great check to; how much countenance they have added to virtue and religion; how many people they have rendered happy by showing that it was their own fault if they were not so; and lastly, how entirely they have convinced our fops and young fellows of the value and advantages of learning."

Dr. Drake, in his admirable essays\* upon periodical publications, observes, that "The invention of a paper calculated for general instruction and entertainment, abounding in elegant literature, appearing periodically, and forming a whole under an assumed name and character, is, without doubt, to be ascribed to this country, and confers on it no small degree of honour. The *Tatler* presented to Europe, in 1709, the first legitimate model. Some years previous, indeed, to the publication of this work, there appeared several political, controversial, and theological periodical papers, the offspring of faction and polemics, insulated, devoid of character, unity, or sound literature, and which seem to have been founded, with scarcely any improvement, upon the common newspapers of the day.

"To correct ludicrous folly, however, by ridicule, to regulate the decencies and duties of mutual intercourse and conversation, to abash vice, to encourage literature, and to attain variety by multiplicity of subject, had been the aim of many writers in various nations long anterior to the birth of the *Tatler*. These productions were either dissertations, dialogues, or unconnected essays, published in volumes, and totally wanting that peculiar form and associa-

\* *Essays, Biographical, Critical, and Historical, illustrative of the Tatler, Spectator, and Guardian.* By Nathan Drake, M.D. in three vols. fols. 8vo. London, 1814.

tion, that dramatic cast and union which have rendered the genuine periodical paper so singularly interesting.

"A series of papers thus constituted, and forming a whole, replete with wit, fancy, and instruction, has been proved by long experience not only the most useful but the most interesting and popular of publications. Each sex, every rank, and every stage of society have been alike amused and benefited by these productions. Courtesy, etiquette, and dress, as well as morals, criticism, and philosophy, have learnt to obey their dictates; and many important truths, many sage lessons for life, have, by approaching under the disguise of a trivial and fashionable topic, found their way to, and made their due impression upon, those whom no other channel could reach."

The *Spectator* appeared daily (Sundays excepted) and gained so much on the public favour, that Addison's friend, Tickle, says that the sale frequently amounted to twenty thousand copies. This statement, however, is evidently exaggerated. Mr. Samuel Buckley, the publisher, at the Dolphin, in Little Britain, stated in the tenth number, that the sale had already reached three thousand a-day, and it seems questionable if it ever exceeded that number. Dr. Johnson says, "I once heard it observed, that the sale may be calculated by the produce of the tax, related in the last number to produce more than £20 per week, and therefore stated at £21, or £3 10s. a-day; this, at a halfpenny a paper, will give 1680 for the daily number." Johnson ought to have considered, however, that this calculation was founded upon the average sale, after the imposition of the halfpenny tax, by which the *Spectator* was at once reduced one half. The last untaxed number appeared on the 31st July, 1712, and intimation is therein given, that the price would thereafter be twopence—one additional halfpenny to pay for the stamp, the other to compensate for the reduced circulation. The *Spectator* was the only publication that ventured to double its price.

1711. *Died*, THOMAS JAMES, a noted printer in London, who was thus characterised by Dunton. "He is a man that reads much, knows his business very well, and is extremely obliging to his customers, and is something the better known for being husband to that she-state politician Mrs. Eleanor James." This Mrs. Eleanor James was a very extraordinary character, a mixture of benevolence and madness; an assertion that a perusal of her letters will fully justify. The two following are entitled,—

*Mrs. James's Advice to all Printers in general.*

"I have been in the element of Printing above forty years, and I have a great love for it, and am a well-wisher to all that lawfully move therein, and especially to you that are masters; therefore I would have you wise and just, and not willingly break the laws of God nor man, but that you would do by all men as you would

desire they should do by you: and you cannot be ignorant of the great charge in bringing up of servants in the art of printing; neither can you be insensible how remiss, provoking, and wasteful some servants are, especially when they are encouraged therein, by the unjust hope of getting away from their masters, and having over-work from other masters that have not had the charge and trouble of bringing them up, which is too frequently practised among you, to the ruin of the trade in general, and the spoiling of youth. For when a boy has served half his time, and has gained some experience in his trade, he presently begins to set up for conditions with his master; then he will not work unless he has so much for himself, and liberty to go where he pleases, which if his master denies, he then strives to vex his master, and waste his time and goods; and then when he beats him, away he runs with great complaints, when the master is all the while the sufferer; and it is no wonder to hear a boy that wants an honest principle to do his own duty, rail against and bely his master and mistress; for he thinks to excuse himself by blackening them. Now I would have this great evil prevented, and that you may easily do, if you will resolve to take no man's servant from him, and then a master may (as he ought) have the benefit of the latter part of his time, to make him amends for his trouble and charge, which is according to the will of God and good men. For if it should happen, that an apprentice by any trick should get away from his master, I would not have you give any encouragements, as money, but that he serve the term of his indenture as an apprentice without; for giving him money makes him a journeyman before his time: for indeed, if there be any consideration, it ought to be given to the master that had the trouble and charge of bringing him up; and who will serve seven or eight years, if they can get off before? For besides, boys will have a thousand tricks to provoke their masters to anger, in trifling away their time, and flinging their houses into pie, except their masters will be under conditions to give them encouragements, and to give that liberty to go where they will, and have money to spend, and this is to make the master the servant and the boy the master; therefore, pray, brother, do not be guilty in destroying of youth, for it is the destruction of the trade. I desire you to take care not to bind any boy except he be above the age of fourteen, and the fewer the better. So I rest your sister and souls' well-wisher.

ELIANOR JAMES."

"Now to you, journeymen; you are my brothers, for my husband was a journeyman before he was a master, and therefore I wish you well: and take care that you are not guilty of any ill thing, as shewing servants any ill examples, and giving bad counsels; for if you should, you would be like Judas, in betraying your master that employs you; for sober men, they scorn to be guilty of this crime; but for you of the worse sort, you are like devils, for you study

how to do all manner of mischief to a good husband, for you hate them because they are better than yourself: had not you better imitate them, and pray to God to make you like them? For what benefit have you in starving your wives and children, and making yourselves sots only fit for hell? Pray, brothers, mend your faults, and pray to God to give you repentance, and to mend for the time to come, that you may be reconciled to God and man, which I heartily wish.

ELIANOR JAMES."

Mrs. James, at her death, was a generous benefactress to the church of St. Bene't, Paul's-wharf, where she gave some plate; and on a tablet in that church is this inscription:

Anno 1710, Mrs. Elinor James, to prevent scandal, has thought fit to erect this tablet to satisfy the world what she has given to her children since her husband's death.

And then follow several sums, amounting to a few hundred pounds, with the dates annexed, which were divided between her daughters Ilive and Saunders; and a lease for 23 years, worth £26 a-year.

On another tablet:

Anno 1718. Mrs. Elinor James did, in her life-time give to the parish of St. Benedict, Paul's-wharf, for the use of the Communion-table, a large basin furbelowed and gilt, weighing 66 oz.—a large dish, embossed and gilt, 40 oz.—a large salver, furbelowed and gilt, 41 oz.—a pair of embossed candlesticks and sockets, 80 oz.—a small dish, embossed and gilt, 7 oz.—a salver of 18 oz. and two others of 14 oz. each—one chalice, with a paten, 6 oz.—and two chalices without patens, besides several other articles, and an embroidered valance for the pulpit.

In the library of Sion college are portraits of the father and mother of Mr. George James; and of his great-grandfather; which Mr. Malcolm thus describes:

Thomas James,\* S.T.P. 1627; æt. 57; first keeper of the Bodleian library at Oxford. Given by his grandson's wife. A florid countenance, full face, and white beard. Dressed in a black gown, cap, and ruff.

Thomas James, Typogr.; presented by his wife; a half-length picture, seated in a chair, the legs and arms of which are spiral. He has a stern thin visage; his hair brown, and part grey, and a white beard. His dress is a loose white gown, over an embroidered coat; laced band and ruffles, and black cap.

Mr. Thomas James had left his books by will to the use of the public, and the president and fellows of Sion college were indebted to his widow for giving them the preference.

1711, May 3. Died, RICHARD CHISWELL, an eminent bookseller in St. Paul's church-yard. John Dunton places him at the head of the most eminent of the profession in the three kingdoms. "Mr. Richard Chiswell well deserves the title of Metropolitan bookseller of England, if not of all the world. His name at the bottom of a title-page does sufficiently recommend the book. He has not been known to print either a bad book, or on bad paper. He is admirably

well qualified for his business, and knows how to value a copy according to its worth; witness the purchase he has made of archbishop Tillotson's 8vo. sermons. He was born in the parish of St. Botolph's, Aldgate, and was appointed one of the first directors of the bank in the original charter, and was buried in that church, with the following epitaph.

MR. RICHARD CHISWELL, a noted bookseller in St. Paul's church-yard, lies buried in the north aisle of this church; and also his father and mother, John and Margaret Chiswell, and his first wife, Sarah, daughter of John King; and also five children, who died young, whom he had by Mary, daughter of Richard Royston, bookseller, who lies buried in Christ church, London, by whom he had likewise three sons more; John, who died in India, Richard and Royston, who survived him. He was born in this parish, Jan. 4, 1639, and died May 3, 1711, and was a man of very great praise. As a memorial whereof, his son Richard Chiswell, of London, merchant, caused a monument to be erected, which is against the wall in the south aisle.

A list of the principal books published by Mr. Chiswell, from 1675 to 1709; and some of the family epitaphs may be seen in the *Gentleman's Magazine*, vol. lxx. page 179.

1711, Aug. 11. ROBERT FREEBAIRN, JAMES WATSON, and JOHN BASKET, were appointed the royal printers in Scotland, for forty-one years, from the expiration of the grant to Andrew Anderson. Robert Freebairn was the son of David Freebairn, who, while he was minister of Dunning was consecrated bishop of Edinburgh, Oct. 17, 1724, and died December 24, 1730. Robert was in the mean time settled at Edinburgh as a bookseller, and in 1706 purchased of Mr. John Spottiswoode, an advocate, a printing-press, which he had established for printing law books, Freebairn then began to print in 1706. It was on the 22d of October, 1707, that Walter Ruddiman, then aged 19, entered the printing business, having agreed with Mr. Robert Freebairn upon these terms, viz.: "That he should maintain himself, and the said Robert is to pay him journeyman's wages whenever he shall be able to work sufficiently; and it was provided, that the said Walter should stay with the said Robert, he furnishing him with work, and giving him as good wages as any in Edinburgh." In 1715, Walter Ruddiman was admitted a partner in the materials, but not in the house, though both were equal sharers in the profit and loss. Walter Ruddiman was an athletic person; having his brother's intellect without his brother's learning. He was in every period an industrious printer, and an honest man. The two copartners were men of great prudence and happy tempers, which enabled them to live together, in the midst of much business, and frequent intercourse, for half a century, without a dispute, and without jealousy.—*Chalmers's Life of Thomas Ruddiman*.

1711. The art of typography was introduced into St. PETERSBURG by its founder, the Czar Peter the Great, who transferred a part of the printing establishment of Moscow to his new capital, for the purpose of printing the imperial ukases. Bachmeister observes, that the earliest

\* See a short notice of him at page 454, ante.

productions of this new press which he had seen were a book of the year 1713, and the *Gazettes* of 1714. The art seems to have spread rapidly in this city; in 1719 the senate of St. Petersburg appears to have had a printing-press of its own: in 1718 or 1720 one was erected in the monastery of Saint Alexander Newski: in 1724 the college of the admiralty possessed one: by an ordinance of the empress Catherine, dated Dec. 21, 1725, an academy of sciences, which has long been well-known to the learned world by its learned *transactions*, had a press peculiar to itself in 1727: and in 1735 the synod of the clergy enjoyed a similar advantage.

1711, Oct. 23. Fourteen booksellers, printers, and publishers were committed to Newgate by order of Mr. Secretary St. John, amongst whom were Mr. DABY, jun. for printing a translation of *Tacitus*, which relates how Cælius Bassus deceived the emperor Nero with the promise of an immense but imaginary treasure.

Mrs. POPPING, (widow of Mr. J. Popping, bookseller, whom Pope has placed in the *Dunciad*.) for publishing the *Protestant Post Boy*.

Mr. GEORGE RIDPATH, for writing the *Flying Post*,\* a whig paper, was bailed, and forfeited his recognizances to the amount of £600.

Mr. HART, for printing the British ambassador's speech to the French king, was adjudged to stand three times in the pillory, pay a fine of £50, and to find sureties for his good behaviour during life.

Among the various circumstances tending to throw light, though certainly not lustre, on the character of dean Swift, must be accounted the vengeance he cherished against those in whom he perceived a disposition to offer him the slightest injury as political opponents. The following extracts from his journal to his female correspondents will prove the accuracy of this assertion, so far as regards those connected with the press.

"A rogue that writes a newspaper, called the *Protestant Post Boy*, has reflected on me in one of his papers; but the secretary (St. John) has taken him up, and he shall have a squeeze extraordinary. He says, 'that an ambitious Tantivy, missing of his towering hopes of preferment in Ireland, is come over to vent his spleen on the late ministry,' &c. I'll tantivy him with a vengeance."—October 10, 1711.

"One Boyer, a French dog, has abused me in a pamphlet, and I have got him up in a messenger's hands. The secretary promises me to *swing* him. I must make that rogue an example to others."—December, 1711.

\* These devils of Grub-street rogues that write

\* Mr. John Salusbury, printer, was a desperate hyper-gergonic Welshman. He would dress, as it were, in print, only to have the ladies say, "Look what a delicate shape and foot that gentleman has!" He was a silly, empty, morose fellow. He had as much conceit, and as little reason for it, as any man that I ever knew. He was the first that printed *The Flying Post*; and to the grief of his author did often fill it with stolid copies. He went to law with the company of stationers, (to keep himself from the livery,) would hector the best man of the trade, but now lies as hush and quiet as a body would wish, in the new burying-place.—*Dunston*.

the *Flying Post* and *Medley* in one paper, will not be quiet. They are always mauling the lord treasurer, lord Bolinbroke, and me. We have the dog (that is the editor) under prosecution, but Bolinbroke is not active enough; but I hope to *swing* him. He is a Scotch rogue, one Ridpath."—February, 1712.

If Swift was thus cruel in his revenge upon his enemies, he gratified his vanity by incessant and teasing solicitations in favour of those who called themselves his friends, but who were, at least, his servile and obsequious flatterers:

"I presented my printer and bookseller (John Barber and Benjamin Tooke) to lord Rivers, to be stationers to the ordinance. I believe it will be worth £300 per annum between them. This is the third employment I have got for them."—January 13, 1712.

"My printer and bookseller want me to hook in another employment for them, because it was enjoyed before by a stationer, although it be to serve the ordinance with oil, tallow, &c., and is worth £400 per annum. I will try what I can do for them; they are resolved to ask several other employments of the same nature to other offices, and I will *grease fat asses*, and see whether it be possible to satisfy them!!"—January 16.

The last important service which he rendered to his friends was obtaining a patent, which passed the great seal on the 13th of October, 1713, constituting Benjamin Tooke and John Barber, printers to the queen's most excellent majesty; which, as was explained at the time by a public advertisement, was to commence after the expiration of the term existing to Mr. Baskett; namely, in January, 1739.

1711, Jan. 13. *The Tatler*, by Donald Macstaff § of the North, No. 1. This is the first publication, apart from politics, which was printed in Scotland, and issued from Watson's press, in four folio pages, price one penny. It seems to have been started in consequence of the cessation of the *London Tatler*, and the first article contains a well written and panegyric criticism on the writings of Steele, Addison, and others, in the latter publication. But Donald Macstaff seems to have got little encouragement from his countrymen, and his work only to have reached a very few numbers.

1711. *The Political State of Europe* was commenced by Abel Boyer, a French refugee, and the author of the well-known *French and English Dictionary*. This publication was continued till the year 1739. It may be considered as the first *Annual Register*. Although this work came out in annual volumes, it was also published in monthly numbers.

\* Mr. George Ridpath was one of the original authors of the *Works of the Learned*, and corrected captain Robinson's *Voyages*, in eight volumes. Swift has placed him in the *Tale of a Tub*; and Pope in the *Dunciad*;

To Dulness Ridpath is as dear as Mist.†

† Of whom see notice 1741, post.

‡ Of whom see notice 1733, post.

§ Robert Hepburn, who died at an early age in 1712.

¶ Nathaniel Mist was the printer of a tory paper, of whom see notice 1737 post.

1711, Jan. 13. *Tatler*, published by Mr. Harrison,\* by the Royal Exchange.

1711, *The Postman*, published on Tuesday, Thursday, and Saturday. Printed by FRANCIS LEACH,† in Elliott's-court, Little Britain.

1711, *Tatler*, by Baker.

1711, Feb. 1. *Growler*, or Diogenes robbed of his Tub.

1711, Feb. 27. *Monthly Weather-paper*; being some baroscopic Discoveries from what Part or Parts of the Compass the Wind may be likely to blow; with what other Sorts and Alterations of the Weather may be expected every Day and Night, in March.

1711, April 28. *Miscellany*, No. 1.

1711, July 19. *General Post*.

1711, Aug. 1. *The Newcastle Courant*, printed and published by John White.‡ At its commencement this was the only newspaper north of the Trent, and was for several years published three times a week. It was not begun to be numbered until Saturday May 1, 1725, when No. I. appeared in demy 4to. (four pages) price twopence. This paper has continued to be regularly published on the Saturday, since 1725.

1711, Aug. 4. *Hermit*; or, a View of the World by a Person retired from it, No. 1.

1711, Sept. 4. *Protestant Post-boy*, containing all publick Transactions Foreign and Domestic, No. 1.

1711, Nov. 17. *Free-thinker*, No. 1.

1711, Dec. 1. *Weekly Post*; or, a just Account of all the principal News, both Foreign and Domestic, No. 1.

1712, Jan. 30. The printing-office of Mr. WILLIAM BOWYER,§ situated in White Fryars, London, was destroyed by fire; and, upon a moderate computation, the loss upon the amount of property was not less than £5146 18s. To indemnify the sufferer, a royal brief was granted, of which the clear amount was £1514 13s. 4½d., from which Mr. Bowyer received £1377 9s. 4d. being a dividend of 5s. 4½d. in the pound on his

\* "His person is of the middle size; his hair inclines to a brown, but his care and concern for his family will soon change it into a white, at once the emblem of his innocence and virtue. His temper is easy and agreeable; and his piety and devotion as unaffected, and yet as remarkable as his love to the church of England—the true church of England, not those tumours and wens that grew upon it, and pretended to be not part, but all of it, in the late bad times. And less than that could scarce be expected from an apprentice that had served seven years with Mr. Samuel Crouch."—*Dunton*.

† His forehead is high and majestic; his eyes full of fire and briskness, and tempered with an attractive languishing; his hair black and lovely; his person small, and of a curious shape; and it is so neat, so free, so disengaged, that there are few like him; he has a great deal of wit—his tongue is composed of so much harmony, that, when his health returns, its own sound is only able to declare its perfection; he is also blest with a tender wife, a constant trade, has printed *The Postman*, &c. many years; and, I may venture to say, that Francis Leach is the handsomest printer in London; or, if those good qualities which adorn his soul can admit of degrees, it is because his modesty is transcendent over the rest.—*Dunton*.

‡ Mr. White died at Newcastle-upon-Tyne, January 26, 1769, in the eighty-first year of his age, being at his decease, the oldest master printer in England. He was the son of John White, noticed at page 572, ante.

§ Of whom see a notice in the year 1737, post.

own proportion of the whole loss. The remainder, £136 14s. 0½d., he thought it his bounden duty to divide amongst the other sufferers.

The following paper was in the mean time circulating among his private friends; among whom Mr. Bowyer always held himself particularly under obligations to Mr. Timothy Goodwin,\* an eminent bookseller in Fleet-street, the first promoter of the subscription; and to Mr. Richard Sare,† of Holborn, who ranked high in the same profession, and took a very active part in soliciting subscriptions.

"Whereas, by the providence of Almighty God, Mr. William Bowyer, hath lately had his dwelling-house, his goods, his founts of letters, presses, and other utensils, all suddenly destroyed by a sad and lamentable fire, inasmuch that he was not able to save either his own, or his family's wearing clothes, and very little else of any thing, the whole loss amounting to several thousands of pounds, to the ruin of himself and family, not to mention others that have suffered together with him. We whose names are hereunto subscribed, not knowing how soon it may be our own case, do, out of compassion to him, give and contribute the sums following: viz.

Mr. Browne	2	Mr. Joscuit	1
Mr. Buckley	2	Mr. Motte	1
Mr. Grover	2	Mrs. James, a silver cup.	

Thus far the names have been given of his own fraternity only † but from other friends Mr. Bowyer received large sums; and to the honour of English humanity, let it be known that the contribution they raised amounted to

£1162 5 10

His dividend on the brief ..... 1377 9 4

Total sum received by Mr. Bowyer 2539 15 2

1712. THOMAS PARKHURST, printer, gave by his will £37 to purchase annually twenty-five bibles with psalms, to be given to the poor. Hence the present custom of giving bibles to apprentices bound at stationers' hall. Mr. Parkhurst gave also £20 to buy a piece of plate. He was master of the company in 1683. Speaking of Mr. Parkhurst, John Dunton says, "My honoured master is the most eminent Presbyterian bookseller in the three kingdoms, and was chosen master of the company of stationers. He has printed more practical books than any other that can be named in London. He has met with very strange success; for I have known him sell off a whole impression before the book has been almost heard of in London. He is scrupulously honest in all his dealings, a good master, and very kind to all his relations: and (which is an argument of something in him above the common rate of mankind,) he is a great admirer and constant hearer of the Rev. Mr. John How."

1712, Aug. 12. The first stamp duty upon newspapers commenced on this day. An act had passed the legislature, that "for every pamphlet or paper contained in half a sheet, or lesser piece of paper so printed, the sum of one halfpenny sterling: and for every such pamphlet or paper being larger than half a sheet, and not exceeding one whole sheet, so printed, a duty after the rate of one penny sterling for every sheet printed thereof." This act, which was to curb the licentiousness of the press, was to be in force for the

space of thirty-two years, to be reckoned from the 10th day of June, 1712. Addison, in the *Spectator* of this day, says, "this is the day on which many eminent authors will probably publish their last works. I am afraid that few of our weekly historians, who are men that above all others delight in war, will be able to subsist under the weight of a stamp duty in an approaching peace. In short, the necessity of carrying a stamp, and the impracticability of notifying a bloody battle, will, I am afraid, both concur to the sinking of these thin folios which have every other day related to us the history of Europe for several years last past. A factious friend of mine, who loves a pun, calls this present mortality among authors, 'the fall of the leaf.'" On this tax dean Swift thus humorously alludes in his *Journal to Stella*, as follows (August 7):—"Do you know that all Grubstreet is dead and gone last week? No more ghosts or murders now for love or money. I plied it close the last fortnight, and published at least seven papers of my own, besides some of other people's; but now every single half-sheet pays a halfpenny to the queen. The *Observer*\* is fallen; the *Medleys* are jumbled together with the *Flying Post*; the *Examiner* is deadly sick; the *Spectator* keeps up and doubles its price; I know not how long it will hold. Have you seen the red stamp the papers are marked with? Methinks the stamping is worth a halfpenny." The stamp mark upon the newspapers was a rose and thistle joined by the stalks, and enclosing between the Irish shamrock, the whole three were surmounted by a crown. It was also enacted "that one printed copy of every pamphlet, printed or published within London or Westminster, or the weekly bill of mortality, shall, within six days after the printing be brought to the head office, and the title thereof, with the number of sheets, and the duty hereby charged, shall be entered; which duty shall be paid to the receiver-general, who shall give a receipt for the same," &c. The number of days in the country was fourteen, and the duties to be paid to the district collector. Sec. 12 declares the printer and publisher, and all persons concerned therein, not acting in conformity to law, liable to a penalty of £20.

It will be perceived that the amount of this stamp was only a halfpenny; and it is curious to observe what an effect this trifling impost had upon the circulation of the most favourite papers. Many were entirely discontinued, and several of those which survived were generally united into

\* This paper was commenced by John Tutchin, bookseller, in the reign of James II. and continued till 1712, when the halfpenny stamp effected its ruin. Tutchin joined the rebellion of the duke of Monmouth, and for a defence of that chieftain, which he subsequently printed, was sentenced by Judge Jefferies to be whipped through several towns in the west of England. This sentence was carried into effect with so much severity, that Tutchin absolutely petitioned king James to be hanged. He died September, 1707, and his paper was conducted by other hands. Pope has placed him in the *Dunciad*.

Earless on high, stood unabashed De Foe  
And Tutchin flagrant from the scourge below.

\* A guinea then passed in circulation for £1 1s. 6d.  
† For full particulars of this fire, and the donations given to Mr. Bowyer, see *Nichols's Literary Anecdotes*, vol. I. pp. 59-63.

one publication. The bill operated in a directly contrary manner to what the ministers had anticipated; for the opposition, who had more leisure, and perhaps more acrimony of feeling, were unanimous in the support of their cause. The adherents of ministers, who were by no means behind the opposition in their proficiency in the topic of defamation, were, it seems, not so strenuously supported; and the measure thus chiefly destroyed those whom it was Bolinbroke's interest to protect. For some reason, which we have not been able to trace, the stamp-duties were removed shortly after their imposition, and were not again enforced until 1725.

In order to understand how so small a duty as one halfpenny should operate so strongly upon these periodical publications, we must look at the price at which they were vended at that period. The majority of them were published at a penny, many at a halfpenny, and some were even published so low as a farthing. One was entitled *All Alive and Merry, or the London Daily Post*.

1712. The art of typography was introduced in TRANQUEBAR, a sea-port town of Hindostan, on the Coromandel coast, where a Danish settlement was established, in the year 1621. Early in this century, Bartholomew Ziegenbalg, a missionary, sent into those parts by the king of Denmark, began to translate the Holy Scriptures into the language of the natives of the coast. With the view of forwarding the dispersion of copies of this translation, a printing-press and some Tamulic types were despatched to him from Germany in the year 1712, and in the next year the press was set to work. Previously however to this, namely in the year 1711, the English society for promoting Christian knowledge had sent out to the missionaries a printing-press furnished with Portuguese types, paper, &c. which although the ship conveying it fell into the hands of the French, who captured and plundered it, yet being concealed in the hold of the vessel escaped their rapacity, and was safely landed together with all its materials. In the month of October, in the following year, this press was so far put into order, that, by way of first specimens, an *Ordo Salutis*, and an *elementary treatise*, both in Portuguese, were then worked off from it.

The Tamulic press commenced its labours with a book *On the damnable character of Paganism*, which was put to press on the 19th of September, 1713; and before the close of that year some portion of the Tamulic *New Testament* was printed off: the *four Gospels* were finished in a handsome manner in quarto before twelve months had expired, and appeared with the imprint *Tranquebaria in littore Cormandelino, typis Malabaricis impressi G. Alder, 1714*. The publication of the remainder of the *New Testament* was delayed from the scarcity of the paper, their types being very large; till at length the expedient was adopted of casting a new fount of letter from the leaden covers of some *Cheshire cheeses* which had been sent out to the missionaries by

the English society for promoting Christian knowledge. The attempt succeeded; and with these new and smaller types the *Epistles and book of Revelation* were printed, and the whole *New Testament* was published together in the year 1719. Subsequent publications from the Tranquebar press, down to 1761, may be seen in Masch's edition of *Le Long's Bibliotheca sacra*: and a minute account of them (which were issued in the Tamulic, English, Portuguese, and German languages) to the year 1736, is furnished by J. L. Niecampius, whose authority I have principally followed.—*Dr. Cotton*.

1712. An edition of the *Holy Bible*, comprising five several versions, in two volumes 4to. is said to have been executed in Holstein, perhaps at Keil, the capital of the province.

1712, Jan. 1. *Rhapsody*, No. 1.

1712, Feb. 2. *Historian*, No. 1.

1712, April 12. *Plain Dealer* [Wagstaffe's.\*]

1712, May 20. *Protestant Postboy*, No. 112.

1712. The *Liverpool Courant*, being an abstract of the London and other news, from Tuesday, July the 15th, to Friday, July 18th. No. 18. Printed by S. Terry, in Dale-street. At one corner is a wood cut representing Orpheus with his harp—at the other Mercury, with his usual attributes.

1712, July 26. *Weekly Packet*, No. 1.

1712, Aug. 2. *British Mercury*; published by the company of the Sun Fire-office in Thread-needle-street, No. 369.—This paper, which is the beginning of a new series, occasioned by the stamp duty, was extended to a sheet and a half; and contains an introductory history of newspapers, up to this period.

1712, Aug. 4. *The Medley*, No. 45. This was the concluding number of the second series of the *Medley*;† which had been commenced March 3, and ably conducted by Mr. Mainwaring;‡

\* Dr. William Wagstaffe, physician to St. Bartholomew's hospital, fellow of the college of physicians, and of the royal society. He was descended from a very ancient family in Warwickshire, and educated at Oxford. He died May 5, 1735, in the fortieth year of his age, and his character was thus given by an eminent physician: "He was no less valued for his skill in his profession, which he showed in several useful treatises, than admired for his wit and facetiousness in conversation!" He was related to the Rev. Thomas Wagstaffe, who is celebrated for his incomparable defence of king Charles's *Eikon Basilike*, and who died October 17, 1712, aged sixty-seven years.

† A selection from the first *Medley* was published in 1799, by Mr. John Nichols, together with the *Letter and Reader* of Sir Richard Steele.

‡ Arthur Mainwaring, Esq., is entitled to the most respectable distinction for his good sense and moderation in politics, at a time when faction and party zeal ran with such headstrong a current. He was universally allowed, says the *Biographical Britannica*, to be the best critic of his times; and Mr. Egerton, in his memoirs of Mrs. Oldfield, has declared, that his learning was without pedantry, his wit without affectation, his judgment without malice, his friendship without interest, and his zeal without violence: in a word, he was the best subject, the best friend, the best relation, the best master, the best critic, and the best political writer in Great Britain. He was born at Lightfield, in Shropshire, in 1668, educated at Oxford, and adopted the profession of the law. A short time before the accession of queen Anne, he was made a commissioner of the customs; and after that event, auditor of the land-taxes. In 1705, he was chosen, M.P. for Preston, in Lancashire, and ably supported the Whig party in the house of commons. He died at St. Albans, November 13, 1712.

and Mr. Oldmixon, assisted by Steele and Anthony Henley. The first *Medley* was concluded August 6, 1711, extending to forty-five numbers.

1712. The *Stamford Mercury*. This paper originated in the following manner:—Messrs. Thomson and Bailey commenced printing in the parish of St. Martin; and afterwards removed into the borough of which they were made free, with liberty to publish a paper, on condition that they printed the official papers of the corporation *gratis*!!!

1712. *A Cry from the Wilderness*; "Peace, Good-will to all Men;" in the Voice of the Hermit (and servant of Jesus) to the Clergy and People of God, of what denomination or distinction soever, No. 1.

1712. The *Deutsche* (or German) *Acta Eruditorum* began to be published at Leipzig, and was continued till 1740; the whole forming forty volumes.

1712. The *Rambler*, No. 1. It is probable, says Dr. Drake, that Johnson was ignorant of this anticipation of title. Only one copy has escaped the ravages of time, and is now in the British museum. To what extent this paper was carried is unknown.

1713, Feb. 14. *Died*, Anthony Ashley Cooper, third earl of Shaftesbury. He was born February 26, 1671, and during the reign of queen Anne attracted much attention by his numerous publications concerning the operations of the human mind, the most of which were collected into one work, entitled *Characteristics of Men, Manners, Opinions, and Times*, in three volumes, published immediately after his death, which occurred at Naples. The style of Shaftesbury is elegant and lofty, but bears too many marks of labour to be agreeable, and is slightly tinged with scepticism regarding revelation, and, upon the whole, is somewhat fantastic; though, for a number of years, no book was more universally admired, or more generally read than Shaftesbury's *Characteristics*. Thomson appears enraptured with the philosophy of this nobleman, in the following character which he has drawn of him:—

The generous Ashley thine, the friend of man;  
Who scan'd his nature with a brother's eye,  
His weakness prompt to shade, to raise his aim,  
To touch the finer movements of the mind,  
And with the moral beauty charm the heart.

1713, Feb. 15. *Died*, WILLIAM HARRISON, author of the *Tatler*, volume the fifth (see page 600, ante), in which he was assisted by Swift, and the occasional assistance of Henley and Congreve. It consists of fifty-two numbers; the first appeared Jan. 13, 1711, and the last May, 19, following. It is chiefly valuable for the light occasionally thrown on the history of the genuine *Tatler*. Mr. Harrison was educated at Oxford, and settling in London, obtained the friendship of Swift, who much befriended him in his last sickness. He died at a very early age.

1713. Lintot gave Mr. Pointer £10 15s. for his *Chronological History*.

1713, April 7. Joseph Addison received from Tonson the sum of £107 10s. for the copyright of the tragedy of *Cato*. First acted at Drury-lane theatre on the 14th of the same month.

At the time when *Cato* was produced upon the stage the whole nation was on fire with faction. St. John (Bolinbroke) was waging a crusade against the liberty of the press, which tended to increase the virulence of the writers of the opposition. The whigs applauded every line in which liberty was mentioned, as a satire on the tories; and the tories echoed every sound of applause to show that the satire was unfelt. When it was printed, notice was given that the queen would be pleased if it were dedicated to her; "but, as Addison had designed that compliment elsewhere, he found himself obliged, by his duty on the one hand, and his honour on the other, to send it into the world without a dedication." At the publication "the wits seemed proud to pay their attendance with encomiastic verses;" but *Cato* had yet other honours. It was censured as a party play by a scholar of Oxford, and defended in a favourable examination by Dr. Sewell. It was translated by Salvini into Italian, and acted at Florence; and by the Jesuits of St. Omer's into Latin, and played by the pupils.

1713, May 7. Nicholas Rowe received of Lintot the sum of £50 15s. for the tragedy of *Jane Shore*; and in the following year Rowe received the sum of £75 5s. for his tragedy of *Jane Grey*. Lintot paid Dr. Sewell £1 1s. for writing *Observations on Jane Shore*.

1713, May 19. The vice-chancellor of Oxford grants his *imprimature* for the publication of Dr. Young's poem of the *Last Day*.

1713. *Died*, HENRY HILLS, printer, in Black Fryars, London. He was printer to Oliver Cromwell, Charles II. and James II. and served the office of master of the stationers' company, in 1684. This Henry Hills and Thomas Newcomb were for a short time (from January 10, 1709) printers to queen Anne, under a reversionary patent for thirty-four years granted December, 1665, on the expiration of a patent then held by the Barkers, in which family it had continued from the reign of Elizabeth. In the *Evening Post*, November 12, 1713, there is the following advertisement. "Mr. Henry Hills, printer, in Black Fryars, being dead, his stock, consisting of the most eminent *Sermons, Poems, Plays, &c.* is now to be disposed off, at the Blue Anchor, Pater Noster Row.—N.B. There can never be any of the same, or any in like manner, reprinted after these are gone, there being an act of parliament to the contrary." He was a great retailer of cheap printed sermons and poems, which he pirated, and printed upon bad paper.

Then *Pirate Hills'* brown sheets and sorry letter.

In 1710, he pirated Addison's *Letter from Italy*, and this, with other circumstance of the like kind, led to the direction in the act of 8 Anne, that *fine paper copies* should be given to the public libraries.

The following epigram was written upon his doing penance, in the reign of James II.

Penance enjoind, durst Hill refuse  
To trudge five miles with peas in's shoes?  
No—bid to fast, the sly sinner  
Resolved to stand upon his dinner;  
So bold'd his penitential peace  
To give both feet and conscience ease;  
And then his churches rule to keep,  
In soup did penance ankle deep.  
Hence an arch wag this inference draws:  
What need we fear a dying cause?  
'Tis plain long since that crafty Hill  
The pulse of popery could not feel.  
*Prize Epigram.—Gent.'s Mag. March, 1736.*

Gillam Hills, his son, was also a printer, and died Oct. 18, 1737.

1713, Sept. 6. Died, JOHN DYER, author of a news letter called by his name; but which was discontinued after his death. In the *Flying Post* of the 19th of the same month appeared a most ludicrous epitaph on Mr. Dyer.

Dunton says, "Mr. Dyer, lately deceased, was also a partner with Mr. Merreal.\* He was a fair dealer and a pious man; he knew the falseness of the world, and though he could see but with one eye, had learnt to trust himself always; others, so far as he might not be damaged by their disappointment. I bought a good deal of paper of him—and found by his candid treatment, he had white hands and a clean soul; and I do not fear but Mr. Dyer is now in heaven."

Robert Dyer, esq. a grandson of the above, died in Gray's-inn, September 4, 1748, and left £20,000 to Christ's hospital.

1713, Oct. The Clarendon Printing House, at Oxford, opens upon this day. It had been built with the profits arising from Lord Clarendon's *History of the Rebellion*. The copyright had been presented to the university by the son of the noble author. The first sheet worked off was signature z in the third alphabet of Leland's *Collectanea*, then being published by Hearne. The imprint, *E Theatro Sheldoniano*, was not left off until after the year 1759, although the university books ceased to be printed there from the time of the completion of the Clarendon.

1713, Jan. 6. *Britain*, No. 1.

1713, March 12. *The Guardian*, No. 1. It was during the temporary suspension of the *Spectator*, that Steele, with the same assistance, issued the *Guardian*, which extended to 175 numbers, or two volumes. It ranks between the *Spectator* and *Tatler*. The title was of too grave a cast.

1713, May 26. *Mercator*; or, Commerce Retrieved, No. 1. So general had become the taste for periodical composition, that even subjects of a commercial as well as a political nature, were conceived capable of being published to advan-

tage in this way. *Mercator* was soon followed by other papers of the like nature.

1713, April 30. *Reconciler*, No. 1. On the 18th of May, two numbers of this paper were published at once (a sheet and a half,) Nos. X and XI. to evade the Stamp-duty.

1713, Oct. 6. *Englishman*, being the Sequel of the *Guardian*, No. 1. The chief purport of this publication was to illustrate and defend the measures and principles of the Whigs, and to point out the infinite importance of the protestant succession to the peace and welfare of the kingdom. This paper continued two years.

Whilst yet employed upon the composition of the *Englishman*, Steele was induced, to promote the same views, to publish a pamphlet entitled *the Crisis*, which so offended the tory party, that on March the 12th, 1714, Mr. John Hungerford brought a complaint before the house, against certain paragraphs inserted in two numbers of the *Englishman* and the *Crisis*, published under the name of Richard Steele, and calculated to promote sedition, to asperse the character of her majesty, and arraign the conduct of her administration. After a prolonged debate, and a veritable defence by Steele, the influence of the ministry prevailed, and the house "Resolved, that RICHARD STEELE, ESQ. for his offence in writing and publishing the said scandalous and seditious libels, be expelled this house."

Soon after this event, dean Swift published (anonymously) *The public Spirit of the Whigs set forth in their generous encouragement of the author of the Crisis*. 8vo. On the first publication of this pamphlet all the Scotch lords then in London, went in a body and complained to queen Anne of the affront put on them and their nation, by the author of this treatise whereupon proclamation was published by her majesty, offering a reward of £300 for discovering the author; and Mr. John Barber, the printer, and Mr. Morphew, the publisher, were both taken into the custody of the black rod.

1713, Nov. 16, *Lay Monk*, No. 1. This work was by sir Richard Blackmore,\* and published on Monday, Wednesday, and Friday; it having

\* Sir Richard Blackmore was a most indefatigable writer, whose numerous compositions may be arranged under the heads of medical, poetical, theological, and miscellaneous. He was the son of an attorney in the county of Wiltshire, and, after the usual routine, was entered at Edmund Hall, Oxford, where he resided thirteen years. His first employment was that of a schoolmaster, which he soon relinquished for the study of physic, in which he acquired considerable celebrity, and was created a fellow of the royal college of physicians in 1667. In 1669 he was appointed physician in ordinary to king William, and knighted; he held the same office to queen Anne. He died in October, 1729, after a long life of industry, piety, and unblemished reputation. His principal work was his *Creation*, a philosophical poem, which appeared in 1713, in seven books, of which both the matter and style have been highly commended by Addison and Johnson; the latter affirming, that "this poem, if he had written nothing else, would have transmitted him to posterity among the first favourites of the English muse." The admiration which the works of Blackmore once enjoyed, is not wholly to be attributed to the low state of public taste, but in a great measure to the spirit of party. He being a zealous Whig, and a friend of the king, who knighted him, it became a kind of political duty with one party to read and praise his works, while another heartily despised them.

\* "He is rich, yet very humble. He has been put up for sheriff, yet this honour does not make him scornful and impetuous, but rather like the fixed stars,—the higher he is the less he desires to seem. His face, his carriage, his habit, savour of humility. He was the first stationer I ever dealt with:—in trading with him for twenty years, I ever found him just and kind.—It is a question whether he is more his chapman's friend or his own.—and to conclude his character, he is so naturally good, if there were no heaven, yet Alexander Merreal would be a virtuous man."—Dunton. His residence was at the sign of the Rose, in Bread-street.

reached forty numbers, expired Feb. 15, 1714. In the same year it was republished in one vol. under the title of the *Lay Monastery*, and passed through a second edition in 1727. Sir Richard Blackmore was assisted by Mr. Hughes, who wrote all the Friday papers.

1713, Dec. 14. *Died*, THOMAS RYMER, a celebrated antiquary, and historiographer to king William III. It was in the councils of this king that it was first determined to print authoritatively the public conventions of Great Britain with other powers. The first volume, commencing with the documents of the year 1201, was published in 1704. This valuable collection of the *Fœdera*,\* in twenty volumes, continued from the death of Rymer, by Mr. Sanderson, will be a lasting monument of his industry and abilities. It was abridged by Mr. Rapin, in French, in *Le Clerc's Bibliothèque*, and a translation of it by Stephen Whatley, was printed in four volumes 8vo. 1731. It is a lamentable fact that Mr. Rymer was compelled to sell his library to support himself.—Peter Le Neve, in a letter to the earl of Oxford, says, "I am desired by Mr. Rymer, historiographer, to lay before your lordship the circumstances of his affairs.—He was forced some years back to part with all his choice printed books, to subsist himself; and now, he says, he must be forced, for subsistence, to sell all his manuscript collections to the best bidder, without your lordship will be pleased to buy them for the queen's library. There are fifty volumes in folio, of public affairs, which he has collected but not printed. The price he asks is £500." These manuscripts have since been placed in the British museum, and form no inconsiderable addition to that invaluable repository of legal and antiquarian knowledge. He was born in the north of England, and educated at the grammar school, at Northallerton, in Yorkshire, from whence he went to Sidney college, Cambridge. On quitting the university, he became a member of Gray's-Inn; and succeeded Mr. Shadwell as historiographer to king William III. He also became an early member of the society of antiquaries.†

In the compilation of the *Fœdera*, Rymer's first warrant was signed "Marie R." (the king being then in Flanders), empowering him to

\* Among the many valuable works consumed at Mr. Bowyer's fire, the fifteenth volume of this work was destroyed; and so violent were the flames, that immense torrents of melted types poured down from the upper rooms in all directions. I have a small lump of metal, dug out of the ruins; which, by having been compressed between two solid substances, exhibiting on its opposite sides an impression of a few lines of this volume of Rymer in *crus* and *relievo*.—See *Rome More's Dissertation on Typographical Founders*.

† The society of antiquaries may be traced to the time of Elizabeth, when archbishops Parker and Whitgift laid the foundation of the study of antiquities in this country. But the times were not sufficiently favourable to keep it alive from the sixteenth to the beginning of the eighteenth century, when it was revived with the greatest lustre, by many of the greatest names in that walk of literature; and under royal protection, it has maintained some degree of eminence. The charter of incorporation of the present society is dated November, 1731. They hold their anniversary meeting on St. George's day.

search the public offices for this undertaking, is dated Aug. 26, 1693; was renewed by king William, April 12, 1694; and again by queen Anne, May 3, 1707, when Mr. Sanderson was joined to him in his undertaking. Rymer wrote *Edgar, or the English Monarch*, an heroic tragedy, 1678; several poems and translations; and *A View of the Tragedies of the last Age*, which occasioned those admirable remarks preserved in the preface to Mr. Colman's edition of Beaumont and Fletcher, and since by Dr. Johnson, in his *Life of Dryden*.

1714, Jan. 11. A proclamation was issued offering a reward of £1000 to any person who should discover the author, and £500 for the printer of a pamphlet entitled *English advice to the Freeholders of England*. Bishop Atterbury was suspected of being the author; though Mr. Hornby, a barrister, was taken into custody.

1714. The earliest known work printed in NOTTINGHAM, bears for title *Inn-Play, or the Cornish-Hug Wrestler*, 4to. By Sir Thomas Parkyns.\* Printed by William Ayscough, on the west side of Bridlesmith-gate. Mr. Ayscough was remarkable, says Deering, in his *History of Nottingham*, for having first established the art of printing in that town about the year 1710. Mr. Ayscough being unfortunate in business, he retired, about 1715, to Bramcote, where he died, and was buried in St. Peter's church, in Nottingham. In the south aisle, upon a tombstone, is the following inscription:

Here lies the bodies of William Ayscough, printer and bookseller of this town, and Anne his wife. She was the daughter of the Rev. Mr. Young, rector of Catwick, in the county of York. He died March 2, 1719. She died Dec. 16, 1732.

1714. JAMES BLOW first practised the art of printing in BELFAST, where he printed the works of sir David Lindsay, a Bible, Prayer Book, Psalms in metre, and twenty or thirty other books.

1714. The Rev. HILKIAH BEDFORD was tried in the court of king's bench, and fined one thousand marks, and to be imprisoned three years, for writing, printing, and publishing the *Hereditary Right of the Crown of England asserted*, folio; the real author of which was the Rev. George Harbio, a nonjuring clergyman. Mr. Bedford, though not the author of the book, submitted to be thought so, from zeal to the cause, and for affection to the real author. Besides the Latin *Life of Dr. Barwick*, which he afterwards translated into English, Mr. Bedford published a translation of Fontenelle's *History of Oracles*.

He died at London, Oct. 26, 1724, and was buried in the church-yard of St. Margaret's, Westminster. He was descended from Hilkiah Bedford, of Sibsey, in Lincolnshire, a quaker, who went to London, and settled there as a stationer between the years 1600 and 1625.

\* Sir Thomas Parkyns, bart. died at Bunby, Nottinghamshire, Feb. 29, 1741. He was founder of the present noble house of Ranelagh.

1714, Aug. 1. *Died, QUEEN ANNE.* In person Anne was of the middle stature, she had regular features, but her countenance was more pleasing than handsome. As a sovereign she wanted firmness; her disposition was gentle, and she relied too much on the opinions of others, which rendered her conduct vacillating, according as her advisers changed their systems of intrigue. She possessed private virtues and excellent qualities, of which mercy was so preeminent, that she never permitted a subject to suffer for treason during her reign; but she was indebted to the times in which she lived for the character she sustained. The splendid victories of her generals were calculated to render her popular, and the able talents of several of her ministers attracted the attention, and in a great measure, controlled the events of Europe. During her reign three parties agitated the kingdom; these were, the jacobites, the tories, and the whigs.

Anne was born at the palace of St. James's, February 6, 1665. She was married to prince George of Denmark, by whom she had six children, who all died young. He was "of a familiar disposition, with a good sound understanding, but modest in showing it; very fat, loved news, his bottle, and the queen." He died October 28, 1708.

Though the reign of queen Anne has been generally termed the Augustan age of literature in this kingdom, owing to the co-existence of a few celebrated writers, it is astonishing how little, during the greatest part of that period, was the information of the higher and middle classes of society. To the character of the gentleman, neither education nor letters were thought necessary; and any display of learning, however superficial, was, among the fashionable circles, deemed rudeness and pedantry. "That general knowledge," observes Johnson, "which now circulates in common talk, was then rarely to be found. Men not professing learning were not ashamed of ignorance; and in the female world, any acquaintance with books was distinguished only to be censured." When we reflect, that to express contempt for all literary acquirement was then a certain proof of gentility, and ignorance the characteristic of superior station, a statement which, previous to the publication of the *Tatler*, of Steele, is nearly correct, we ought to hesitate in assigning the epithet of Augustan to this era of our history. We should recollect that two-thirds of the reign of Anne were entirely occupied by politics; that the struggles of faction, the inveterate contentions of the whigs and tories, banished for many years, even among the learned, almost all attention to useful and elegant pursuits; and that the commencement of taste, and the diffusion of knowledge, may be dated from the well-timed efforts of Steele and Addison, efforts which illuminated but the latter days of Anne, and were independent of any encouragement from the throne. From this time only has the public mind been powerfully excited to intellectual emulation, and gradually has it acquired that polish and intimacy with

literary subjects which distinguish the present age. It is solely indeed to a nation that has long cherished a strong relish for literature in all its departments, whose taste is correct and pure, and which fosters in her bosom every rising genius, that the title of Augustan can be given, and not to the casual appearance of a few luminaries, surrounded by wastes of interminable darkness. The reign of Anne produced Addison, Arbuthnot, Atterbury, Burnet, Congreve, Mrs. Centlivre, De Foe, Farquhar, Flamsteed, Garth, Gay, Keil, Pope, Prior, Rowe, Ray, Allan Ramsey, Steele, Swift, Wollaston, and Wycherly, writers of a high degree of excellence, and, in most cases, may be considered extraordinary.

When Anne's prudent hand the sceptre sway'd,  
And Oxford lent the drooping muses aid;  
By him inspired, see all the tuneful train  
In Britain's glorious sons revive again!  
Prior like Horace strikes the trembling strings,  
And in harmonious Pope again great Maro sings.  
*Somee Jengus.*

That extension of mental light, which was first happily effected by our periodical essayists, and which has by degrees led to the brilliancy we now enjoy, had been for a long time intercepted by the dissolute and licentious manners which the court of Charles II. had introduced, and which continued for several years after the commencement of the eighteenth century, though in a less virulent manner, to pollute the channels of public decency, and to choke the germs of intellectual excellence. The theatre, that powerful regulator of the general tone of thinking and of acting, had given birth to a host of writers educated in the school of Charles, and whose talents were employed to vitiate all the sources of morality, to inculcate debauchery as a duty, and to tinge the grossness of vice with the colours of imagination and wit. The dramas of Dryden and Wycherly,\* of Farquhar,† and of Vanbrugh,‡ were the panders of lewdness and profligacy. The usual fine gentleman of their

\* William Wycherly was born in 1646; and besides four plays, he published a folio volume of poems. His plays were for a long time popular, but are now neglected. He had some wit and power in delineating character; but all his merits are lost in the coarse licentiousness of every thing which he wrote. He died at London, Jan. 1, 1706.

† George Farquhar was the son of a clergyman, the north of Ireland, and was first a player, and then a lieutenant in the army. He wrote with great ease and humour, and is scarcely inferior to Congreve. His last and best play was the *Beaus Stratagem*, which he wrote in six weeks, under the depression of a rooted illness. This comedy enjoyed a successful run, and kept large audiences in roars of laughter, while its unhappily and still youthful author was stretched on a death-bed, rendered more distressing to him by the reflection that he was about to leave two daughters unprotected. He died in London, April 26, 1707, and was buried in St. Martin's church. He received the following sums from Lintot, the bookseller: 1701, *Letters and Poems*, £3 4s. 6d.; 1703, *Two Rivals*, £15; 1705, *Recruiting Officer*, £12 2s. 6d.; 1706, *Beaus Stratagem*, £30.

‡ Sir John Vanbrugh, a dramatic writer and architect, was born in Cheshire. His principal comedies are the *Provoked Wife* and the *Provoked Husband*, which last is an admirable comedy in every respect. In his latter years he became an architect, and had the honour of designing Blenheim house, at Woodstock, for the duke of Marlborough. He died in London, March 26, 1726.

comedy was an unprincipled villain, to whom seduction and adultery, extravagance and ingratitude, and an utter contempt for every thing sacred and serious, are apportioned by the poet as the most splendid ornaments he can bestow upon him, and for the adroit employment of which he is gratified by success, and rewarded by beauty.

The model was but too faithfully copied in real life. He who aspired to reputation in the circles of gallantry assumed that laxity of morals and looseness of manners which he had so frequently contemplated and admired upon the stage; whilst to be known to have devoted any leisure to the duties of devotion, to the study of the classics, or the acquisition of science, would have ruined him for ever in the estimation of the fashionable world. Nor after all these sacrifices at the shrine of dissipation and vice, were the accomplishments and address of these gentlemen entitled to the praise of either refinement or grace. On the contrary, their manners were coarse, their conversation obscene, and their amusements frequently so gross, that bull-baiting, bear-baiting, and prize-fighting, were considered as appropriate recreations for the highest ranks; "they were not only attended," remarks an annotator upon the *Tatler*, "by butchers, drovers, and great crowds of all sorts of mob, but likewise by dukes, lords, knights, squires, &c. There were seats particularly set apart for the quality, ornamented with old tapestry hangings, into which none were admitted under half a crown at least. The neighbourhood of these amusements was famous for sheltering thieves, pickpockets, and infamous women; and for breeding bull-dogs."

If such were the general manners of men, who esteemed themselves exclusively entitled to the appellations of fashionable and well bred, it might naturally be supposed, that the fair sex were not more seriously disposed, or more solidly accomplished. In the dramatic writings of the day, for the most part a just picture of the times, they are by no means favourably drawn; levity, immodesty, and infidelity, together with an intemperate love of frivolous pursuits, are their usual characteristics. It is to the honour of the sex, however, that we can with truth call these draughts highly overcharged, and in a great measure the caricatures of a licentious and debauched imagination. At a period, indeed, when literature was so little diffused, and when to read with fluency, and spell with correctness were, among the ladies, deemed rare and important acquisitions, much information or acquired knowledge in the female world could not be expected, and one of the best educated ladies of her day, of the first taste and understanding, is represented by Addison as exclaiming, "You men are writers, and can represent us women as unbecoming as you please in your works, while we are unable to return the injury;" an acquiescence in, and confession of, inability, to which the accomplished women of the present day are no longer under the necessity of submitting.

After this brief sketch of the national manners, and of the low state of literature among the people at large, during the chief part of the reign of Anne, should we pause to consider what were really the merits of those who professed the acquirements of study, the authors of the same period we shall find, notwithstanding the examples of the preceding century, of a Barrow, a Dryden, a Milton, a Temple, and a Tillotson, that their language was, in general, unharmonious, and inaccurate, clogged with barbarisms, provincial vulgarisms, and cant phraseology; and that, with the exception of Swift, whose composition was for that age comparatively pure and correct, we possessed scarcely a specimen of good style, from the death of Tillotson, in 1694, to the appearance of the *Tatlers*. One great cause of this defalcation, as has been hinted before, is to be attributed to the warmth of political contest, which at that time universally agitating and heating the minds of men, withdrew their attention from every pleasing topic, and from all consideration as to beauty of thought or felicity of expression, planting in their place the bitter fruits of rancour, envy, and contention. Hence arose that rough, strong, but slovenly diction, which pervaded almost every political pamphlet, and was at length employed on subjects demanding a very different style; nor was a perfect specimen given of what highly polished composition could effect on topics connected with government, until the admirable *Freeholder* was presented to the world, whose simple elegance and humour, adorning the most thorny paths of party dispute, contributed more than weight of argument to its ultimate popularity and success.

Another cause equally powerful in retarding the acquisition of a graceful and perspicuous style, was the little attention which, previous to the tasteful models of Addison, was paid to criticism, and to the grammatical and analogical construction of language. Dryden, it is true, had written his prefaces in a rich and varied, though not a very correct, manner; but they were too desultory and contradictory to afford many just rules for the attainment of an accurate style, and were, indeed, chiefly employed in delivering precepts for epic, dramatic, and satiric compositions. English poetry had been enriched by the most splendid monuments of genius, by the dramas of Shakspeare and the epopeia of Milton; but English prose had yet much to acquire from the labours of the critic, the grammarian, and the lexicographer.

1714. *The Rudiments of the Latin Tongue; being an easy Introduction to Latin Grammar.* By Thomas Ruddiman. Printed at Edinburgh by Robert Freebairn, and entered at stationers' hall, London, for Andrew Bell,\* March 26, 1715.

\* Mr. Andrew Bell is one who manages the common business of life with very good success. He had the good fortune to strike in with my proposal of the *Milænius Oracle*, and I am heartily glad he has found so much life in the ashes of Old Athenæ. So far as I have had any concern with him, I have found him not only just, but grateful.—Dunton.

This work will transmit the name of Ruddiman with celebrity to every age, as long as the language of Rome shall continue to be taught in the schools of Scotland. Philology had not been much cultivated in the northern parts of Britain, before Ruddiman appeared. In Chalmers' *Life of Ruddiman*, (Appendix No. 4.) is a chronological list, drawn up by T. Ruddiman, of such grammars as had been written by Scotchmen.

1714. *Sept. Died*, THOMAS BRITTON, known as the musical small coal man, and for his extraordinary acquirements in chymistry, music, and knowledge of books. He was born at or near Higham Ferrars, in Northamptonshire; and went to London, where he bound himself apprentice to a small coal man, and when out of his time, set up for himself in the same line, in Clerkenwell, and by the prudence of his deportment, obtained the friendship of some of the most eminent literary characters of the day.

Britton's skill in ancient books and manuscripts is mentioned by Hearne; and in his preface to his edition of *Robert of Gloucester*, he refers to a curious manuscript copy of that historian in Britton's possession. The means used by him and other collectors of ancient books and manuscripts about this time, were as follow, and these include an intimation of Britton's pursuits and connections.

About the beginning of this century, a passion for collecting old books and manuscripts reigned among the nobility. The chief of those who sought after them were the duke of Devonshire, Edward, earl of Oxford, and the earls of Pembroke, Sunderland, and Winchelsea. These persons in the winter season, on Saturdays, the parliament not sitting on that day, were used to resort to the city, and, dividing themselves, took several routs, some to Little Britain, some to Moorfields, and others to different parts of the town, inhabited by booksellers: there they would inquire into the several shops as they passed along for old books and manuscripts; and some time before noon would assemble at the shop of Christopher Bateman, a bookseller, at the corner of Ave-Maria-lane, in Paternoster-row; and here they were frequently met by Bagford and other persons engaged in the same pursuits, and a conversation always commenced on the subject of their inquiries. Bagford informed them where any thing curious was to be seen or purchased, and they in return obliged him with a sight of what they from time to time collected. While they were engaged in this conversation, and as near as could be to the hour of twelve by St. Paul's clock, Britton, who by that time had finished his round, arrived clad in his blue frock, and pitching his sack of small coal on the bulk of Mr. Bateman's shop window, would go in and join them; and after a conversation, which generally lasted about an hour, the noblemen above mentioned adjourned to the Mourning Bush, at Aldersgate, where they dined and spent the remainder of the day.

The singularity of his character, the course of studies, and the collections he made, induced

suspicious that Britton was not the man he seemed to be: and what Mr. Walpole says as to this particular is very true; some thought his musical assembly only a cover for seditious meetings; others for magical purposes; and that Britton himself was taken for an Atheist, Presbyterian, or a Jesuit; but these were ill-grounded conjectures, for he was a plain, simple honest man, perfectly inoffensive, and highly esteemed by all that knew him; and, notwithstanding the meanness of his occupation, was called Mr. Britton; and was so much distinguished, that, when passing through the streets in his blue linen frock, and with his sack of small coal on his back, he was frequently accompanied with the following expressions, "There goes the famous small coal man, who is a lover of learning, a performer in music, and a companion for gentlemen."

Britton was in his person a short thick-set man, with a very honest, ingenious countenance. There are two pictures of him extant, both painted by Mr. Woolaston, and from both there are mezzotinto prints. The following lines were written under a picture done after his death:

Though mean thy rank, yet in thy humble cell  
Did gentle peace and arts unpurchased dwell;  
Well pleased Apollo thither led his train,  
And music warbled in her sweetest strain.  
Cylennus so, as Fables tell, and Jove  
Came willing guests to poor Philomen's grove.  
Let useless Pomp behold, and blush to find  
So low a station, such a liberal mind.

His death was occasioned by a trick played upon him by Samuel Honeyman, a blacksmith who was famous as a ventriloquist. This man was introduced to Britton, by a Mr. Robe, justice, for the purpose of terrifying him, and he succeeded in it: Honeyman, announced, as from afar off, the death of poor Britton within a few hours, with an intimation that the only way to avert his doom was for him to fall on his knees and say the Lord's prayer. Britton did as he was bid, went home and took to his bed, and in a few days died, leaving his friend Mr. Robe to enjoy the fruits of his mirth.

Besides his books, he left a very large collection of manuscript and printed music and musical instruments. His effects were sold by auction, and realized a considerable sum for the benefit of his widow. Lord Somers gave £500 for his collection of pamphlets; and sir Hans Sloan was also a purchaser of many curious articles.

1714, Jan. 4. *Balm of Gilead*, or the Healer of Divisions, No. 1, printed by J. Mayo, and sold by Frederick Burtleigh, at Amen-corner.

1714, Jan. 25. *British Merchant*, or Commerce preserved; in Answer to the *Mercator*, or Commerce retrieved, No. 22.

1714. *The Waives of Literature*. This was the first critical journal in England, and continued till the year 1722.

1714, Feb. 25. *The Lover*, written in Imitation of the *Tatler*, by Marmaduke Myrtle, Gent. This was the production of Steele, and published thrice a week. It ended May 27, in 40 Nos.

1714, March 22. *Patriot*, No. 1. In No. 125, Jan. 22, 1715, the author of this paper takes leave of the town; and avows his name to be John Harris, a young man who had not then seen two and twenty years.

1714, April 22. *The Reader*, No. 1. This was another periodical by Steele, and commenced in opposition to the *Examiner* of Swift, which continued with unabated zeal to blazon forth the virtues of the tory administration, and to calumniate the merit of its opponents. Both the *Lover* and the *Reader* received the assistance of Addison; and the latter work reached but nine numbers, ending May 10.

1714, April 22. *Monitor*, No. 1. The second number of this paper gives the following brief account of the names and titles of such of the pamphlets and weekly papers as were then, or had lately been, flourishing in this nation; that is to say, "Prints: *Guardian*, *Englishman*; (defunct.) From the ashes of which (phœnix-like) are risen, the *Lover*, *Patriot*, *Merchant*, *Flying Post*, *Daily Courant*, *Examiner*, *Post-boy*, *Mercator*, *Weekly Pacquet*, *Dunton's Ghost*. The authors of those prints and pamphlets: Mr. George Ridpath and Co.; Mr. Samuel Buckley, the learned printer; Mr. Toland, a Socinian heretic; Mr. Collins, Freethinker; Mr. Steele, a gentleman born;

Tantò major Famæ sitis est, quàm Virtutis.—Juv.

Mr. Asgill, a Lawyer going to heaven by fire; Mr. John Dunton, lunatick; Mr. Abel Roper and his man Toby: with divers others utterly unknown."

1714, May 1. *High German Doctor*, No. 1. Ended May 12, 1715.

1714, May 5. *The Muscovite*, No. 1.

1714, Oct. 8. *The Controller*, being a Sequel to the *Examiner*, No. 1.

1714, Dec. 6. *N. Mist's Weekly Journal*, No. 1.

1714. *Norwich Courant*, or Weekly Packet, printed by Mr. Collins, price three halfpence.

1715, March 17. *Died*, GILBERT BURNET, bishop of Salisbury. He was born at Edinburgh, September 18, 1743, where his father was an advocate of reputation, and nephew of Johnston of Warriston, one of the principal popular leaders of the civil war in Scotland. Gilbert Burnet received his education at Edinburgh and Aberdeen, and afterwards went to Holland to study the Hebrew language. In 1679 appeared the first volume of his *History of the Reformation*, for which he received the thanks of parliament. This work he afterwards completed in three volumes. His work entitled *A History of My own Times*, which was not printed till the year 1724, gives an outline of the events of the civil war and commonwealth, and a full narration of all that took place from the restoration to the year 1713, during which the author had advanced from his seventeenth to his seventieth year. Under various circumstances, Burnet had personally known the conspicuous characters of a century, and penetrated most of the state

secrets nearly as long. He wrote many other works in history, biography, and theology. After entering life as a clergyman of his native church, Burnet removed to a benefice in London, where, partly by his talents, and partly through forward and officious habits,\* he rendered himself the confidant of many high political persons. Exiled by the Stuarts, he became serviceable in Holland to the prince of Orange, accompanied the expedition which brought about the revolution, and was rewarded by king William with the bishopric of Salisbury. He was twice married; first to a Dutch lady, who died in 1693, and soon after was united to Mrs. Berkley.

1715, May 18. Susannah Centlivre† received from Mr. Curll twenty guineas in full for the copy of the comedy of the *Wonder*; or, a *Woman keeps a Secret*.

1715. *The Common Prayer Book* was engraved upon copper-plates;‡ by Mr. Sturt, and is one of the most beautiful examples of genius and industry in the world: every page has a border, and head and tail ornaments.

Mr. Sturt was born in 1648, and learnt the art of engraving under Robert White.§ In 1704 the rev. Samuel Wesley|| published the *History of the New Testament, representing the Actions and Miracles of our Blessed Saviour and his Apostles*, attempted in verse, and adorned with 152 engravings, in three volumes 12mo. These engravings were executed by Mr. Sturt. A third edition of this work appeared in 1717, in one volume 8vo, printed by R. B. for Thomas Ward, Inner Temple lane.

\* "Dr. Burnet, that arch-villain," saith Fountainhall, "attends the Rye House conspirators, captains Walcot, Rose, and Hone, at their execution, but was checked for penning their speeches, July 30, 1613."

† Susannah Freeman was the daughter of a Lincolnshire gentleman, but supposed to have been born in Ireland about 1667. After a life of extraordinary adventure, she became a writer for the theatres, and appeared upon the stage. Her principal plays are the *Bury Body*, performed in 1708, and sold to Lintot the bookseller, for £10. The character of Marplot, in this comedy, is one of the most memorable portraits in the whole range of the English drama. *The Wonder*; or, a *Woman keeps a Secret*, appeared in 1714. Besides her dramatic pieces, she wrote poems and letters. In 1706 she was married to Mr. Centlivre, yeoman of the mooth to queen Anne. She died at London, December 1, 1723, and was buried in St. Martin's in the Fields.

‡ Mr. Sturt published a *Common Prayer Book*, all of which was engraved on silver plates. Unfortunately, however, it did not sell; and poor Sturt became seriously alarmed, and took every body's advice (as usual) as what was to be done. It was at length determined to take off a number of copies privately, and then to cut the plates up publicly. After this, the hoarded copies being brought out stealthily, one by one, as particular favours, fetched greater prices. Such are the attractions and tricks in the world of connoisseurs.—*Noble's Graving*.

§ Robert White was born in London 1645, and was a pupil of David Loggan's. He engraved the first *Oxford Almanack*, in 1674, *Monckes Funeral*, and a great number of English heads. He died in 1704.

|| Father of John and Charles Wesley, the two celebrated founders of the methodists. He was rector of Epworth, in Lincolnshire, where he died, April 23, 1735. Mr. Wesley was a very voluminous author; and though his poetry was far from being excellent, he made amends for it by the goodness of his life. John Dunton, who was nearly related to him by marriage, says,

"He loves too much the Heliconian strand,  
Whose stream's unfurrowed with the golden sand."

4 G

1715, April 18. Messrs. Watson and Mawson apprehended for printing a paper containing reflections on the king's speech; and — Kelsey also taken up for dispersing the same.

1715. BARNARD LINTOT,\* JACOB TONSON, and WILLIAM TAYLOR, were appointed printers of the votes to the house of commons, by the Hon. Spencer Compton, then speaker. They held this office till 1727.

1715. *Εἰκὼν Μικροβιβλίου*; sive *Icon Libellorum*; or, a *History of Pamphlets*,† tracing out their rise, growth, and different views of all sorts of small tracts or writings, both collectively and singly, in a general and gradual representation of their respective authors, collections of their several editions, &c. 8vo.† By a Gentleman of the Inns of Court. Myles Davies.

Myles Davies and his works are imperfectly known to the most curious of our literary collectors. He was a Welch clergyman, of the most fervent loyalty to George I. and the Hanoverian succession; a scholar, learned in Greek and Latin, and skilled in all the modern languages. Quitting his native country in disgust, he changed his character in the metropolis, for he subscribes himself "conseller at law." In an evil hour he commenced author, not only surrounded by his books, but with the more urgent companions of a wife and family; and with the child-like simplicity which sometimes marks the mind of a retired scholar, we perceive him imagining that his immense reading would prove a source, not easily exhausted, for their subsistence. By his account, "The avarice of booksellers, and the stinginess of hard-hearted patrons, had driven him into a cursed company of door-keeping herds, to meet the irrational brutality of those uneducated, mischievous animals called footmen, house-porters, poetasters, mumpers, apothecaries, attorneys, and such like beasts of prey," who were, like himself, sometimes barred up for hours in the menagerie of a great man's antichamber. In his addresses to doctors Mead and Freind he declares, "My misfortunes drive me to publish my writings for a poor livelihood; and nothing but the utmost necessity could make any man in his senses to endeavour at it in a method so burthensome to the modesty and education of a scholar." For further particulars of this extraordinary writer, and of his hard fate, see the *Calamities of Authors*, vol. i. pp. 67-80.

1715, June 24. Died, JOHN PARTRIDGE (if that was indeed his real name,‡) had the fortune to procure a ludicrous immortality, by attracting the satire of dean Swift. He was the author of various astrological treatises; and the editor of an almanack, under the title of *Martinus Liberaturus*. Swift, in ridicule of the whole class of impostors, and of this man in particular, published his celebrated *Predictions for the year*

1708, by Isaac Bickerstaff,\* Esq.," which among other prognostications, announced, with the most happy assumptions of the mixture of caution and precision affected by these annual soothsayers, an event of no less importance than the death of John Partridge himself, which he fixed to the 29th of March, about eleven at night. The wrath of this astrologer was, of course, extreme; and in his almanack for 1709, he was at great pains to inform his loving countrymen that squire Bickerstaff was a sham name, assumed by a lying, impudent fellow, and that, "blessed be God, John Partridge was still living, and in health, and all were knaves who reported otherwise."

There were two incidental circumstances worthy of notice in this ludicrous debate, which had been carried on by both parties: First, The inquisition of the kingdom of Portugal took the matter as seriously as John Partridge, and gravely condemned to the flames the predictions of the imaginary Isaac Bickerstaff. 2ndly, By an odd coincidence, the company of stationers obtained in 1709, an injunction against any almanack published under the name of John Partridge, as if the poor man had been dead in sad earnest. It is astonishing what a number of persons built their faith on the prediction, and actually believed the accomplishment had taken place, in all respects according to the relation. The wits of the time too, among whom were Steele and Addison, supported Swift, and uniformly affirmed that Partridge had died on the day and hour predicted. But the most memorable consequence of the predictions of Isaac Bickerstaff, was the establishment of the same name by Steele, in the *Tatler*. The following is the epitaph which was written by dean Swift, upon John Partridge.

Here, five feet deep, lies on his back  
A cobbler, star-monger, and quack;  
Who to the stars in pure good-will,  
Does to his best look upward still.  
Weep all you customers that use  
His pills, his Almanacks, or shoes:  
And you that did your fortunes seek,  
Step to his grave but once a week:  
This earth which bears his body's print,  
You'll find has so much virtue in't,  
That, I durst pawn my ears, 'twill tell  
What'er concerns you, full as well,  
As physic, stolen goods, or love,  
As he himself could, when above.

Little is known of Partridge's private history, except from an altercation betwixt him and one Parker, which, of course, involved much personal abuse. According to his adversary, Partridge's real name was Hewson, a shoemaker by trade, (which particular, at least, is undoubted,) but by choice a confederate and dependant of Old Gadbury, one of the greatest knaves who

\* Joshua Lintot, Jacob Tonson, Timothy Goodwin, and John Roberts, held the same appointment from 1706 to 1710, whilst sir Richard Onslow was speaker.

† For the meaning of the word pamphlet, see p. 188, ante.

‡ This rare book forms the first volume of the *Athene Britannice*.

\* Swift wanting a ludicrous name to adorn his predictions with, accidentally observed a sign over a locksmith's house, with the name of *Bickerstaff* underneath it. This struck him as adapted to his purpose, and adding the no very common name of *Isaac*, he imagined he had formed an unprecedented conjunction; in this, however, he was mistaken, for some time afterwards a man was found in London, who owned both names.

*Bickerstaff unbury'd Dead*; a melo drama, price one shilling. Published by Dodd. January, 1745.

followed the knaving trade of astrology. In 1679, Partridge commenced business for himself, and published two or three nonsensical works upon his imaginary science. He also practised physic, and styled himself Physician to his Majesty. But in king James's time, his almanacks grew so smart on Popery, that England became too hot for him; and accordingly, John Dunton found him, with other refugees, in Holland. He returned at the revolution, and married the widow of the duke of Monmouth's tutor, who finally deposited him in the grave, which had so long gaped for him, in this year, and adorned his monument, at Mortlake, in Surry, with a Latin epitaph, which states that he was born at Richmond, in Surry, January 18, 1644, and died in London, June 24, 1715.\*

1715, Jan. 3. *Spectator*, volume the ninth and last. This work was published twice a week, and terminated with the 61st number, on August 3, of the same year. It was conducted by Mr. William Bond, whose signature is affixed to a dedication to the viscountess Falconberg. Dr. Drake says he was "utterly disappointed in discovering a single paper in the smallest degree entitled to the appellation of witty." Bond wrote a poem in ridicule of Pope, and was rewarded for his temerity with a niche in the *Dunciad*.

1715, Feb. 14. *The Grumbler*, No. 1. This, which was a weekly paper, was probably the production of Duckett, and is alluded to in the following lines of the 4to. edition of the *Dunciad*.

Behold you pair in strict embraces joined;  
How like in manners, and how like in mind!  
Famed for good nature, *Burnet*, and for truth,  
Duckett for pious passion to the youth:  
Equal in wit, and equally polite,  
Shall this a *Paquin*, that a *Grumbler* write.

1715, Feb. 17. *The English Examiner*, No. 1.

1715, March. *The Edinburgh Gazette*, or Scotch Postman, printed by Robert Brown, on Tuesday and Thursday in every week.

1715, April 11. *The Censor*, No. 1. By Lewis Theobald.† These essays appeared in *Mist's Journal*, and were continued thrice a week without intermission, until thirty numbers had been published. After an interval of about a year and a half, the *Censor* was resumed three times a week, on Jan. 1, 1717, and closed, after completing the ninety-sixth number, on June 1, the whole making three volumes.

1715, April 21. *Medley*, or Daily Tatler; by Jeremy Quick, Esq. To be continued every day.

1715, May 2. *Daily Benefactor*, No. 1.

1715, June 22. *St. James's Evening Post*, printed for J. Baker, No. 1.

1715, June. *The Englishman*, No. 1. This

was the commencement of the second volume.

The whigs having succeeded in obtaining the administration, sir Richard Steele now saw those who had formerly calumniated and oppressed him driven from power, impeached, and trembling for the result; and it is the only blot, perhaps, in his political character, that instead of that mildness and forbearance which philosophy should have taught him to exercise towards those who had fallen into sudden adversity, and were no longer capable of thwarting his views, or injuring his promotion, the spirit of retaliation should have occupied his breast, and induced him to revile those as traitors and parricides, who were waiting the event of a trial by the laws of their country, and against whom, at such a period, to excite prejudice and aversion must be deemed at once vindictive and ungenerous. Such was, unhappily, the tendency of the republication of his pamphlets now against the late ministry. They appeared in one volume octavo, under the title of the *Political Writings of sir Richard Steele*, and among them he now first printed his *Apology*, with this motto, *Fabula quanta fui!* and such also was the purport of this volume of the *Englishman*.

1715, July 7. *Medley*, No. 1.

1715, July 11. *Faithful Collections*, No. 1.

1715, Aug. 1. *Oracle*; being calculated for the answering questions in all arts and sciences, whether serious, comical, or humorous, both in prose and poetry, No. 1.

1715, Sept. 14. *Examiner*, Vol. III. No. 1.

1715, Sept. 27. *The Salisbury Post Man*; or, Packet of Intelligence from France, Spain, Portugal, &c. &c. No. 1. "This newspaper contains an abstract of the most material occurrences of the whole week, foreign and domestic; and will be continued every post, provided a sufficient number will subscribe for its encouragement. If two hundred subscribe, it shall be delivered to any private or public-house in town, every Monday, Thursday, and Saturday morning, by eight of the clock, during the Winter season, and by six in the Summer, for three halfpence each. Any person in the country may order it by the post, coach, carriers, or market people; to whom they shall be carefully delivered. It shall be always printed in a sheet and half, and on as good paper; but this, containing the whole week's news, can't be afforded under twopence. Note. For encouragement to all those that may have occasion to enter advertisements, this paper will be made public in every market town forty miles distant from this city; and several will be sent as far as Exeter. Besides the news, we perform all other matters belonging to our art and mystery, whether in Latin, Greek, Hebrew, Algebra, Mathematicks, &c. Printed by Samuel Farley, at his office adjoining to Mr. Robert Silcocks, on the ditch in Sarum, Anno 1715."

One part of the intelligence contained in the above-named paper is described as *All from the Written Letter*; but a great portion is supplied from the London *Evening Post*.

The newspaper from which the foregoing is

\* See *Crispin Anecdotes*, page 87.

† Lewis Theobald, a poet, an essayist, and editor, was born at Sittingbourne, in Kent, and was brought up to his father's profession of the law, which he soon relinquished, to devote himself to literature. In 1736, his talents seem to have found a proper channel, for in that year he entered upon the editorship of the works of Shakespeare, and which were ushered into the world, in 1733, in eight volumes, a production which, notwithstanding the abuse of Pope and Warburton, merited and acquired much reputation. He closed his life of poverty and literary labour in 1742.

taken, consists of two sheets of small folio, whereof no less than *two pages* are occupied with the title we have extracted. It will be seen, from the proposal therein contained, that the entire income of the paper,—to meet every expense, including its delivery to subscribers,—no trifling matter, we may infer, in the then imperfect state of the post-office deliveries, and which must have rendered special messengers indispensable to its circulation; the entire income amounted to no more than 25s. each number, or £3 15s. per week.

1715, Oct. 15. *London Post*, No. 1. Printed by Benjamin Harris,\* in Gracechurch-street.

1715, Nov. 14. *Glasgow Courant*, containing the occurrence both at home and abroad, No. 1. Glasgow, printed for R. T. and sold at the printing-house, in the college, and at the post-office. It was a small 4to, printed on bad paper, in one column, three times a week, for the benefit of the country, price three halfpence. At No. 3, the title was changed to the *West Country Intelligence*; containing the news both at home and abroad. A collection is in the college library.

1715, Dec. 3. *Weekly Remarks and Political Reflections upon the most material News, Foreign and Domestic*, No. 1. The *Courant* was at this time the only daily paper in London.

1715, Dec. 17. *The Town Talk*, in a series of Letters to a Lady in the Country. By sir R. Steele. It extended only to nine numbers, and expired February 13, 1716.

1715, Dec. 20. *St. James's Evening Post*, or Nightly Packet, printed by J. Applebee for Samuel Jackson, over against Bridewell Bridge in Blackfriars, No. 1. After the publication of this paper, Baker changed his title to the *St. James's Post*.

1715. *Penny Post*, No. 1.

1715. *Felix Farley's Bristol Journal*. This was the first newspaper printed in Bristol.

1715. *The Hermit. The Silent Monitor. The Pilgrim. The Inquisitor. The Surprise. The Miscellany. The Restorer.*

1715, Dec. 23. *Freeholder*, No. 1. This paper has been justly termed a *political Spectator*; it stands at the head of its class, and was written by Addison to evince the enormity of rebellion, and to repel the prejudices of ignorance and faction. It was published every Monday and Friday, and having reached fifty-five numbers, closed June

29, 1716. The literary merit of this paper is of the highest order, and its political moderation is also entitled to no inferior encomium. At a period when scurrility and abuse were thought more efficient, in proportion as they were keen and bitter, this work presented a specimen of what urbanity with wit and argument might effect. Though sir Richard Steele is said to have declared, that the ministry in employing Addison had chosen a lute, when they should have selected a trumpet, the *Freeholder*, it is acknowledged, proved of essential service to the government, and contributed towards the promotion of its tranquillity and establishment. With this paper Addison concluded his labours as an essayist.

1716, Jan. 26. DIED, DANIEL WILLIAMS, D.D. an eminent divine among the nonconformists, and founder of the valuable library, in Red Cross-street, London. He was born at Wrexham, in Denbighshire, in 1643 or 1644, and very early in life formed the resolution of devoting himself to the Christian ministry amongst the nonconformists, which considering the severities of an intolerant government, were called forth against the dissenters, and must be regarded as a striking illustration of the decision of his character. His first employment was pastor of the Presbyterian church, in Wood-street, Dublin; but the troubles of Ireland, in 1687, led him to resign and retire to London. After the revolution he was elected pastor of a numerous congregation in London. Dr. Williams deserves the high praise of employing a large fortune, (which he had partly obtained by marriage,) in relieving the necessities of his less fortunate brethren; and at his death left considerable benefactions to several public institutions for the diffusion of knowledge and the propagation of the gospel.

Possessing an extensive collection of valuable books, he conceived the idea of forming a Public Library, for the use of his brethren, who were excluded by their nonconformity from the stores of literature at the universities. His friend, Dr. Bates, had also been, during a long and studious life, as Mr. Howe expressed it, "an earnest gatherer, and, as the phrase is, devourer of books," with which he had so great an acquaintance, that an eminent divine, a dignity of the church, said, "That were he to collect a library, he would as soon consult Dr. Bates as any man he knew." Such a collection was of course most desirable, and on the decease of its possessor, Dr. Williams purchased it for £500, or £600, to be added to his own valuable library.

By his last will, dated June 26, 1711, Dr. Williams appointed his books, after duplicates and useless volumes were removed, to be for a public library, "whereto such as his trustees appoint shall have access, for the perusal of any book in the place where they are lodged."

The apartments are capable of receiving forty thousand volumes, though the catalogue contains only about half that number. This library contains many rare tracts, early editions, and costly works in the collection. Of the rare

\* He was a brisk assertor of English liberties, and once printed a book with that very title. He sold a *Protestant Petition*, in king Charles's reign, for which they fined him £500, and set him once in the pillory; but his wife, (like a kind rib,) stood by him to defend her husband against the mob. After this [having a deal of mercury in his natural temper,] he travelled to New England, where he followed bookselling, and then coffee selling, and then printing, but continued Ben Harris still; and is now both bookseller and printer, in Gracechurch-street, as we find by his *London Post*; so that his conversation is general, (but never impertinent,) and his wit pliable to all invention. But yet his vanity, (if he has any,) gives no allay to his wit, and is no more than might justly spring from conscious virtue; and I do him but justice in this part of his character, for in once travelling with him from Bury fair, I found him to be the most ingenious and innocent companion that I had ever met with.—*Denton*.

tracts, it will be enough to say there are 238 volumes of sermons and tracts, published during the civil war of Charles I., of which the sermons preached before the parliament fill 32 volumes. Among the early editions may be enumerated the *Salisbury Liturgy*, 1530, finely illuminated; and the *Hours of the Virgins*, printed at Paris, in 1498, of which the printing and wood-cuts are finely executed. Of the costly works, it will be sufficient to mention the classic pages of *Grævius* and *Gronovius*, extending through more than 30 folios, with that great and national work, *Rymer's Fœdera*, in 20 vols. folio. Amongst the manuscripts, are a beautifully illuminated Bible; and a well written copy of *Wiclif's Testament*.

Dr. Williams's library has received many valuable additions, by the munificence of several eminent ministers and laymen of the "Three Denominations," among whom Dr. William Harris stands pre-eminent, having bequeathed a noble collection of 240 folio, 364 quarto, and 1355 octavo volumes to the trustees. Its increase has, however, been gradual; for, unlike the libraries of the universities, and other privileged bodies connected with the national ecclesiastical establishment, it does not augment its volumes at the expense of authors and publishers, but simply by the voluntary donations of those individuals who can appreciate the importance of such an institution to the dissenters of London.

1716. *Died*, BENJAMIN TUCKE, (who afterwards wrote his name TOOKE,) a celebrated bookseller in London. He was born about the year 1642, and is supposed to have been the son of the rev. Thomas Tuke, vicar of St. Olave's, Old Jewry, London. After having served an apprenticeship to John Crouke, he was admitted a freeman and liveryman of the stationers' company, in Feb. 1665-6. He was for some years steward, and afterwards treasurer of St. Bartholomew's hospital. In 1696, he was clerk of the stationers' company *pro tem.*, and treasurer of the same from 1677 to 1702, when he resigned in favour of Mr. Joseph Collyer.

1716, *Jan.-Feb.* The severity of the frost occasioned the river Thames to be one solid block of ice; and shops of almost every description were erected on the surface.\* Amongst these, printers and booksellers were also found pursuing their profession; for in some lines printed thereon we find the following intimation:

In this place Bowyer plies; that's Lintot's stand.

Whether this was Mr. William Bowyer, printer, or Jonah Bowyer, the bookseller, is unknown.

It appears that John Bagford did not confine himself to the theory of printing: for by two cards printed on the frozen river Thames, Jan. 18, among the Harleian manuscripts, 5936, on the first of which, he is styled "Dr. John Bagford,† patron of learning, Jan. 1715-16. Printed

at his Majesty's printing office in Black Friars." Round this card are prints of the heads of John Gutenberg and Caxton, with other devices, the royal arms, and the city of London below, &c. The second card is as follows: "The noble art and mystery of printing, being invented and practised by John Gottenburg, a soldier at Harlem in Holland, anno 1440, King Henry VI. anno 1459, sent two private messengers, with 1500 marks, to procure one of the workmen. They prevailed on one Frederic Corseilis to leave the printing office in disguise, who immediately came over with them, and first instructed the English in this famous art at Oxford, the same year, 1459." In the area of the card, in capital letters, "MA. JOHN BAGFORD," and the four following lines are printed:

All you that walk upon the Thames,  
Step in this booth and print your names,  
And lay it by, that ages yet to come,  
May see what things upon the Thames were done,  
Printed on the frozen river Thames Jan. 18, 1716.

1716, *May 15. Died*, JOHN BAGFORD an industrious antiquary, bookseller, and printer, in London. He was born some time in 1675, in the parish of St. Anne, Black Friars, London; and, it seems, he was bred to the business of a shoemaker; for he acknowledges that he practised, or had practised, "the gentle craft," as he calls it, in a little curious and entertaining tract on the fashions of shoes, &c. and the art of making them, now in the British museum. He seems to have been led very early, by the turn of his mind, to inquire into the antiquities of his own country, and the origin and progress of its literature. By such inquiries he acquired a great knowledge of old English books, prints, and other literary curiosities, which he carefully picked up at low prices, and re-sold honestly at moderate profits. In this kind of curious but unguinely traffic, he appears to have passed much of his life; being more of a book broker, rather than a bookseller, and a most proper and honest person to employ in the purchase of scarce and curious books, prints, &c. on moderate terms. In the prosecution of his design, he visited the continent several times, receiving commissions from eminent booksellers, and persons of learning, particularly the earl of Oxford, and Dr. John Moore, bishop of Norwich,\* to enrich their libraries; and was presented by the latter with a small place in the charter house. It is evident that Bagford had taken extraordinary pains to inform himself in the history of printing, and of all the arts immediately, or more remotely, connected with it. He published, in the *Philosophical Transactions*, in 1707, his *Proposals for a History of Printing, Printers, Illuminators,*

\* Dr. John Moore was bishop of Norwich, and afterwards of Ely: he died July 31, 1714. His books and manuscripts consisted of 3000 volumes, which had been collected at immense expense, and were offered to the earl of Oxford; but were purchased by George I. for £6000, and presented to the university of Cambridge. In his library was the celebrated Paris bible, with the forged date, which has caused so much controversy among the learned.—See *Meiffaire*, *Palmer*, and *Nichols*.

\* See *Malcolm's Anecdotes of the Manners and Customs of London in the Eighteenth Century*, 1808, page 326.

† I follow Dr. Calder's words; but this first card could scarcely have been intended for BAGFORD.—*Nichols*.

*Chalcography, Paper making, &c. &c.* On subscription, 10s.; and 10s. more on the delivery of a volume in folio, containing about 200 sheets. These proposals were printed on a half sheet, with a specimen on another, containing the life of William Caxton, with a list of books printed by him. At his death these manuscripts were purchased by Humphrey Wanley, lord Oxford's librarian, for his library, and came in course with the Harleian manuscripts, in the British museum. In 1728, a print of him was engraved by Geo. Vertue, from a picture by Mr. Howard.

It appears that Bagford was married, or at least that he was a father, pretty early in life; for there is, in the same collection, a power of attorney from John Bagford, junior, to John Bagford, senior, empowering him to claim and receive the wages of his son, as a seaman, in case of his death, dated in 1713, when the father could only have been of the age of thirty-eight years. See Harleian manuscripts, 5995.

The volumes in the British museum, under the general title of *Bagford's Collectanea*, consist of printed title-pages, advertisements, hand-bills, fugitive papers of all kinds, vignettes, prints, &c. pasted into paper books, sometimes with manuscript notes interspersed, but often without any.

In one volume, there are specimens of letters of all sorts, as well those used in foreign countries as in England. In other volumes are titles and fragments of almanacks, from the year 1537 downwards, with titles of bibles, law books, &c. printed by the company of stationers in London; titles of books of all kinds printed by the London printers, disposed into some sort of order, viz., as to the subject of the book, or dwelling-place of the printer; title-pages of books printed in Oxford and Cambridge; title-pages of those printed in Scotland and Ireland; title-pages and frontispieces, with other specimens of the works of our English engravers; titles of books printed by Roman Catholics, Presbyterians, Quakers, by other sectaries, by seditious persons, &c.; cuts of monuments, tombs, funerals, &c. in England; cuts of the same in foreign parts, with cuts of the manner of executing criminals; cuts, with some drawings of habits of divers nations, of several trades, of utensils, weapons, fountains, or wells, with other prints useful in joiners' and masons' work; cuts of figures in different postures, as writing, reading, meditation, with all the utensils used in writing, &c. during some ages; cuts of schools. The heads of some arithmeticians; alphabets; specimens of knot work, and some great-text and other letters. Specimens of letter-graving, heads of writing-masters, Dutch, French, and English. Specimens of letters engraven in small; as also of short-hand, &c. Heads of short-hand writers, and specimens of their works; and many other things. Title-pages of books, and printers' devices; printing in the Spanish Netherlands, Spain, and Portugal; titles of books published by English catholics, alphabets of Plantine letter, &c. Title-pages, alphabets, and printers' devices, used at Basil, Zurich, and other places

in Switzerland, the United Netherlands, France, and Germany, with some others of Poland, Switzerland, Denmark, Bohemia, France, and Italy, with some others of Geneva, Sicily, &c. Collections of acts of parliament, ordonnances, proclamations, &c. regulating printing; with many other papers. Proposals for printing particular books. Catalogues of books, relating to painting, printing, &c. Specimens of paper differently coloured. Marks on the outsides of reams of paper, with orders, cases, reasons, &c. relating to the manufacturer. Old prints or cuts from the year 1467; with the effigies and devices of many printers, foreigners and English; with other cuts and specimens of paper, &c. Collection of epitaphs of the printers in Basil; Life of John Froben; catalogues of books, &c. Collections relating to the lives of the engravers of different countries. Titles of books printed in most parts of Europe before the year 1500. Collection of patents for printing law books, &c. Some German cards. With many other volumes of collections of the kinds above-mentioned, though not so well sorted.

1716, June 10. Mr. FORDEN, a printer, was shot by a soldier in Newgate-street, London, for wearing a white rose, the emblem of the exiled family. The guards were placed in different parts of London, to prevent the people wearing white roses, and many persons were severely injured.

1716, Dec. 10. ISAAC DALTON was convicted of printing a pamphlet, called the *Shift Shifted*, for which he was sentenced to pay a fine of twenty marks, to stand in the pillory, and to be imprisoned one year. Mr. George Flint was the supposed author of this pamphlet, and for which he was imprisoned in the tower, but made his escape. Mrs. Flint and Mary Dalton (sister to Isaac) were imprisoned in Newgate.

1716. *The Nottingham Post*, No. 1. Printed and published by John Collyer.\* This paper was continued till 1732.

1716, Jan. 4. *The Supplement*, by way of Postscript to the *Weekly Journal*, and other Weekly Accounts, No. 1.

1716, Jan. 7. *News Letter*, No. 1.

1716, Jan. 7. *London Post*, with the best account of the whole week's news, foreign and domestic; with room left to write into the country without the charge of double postage.

1716, Jan. 15. *General Post*, No. 1.

1716, Jan. 19. *Political Tatler*; by Joshua Standifast, Esq. No. 1.

1716, Jan. 21. *Protestant Pacquet*, No. 1.

1716, Feb. 6. *The Tea-Table*, No. 1. By sir Richard Steele. This paper was published once a fortnight, but reached only three numbers.

1716, Feb. 18. *Robin's last Shift*; or, weekly remarks and political reflections upon the most material news, foreign and domestic.

1716, Feb. 19. *Remarkable Occurrences*, No. 1.

\* John Danton mentions a Mr. Richards, bookseller, of Nottingham, of whom he says, he "Pursued his business very closely, and is a person of great integrity. I dwelt with him two years, and found him a good paymaster."

1716, March 3. *Evening Weekly Paquet*.

1716, March 6. *Chit-Chat*, No. 1. By sir Richard Steele. This paper reached only three numbers. Most of these periodical publications had but a short duration, ending with the exigence which called them forth.

1716, March 21. *The Orphan*; with reflections political and moral upon all material occurrences foreign and domestic, No. 1.

1716, Mar. 15. *General Post*, No. 1. At No. 13, it was altered to the *Evening General Post*, to distinguish it from the *Weekly General Post*.

1716, March 31. *London Post*, No. 1.

1716, April 18. *Weekly Observer*.

1716, May 2. *Whitehall Courant*, No. 1.

1716, May 26. *Weekly Journal*, No. 1.

1716, June 22. *Citizen*, No. 1.

1716. *Saturday's Post*, No. 1.

1716, Oct. 29. *Jones's Evening News-Letter*; every Monday, Wednesday, and Friday, No. 1.

1716. *Occasional Paper*. Collected into three vols. 8vo. The authors were Grosvenor, Wright, Evans, and other Dissenters.

1717, March 3. RICHARD BURRIDGE, a journeyman printer, and reader of *Mist's Weekly Journal*, convicted of uttering blasphemous words, and sentenced to be whipped from the church in the Strand to Charing Cross, to be fined twenty shillings, and to be imprisoned one month.

1717, May 8. MRS. CLARKE, widow of Henry Clarke,\* was taken into custody for printing a pamphlet entitled, *To-Day is Ours, To-Morrow is Yours*, &c.

1717, June. A patent was granted to William Churchill and Edward Castle for the sole furnishing several offices of his majesty's revenue with stationery.

1717, Sept. 14. WILLIAM REDMAYNE, printer, in Jewin-street, having been indicted for printing *Mr. Howell's Case of Schism in the Church of England truly stated*, pleaded guilty, and was sentenced to pay a fine of £500; to be imprisoned for five years, and to find sureties for his good behaviour during life. Mr. Redmayne died in Newgate, April 11, 1719.

\* Henry Clarke was chief printer to Mr. Malthus, and through his persuasions engaged him upon business. He was extremely civil to the booksellers, and very diligent and dispatchful in what he did: he was a man of great openness in his temper, and was very seldom afraid to speak the very sentiments of his mind. After Mr. Clarke's decease, his widow managed the trade by Mr. Sedgwick first, and afterwards to better purpose by Mr. Barber.—*Dundon*.

There was a Francis Clark, printer, of whom *Dundon* says, "After he had buried his first wife, he half ruined himself in a second courtship. He printed for me *Dundon's Remains*, with several other pieces, and I must say his prices were reasonable enough."

† Lawrence Howel, M.A., was a nonjuring clergyman, and author of the *History of the Bible*, in 3 vols. 8vo. and other valuable works. He resided in Bullhead-court, Jewin-street, where he wrote the *Case of Schism*, of which 1800 copies were printed, and found in his house, aspersing George I. in denying his right to the crown of England. For this offence he was tried at the Old Bailey, and being convicted, was sentenced to pay a fine of £500, to be imprisoned three years, to find four sureties in £500 each, and to be bound himself in £1000 for his good behaviour during life, to be twice whipped, and to be degraded and stripped of his gown by the hands of the common hangman. Mr. Howel had the most afflictive part of his sentence remitted, and died in Newgate, July 19, 1720.

1717. *Bibliotheca Biblica*; being a commentary upon all the books of the old and new testament, gathered out of the genuine writings of the fathers, and ecclesiastical historians and acts of councils, down to the year of our Lord 461, being that of the fourth great council, and lower, as occasion may require. To which are added introductory discourses upon the authors and authentickness of the books, the time of their being written, &c. extracted for the most part out of the best authors that have written upon those subjects. Part I. (To be continued monthly.) Printed by William Bowyer, for W. Taylor and H. Clements. Of this learned work five numbers were issued monthly, and the sale seems to have been considerable, as one thousand copies were printed, and some of them on large paper. But the compiler changed both his publisher and his plan of publication; for the title-pages of two volumes 4to. state them to have been "printed at the theatre at Oxford, for W. and John Innys, 1720," and in which he returns thanks for the annual encouragement he had been favoured with.

1717. *The Holy Bible*, imperial folio, ornamented with head and tail pieces. Printed by John Basket, London.

The same on royal paper, printed at the Clarendon printing-office, at Oxford, for which Mr. Basket paid a yearly sum for a room to carry on his business. In this edition the following error occurs in the 20th chapter of St. Luke, the *Parable of the Vineyard*, which is printed the *Parable of the Vinegar*, and from which erratum it is always called the *Vinegar Bible*.

1717. JOSEPH COMINO, a celebrated printer at Padua, whose great ability in the typographic art procured him the direction of the famous Comine printing office, established at Padua by the learned brothers Gaetano and Giov. Antonio Volpi. These distinguished brothers defrayed the expenses of the Comine printing office, and by their learned labours raised its character to a high rank among the literati of Europe. The Comine editions are admired for the correctness of the text, the excellence of the notes with which most of them are illustrated, the neatness of the type, beauty of the paper, and neatness of the press work. They are consequently in great request, and very dear. They are printed in 4to. and 8vo.—Horne's *Intro. to Bib.*

1717, Jan. 29. *Freeholder Extraordinary*, No. 2.

1717, Feb. 4. *Scourge*, No. 1.

1717, March 13. *Penny Post*, or Tradesman's select Paquet, No. 1.

1717, Feb. 9. *Wanderer*, No. 1.

1717, May 22. *Plain Dealer*, No. 1.

1717, July 19. *London Post*, or Tradesman's Intelligencer, No. 48.

1717, Aug. 14. *Weekly Review*, or the Wednesday's Post, No. 1.

1717, Aug. 17. *Protestant Medley*, or Weekly Courant, No. 1.

1717, Sept. 1. *St. James's Weekly Journal*.

1717, Sept. 25. *Wednesday's Journal*; being an auxiliary paquet to the Saturday's Post.

1717. *Historical Register for the Year 1716*, published at the expense of the Sun fire office. The regular publication having taken up the history of public affairs only from the 9th January, 1717, two volumes were printed together in 1724, containing an account of events from the last day of July, 1714, up to that date, being the first seventeen months of the reign of George I. With these introductory volumes, therefore, the *Historical Register* forms a chronicle of the affairs of this and other countries of Europe, from the accession of the house of Hanover. The compilers, to use their own words, confine themselves to mere "matters of fact, without making any descant thereon either of commendation or reprehension." This work also, about the year 1737, began to appear in monthly numbers. The change was probably a dying effort, as the volume for 1738 was, we believe, the last that appeared. The *Historical Register* was printed and sold by G. Meere in the Old Bailey. The price, while it was published quarterly, was one shilling each part.

In Strype's continuation of Stow's *Survey*, is the following notice respecting the Sun Fire Office. "All persons taking out policies for insurance, must pay two shillings and sixpence per quarter; and besides their insurance, shall have a book called the *Historical Register*, left every quarter at their house."

One of the managing persons of this society was named Povey, who having a scheming head, a plausible tongue, and a ready pen, prevailed on his fellow-members to undertake the above publication, foreign as it was to the nature of their institution. Mr. Povey was also a great improver of the penny post.

1717, Nov. 6. *Entertainer*, No. 1.

1717, Nov. 22. *Reprisal*, No. 1.

1718, Feb. 5. *Died*, THOMAS ROYCE, formerly law patentee and city printer. In 1675, he was master of the stationers' company, and in 1677, he gave to them two silver mugs, weight 27ozs. 3dwts. On the left side of the altar, at St. Bartholomew's the Great, is this epitaph:

M. S. Hic juxta situs est THOMAS ROYCE, Armiger, linguis Orientalibus Typographus Regius, placidissimus, moribus et antiqua probitate memorandus, quorum gratia optimi civis famam jure merito adeptus est, Militie civice Vicetribunus. Nec minus apud externos notus ob libros elegantissimos suis typis editos, inter quos sanctissimum illud Bibliorum Polyglottorum, apud quos maxime eminet. Obiit . . . die Augusti, anno Reparatae Salutis 1686, postquam 56 annis animum implevisset. Parent optime merito, SAMUEL ROYCE, filius unicus, hoc monumentum posuit.

Mr. Royce died of an apoplexy, at his house, in Bartholomew close.

1718. It appears that printing was practised in SHREWSBURY, for the Welsh name, *Mythig*, or *Mwythig*, occurs in some books printed there.

1718, July 9. THEOPHILUS CATER, of the parish of Christ Church, London, gave £1000 to the company of stationers, on condition of their paying him an annuity of £50 for his own life; and after his death, £40 to be thus disposed of:—To the minister of St. Martin's,

Ludgate, for a sermon, £1 10s.; to the reader, 5s.; to the clerk and sexton, 2s. 6d. each, 5s.; to fourteen poor freemen of the company, £14.; to ten poor men of St. Martin's, £10.; and to ten poor men of Christ Church, £1 each; the remainder (being £4) towards a dinner for the master, wardens, and assistants. [Mr. Cater received the annuity to Christmas, 1719.]

1718. JOHN LILLY, who had filled the office of clerk to the company of stationers, from 1673 to 1681, when he resigned, gave to the company, in 1718, £20 for a piece of plate, which was laid out in a Monteith and collar, to match with one given in 1666. They weigh 75 oz. 5 dwts.

1718, July. Nathaniel Mist, the printer, published the following queries in his journal, on the Spanish war. "Who are you going to fight for? What have we to do in that quarrel? What will be the consequences? Whether the French will not run away with your trade?" &c. For this offence his house was searched, and his journeymen and apprentices taken into custody.

1718. *De Typographia Excellentia Carmen*, in French and Latin. 8vo. By Clandii Ludovici. Paris. Claude-Louis Thibonst was printer to the university of Paris, where he executed some good editions of the classics. His poem on printing is reprinted at the end of Achard's *Cours Elementaire Bibliographique*, without the notes which accompany the original work. The mechanism of the art is described in 120 tolerably flowing hexameters. It is justly characterized by Fournier as being a declamation rather than an instruction in the art.—*Man Typog.* tom. i.

1718, Dec. 6. *Died*, NICHOLAS ROWE, poet-laureate to George I., and the friend of Addison, who is now less known as a miscellaneous poet than as a tragic dramatist. His chief works are the tragedies called the *Ambitious Step-mother*; *Tamerlane*; the *Fair Penitent*; *Ulysses*; the *Royal Convent*; *Jane Shore*; *Lady Jane Grey*; and a comedy called the *Biter*. He wrote also several poems upon different subjects, and gave the public an edition of Shakspeare's plays, to which he prefixed an account of that great man's life. See page 593, *ante*. But the most considerable of Mr. Rowe's performances was a translation of Lucan's *Pharsalia*. Mr. Rowe was born in the year 1673. The laureateship was given to the Rev. Lawrence Eusden.

1718, Dec. 22. *Died*, Sir JOSHUA SHARPE, an eminent stationer of London, who is thus noticed by John Dunton:—"The next I dealt with was Mr. Sharpe, (brother to the archbishop\* of that

\* Dr. John Sharpe, archbishop of York, was born at Bradford, in Yorkshire, Feb. 16, 1644, and educated at Cambridge. He was a man of great learning and piety, and a bright ornament of the church of England. He died at Bath, Feb. 2, 1714, and was buried in the cathedral at York, where a handsome monument is erected to his memory. The archbishop had three brothers, of whom Joshua, above-mentioned, was the youngest.

The library of archbishop Sharpe, among other valuable books, contained a very curious collection of tracts and pamphlets, chiefly historical and controversial, during a period of more than thirty years. They descended to his son, Dr. John Sharpe, who was archdeacon of Northumberland, and a prebendary of Durham. He died April 28, 1792, aged 66 years.

name.) He acts in those worldly affairs as a stranger, and hath his heart ever at home. He is active in trade, without disquiet, and careful without hurry; yet neither ingulfed in his pleasures, nor a seeker of business, but hath his hour for both. He thinks much, does what he says, and foresees what he may do before he purposes. In a word, Mr. Sharpe is a person of great honesty—very obliging in his conversation—and thrives so fast in his shop, that 'tis very likely we may see him riding the great horse; and what a charming figure will the grave and majestic Sharpe make, when attended with sword and mace, surrounded with aldermen, bedecked with jewels, and glittering with a gold chain!"

The prediction of Dunton was in some degree verified. On Midsummer-day, 1713, Mr. Sharpe was elected sheriff of London; and on the 30th of December he was knighted at Windsor by king George I. He married Rebecca, daughter of — Harvey; and she was re-married, January 26, 1721, to Dr. A. Snape, rector of St. Mary-at-Hill; and died in 1731.—*The Postboy*, recording the death of sir Joshua Sharpe, adds, "He was a gentleman of unsullied character in all respects."

1718. A work entitled *Cours des principaux fleuves rivières de l'Europe*, a small quarto of seventy-eight pages, which is said to have been composed and printed solely by Louis XIV. in the palace of the Tuilleries, was issued in this year.—See page 568, ante.

1718, Jan. 6. *Critick*, No. 1.

1718, Jan. 30. *Heraclitus Ridens*, No. 1.

1718, Feb. 8. *Observer*, by Humphrey Medlicott.

1718, March 22. *Weekly Packet*, with the *Price Courant*.

1718, March 24. *Freethinker*, No. 1. By Ambrose Phillips, who was aided in his design by some of the most respectable characters in the kingdom, by Dr. Boulter, archbishop of Armagh; by Dr. Pearce,† bishop of Rochester; the right hon. Richard West, lord chancellor of Ireland; the Rev. George Stubbs, the Rev. Gilbert Burnet, and the Rev. Henry Steevens. The object of these essays is, to correct the prejudices and mistakes which exist in religion, general politics, and literature; and consequently a large portion of the work is of a serious and argumentative kind. It was published twice a-week, and terminated with the one hundred and fifty-ninth paper, Sept. 28, 1719, forming 3 vols. 12mo. The second edition appeared in 1733.

1718, April 18. *Freethinker Extraordinary*, No. 1.

1718, July 26. *Weekly Medley*; or, the *Gentleman's Recreation*, No. 1.

1718, August 6. *Doctor*, No. 1.

1718, Sept. 18. *Whitehall Evening Post*, No. 1.

1718, Nov. 5. *Honest Gentleman*, No. 1.

1718, Dec. 15. *Edinburgh Evening Courant*, published threetimes a-week, Monday, Tuesday, and Thursday. No. 1. This paper purported to be "published by John Mossman, James M'Ewen, and William Brown, and sold at the shops of the said James M'Ewen and William Brown." It appears, however, from the council registers that it was to James M'Ewen, "stationer burghess," that the town council assigned the privilege of publishing the paper, "the said James being obliged before publication, to give any copy of his print to the magistrates." It appears to have been the first Scots newspaper that adopted the system of giving foreign news direct from the countries wherein they occurred, and independent of the London journals. It consisted of three folio half sheets in double columns, and was sold at three halfpence. After Mr. M'Ewen, the proprietorship of the *Courant* fell into the hands of Robert Fleming, by whom and his executors it continued to be published until after the year 1780, when it was purchased by Mr. Ramsey. Thus, it appears, that the *Edinburgh Evening Courant* is the first newspaper in Edinburgh, or indeed in Scotland, which has existed to the present time.

1718. *The Complete Art of Poetry*, by Charles Gildon, in two volumes, 8vo. Mr. Gildon died January 14, 1724, and is said by Abel Boyer (in *Political State*, vol. xxvii. p. 102) "to have been a person of great literature, but a mean genius; who, having attempted several kinds of writing, never gained much reputation in any." Among other treatises he wrote the *English Art of Poetry*, which he had practised himself very unsuccessfully in his dramatic performances." Mr. Gildon was born at Gillingham, in Dorsetshire, and educated at Douay, with a view of entering the Catholic priesthood. He wrote the *Life of Betterton*, the eminent tragedian, four tragedies, and one comedy, besides other works. He was rather severe in criticising the works of others; and passing a severe censure on Pope's *Rape of the Lock*, obtained a niche in the *Dunciad*:

Ab, Dennis! Gildon, ah! what ill-starred rage  
Divides a friendship long confirmed by age!  
Blockheads with reason wicked wits abhor;  
But wit with wit is barbarous civil war.

1719, Jan. 28. *Died*, SIR SAMUEL GARTH, physician general to the army, and physician in ordinary to the king, George I. He was born in Yorkshire, and educated at Cambridge, where he took the degree of M.D., in 1691, and became a favourite physician among the whigs during the reign of William III. In 1697, he published a mock-heroic poem, entitled the *Dispensary*, referring to a dispute in the college of physicians, respecting the commencement of a charitable institution, in which the poet strongly advocated the cause of benevolence. At the accession of George I. he was knighted. Dr. Garth wrote a few other poems, chiefly upon occasional subjects.

\* Ambrose Phillips was a dramatic and political writer, and pastoral poet. He died June 18, 1749, aged 78 years.

† Zachary Pearce, born in 1660, was the son of a distiller, in High Holborn, London, and educated at Westminster and Cambridge. In 1736 he was promoted to the see of Rochester and deanery of Westminster, and died June 19, 1774. His critical abilities, and application to philosophical learning were great, and his works will be ever held in estimation.

1719. It is generally supposed that the first edition of *Robinson Crusoe*, by De Foe, appeared in this year, in two volumes, 8vo., which certainly is its first appearance in the form of a book; but it is nevertheless true, says Dr. Dibdin, in his *Library Companion*, that this enchanting and domestic romance first greeted the public eye in the pages of the original *London Post*; or, *Heathcote's Intelligencer*; from No. 125 to No. 289 inclusive; the latter dated Oct. 7, 1719.

Robinson Crusoe must be allowed by the most rigid moralist, to be one of those novels which one may read, not only with pleasure, but also with profit. It breathes throughout a spirit of piety and benevolence; it sets in a very striking light the importance of the mechanical arts, which they who do not know what it is to be without them are so apt to undervalue; it fixes in the mind a lively idea of the horrors of solitude, and consequently, of the sweets of social life, and of the blessings we derive from conversation and mutual aid; and it shows how, by labouring with ones own hands, we may secure independence, and open for ourselves many sources of health and amusement.

Rousseau says that Robinson Crusoe is one of the best books that can be put into the hands of children. The style is plain, but not elegant, nor perfectly grammatical; and the second part of the story is tiresome.

Dr. Blair in his *Lectures* says, that no fiction in any language was ever better supported than the *Adventures of Robinson Crusoe*. While it is carried on with the appearance of truth and simplicity, which takes a strong hold of the imagination of its readers, it suggests, at the same time, very useful instruction, by showing how much the native powers of man may be exerted, for surmounting the difficulties of any external situation.

Mr. William Taylor, the bookseller, at the Black Swan, in Paternoster-row, who purchased the manuscript after every other bookseller had refused it, is said to have gained £1000 by the sale.

The following controversy concerning the copyright of *Robinson Crusoe*, may be an acceptable literary anecdote:—"Whereas Mr. William Taylor, in Paternoster-row, has in many of the public newspapers falsely charged T. Cox, at the Amsterdam coffee-house, with printing an abridgment of a book pretended to be *The Life and strange surprising Adventures of Robinson Crusoe*, &c. which action the author in his preface to the second volume has rendered as heinous as robbing on the highway, or breaking open a house, and challenges any to show him the difference; and promises, as highwaymen and robbers, that nothing shall be wanting on his part to do them justice: This therefore is to inform the world, that, when the said book was published I was on my journey to Scotland; neither had I directly or indirectly any concern in the said book, nor knew any thing more of it than this, 'that a certain person, a few days before I left London, came to me with a part of

a sheet as a specimen of the paper and print, and desired me to buy some of them; and at the same time told me there had been a wrangling between Mr. Taylor and the author about copy-money for the second volume; upon which I immediately concluded that the author had done it himself in revenge to Mr. Taylor, because he could not bring him to his own terms; and, if I have been mistaken in this one point, I presume those gentlemen who are better acquainted with the author will very readily forgive me.—As soon as I came to London, I went to Mr. Taylor, and gave him all the satisfaction I possibly could, that I had not so much as seen or sold one of the said books; and promised him at the same time, if he would approve himself so much a man of honour and honesty as to do me justice in some other advertisement, that I would acquaint him who was the person that brought me the specimen; but being denied, with only a promise that he would stop the prosecution of a bill in chancery he had taken out against me, I thought I was obliged to offer thus much to justify myself. Had that good maxim which one of them was pleased to remind me of in a letter to Edinburgh (that "Honesty is the best policy") but a due influence on their own conduct, I am persuaded it would increase the number of fair traders, and convert one of the most prostituted pens in the whole world more steadily to the service of religion and the best of governments.

"N.B. If Mr. Taylor or the author of *Crusoe's Don-Quixotism* [Daniel De Foe] should make any farther steps to insinuate that I was the proprietor of that abridgement, I assure the publick that, in justice to myself, I shall publish some secrets as yet unknown to the world; and prove that there is as little sincerity and honesty in exposing me, both in bookseller and author, as there is truth in *Robinson Crusoe*.

"T. Cox."

It is computed that within forty years from the first appearance of the original work, no less than forty-one different editions of *Robinson Crusoe* appeared, besides fifteen other imitations.

1719, June 17. Died, JOSEPH ADDISON, one of the most illustrious ornaments of his time, and the first of our English prose writers who employed wit on the side of virtue and religion;—who restored virtue to its dignity—and taught innocence not to be ashamed. He was the eldest son of the Rev. Launcelot Addison,\* dean of Lichfield, and was born May 1, 1672, at Milston, in Wiltshire, where his father was then rector. After receiving the rudiments of his education, he was sent to the charter house, where he contracted an intimacy with sir Richard Steele. In 1687 he was admitted of Queen's

\* DR. LAUNCELOT ADDISON, a man of considerable learning, of amiable manners and unaffected piety, died at Lichfield, April, 1703, aged seventy-one. Steele, who was well acquainted with the dean, has given us a most lively and exquisite picture of his parental and domestic conduct.

college, Oxford, but afterwards was elected demy at Magdalen. In 1693, he took his degree of M.A., and became eminent for his Latin poetry. At the age of twenty-two, he addressed some verses to Dryden, in English, and not long after published a translation of part of Virgil's fourth *Georgic*. About this time he wrote the arguments prefixed to the several books of Dryden's *Virgil*, and composed the essay on the *Georgics*. In 1695 he wrote a poem to king William, with a kind of rhyming introduction, addressed to lord Somers. In 1697 he wrote his poem on the peace of Ryswick, which he dedicated to Mr. Montague, (then chancellor of the exchequer) and which was called by Smith, "the best Latin poem since the *Æneid*." Having yet no public employment, he obtained, in 1699, a pension of £300 a year, that he might be enabled to travel. While he was travelling at leisure in Italy, he was far from being idle; for he not only collected his observations on that country, but found time to write his *Dialogues on Medals*. Here also he wrote the *Letter to Lord Halifax*, which is justly considered as the most elegant, if not the most sublime of his poetical productions. At his return he published his *Travels*, with a dedication to lord Somers. This work, though a while neglected, is said in time to become so much the favourite of the public, that before it was reprinted it rose to five times its price. The victory of Blenheim, in 1704, spread triumph and confidence over the nation, and lord Godolphin, lamenting to lord Halifax that it had not been celebrated in a manner equal to the subject, desired him to propose it to some better poet. Halifax named Addison; who, having undertaken the work, communicated it to the treasurer, while it was yet advanced no farther than the simile of the angel, and was rewarded with the place of commissioner of appeals. In the following year he was at Hanover with lord Halifax; and the year after he was made under secretary of state. When the marquis of Wharton was appointed lord lieutenant of Ireland, Addison attended him as his secretary, and was made keeper of the records in Bermingham's tower, with a salary of £300 a year. When he was in office he made a law to himself, as Swift has recorded, never to remit his regular fees, in civility to his friends—"I may," said he, "have a hundred friends, and if my fee be two guineas, I shall, by relinquishing my right, lose two hundred guineas, and no friend gain more than two." His tragedy of *Cato*, and his connection with the *Tatler*, *Spectator*, *Guardian*, and *Freeholder*, has already been noticed. His papers in the *Spectator* are marked by one of the letters in the name *CLIO*, and in the *Guardian* by a *Q*. It was not known that Addison had tried a comedy for the stage, till Steele, after his death, declared him the author of the *Drummer*; this play Steele carried to the theatre, and afterwards to the press, and sold the copy for fifty guineas. In the midst of these agreeable employments, Addison was not an indifferent spectator of public affairs. When the house of

Hanover took possession of the throne, it was reasonable to expect that the zeal of Addison would be suitably rewarded. Before the arrival of king George, he was made secretary to the regency, and was required by his office to send notice to Hanover that the queen was dead, and that the throne was vacant. To do this would not have been difficult to any man but Addison, who was so overwhelmed with the greatness of the event, and so distracted by choice of expressions, that the lords, who could not wait for the niceties of criticism, called Mr. Southwell, a clerk in the house, and ordered him to dispatch the message. Southwell readily told what was necessary, in the common style of business, and valued himself upon having done what was too hard for Addison. On the 2d of August, 1716, he married the countess dowager of Warwick, whom he is said to have first known by becoming tutor to her son. This marriage, however, made no addition to his happiness; it neither found them or made them equal. She always remembered her own rank, and thought herself entitled to treat with little ceremony the tutor of her son. The year after, 1717, he rose to his highest elevation, being made secretary of state; but it is universally confessed that he was unequal to the duties of the office. In the house of commons he could not speak, and therefore was useless to the defence of the government. In the office he could not issue an order without losing his time in quest of fine expressions. What he gained in rank he lost in credit; and finding by experience his own inability, was forced to solicit his dismissal, with a pension of £1500 a year. He now engaged in a laudable and excellent work, *A Defence of the Christian Religion*;<sup>\*</sup> of which part was published after his death. Addison had for some time been oppressed by shortness of breath, which was now aggravated by a dropsy; and, finding his danger pressing, he prepared to die conformably to his own precepts and professions.

The death-bed of Addison was the triumph of religion and virtue. Conscious of a life well-spent in the service of his fellow-creatures, he waited with tranquillity and resignation the moment of departure. The dying accents of the virtuous man have frequently, when other means have failed, produced the happiest effect; and Addison, anxious that a scene so awful might make its due impression, demanded the attendance of his son-in-law, lord Warwick. The young nobleman was amiable, but dissipated; and Addison, for whom he still retained a high respect, had often, though in vain, endeavoured to correct his principles, and to curb the impetuosity of his passions. He now required his attendance to behold the reward of him who had obeyed his God. "He came,"

<sup>\*</sup> Jacob Tonson, the bookseller, did not like Addison. He had a quarrel with him; and, after quitting the secretaryship, used frequently to say of him, "one day or other you will see that man a bishop; I am sure he looks that way; and, indeed, I ever thought him a priest in his heart."—*Spence*.

says Dr. Young, who first related this affecting circumstance; "but life now glimmering in the socket, the dying friend was silent. After a decent and proper pause, the youth said, 'Dear sir! you sent for me, I believe: I hope that you have some commands; I shall hold them most sacred.' May distant ages not only hear, but feel, the reply! Forcibly grasping the youth's hand, he softly said, 'See in *what manner a Christian can die!*' He spoke with difficulty, and soon expired." On his death-bed, he gave directions to Mr. Tickell for the publication of his works, and dedicated them to his friend, Mr. Craggs. Addison left no child, but a daughter, who died at Bilton, in Warwickshire, Feb. 1797, when his library was sold.†

The literary character of Addison has been so often and so ably pourtrayed, that little remains for us to say. Dr. Johnson well observes, "Whoever wishes to attain an English style, familiar but not coarse, and elegant but not ostentatious, must give his days and nights to the volumes of Addison. Dr. Blair, noticing the character of this good man says, "Addison is, beyond doubt, in the English language, the most perfect example; and, therefore, though not without some faults, he is, on the whole, the safest model of imitation, and the freest from considerable defects, which the language affords."

1719, Aug. 23. Died, HENRY CLEMENTS, an eminent bookseller, of London. His funeral sermon was printed by his very early friend, Mr. William Bowyer, (to whose loss he had subscribed) and published October, 3, 1719, under the title of the *Christian's Support under the Loss of Friends*; by a friend of the deceased.

1719, Sept. Died, JOHN HARRIS, A.M., F.R.S., compiler of *Lexicon Technicum*; or, an Historical English Dictionary of Arts and Sciences, explaining not only the terms of art, but the arts themselves. London: folio, 1704. This is a work of considerable importance, and the expenses of its completion and printing was furnished by a body of respectable booksellers; Daniel Brown,† Timothy Goodwin, John Wal-

\* Tickell told Dr. Young, that in the following couplet of his *Elegy on the Death of Addison*, he alludes to the earl of Warwick:

He taught us how to live; and, oh! too high  
The price of knowledge, taught us how to die.

Thomas Tickell was a contributor to the *Spectator*, and an elegant versifier, with somewhat more tenderness than his contemporaries. He was born in 1686, and died in 1749. The elegy of Tickell upon the death of Addison, may be termed, without dispute, one of the most affecting elegies in our language; and what is still more exalted praise, worthy the object it laments!—*Drake*. It was addressed to the earl of Warwick, and prefixed to the 4to. edition of his patron's works.

† On the 27th of May, 1799, and the three following days, Mr. Addison's library was sent to London for sale; it was divided into eight hundred and fifty-six lots, and sold by Messrs. Leigh and Sotheby, for the sum of £456 3s. 9d. The medals and jewels, which were disposed of on the fifth day, produced the sum of £97 2s. 3d.

‡ I have always thought there is an unusual sweetness that reigns in this man's countenance; he is very humble, and I believe him a good man. He is a sincere lover of the established church; and yet his principles are moderate enough.—*Dunton*.

thoe,\* Thomas Newborough,† John Nicholson; Thomas Benskin,§ Benjamin Tooke,|| Daniel Midwinter, Thomas Leigh,¶ and Thomas Cogan.\*\* This work was dedicated to prince George of Denmark. The first volume was published in 1708, and a second part was added in 1710. From these two volumes have originated all the other *Dictionaries* and *Cyclopedias* that have since appeared. Mr. Harris was also engaged in another important work to literature, entitled *Navigantium atque Itinerantium Bibliotheca*; or, a complete collection of Voyages and Travels that have been writ in any language; containing what is in *Hucklitt*, *Purchass*, and all others of note to the present time, in two volumes folio, illustrated with very many curious copper cuts. With an introduction; being an account of the magnet progress of navigation, &c.†† The booksellers were the undertakers, Thomas Bennet, John Nicholson, J. Leigh, and D. Midwinter. The personal history of this elaborate author and promoter of sciences and general knowledge, is still involved in obscurity. He was born about 1667, probably in Shropshire, and educated at Cambridge, and was elected a fellow of the royal society, April 29, 1696. Dr. Harris obtained some valuable church preferments; he had a prebend stall in the cathedral of Rochester, and the rectory of the united parishes of St. Mildred, Bread-street, and St. Margaret Moses, London, &c.

\* Mr. Waltheof is very punctual in his payments, and very nicely just. Civility is a part of his nature, and he never makes any advantage of another man's ignorance. He is kindly disposed to those who are unhappy, and has never overlooked me at my lowest ebb. He prints and deals much in law books.—*Dunton*.

† His zeal for the church is the most eminent quality in him, and so perfumes the actions of his whole life, that it makes him whatever is just and merciful. He is zealous to suppress debauchery, and as he endeavours to reform others, so he is a thoughtful just man, and knows how to encourage a good author, for none can think that the *Supplement to the Historical Dictionary*, written by the learned Collier, is made at a small charge.—*Dunton*.

‡ His talent lies at projection, though I am thinking his *Voyages and Travels* will be a little posthumous. He is usually fortunate in what he goes upon. He is a man of good sense; for I have known him lay the first rudiments and sinews of a design with great judgment, and always according to the rules of art or interest. He purchased part of my stock when I threw up all concerns in trade, and I ever found him a very honest man.—*Dunton*. His residence was at the King's Arms in Little Britain.

§ He had no great estate to begin the world with, but his stars have been very kind. He makes a considerable figure in trade, and has a general knowledge in books. He is a fair dealer, and a true son of the church; but has little charity for censorious men, be they of what party they will.—*Dunton*.

¶ Mr. Tooke, near Temple bar. He is descended from the ingenious Tooke, that was formerly treasurer. He is truly honest, a man of refined sense (as he could never have been related to Ben Tooke) and is unblemished in his reputation.—*Dunton*. Mr. Tooke died 1723, see post.

§ Mr. Leigh and Mr. Midwinter are in toping business, and no way inferior to their known predecessor for justice and industry, &c.—*Dunton*. Mr. Midwinter's shop was at the Rose and Crown, St. Paul's Church-yard, 1705, and in 1734.—*Dunton*.

\*\* Mr. Cogan, in the middle temple. He is so cautious and wise, that he is noted for it through the whole trade, and is often proposed as an example to persons of hot and imprudent tempers. He has a piercing wit, a quick apprehension, and is as well a judge as a seller of books.

†† A new edition of this work, considerably enlarged and improved, was published in 1745, by Dr. Campbell, and again in 1764.

1719. THOMAS BENNET, an eccentric character, and news crier, in London, is thus noticed by John Dunton, who says, "I might also characterise the honest (*mercenary*) women, Mrs. Baldwin, Mrs. Nutt, Mrs. Curtis, Mrs. Mallet, Mrs. Croome, Mrs. Grover, Mrs. Barnes, Mrs. Winter, Mrs. Taylor, and I must not forget old Bennet, that loud and indefatigable promoter of the *Athenian Mercury*. The following lines are from a volume of miscellaneous poems, edited by Elijah Fenton, and printed for Bernard Lintot, without date; but about this year:

ON THE DEATH OF OLD BENNET,  
THE NEWS CRIER.

ONE morning, when the sun was just gone down,  
As I was walking through the noisy town,  
A sudden silence through each street was spread,  
As if the soul of London had been fled,  
Much I enquired the cause, but could not hear,  
Till Fame, so frightened, that she did not dare  
To raise her voice, thus whispered in my ear;  
Bennet, the prince of hawkers is no more;  
Bennet, my herald on the British shore;  
Bennet, by whom I own myself outdone,  
Tho' I had a hundred mouths, he had but one,  
He, when the listening towns he would amuse,  
Made echo tremble with his "bloody news!"  
No more shall echo now his voice return,  
Echo, for ever must in silence mourn,  
Lament, ye heroes, who frequent the wars,  
The great proclaimer of your dreadful scars;  
Thus wept the conqueror, who the world o'ercame,  
Homer was wanting to enlarge his fame,  
Homer the first of hawkers that is known,  
Great crews from Troy, cried up and down the town.  
None like him has there been for ages past,  
Till our stentorian Bennet came at last,  
Homer and Bennet were in this agreed,  
Homer was blind, and Bennet could not read.

1719. About this year an association of respectable booksellers entered into an especial partnership for the purpose of printing some expensive works, and styled themselves the *Printing Conger*.\* They consisted at first of R. Bonwicke,† J. Walthoe, B. and S. Tooke, R. Wilkin,‡ and T. Ward; and in 1736, the firm consisted of Messrs. Bettesworth, Bonwicke, Ware, A. Ward, Osborn, and Wickstead. A second partnership of the same kind, about the same period, formed by Messrs. Bettesworth and Rivington, called themselves the *New Conger*.

\* The term *Conger* was supposed to have been at first applied to them individually, alluding to the *Conger Eel*, which is said to swallow the smaller fry. Or it may possibly have been taken from *Congerius*.—Nichols.

† Mr. Henry Bonwicke, a relation of Mr. R. Bonwicke, an eminent bookseller in St. Paul's church-yard, who died in 1796, is thus characterised by Dunton:—"I do not know an honest man in London, or one that is more zealous for the church. He served his time with Mr. Benjamin Tooke, and we find all the wit and loyalty of his ingenious master exemplified in his life and practice." For an account of the family of Bonwicke, see Nichols's *Literary Anecdotes*, vol. i. p. 419, and vol. v. p. 118.

‡ He is a bookseller of good reputation, and is scrupulous in doing the least injustice; neither was he less accomplished in the art of obedience whilst he was an apprentice, than that of government since he has been a master. He is devout of prayers, and reverent and attentive in hearing; and is not only a true son of the church, but also a resolute champion in behalf of the hierarchy, as well remembering that prophetic apophthegm of James I., "No bishop, no king!" And, to convince us of the great respect he bears to the pious memory of Charles I. he has lately published several evidences which have not yet appeared in the controversy concerning *Kikin Basilike*, produced in a letter to the Rev. Mr. Wagstaffe.—Dunton.

1719, Jan. The *Manchester Weekly Journal*; containing the freshest advices both foreign and domestic, to be continued weekly. Printed and sold by Roger Adams, at the lower end of Smithy-door. Price one penny.\* No. 325, dated March 15, 1725, was in the possession of the late Mr. John Yates,† of Bolton; and in the imprint it states as printed in "*Smiby-door*." Mr. Adams carried on this paper some time longer, and then removed to Chester, where he commenced the *Chester Courant*. He was the father of the well known Orian Adams, of whom see an account in the year 1797, *post*.

By this paper it appears that the art of typography had not been practised in Manchester since the memorable days of Martin Marprelate. (See the year 1588, *ante*.) From this time, however, the art has been successively carried on.

1719, Feb. 5. *Mirror*, No. 1.

1719, March 14. *London Mercury*, No. 1. The author's design, in publishing this paper, is to supply the publick with the best intelligences from France, Spain, and Italy, much sooner than any other newspaper; and the Dutch news shall also be published with the utmost expedition, whenever it contains any thing worth reading. He promises to keep strictly to truth, and avoid partiality and imposition. It is proposed to publish this paper occasionally, as the mails arrive.

1719, March 14. *Plebian*; by a member of the house of commons, No. 1. This pamphlet was the production of sir Richard Steele, for the purpose of alarming the nation to the dangers which he apprehended would arise from the earl of Sunderland's memorable act, called the *Peerage Bill*, by which the number of peers should be fixed, and the king restrained from any new creation of nobility, unless when an old family should be extinct. This paper was also the consequence of a vehement controversy between Steele and Addison, and the latter published the *Old Whig* in answer to Steele, to whom he gave the appellation of "Little Dickey;" but Steele was respectful to his early friend, though he was now his political adversary. Lord Sunderland's bill was at length rejected.

1719, March 19. *Old Whig*, No. 1.

1719, March 21. *Patrician*, No. 1.

1719, Aug. 6. *Thursday's Journal*, with a Weekly Letter from Paris, No. 1.

1719, Aug. 28. *Jesuite*, No. 1.

1719, Oct. 3. *Daily Post*.

1719. *The York Courant*, No. 1. There was a newspaper established in this city prior to the *Courant*, called the *York Mercury*; but it seems impossible to state with accuracy when it commenced, or when it terminated.

\* John Dunton mentions a Mr. CLAYTON, a bookseller, of Manchester, and says, "he was an apprentice to Mr. Johnson, of the same town, but his master thinking it necessary to be a knave, and as the consequence of it, to walk off, so Mr. Clayton succeeds him, and has stepped into the whole business of that place, which is very considerable, and if he have but prudence he may thrive apace."

† During Mr. Yates's residence at Chesterfield, I often saw this paper, but am sorry to say it is now destroyed. *Ed.*

1719, Oct. 23. *Manufacturer*; or the British trade truly stated, No. 1. The *British Merchant*, Nov. 10; and the *Weaver*, Nov. 23. These three periodical papers owe their origin to a dispute between the dealers in the woollen and calico manufactures. The subject seemed strongly to have arrested the public attention, and was at length noticed by the patriotic pen of sir Richard Steele, who wrote a paper under the appellation of the *Spinster*.

1719. *The Present State of the Republic of Letters* commenced.

1719, Oct. 31. *St. James's Weekly Journal*, or *Hanover Postman*.

1719, Nov. 10. *British Merchant*, No. 1.

1719, Nov. 23. *Weaver*, No. 1.

1719, Dec. 21. *The Boston Gazette*, No. 1. This paper was established by William Brooker, who having been appointed Campbell's successor in the post-office, resolved to turn his official advantage to account, and consequently started the second newspaper in the colonies, employing James Franklin for his printer. In two or three months after, Brooker, in his turn, was superseded by Philip Musgrave, who accordingly coming into possession of the newspaper, gave the printing of it to Samuel Kneeland, who had been an apprentice to Green, and who issued it for eight years. This journal, with some changes, was carried on till the year 1752. Campbell continuing the *News Letter*, (see p. 589, ante,) skirmished with the *Gazette*, on its first demonstration of poaching on his manor; but it treated him rather magnanimously, and he soon had the sense to see that it rather multiplied than divided patronage;—they helped each other, for the *News Letter* languished till the *Gazette* was set up, and never languished after. The *News Letter*, upon Campbell's death, at the age of seventy-five, fell into the hands of one of the Greens; and we are told, "assumed and preserved a more temperate and conciliating tone."

The first newspapers in North America were commonly printed on a half sheet of pot paper. Occasionally, when there was a special press of matter, a whole sheet was issued. Sometimes, they were printed in folio, sometimes in quarto, no great regard being had to the convenience of binding. Campbell adopted the same plan as Dawks and other printers had practised in England, by printing for the convenience of being sent by the post; for in an early number, he informs his readers, that "for the advantage of the post-office, an entire sheet of paper, one half with the news, and the other half on good writing paper to write their letter on, may also be had there for every one that please to have it every Monday." At this time there were only four or five post-offices in British America. It appears that the news from England was often much in arrear, for in one number, Campbell informs his readers that he had been "thirteen months behind with our foreign news, beyond Great Britain, now less than five months." This he appears to have accomplished by publishing a sheet a week.

1719, Dec. 22. *American Weekly Mercury*, No. 1. printed and published by Andrew Bradford, Philadelphia. This was the first newspaper in British America, out of Boston.

1719, Dec. 26. *London Journal*; or, the Thursday's Journal continued on Saturdays; with a weekly letter from Paris, and from Genoa, No. 22.

1720, Jan. 14. Mr. CLIFTON printed a ballad *On the birth of the Pretender's son*; for which he was taken into custody, and his press and papers were sealed up.

1720. Died, TIMOTHY GOODWIN, an eminent bookseller in Fleet-street, London. Dunton says, "Mr. Timothy Goodwin published Dr. Well-wood's *History of an Hundred Years*. He is esteemed a very honest man; and what he engages upon is either very useful or very curious. William Rogers, John Harris,\* and myself, were once partners with him in publishing some *Dying Speeches*; and I observed a more than

\* I shall next characterize my honest friend Mr. JOHN HARRIS, which is an epithet so deservedly due to his memory, that I do not think there is a bookseller in London but what will own him as just a man as they ever knew. His little body, as Cowley calls it, was a sort of Cupid's bow, but what nature denied him in bulk and straightness, she gave him in wit and vigour. He had a rich genius, as is seen by his *Poem on the Lord Russell*, was very active in trade. Honesty was his distinguishing character. His friend, Mr. Larkin, being once asked who was the honestest bookseller in London, returned this extempore answer:

Of all honest booksellers, if you'd have the marrow,  
Repair to King John, at the sign of the harrow.

The same person would often say, John Harris was honest upon the account civil—he might have said upon the account religious, for in our ramble to Oxford (which Wesley improved to a poem) I had a special occasion to try his virtue, and I found him almost the only man that would be honest without looking after. Mr. Harris and I were partners in *Coke's Detection*, the *Secret History of Whitehall*, *Leibourn's Panarthritis*, and in thirty other valuable books, and I always found myself as safe, or rather more secure in his hands than I was in my own. From the day I left my shop in the Poultry, I put all I prioted into John's warehouse, and found him always ready to even accounts, and to discharge his trust to half a farthing. We were a sort of Guy and Parker for absolute confidence in each other, and our friendship, like theirs, increased so fast, that an even thread of endearment ran through all we said or did. In the year 1697, I gave Mr. Harris the copy of Iris's funeral sermon, entitled *The Character of a good Woman*, and thought all kindness done to him was the same as done to myself. But all human things are given to change, and therefore after a long experience of one another, we entered into articles of friendship, that so (by a marriage of souls) our friendship might be immortal. I do not wonder that we had this particular friendship for each other, for we were not only constant partners in trade, but were engaged together in our very apprenticeship by a reciprocal participation of good offices, which was the effect of a deep rooted and strong sympathy. The agreeableness of humour united first our souls, and taught us the mysterious lessons of Platonic love. We saw each other and were straight inspired with sacred inclination. My eye no sooner fixed on his, but through that perspective I could see the inward virtue of his soul, which immediately produced a veneration in my breast, and I soon found our hearts beat time to one another, so that now our friendship was become sacred to us, and our joys and sorrows were mutually interchanged. Our joys and griefs were still the same; no prosperous or adverse fortune could ever change our minds, to warp us either to flattery or contempt; but with an even mind we still sustained the different accidents of human life. But, alas! "the dearest friends must part," for the same day he welcomed me home from Dublin, he was seized with his old distemper the phtisis, &c. which ended his life in a few days. His kind and obliging wife persuaded him to go to Kingsland, in hopes the air would recover him; but the last sands of his life were run, and

ordinary openness and justice in his dealings. He is very exact and punctual in trade. He is Dr. Sherlock's\* bookseller, and printed abp. Tillotson's works, in conjunction with Mr. B. Ailmer.† Mr. Goodwin was joint printer of the "votes of the house of commons," from 1794 till his death.

1720. Dean Swift published, in Dublin, a treatise, entitled, *A Proposal for the universal Use of Irish Manufactures, &c.*, utterly rejecting and renouncing every thing wearable that comes from England. Mr. Waters, the printer, was seized and forced to give great bail; but upon his trial, the jury, though some pains had been bestowed in selecting them, brought him in *not guilty*; and it was not until they were worn out by the threats of the lord chief justice (Whitshed), who detained them eleven hours, and shut them up nine, to reconsider their verdict, that they at length, reluctantly, left the

there was no turning the vital glass. He received the sacrament a little before he died; expired with great serenity of mind; and I do not fear but my friend Harris is gone to heaven. At the same time Mr. Harris removed to Kingsland, I was seized with a fit of the stone, so that I could neither visit him in his sickness, nor perform the last office of love to his dead body. However, to shew my respects for his memory, I have here given his true character, and, prythee John

Take this short summon'd, loose, unfinished verse,  
Cold as thy tomb, and sudden as thy hearse;  
From my sick thoughts thou canst no better crave,  
Who scarce drag life, and envy thee thy grave.  
Ah! happy friend, would I for thee had died,  
Ah! would I had thy fatal place supplied!  
Yes, dear John Harris, my esteem for thee  
Was equal to thy worth and love for me;  
Oh, dearer than my soul! If I can call it mine,  
For sure we had the same—'twas very thine,  
'Twas thy dear friendship did my breast inspire,  
And warm'd it first with a poetic fire,  
But 'tis a warmth that does with thee expire; [prove,  
So pure, but not more great, must that blest friendship  
(Could, ah! could I to that wish'd place and thee remove)  
Which shall for ever join our mingled souls above.

John Dnnton also characterizes Mrs. Elizabeth Harris. He says:—"Her most remarkable graces are beauty, wit, and modesty; so pretty a fabric was never framed by an Almighty architect for a vulgar guest. He showed the value which he set upon her mind when he took care to have it so nobly and so beautifully lodged; and to a graceful carriage and deportment of body there is joined a pleasant conversation, a most exact picture, and a generous friendship, all which as myself and her she friend can testify, she possesses in the height of their perfection. She printed my *Panegyrick on the Lord's Supper*, the great *Historical Dictionary*, the present *State of Europe*, and other copies that have sold well."

\* William Sherlock, dean of St. Paul's, was born in 1641. He was chiefly distinguished in his life time for his writings in controversial theology, after which he wrote near fifty books and pamphlets. His *Practical Treatise on Death*, published in 1696, has been highly valued, and much read. He died at Hampstead, June 19, 1707, and was buried in St. Paul's. His son, Dr. Thomas Sherlock, born in 1678, became bishop of London, and was also distinguished as a warm and spirited controversial writer. His works are very numerous, and his sermons particularly admired for their ingenuity and elegance. He died at Fulham, July 18, 1761.

† Barabazon Ailmer is a very just and religious man; I was partner with him in Keith's *Narrative of the Proceedings at Turner's Hall*; and so had an opportunity to know him. He is nicely exact in all his accounts, and is well acquainted with the mysteries of his trade. He printed bishop Tillotson's works, so many of them as came abroad in his life-time. He published Dr. Barrow's work, and has been as often engaged in very honest and very useful designs as any other that can be named through the whole trade.—*Dawson*.

matter in his hands, by a special verdict. But the measures of Whitshed were too violent to be of real service to the government. Men's minds revolted at his iniquitous conduct, and the trial of the verdict was deferred from term to term, until the arrival of the duke of Grafton, as lord lieutenant. A *noli prosequi* was then granted, which left the advantage, if not the honour of victory, with Swift and the patriots of Ireland. Swift persecuted lord chief justice Whitshed and Godfrey Boate, a judge of the king's bench, who had also distinguished himself on the trial of the printer, by such an unrelenting train of lampoons and epigrams, as at once made his satirical powers dreaded, and excited against the offenders and their memory, the odium which their conduct had deservedly excited.—Sir Walter Scott's *Life of Swift*.

1720, Feb. 13. NATHANIEL MIST was convicted of printing in his *Weekly Journal*, some reflections on the king, for his interposing in behalf of the Protestants of the palatinate, and was adjudged to stand twice in the pillory, to pay a fine of £50, to be imprisoned for three months in the king's bench, and to give security for his good behaviour for seven years.

1720. At this time it became an established rule for dramatic authors to have the profits of the third, sixth, and ninth nights for their benefit.

1720: JACOB TONSON, probably by the patronage of the duke of Newcastle and Mr. secretary Craggs, obtained a grant for himself and his nephew, Jacob Tonson, junior, (son of his elder brother Richard) for the supplying some of the public boards and great offices with stationery, bookbinding, bookselling, and printing, for the space of forty years; and in 1722, the whole was assigned over to the nephew, who in 1733, obtained from sir Robert Walpole, a further grant of the same employments for forty years more, to commence at the expiration of the former term. This very lucrative appointment was enjoyed by the Tonson family, or their assigns, till the month of January, 1800.

1720. A printing-press was established in KINGSTON, the capital of the island of Jamaica.

1720. A volume entitled, *Antiquités de la ville d'Harfleur*, 8vo. was the first specimen of typography known to have been executed there.

1720, Nov. 6. JOHN MATTHEWS, aged about eighteen years, an apprentice to his mother, who had a printing-office in Pelican-court, Little Britain, was executed at Tyburn, upon this day, for printing a libel, entitled, *Ex ore tuo te judico, Vox populi Vox Dei*, in which it was stated, that a majority of the people being for a change of government upon whig principles, it was lawful to attempt it. His trial had taken place October 30, 1719. According to a note in the fifteenth volume of Howell's *State Trials*, p. 1327, this Matthews was a vain, weak, conceited young fellow, buoyed up by the jacobites, and for small lucre printed their treasonable papers, and dispersed them among the ignorant common people—persons of sense despising their nonsensical doctrine of hereditary right, &c.

1720, Jan. 1. *Commentator*, No. 1.

1720, Jan. 2. *Theatre*, by sir John Edgar. This paper was written by sir Richard Steele, for the preservation and improvement of the English theatre.

1720, Jan. 5. *The British Harlequin*, No. 1.

1720, Jan. 20. *Independent Whig*, No. 1. This paper was the production of John Trenchard\* and Thomas Gordon,† and written in order to oppose the high church party with a considerable degree of spirit. It terminated January 4, 1721, having extended to fifty-three numbers.

1720, Feb. 15. *Anti-Theatre*; by sir John Falstaff, No. 1. The purport of this publication was to invalidate the sentiments and opinions of sir Richard Steele in his *Theatre*.

1720, March 12. *The Muses Gazette*, No. 1.

1720, April 28. *Caledonian Mercury*, No. 1. This paper professed to give "a short account of the most considerable news, foreign and domestic, and of the latest books and pamphlets imported from abroad and printed here." It consisted of three folio half-sheets (or six pages) and was published on Monday, Tuesday, and Thursday, price three halfpence, or fifteen shillings yearly. It purported to be "printed for W. R. (William Rolland, esq. advocate) by William Adams, junior; and sold at the sign of the Printing Press, in the Parliament close." This paper was the first in Scotland which blended literary criticism with political matter, and the first number contains a notice of a contemporaneous life of the Spanish Machiavel of the day, the celebrated cardinal Alberoni,‡ "universal minister of the Spanish monarch," in which, after describing the personal appearance of this eminent individual, the writer concludes with observing, that "he is a dissembler, as far as a courtier ought to be, seldom saying what he thinks, and scarce ever doing what he says, without some difficulty in being persuaded." Mr. Adams, jun. printed 589 numbers; when the typographical duty was given to Thomas Ruddiman, January 17, 1724, and

printed at his office, in Morocco's close, in the Lawn market.

1720, May 2. *Northampton Mercury; or the Monday's Post*; being a collection of the most material occurrences, foreign and domestic, together with an account of trade. Printed by Robert Raikes and William Dicey, near All Saints' church. The following is a part of the *Introduction* to this paper:—"It is surprising to think that this famous, this beautiful, this polite corporation, has not long ago been the object of those many printers who have established printing-offices in towns of less note: and certainly it argues their want of thought; for the soul of conversation must be absolutely necessary to a body of people that excel therein. With this view 'twas that the proprietors thereof sought that gracious leave, which the worshipful Mr. mayor, the court of aldermen, and common council, have unanimously granted to them; and which they will study so to improve as to make this excellent, this admirable mystery as useful an ornament to Northampton, as that is an honour to the art. To this end, besides all common business, &c. &c.—*Northampton Mercury* office."

This paper was not numbered until April 3, 1721, when forty-nine papers had been issued.

1720, St. Ives *Mercury*. All the information which can be obtained of this paper is, that an extract appears in the *Northampton Mercury*.

1720. *The Gloucester Journal*, printed and published by Robert Raikes, who was also a partner in the *Northampton Mercury*. Mr. Raikes was one of the first provincial proprietors of a newspaper who ventured to insert the reports of the proceedings in parliament; and we find that in 1728 a complaint was lodged against him on that account. Mr. Cave was taken into custody of the sergeant at arms by order of the house of commons, for furnishing Mr. Raikes with the minutes thereof. After several days confinement, and expressing his contrition for the offence, he was liberated. In the following year Mr. Raikes again incurred the censure of the house of commons by repeating his offence; but Mr. Cave was at that time out of the scrape.

1720, May. *The Leeds Mercury*,\* No. 1. small 4to. price three halfpence, printed and published by John Hirst, every Tuesday. In the first two years, it appears that there were only about twenty advertisements received at two shillings and sixpence each.

1720, Oct. 5. *Director*, No. 1.

1720, Oct. 19. *Penny Weekly Journal*, or *Saturday's Entertainment*, No. 1.

1720, Nov. 16. *Spy*, No. 1.

1720, Dec. 3. *Churchman*, or *Loyalist's Weekly Journal*, No. 27.

1720. *Bibliothèque Germanique*, was commenced by two learned Protestants, Beausobre and L'Enfants. It was carried on till 1740, and completed in fifty volumes.

\* John Trenchard was born in 1699, had a liberal education, and was intended for the practice of the law, but turned his attention to the study of politics. King William appointed him a commissioner of the forfeited estates in Ireland. Mr. Trenchard was a man of vigorous mind, and strict integrity; he was a zealous and patriotic whig, and was for many years a member of parliament for Taunton, in Somersetshire. He died in 1733.

† Thomas Gordon was a native of Kircudbright, in Scotland, where he received a liberal education, and settled in London as a teacher of the learned languages. The factious politics of the age diverted his attention for a time from classical pursuits, and enlisting himself under the banners of the earl of Oxford, he obtained the esteem and patronage of that nobleman, and also of Mr. Trenchard, after whose death he was made first commissioner of the wine licenses, for which he wrote in support of the government. Mr. Gordon was twice married, and his second wife was the widow of Mr. Trenchard. Mr. Gordon published a translation of *Tacitus*, and a version of *Salustius*, which were superseded, however, by the more elegant versions of Murphy and Stewart. He died July 28, 1754, at the age of sixty-six.

‡ Julius Alberoni was the son of a gardener, in the suburbs of Placentia, where he was born, May 31, 1664. From this low station, by good fortune, address, and abilities, he obtained a cardinal's cap, and became the first minister to the king of Spain. He died at Placentia, June 26, 1754.

\* On September 17, 1836, Mr. Baines, proprietor of the *Leeds Mercury*, published a copy and fac-simile of that paper, dated from Tuesday, Feb. 24, to Tuesday, March 3, 1729-30. No. 249, price two-pence.

1721. PETER I.\* surnamed the *Great*, having acquired the entire administration of Russia towards the close of the seventeenth century, vigorously exerted his royal influence in the promotion of every measure which appeared to him likely to enlighten, reform, and benefit his subjects; he encouraged the arts and sciences, extended the political relations of the nation, and established a *Spiritual College* or *Regulation*, for the regulation of the Russian church. As the folio *Bible* published through the care of his father, Czar Alexei Michaelowitch, was out of print, he determined to bring it into more common use than ever in his empire, and to prepare at Amsterdam, a new edition, as correct as possible, in five parts, folio; which issued from the press of Daniel Leeuwen, on his account, in 1721. It was printed on royal paper, in two columns, one for the Dutch language, and the other blank for the Russian [Slavonian] translation. In the first year after he gave orders for the printing of this work, that is to say, in 1717, the fifth part, or the *New Testament*, first appeared, with one column in Dutch, and another in the Russian [Slavonian] language. By this splendid edition of the whole bible, in Dutch and Russian, the monarch was desirous, for particular reasons, to afford his subjects a two-fold advantage; in the first place, to render the perusal of the scriptures more agreeable to them; and secondly, to instigate them to learn the Dutch language, of which he was very fond. It was indeed a common saying with him, "We have occasion for the Dutch language by sea, the German by land, but we may very well dispense with French, as we have no important relations with France." With the same design of inducing his subjects to the study of the sacred writings, he is said to have enjoined, that every person should learn to read the scriptures of the Old and New Testaments; and that none should be allowed to marry but those who could read them. But whether such injunction was ever enforced, is doubtful, since in 1806, it was on good authority supposed, that not *one in a thousand could read*; and so extremely scarce were bibles, that it was generally known a *hundred versts off*, (nearly seventy miles,) where the *treasure of a bible was to be met with!*"

Editions of the entire bible were printed at Moscow, 1751, 1756, 1757, and 1766, all in folio; in 1759, large 8vo. in 1783, 4to. and

in 1758, at Kiow, in folio: and at Suprasl, in Poland, 1743, in small folio. Editions of the New Testament were printed at Moscow, 1702, 8vo. and 1732, 4to.; and of the Psalms, 1716, 8vo. The bible has since been printed in the modern Russ, by the Russian Bible Society, in addition to several editions of the Slavonian.

1721, May 27. *The Weekly Journal* of this date gave an account of the restoration, and attempted to draw a parallel between the late times of rebellion and the present; the commons unanimously resolved that the paper was a false, malicious, scandalous, infamous, and traitorous libel, and drew up an address to his majesty, expressing the utmost abhorrence of the libel and its author, and desired that his majesty would give orders for the punishing the printer, publishers, and authors of this and all other seditious libels; whereupon, on the 3d of June, Nathaniel Mist, the printer, was committed by order of the house of commons, close prisoner to Newgate, though he was at the same time a prisoner in the king's bench, in execution for a debt of £500.

1721, June 11. A proclamation was issued, offering a reward of £2000 each, for apprehending Doctor Gaylard, an apprentice, and Nathaniel Wilkinson, a journeyman, to Nathaniel Mist, printer of the *Weekly Journal*, for being concerned in the composition of that paper. Wilkinson was apprehended, and committed to Newgate on the 5th of the following month, (July,) by the commons, for his contempt in refusing to be examined.

1721, June 15. JOSEPH HALL convicted of publishing a blasphemous pamphlet, entitled, a *sober reply to Mr. Higg's Merry Argument of the Trithetical Doctrine of the Trinity*, sentenced to stand in the pillory, to pay a fine of £200, to be imprisoned for three months, and to give security for his good behaviour for seven years. (See 1751, *post*.) Mr. Hall had £150 of his fine remitted, and did not stand in the pillory.

1721, Sept 18, Died, MATTHEW PRIOR, who, from an obscure birth, by the mere force of his abilities, rose to considerable diplomatic posts and lucrative employments. The gay epigrammatic versification introduced from France, was brought to perfection by Prior, in this country. He was matchless for his tales and light occasional verses, though some of them are degraded by their licentiousness. He wrote one serious poem of considerable length, called *Solomon; or the Vanity of the World*, and a pastoral tale, entitled *Henry and Emma*. Mr. Prior had obtained a fellowship of St. John's college, Cambridge; and in the days of his prosperity was often told, that a fellowship was too trifling a thing for him to keep, and even improper for his character; but he replied, that "every thing he had beside was precarious, and when all failed, that would be bread and cheese; on which account he did not mean to part with it." He was born at Wimbourne, in Dorsetshire, July 21, 1664, and died at Wimpole. His remains were interred in Westminster abbey.

\* Peter the Great, czar of Russia, who civilized that nation, and raised it from ignorance and barbarism to politeness, knowledge, and power, was born 9th May, 1678. The history of his life and reign would demand a folio volume, and is so eventful as to defy abridgment. The most striking passages of it are his travels, studies, and personal fatigues, for the attaining of knowledge in civil and military affairs, and the improvement of his subjects; his introduction of arts and sciences, a naval force and commerce with foreign nations; his many reformations in church and state, the army, and the customs and manners of his people; his wars with the Swedes, Turks, Tartars, and Persians; victories by sea and land, acquisitions of territory and increase of power; his regard to genius and merit, and his severe justice on offenders against the laws. All these very justly entitle him to the appellation he obtained, of "Father of his Country," which he left to lament his death, January 28, 1725.

In the hall of the stationers' company is a beautiful picture of "Matt. Prior, ob, 1721, æt. 57;" the features are full of animation and vivacity. He wears a cap and crimson gown. It had formed part of the collection of the earl of Oxford; painted, it is believed, by sir Godfrey Kneller, and was presented to the company by the late John Nichols, esq., the eminent scholar and printer.

1721, Jan. 11. *Terra Filius*, No. 1. This witty but intemperate work is ascribed to Nicholas Amherst, who having been expelled the university of Oxford, published several pieces in prose and verse, and among these *Terra Filius*, reflecting strongly on the discipline of the university, and of the characters of its members. It was published twice a-week, and concluded with the fiftieth number, on July 6, 1721. For a notice of Mr. Amherst, see the year 1742, post.

1721, Jan. 16. *Exchange Evening Post*.

1721, Jan. 20. *Daily Packet*; or, the New London Daily Post, No. 1.

1721, Feb. 11. *London Mercury*; or, Great Britain's Weekly Journal, No. 15. This was the *Penny Journal* (of which only fourteen numbers were published,) with the title changed, and the quantity enlarged.

1721, Feb. 6. *Projector*, No. 1.

1721, March 6. *Patriot*, No. 1.

1721. *The Norwich Weekly Mercury*; or, *Protestant Packet*, price three halfpence.

1721. *The Norwich Gazette*; or, *Henry Crossgrove's News*. Mr. Crossgrove was a tory, and appears to have been very unpopular with his whig rivals, who heaped upon him every kind of abuse. Like many more proprietors of early newspapers, who gave them away for the encouragement of their customers, Mr. Crossgrove inserted the following advertisement after the paper had been issued for some months:

"This is to inform my friends and customers that, on Saturday next, this newspaper will be sold for a penny, and to be continued at that price; but advertisements will still be taken gratis, as formerly. The reason of my rising it to a penny is, because the number I print is too prodigiously great to be given away any longer; and I hope none of my customers will think it dear at a penny, since they shall have the best intelligence, besides other diversions."

1721, April 1. *The Gentleman's Journal*, and *Tradesman's Companion*: containing the news foreign and domestick, the price current of goods on shore, the exports and imports, the prices of stocks, and a catalogue of the books and pamphlets published in the week.

1721, April 10. *Northampton Miscellany*; or *Monthly Amusements*, No. 1. Printed by R. Raikes and W. Dacey.

1721, April 21. *Moderator*, No. 1.

1721, Aug. 16. *The New England Courant*, No. 1. This was the third journal published in Boston, and was issued by JAMES FRANKLIN, who, as we have mentioned before, was employed as the printer of the *Gazette*. In order to get forward under the disadvantages of so undue a

competition as that of two other newspapers in such a village, it was needful to strike some new and bold stroke for popularity. Franklin took the obvious course of free and offensive comment on the respected men and opinions of the day. He was aided in his editorial labours by a society called by the moderate people, the 'Freethinkers,' and qualified by others with the less euphonious appellation of 'the Hell-fire club.' But the master-spirit in the *Courant's* better days was Franklin's brother Benjamin, then a boy apprenticed in the office. The paper provoked the severe displeasure of the clergy and the government, which the latter did not fail to manifest in the processes of legislative and judicial action.

Dr. Franklin, in his *Life*, gives the following account of the decline of the *Courant*, and of his departure from Boston:—

"An article inserted in our paper, upon some political subject which I have now forgotten, gave offence to the assembly. My brother was taken into custody, censured, and ordered into confinement for a month, because, as I presume, he would not discover the author. I was also taken up, and examined before the council; but, though I gave them no satisfaction, they contented themselves with reprimanding, and then dismissed me; considering me probably as bound, in quality of apprentice, to keep my master's secrets. The imprisonment of my brother kindled my resentment, notwithstanding our private quarrels. During its continuance, the management of the paper was entrusted to me, and I was bold enough to insert some pasquinades against the governors, which highly pleased my brother, while others began to look upon me in an unfavourable point of view, considering me as a young wit inclined to satire and lampoon.

"My brother's enlargement was accompanied with an arbitrary order from the house of assembly, 'That James Franklin should no longer print the newspaper entitled the *New England Courant*.' In this conjuncture, we held a consultation of our friends at the printing-house, in order to determine what was to be done. Some proposed to evade the order, by changing the title of the paper; but my brother foreseeing inconveniences that would result from this state, thought it better that it should in future be printed in the name of Benjamin Franklin; and, to avoid the censure of the assembly, who might charge him with still printing the paper himself, under the name of his apprentice, it was resolved that my old indentures should be given up to me with a full and entire discharge written on the back, in order to be produced upon any emergency; but that, to secure to my brother the benefit of my service, I should sign a new contract, which should be kept secret during the remainder of the term. This was a very shallow arrangement. It was, however, carried into immediate execution, and the paper continued, in consequence, to make its appearance, for some months, in my name. At length a new difference arising between my brother and me, I

ventured to take advantage of my liberty, presuming that he would not dare to produce the new contract. It was undoubtedly dishonourable to avail myself of this circumstance, and I reckon this action as one of the first errors of my life; but I was little capable of estimating it at its true value, imbibed as my mind had been by the recollection of the blows I had received. Exclusively of his passionate treatment of me, my brother was by no means a man of an ill temper, and perhaps my manners had too much impertinence not to afford it a very natural pretext. When he knew it was my determination to quit him, he wished to prevent my finding employment elsewhere. He went to all the printing-houses in the town, and prejudiced the masters against me; who accordingly refused to employ me. The idea suggested itself to me of going to New York, the nearest town in which there was a printing-office. Farther reflection confirmed me in the design of leaving Boston, where I had already rendered myself an object of suspicion to the governing party. It was probable, from the arbitrary proceedings of the assembly in the affair of my brother, that by remaining, I should soon have been exposed to difficulties, which I had the greater reason to apprehend, as, from my indiscrct disputes upon the subject of religion, I began to be regarded by pious souls with horror, either as an apostate or an atheist. I came therefore to a resolution; but my father, siding with my brother, I presumed that if I attempted to depart openly, measures would be taken to prevent me. My friend Collins undertook to favour my flight. He agreed for my passage with the captain of a New York sloop, to whom he represented me as a young man of his acquaintance, who had an affair with a girl of bad character, whose parents wished to compel me to marry her, and of consequence I could neither make my appearance, nor go off publicly. I sold part of my books to procure a small sum of money, and went privately on board the sloop. By favour of a good wind, I found myself in three days at New York, nearly three hundred miles from my home, at the age of seventeen years, without knowing an individual in the place, and with very little money in my pocket. From New York he proceeded to Philadelphia, where he obtained employment.

After the breaking up of the *New England Courant*, in 1727, nothing is known of James Franklin till 1732, in which year he removed his press and types to Newport, chief town of the state of Rhode Island, being the first in that place. He set up his press at Newport, in a room under the town school house; and after doing some little business in various ways, died in 1735, leaving the establishment to his widow and family, who continued it successfully for several years.

1721. *Cato's Letters*. These letters, or essays, on liberty, civil and religious, were published periodically in the *London*, and afterwards in the *British Journal*. They were continued very successfully for nearly three years, and were then

collected into four volumes, 12mo. They were the effusions of John Trenchard and Thomas Gordon. For the period these letters were published, they are singularly impartial. The language is clear and nervous, though sometimes coarse; and the principles of liberty are supported with a bold and manly spirit, and with no subserviency to faction or cabal.

1722, June 29. *Died*, RICHARD MOUNT, an eminent stationer on Tower hill. His death was caused by the kick of a cart horse, as he was riding over London bridge. He died in a few hours after the operation of amputation, being about seventy years of age. Dunton says, Mr. Mount "is not only a moderate, but has a natural antipathy to excess; he hates hoarding either money or goods, and being a charitable man, values nothing but by the use of it, and has a great and tender love for truth. He deals chiefly in paper and sea books, and is a hearty friend to the present government." He was master of the stationers' company for three years, 1717-19, and gave the clock in the court.

1722, July 2. SAMUEL REDMAYNE fined £300, and sentenced to suffer one year's imprisonment, for printing a libel, called the *Advantages of the Hanover Succession*. Richard Phillips, sen., fined and imprisoned in the like manner, for printing the second part of the above.

1722, Sept. 24. *Died*, JAMES WATSON, author of the *History of Printing in Scotland*, and already noticed as the promoter of many newspapers in Edinburgh. He was born at Aberdeen, and served his apprenticeship to the printing business. In 1695 he removed to Edinburgh, where he carried on business with great reputation; though he was often reduced to many hardships, being frequently presented before the privy council of Scotland, for printing in opposition to the patent granted to Mr. Anderson. In 1711, however, Mr. Watson, in conjunction with Mr. Freebairn, obtained a patent from queen Anne, and being now at liberty to pursue his calling unmolested, gave to the world many learned works; some of which were printed on very elegant types, particularly a bible, in crown 8vo., 1715, a matchless beauty, and another in 4to. Mr. Chalmers, in his *Biographical Dictionary*, states that the father of Mr. Watson was an eminent merchant at Aberdeen; but Dr. Cotton says that his father was a "popish printer," and printed for king James, in Holyrood house. See page 569, *ante*.

1722, Jan. 31. *St. James's Post*, No. 1099. The success that the *Daily Journal* has met with, obliges the publisher of this paper to discontinue it; nor will any of them come out after this day. T. Warner, the publisher of this paper, will for the future publish the *Daily Journal*.

1722, Jan. 31. *Freeholder's Journal*, No. 1.

1722, Feb. 23. *Fairy Tatler*, No. 9.

1722. *Memoirs of Literature*, second edition, 8 vols. 8vo. This work began in 1709, and was continued to 1714.

1722, May 3. *St. James's Journal*, with *Memoirs of Literature*; to be continued weekly.

1722, May 24. *Baker's News, or the Whitehall Journal*; to be continued weekly, No. 1, printed by John Baker,\* by Mercer's chapel.

1722, June 7. *Englishman's Journal*.

1722, June 19. THOMAS SHARP, printer of the *Freeholders' Journal*, tried and convicted at Guildhall, for printing a *Supplement* to that paper, No. 10.

1722, Sept. 22. *British Journal*, No. 1. To this paper the celebrated letters signed "Cato," were transferred from the *London Journal*, in which they had originally appeared in 1720.

1722, Dec. 8. *Loyal Observer revived, or Garland's Journal*, No. 1. Altered, at No. 27, to *Collin's Weekly Journal*. Freeman Collins,† resided in the Old Bailey, and was a deputy of one of the wards of the city.

1722, Nov. *Monthly Advices from Parnassus* [by Mr. Earbury, a nonjuring clergyman.] Mr. Earbury was author of several practical works. He died October 3, 1740.

1722. *Selections from Mist's Journal*, two volumes 12mo. A republication of essays which had originally appeared in that newspaper, and undertaken to oppose the government of George I. and the claims of the protestant succession. Some of these essays, which include manners as well as politics, possess merit.—*Drake*.

1723, Feb. 1. The impression of a book ready to be published, entitled a *Review of the History of England, containing the transactions and occurrences of the three last reigns, viz., James the Second, William the Third, and Queen Anne*, by Mr. Salmon, was seized; but upon perusal by the solicitor for the crown, was found to contain nothing exceptionable in it. The whole impression was returned to Charles Rivington, the bookseller.

1723, Feb. 2. *Died*, RICHARD SARE, an eminent printer, of London, aged 68, and of whom Dutton says, "His face is full of certain briskness, and mixed with an air very sweet and agreeable. He has a large stock of good-nature and charity, in which lies its chiefest excellency: courage and justice make up the other part of his character. He prints for sir Roger L'Estrange, Dr. Wake, and other learned men, and has obliged the age with many curious pieces." Mr. Sare was one of the earliest and steadiest friends of the elder Mr. Bowyer. Mr. William Bowyer, junior, printed 1724, two editions of *Death just Matter of Joy to all good Men*; a sermon preached

at the parish church of St. Pancras, on Tuesday the 11th of February, 1723, at the funeral of Mr. Richard Sare, of London, bookseller. By George Stanhope, D.D., dean of Canterbury, and chaplain in ordinary to his majesty. Printed for Richard Williamson, near Gray's-inn Gate, Holborn. Dr. Stanhope, in the sermon, passes the following eulogium upon Mr. Sare:—"An acquaintance of more than thirty years enables me to say much concerning him; yet the little I shall add will, I hope, prevail with them also to be of the same opinion. His descent was from the clergy; to which order his whole character and conduct was not only suitable, but an ornament and a blessing: for he both believed, and lived, as became one so born and bred; and was a true son of the Christian in general, and of the church of England in particular. And this, not from fashion, or education, or interest only; but upon principle and judgment, and such well-weighed conviction, as enabled him, with 'great readiness, to give an answer,' as St. Peter exhorts, 1 Pet. iii. 15, 'to every one that should ask him a reason of the hope that was in him.' His knowledge of books and men, the candour and ingenuity of his temper, the obliging manner of his behaviour, and the grateful acknowledgments of any favours and benefits received, did indeed long time since effectually recommend him, not only to the countenance and conversation, but also the friendship and special regards of many persons, eminent both in post and learning."

Among the books printed by Mr. Sare, is one entitled, the *Amours of Edward IV.* an historical novel, by the author of the *Turkish Spy*.

1723, May 24. *Died*, BENJAMIN TOOKE, immortalized as the bookseller of Swift and Pope, resided at the Middle Temple Gate, Fleet-street, leaving a considerable estate to his younger brother, Andrew Tooke, for many years master of the Charter-house school, as under and head master. For Dutton's character of Mr. Tooke see page 620, *ante*.

1723, May 29. SERVETUS, who was burnt at Geneva, Oct. 27, 1553, (see page 319, *ante*.) published a work upon the circulation of the blood, entitled *Christianissimi Rerum*, and had been printed but a month before his death. The care they took to burn all the copies of it at Vienna, in Dauphiny, at Geneva, and at Frankfort, rendered it a book of the greatest scarcity. Mention is made of one copy in the catalogue of M. de Boze's books, which has been regarded as the only one extant. In relation to this work by Servetus, Dr. Sigmund says, "The late Dr. Sims, for many years president of the Medical Society of London, bequeathed to me his copy of Servetus, to which he has prefixed the following note:—"The fate of this work has been not a little singular; all the copies, except one, were burned along with the author by the implacable Calvin. This copy was secreted by D. Colladon, one of the judges. After passing through the library of the landgrave of Hesse Cassel, it came into the hands of Dr. Mead,

\* His stature is of a just proportion; his body erect and active; of a delicate constitution, yet so strong withal, as if nature had designed him to be the strife of Mars and Venus.—*Dutton*.

† There was a Mr. BAKER, bookbinder, in Warwick-lane, of whom Dutton says, "he lives in a crowd and hurry of business; yet (as was said of Mordecai Abbot) he loses not his religion in the midst of it, but keeps close to the private and public duties of divine worship. He binds so extraordinary well, that two of my customers gave particular charge that no man in London should bind the books that they bought of me but Mr. Baker and Mr. Steel."

‡ He is a composition so made up of justice and industry that other printers may imitate but cannot exceed. He is a moderate churchman, a sincere friend, and so expeditious in dispatch of business, that he printed more sheets for me in ten days than some others did in twenty.—*Dutton*.

who endeavoured to give a quarto edition of it; but just before it was completed, it was seized by John Kent, messenger of the press, and William Squire, messenger in ordinary, on the 29th of May, 1723, at the instance of Dr. Gibson, bishop of London, and burnt, a very few copies excepted. It contains the first account of the circulation of the blood, above 70 years before the immortal Harvey published his discovery."

Dr. Sigmond wrote a work entitled *Unnoticed Theories of Serretus, a Dissertation addressed to the Medical Society of Stockholm*. By George Sigmond, M.D., late of Jesus' college, Cambridge, and formerly president of the Royal Physical Society of Edinburgh. London, 1826. This work is scarce, in consequence of having been suppressed or withdrawn from publication. It remains further to be observed respecting Serretus, that according to Dr. Sigmond, another of his theories was, that "in the blood is the life." His notions "on vegetable and animal life," are in his work *De Trinitatis Erroribus*, libri vii. 12mo. 1531. This book appears in the *Bibliotheca Patristica*, by Mr. Bohn, with the following manuscript remarks on it by Dr. Parr: "*Liber rarissimus*. I gave two guineas for this book." S.P. "Serretus was burnt for this book. He might be a heretic, but he was not an infidel. I have his life, in Latin, written by Allwoerden, which should be read by all scholars and true Christians." S.P.

1723, Sept. 23. Died, SIMON BECKLEY, clerk of the stationers' company, and deputy of the ward of Farringdon Within. He held the former office from 1697.

1723, Oct. 26. Died, ROGER NORTON, of Little Britain, printer of Latin, Greek, and Hebrew to his majesty, and one of the patentees in the office of king's printer. He was master of the stationers' company in 1684.

1723, Jan. Pasquin, No. 1.

1723, Feb. 18. *Northampton [Weekly] Mercury*, No. 147, by R. Raikes and W. Dicey.

1723, Feb. 28. *News Journal*, in English and French, No. 1.

1723, June 3. *True Briton*, No. 1. Of this publication, which was written in opposition to the administration, and in defence of Atterbury, bishop of Rochester, the profligate duke of Wharton\* was the author. It displays abilities which might have been rendered serviceable to his country, but which debauchery, and want of all principle, either stifled or directed into a wrong channel. It was published twice a week, and had a very large sale; having reached the seventy-fourth number, closed Feb. 17, 1724.

1723, June 6. *Stamford Mercury*, vol. xxi. No. 23.

1723, June 18. *Visitor*, No. 1.

1723, July 8. *Reading Mercury*, No. 1.

1723, Dec. 11. *Universal Journal*, No. 1.

1723. *The Norwich Journal*, No. 1.

1724, Died, JOSEPH COLLIER, printer, and treasurer to the stationers' company from 1702 till 1724. Dunton says, "He was my fellow-apprentice for many years, and I shall say nothing of him but what I know to be true. He has a great deal of learning, a discerning judgment, is pleasant in his conversation, and sincere in his piety. He writes an excellent hand, is an accurate accountant, and justly merits the honour the company of stationers did him in choosing him their treasurer."

1724, April 24. Owing to the different editions of the bible that had been printed by the patentees both at Cambridge and at London, being so full of errors, with a defective type, on bad paper, and sold at such an exorbitant price, his majesty George I. issued the following order to the patentees, dated this day from Whitehall:

"1. That all bibles printed by them hereafter, shall be printed upon as good paper, at least, as the specimens they had exhibited.

"2. That they forthwith deliver four copies of the said specimens to be deposited and kept in the two secretaries' offices, and in the public registries of the archbishop of Canterbury and the bishop of London, to the end recourse may be had to them.

"3. That they shall employ such correctors of the press, and allow them such salaries, and shall be approved from time to time, by the archbishop of Canterbury and bishop of London for the time being.

"4. That the said patentees for printing bibles, &c., do print in the title-page of each book, the exact price at which such books are by them to be sold to the booksellers."

In the following month, his majesty appointed a professor of modern history in each university, of the degree, at least, of master of arts, or bachelor of law, with a stipend of £400 per annum. The two first professors were Mr. Gregory, of Christ church, Oxford, and Mr. Samuel Harris, fellow of Peter house, Cambridge. For a further encouragement to the universities, the king ordered that his almoner should choose, out of the members of Oxford and Cambridge, twenty-four preachers to officiate alternately in the chapel at Whitehall, with a salary of thirty pounds a-year each.

1724, April. Lord Carteret, afterwards earl Granville, lord lieutenant of Ireland, issued a proclamation offering a reward of £300 for the discovery of the author of Drapier's fourth letter. Mr. Harding, the printer of these letters, was thrown into prison, and a prosecution directed against him at the instance of the crown. It is stated that while Harding was in jail, Swift actually visited him in the disguise of an Irish country clown, or *spalpeen*. Some of the printer's family or friends, who chanced to visit him at the same time, were urging him to earn his own release by informing against the author of the *Drapier's Letters*. Harding replied steadily, that he would rather perish in jail before he would be guilty of such treachery and baseness. All this passed in Swift's presence, who sat

\* Philip duke of Wharton, a most eccentric character, born 1699, went to France and engaged in the pretender's interest, for which he was attainted of high treason, but died at Teragona, in Spain, May 31, 1731.

beside them in silence, and heard with apparent indifference a discussion which might be said to involve his ruin. He came and departed without being known to any one but Harding. When the bill against the printer of the *Drapier's Letters*\* was about to be presented to the grand jury, Swift addressed to that body a paper, entitled *Seasonable Advice*, exhorting them to remember the story of the league made by the wolves with the sheep, on condition of their parting with the shepherds and mastiffs, after which they ravaged the flock at pleasure: some spirited verses were also circulated, and also the memorable and apt quotation from scripture, by a Quaker:—"And the people said unto Saul, shall JONATHAN die, who has wrought this great salvation in Israel? God forbid: as the Lord liveth, there shall not one hair of his head fall to the ground, for he hath wrought with God this day. So the people rescued Jonathan that he died not." Thus admonished, by sense, law, and scripture, the grand jury assembled. It was in vain that the same lord chief justice Whitshed, who had caused the dean's former tract to be denounced as seditious, and procured a verdict against the printer, exerted himself strenuously upon this similar occasion. The hour of intimidation was past, and the grand jury, conscious of what the country expected from them, brought in a verdict of *ignoramus* upon the bill. Whitshed, after demanding, unconstitutionally, and with indecorous violence, the reasons of their verdict, could only gratify his impotent resentment like his prototype Scroggs, on a similar occasion, by dissolving the grand jury. They returned into the mass of general society honoured and thanked for the part which they had acted; and the chief justice, on the contrary, was execrated for his arbitrary conduct. There is reason to believe that the death of Whitshed, which speedily followed, was hastened by the various affronts which were heaped upon him. Swift was determined to gibbet his very memory, and vindicates himself for so doing.

Swift being on a visit to the castle, asked lord

Carteret how he could concur in the prosecution of a poor honest fellow, who had been guilty of no other crime than that of writing three or four letters for the good of his country? His excellency replied, in the words of Virgil,

—"Regni novitas me talia cogit moliri."

Lord Carteret lived, at that very time, in great friendship with the dean; and, therefore, if he suspected the real author, could have no sincere wish that he might be discovered.

1724. *A compleat and private List of all the Printing-houses in and about the Cities of London and Westminster, together with the Printers' names, what News-papers they print, and where they are to be found: also an Account of the Printing-houses in the several Corporation Towns in England; most humbly laid before the Right Honourable the Lord Viscount Townshend.* Printed by William Bowyer, in White-Friars. This was the production of Samuel Negus, a printer, who took upon him to distinguish them by their political principles, and was rewarded by a letter-carrier's place in the post-office. The introductory epistle is here given:—

"To the right honourable lord viscount Townshend, one of his majesty's principal secretaries of state.

"My good lord; I was persuaded by some friends, who have the honour to be known to your lordship (which is a happiness I have not yet arrived at), to offer this list to your lordship's perusal. I have the misfortune of being brought up to this business, and was set up of my trade by the goodness and generosity of my ever-honoured uncle, captain Samuel Brown, of Norwich, (through the persuasions of my two excellent friends Mr. John Gurney and Mr. John Eccleston). Your lordship may not be altogether insensible of the hardships and the temptations a young beginner in printing may meet with from the disaffected; and how hard it is for such men to subsist, whose natural inclinations are to be truly loyal and truly honest, and at the same time want employ; while the disaffected printers flourish, and have more than they can dispatch. I have been a printer about twenty-three years, but have not been for myself above two years; in which time I have suffered very much for want of employ. On this account I have implored counsellor Brittrif, Mr. Bacon, Mr. Gurney, col. Francis Negus, Mr. Churchill, and some other gentlemen, that they would please to move your lordship on my behalf, that you would please to get me admitted as an extraordinary messenger, in which station I should not doubt of pleasing your lordship.

"When your lordship is pleased to cast an eye on the number of printing-houses there are in and about the cities of London and Westminster, your lordship will not be so much surprized at the present ingratitude and dissatisfaction of a rebellious set of men. They have no way to vend their poison, but by the help of the press. Thus printing-houses are daily set up and supported by unknown hands. The country

\* These letters were the first successful struggle of the Irish press for independence. They were written by dean Swift, then residing in Dublin, and began to appear in 1723, signed *M. B. Drapier*. The occasion which called them forth was a patent which government granted to one Isaac Wood, to supply a deficiency in the copper coinage of Ireland to the amount of £108,000. Abstractedly, there was nothing wrong in this; but the patent had been obtained surreptitiously; the local government had never been consulted. In short, the whole affair was a job, and was reckoned not only an insult to, but an attack on the independence of Ireland. Swift, being then out of favour, lost not this opportunity of retaliating upon Walpole's administration, attacking at once the scheme and all connected with it; and as the subject principally affected the shopkeepers, tradesmen, and lower orders, the author ingeniously adapted his style to the comprehension of the most ignorant, and also published them in the cheapest form. They were hawked through the streets at a penny a-piece, and posted up at the alehouses, and other public places throughout the country. The ferment produced by these letters is, perhaps, unparalleled. Both houses of parliament, and parties of all sects, political or religious, united in expressing their detestation of the scheme, which was finally dropped, after £40,000 worth had been coined; Wood himself being indemnified with a grant of £3000 a-year for twelve years.

printers in general copy from the rankest papers in London; and thus the poison is transmitted from one hand to another through all his majesty's dominions. How far this may tend to the corrupting the minds of his majesty's subjects, and how detrimental it may prove to the state, your lordship is a competent judge.

"It was thought fit by order of council, in the reign of queen Elizabeth, that there should be no more than thirty printing-houses in the cities of London and Westminster, one at the university of Oxford, and one at the university of Cambridge; so that by these means the state had them always under its eye, and knew presently where to find those printers who had in any way disturbed or offended her. It was said by a judicious gentleman, that it might not be an improper question, 'whether the ill use made of the liberty given to the press was not the principal occasion of the late rebellions and disturbances?' It is impossible, my good lord, to reduce the number of printers to what once they were; yet I would humbly inform your lordship, that there are many of them who give great offence and disturbance to the state, and who never have been brought up to that business, and ought to be put down. If the hints here offered may be of service, and not displease your lordship, they will answer their desired end."

\* John Dunton characterizes the following booksellers in the country, with whom he had dealings:

Mr. WILLIAM BONNY, printer, Bristol.—He has had great losses in trade, but in despite of fate, look greatest like the sun in lowest state. The frowns of fortune may make him poor, but never unhappy. He was always generous to those he dealt with, (as myself have found in several instances) and upon receiving a sum of money he would treat so nobly that one could not forbear loving him. Mr. Bonny always proposed a particular friendship to me, and printed for me *Mr. Baxter's Directions to the Unconverted*, the *Trials of the New England Whitches*, the *Pleasant Art of Money Calculating*, and several other books, and had printed *treble* to what he did, had not Robin Hayhurst lived so near him; but though good fortune seemed to forget him, he has now set up a press at Bristol, and had he not lost his sight, (for I hear he is now stark blind) would get a good estate in a few years.

Good unexpected—evil unforeseen,  
Appear by turns, as fortune shifts the scene;  
Some raise'd aloft come tumbling down again,  
Thee fall so hard they bound and rise again.

Mr. BISHOP, Exeter.—He is a firm adherer to the established government, and a declared enemy to popery and slavery. He is a man of strict justice, deals much, and thrives in his trade.

Mr. R. CLEMENTS, Oxford, is a thriving man, and has a quick return of trade. He acts always with a great deal of caution, which is extremely necessary in the composition of a bookseller.

Mr. HILDVARD, York.—He is the topping man in that city, and not only a just, but an ingenious man.

Mr. HIGGS, Cambridge, deals much in modern books.

## WELL AFFECTED TO KING GEORGE.

Basket (John), Black Fryers, and printer to the king's most excellent majesty.

Buckley, Amen-corner, the worthy printer of the *Gazette*.

Botham, Jewin-street.

Bridge, Little Moor-fields.

Burton, St. John's-lane.

Darby, Bartholomew-close.

Downing, eodem.

Downing, St. John's-lane.

Hunter, Jewin-street.

Humpheries, Bartholomew-lane.

Holt, St. John's-lane.

Jenour (Matthew), Giltspur-street, and printer of the *Flying Post*.

Janeway,\* White Fryers.

Leach,† Old Bailey, and printer of the *Post Man*.

Larkin, Bishopgate-street.

Mount, late of Tower-hill.

Norton, Little Britain, printer of Latin, Greek, and Hebrew to his majesty.

Negus, Silver-street, near Wood-street.

Pearson, Aldersgate-street.

Parker, Goswell-street.

Parker, senior, Salisbury-street, and printer of a *Half-penny Post*.

Pickard, Salisbury-court.

Palmer, Great Swan-alley, Goswell-street.

Roberts, Warwick-lane.

He is a very honest man, and was extremely civil to me when I kept Stourbitch fair.

Mr. KESLAWITS, late of Wight, has a good trade, considering the place; but that is not his whole dependence, he has been twice mayor of the town, and is not only rich, but a grave and discreet churchman.

Mr. MISSMULL, Chester, is a man of sense, very courteous to strangers, (as myself has lately experienced) and manages his trade with a great deal of prudence; but I have done this man a better justice in my *Dublin Scuffle*, (published in 1699) than my designed brevity will admit of here.

THOMAS WALL, Bristol.—His character resembles that of old Jacob Tomson, being a plain but sincere hearted man. He is well accomplished for his trade, which is very considerable. He was first a goldsmith, but made an exchange of that way for this of bookselling. He is a sure friend and extremely civil. I have dealt very much with him, and for those two years that I kept Bristol fair I was treated very kindly at his house.

Booksellers in Scotland.—Mr. KNOX, Mr. HENDERSON, and Mr. VALLINOR, I shall describe with myself, as to their characters, for I could never see through a *Scotsmen* in a little time.

\* I never employed him much, but I have found him very ready to serve me both before and after my misfortune, and kindness his has always given me very deep impressions.—*Dunton*.

Dunton mentions a bookbinder, whom he calls honest Dick JANEWAY: like a second Democritus, he always simpered. He brought me the joyful news of a benefit ticket in the parliament lottery, which he delivered in capers; but at other times his constant mirth was no more than a cheerful smile. He had a great loss in Alderman H—l, but misfortune did not exercise or dismay him; he could turn necessity into virtue, and put evil to good use. He was an excellent binder, a tender husband, a kind father, the surest friend, the easiest enemy, and so much more happy than others, by how much he could abide to be more miserable.

† This was DRYDEN LEACH, whose father, Francis Leach, has been noticed at page 600 ante. Another Dryden Leach, (grandson, I believe, of Francis) had the merit of shewing to his brethren of the profession, that the productions of the English press might easily be brought in competition with the boasted editions of Paris.—*Nichols*.

Read, White Fryers, Fleet-street, and printer of a *Half-penny Post* and a *Weekly Journal*.

Raylton, George-yard, Lombard-street.

Samuel Aris, Creed-lane.

Staples, St. John's-lane.

Watts and Tonson, Covent Garden.

Tookey,\* behind the Royal Exchange.

Wilkins, Little Britain, and printer of the *Whitehall Evening Post*, the *Whitehall* and *London Journal*.

Wood, eodem.

Woodfall,† without Temple Bar.

Wilmot, Fenchurch-street.

#### NONJURORS.

Bettenham, St. John's-lane.

Bowyer, White Fryers, Fleet-street.

Dalton, St. John's lane.

#### SAID TO BE HIGH FLYERS.

Applebee, Fleet-ditch, printer of the *Daily Journal*, and of a *Weekly Journal* bearing his own name.

Barber, Lambeth-hill (an alderman of London.)

Badham, Fleet-street.

Bruges, Jewin-street.

Clark, Thames-street.

Collins, Old Bailey.

Cluer, Bow Church-yard.

Edlin, near the Savoy.

Gilbert and Phillips, Smithfield.

Gent,† Pye-corner.

Grantham,‡ Paternoster-row.

\* He is a pretty modest obliging printer.—His whole behaviour has been very innocent and undesigning—he is a man of great piety and moderation, and deserves the title of an honest printer. In this character of Mr. Tookey you have the true picture of Mr. Larkin, junior, Mr. Job How, commonly called honest Job, Mr. Bridges, and Mr. Barber, first an apprentice to Mr. Larkin, senior—for these four printers so exactly resemble Mr. Tookey in piety, good humour, and other obliging qualities, that it is impossible to say which is the better christian.—*Denton*.

† This was the first, I believe, of a name which has now for more than a century been conspicuous in the annals of typography. That the more immediate subject of this note was a man of wit and humour, is evident from the famous old ballad of *Darby and Joan*, which he wrote when he was apprentice to the printer of that name (Mr. John Darby, of Bartholomew Close, who died in 1730.) At the age of forty he commenced master, at the suggestion of Pope, who had distinguished his abilities as a scholar whilst a journeyman in the employment of the printer to that admired author. Of his personal history I knew little farther, except that he carried on a considerable business with reputation; and had two sons; Henry, a printer, in Paternoster-row; and George, a bookseller, at Charing-cross, both of whom I well remember.—*Nichols*. Of the members of this distinguished family of scholars and typographers, see post.

‡ This was Thomas Gent, the well known printer, who removed his office from London to York, in 1784.

§ He swells not, like I—his neighbour, with looking big, but is courteous and affable to all; holding courtesy so main an ornament to a thriving printer, as that he loathes any thing that is proud or starched. He is one that thinks what he does, and does what he says; and foresees what he can do before he promises, so that I have found his "If I can," is more than another's assurance. He is just and punctual in all his dealings, and wipes from printing all the blemishes and imputations cast upon it by ignorance or malice. And to speak the truth, he is the best friend to a bookseller of all the printers I ever knew; he is a man of large faith, and so very generous to those that live in his debt, that one but a villain would wrong him. For my own share, I have received so many favours from Mr. Grantham, that I should think it a sin to put

Heathcote, Baldwin's Gardens, printer of a *Halfpenny Post*, bearing his own name.

Hind, Old Bailey.

Humphreys, printer to the parish clerks, Silver-street, in the city.

James, Little Britain, author and printer of the *Post-boy*.

Ilive,\* Aldersgate-street.

Lee,† St. John's-lane.

Lighthoy, Old Bailey.

Meere, Old Bailey, and printer of the *Daily Post* and *British Journal*.

Midwinter, Pye-corner.

Mist, Great Carter-street, and printer of a scandalous *Weekly Journal*, bearing his own name.

away any thing that he can print, and for this reason he is my printer is chief. I never dispose of a copy but I make it the main article that Mr. Grantham shall print it, and all this is but what I owe him, for the favours I have received from him and Mr. Darker, his predecessor, made him his debtor for ever. In truth Mr. Grantham is so kind to me, the name of friend is too narrow for him, and I want a word that is more significant to express him; and which crowns his character, he is blest with a wife that deserves him, for Mrs. Grantham's prudence gives so many proofs of her capacity for domestic government, that the heart of her husband doth safely trust in her, and like an helmsman she is willing to be ruled by him in all things, even as Sarah obeyed Abraham, calling him lord. or if any quarrel is, it is which of the two shall live most content; so that as marriage has made them the same flesh, so love and sympathy has so united them that it is very likely they will expire together.

Mr. Grantham married the widow of Mr. Darker, a printer in partnership with Mr. Newman, and of whose Dutton makes honourable mention. Mr. Darker and Mr. Newman were partners when I first employed them, and took some hundred pounds of me yearly while they continued together in Little Britain. But Mr. Newman removing, I procured Mr. Darker the same business they had both engaged in before. He took me so much for his friend, that when he heard of my misfortunes he told Mr. Larkin that he would not have any concerns between himself and me give me the least uneasiness. I have found the same favor from his widow since his decease, and now is her second marriage, Mr. Grantham, her husband, has shewn himself the same friend, and though I have been long in Egypt, his faith and his good opinion are not the least disordered. To return to Mr. Darker, he was my true friend, a kind neighbour, a generous dealer, and an enemy to no man but himself. His death did scarcely afflict me.

— An epitaph upon his stone  
I cannot write, but I can weep him one.

As for Mr. Dorman Newman, he was very handsome, and had abundance of good nature in him; he was something out of order in his sober hours; but I hope he died a righteous man.—*Denton*.

Mr. Hugh Newman served his time with Mr. Dorman Newman, and is nearly related to him. He is of a cheerful, facetious temper, and much admired by the Scotch gentry. He has not, indeed, the politeness of a courtier, but an honest bluntness that better becomes him. He really merits that respect which his friends pay him, and whenever he marries, (I so much desire his welfare: I wish he may meet with a wife that will "look well to the ways of her household." Prov. xxi. 37.—*Denton*).

\* This was the father of Jacob, Abraham, and Isaac Ilive, who were all printers, and of whom notices will be given hereafter.

† Mr. Lee, in Lombard street. Such a pirate, such a cormorant was never before. Books, men, shops, all was one: he held no property, right or wrong, good or bad, till at last he began to be known: and the booksellers not enduring so ill a man among them to disgrace them, spewed him out, and off he marched for Ireland, where he acted as felonious-lee as he did in London. And as Lee lived a thief, so he died a hypocrite; for, being asked on his death-bed, if he would forgive Mr. G—, that had formerly wronged him: "Yes," said he, "if I die, I forgive him, but if I happen to live, I am resolved to be revenged on him."—*Denton*.

Motte, Aldersgate-street.  
 Moor, Southwark.  
 Norris, Little Britain.  
 Nutt, in the Savoy.  
 Powell, Aldersgate-street.  
 Redmayne, Jewin-street.  
 Richardson,\* Salisbury-court.  
 Says, Aldersgate-street.  
 Says, Bishopgate-street.  
 Sharp, Ivy-lane, printer of the *Freeholder's Journal*.  
 Took, Old Bailey.  
 Todd, Fleet-street.  
 Wilde,† Aldersgate-street.

## ROMAN CATHOLICKS.

Berrington, Silver-street, in Bloomsbury, printer of the *Evening Post*.  
 Clifton, Old Bailey.  
 Gardiner, Lincoln's-Inn-fields.  
 Howlett, eodem.

A list of the several newspapers published in London, with the printers' names, and where they may be found.

## DAILY PAPERS.

*Daily Courant*, printed by the worthy Mr. Buckley, Amen-corner.  
*Daily Post*, Meere, Old Bailey.  
*Daily Journal*, Appleby, near Fleet-ditch.

## WEEKLY JOURNALS.

*Mist's Journal*, Great Carter-lane.  
*Freeholder's Journal*, Sharp, Ivy-lane.

\* This was Samuel Richardson, the eminent printer, author of *Pamela*, and other well known novels, who will be fully noticed in a subsequent page. Another printer of the same name, and of some eminence in his profession, is mentioned by Dutton. "Mr. Richardson, an eminent printer in Fenchurch-street. He is fully much in years, however his young inclinations are not altogether dead in him, for I am informed that his son and he have married two sisters, but let nature run as long as it pleases, so as it keep within bounds. The man is grave and very just in trade, he has done a great deal of excellent work, and printed much for me."

There was an Edmund Richardson, binder, of whom Dutton says—"He was a very kind neighbour in Scolding Alley, for many years—bound most of my calves leather books whilst I lived in the Poultry, and continued to bind for me as long as I traded. From this long acquaintance with Mr. Richardson, I am able to give him the following character. He is an excellent binder, and very just and punctual in all his dealings—to all his promises there needs no other bond but his word, and no other witness but God—he shuns jests in holy things, and abhors lies, though in jests he speaks as near as he can to the capacities and not to the humour of men. He so frames his talk as one that is going shortly to give an account of his words—he detracts from no man but himself—speaks well of all men till he knows otherwise—and where he cannot speak well he is silent. In a word, there is a purity laid so deep in his nature, that those who knew him the earliest have often said that even their nature seemed entirely sanctified in him; so that Mr. Richardson having thrived by his binding trade, he is now a flourishing bookseller in Newgate-street, and so will continue, for he measures his wealth by his mind, not by his estate; and then to be sure he will thrive, for a contented mind is ever rich."

† He has a very noble printing house in Aldersgate-street. Whilst I employed him he was always very civil and obliging. I brought him to be concerned in printing the *Present State of Europe*, in which he is yet employed.  
 —Dutton.

1724, Dec. 27. Died, THOMAS GUY, bookseller, in Lombard-street; but who is better known as the amiable friend of the poor and unfortunate, and founder of the noble hospital which bears his name. This generous benefactor was the son of Thomas Guy, citizen and carpenter, who was by profession a lighterman and coal dealer in Horseley down, Southwark. He was bound apprentice, September 2, 1660, for eight years, to Mr. John Clarke, bookseller, in the porch of Mercer's chapel; and in 1668, having taken up his freedom, and been admitted a liveryman of the company, set up trade with a stock of about £200, near Stocks market. The English bibles being at that time very badly printed, Mr. Guy engaged with others in a scheme for printing them in Holland, and importing them; but, this being put a stop to, he contracted with the university of Oxford for their privilege of printing them; and having been admitted into the court of assistants of the stationers' company, he carried on a great bible trade for many years to considerable advantage.\* Thus he began to accumulate money, and his gains rested in his hands; for, being a single man, and very penurious, his expenses were next to nothing. His custom was to dine on his shop counter, with no other tablecloth than an old newspaper; he was also as little nice in regard to his apparel. The bulk of his fortune, however, was acquired by purchasing seamen's tickets. These he bought at a large

\* Mr. Guy and Mr. Parker were partners in printing the bible at Oxford, in 1681. Of the latter gentleman Dutton says. "This bookseller lives by the Royal Exchange—his principles keep him entirely firm to the interest and religion of the Church of England—and he had ever the character of being a fair dealer. Mr. Guy and he were many years partners in printing the Bible, at Oxford, and contracted a remarkable friendship. Mr. Parker having got a good estate by his trade, he was so generous to leave it to Mr. Nelmes that had been his apprentice; but the unfortunate Nelmes, attempting to get an estate too soon came to an untimely end."

Dutton thus speaks of Mr. Guy: "THOMAS GUY, in Lombard-street, makes an eminent figure in the company of stationers, having been chosen sheriff of London, and paid the fine; and is now a member of parliament for Tamworth. He entertains a very sincere respect for English liberty. He is a man of strong reason, and can talk very much to the purpose on any subject you will propose. He is truly charitable, of which his almshouses to the poor are standing testimonies."

discount, and afterwards subscribed in the South Sea company, which was established in 1710, for the purpose of discharging those tickets, and giving a large interest. Here Mr. Guy was so extensively, as well as cautiously concerned, that in the year 1720, he was possessed of £43,500 stock, by disposing of which when it bore an extremely advanced price, he realized a considerable sum. While we are compelled, in this brief notice of Mr. Guy's life, to associate his name with one of the most infamous transactions in the commercial history of our country, it is due to his memory, as well as to the cause of Christian charity, to add, that no dishonourable imputation ever attached to him on this score, notwithstanding the flippant and unfair remarks of Pennant, in his *History of London*.\* Be it remembered, that much of his money was acquired by labour and perseverance, as well as by that practice of self-denial, which probably was necessary at the outset of life, and afterwards became a habit. To his relations he was attentive while he lived; and his actions prove that he did not hoard up his means until they could no longer be of use to himself. He kindly lent money to some of his connexions, and granted annuities to others. In 1707, he built and furnished three wards on the north side of the outer court of St. Thomas's hospital, in Southwark; and gave £100 to it annually for eleven years preceding the erection of his own hospital. Sometime before his death, he erected the stately iron gate, with the large houses on each side, at the expense of about £3000. On August 5, 1717, he offered to the stationers' company, through the medium of his friend Mr. Richard Mount, £1000, "to enable them to add £50 a-year, by quarterly payments, to the poor members and widows, in augmentation of the quarterly charity;" also £1100, "to be paid quarterly to such charitable uses as he should appoint by his will, in writing;" and a further sum of £1500 "to have £75 a-year paid quarterly for another charitable purpose, to be appointed in like manner;" in default of such appointments the sum of £125 to be paid annually by the company of St. Thomas's hospital. And, no appointments having been made, the same is now regularly paid by the hospital. He was seventy-six years of age when he formed the design of building the hospital which bears his name.† The charge of erecting this vast pile

amounted to £18,793, besides £219,499, which he left to endow it: and he just lived to see it roofed in. He erected an almshouse with a library at Tamworth, in Staffordshire, (the place of his mother's nativity, and which he represented in parliament) for fourteen poor men and women; and for their pensions, as well as for the putting out of poor children apprentices, bequeathed £125 a-year. To Christ's hospital he gave £400 a-year for ever; and the residue of his estate, amounting to about £80,000, among those who could prove themselves in any degree related to him. This truly eminent philanthropist dedicated to charitable purposes more than any one private person upon record in this kingdom.

In the chapel of his hospital a beautiful monument was erected in 1779, executed by Mr. Bacon, and is said to have cost £1000. Mr. Guy is represented in his livery gown, holding out one hand to raise a poor invalid lying on the earth, and pointing with the other to a distressed object, carried on a litter into one of the wards, the hospital being in the back-ground. On the pedestal is this inscription:

Underneath are deposited the remains of

THOMAS GUY,

Citizen of London, Member of Parliament, and the sole founder of this hospital in his life-time.

It is peculiar to this beneficent man to have preserved, during a long course of prosperity and industry, in pouring forth to the wants of others, all that he had earned by labour, or withheld from

self-indulgence.

Warm with philanthropy, and exalted by charity, his mind expanded to those noble affections which grow but too rarely from the most elevated pursuits.

After administering with extensive bounty to the claims of consanguinity, he established this asylum for that stage of languor and disease, to which the charity of others had not reached: he provided a retreat for hopeless insanity, and rivalled the endowments of kings.

He died the 27th of December, 1724, in the 90th year of his age.

As Mr. Guy printed only for profit, very little can be expected from him of excellence. The best of his bibles is the small 8vo. 1681. His 4to. bibles have the advantage of a very broad-faced letter.

1724, Jan. 1. *Protestant Intelligence*, No. 1. This paper begins with good portraits of "The Glorious Royal Guard of the Protestant Religion; King George I., George Prince of Wales, and Prince Frederick."

1724, Feb. 21. *Tea Table*, No. 1.

1724, Feb. 21. *Honest True Briton*, No. 1.

\* 1720, June. At this time, the whole nation, clergy and laity, whigs and tories, churchmen and dissenters, statesmen and even ladies, who had, or could procure money for the purpose, turned stock jobbers, and entirely neglected their several professions and employments, to attend to some bubble or other.—*Salmon's Chronological History*.—Gay, who, under the form of a fable, often cooched just and biting satire, alluding to the large fortunes suddenly made, by means of the "south sea bubble," remarks,

How many sancy airs we meet,  
From Temple-bar to Aldgate-street!  
Proud rogues who shared the South Sea prey,  
And sprung, like mushrooms, in a day.

† To shew what great events spring from trivial causes, it may be observed, that the public are indebted to a most trifling incident for the greatest part of his immense fortune.

tunes being applied to charitable uses. Mr. Guy had a maid servant whom he agreed to marry, and preparatory to his nuptials he had ordered the pavement before his door to be mended so far as a particular stone, which he marked. The maid, while her master was out, innocently looked on the pavers at work, saw a broken place they had not repaired, and mentioned it to them, but they told her Mr. Guy had directed them not to go so far. "Well," says she, "do you mend it, tell him I bade you, and I know he will not be angry." It happened, however, that the poor girl presumed too much on her influence over her wary lover, with whom the charge of a few shillings extraordinary turned the scale entirely against her; for Guy, enraged to find his orders exceeded, renounced the matrimonial scheme, and built hospitals in his old age.

1724, March 23. *Plain Dealer*, No. 1.—Of this paper Dr. Johnson observes, that it "was a periodical paper written by Mr. Hill\* and Mr. Bond, whom Savage called the two contending powers of light and darkness. They wrote by turns each six essays; and the character of the work was observed regularly to rise in Mr. Hill's weeks, and to fall in Mr. Bond's." The *Plain Dealer* was published twice a week, and was concluded on May 7th, 1725, having reached one hundred and seventeen numbers; it was reprinted in 1734, and forms two octavo volumes.

It was unfortunate, that in writing the *Plain Dealer* that Mr. Hill should have fixed upon a coadjutor so inferior to himself as Mr. Bond. Notwithstanding this unhappy choice, it is, as a miscellaneous paper, the best that has come under our notice since the *Free Thinker*.

1726, Feb. *The Occasional Paper*, No. 2.

1726. A learned man, ISRAHIM EFFENDI, fully perceiving the advantages to be derived from the use of a press, exerted his influence towards obtaining the erection of one in Constantinople, and shortly afterwards succeeded. Peignot, in his *Repertoire des bibliographies speciales*, p. 163, affirms a *Turkish Grammar*, dated 1730, to be the first book really printed at Constantinople: in this assertion however he is decidedly mistaken, since the Bodleian library contains two works executed in this city, bearing the date of 1729, in one of which Ibrahim is called Architypographer to the Sublime Porte; so that printing was then exercised, not only openly, but under the express authority of the government. It rather appears that the first printed book was a *Turkish-Arabic Lexicon*, by Mahomet, the son of Mustapha, executed between 1726 and 1728, in two handsome volumes small folio, of which likewise a copy has been recently placed in the same library. Yet even this printing establishment of Ibrahim (who is said by lord Teignmouth, in his *Life of Sir William Jones*, to have learned Latin by his own industry, to have been no contemptible writer in his native language, and to have cast his own types) does not seem to have been carried on with vigour. M. Hammer, in his catalogue of Arabic, Persian, and Turkish manuscripts contained in the imperial library at Vienna, enumerates sixty-three works printed at Constantinople and Scutari from the year 1728 to 1819. In this series, however, there is a complete blank from the year 1744, that of the death of Ibrahim, after which it does not appear that any thing was done, except that the *Lexicon* of 1728 was reprinted in 1758, under the care of another Ibrahim. Through the influence of the scribes, the press can scarcely be said to have gained an effectual footing in Constantinople until the year 1782; at which period the press was re-established through the interest of the French ambassador at the Ottoman court, who erected a press in his own house at Pera. Of Ibrahim's first book, the *Turkish Lexicon* of 1728, one thousand copies were printed, at the cost of thirty-five piasters for each copy. The grammar mentioned by Peignot, as also many of the Constantinople earlier Hebrew books, may be seen in the Bodleian library: a copy of the very rare *Polyglott Pentateuch*, executed here in 1546, is in the imperial library at Vienna; and a second in the Oppenheimer collection: and it is said that most of the books from Ibrahim's press are to be found in the royal library at Paris. Many of them are in possession of Mr. W. Marsden, and are enumerated in the *Bibliotheca Marsdeniana*, 4to., 1827. Of the *Grammaire Turque* M. Renouard, of Paris, had a copy, every sheet of which was on paper of different colours. For some interesting details of the modern printing-establishment and two paper manufactories of Constantinople in 1828, see Walsb's *Narrative*, 8vo. 1828.

1726, May 3. THOMAS WOOD, "a member of the company of stationers, gave the king's coat of arms."

\* Aaron Hill was born in London, Feb. 19, 1685, and was a man of amiable manners and of great moral worth. In 1709 he married a lady of beauty, wealth, and accomplishments, and in the same year, became manager of Drury-lane theatre, for which he wrote his *Elfred*, or *the Fair Inconstant*. The following year he became master of the Opera-house, and wrote the opera of *Rinaldo*, the first which Handel composed in England. About 1718 he published a poem called the *Northern Star*, or a *Panegyric on Peter the Great*, for which the empress Catherine sent him a gold medal. It was to the province of a dramatic poet, however, that Mr. Hill was best known to his contemporaries; and in this more as a translator than an original writer; his *Fall of Sion*, performed in 1716, and his *Athelstan* in 1721, are now forgotten; but his adaptations from Voltaire, his *Zara*, *Aleira*, and *Merope*, have great merit, and the first and third still keep possession of the stage. Our author did not long survive the production of his *Merope*; he expired on February 8th, 1750, in the sixty-eighth year of his age, and was buried in the cloisters of Westminster abbey, in the same grave with his wife.

1726, March 11. *The Country Gentleman*.

1726, April 6. *The Censor*; or, *Mustermaster-general* of all the newspapers printed in Great Britain and Ireland, No. 2.

1726, Dec. 5. *The Country Journal; or the Craftsman*, by Caleb Danvers, of Gray's Inn, esq., No. 1, printed by RICHARD FRANKLIN. Nicholas Amhurst was, for several years, the conductor of this political paper. It was written to oppose the administration of sir Robert Walpole, and he was assisted in the attack by very powerful coadjutors—Bolingbroke and Pulteney. Such was the popularity of these essays, and such the indignation of the country against the measures of Walpole, that ten or twelve thousand copies were frequently sold in a day. A complete set of the *Craftsman* forms fourteen volumes, 12mo.

1726. *The London Journal*. The Journal was a species of newspaper, including letters and essays on every topic, but too frequently on controversial subjects. It was a great deterioration of the admirable plan of Steele and Addison, and, for a time, the town was deluged with these motley productions. The invention of *Weekly Journals* was, observes Aaron Hill, owing to the taste which the town began to entertain from the writings of the *Tatler*, *Spectator*, and others. The politics of the *London Journal* were in favour of government.

1726. *Essays on the Vices and Follies of the Times*. This volume is the production of Amhurst, the author of *Terræ Filiius*, and consists of "select papers formerly published in *Pasquin* and the *London Journal*."

1726. *London Daily Post, and General Advertiser*. In 1743 it was altered to the *General Advertiser*; and in 1762, took the name of the *Public Advertiser*. It was commenced by Henry Woodfall.

1726. *The Fränkische Acta Erudita et Curiosa*, a journal of French literature, was published at Nuremberg, from 1726 till 1732.

1727, Feb. 6. JOHN GAY assigned to Jacob Tonson and John Watts, for the sum of ninety guineas, the copyright of fifty fables, and the *Beggar's Opera*. For some curious particulars concerning the *Beggar's Opera*, see *Gentleman's Magazine*, for March 1822.

1727, March. EDWARD CAVE, printer, taken into custody of the serjeant at arms, for writing *news letters*, containing an account of the proceedings of the house of commons.

1727. The first press set up at BURLINGTON, the capital city of New Jersey, in North America, was by Samuel Keimer, from Philadelphia, for the purpose of printing the New Jersey money bills. Benjamin Franklin accompanied his master, and while there constructed a copper-plate printing press, the first that had been seen in the country, and he also had to engrave various ornaments and vignettes for the bills. The press was removed to Philadelphia in about three months. In 1765, Mr. Parker, who was established as a printer at Woodbridge, removed his apparatus to Burlington, solely for the pur-

pose of printing Smith's *History of New Jersey*, an octavo of 570 pages; which having finished, he forthwith repaired to his old quarters. The first who permanently set up a press at the place, was Isaac Collins, a printer from Philadelphia.

1727. Died, RICHARD BALDWIN, a bookseller, of St. Paul's Church-yard, and who was probably related to R. Baldwin,\* who in 1690 lived at the Oxford Arms, in Warwick-lane. Robert Baldwin, the first who settled in Paternoster-row as a bookseller, was his nephew, and in the title-page of a work published in 1749, the name is put "R. Baldwin, jun." The sign of the house, whilst signs were in use, was the Rose. The house of Baldwin, a name long known in Paternoster-row, originated with the above, and still continues famous in the trade.

1727. The MARQUESS DE LASSAY erected a printing press at his country seat, at Lassay, a small town of France, in the department of the Mayenne, one book from which is noticed by Peignot. Probably it produced little besides this.

1727, March 27. Died, SIR ISAAC NEWTON, the most eminent philosopher which this, or perhaps any other country ever produced. He outshone all that went before him, and all that have come after him. It was the fortune of Newton to erect upon the basis of geometry, a new system of philosophy, by which the operations of nature were for the first time properly elucidated; the motions of the vast orbs composing the solar system being shown by him to depend upon rules that were equally applicable to the smallest particles of matter. He was born at Woolstrop, in Lincolnshire, on Christmas-day, in 1642. Losing his father in his childhood, the care of him devolved on his mother, who gave him an excellent education, though she married a second time. In 1654 he was sent to Grantham school, and at the age of eighteen removed to Trinity college, Cambridge. After going through *Euclid's Elements*, he proceeded to the study of Descartes's geometry, with Oughtred's *Clavius*, and Kepler's *Optics*, in all of which he made marginal notes as he went along. It was in this early course that he invented the

\* "Richard Baldwin.—He printed a great deal, but got as little by it as John Dunton. He bound for me and others when he lived in the Old Bailey; but removing to Warwick-lane, his fame for publishing spread so fast, he grew too big to handle his small tools. Mr. Baldwin having got acquaintance with persons of quality, he was now for taking a shop in Fleet-street; but Dick soaring out of his element, had the honour of being a bookseller a few months. However, to do Mr. Baldwin justice, his inclinations were to oblige all men, and only to neglect himself. He was a man of a generous temper, and would take a cheering glass to oblige a customer. His purse and his heart were open to all men that he thought were honest; and his conversation was very diverting. He was a true lover of King William; and after he came on the livery, always voted on the right side. His wife, Mrs. Ann Baldwin, in a literal sense, was an *Acip-mec*, and eased him of all his publishing work; and since she has been a widow, might vie with all the women in Europe for accuracy and justice in keeping accounts; and the same I hear of her beautiful daughter, Mrs. Mary Baldwin, of whom her father was very fond. He was, as it were, flattered into his grave by a long consumption; and now lies buried in Wickham parish, his native place.—*Dutton*."

method of series and fluxions, which he afterwards brought to perfection, though his claim to the discovery was unjustly contested by Leibnitz, who obtained a knowledge of it in 1676, from the author himself. On the breaking out of the plague in 1665, he retired to his country seat, where, sitting alone in his garden, some apples falling from a tree, led his thoughts to the subject of gravity; and reflecting on the power of that principle, he began to consider, that as it is not diminished at the remotest distance from the centre of the earth, it may be extended as far as the moon, and to all the planetary bodies. This subject he afterwards resumed on the occasion of the great comet in 1680, and in 1687 the important principle which forms the foundation of the Newtonian philosophy was first published under the title of *Philosophiæ Naturalis principia Mathematica*; or, *Mathematical Principles of Natural Philosophy*. In 1671, when he was chosen fellow of the royal society, to which learned body he communicated his theory of light and colours, which was followed by his account of a new telescope invented by him, and other interesting papers. In 1696 he was made warden of the mint, and afterwards master of that office; which place he discharged with the greatest honour till his death. In 1703 he was chosen president of the royal society, in which station he continued twenty-five years. In 1705 queen Anne conferred on him the honour of knighthood. In the succeeding reign he was often at court, and the princess of Wales, afterwards queen Caroline, frequently conversed with him on philosophical subjects. So thoroughly convinced of the truths of divine revelation was this great man, that he inculcated in many of his writings, with all the force of his enlightened mind, the benevolent principles of Christianity, and after his death was published *Some Observations on the Prophecies of Daniel and the Apocalypse of St. John*.

"Nature and nature's laws lay hid in night,  
God said, let Newton be, and all was light."

This glory of the British nation and ornament of human nature was buried in Westminster abbey, where a stately monument was erected over his remains at the entrance to the choir. Sir Isaac was of a middling stature, and his countenance was pleasing and venerable. He never made use of spectacles, and during his whole life lost but one tooth. A complete and elegant edition of his works was published with illustrations by Dr. Horsley, 1779, in five volumes quarto. Sir Isaac Newton had several illustrious followers, such as Halley and Bradley, Maclaurin and Smith, who eminently distinguished themselves by their knowledge, discoveries, and writings. Under such men, geometry, astronomy, and optics assumed no small degree of splendour.

1727, June 11. Died, GEORGE I., in the sixty-fifth year of his age, and the thirtieth of his reign. All historians have accounted George I. a very fortunate monarch. In his conduct after his accession to the throne of England, he exercised

great resolution, perseverance, and a never-failing attention to business. That he studied the interest of the Hanoverians more than he did that of his English subjects, ought rather to be a subject of regret than of censure (provided that kings are allowed to feel the force of early habit), since his majesty had attained his fifty-fourth year previous to his first landing in England, and was quite ignorant of the manners, customs, and language of the country; but he listened with great liberality to those who acquainted him with the genuine principles of the British constitution. In his domestic habits the king allowed a culpable indulgence towards his mistress to render him severe to an amiable wife,\* and negligent in the performance of his paternal duties.

With regard to the progress of literature, in this reign, the same eminent men continued to flourish, and therefore, properly belong to the æra of queen Anne. It was in her time that their genius was completely formed; it was in her reign, or somewhat earlier, that they began to write; and it was the spirit they had then imbibed, which continued to operate in the subsequent period. The glory, therefore, they have reflected on their country, was a glory of which the succeeding princes had no right to partake. Admitting the truth of these allegations, it may be proper to state the literary facts that more distinctly marked the reigns of the two first sovereigns of the Hanover family. It is certain that, during that time, a considerable revolution was produced in the minds of men; and that various objects of inquiry engaged their attention, which, if not wholly new, had not been discussed before to an equal extent, or with an equal degree of accuracy and precision. Nor was this entirely owing to the natural progress of reason, and the gentle and gradual operation of literature in opening and enlarging the human faculties, but arose, in particular, from the political situation of Great Britain. The accession of another royal family, whose claims were disapproved by a large body of the people, rendered it highly requisite to disseminate, as widely as possible, the principles which were favourable to the recent establishment. Accordingly, able men were engaged in diffusing more liberal sentiments upon these subjects; and, as this could not be done without exciting a warm con-

\* This unfortunate lady was Sophia Dorothy, the only child of William duke of Zell; she was born in 1666; and her alliance was courted by the greatest prince in Germany, and at the age of sixteen was married to the elector of Hanover. On a charge of adultery with the count Koenigsmark, a Swedish nobleman, she was confined in the castle of Alden, on the river Aller, in the duchy of Zell, where she endured captivity thirty-two years. She died on the 15th of November, 1736, and her death was announced under the title of the electress dowager of Hanover. She conducted herself during her confinement with mildness and patience: she received the sacrament once every week, when she always asserted her innocence of the crime laid to her charge. Subsequent circumstances have tended to shew that she was not guilty, but was sacrificed to the jealousy of the countess of Platen, the favourite mistress of Ernest Augustus, who, being herself in love with the count, and slighted by him, resolved to sacrifice the lover and the princess to her vengeance.

troversy, hence a different turn was given to the studies of the age. Hoadly, bishop of Bangor, attacked, with success, the narrow views of the clergy concerning the doctrine of passive obedience, non-resistance, and hereditary right.

With regard to the state of poetry, it has been already observed, that Pope continued to shine in it long after the accession of the House of Hanover. He was, indeed, the chief ornament of this divine art; and so far was any man from being able to be mentioned as his equal, that there was no one who could pretend to approach him in excellence and reputation. Young, nevertheless, sustained an honourable rank in his peculiar work of composition. His *Night Thoughts*, in particular, amidst all their faults, contain the most striking proofs of a fruitful imagination, and of a bold and sublime genius, which if it had been refined by elegance, corrected by taste, and regulated by judgment, might have claimed a high station in the temple of poetical fame. Thomson's exquisite descriptive powers, not to mention his moral and sentimental beauties, will render his *Seasons* the object of eternal admiration; and his *Castle of Indolence* will, perhaps, prove him to have been the most pleasing and successful of all the imitators of Spenser. There were many others who aimed at attaining the character of poets, but the generality of them did not rise above mediocrity. This is true, with respect only to the early part of this period; for towards the end of it, the poetical genius of England revived in an eminent degree.

During this reign, the study of oriental literature was again revived under the auspices of Dr. Thomas Hunt, of Oxford; and it probably was not a little promoted by Dr. Lowth's admirable lectures on the poetry of the Hebrews.

1727, Jan. 28. *The Churchman*; or *Loyalist's Weekly Journal*, No. 35.

1727. *The Occasional Writer*, No. 1.

1727. *New England Journal*, No. 1. Printed and published by Samuel Kneeland, at Boston. This journal, with some changes, was carried on till the year 1752.

1727, Jan. 30. *The Evening Entertainment*, No. 4. This paper will be published on Mondays, Wednesdays, and Fridays, in the evening, at which time no other newspaper comes out: this is the last time they will be given gratis.

1727, Jan. *The Political Mercury*, No. 1.

1727, Jan. 20. *The Free Briton*, No. 1. This was a political paper in support of sir Robert Walpole's administration, and of course the antagonist of the *Craftsman*. It was published under the fictitious name of Francis Walsingham, esq. but was, in reality, the production of William Arnall, an attorney, and the successor of Concanen in the *British Journal*. Arnall began his political career under the age of twenty, and carried on a furious party war for several years with such virulent and scurrilous language, that even exceeded the wishes of his patrons. The commentator on Pope declares that "he writ for hire, and valued himself

upon it, and that he received, for *Free Britons* and other writings, in the space of four years, no less than ten thousand nine hundred and ninety-seven pounds six shillings and eightpence, out of the treasury.\* It was the custom during the administration of Walpole, to allow newspapers and pamphlets written in favour of the government, to be sent post free to any part of the kingdom.

1727, July. *The Weekly Miscellany*, No. 1, by R. Bradley, professor of botany in the university of Cambridge, &c.

1727, Sept. 9. *The Seasonable Writer*, No. 1.

1727, Sept. 18. *The Citizen*, No. 1.

1727, Oct. 17. *The Tatler Revived*; by Isaac Bickerstaff, esq., No. 1.

1727, Dec. 1. *The Evening Journal*, No. 1.

1727, Dec. 12. *The London Evening Post*,

1727. *The British Spy*; or *Derby Postman*, printed and published by S. Hodgkinson. This was the first newspaper in the county of Derby. There was a Mr. W. CANTREL, a bookseller, at Derby, who sold Anthony Blackwall's† *Introduction to the Classics*, 12mo. London, printed by William Bowyer, for George Mordlack; 1717.

1728, Feb. 21. With the patriotic purpose of supplying Scotland with school books, at a cheaper price, the magistrates of Edinburgh, upon this day, appointed JAMES DAVIDSON and THOMAS RUDDIMAN, joint printers to the university, during the lives of both, and during the life of the longest liver. The following is a copy of the appointment from the city records:—"The same day ament the petition given in by Mr. James Davidson, bookseller, in Edinburgh, and Mr. Thomas Ruddiman, under keeper of the

\* The annotator of Pope says, that there were papers called the *Daily Gazette*, each of which lasted but a day. Into this, as a common sink, was received all the trash which had been before dispersed in several journals, and circulated at the expense of the nation. The authors were the same obscure men; though sometimes relieved by occasional essays from statesmen, courtiers, bishops, deans, and doctors. The meaner sort were rewarded with money; others with places or benefices, from a hundred to a thousand a year. It appears from the Report of the Secret Committee for inquiring into the conduct of Robert, earl of Orford, "that no less than fifty thousand seventy-seven pounds eighteen shillings were paid to authors and printers of newspapers, such as *Free Britons*, *Daily Cants*, *Corn Cutters Journals*, *Gazetteers*, and other political papers, between Feb. 10, 1731, and Feb. 10, 1741," which shows the benevolence of one minister to have expended, for the current dulness of ten years in Britain, double the sum which gained Louis XIV. so much honour, in annual pensions to learned men all over Europe. In which, and in a much longer time, not a pension at court, nor preferment in church or universities, of any consideration, was bestowed on any man distinguished for his learning separately from party-merit, or pamphlet writing.

† Mr. Blackwall was born in Derbyshire about 1674, and educated at Cambridge, where he took the degree of M. A. He was appointed head master of the free school at Derby, and lecturer of All-hallows there. In 1723 he was appointed head master of Market Bosworth school, in Leicestershire, and in October, 1726, he was presented by sir Henry Atkins, bart. to the church of Clapham, in Surrey, which living, however, he resigned in 1729, and returned to Market Bosworth, where he died April 8, 1730.—See *Nichols's Anecdotes*, vol. 1, p. 130.

‡ Mr. Mordlack has been master of the company of stationers, and the most indefatigable shopkeeper I have known. He is very exact in trade. He was much assisted by the friendship of the great Dr. Stillingfleet, bishop of Worcester, and printed most of his works. He is now pretty much up in years; speaks slow, but speaks seldom in vain.—*Denton*.

advocate's library, mentioning, that whereas the far greater part of the books taught in our schools and colleges are imported from foreign places into this country, to the great discouragement of their own manufactories. And the petitioners being well assured, that if the council, patrons of the university of this city, would be pleased to constitute them printers to the said university, they will be enabled to print the above-mentioned books better, and furnish them at easier rates than the country could be otherways provided of them; and that the importation of such books from foreign places will be thereby in a great measure prevented. Craving therefore the council to constitute and appoint the petitioners conjoint printers to the said university, with all the rights, privileges, and emoluments, thereto belonging, for such a term of years, as the council should think fit; as the petition bears, which being considered by the council, they with the extraordinary deacons nominated and elected, and hereby nominats and elects the said Mr. James Davison and Mr. Thomas Rudiman, to be conjoint printers to the university of this city, and longest liver of them two, during their respective lives."

1728, April 24. *Died*, Awnsham Churchill, who is said by Granger to have been the greatest bookseller and stationer of his time.—An original letter, dated April 30, 1728, observes, "I hear that your great bookseller, Awnsham Churchill, is dead: he had a great stock, and printed many books; and I hope the sale of his effects will throw a plenty of books on the city of London, and reduce their present high price." In conjunction with his brother John, his name will be found to the principal publications from the period of the revolution to his death; if he did not retire from business before that event, and that he may view with the Tonsons who attained to the honour of a seat in parliament. Dunton characterizes the two brothers in the following paragraph:—"Mr. Awnsham and Mr. John Churchill, two booksellers (and brothers) of an universal wholesale trade. I traded very considerably with them for several years; and must do them the justice to say, that I was never concerned with any persons more exact in their accounts, or more just in their payments. They are both so well furnished for any great undertaking, that what they have hitherto proposed, they have gone through with great honour to themselves, and satisfaction to subscribers; of which their printing Camden's *Britannia*, and the publication of a *New Collection of Travels*, lately come abroad, are undeniable instances. Sir Richard Blackmore's *Poetical Works*, and Mr. Locke's *Essay*, have received no small advantage by coming abroad through their hands; and, to finish their characters, they never starve an undertaking to save charges. In the *New Collection of Travels* before mentioned, though they make about one hundred and fifty sheets and fifty cuts more than were promised, yet they ask their subscribers no advance." Awnsham Churchill purchased, in 1704, the manor of

Henbury, in Dorsetshire, and represented the county town in parliament. He married Sarah, daughter of John Lownds, esq. by whom he had three sons; of whom the eldest, William Churchill, esq. married, first, 1770, Louisa-Augusta Greville, daughter of Francis first earl Brooke and earl of Warwick, by whom he had one son, William. He married, secondly, Eliza, widow of Frederic Thomas, third earl of Strafford.

1728. *The Pennsylvania Gazette*, printed by Samuel Keimer, Philadelphia. In the following year it was purchased by Benjamin Franklin, and conducted by him for thirty years. Franklin gives the following account of the establishment of this paper:—"George Webb, having found a friend who lent him the necessary sum to buy out his time with Keimer, came one day to offer himself to us as a journeyman. We could not employ him immediately; but I foolishly told him, under the rose, that I intended shortly to publish a new periodical paper, and that we should then have work for him. My hopes of success, which I imparted to him, were founded on the circumstance, that the only paper we had in Philadelphia at that time, and which Bradford printed, was a paltry thing, miserably conducted, in no respect amusing, and which yet was profitable. I consequently supposed that a good work of this kind could not fail of success. Webb betrayed my secret to Keimer, who, to prevent me, immediately published the prospectus of a paper, that he intended to institute himself, and in which Webb was to be engaged. I was exasperated at this proceeding, and, with a view to counteract them, not being able at present to institute my own paper, I wrote some humorous pieces in Bradford's, under the title of the *Busy Body*;\* and which was continued for several months by Breintnal. I hereby fixed the attention of the public upon Bradford's paper; and the prospectus of Keimer, which we turned into ridicule, was treated with contempt. He began, notwithstanding, his paper; and after continuing it for nine months, having at most not more than ninety subscribers, he offered it to me for a mere trifle. I had for some time been ready for such an engagement; I therefore instantly took it upon myself, and in a few years it proved extremely profitable to me."

1728. *The Maryland Gazette*, in German, published at Annapolis. The first book printed in the city of Annapolis, was a *Collection of the Laws of Maryland*, 1727, printed by William Parks. Mr. Parks was succeeded by some of the family of Green, under whom the art flourished considerably at Annapolis.

1728, Jan. 20. *British Journal, or Censor*, 1728, Jan. *Monthly Chronicle*, No. 1, 4to. Continued till March 1732, when it was superseded by the *London Magazine*, which was conducted with great reputation till 1783, when it was relinquished by the proprietors.

\* A manuscript note in the file of the *American Mercury*, preserved in the Philadelphia library, says, that Franklin wrote the five first numbers, and part of the eighth.

1728, Jan. *Present State of the Republic of Letters*, No. 1. Continued till December, 1736.

1728. *The Intelligencer*, by Dr. Thos. Sheridan. This paper was published weekly in Dublin, in the years 1728 and 1729. It is a miscellaneous paper, and had the occasional assistance of dean Swift. Dr. Sheridan died September 10, 1738.

1728, July. *The Universal Spectator*, No. 1.

1728, Sept. 25. *The Parrot*, by Mrs. Prattle.

1728, Oct. 1. *Flying Post, or Weekly Medley*, printed by Matthew Jenour, in Giltspur-street.

1728, Oct. 16. *New York Gazette*, printed and published in New York, by William Bradford.

1728. *The Literary Journal*.

1728. *The Touchstone*.

1728. *The Weekly Medley*.

1728. *Faulkner's Journal*, printed and published daily, by George Faulkner, Dublin.\* It was truly Hibernian in the blundering simplicity of its style and typography. It is said, on its afterwards falling into other hands, to have been conducted with great ability and spirit.

1729, Jan. 19. *Died*, WILLIAM CONGREVE, of whom Voltaire says, "He raised the glory of comedy to a greater height than any English writer before, or since his time. He wrote only a few plays, but they are the best of the kind." And Dennis, speaking of Congreve, says, "he quitted the stage early, and comedy left it with him." He was born at Bardsey, in Staffordshire, Feb. 10, 1769, and educated at Trinity college, Dublin. While studying law in the Temple, in London, he began to write for the stage, and at the age of twenty-one produced his first play called the *Old Bachelor*, which was highly successful. Lord Halifax made him a commissioner for licensing hackney coaches, and other employments, which yielded him £1200 a-year. About 1695, he engaged in a controversy with Collier, respecting the immorality of his plays, in which Congreve was completely foiled, and in consequence ceased dramatic authorship.

1729, March. *Died*, MR. ROLLAND, advocate, and proprietor of the *Caledonian Mercury*, printed by Thomas Ruddiman. At this time the whole property of the *Mercury* was transferred to Mr. Ruddiman, which from No. 1396, was printed for and by Thomas and Walter Ruddiman, and sold at the shop of Alexander Symmers, bookseller, in the Parliament square. In this manner did the proprietorship of the paper pass into the family of Ruddiman, with whom it continued, though under various modifications, till May, 1772.

\* MR. NORMAN, bookseller, Dublin.—He is a middling squat man that loves to live well, and has a spouse who understands preparing good things as well as the best lady in Ireland. He has a hole in his nose, occasioned by a brass pin in his nurse's waistcoat, which happened to run in it, and for want of a skilful hand to dress it, the hole remains to this day, and yet without disfiguring his face. He invited me to his house when I made my auction in Dublin, and when I came gave me a hearty welcome. I found Mr. Norman an excellent forist, and he has this peculiar to himself, that whatever he has in his garden is the most excellent of its kind. He is a very grave honest man, understands his trade extraordinary well, and has the honour to have been master of the booksellers company in Dublin.—*Dunston*.

1729, March 12. The *Dunciad* was presented to George II. and his queen (who had before been pleased to read it) at St. James's,\* by the right honourable sir Robert Walpole; and some days after, the whole impression was taken and circulated by several noblemen and gentlemen. On the day the book was on sale, a crowd of authors besieged the shop of Bernard Lintot, the bookseller; entreaties, advices, threats, of law, and battery, nay, cries of treason, were all employed to hinder the coming out of the *Dunciad*; on the other side, the booksellers and hawkers made as great efforts to procure it. The dunces (for by this name they were called) held weekly clubs to consult about hostilities against the author; one denounced him as the greatest enemy the government had; and others brought his image in clay, to execute him in effigy.<sup>2</sup> Some false editions of the book, having an owl in their frontispiece; the true one, to distinguish it, fixed in its stead an ass laden with authors. Then another surreptitious one being printed with the same ass, the new edition, in 8vo. returned for distinction to the owl again. Hence arose a great contest of booksellers against booksellers, and advertisements against advertisements; some recommending the edition of the owl, and others the edition of the ass; by which names they came to be distinguished. The last complete edition of the *Dunciad* did not appear till 1643. The first edition sold for sixpence.

1729, June 19. ROBERT KNELL, compositor, and JOHN CLARK, pressman, of *Mist's Weekly Journal*, were set in the pillory for working that paper of the 24th of August, 1728. The following epigram appeared upon the conduct of the whig government towards the press:

#### ON THE LIBERTY OF THE PRESS.

In good Queen Anna's days, when tories reign'd,  
And the just liberty of the press restrain'd,  
Sad whigs complain'd in doleful notes and sundry,  
O LIBERTY! O VIRTUE! O MY COUNTRY!  
But when themselves had reach'd the days of grace,  
They chang'd their principles as well as place;  
From messengers secure no printer lies,  
They take compositors, pressmen, devils, flies:  
What means this change! the sum of all the stories,  
Tories deprest are whigs, and whigs in power are tories.

1729. WILLIAM BOWYER printed two large editions in 4to. (10,500) of *Polly*, an opera; being the second part of *The Beggar's Opera*. Written by Mr. Gay. With the songs and basses engraved on copper-plates.

The following paragraph appeared in the *Evening Post* of April 10, 1729. "Yesterday two illegal, false, and spurious editions of *Polly*, an Opera; being the Second Part of *The Beggar's Opera*, were published; the one in 8vo. without the music, printed for Jeffery Walker, in the Strand, the other in 8vo. with the music at the end, printed for J. Thomson. This is to advertise all booksellers, printers, publishers, hawkers, &c. not to sell, or cause to be sold,

\* *The Cudgell*; or, a Crabtree Lecture to the author of the *Dunciad*. By Hercules Vinegar, Esq. London, 1743.

any of the said editions, the sole property of the said book being according to act of parliament vested in the author, for whom the book is printed with the music in copper-plates in quarto. Prosecutions with the utmost severity will be put in execution against any one who shall presume to sell any of the aforesaid illegal spurious editions."

1729. The library of sir Richard Gibbs, knt., of Great Waltham, and Bury St. Edmunds, was sold by auction, by T. Green, Spring-gardens, bookseller, with *fixed prices: qu. if not the earliest*. Prices were at first fixed in the first leaf of each book; afterwards, as at present, transcribed from thence with the printed catalogue, where some books, however, of great value, are left without price.\*

1729, Sept. 29. *Died*, SIR RICHARD STEELE, a celebrated writer, of whom it is but justice to say, that "as long as elegant literature shall be cultivated in this country, the name of Steele will always have a respectable portion of esteem and praise. Whether we consider his polished diction, his acuteness in controversy, or the variety and depth of his observation; his claims to our esteem are so strong, that it seems probable they will be the more readily acknowledged, the farther our advances in refinement shall incline us to examine them." He was a native of Dublin, where his father was a barrister. He obtained an ensigncy in the guards, and wrote his first

work, entitled the *Christian Hero*, for which lord Cutts procured him a captain's commission in the fusiliers. In 1702 appeared his comedy of the *Funeral; or, Grief a la Mode*, which had great success. This play was followed by the *Lying Lovers*, for which Lintot, the bookseller, gave him £21 10s. The *Tender Husband* and the *Conscious Lovers* succeeded. The commencement of the *Tatler*, *Spectator*, and *Guardian*,\* has already been noticed, and the reputation he acquired by these and other writings, procured him several lucrative situations under government, and a seat in parliament. On the accession of George I. he received the honour of knighthood, and was appointed surveyor of the stables at Hampton court, and governor of the royal company of comedians. He died at Llangunnor, in Caermarthenshire. "There was a great similitude," observes lady Mary Montagu, "between the character of Henry Fielding and sir Richard Steele.† They both agreed in wanting money, in spite of all their friends, and would have wanted it, if their hereditary lands had been as extensive as their imaginations; yet each of them was so formed for happiness, it is pity he was not immortal." John Nichols, esq. to whom the friends and admirers of Steele owe many obligations, presented to the company of stationers a good portrait of this eminent writer. This picture exhibits a large man inclined to corpulency, with handsome dark eyes and brows, with a velvet cap on his head, and his collar open.

1729, Feb. 27. *The Knight Errant*, No. 1.

1729, April 5. *Fog's Weekly Journal*, No. 28. This paper was written in opposition to the government, and became so popular that it continued to be published for nearly eight years.

1729. *The Waterford Flying Post*, containing "the most material news both foreign and do-

\* Steele's expense in his periodical publications, says Dr. Birch, was very considerable; and landable as his views certainly were, his auxiliaries, in general, did not assist him gratis. Of this expense, from which his genius might well have exempted him, and to which his indolence only, and his fashionable life subjected him, it is now impossible to state with precision to the full amount. It may, however, enable the curious to form some estimate to inform them, and on filial authority, that the celebrated bishop Berkeley had one guinea and a dinner with Steele, for every paper of his composing published in the *Guardian*.

† Mr. SAMUEL SPURIN, senior, thrives much in trade, and is punctual and honest. He has been very fortunate in several engagements. He printed Mr. Fox, of Time, Mr. Doolittle, on the *Secrecy*, and was engaged the same way for Mr. Steele, and other eminent authors; so that it is easy to know what success he has had in the world.

Mr. SPURIN, junior.—His worthy father is characterized above. Mr. John Sprin does *pairiours*, he has a ready wit, a great deal of good humour, and is owner of as much generosity as any man of the trade; there is an humble sweetness in all his actions, and to render him the more agreeable, this *brave soul* of his has the happiness to live in a very beautiful *tenement*, and it had been pity it should have lived in any other. In a word (if I have a right notion of John Sprin) he is the handsomest man in the stationers' company, and may without compliment be called "a very accomplished bookseller." His father finding him a sober religious person, has made him a partner in his trade, and they are now reprinting three great and useful books, entitled the *History of the Bible, with cuts; Le Grand Body of Philosophy*, and *Guilliam's Heraldry*, with great improvements.—Dunlop.

\* The earliest known sale of books by auction in this country out of London, is the following:—"A Catalogue of choice Books, consisting of Divinity, Law, History, &c. both in English and Latin; will be sold by auction at Mr. Edward Pawlett's house, bookseller, in Grantham, on Wednesday the 4th day of August, 1686. The catalogues are distributed gratis at Mr. Yates's, in Duck-lane, London, and at the said Mr. Pawlett's, at Grantham."—This catalogue, remarkable as one of the earliest collected, begins with the following address to the readers: "Gentlemen, I doubt not but most are sensible, that through the booksellers' care in collecting choice books, and exposing them to sale by way of auction, many are not only furnished with what they desire, at easy rates, but save themselves much trouble in a tedious and fruitless search after books, which are not always to be found in booksellers' shops. And though the books in this catalogue have suffered much from the unskilfulness of its taker; yet the curious peruser will find a great number of scarce and choice books on all subjects. Great indeed has the care been in furnishing this auction, that the bookseller might find encouragement in obliging those gentlemen whose study it is to render our nation as illustrious for men of learning as any in the world."

The conditions of the sale are these: I. That he who bids most is the buyer: and if any difference arise which the company cannot decide, then the book or books shall be exposed to sale again. II. That all the books in this catalogue, not otherwise expressed, are (for ought we know) perfect; but if any of them appear to be otherwise before they are taken away, the buyer shall have his choice of taking or leaving them. III. That the money for the books so bought, be paid within one week after the sale be ended, at the place where they are sold: where, upon payment thereof, the books shall be delivered.—The sale will begin at eight in the morning and continue till twelve; and from two in the afternoon till eight. The books to be seen two days before the sale begins.

Of Mr. Yates, associated above, John Dunlop says, "He has met with losses as well as myself; yet, when his stars were the most unkind, he was still as honest as ever; and being always just in his dealings, he now, like the sun (just come from behind a cloud) shines brighter and fairer than ever—some men are only just whilst the world smiles; but when it frowns, they act such little tricks, as renders their virtues suspected; but Yates ever preserved his integrity, and is the same good man, under all events."

mestle." It was printed on a sheet of common writing paper, the head ornamented with the royal arms, and those of the city of Waterford. The price was a halfpenny, or a shilling per quarter—being published twice a week.

1729. *The Glasgow Journal*. This is one of the few Scottish newspapers, published at that early period, which have existed to the present day.

1730. PETER VANDER AA, an eminent bookseller, who was born at Leyden, in 1661. Nearly all the early publishers and printers possessed considerable literary attainments, of which a very striking example occurs in this distinguished bookseller, who, in point of industry, at least, surpassed all his predecessors. He had a large printing-office, was eminent as a map engraver and geographer, and besides managing a very extensive bookselling business, contrived in less than half a century to complete nearly one hundred folio volumes. His principal work is *A Gallery of the World*, in sixty-six volumes, which he completed a short time prior to his death, in this year.

1730. ELEAZAR PHILLIPS, of Boston, in consequence of a liberal offer made by government, erected the first printing press in Charlestown, a beautiful city, the metropolis of the state of South Carolina, in North America, and, except in the city, there was no printing throughout the whole province, previous to the revolution.

1730. An enterprising bookseller in Boston having petitioned for and received some aid from the legislature of Massachusetts, erected the first paper mill in that colony.

1730. DAVID HARRY, a printer of Philadelphia, introduced the art into Bridgetown, the capital of the island of Barbadoes. In the following year, a newspaper, the *Barbadoes Gazette*, began to be published. "Keimer's business," says Dr. Franklin, "diminishing every day, he was at last forced to sell his stock to satisfy his creditors, and he betook himself to Barbadoes, where he lived for some time in a very impoverished state. His apprentice, David Harry, whom I had instructed while I worked with Keimer, having bought his materials, succeeded in the business. I was apprehensive, at first, of finding in Harry a powerful competitor, as he was allied to an opulent and respectable family, I therefore proposed a partnership, which, happily for me, he rejected with disdain. He was extremely proud, thought himself a fine gentleman, lived extravagantly, and pursued amusements which suffered him to be scarcely ever at home; in consequence he became in debt, neglected his business, and business neglected him. Finding in a short time nothing to do in the country, he followed Keimer to Barbadoes, carrying his printing materials with him. There the apprentice employed his old masters as a journeyman. They were continually quarrelling; and Harry, still getting in debt, was obliged at last to sell his press and types, and to return to his old occupation of husbandry in Pennsylvania. The person who purchased them employed Keimer to manage

the business, but he died a few years after. He was a strange animal, ignorant of the common modes of life, apt to oppose with rudeness generally received opinions, an enthusiast in certain points of religion, disgustingly unclean in his person, and was merely a compositor, being wholly incapable of working at press. He had been one of the French prophets, and knew how to imitate their supernatural agitations. He professed no particular religion, but a little upon all occasions. He was totally ignorant of the world, and a great knave at heart."

1730, Feb. 28. *Weekly Medley*. The following notice appears in this paper, "A gentleman has brought over the first volume in manuscript of the *History of Charles XII. King of Sweden*, written in French, by the celebrated M. de Voltaire, author of the *Henriade*. We hear that it is not allowed to be printed in France, because of the many fine strokes upon liberty interspersed in different parts of it."

1730, June 5. In the *Weekly News* of this date is the following advertisement:—"Mr. Woolston's second part of his defence of his *Discourses of Miracles*, just published, has given such offence to the clergy, that they cannot bear the sight of him. Thereupon he was desired to forbear coming to the chapter house; or they who resort thither would leave the house."

1730, Sept. 27. DIED, LAWRENCE EUSEN, an English poet of some eminence, who was born in Yorkshire, and educated at Trinity college, Cambridge, after which he took orders, and was for a considerable period chaplain to Richard, lord Willoughby de Broke. His first patron was lord Halifax, whose poem *On the Battle of the Boyne* Eusen translated into Latin. He was also esteemed by the duke of Newcastle, on whose marriage with lady Henrietta Godolphin he wrote an *Epithalamium*, for which, upon the death of Rowe, he was by his grace preferred in 1718 to the laureateship. He had several enemies, and, among others, Pope, who put him into his *Dunciad*; though we do not know what provocation he gave to any of them, unless by being raised to the dignity of poet-laureate. Eusen died at the rectory of Coningsby, in Lancashire. He was succeeded in the laureateship by Colley Cibber, a good comic dramatist, but a wretched poet. This was the fifth appointment in which party politics had directed the royal choice to the neglect of real merit.

1730, Jan. 8. *Memoirs of the Society of Grub-street*. This is a paper of considerable wit and humour, in ridicule of the host of bad writers which at that time infested the republic of letters. Most of these gentlemen had previously figured in the *Dunciad*, but are here more minutely held up to public contempt. The productions of Eusen, Cibber, Concanen, Coril, Dennis, Henley, Ralph, Arnall, Theobald, Wested, &c., &c., are exposed with wholesome severity, and in a strain of the most keen and sarcastic irony. The principal writers of these satirical effusions were, Dr. Richard Rassel, a physician, and the author of a *Treatise on Sex*

Water; and Dr. John Martyn. Their signatures are *Bavius* and *Martius*. To the *Memoirs of the Society of Grub-street* the literary world is greatly indebted; for, in fact, to this publication we owe the *Gentleman's Magazine*. The *Memoirs* "meeting with encouragement," says sir John Hawkins, "Cave projected an improvement thereon in a pamphlet of his own; and in the following year gave to the world the first number of the *Gentleman's Magazine*, with a notification, that the same would be continued monthly; incurring thereby a charge of plagiarism, which, as he is said to have confessed it, we may suppose he did not look upon as criminal."

1730, July 3. *The Speculatist*, No. 1. By Mr. Concanen.\* This paper procured its author no reputation, and not much pecuniary profit. The expenses of printing were defrayed by subscription; but the subscribers had reason to complain that it was little more than a republication of the *British* and *London Journals*. In these papers, and the *Speculatist*, he was, to adopt the language of the annotator on Pope, "the author of several dull and dead scurrilities," and, by abusing the poet and his friend Bolingbroke, obtained an introduction into the *Dunciad*.

1730, Dec. 22. *Whitworth's Manchester Gazette*, printed and published by H. Whitworth. In 1737 the name was changed to the *Manchester Magazine*, and continued above twenty years.

1730, Feb. 21-24. *Œdipus*, or *Postman* remembered.

1730, April 19. *The Weekly Register*, No. 1.

1730, Dec. 15. *The Hyp Doctor*, by sir Isaac Raterlife, of Elbow-lane, No. 1. This was the production of John Henley, in support of the administration of sir Robert Walpole.

1731, Jan. *The Gentleman's Magazine*. This periodical miscellany was commenced by Edward Cave, printer, St. John's-gate, Clerkenwell, who, as the inscription beneath his portrait states, was

"The first inventor of the monthly magazines;  
The invention all admired; and each how he  
To be the inventor misad."

One of the reasons assigned for beginning it was, to form a collection or magazine of the essays, intelligence, &c., which appeared in the "two hundred half sheets per month," which the London press was then calculated to throw off, besides "written accounts," and about as many more half sheets printed "elsewhere in the three kingdoms." When Cave formed the project of his magazine, he was far from expecting the success which he found; and others had so little prospect of its consequence, that though he had for several years talked of his plan among printers and booksellers, none of them thought it worth

the trial. That they were not restrained by their virtue from the execution of another man's design, was sufficiently apparent as soon as that design began to be gainful; for in a few years a multitude of magazines arose, and perished: only the *London Magazine*, supported by a powerful association of booksellers, and circulated with all the art, and all the cunning of trade, exempted itself from the general fate of Cave's invaders, and obtained, though not an equal, yet a considerable sale. "The invention of this new species of publication," says Dr. Kippis, "may be considered as something of an epocha in the literary history of this country. The periodical publications before that time were almost wholly confined to political transactions, and to foreign and domestic occurrences; but the magazines have opened a way for every kind of enquiry and information. The intelligence and discussion contained in them are very extensive and various; and they have been the means of diffusing a general habit of reading through the nation; which, in a certain degree, hath enlarged the public understanding. Many young authors, who have afterwards risen to future eminence in the literary world, have here made their first attempts in composition. Here, too, are preserved a multitude of curious and useful hints, observations, and facts, which otherwise might have never appeared; or, if they had appeared in a more evanescent form, would have incurred the danger of being lost. If it were not an invidious task, the history of them would be no incurious or unentertaining subject. The magazines that unite utility with entertainment are undoubtedly preferable to those (if there have been any such) which have only a view to idle and frivolous amusement." With the prosperity of his magazine, Mr. Cave began to aspire to popularity; and, being a greater lover of poetry than any other art, he sometimes offered subjects for poems, and proposed prizes for the best performances. The first prize was £50, for which, being but newly acquainted with wealth, and thinking the influence of £50 extremely great, he expected the first authors of the kingdom to appear as competitors; and offered the allotment of the prize to the universities.\* But, when the time came, no name was seen among the writers that had been ever seen before; the universities and several private men rejected the province of assigning the prize.† At all this Mr. Cave wondered for a while; but his natural judgment, and a wider acquaintance with the world, soon cured him of his astonishment, as of many other prejudices and errors. Nor have

\* On the Invitation of the Epigrammatists made by Mr. Cave, the printer of the *Gentleman's Magazine*, 1731.

The psalmist to a Cave for refuge fled,  
And vagrants followed him for want of bread;  
Ye happy bards! would you with plenty dwell,  
Fly to that best of Caves in Clerkenwell.

† The determination was left to Dr. Cromwell Mortimer and Dr. Birch; and by the latter the award was made, which may be seen in the magazine for the year 1736, vol. vi. p. 59.

\* Matthew Concanen was a native of Ireland, and bred to the law, but not succeeding in this line, he turned his attention to politics, enlisting himself under the banners of the administration in the *British* and *London Journals*. By the interest of the duke of Newcastle, he was appointed attorney-general of the island of Jamaica, a post which he filled for seventeen years with unblemished integrity, and universal esteem of the inhabitants. He returned to London in December, 1748, with an ample fortune honourably acquired, and died January 22, 1749. His poems, and his play of *Wexford Wells*, have merit.—Drake.

many men been seen raised by accident or industry to sudden riches, that retained less of the meanness of their former state. In a conversation with Boswell, Dr. Johnson said, "his friend Edward Cave used to sell 10,000 of the *Gentleman's Magazine*; yet such was then his minute attention and anxiety that the sale should not suffer the smallest decrease, that he would name a particular person who he heard had talked of leaving off the magazine, and would say, 'let us have something good next month!'" Cave's attention to the magazine may indeed truly be termed unremitting; for, as Johnson observed to Boswell, "he scarcely ever looked out of the window but with a view to its improvement."

1731, Feb. 15. Their majesties, George II. and the queen, being desirous of seeing "the noble art of printing," a printing-press and cases were put up in St. James's palace on this day. The duke of York composed a small book of his own writing, called the *Laus of Dodge-Hare*, under the direction of Mr. Samuel Palmer.

1731. *The Weekly Rehearsal* was set on foot at Boston by the famous Jeremy Gridley, afterwards attorney-general of Massachusetts Bay, then a young lawyer of brilliant promise. At the end of a year he wearied of the work, on which he had expended much classical lore, and the labour of weekly essays full of sense and entertainment; and it went into the hands of Thomas Fleet, an Englishman by birth, and a printer by trade, who had brought himself into trouble in London by his antipathy to the high church party, manifested in a studied affront to the procession in honour of Dr. Sacheverel. \* \* Fleet was a humorist—a man of talent and energy, and possessing uncommon resources, in his mind and experience, for his present undertaking. His satire was generally good-natured, and always free and copious. He fully preserved the latter strain, and somewhat abandoned the former, in an attack on Whitefield, then at the height of his popularity. For some unexplained reason he changed the name of the *Rehearsal*, after printing it about two years, to that of the *Boston Evening Post*. This he continued thirteen years longer, to the time of his death, and it was undoubtedly much the best paper of its time. It was brought down by his two sons to the month of the Lexington battle.

1731. The first public library in America was established at Philadelphia, through the exertions of Benjamin Franklin. Fifty persons at first subscribed forty shillings each, and agreed to pay ten shillings annually; in the course of ten years it became so valuable and important as to induce the proprietors to get themselves incorporated by royal charter.

1731. *Died*, ALLINGTON WILDE, printer, in Aldersgate-street. His daughter Martha was the first wife of Samuel Richardson, the author of *Pamela*, &c. See page 633 *ante*.

1731, April 24. *Died*, DANIEL DEFOE, author of *Robinson Crusoe*, and other celebrated works, the whole of which were the mere fabrications of the writer's invention, and are so distinguished

by an air of nature and truth, that it is almost impossible not to take them for genuine; and the vast amount of his literary labours may in some degree be conceived from the fact, that the list of his publications given by Mr. Wilson, his biographer, contains no fewer than two hundred and ten articles. He was the son of James Foe, a butcher, in the parish of Cripplegate, London, where he was born in the year 1660. In 1688 he kept a hosier's shop in Cornhill, but becoming a bankrupt, he had recourse to his pen for subsistence; but however subordinate and comparatively humble as was the sphere in which he moved, and exposed as he was from his circumstances to all sorts of temptations, his political career was distinguished by a consistency, a disinterestedness, and an independence, which have never been surpassed, and but rarely exemplified to the same degree by those occupying the highest stations in the direction of national affairs. His principles, which were those of the whigs, repeatedly drew upon him obloquy, danger, persecution, and punishment, both in the shape of personal and pecuniary suffering, and in that of stigma and degradation; but nothing ever scared him from their courageous avowal and maintenance. The injustice he met with on more than one occasion was not more shocking from its cruelty than from its absurdity. Conformably to the fate which had pursued him through life, the accession of the house of Hanover, although the end and consummation, it may be said, of all his political labours, instead of bringing him honours and rewards, consigned him only to neglect and poverty. At length, he resolved to abandon politics, and to employ his pen for the future on less ungrateful themes. The extraordinary effect of this determination was to enable him, by a series of works which he began to produce after he had reached nearly the age of sixty, to eclipse all that he had formerly done, and to secure to himself a fame which has extended as far and will last as long as the language in which he wrote. Defoe died in his native parish, in the seventieth year of his age, and was buried in Bunhill Fields, then called Tindall's burying-ground. He left his widow, and a large family, in tolerable circumstances. His youngest daughter, Sophia, was married, April 30, 1729, to Henry Baker, the celebrated naturalist, who served an apprenticeship to Mr. John Parker, bookseller, Pall Mall.

1731, Jan. 1. *The Kendal Courant*, No. 1. printed and published by Thomas Cotton, medium 4to. price three halfpence.

1731. *The Templar*.

1731. *The Correspondent*.

1731. *The Comedian*; or, *Philosophical Enquirer*. The author of this work, which came out monthly, was Mr. Thomas Cooke, author of a translation of Hesiod, with notes. It was continued but for eight months, and then expired, from its inability to defray the expenses of printing and paper. Mr. Cooke obtained a passport to the *Dunciad*. He died, in distressed circumstances, in the year 1750.

1732, March 25. The printers and publishers of *Fog's Journal* were taken into custody of messengers, for defaming the memory of the late king William.

1732, April 18. RICHARD SMITH, a bookbinder,\* and a prisoner for debt within the liberties of the king's bench, and his wife, were found hanging in their chamber about a yard distant from each other, and in the kitchen their child, about two years of age, was found in a cradle, shot through the head. They were all neatly dressed, and a curtain was hanging between the

man and woman; a pistol loaded lying near him, and a knife by her. He was hanged with a new cord, which she was seen to twist about the day before. Two letters were found in the room, one directed to Mr. Brightree, their land-

lady. He is an ingenious and constant man at his trade; and bound for me that *History of Living Men*, and *Athenian Oracle*, which I lately dedicated and presented to the Prince of Denmark and Duke of Ormond with my own hand. I need not enlarge on his character; for he was ever careful to preserve a good reputation, but more desirous of a good conscience; and for this reason he asks his own heart, and not other men's tongues, 'What he is.' There is downright honesty in him; and I heartily wish he may ever be as free from censures, as he is from deserving them."

"Mr. MITCHELL, in Christopher Alley.—He was a first rate binder, and got a good estate with a clear and quiet conscience. Ben Alop and he were intimate friends and fellow-travellers for many years, and was wont to call him 'his godly binder,' and Mr. Mitchell deserved it, for he kept up the life and spirit of religion in himself and family, was a constant hearer of Mr. Hall, and had a strict regard to the discipline and constitutions of the church of England to the dying day."

"Mr. SWINOCK.—This grave and ancient binder was recommended to Mr. Roberts, the printer, for a curious workman and a very honest man; and so I found him. He did not bind very much for me, but what he did was done to a nicety. I suppose he is nearly related to Mr. Simpson, the bookseller; for he nearly resembles him for sincerity, diligence, and in a fair character. And the same may be said of honest Dodgins, Brotherton, Hawkins, and my old acquaintance Mr. Joseph Pool."

"Mr. MANKROD.—From bookbinding he went to the Garter Coffee House, by the Royal Exchange, and I hope he has thrived at it. He was a very obliging binder, and I traded with him till I went to Boston. He is a true son of the church; but, being so wise as to understand the difference between matters doctrinal and ritual, is not fettered with superstitious scruples; but his clear and free spirit is for the union of Christians in things essential to Christianity."

"Mr. STEEL.—I may call him my occasional binder, for when I met with a nice customer, no binding would serve him but Mr. Steel's, which for the fineness and goodness of it might vie with the Cambridge binding; but as celebrated a binder as Steel is, he is a man very humble and lowly in his own eyes, far from insinuating his own praise, and very rarely speaks of himself or his own actions; but never of other business with contempt or disrespect; yet he has a sudden way of repartee, very agreeable and surprising, but every way inoffensive within the rules of virtue and religion."

"CALEB SWINOCK.—He served his apprenticeship with Richard Janeway; and, being an active witty man, had he trod in the steps of his reverend father, had been an eminent christian. But he fell a pining too soon, and met a she clock that stuck faster to him than usual. He published for me the *Life and Death of that great patriot, William Lord Russell*; and, had he not by working at under rates turned himself out of doors, perhaps he had rode out the storm of wiving. Caleb Swinock was the only man that could ever tempt me to take sheep's leather books at 14s. the hundred; and upon second thought, had he not broke nine pounds in my debt, I should have thought myself obliged to make some restitution, either to himself, or (in case of his death) to the poor; for binders have a right to live by their hard labour. But they that tempt them to work for rates which they cannot afford (and the case is the same with respect to the printers) do, as it were, rob the binder with his own consent; and I verily think, without restitution such shop-pads can never be saved. It is true, the case between Caleb and I was a little different; for the *selling thief* squeezes the binder against his consent; but Caleb here was the *sole tempter*. But I should not lash him for this crime, for Caleb has fayed himself with his own whipping; and since his strolling into the country, is more altered with repentance than with age. But I shall not any longer aggravate Caleb's faults or my own; for, as De Poe tells us,

'Confession will anticipate reproach;  
He that reviles us then, reviles too much,  
All satire ceases when the men repent;  
'Tis cruelty to lash the penitent.'

The following gentleman seems to be a brother of the above, of whom Dutton says—"Mr. GEORGE SWINOCK.

\* John Dutton characterizes the following bookbinders, with whom he was either personally known, or had dealings:

"THOMAS AXE.—He is a man of a great deal of wit and honesty. In any controversy, I would sooner choose him for an arbitrator than any man I know in the world. He was my chief bookbinder for ten years; but honest Tom has met with losses; yet his character is this:—no man is more contented with his little, and so patient under his disappointment; but notwithstanding his losses in trade, I believe Mr. AXE will get money enough, for he is not only a good binder\* but sells books, globes, auctions; and his hopes are so rosy, that they can insult over the greatest discouragements that lie in his way to be honestly rich."

"SAMUEL BOURN.—He was a man of a gay rambling temper, but very just to those that employed him. He had his religion to choose, which was a great grief to his pious wife. Bourn being seized with a dangerous fever, he made great protestations how good he would be if God would please to restore him; but

'The devil was sick, the devil a monk would be;  
The devil was well, the devil a monk was he.'

After his recovery, he turned projector, and then picture seller, and then rake-hell; and, I hear came at last to an untimely end."

"Mr. COX, Sherburn-lane.—He was a grave thriving binder for thirty years; but is now retired, for his greater safety. He is very honest; and, if his creditors knew him as well as I, he might 'whet his knife at the counter gate.' He ever maintained an unspotted fidelity to the church of England; and for all his misfortune, is a bright example of piety and strict justice. Wherever he is, I heartily wish him well; and would be glad to see him if I could tell how, if it were but to thank him for old favours."

"Mr. DANCER.—He was formerly a bookbinder, but is now a noted bookseller in Fleet-street. He is an honest and reserved man, and a professed enemy to prodigality; he thinks a good dish of meat looks full as well at his own table, with his wife and son, as at a city tavern. It is true after dinner he can drink a good health to our gracious queen, but thinks it is an odd expression of his loyalty to pretend (as some in such cases) to stand by her with life and fortune so long till they can neither go nor stir; in a word, Nat Dancer is a very sober industrious man, and never admires either that loyalty or hospitality which seems troubled with the dropsy, coexisting in nothing but a skin full of liquor."

"Mr. DOWLEY.—His face indeed is but rough cast; but, if he is yet unmarried, the young virgins can never enough admire the sweetness of his natural temper. Humility is his peculiar virtue, and justice and industry have a great share in his character. He is also a kind and dutiful son to his aged father. He published for me the *History of the Athenian Society*, and was as zealous to oblige me as any binder in London."

"Mr. GIFFORD.—He and Mr. Manhood got acquainted with me at the same time, and bound to my shop for many years. Manhood's character you had before; and Gifford's in short is this: he is a downright honest Englishman. I never could hear that he was of any distinguishing party, but still owned the common cause of religion and his country. He is a very ingenious thriving man; and, without affecting praise, is content only to merit it. He now keeps a shop in Old Bedford; and having printed several copies that have sold well, he will, if he continues fair keeping, get a lumping portion for his daughters, who are modest pretty women, and very serviceable to him in his shop and trade."

"Mr. KNOWLES.—He had a most particular respect for my friend Harris, and for that reason I cannot but love

lord, and the other to Mr. Brindley, bookbinder, New Bond-street. The coroner's verdict was self-murder, and wilful murder as to the child. They were both buried in the cross-way near the turnpike at Newington.

1732, Aug. 4. *Died*, SAMUEL SKEAFE, an eminent stationer, in Bread-street, London, and of whom John Dunton thus says:—Courtesy and affability can be no more severed from him than life from his soul—not out of servile popularity, but of a native gentleness of disposition and true generosity of spirit. He married Mr. Merreal's daughter, and is not only a partner with him, but has the chief management of his shop and trade. His words are few and soft, never either peremptory or censorious; his trading is discreet and honest; he looks not to what he might do, but what he ought; justice is his first guide, and the second law of his actions is expedience. In a word, he is a wise man, a true friend, a kind husband, and Mr. Merreal\* is very happy in his son and partner, Mr. Samuel Skeafe.

1732. The art of printing was introduced in the convent of St. John the Baptist de Shoair: it is seated on a steep rock upon the southern side of the Kesroan, nearly opposite to the village of Chouair, in Syria. This convent is remarkable for containing the only Arabic printing establishment which has tolerably succeeded throughout the Turkish empire: it is spoken of in terms of high commendation, and was erected by Abdallah ben Zacher, a Melchite priest. Abdallah being a very ingenious artificer, entirely formed for himself the types and other materials, which he caused to be carried into this monastery, of which his own brother was the superior. He opened his typographical career with an Arabic version of the *Psalms*, in a neat and beautiful character, which purports to have been printed in monasterio S. Johannis Baptiste in monte

Kesroan, opera et industria monachorum casuorum S. Basilii, ordinis Romani. This edition is in 8vo., and was several times reprinted. Vainey, in his *Voyage en Syrie*, states that while he was there, four of the monks attended to the printing, and four others were employed in book-binding. He gives a list of thirteen books printed there, on paper which was brought from Europe; but relates, that although this press was the only one in Syria, very many beneficial effects had resulted from it, and much more good might have been derived from a judicious selection of works worthy of publication. It was then fast falling to decay.

1732. *Poor Richard's Almanack*, printed and published by Benjamin Franklin, Philadelphia, under the assumed name of Richard Saunders. This almanack is chiefly remarkable for the numerous and pithy maxims it contained, all tending to exhort to industry and frugality. It was continued annually for twenty-five years, and the proverbs and trite moral observations scattered throughout it were afterwards thrashed together into a connected discourse, under the title of the "WAY TO WEALTH." So highly esteemed is this production amongst his countrymen, that copies of it are to this day to be found framed and glazed in the houses even of the wealthiest people in Philadelphia, and as only in every province of North America, but wherever the English language is spoken.

1732, Sept. 29. JOHN BARBER, printer and alderman of London, elected lord mayor, the first of the profession who received that honour. He had been translated in the month of June from the stationers' to the goldsmiths' company.

1732, Oct. 26. The following singular account of the origin of PRINTERS' DEVILS, is taken from the *Grub-street Journal* of this date:—"As I was going the other day into Lincoln's-inn, under a great gateway, I met several lads loaded with great bundles of newspapers, which they brought from the stamp office. They were all exceeding black and dirty; from whence I inferred they were 'printers' devils' carrying from thence the returns of unsold newspapers, after the stamps had been cut off. They stooped under the gateway, and there laid down their loads; when one of them made the following harangue:—'Devils, gentlemen, and brethren,—Though I think we have no occasion to be ashamed at account of the vulgar opinion concerning the origin of our name, yet we ought to acknowledge ourselves obliged to the learned herald, who upon the death of any person of title, constantly gives an exact account of his ancient family in my *London Evening Post*. He says, there was one monsieur Devile, or Deville, who came over with the Conqueror, in company with De Laune, De Vice, De Vul, D'Ashwood, D'Urfe, D'Unphry, &c. One of the sons of this monsieur De Ville, was taken in by the famous William Caxton, in 1471, as an errand boy: was afterwards his apprentice, and in time an eminent printer, from whom our order took their name; but suppose they took it from infernal devils, it was not

He was son to the famous Swinnoock that published several practical books, and was my fellow apprentice for some years. There were many exemplary virtues that shined very bright in his seven years apprenticeship; he had abundance of excellent humour; he thought that day lost in which he did not oblige; he was master of his trade, and had his father's library to begin the world with, but like the sun in the morning, he appeared gay and dancing, to set in a cloud; he was very devout in the primitive way of serving God; he was never wrought up to any bigotry in unnecessary opinions. Mr. Packhurst was his true friend in all his affliction, and showed it particularly in his last moments."

"MR. WOODWARD.—He was related to Mr. Mitchell, (whose character you have had before.) His body is little, but well set, his hair black and lank, and, take him altogether, John Woodward is a pretty neat agreeable man; he has about him all the tenderness of good nature, as well as all the softness of friendship. He desired my custom as much as any binder I know in London, and had I not been pre-engaged, had bound all my folio books, as for that small dealing I had with him, I always found it punctual, just, and impartial."

"He is a fortunate man, being one of those that drew the £500 a-year in the parliament lottery. As he is rich and fortunate, so he is free and bountiful: he lives as a man of an estate should do, yet (like his neighbour, Merreal) he prefers conscience before riches—and desireth not to be great, but to do good. He is a generous creditor, and will scarce think of the debt I owe him till I send it on my own account; for this must be said of the ingenious Froctor, that his wisdom can distinguish betwixt parasites and friends, betwixt changing of favours and expending them."—*Dunton*.

because they were messengers frequently sent out in darkness, and appeared very black; but upon a reputed account, viz.,—John Fust, or Faustus, of Mentz, in Germany, was the inventor of printing, for which he was called a conjuror, and his art the black art. As he kept a constant succession of boys to run on errands, who were always very black, these they called devils; some of whom being raised to be his apprentices, he was said to have raised many a devil. As to the inferior order among us, called flies, employed in taking newspapers off the press, they are of later extraction, being no older than newspapers themselves. Mr. Bailey thinks their original name was lies, taken from the papers they so took off, and the alteration occasioned thus:—To hasten these boys, the pressman called lie, lie, which naturally fell into one single word, lie. This conjecture is affirmed by a little corruption of the true title of the *Lying Post*; since, therefore, we are both comprehended under the title devils, let us discharge our office with diligence; so may we attain, as many of our predecessors have done, to the dignity of printers, and to have an opportunity of using others as much like poor devils, as we have been used by them, or as they and authors are used by booksellers. These are an upstart profession who have engrossed the business of bookselling, which originally belonged solely to our masters. But let them remember, that if we worship Belial and Beelzebub, the god of flies, all the world agrees, that their god is Mammon.\*

At the head of the article is a picture, emblematically displaying the art and mystery of printing; in which are represented a compositor with an ass's head; two pressmen, one with the head of a hog, the other of a horse, being names which they fix upon one another; a fly taking off the sheets, and a devil hanging them up; a messenger with a greyhound's face kicking out the *Craftsman*; a figure with two faces; to shew he prints on both sides; but the reader is cautioned against applying to any particular person who is, or ever was, a printer; for that all the figures were intended to represent characters, and not persons.

1732. *The London Directory; or, a list of the principal Traders in London.* The person who conceived the idea of this work, (the first of its kind,) was Mr. James Brown, a native of Kelso, in Scotland, who after laying the foundation, gave it to Mr. Henry Kent, printer, in Finch-lane, Cornhill, who carried it on, and got an estate by it. Mr. Brown was a scholar of some eminence; but is better known as a merchant and traveller in various parts of the globe. He was born May 23, 1709, educated at Westminster, and died at Stoke Newington, London, November, 1788.

1732, Nov. 20. Mr. JOHN MEARS, bookseller, Ludgate-street, Old Bailey, count de Passeran, and Mr. John Morgan, were taken into custody by a messenger; the first for publishing, and the two latter for writing a pamphlet, entitled a *Philosophical Dissertation on Death*. Mr. John

Mears succeeded to the business of Richard Nutt, and printed the *Historical Register*. He died in 1761.

1732. *Died, SAMUEL PALMER*, an eminent printer, of Bartholomew-close, London, and who is remarkable for his *History of Printing*, 4to., in which he was assisted by that singular character, George Psalmanazar,\* who, however, says, "that Mr. Palmer had long promised to the world his *History of Printing*, but for which he was not at all qualified. However, he designed to have added a second part, relating to the practical part, which was more suited to his genius, and in which he designed to have given a full account of all that relates to that branch, from the letter-founding to the most elegant way of printing, imposing, binding, &c., in which he had made considerable improvements of his own, besides those he had taken from foreign authors. But this second part, though but then as it were in embryo, met with such early and strenuous opposition from the respective bodies of letter-founders, printers, and book-binders, under an ill-grounded apprehension that the discovery of the mystery of those arts, especially the two first, would render them cheap and contemptible (whereas the very reverse would have been the case, they appearing indeed the more curious and worthy our admiration, the better they are known) that he was forced to set it aside. But as to the first part, viz., the *History of Printing*, he met with the greatest encouragement, not only from them, but from a very great number of the learned, who all engaged to subscribe largely to it; particularly the late earls of Pembroke and Oxford, and the famous Doctor Mead, whose libraries were to furnish him with the noblest materials for the compiling of it, and did so accordingly. The misfortune was, that Mr. Palmer, knowing himself unequal to the task, had turned it over to one Papiat, a broken Irish bookseller then in London, of whom he had a great opinion, though still more unqualified for it than he, and only aimed at getting money from him, without ever doing any thing towards it, except amusing him with fair promises for near three quarters of a year. He had so long dallied with him, that they were come within three months of the time in which Mr. Palmer had engaged to produce a complete plan, and a number or two of the first part by way of specimen of the work, viz., the invention and improvement of it by John Faust, at Mentz.

\* George Psalmanazar, author of the fabulous *History of Formosa*, and a very considerable part of the *Universal History*, exceeded in powers of deception any of the great impostors of learning. His *Island of Formosa* was an illusion eminently bold, and maintained with as much felicity as erudition; and great must have been that erudition which could form a pretended language and its grammar, and fertile the genius which could invent the history of an unknown people. It is said that the deception was only satisfactorily ascertained by his own penitential confession; he had defied and baffled the most learned. His portion of the *Universal History* is particularly pointed out in his own *Memoirs of Himself*, published the year after his decease, which happened May 2, 1753, at the age of eighty-three.

And these were to be shewn at a grand meeting of learned men, of which Dr. Mead was president that year; and, being his singular friend and patron, was to have promoted a large subscription and payment, which Mr. Palmer stood in great need of at that time; whereas Papiat had got nothing ready but a few loose and imperfect extracts out of Chevalier, Le Caille, and some other French authors on the subject, but which could be of little or no use, because he frequently mistook them, and left blanks for the words which he did not understand. These, however, such as they were, Mr. Palmer brought to me; and earnestly pressed me that I would set aside all other things I might be then about, and try to produce the expected plan and specimen by the time promised, since he must be ruined both in credit and pocket if he disappointed his friends of it. It was well for him and me that the subject lay within so small a compass as the consulting of about twelve or fourteen principal authors; so that I easily fell upon a proper plan of the work, which I divided into three parts; the first of which was, to give an account of the invention of the art, and its first essays by Faust at Mentz, and of its improvement by fusile or metal types, varnish, ink, &c., by his son-in-law, Peter Schoeffer. The second was to contain its propagation, and farther improvement, through most parts of Europe, under the most celebrated printers; and the third, an account of its introduction into and progress in England. This, together with above one half of the first part, were happily finished, and produced by the time appointed; and met with more approbation and encouragement from his friends than I feared it would, being conscious how much better it might have turned out, would time have permitted it. And this I chiefly mention, not so much to excuse the defects of so horrid a performance, as because it hath given me since frequent occasion to observe how many much more considerable works have been spoiled, both at home and abroad, through the impatience of the subscribers; though this is far enough from being the only or even the greatest inconvenience that attends most of those kinds of subscriptions. As to Mr. S. Palmer, his circumstances were by this time so unaccountably low and unfortunate, considering the largeness and success of his business, and that he was himself a sober and industrious man, and free from all extravagance, that he could not extricate himself by any other way but by a statute of bankruptcy, which caused his history to go sluggishly on; so that, notwithstanding all the care and kind assistance of his good friend Dr. Mead, a stubborn distemper, which his misfortunes brought upon him, carried him off before the third part of it was finished. This defect, however, was happily supplied by the late noble earl of Pembroke, who being informed by Mr. Pain, the engraver, Mr. Palmer's brother-in-law, what condition the remainder was left in, and that I was the person who had wrote the former parts, sent for me, and, with his usual generosity, enjoined me to com-

plete the work, according to the plan; and not only defrayed all the charges of it, even of the paper and printing, but furnished me with all necessary materials out of his own library; and, when the work was finished, his lordship reserved only some few copies to himself, and gave the remainder of the impression to Mr. Palmer's widow, not without some further tokens of his liberality." Mr. Palmer served his apprenticeship with John Dnnton, whom he accompanied to America; and Dr. Franklin worked for some time in Mr. Palmer's office during his residence in London.

1732, Dec. 14. In the *Grub-street Journal* of this day, is the following observation:—"Of all the parts of a book, the title is the most important; on the *bona fides* of this one page, half the commerce of literature turns; the title therefore should be the most authentic, and composed with the greatest justness as well as skill. But so it is, no part is so subject to frauds. The composing them is fallen into the hands of booksellers, persons often ignorant and incapable, and at least too nearly interested; even authors themselves are scarce fit to be trusted with so delicate a province. Some person, or company, should be appointed by the government, to give due names and titles to all writings which come from the press, that readers may not be imposed on with *guide pro quos*, chaff for grain.

1732, March 23. *The Derby Mercury*, No. 1, printed and published by Samuel Drury. The first advertisement of a sale by auction was inserted on June 24, 1742, consisting of a freehold estate of nine houses, &c. to be sold at the Virgins' Inn, in that town.

1732. *The Nottingham Courant*. This paper was commenced by George Ayscough, son of William Ayscough, noticed at page 603, *ante*.

1732, March. *The London Magazine*.

1732. *Historia Literaria*, by Archibald Bower, four volumes 8vo.

1732, Dec. 16. *The Weekly Miscellany*, No 1. This publication was commenced by Dr. Wm. Webster, in London, under the assumed name of Richard Hooker, esq. of the Inner Temple, and printed by William Bowyer, jun. "This undertaking," says Dr. Webster, "was more approved of than supported, procured him nothing but great trouble, much ill-will, and abuse of all sorts, great expense, and much difficulties." From being crowded with religious essays, the newspaper soon acquired the quaint appellation of *Old Mother Hooker's Journal*. In 1734, if his own account may be credited, he rejected an offer of £300 a-year, besides preferment, offered him by lord Palmerston, if he would turn the *Miscellany* into a ministerial paper.

1733. *Died*, CONSTANTIA GRIERSON, wife of George Grierson, who succeeded Andrew Crook, as king's printer for Ireland, in 1732. That the most splendid talents, united with the most intense application, is not confined either to sex or sphere of life, is fully evinced by the subject of the present memoir. This prodigy of early learning and acquirements (whose maiden name

is no where mentioned,) was born in the county of Kilkenny, of parents poor and illiterate. Nothing is recorded of her until her eighteenth year, when we are told by Mrs. Pilkington that she was brought to her father to be instructed in midwifery, and that then she was a perfect mistress of the Hebrew, Greek, Latin, and French languages, and was far advanced in the study of the mathematics. Mrs. Pilkington having inquired of her where she gained this prodigious knowledge, she modestly replied, that when she could spare time from her needle work, to which she was closely kept by her mother, she had received some little instruction from the minister of the parish. She wrote elegantly, says Mrs. P. both in verse and prose; but the turn of her mind was chiefly to philosophical or divine subjects; nor was her piety inferior to her learning. The most delightful hours, this lady declares, that she had ever passed, were in the society and conversation of this "female philosopher." "My father," adds she, "readily consented to accept of Constantia as a pupil, and gave her a general invitation to his table, by which means we were rarely asunder." Whether it was owing to her own design, or to her envy of those who survived her, I know not, but of her various and beautiful writings I have never seen any published, excepting one poem of hers, in the works of Mr. Barber. Her turn, it is true, was principally to philosophical or religious subjects, which might not be agreeable to the present taste; yet could her heavenly mind descend from its sublimest heights to the easy and epistolary style, and suit itself to my then gay disposition. Mrs. Barber, likewise, gives her testimony to the merit of Constantia, of whom she declares "that she was not only happy in a fine imagination, a great memory, an excellent understanding, and an exact judgment, but had all these crowned by virtue and piety. She was too learned to be vain, too wise to be conceited, and too clear-sighted to be irreligious. As her learning and abilities raised her above her own sex, so they left her no room to envy any; on the contrary, her delight was to see others excel. She was always ready to direct and advise those who applied to her, and was herself willing to be advised. So little did she value herself upon her uncommon excellencies, that she has often recalled to my mind a fine reflection of a French author, 'That great geniuses should be superior to their own abilities.'" Constantia married Mr. George Grierson, a printer, in Dublin, for whom lord Carteret, then lord lieutenant of Ireland, obtained a patent appointing him printer to the king, in which, to distinguish and reward the merit of his wife, her life was inserted. Mrs. Grierson died at the premature age of twenty-seven, admired and respected as an excellent scholar in Greek and Roman literature, in history, theology, philosophy, and mathematics. The dedication of the Dublin edition of *Tacitus* to Lord Carteret, affords a convincing proof of her knowledge in the Latin tongue; and by that of *Terence* to

his son, to whom she wrote a Greek epigram. Dr. Hayward esteems her *Tacitus* one of the best edited books ever published. She wrote many fine poems in English, but esteemed them so slightly, that very few copies of them were to be found after her decease. What makes her character more remarkable is, that she rose to this extraordinary eminence entirely by the force of natural genius and uninterrupted application. She was in the early part of her life an excellent compositor, and an admirable adept in the art of printing. The following lines were annually printed from a press fixed upon a car, and distributed in the street procession of printers, on the lord mayor's day, in Dublin:

Hail, mystic art! which men like angels taught,  
To speak to eyes, and paint embodied thought!  
The deaf and dumb, blest skill, relieved by thee,  
We make one sense perform the task of three.  
We see—we hear—we touch the head and heart,  
And take or give what each but yields in part;  
With the hard laws of distance we dispense,  
And, without sound, apart, commune in sense;  
View, though confin'd,—nay, rule this earthly ball,  
And travel o'er the wide expanded all.  
Dead letters thus with living notions fraught,  
Prove to the soul the telescope of thought;  
To mortal life immortal honour give,  
And bid all deeds and titles last and live.  
In scanty life, Eternity we taste,  
View the first ages, and inform the last;  
Arts, History, Laws, we purchase with a look,  
And keep like Fate, all nature in a Book.

The following epigram was written by Mrs. Grierson, to the hon. Mr. Percival, with Hutchinson's *Treatise on Beauty and Order*:

Th' internal senses painted here we see,  
They're born in others, but they live in thee:  
Oh! were our author with thy converse blest,  
Could he behold thy virtues in thy breast,  
His needless labours with contempt he'd view,  
And bid the world not read—but copy you.

Mrs. Grierson had a son, whom she instructed herself, and who was likewise king's printer in Dublin.\* He is mentioned by Dr. Johnson with great respect, and was a man of great learning, wit, and vivacity. He died in Germany, at the age of twenty-seven years.

*P. Ovidii Nasonis Metamorphoseon Libri XV. Interpretatione, &c. Notis, ad Unum serenissimi Delphini.* London, 1708, 8vo. Reprinted, 1719, 1730, &c. &c. *Cum Annotationibus Variorum.* Dublin, 1729, 4to. A correct and splendid edition, printed by Mr. Grierson. Large paper.

1733. *Died*, JOHN DUNTON, bookseller, printer, and miscellaneous writer, who resided at the sign of the Black Raven, in Princess-street, London. This eccentric bookseller was born May 14, 1659, at Graffham, in Huntingdonshire, where his father was then rector. When nearly fifteen, he was apprenticed to Mr. Parkhurst, bookseller, and before the expiration of his apprenticeship Dunton made himself conspicuous in the great political dispute between the Tories and Whigs, he being a prime mover on the part

\* The office of king's printer for Ireland is still enjoyed by the same family, under the firm of G. J. & T. Grierson.

of the whig apprentices, and selected for their treasurer. By his own statement, his conduct during the seven years was not very regular; and at the expiration of the term one hundred apprentices were invited to celebrate the funeral. He now entered on business as a bookseller on his own account; but, to avoid too large a rent, took only half a shop, a warehouse, and a fashionable chamber. "Printing," he says, "was the uppermost in my thoughts; and hackney authors began to ply me with specimens, as earnestly and with as much passion and concern, as the watermen do passengers with oars and scullers."

Dunton's reputation grew with his circumstances; and Aug. 3, 1682, he married Elizabeth, one of the daughters of Dr. Annesly, who at that time was a celebrated preacher among the dissenters. He now opened a shop at the Black Raven, in Princess-street; where he carried on business very prosperously, till the universal damp upon trade which was occasioned by the defeat of the duke of Monmouth in the west; when, having £500 owing him in New England, he determined, after much deliberation, to make a trip thither; and, after a long and tedious voyage of four months, and the loss of a venture of £500 in another ship, which was cast away, he arrived safe at Boston, in March, 1685-6; and opened a warehouse for the sale of the books which he had taken thither. Carrying with him powerful recommendations, and his books being of a class adapted to the Puritans, the success was equal to his wishes. His rivals in trade were but few; Mr. Usher, Mr. Philips, Mynheer Brunning, and Duncan Campbell, an industrious Scotchman, being then the only booksellers in Boston; and Mr. Green, the principal if not the only printer. He had taken with him a steady apprentice, Samuel Palmer, to whom he entrusted the whole charge of his business; which left him at leisure to make many pleasant excursions into the country.

In the autumn he returned to London; and being received by his wife and her father with all the marks of kindness and respect, expected nothing but a golden life of it for the future, though all his satisfactions were soon withered; for being deeply entangled for a sister-in-law, he was not suffered to step over the threshold in ten months. Wearied with this confinement, he determined to take a trip to Holland, Flanders, Germany, &c.

Of six hundred books which he had printed, he had only to repent, he adds, of seven: *The second Spira*, *The Post Boy robbed of his Mail*, *The Voyage round the World*, *The new Quevedo*, *The Pastor's Legacy*, *Heavenly Pastime*, *The Hue and Cry after Conscience*. These he heartily wished he had never seen, and advised all who had them to burn them. After confessing his errors in printing, he says, "As to bookselling and traffick, I dare stand the test, with the same allowance that every man under the same circumstance with me would wish to have, for the whole trading part of my life. Nay, I challenge all the booksellers in London to prove I ever over-

reached or deceived them in any one instance; and when you come to that part of my *Life* that relates to *auctions I made in Dublin*, you will find that in all the notes I made for Dublin, that I put the same price to every man."

In 1692, having been put in possession of a considerable estate upon the decease of his cousin Carter, the master and assistants of the company of stationers began to think him sufficient to wear a livery, and honoured him with the clothing. His livery-fine upon that occasion was twenty pounds, which he paid; and the year following, Mr. Harris (his old friend and partner,) and about fifty more of the livery-men, entered into a friendly society, and obliged themselves to pay twenty shillings a man yearly to the renter-warden, in regard that honour was usually once a-year attended with a costly entertainment to the whole company. "The world now smiled on me. I sailed with wind and tide; and had humble servants enough among the booksellers, stationers, printers, and binders; but especially my own relations, on every side, were all upon the very height of love and tenderness, and I was caressed almost out of my five senses. However, the many civilities I received from the company of stationers, for the fifteen years I traded amongst them, do oblige me, out of mere gratitude, to draw the character of the most eminent of the profession in the three kingdoms." Here Mr. Dunton proceeds to characterize the principal booksellers, printers, stationers, bookbinders, &c. who were his contemporaries, and says, "Thus have I, in brief characters, run through the whole history of the stationers' company, (authors, booksellers, printers, stationers, binders, engravers, licensers, &c.)

\* His next regular publication was, *The Life and Errors of John Dunton, late Citizen of London; written by himself in Solitude*. With an idea of a new Life; wherein is shewn how he'd think, speak, and act, might he live over his day again: intermixed with the new discoveries the author has made in his travels abroad, and in his private conversation at home. Together with the lives and characters of a thousand persons now living in London. &c. Digested into seven stages, with their respective ideas.

"He that has all his own mistakes confess'd,  
Stands next to him that never has transgress'd;  
And will be censur'd for a fool by none,  
But they who see no errors of their own."

Fox's *Satyr upon himself*, p. 4.

London: printed for S. Malthus, 1795. This genuine and simple narrative of his own history is a very curious performance, and abounds in literary history of an interesting nature. This work has been reprinted by the late John Nichols, esq., in two vols. 8vo., with a very good portrait.

† The *Dublin Scuffle*; being a challenge sent by John Dunton, citizen of London, to Patrick Campbell, bookseller in Dublin; together with the small skirmishes of bills and advertisements. To which is added, the *bill* sent by a citizen's wife in Dublin, tempting him to lewdness; with his answers to her. Also some account of his conversation in Ireland, intermixt with particular characters of the most eminent persons he conversed with in that kingdom; but more especially in the city of Dublin. In the several letters to the spectators of the scuffle. With a poem on the whole encounter.

"I wear my pen as others do their sword."—OLDHAM.

London, printed for the author; and are to be sold by A. Baldwin, near the Oxford Arms, in Warwick-lane, and by the booksellers in Dublin. 1699.

so far as my life and actions have been any way mixed with them; and I hope these characters of my learned brethren, &c. will be of good use, both for caution and pattern; for we may learn by their failings (where we see any,) to fortify ourselves against them, and, by the regularity of their conduct, to form our manners on the same model; so that, if we take it right, the reading of these characters is as good as living over again by proxy, for they furnish us with a set of maxims to steer by at another's expense.\*

Dunton is honoured with an incidental notice in the *Dunciad*, ii. 144; on which Warburton remarks, that "he was an auction bookseller, and an abusive scribbler. He wrote *Neck or Nothing*, a violent satire on some ministers of state, a libel on the duke of Devonshire and the bishop of Peterborough," &c.† He was certainly a most voluminous writer, as he seems to have had his pen always ready, and never to have been at a loss for a subject to exercise it upon. Though he generally put his name to what he wrote, it would be a difficult task to get together a complete collection of his various publications. As containing notices of many persons and things not to be found elsewhere, they certainly have their use; and his accounts are often entertaining. This dipper into a thousand books formed ten thousand projects, six hundred of which he appears to have thought he had completely methodized.‡ His mind seemed to be like some tables, where the victuals have been ill-sorted, and worse dressed.

1733, March 15. Died, THOMAS PAGE, an eminent stationer on Tower Hill, London.

1733, April 24. Barbier, in the new edition of his *Dictionnaire des Anonymes*, gives us an

\* Nearly the whole of these characters are inserted in this work, and, wherever possible, the date of the decease has been added; a thing which Dunton never mentions.

† Dunton's *Whipping-Post*; or, a Satire upon every body. To which is added, a *Panegyric on the most deserving Gentlemen and Ladies in the Three Kingdoms*, &c. &c. Vol. 1. To which is added *The Living Elegy*; or, Dunton's Letter to his few Creditors. With the Character of a Summer Friend. Also, *The Secret History of the Weekly Writers*, in a distinct challenge to each of them. Printed, and are to be sold by B. Bragg, at the Black Raven in Paternoster-row. 1766.

‡ Dunton's greatest project was intended for the extirpating of lewdness from London; a scheme highly creditable to the schemer, had it been practicable. Armed with a constable's staff, and accompanied by a clerical companion, he sallied forth in the evening, and followed the wretched prostitutes home, or to a tavern, where every effort was used to win the erring fair to the paths of virtue; but these, he observes, were "perilous adventures," as the Cyprians exerted every art to lead him astray, in the height of his spiritual exhortations.

§ John Dunton also characterizes the following stationers with whom he had dealings:—

MAJORS HATLEY, stationer. He is the master of himself, and subdues his passions to reason, and by this inward victory, works his own peace; he is well skilled in military discipline, and from being a captain is advanced to a major; he lies ever close within himself, armed with wise resolution, and will not be discovered but by death or danger. Piety never looks so bright as when it shines in steel; and Major Hatley holds it the noblest revenge that he might hurt, and does not. I dealt with this military stationer for six years, but left him with flying colours to trade with his honest servant.

MR. SAMUEL HOOL, stationer. He is a far finer man than he knows of, for being one of extraordinary modesty he shews better to all men than himself, and so much the

interesting account of a work written by the Abbé Phelipaux, grand vicar of the celebrated Bossuet, which, together with an edition of the *Provincial Letters of Pascal*, and the first volume of *Anecdotes on the state of the religion of the Chinese*, (all three printed at St. Menes, a small town of France,) were seized by the police in the house of the printer, Gabriel Daliege, on this day. The copies were confiscated and burnt; and the printer and some of his workmen were consigned to the Bastille, and suffered an ignominious punishment.

1733, June 3. WILLIAM RAYNER sentenced in the court of king's bench to pay a fine of £40, to be imprisoned for two years, and give security for his good behaviour for seven years, for publishing a libel intitled *Robin's Reign; or, Seven's the Main*, consisting of several verses, printed under an hieroglyphical picture, prefixed to one of the volumes of the *Craftman*.

1733. *The Rhode Island Gazette*, published at Newport, North America.

1733. *The Bee*, by Eustace Budgell, which in its structure and contents, resembles more a magazine than the legitimate periodical essay. It continued weekly for about two years, and then, owing to a disagreement with the booksellers relative to the mode of conducting it, the work suddenly dropped.

1734, Jan. 31. Dr. JOHN STERNE, bishop of Clogher, in Ireland, gave, upon this day, £1000 to the university of Dublin, and £500 to the fellows, for the purpose of erecting a printing-office for their use, and furnishing it with types, presses, &c. Dr. Sterne had been dean of St. Patrick's, Dublin, in which he was succeeded by Dr. Jonathan Swift. The printing-office erected in Trinity college, is a singularly beautiful specimen of the true Doric, and forms an appropriate termination to one of the principal walks. Mrs. Graisberry enjoys the office of university printer.

1734, July 10. In the court of common pleas a trial took place between James Jervaise, plaintiff, and Alexander Blackwell, defendant, for exercising the art and trade of printing, not having served a regular apprenticeship thereto.

better to all men as less to himself. The air of his face is a little melancholy, but being very just in his dealings, it always shines in his conscience; he walks according to the rules of virtue as the hours pass by the degrees of the sun, and being made of good humour, his life is a perpetual harmony; but why do I praise particular virtues when he excels in all! or if those good qualities which adorn his soul can admit of degrees, it is because his compassion is transcendent over the rest. He is as kind a creditor as if nature had forgot to give him gall. I traded with him for many years, and can say from my own experience, none can be more pitiful to the distressed or more prone to succour the unfortunate; and then most where is least means to solicit, least possibility of requital.

MR. LITTLEBURY, stationer, in Newgate-street. I also traded, by chance, with Mr. Littlebury. He is a man of composed and serene countenance, not set nor much alterable with sadness or joy. His life is distinct and in method, and his actions, as it were, cast up beforehand. "Yet he uses this world as not abusing it," and one would think by his forgetting to dun a debtor that he traded for ready money; and the same character fits so nicely to Crall the stationer, brother to the bookseller of that name, that you would not know one from the other save by their different phiz.

A verdict was given to the plaintiff, and 40s. damages for exercising the said trade one month, according to the act of 5th Elizabeth. And on December 7, in the same court, Mr. John Shipthorpe, printer, obtained a verdict and six months damages, against John Stevens, bookbinder, for exercising the trade of a printer, not having served a seven years apprenticeship.

1734. In the *Gentleman's Magazine* for 1821, it is observed by a correspondent, that "from the invention of printing downwards so adverse were the circumstances attending the diffusion of Welsh literature, that there was not a printing-press in the principality until 1734, or thereabouts, when a temporary one was set up by Mr. Lewis Morris, of Bod-Edeyrn, in Anglesey. This identical press is still in being at Trevirw, near Llanrwst."

1734, Aug. 31. *Died*, JOSEPH DOWNING, St. John's-lane, London, printer to the society for the propagation of the gospel in foreign parts. Mr. Downing was a contributor to Mr. Bowyer, and ranked by Negus as a well-affected printer.

1734. *The Weekly Post Boy*. This paper was established by a postmaster at Boston, in North America, and continued about twenty years.

1734, Oct. *Dublin Literary Journal*, No. 1.

1734, Nov. 9. *The Weekly Amusement*, No. 1.

1734. *South Carolina Gazette*, published at Charleston. There had been a newspaper with the same title, published at Charleston, in 1731.

1735. CHRISTOPHER SAUR, a German, established a press at Germantown, in Pennsylvania, and the establishment was carried to considerable extent and eminence by his son. Thomas, in his *History of Printing*, reports of him, that "his was by far the most extensive book manufactory then, and for many years afterwards, in the British American colonies. It occasioned the establishment of several binderies, a paper-mill, and a foundry for English and German types." At this foundry, which was one of the earliest erected throughout the whole of British America, Saur cast types, not only for himself, but for other German printers. He also manufactured his own ink. Among other works, three editions of the *German Bible* issued from his press; viz. in the years 1743, 1762, and 1776. The greater part of this last impression, consisting of 3000 copies, was most singularly and unfortunately disposed of. "The property of Saur was much injured by the revolutionary war, particularly by the battle of Germantown, in 1777. To preserve the residue of it from being destroyed by the British, he went to Philadelphia; his estate was confiscated before the close of the war, and his books, bound and unbound, were sold: among these was the principal part of the last edition of the *bible* in sheets; some copies of them had been before, and others of them were now, converted into cartridges, and thus used, not for the salvation of men's souls, but for the destruction of their bodies." In the summer of 1739, Saur commenced a newspaper in German.

1735. The duke d'Aiguillon erected a printing press at Vêrets, his country seat, in the province

of Touraine, at which was printed a collection of French pieces, bearing the imprint of *Ancone*, in this year; it is said that only seven or twelve copies of this work were struck off.—*Cotton*.

1735, April. In the *Gentleman's Magazine* for this month, is the following prize epigram:—

#### ON PRINTING.

*Horses and asses, flies and devils do  
Their labour in the printing art bestow;  
No wonder, thence such loads of lumber rise  
Dulness and maggots, calumny and lies.*

1735, August 17. *Died*, GEORGE JAMES, one of the common councilmen for the ward of Aldersgate-without, and printer to the city of London. His widow carried on the business for some time, when the office of city printer was conferred on Henry Kent, printer, deputy of the ward of Broad-street.

1735, Nov. 10. *Died*, THOMAS DEAN, of Malden, in Kent, aged 102 years. When king Charles I. was beheaded, he was then twenty years of age, and was a fellow of University college, Oxford; but being a Catholic, was deprived at the revolution. He wrote some pieces of his religion, which were privately printed in the master's lodgings, and December 18, 1691, he stood in the pillory for concealing a libel: from that time he subsisted mostly on charity.

1735, Nov. 25. *Died*, JACOB TONSON, the second. He was the eldest son of Richard Tonson, and nephew to the first Jacob Tonson; and it appears from his will, which was made August 16, and proved December 6, 1735, that he was a bookseller, bookbinder, and stationer, all which businesses were carried on in his own house; and that he was also a printer, in partnership with John Watts. The elder Jacob probably also carried on all these several occupations. His will, which filled twenty-seven pages, written by himself, shews him not only to have abounded in wealth, but to have been a just and worthy man—according to the printed accounts of that period he was at the time of his death worth £100,000. After having devised his estates in Herefordshire, Gloucestershire, and Worcestershire, and bequeathed no less a sum than £34,000 to his three daughters and his younger son, Samuel, and disposed of his patent between his eldest sons Jacob and Richard, he mentions his uncle, old Jacob Tonson, to whom he leaves fifty guineas for mourning; but, knowing his love of quiet and retirement, he says he would not burden him with the office of executor of his will. He, however, recommends his family to his uncle's care, and exhorts all his children to remember their duty to their superiors and their inferiors, tenderly adding—"And so God bless you all!" It appears by the grant and assignment of his uncle, that he was entitled to the collection of the kit-cat portraits, and that he had not long before his death erected a new room at Barn-elms, in which the pictures were then hung. Seventeen days after his death old Jacob Tonson made his will, in which he confirmed a settlement that he had made on him, (probably at the time of his marriage) and ap-

pointed his great nephew, Jacob Tonson, the eldest son of the former Jacob, his executor and residuary legatee.\*

The following epitaph, written by a young gentleman of Eton, is copied from the *Gentleman's Magazine* for 1736, vol. vi. p. 106.

"Vitis columine peracta,  
Hic flos Jacobi Tonson,  
perpoliti socrorum principis :  
qul velut obstetrix Musarum  
in lucem edidit  
felices ingenii partus,  
Lugreta, Scriptorum Chorus,  
et frangite calamos !  
Ille vester *margine crassus deletur* ;  
sed hæc postrema inscriptio  
hulc *primæ mortis pagine*,  
imprimatur,  
ne prelo sepulchri commissus  
ipse editor careat titulo :  
hic jacet *Bibliopola*,  
folio vitæ dilapso,  
expectans novam editionem  
auctorem et emendatorem."

## TRANSLATION.

The volume of his life complete  
Here, reader, with the end you meet  
Of Jacob Tonson, 'mong his trade  
Best gilt, and best letter'd made ;  
Who, like a midwife, to the muse,  
If called upon, could scarce refuse  
(When she the press had undergone  
By nature or extorty won)  
Delivering her to end her pains  
Of the chance offspring of her brains :  
In this, like a bawd midwife found,  
That soon as the infant he had bound,  
Not keeping lady muse's fame,  
He publishes to the world her shame,  
For which she oft this fate did meet,  
Eternal penance in a sheet ;  
Owning herself by every word  
A lewd dull jilt upon record.  
Yet mourn his death, ye writers all,  
Ye vulgar great and vulgar small ;  
Let some in periods long compose  
A grave oration in grave prose,  
While the poetic tuneful train  
In after elegy complain ;  
Or if their genius turn to lyric,  
Sing old friend Jacob's panegyric :  
To him for proof their works were brought  
He carefully revised each thought :  
With critic *dead* but having strife,  
Death blotted out his line of life,  
And he who many a scribbling elf  
Abridged, is now abridged himself.  
When heaven renewed the original text,  
'Twas with *errata* few perplex !  
Pleased with the copy, 'twas collated  
And to a better life translated.  
But let to life this supplement  
Be printed on the monument,  
Lest the first page of death should be,  
Great editor, a blank to thee ;  
And thou, who many titles gave,  
Shouldst want a title for this grave.  
"Stay, passenger, and drop a tear,  
Here lies a noted bookseller :  
This marble index here is placed  
To tell that when he found deceased  
His book of life, he died with grief ;  
Yet he by true and genuine belief  
A new edition may expect,  
Far more enlarged and more correct."

1735. *Roberti Stephani Thesaurus Lingue Latine*, in four volumes folio, much augmented and amended, by the Rev. Edmund Law ; John Taylor, M.A. ; Rev. Thomas Johnson, M.A. ;

and Sandys Hutchinson, M.A. London, printed for Samuel Harding, bookseller, at the Bible and Anchor, on the Pavement, St. Martin's-lane.

1735, Nov. 25. JOHN GRAY, bookseller, gave 100 guineas for the copyright of the *History of George Barnwell*, to Mr. Lillo,\* the author. Mr. Gray became a dissenting minister, and afterwards complying with the terms of admission into the church of England, rector of Ripon, in Yorkshire. In conjunction with Andrew Reed, he abridged the *Philosophical Transactions* from 1720 to 1732, in two vols. 4to. 1733. He also published the *Elmerick of Lillo* ; and, at the dying request of the author, dedicated it to Frederick prince of Wales.

1735. The *Bible* in the Lithuanian language, was printed at Karalanska, a town of Russia, seated on the Tunguska river. A copy is in the royal library of Copenhagen.—*Cotton*.

1735. VALLEYRE, a printer, in France, made an attempt to cast plates of metal, for printing calenders ; it is a rude essay at stereotype printing, and M. Camus has given an impression of one of his plates, containing the calender for March and April, and supposes it to be of this date.

1735, Nov. 27. *Died*, ROBERT ANDREWS, aged eighty years, a letter-founder in Charterhouse-street, London. He was a member of the court of assistants in the stationers' company. Mr. Silvester Andrews, his son, carried on the business of letter-founding at Oxford. In 1733, Thomas James purchased both their foundries.

1735. *The Prompter*.

1735, March 13. *The Old Whig ; or, Consistent Protestant*, No. 1. A great portion of this work was written by Dr. Chandler,† a learned dissenting minister, who was zealously attached to the person and character of George II.

1735. *London and Dublin Magazine ; or, the Gentleman's Monthly Intelligencer*. London, printed, and Dublin reprinted, for George Faulkner, for 1735. This was a piratical reimpression or Dublin edition of the *London Magazine*.

1736, Feb. 3. *Died*, BERNARD LINTOT, a celebrated bookseller of London. Barnaby‡ (Bernard) Lintott, son of John Lintott, late of Horsham, a Sussex yeoman, was bound apprentice, at stationers' hall, to Thomas Lingard, De-

\* George Lillo was born at London, Feb. 4, 1693. He carried on the business of a jeweller many years with great reputation. He well knew how to touch the heart ; and his pieces, which are subservient to the cause of virtue, are *George Barnwell*, *Fatal Curiosity*, and *Arden of Feversham*. He died Sept. 3, 1739.

† Samuel Chandler was born at Hungerford, in Berkshire, in 1693, and was educated for the ministry amongst the dissenters. In 1716 he was chosen minister of the congregation at Peckham, and the income being slender, he commenced business as a bookseller in the Poultry, which he however relinquished upon his being appointed minister of the Old Jewry meeting. He was complimented by the universities of Edinburgh and Glasgow with the diploma of D. D., and was elected a member of the royal and antiquarian societies. Dr. Chandler died May 3, 1766, and was buried in Bunhill Fields. His sermons have been printed in four volumes, 8vo.

‡ This was the name under which he was bound apprentice ; but he soon dropped Barnaby, and, after some years, wrote Lintot with a single t at the end.

\* Jacob Tonson was succeeded as stationer to the prince of Wales, by Mr. Samuel Gibbons.

ember 4, 1690; turned over to John Harding,\* 169...; and made free March 18, 1699. He soon afterwards commenced business as a bookseller, at the sign of the Cross Keys, between the Temple gates, where he was patronized by many of the most eminent writers of a period which has been styled the Augustine age of English literature. John Dunton thus characterizes Mr. Lintot:—"He lately published a *Collection of Tragic Tales, &c.*, by which I perceive he is angry with the world, and scorns it into the bargain; and I cannot blame him: for D'Urfey (his author) both treats and esteems it as it deserves; too hard a task for those whom it flatters; or perhaps for Bernard himself, should the world ever change its humour, and grin upon him. However, to do Mr. Lintott justice, he is a man of very good principles, and I dare engage will never want an author of *Sol-Fa*, so long as the playhouse will encourage his comedies." In 1715 he served the office of rector warden to the stationers' company; in 1722-3, he was elected into the court of assistants; and served the office of under warden in 1729. In 1714, Lintot entered into a very liberal agreement with Pope, for his translation of *Homer's Iliad*; the printing of which was soon afterwards begun by Mr. Bowyer, and diligently attended to by all parties. Gay,† in a letter to Congreve, April 7, 1715, facetiously says, "Mr. Pope's *Homer* is retarded by the great rains that have fallen of late, which causes the sheets to be long a-drying. This gives Mr. Lintot great uneasiness; who is now endeavouring to engage the curate of the parish to pray for fair weather, that his work may go on." There does not appear to have been any altercation between the bookseller and the author during the whole period of the publication of the *Iliad* or *Odyssey*, which continued till 1725; but, from whatever cause it may have arisen, the friendship between Mr. Pope and his publisher appears to have terminated with the

conclusion of *Homer*.\* In an undated letter, addressed by Mr. Pope to the earl of Burlington about that period, his description of his old friend Bernard Lintot is given with the most exquisite humour.† "I know of nothing in our language," says Dr. Warton, "that equals it, except, perhaps, Mr. Colman's description in a *Terra Filius*, of an expedition of a bookseller and his wife to Oxford." Perhaps Mr. Pope conceived that Lintot had risen above his proper level; for it appears that early in 1727, having, by successful exertions in business, acquired a decent competence, and made some additions to his paternal inheritance in Sussex, he was desirous of tracing the origin of his family; and for that purpose consulted Humphrey Wanley, who had then the custody of the earl of Oxford's heraldic manuscripts, and in whose diary is the following memorandum:—"Young Mr. Lintot the bookseller, came enquiring after *ermas*, who now, it seems, want to turn *gentlefolks*. I could find none of their names." In 1727 Pope un-

\* The following sums were paid by Lintot to Pope, for the various works here mentioned:

\* Without flattery he deserves to be called a very courteous man, of a lovely proportion, extremely well made—as handsome a man, and as good an air as, perhaps, few of his neighbours exceed him, so that his body makes a very handsome tenement for his mind. I came acquainted with him at Sturibitch fair, and having dealt with him several years, I find him to be a very honest man—an understanding bookseller, and a zealous Church-of-Englandman, yet to do him justice, he is no bigot to any party.

† John Gay was born at or near Barnstable, in Devonshire, in 1688, and educated at the Grammar school in that town. He was apprenticed to a silk mercer in London, but in a few years quitted trade, and commenced author. His first poem, entitled *Rural Sports*, printed in 1711, and dedicated to Pope, gained him the friendship of that poet and his friends. Gay obtained several employments in the reign of queen Anne, but on the accession of the house of Hanover, his expectations of further preferment were disappointed. In 1720 he published his poems, by subscription, which produced him £1000, but embarking in the South Sea bubble, he lost the whole. In 1727 appeared his *Beggar's Opera*, by which he got altogether about £1000. Gay was at all times a bad economist, and the duke and duchess of Queensbury took him into their house, and managed his affairs, so that at his death, which took place December 4, 1735, he left upwards of £5000. His remains were interred in Westminster abbey, where a monument was erected to his memory, with an epitaph written by Pope, who describes him

Of manners gentle, of affections mild,  
In wit a man, in simplicity a child.

Dr. Johnson says, that Pope offered an English *Iliad* to the subscribers, in six volumes quarto, for six guineas. Bernard Lintot became proprietor, on condition of supplying, at his own expense, all the copies which were to be delivered to subscribers, or presented to friends, and paying £300 for every volume.

The subscribers were five hundred and seventy-two. The copies for which subscriptions were given, were six hundred and fifty-four. For these copies, Pope had nothing to pay; he, therefore, received, including the £300 per volume, five thousand three hundred and twenty pounds, four shillings, without deduction, as the books were supplied by Lintot.

*Homer*, finely printed from an Elzevir letter by William Bowyer, sold at 2s. 6d. a volume bound.

† See Nichols's *Literary Anecdotes*, vol. viii. p. 179.

doubtedly conceived a very ill impression of his *quondam* bookseller, and vented his indignation without mercy in the *Dunciad*. His principal delinquency, however, seems to have been, that he was a stout man, clumsily made, not a very considerable scholar, and that he filled his shop with *rubric posts*. Against his benevolence and general moral character there is not even an insinuation. In the first book, he is thus ungraciously introduced—

"Hence Miscellanies spring, the weekly boast  
Of Curll's choice press, and Lintot's rubric post."

On which the learned annotator remarks, that "the former was fined by the court of king's bench for publishing obscene books; the latter usually adorned his shop with titles in red letters."

In the race described in the second book of the *Dunciad*, in honour of the goddess of Dulness, Lintot and Curll are entered as rival candidates:

"But lofty Lintot in the circle rose:  
'This prize is mine; who tempt it are my foes;  
With me began this genius, and shall end;  
He spoke; and who with Lintot shall contend?  
Fear held him mute. Alone, untaught to fear,  
Stood dauntless Curll; 'behold that rival here!  
The race by vigour, not by vanities, is won;  
So take the hindmost, hell!' (he said) and ran.  
Swift as a bird the balliff leaves behind,  
He left huge Lintot, and out-stripp'd the wind.  
As when a dab-chick waddles through the coope  
On feet and wings, and flies, and wades, and hops;  
So lab'ring on, with shoulders, hands, and head,  
Wide as a windmill all his figure spread,  
With arms expanded Bernard rows his state,  
And left-legg'd Jacob\* seems to emulate."

Bernard Lintot appears to have soon after relinquished his business to his son Henry, and to have retired to Horsham, in Sussex; for which county he was nominated high sheriff in November, 1735, an honour which he did not live to enjoy. He died at the age of sixty-one years. In the newspapers of the day he was styled "Bernard Lintot, esq., of the Middle Temple, late an eminent bookseller in Fleet-street."

1736. *Proceedings in the submission betwixt W. R. Freebairn, his majesty's printer, and Mr. J. Blair, of Ardblair, and Mr. J. Nairn, of Greenyards, aspiring to be King's Printers.* Edinburgh, 1736, folio.

1736. *Died*, THOMAS JAMES, letterfounder in Bartholomew close, London. He was the son of the rev. John James, vicar of Basingstoke, and served his apprenticeship with Mr. Robert Andrews. In 1710 he went to Holland for the purpose of purchasing a set of matrices, and on his return commenced business in Aldermanbury, from thence he removed to Town-ditch, and at length settled in St. Bartholomew close. He was connected with Ged in prosecuting the design of stereotype printing, in which he expended much of his fortune, and suffered in his proper business; "for the printers," say Rowe Mores, "would not employ him, because the block-printing, had it succeeded, would have been

prejudicial to theirs." Upon the death of Mr. James, the following circular was issued through the trade:—*Advertisement.* The death of Mr. Thomas James, of Bartholomew-close, letterfounder, having been industriously published in the newspapers, without the least mention of any person to succeed in his business, it is become necessary for the widow JAMES to give as public notice, that she carries on the business of letterfounding, to as great exactness as formerly, by her son JOHN JAMES, who had managed it during his father's long illness; the letter this advertisement is printed on being his performance: And he casts all other sorts, from the largest to the smallest size; also the Saxon, Greek, Hebrew, and all the oriental types of various sizes.

1736, April 2. *Died*, JACOB TONSON, the elder, the most celebrated bookseller that this country ever produced. He was the son of a barber-surgeon of the same name in Holborn, who died in 1668. He was apprenticed June 5, 1670, to Thomas Basset,\* bookseller, and having been admitted a freeman of the company of stationers, Dec. 20, 1677, commenced business on his own account. At this period his finances could not have been very flourishing; for it is recorded that he was unable to pay twenty pounds for the first play of Dryden's, the *Spanish Friar*, 1681, and was accordingly compelled to admit another bookseller to share in the transaction. To this circumstance, added to the lucky bargain with the possessor of the copyright of *Paradise Lost*,† may be referred most of his subsequent popularity and good fortune.

Sir Walter Scott (says our author) has presented the several unedited letters between the poet and his publisher, which throws a good deal of light upon the history of both. The earliest of these was in 1684, preparatory to the printing of the second volume of *Miscellaneous Poems*,‡ equally known by the name of Dryden or of Tonson, and is written in terms of great familiarity, with thanks for "two melons." Tonson's reply is perfectly the tradesman's; satisfied with the translations of *Ovid*, which he had received for his third *Miscellany*, but objecting, as usual,

\* Dunton characterizes a Mr. R. Basset, in Fleet-street. "I shall not speak of the wit and parts of this young man; but that remarkable fortitude that shines so bright in his countenance. It is true, fighting is not his trade; yet he can wear his courage upon occasion as handsomely as a gentleman does learning; for he knows how to approve both his loyalty and valour; and I really believe would be as liberal of his blood as his money, for the preservation of our dear-bought new-recovered liberties."

† Barbazan Allmer, the assignee of Samuel Simmons, disposes of one half of his right in *Paradise Lost*, to Jacob Tonson, August 17, 1663: the other half at an advance, March 24, 1669.

‡ Speaking of Tonson's *Miscellany Poems*, in a letter dated May 20, 1799, Pope says, "I shall be satisfied if I can lose my time agreeably this way, without losing my reputation. I can be content with a bare saving game, without being thought an eminent head (with which *Mille Jacob* graciously dignified his adventurers and volunteers in poetry.) Jacob creates poets, as kings do knights; not for their honour, but for their money. Certainly he ought to be esteemed a worker of miracles, who is grown rich by poetry." Wycherly, in reply, with an indecent allusion to scripture, observes, "You will make Jacob's ladder raise you to immortality."

\* Jacob Tonson the elder.—This epithet arose from an awkwardness of gait.

to the price—having, as he stated, only 1446 lines for fifty guineas, when he expected to have had at the rate of 1518 lines for forty guineas; adding that he had a better bargain with *Juvenal*, which is reckoned not so easy to translate as *Ovid*. The value of Dryden's translations of the classics was so fully impressed upon Tonson's mind, in consequence of the rapid sale of the six volumes of *Miscellanies*, among which they had appeared, that he induced the poet to undertake a version of Virgil's *Æneids* and *Georgics*. Mr. Malone's industry has ascertained the terms on which this compact was to have been fulfilled. There were two classes of subscribers, the first of whom paid five guineas each, to adorn the work with engravings; beneath each of which, in due and grateful remembrance, were blazoned the arms of a subscriber. This class amounted to one hundred and one persons. The second subscribers were two hundred and fifty in number, at two guineas each. But from these sums was to be deducted the expense of the engravings, though these were only the plates used for Ogilby's *Virgil*, a little retouched. Besides the subscriptions, Dryden received from Tonson fifty pounds for each book of the *Georgics* and *Æneid*, and probably the same for the *Pastorals* collectively. The price charged by Jacob for the copies delivered to subscribers, appears to have been exorbitant, and reduced the amount of Dryden's profits to about twelve or thirteen hundred pounds, a sum trifling, when compared with the remuneration received by Pope for his version of the *Iliad*, which was somewhere between five and six thousands pounds. When Dryden's translations had advanced as far as the completion of the seventh *Æneid*, a little quarrel broke out between him and his publisher; during which the poet charges Tonson with a view from the very beginning to deprive him of all profit—by the second subscriptions, alluding, of course, to the excessive price required by the bookseller for the volumes from the subscribers. By his success in trade, Tonson had acquired a sufficient sum to purchase an estate at Ledbury, in Hertfordshire, where he died. In 1703, about forty noblemen and gentlemen formed the famous Kit-cat club,\* purely from the design of distinguishing themselves by an active zeal for the Protestant succession in the house of Hanover. Jacob Tonson was their secretary, and by virtue of that office, became possessed of the pictures of all the original members of that club.

Immortal made, as *Kit-cat* by his pies.

Jacob Tonson, however plain in his appearance, was certainly a worthy man;† and was not

only respected, but lived in familiar intimacy with some of the most considerable persons of his day.\*

A splendid volume under the title of *The Kit-Cat Club*, done from the original paintings of sir Godfrey Kneller, by Mr. Faber, sold by J. Tonson in the Strand, and T. Faber, at the Golden Head in Bloomsbury-square, was published in 1735; containing an engraved title-page and dedication; and forty-three portraits beginning with sir Godfrey Kneller, and ending with Mr. Tonson's, who is represented in a gown and cap, holding in his right hand a volume lettered *Paradise Lost*. Faber began the plates, which are all dated in 1732; and the volume is dedicated to the duke of Somerset, "to whose liberality the collection of prints owed its very being, in setting the example to the other members of the Kit-cat club of honouring Mr. Tonson with these portraits;" and who was "ever eminently distinguished by that noble principle, for the support of which that association was known to have been formed, the love of their country and its constitutional liberties."

1736, July. The plan of inserting a regular series of the *Parliamentary Debates* in the *Gentleman's Magazine*, was first put into practice at this time. From the time of Mr. Cave's first connexion with the newspaper, at Norwich, while he was an apprentice, he conceived a strong idea of the utility of publishing the debates, and had an opportunity, whilst engaged in a situation at the post-office, not only as stated by Dr. Johnson, of supplying his London friends with provincial papers; but he also contrived to furnish the country printers with these *minutes* of the proceedings in the two houses of parliament, which, says Mr. Nichols, "within my own remembrance, were regularly circulated in the coffee houses, before the daily papers were *tacitly permitted* to report the debates." We have already given instances of Mr. Cave's infringement of the orders of the house of commons. The method of proceeding to obtain the debates, is thus related by sir John Hawkins:

"Taking with him a friend or two, he found means to procure for them and himself admission into the gallery of the house of commons, or to some concealed station in the other house; and then they privately took down notes of the several speeches, and the general tendency and substance of the arguments. Thus furnished, Cave and his associates would adjourn to a neighbouring tavern, and compare and adjust their notes; by means whereof, and the help of their memories, they became enabled to fix at least the substance of what they had so lately heard and remarked. The reducing this crude

\* They met at a house in Shire-lane; and took their title from the name of *Christopher Cat*, a pastry-cook, who excelled in making mutton-pies, which were regularly part of the entertainment. The portraits were painted by sir Godfrey Kneller, on canvas somewhat larger than a three quarters, and less than a half, length: a size which has ever since been denominated a Kit-cat from this circumstance. Sir Godfrey Kneller died Oct. 26, 1733, aged 75.

† For Danton's character of Jacob Tonson, and his dealing with Dryden, see page 561, *ante*.

\* Both Lintot and Tonson were rivals for publishing a work of Dr. Young's. The poet answered both letters the same morning, but unfortunately misdirected them. In these epistles, he complained of the rascally cupidity of each. In the one intended for Tonson, he said, that Lintot was a great scoundrel, that printing with him was out of the question; and writing to Lintot, he declared that Tonson was an old rascal, with other epithets equally opprobrious.

matter into form was the work of a future day and of an abler hand; Guthrie, the historian, a writer for the booksellers, whom Cave retained for the purpose." But these debates were not given till the session was ended; and then only with the initial and final letters of each speaker.

Thus far all went on smoothly for two years; till on the 20th of April, 1738, a complaint being made to the house, that the publishers of several written and printed news letters and papers had taken upon them to give accounts therein of the proceedings of the house; it was resolved, "That it is a high indignity to, and a notorious breach of, the privilege of this house, for any news-writer, in letters, or other papers, to give therein, any account of the debates, or other proceedings of this house, or any committee thereof, as well during the recess, as the sitting of parliament; and that this house will proceed with the utmost severity against such offenders." During the debates, sir William Younger earnestly implored the house of commons to put down the printing of the debates of the house; he was followed by sir Thomas Winnington, who, in the midst of a long speech, made the following observation:—"You will have the speeches of the house every day printed, even during your session, and we shall be looked upon as the most contemptible assembly on the face of the earth." The absurd spirit which dictated this resolution, has not yet departed from the legislature; and it has been truly remarked, that even at the present hour, "were the question put, whether journalists attend to report by connivance, or by open suffrance, there is little doubt the sticklers for privilege would decide for the former."

Some expedient was now become necessary; and the caution (not the vanity) of Cave suggesting to him a popular fiction; in June, 1738, he prefaced the debates by what he chose to call "An Appendix to Captain Lemuel Gulliver's Account of the famous Empire of Lilliput;" and the proceedings in parliament were given under the title of "Debates in the Senate of Great Lilliput." Not thinking himself, however, perfectly secure, even by this total concealment of the speakers, he did not venture to put his own name to the title-pages of the magazine; but published them under the name of one of his nephews, Edward Cave, junior, which was continued until 1752. In the following year he again used his own name, and gave the debates, as at first, with the initial and final letters.

A new era in politics, occasioned by the motion to remove the minister, Feb. 13, 1740-41, bringing on much warmer debates, required "the pen of a more nervous writer than he who had hitherto conducted them" and "Cave, dismissing Guthrie, committed the care of this part of his monthly publication to Johnson," who had already given ample specimens of his ability. But the Lilliputian disguise was still continued, even beyond the period of Johnson's debates, which, as has been authenticated by his own diary, began Nov. 19, 1740, and ended

Feb. 23, 1742-3.\* And these debates, which, every competent judge must allow, exhibit a memorable specimen of the extent and promptitude of Johnson's faculties, and which have induced learned foreigners to compare British with Roman eloquence, were hastily sketched by Johnson, while he was not yet thirty-two, while he had little acquaintance with life, while he was struggling, not for distinction, but existence.

On the 3d of April, 1747, a complaint having been made in the house of lords against Edward Cave and Thomas Astley, for printing in their respective magazines (the *Gentleman's* and the *London*) an account of the Trial of Simon Lord Lovat, they were both ordered into the custody of the gentleman usher of the black rod.—On the 10th of April, Mr. Cave, in custody, petitioned the house; expressing his sorrow for his offence; begging pardon for the same; promising never to offend again in the like manner; and praying to be discharged.—On the 30th of April, the lord Raymond reported from the committee appointed to consider of the offences of Astley and Cave, "that they had ordered Cave to be brought before them; and the book complained of being shown to him, he owned that he printed and published it." Being asked, "how he came to publish an account of lord Lovat's trial, and from whom he had the account so published?" he said, "it was done inadvertently; he was very sorry for having offended; that he published the said account of the trial

\* In 1740-1, Dr. Johnson succeeded William Guthrie in drawing up the debates. The eloquence, the force of argument, and the splendour of language, displayed in the several speeches, are well known, and universally admired. The following anecdote is related by sir John Hawkins:—"Dr. Johnson, Mr. Wedderburn, (lord Loughborough) Dr. Francis, the translator of Horace, Mr. Murphy, Mr. Chetwyn, and several other gentlemen, dined with Foote. After dinner, an important debate, toward the end of sir Robert Walpole's administration, being mentioned, Dr. Francis observed, that Mr. Pitt's speech, upon that occasion, was the best he had ever read. He had been employed, he added, during a number of years, in the study of Demosthenes, and had finished a translation of that celebrated orator, with all the decorations of style and language within the reach of his capacity. Many of the company remembered the debate, and several passages were cited from the speech, with the approbation and applause of all present. During the ardour of the conversation, Johnson remained silent. When the warmth of praise subsided, he opened with these words: 'That speech I wrote in a garret in Exeter-street.' The company was struck with astonishment. After staring at each other for some time, in silent amazement, Dr. Francis asked how that speech could be written by him. 'Sir, said Johnson, I wrote it in Exeter-street: I never was in the gallery of the house of commons but once: Cave had interest with the door-keepers: he and the persons employed under him got admittance: they brought away the subject of discussion, the names of the speakers, the side they took, and the order in which they rose, together with notes of the various arguments adduced in the course of the debate. The whole was afterwards communicated to me, and I composed the speeches in the form they now have in the parliamentary debates. For the speeches of that period are all reprinted from Cave's Magazine.' To this discovery Dr. Francis made answer: 'Then, sir, you have exceeded Demosthenes himself, for to say you have exceeded Francis's Demosthenes would be nothing.' The rest of the company were lavish of their compliments to Johnson: one, in particular, praised his impartiality, observing that he had dealt out reason and eloquence with an equal hand to both parties. "That is not quite true, sir," said Johnson; "I saved appearances well enough, but I took care that the whig dogs should not have the best of it."

from a printed paper which was left at his house, directed to him; but he does not know from whom it came." Being asked, "how long he has been a publisher of the *Gentleman's Magazine*?" he said, "that it is about sixteen years since it was first published; that he was concerned in it at first with his nephew; and since the death of his nephew, he has done it entirely himself." Notice being taken to him, "that the said books have contained debates in parliament;" he said, "he had left off the debates; that he had not published any debates relative to this house above these twelve months; that there was a speech or two relating to the other house, put in about the latter end of last year." Being asked, "how he came to take upon him to publish debates in parliament?" he said, "he was extremely sorry for it; that it was a very great presumption; but he was led into it by custom, and the practice of other people: that there was a monthly book, published before the magazines, called the *Political State*, which contained debates in parliament; and that he never heard, till lately, that any persons were punished for printing those books." Being asked, "how he came by the speeches which he printed in the *Gentleman's Magazine*?" he said, "he got into the house, and heard them, and made use of a black lead pencil, and only took notes of some remarkable passages; and, from his memory, he put them together himself." Notice being taken to him, "that some of the speeches were very long, consisting of several pages;" he said, "he wrote them himself, from notes which he took, assisted by his memory." Being asked, "whether he printed no speeches but such as were so put together by himself, from his own notes?" he said, "Sometimes he has had speeches sent him by very eminent persons; that he has had speeches sent him by the members themselves; and has had assistance from some members, who have taken notes of other members' speeches." Being asked, "if he ever had any person whom he kept in pay, to make speeches for him?" he said, "he never had."

The report proceeds to state, that Astley had been also brought before them; and a former examination of the 8th of April having been read to him, he said, "that contained all the information he was able to give their lordships."

"Few of the collections of parliamentary debates can be justly regarded as much more authentic than *Johnson's Orations*. The most ancient are probably the most authentic. *D'Ewe's Journals of Elizabeth's Parliaments*, as they contain the oldest parliamentary speeches, are assuredly the most curious. The first volume of the *Commons' Journals* contains several important debates during the interesting period from the accession of James I. till the cessation of parliaments under his unhappy son. The authentic debates of the session, 1621, were published in 1768, from a member's manuscript. The collections of Rushworth contain many of the parliamentary debates during the civil wars. To these follow *Gray's Debates*, which are still

more authentic. But as to those various collections, which profess to give the parliamentary debates during that disputatious period, from the Restoration till late times, they can be deemed of little more authority than the speeches of Johnson.

"It was the Revolution which finally unshackled the press. But it was still criminal, at least dangerous, to publish parliamentary proceedings without parliamentary permission. During king William's reign, the newspapers sometimes gave a detached speech of a particular speaker, who wished, by contributing the outlines, to gratify his vanity, or secure his seat.

"It was in the factious times which immediately succeeded, when parliamentary debates were first distributed through the land in monthly pamphlets. Then it was that Boyer's zeal propagated the *Political State*. This was succeeded, on the accession of George I. by the *Historical Registers*, which were published by soberer men, and may be supposed therefore to contain more satisfactory information.

"The *Gentleman's Magazine* soon after furnished the public with still more finished debates, which were first compiled by Guthrie, then by Johnson, and afterwards by Hawkesworth. The success of this far-famed miscellany prompted many competitors for public favour, who all found an interest in propagating what the people read, however contrary to parliamentary resolves. And these resolves have at length given way to the spirit of the people, who, as they enjoy the right of instructing their representatives, seem to have established the privilege of knowing what their representatives say."

1736. *Died*, JOSEPH DAMER, formerly a bookseller at Dorchester, which town he represented in parliament in 1722. He retired to Ireland, where he died, aged 60 years, the richest private gentleman, and the greatest miser in that country, having raised a fortune for his family, which was ennobled by his son, lord Milton. Mr. Damer married Mary, the daughter of John Churchill, and niece to Awnsham Churchill, noticed at page 639 *ante*. The following lines are taken from a whimsical little work, called *Jemmy Carson's Collections*, &c. and form part of "an elegy on the much lamented death of Mr. Damer, the famous rich man, who died the sixth day of July, 1723."<sup>†</sup>

"Beneath this verdant hillock lies,  
Damer the wealthy and the wise;  
His heirs, that he might safely rest,  
Have put his carcass in a chest;  
The very chest in which they say  
His other self, his money lay  
And if his heirs continue kind  
To that dear self he left behind,  
I dare believe that four in five  
Will think his better half alive."

1736, *Died*, JAMES KNAPTON, of whom Dunton says, "he is a very accomplished person; not that sort of animal that flutters from tavern

\* Preface to *Johnson's Debates*, 1787, pp. 6-9.

† Mr. Nichols, in his account of the Churchills, vol. i. p. 136, *Literary Anecdotes*, says Mr. Damer died in 1736.

to playhouse, and again back again, all his life made up with wig and cravat, without one dram of thought in his composition; but a person made up with sound worth, brave and generous; and shows, by his purchasing *Dampier's Voyages*, he knows how to value a good copy." Mr. Knapton continued business with great reputation till his death, in 1736; and was succeeded by two of his brothers, John and Paul Knapton, both men of great eminence.

1736, Feb. 22. *Died*, WILLIAM CHURCHILL, esq., bookseller to his majesty. He was immensely rich, to which his printing Rymer's *Fœdera*, at queen Anne's expense, greatly contributed.

1736, May 25. Mr. BENJAMIN MOTTE, bookseller, London, filed a bill in chancery against Mr. Faulkner,\* bookseller, of Dublin, to prevent the sale of the Dublin edition of Swift's works in England. Swift interposed on this occasion, for he wrote a letter to Motte of the above date, and it would appear his mediation was successful, from the subsequent amicable interview between the two booksellers.

1736, May 27. A society for the encouragement of learning was established upon this day, in London, the object of which was to assist authors in the publication of their works. The duke of Richmond, president, with about one hundred members. Mr. Bowyer, Mr. Bettenham, and Mr. Richardson, were the three first appointed printers; Mr. Gordon was the secretary, with a salary of £50 a-year, and Dr. Birch, treasurer. However liberal the idea of such an institution might have been, the execution of it counteracted the intention of its founders. It was, in fact, a direct attack on the booksellers, who, after all, are certainly no bad "rewarders of literary merit;"\* and their assistance having been found indispensably necessary to the undertaking, a contract was entered into, for three years, with A. Millar, J. Gray, and J. Nourse. A new contract was afterwards entered
